(B) CureVac will solely own any Foreground Intellectual Property that is a CureVac Improvement that is not also a CRISPR Improvement at the time such CureVac Improvement is discovered, created, conceived, developed or reduced to practice, regardless of the Party or Parties such Foreground Intellectual Property was discovered, created, conceived, developed or reduced to practice by or on behalf of, and CRISPR, for itself and on behalf of its and its Affiliates' employees, subcontractors, consultants and agents hereby assigns and agrees to assign, all of its rights, title and interest in such Intellectual Property to CureVac. CRISPR shall execute and deliver to CureVac, to the extent necessary, any deed(s) of such assignment, in a mutually agreeable form and will take whatever actions reasonably necessary, including the appointment of CRISPR as its attorney in fact solely to make such assignment, to effect such assignment.

(C) To the extent a particular item of Foreground Intellectual Property constitutes both a CRISPR Improvement and a CureVac Improvement, (“**Dual Improvement Intellectual Property**”), the Parties shall discuss in good faith whether any such Foreground Intellectual Property can be divided and owned in accordance with subsections (A) and (B) above, made subject to separate patent filings to be assigned accordingly; and to the extent no such division is possible, such Dual Improvement Intellectual Property shall be treated as part of the Jointly-Owned Foreground Intellectual Property for all purposes under this Agreement.

7.2 **Right to Sublicense.** CRISPR shall be entitled to sublicense (through multiple tiers) its rights under Section 7.1(a) to any Affiliates and to any Third Parties, provided that sublicenses to Third Parties require CureVac’s prior written consent which CureVac will not unreasonably withhold, condition or delay and that such sublicenses are subject to the Non-Royalty Sublicense Income in accordance with Section 5.3 above. For any sublicense it must be provided that the respective sublicense agreement contains terms and conditions that are not inconsistent with those contained in this Agreement, and shall include provisions regarding confidentiality, indemnification, audit, record-keeping and termination. CRISPR shall remain liable to CureVac for all obligations under this Agreement. CRISPR shall furnish CureVac with a fully executed copy of any sublicense agreement promptly after its execution, subject to reasonable redactions to the extent not necessary for CureVac to understand the scope of such sublicense, to calculate the Non-Royalty Sublicense Income and to determine if CRISPR is in compliance with this Section 7.2, and subject to the confidentiality provisions therein. The terms of any such sublicense agreement shall be Confidential Information of CRISPR.

7.3 **Disclosure.** Each Party will promptly disclose to the other Party all Foreground Know-How that is discovered, created, conceived or reduced to practice by or on behalf of such Party, and will provide documentation regarding the same as the other Party may reasonably request, including, information obtained by CureVac relating to CureVac’s proprietary mRNA technology platform generally that would reasonably have an impact on any Cas9 mRNA Constructs or Licensed Products.

7.4 **Third Party Licenses.** To the extent CRISPR identifies any Patent Rights controlled by a Third Party that are reasonably necessary for a Party to freely exercise, practice or otherwise use the CureVac Background Patent Rights or the Foreground Patent Rights solely owned by CureVac, in each case, in connection with a Party’s direct or indirect performance of its rights or obligations under this Agreement, and with respect to CRISPR’s exploitation of Cas9 mRNA Constructs included in a Licensed Product in accordance with this Agreement, only if such Cas9 mRNA Constructs are defined by CureVac, CRISPR will promptly notify CureVac of such Patent Rights, Know-How or other intellectual property and CureVac will have the first right to negotiate for and enter into a license agreement (“**Third Party Agreement**”) with respect to such Patent Rights, Know-How, or other intellectual property, provided that CureVac will notify CRISPR if CureVac wishes to exercise such right within [\*\*\*\*] days of CRISPR’s notice, and such first right will continue until the earlier of (x) [\*\*\*\*] days after the date of CureVac’s notice to CRISPR exercising such right or (y) CureVac is no longer actively negotiating such agreement, in which case CureVac will so notify CRISPR (such period is referred to the “**First Exercise Period**”), and CureVac will keep CRISPR reasonably informed as to the status of such negotiations. If CureVac does not notify CRISPR of its intent to exercise such right or the First Exercise Period expires, CRISPR will have the right to negotiate for and enter into a Third Party Agreement with respect to such Patent Rights, Know-How or other intellectual property.

**Article 8**  
**PROSECUTION AND ENFORCEMENT**

8.1 **Patent Prosecution.** As between the Parties, each Party will have the sole right, but not the obligation, to file, prosecute and maintain the Patent Rights owned solely by such Party. During the Term, CureVac will consult with CRISPR as to the preparation, filing, prosecution, and maintenance of any of its Foreground Patent Rights reasonably prior to any deadline or action with the United States Patent & Trademark Office or any foreign patent office and will furnish CRISPR with copies of all relevant documents reasonably in advance of consultation. CureVac will reasonably consider any of CRISPR's reasonable comments on any documents to be submitted to such patent offices. In the event CureVac (i) decides not to file a patent application pertaining to any Foreground Know-How in any given country or countries, or (ii) desires to abandon any patent or patent application within the Foreground Patent Rights, then, in each case, CureVac shall provide CRISPR with reasonable prior written notice of such intended decision not to file or such intended decision of abandonment or decline of responsibility. If CRISPR elects to file any such patent application on behalf of CureVac, or if CRISPR elects to continue such patent or patent application on behalf of CureVac, the Parties shall promptly consult and CureVac may elect to retain responsibility therefor provided that any such decision shall be made in a sufficiently prompt time so as not to jeopardize CRISPR's ability to file such patent application or its ability to pursue or maintain such patent or patent application. Otherwise, CRISPR shall have the right, but not the obligation, to prepare, file, prosecute and maintain the relevant Foreground Patent Rights, as applicable, or seek patent protection in the first instance, on behalf of CureVac and at CRISPR's expense.

8.2 **Prosecution of Jointly-Owned Foreground Patent Rights.** CRISPR will have the first right, but not the obligation to file, prosecute and maintain Jointly-Owned Foreground Patent Rights, and will bear the costs incurred by CRISPR in connection with such efforts. CRISPR will consult with CureVac as to the preparation, filing, prosecution and maintenance of the Jointly-Owned Foreground Patent Rights reasonably prior to any deadline or action with any patent office and will furnish CureVac with copies of all relevant documents reasonably in advance of consultation. CRISPR will reasonably consider any of CureVac's reasonable comments on any documents to be submitted to such patent offices. In the event CRISPR (i) decides not to file a patent application pertaining to any Jointly-Owned Foreground Know-How in any given country or countries, or (ii) desires to abandon any patent or patent application within the Jointly-Owned Foreground Patent Rights, then, in each case, CRISPR shall provide CureVac with reasonable prior written notice of such intended decision not to file or such intended decision of abandonment or decline of responsibility. If CureVac elects to file any such patent application, or if CureVac elects to continue such patent or patent application, the Parties shall promptly consult and CRISPR may elect to retain responsibility therefor provided that any such decision shall be made in a sufficiently prompt time so as not to jeopardize CureVac's ability to file such patent application or its ability to pursue or maintain such patent or patent application. Otherwise, CureVac shall have the right, but not the obligation, to prepare, file, prosecute and maintain the relevant Foreground Patent Rights, as applicable, or seek patent protection in the first instance, at CureVac's expense.

8.3 **Cooperation.** Each Party will provide the other Party, at the other Party's request and expense, all reasonable assistance and cooperation in connection with this **Article 8**, including providing any necessary powers of attorney and executing any other required documents or instruments for such filing, prosecution or maintenance, and joining any lawsuit as needed for standing.

#### 8.4 Third Party Actions.

(a) Patent Infringement Claims Against a Party. Each Party shall notify the other if it is aware of any claim that the Development, Manufacture, Commercialization or other use of a Licensed Product in the Field infringes a Patent Right Controlled by a Third Party, setting forth the facts of such claim in reasonable detail. CRISPR shall have the first right, but not the obligation, at its own expense, to defend and control the defense of any such claim, by counsel of its own choice. CRISPR shall not enter into a settlement that imposes a financial obligation upon CureVac or which limits the scope or invalidates any CureVac's intellectual property rights without CureVac's prior written consent and in any settlement CRISPR shall always take into consideration the interest of CureVac. In case CRISPR elects not to defend and control the defense of any such claim, it shall notify CureVac of such election within due term to allow CureVac to defend and control the defense of any such claim.

(b) Notice. If either Party learns of any (i) actual, alleged or threatened infringement or misappropriation of any of the Licensed Patent Rights in the Field, including based on the Development or Commercialization of a product that competes with a Licensed Product; (ii) declaratory judgment initiated by a Third Party naming a Party, or a Party's Affiliate or a Sublicensee as a defendant and alleging invalidity, unenforceability or non-infringement of any of the Licensed Patent Rights Covering the Development or Commercialization of a Licensed Product in the Field ("**Competitive Infringement**"), or (iii) declaratory judgment initiated by a Third Party naming a Party or a Party's Affiliate or Sublicensee as a defendant and alleging invalidity, unenforceability or non-infringement of any Licensed Patent Rights Covering the Manufacture of a Licensed Product in the Field, such Party shall promptly notify the other Party and shall provide the other Party with available evidence of such infringement or declaratory action.

(c) Enforcement and Defense. CRISPR shall have the first and exclusive right, but not the obligation, to take any reasonable measures it deems appropriate with respect to any Competitive Infringement in the Territory of any Licensed Patent Rights. Such measures may include (a) initiating or prosecuting an infringement, misappropriation or other appropriate suit or action (each an "**Infringement Action**") in the Territory, or (b) granting adequate rights and licenses to any Third Party necessary to render continued Competitive Infringement in the Territory non-infringing. Notwithstanding the foregoing, if CRISPR does not inform CureVac that it intends to either initiate such an Infringement Action or grant adequate rights and licenses to such Third Party within [\*\*\*\*\*] after CRISPR's receipt of a notice of infringement, then CureVac will have the second right, but not the obligation, to initiate such Infringement Action with respect to such Licensed Patent Rights. For any infringement other than a Competitive Infringement, and except as set forth below, each Party will have the first right, but not the obligation to enforce and defend the Licensed Patent Rights owned solely by such Party, and CRISPR will have the first right, but not the obligation to enforce and defend the Jointly Owned Foreground Patent Rights, with the exception only of Jointly-Owned Foreground Patent Rights which solely Cover the Manufacture of the Licensed Products, for which CureVac will have the first right, but not the obligation to enforce and defend. If within [\*\*\*\*\*] after having been notified of any alleged Third Party infringement of any Licensed Patent Right or any declaratory action contemplated by Section 8.4(d), in each case, in the Field, the Party enforcing or defending the Patent Right is unsuccessful in persuading the alleged infringer to desist, or the respective competent Party shall not have brought an infringement action within such [\*\*\*\*\*] period, or if the respective competent Party has not responded to such declaratory action, then, in any such event the other Party shall have the right, but not the obligation, to prosecute and defend the respective Licensed Patent Rights in connection with any such matter. The Party taking action to enforce and defend under this Section 8.4(c), shall bear all of its costs related to such enforcement and defense, including any costs incurred by the other Party providing support to such enforcement and defense at the request of the enforcing and defending Party.

(d) Standing to Sue; Collaboration. In any litigation brought by either Party pursuant to this Section 8.4, the enforcing Party shall notify the non-enforcing Party of the commencement of that litigation and shall have the right and standing to use and sue in the other Party's name. Irrespective of which Party brings the infringement action hereunder, (i) the Parties shall collaborate with respect to such action; (ii) the non-enforcing Party shall have the right, at its own expense, to be represented by independent counsel in any such litigation; and (iii) the Parties shall consult with each other regarding and agree on strategic decisions and their implementation in connection with such action. The Party bringing the infringement action hereunder shall bear all the expenses of any suit brought by it claiming infringement of any Licensed Patent Right.

(e) Recovery. In the event that either Party exercises the rights conferred in this Article 8 and recovers any damages or other sums in such action, such damages or other sums recovered shall first be applied to all out-of-pocket costs and expenses incurred by the Parties in connection therewith (including, without limitation, attorneys' fees). If such recovery is insufficient to cover all such costs and expenses of both Parties, the Parties' costs shall be paid on a pro-rated basis. If after such reimbursement any funds shall remain from such damages or other sums recovered, such funds shall be [\*\*\*\*\*] the Parties

#### **Article 9 INDEMNIFICATION**

9.1 Indemnification by CRISPR. Subject to the terms and conditions hereof, CRISPR shall indemnify CureVac, its Affiliates, and its and their directors, officers, employees, approved subcontractors and agents ("CureVac Indemnitees") and defend and hold each of them harmless, from and against any and all Third Party claims and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") that such CureVac Indemnitees may be required to pay to one or more Third Parties to the extent arising from or occurring as a result of (a) an uncured material breach of any of CRISPR's representations, warranties or covenants set forth in this Agreement, (b) the exercise by CRISPR and/or any of its Affiliates or Sublicensees of the rights granted to CRISPR pursuant to Sections 4.1 and 7.1 (including the Development, Manufacture, Commercialization or other use of Licensed Products), except to the extent such Losses are in connection with the CureVac Background Intellectual Property or the Foreground Intellectual Property solely owned by CureVac; or (c) the negligence, recklessness, or willful misconduct by CRISPR or its Affiliates. Notwithstanding the foregoing, CRISPR will have no obligations under this Section to the extent Losses arise from or occur as a result of (i) gross negligence or willful misconduct (including noncompliance with any Applicable Laws, regulations, or rules) on the part of a CureVac Indemnitee, or (ii) a breach by CureVac of any representations, warranties or covenants set forth in this Agreement.

9.2 Indemnification by CureVac. Subject to the terms and conditions hereof, CureVac shall indemnify CRISPR, its Affiliates, and its and their directors, officers, employees, subcontractors, and agents ("CRISPR Indemnitees"), and defend and hold each of them harmless, from and against any Third Party claims and all Losses that such CRISPR Indemnitees may be required to pay one or more Third Parties to the extent arising from or occurring as a result of (a) an uncured material breach of any of CureVac's representations, warranties or covenants set forth in this Agreement, or (b) the negligence, recklessness, or willful misconduct by CureVac or its Affiliates. Notwithstanding the foregoing, CureVac will have no obligations under this Section to the extent Losses arise from or occur as a result of (i) gross negligence or willful misconduct (including non-compliance with any Applicable Laws, regulations, or rules) on the part of a CRISPR Indemnitee, or (ii) a breach by CRISPR of any representations, warranties or covenants set forth in this Agreement.

9.3 **Indemnification Procedures.** Except as set forth in Section 8.4(a), the person claiming indemnity under this Article 9 (the “**Indemnified Party**”) shall give written notice to the Party from whom indemnity is being sought (the “**Indemnifying Party**”) promptly after learning of any claim, *provided*, that the failure to provide such notice shall not affect the Indemnifying Party’s obligations hereunder, except to the extent it is materially prejudiced thereby. The Indemnified Party shall provide the Indemnifying Party with reasonable assistance, at the Indemnifying Party’s expense, in connection with the defense of the claim for which indemnity is being sought. The Indemnified Party may participate in and monitor such defense with counsel of its own choosing at its sole expense; *provided, however*, the Indemnifying Party shall have the right to assume and conduct the defense of the claim with counsel of its choice. The Indemnifying Party shall not settle a claim in any manner that would require payment by the Indemnified Party, or would materially adversely affect the rights granted to the Indemnified Party hereunder, or would materially conflict with the terms of this Agreement, or adversely affect such Party or its products, without first obtaining the indemnified Party’s prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed. So long as the Indemnifying Party is actively defending the claim in good faith, the Indemnified Party shall not settle or compromise any such claim without the prior written consent of the Indemnifying Party, such consent not to be unreasonably withheld, conditioned or delayed. If the Indemnifying Party does not assume and conduct the defense of the claim as provided above, (a) the Indemnified Party may defend against, consent to the entry of any judgment, or enter into any settlement with respect to such claim in any manner the Indemnified Party may deem reasonably appropriate (and the Indemnified Party need not consult with, or obtain any consent from, the Indemnifying Party in connection therewith), and (b) the Indemnifying Party shall remain responsible to indemnify the Indemnified Party as provided in this Article 9.

**Article 10**  
**REPRESENTATIONS AND WARRANTIES**

10.1 **CureVac Representations.** Subject to the disclosures in **Attachment H** hereto, CureVac represents, warrants and covenants to CRISPR, on the Effective Date, as follows.

- (a) CureVac is a stock corporation, validly existing and in good standing under the laws of Germany, with full power and authority to operate its properties and to carry on its business as presently conducted.
- (b) CureVac has full power and authority to execute, deliver and perform this Agreement. This Agreement constitutes legally binding and valid obligations of CureVac, enforceable in accordance with their terms;
- (c) The execution and delivery of this Agreement and the performance of the obligations contemplated hereby have been duly authorized by all appropriate CureVac corporate action;

(d) The execution, delivery and performance by CureVac of this Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any contract or agreement to which CureVac is a party or by which it is bound.

(e) To the knowledge of CureVac, no consent, approval, order or authorization of, or registration, qualification, designation, declaration or filing with, any federal, state or local governmental authority on the part of CureVac is required in connection with the execution, delivery and performance of this Agreement.

(f) There is no action, suit, proceeding or investigation pending or, to the knowledge of CureVac, currently threatened in writing against or affecting CureVac that questions the validity of this Agreement or the right of CureVac to enter into this Agreement or perform CureVac's obligations hereunder.

(g) There are no claims, judgments, settlements, litigations, suits, actions, disputes, arbitration, judicial, administrative or legal proceedings pending or, to the knowledge of CureVac, threatened, against CureVac, including with respect to administrative or other governmental investigations, which would (a) be reasonably expected to affect or restrict the ability of CureVac to perform its obligations under this Agreement, or (b) affect in any manner the Licensed Intellectual Property or CureVac's Control thereof.

(h) To the knowledge of CureVac, no Third Party is conducting or engaging in any activity that would constitute infringement or misappropriation of the Licensed Intellectual Property; and to the knowledge of CureVac, the performance of activities contemplated by this Agreement (including the practice of the Licensed Intellectual property in accordance with the terms and conditions of this Agreement) would not itself constitute infringement or misappropriation of Third party's intellectual property rights in existence on the Effective Date.

(i) To CureVac's knowledge, no objection or proceeding is pending or threatened that questions the validity or enforceability of the CureVac Background Intellectual Property or the issuance of any patent applications included therein.

(j) As of and following the Effective Date, CureVac has undertaken reasonable efforts to secure and will continue to use reasonable efforts to secure from all employees, consultants, contractors and other Persons who have contributed or will contribute to the development, creation, conception or invention of any of the Licensed Intellectual Property a written agreement assigning to CureVac or its Affiliates all rights to such developments, creations, conceptions or inventions and such Affiliates have assigned such rights to CureVac, and, to CureVac's knowledge, neither CureVac nor any of its Affiliates has received any written communication challenging CureVac's ownership or right to such Licensed Intellectual Property, unless such an agreement with the inventor is not required under Applicable Law for ownership in such Licensed Intellectual Property to vest in CureVac.

10.2 CRISPR's Representations. CRISPR represents and warrants to CureVac, on and as of the Effective Date, that:

(a) CRISPR is a corporation, duly incorporated, validly existing and in good standing under the laws of Switzerland, with full corporate power and authority to operate its properties and to carry on its business as presently conducted;

(b) CRISPR has full power and authority to execute, deliver and perform this Agreement. This Agreement constitutes the legally binding and valid obligations of CRISPR, enforceable in accordance with their terms;

(c) the execution, delivery and performance by CRISPR of this Agreement and the consummation of the transactions contemplated thereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any contract or agreement to which CRISPR is a party or by which it is bound, its business or assets;

(d) no consent, approval, order or authorization of, or registration, qualification, designation, declaration or filing with, any federal, state or local governmental authority on the part of CRISPR is required in connection with the execution, delivery and performance of this Agreement; and

(e) there is no action, suit, proceeding or investigation pending or, to the knowledge of CRISPR, currently threatened against or affecting CRISPR or that questions the validity of this Agreement, or the right of CRISPR to enter into this Agreement or consummate the transactions contemplated hereby.

10.3 Covenants. Each Party covenants and agrees that during the Term, neither it, nor its Affiliates, will take any action or cause or permit the taking of any action that would have the effect of invalidating or breaching any of the representations or warranties contained in Section 10.1 or 10.2, including, without limitation, any action that would result in any invalidity of any of the Licensed Patent Rights. Without limiting the foregoing, CureVac covenants and agrees that during the Term, neither it, nor its Affiliates, will take any action or cause or permit the taking of any action that would materially adversely affect the rights of CRISPR under this Agreement. For clarity, CureVac cannot and will not grant a license to any Third Party to the extent CRISPR has obtained exclusive rights under this Agreement.

10.4 Disclaimer of Warranties. EXCEPT AS OTHERWISE EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER PARTY MAKES ANY OTHER WARRANTIES CONCERNING PATENT RIGHTS OR ANY OTHER MATTER WHATSOEVER, INCLUDING, WITHOUT LIMITATION, ANY EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT OF THIRD PARTY RIGHTS, OR ARISING OUT OF COURSE OF CONDUCT OR TRADE CUSTOM OR USAGE, AND EACH PARTY DISCLAIMS ALL SUCH EXPRESS OR IMPLIED WARRANTIES.

**Article 11**  
**INSURANCE; LIMITATION OF LIABILITY**

11.1 Insurance. CRISPR shall maintain, at its own cost, a program of insurance and/or self-insurance against liability (including product liability) and any other risks associated with its activities and obligations under this Agreement, the Commercialization of any Licensed Products, and its indemnification obligations hereunder, in such amounts, subject to such deductibles and on such terms as are customary for companies similar to CRISPR for the activities to be conducted by them under this Agreement. Such insurance coverage shall be kept as long as any Licensed Product is Commercialized. CureVac shall maintain, at its own cost, a program of insurance and/or self-insurance against liability and any other risks associated with its activities and obligations under this Agreement, and its indemnification obligations hereunder, in such amounts, subject to such deductibles and on such terms as are customary for companies similar to CureVac for the activities to be conducted by CureVac under this Agreement. Such insurance coverage shall be kept as long as any Licensed Product is commercialized.

11.2 Consequential Damages. EXCEPT WITH RESPECT TO WILLFUL MISCONDUCT, GROSS NEGLIGENCE, ANY BREACH OF ARTICLE 6 (CONFIDENTIALITY), OR ANY INDEMNIFICATION OBLIGATIONS UNDER ARTICLE 9, TO THE MAXIMUM EXTENT PERMITTED UNDER APPLICABLE LAWS, IN NO EVENT WILL EITHER PARTY OR ITS AFFILIATES OR ITS OR THEIR OFFICERS, DIRECTORS, EMPLOYEES OR AGENTS BE LIABLE TO THE OTHER PARTY OR ITS AFFILIATES FOR ANY INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) ARISING FROM OR RELATED TO THIS AGREEMENT.

**Article 12**  
**GENERAL COMPLIANCE WITH LAW**

Each Party will use reasonable commercial efforts to comply with all Applicable Law relating to the exercise of rights and satisfaction of obligations under this Agreement.

**Article 13**  
**TERM AND TERMINATION**

13.1 Term. The Term will commence as of the Effective Date, and unless earlier terminated in accordance with this Section 13, will expire on a Licensed Product-by-Licensed Product and country-by-country basis, upon such time as the Royalty Term with respect to the sale of such Licensed Product in such country expires.

13.2 Termination for Breach.

(a) Material Breach. Subject to the other terms of this Agreement, this Agreement may be terminated, on a Program-by-Program basis, by either Party for a material breach by the other Party to this Agreement, *provided* that the breaching Party has not cured such breach within [\*\*\*\*\*] after the date of written notice to the breaching Party, which notice shall describe such breach in reasonable detail and shall state the non-breaching Party's intention to terminate this Agreement pursuant to this Section, provided further that in no event will the failure of CRISPR to pay a disputed amount under this Agreement, the Manufacturing Services Agreement or any Commercial Supply Agreement be considered a material breach of this Agreement.

(b) Program by Program; Development Program. In the event the facts giving rise to termination under Section 13.2(a) relate to one or more Programs but not all Programs, such termination, if any, will relate only to the affected Program(s) and this Agreement will otherwise continue with respect to all other Programs in all respects. Further, if CRISPR exercises any of its termination rights under this Article 13, CRISPR may terminate the Development Program without terminating the remainder of this Agreement.

13.3 Voluntary Termination by CRISPR. CRISPR may terminate this Agreement, in its entirety or on a Program-by-Program basis, at any time upon [\*\*\*\*\*] prior written notice to CureVac.

13.4 Termination for Bankruptcy. If any Party hereto files for protection under bankruptcy laws, makes an assignment for the benefit of creditors, appoints or suffers appointment of a receiver or trustee over its property, files a petition under any bankruptcy or insolvency act or has any such petition filed against it which is not discharged within [\*\*\*\*\*] of the filing thereof, then the respective other Party may terminate this Agreement effective immediately upon written notice to the insolvent Party.

13.5 Change of Control of CRISPR. In the event of (i) a direct or indirect acquisition of beneficial ownership of fifty percent (50%) or more of the voting power in CRISPR by a CureVac Competitor; or (ii) the sale or other disposition of all or substantially all of the assets of CRISPR to a CureVac Competitor; or (iii) the merger, amalgamation or other form of business combination or similar transaction between CRISPR and a CureVac Competitor ("**Change of Control**") the following shall apply:

(a) CRISPR shall promptly give written notice of such Change of Control to CureVac; and

(b) CureVac shall have the right to be released of any or all of its ongoing obligations under the Development Program, and of its obligations of disclosure and information exchange relating solely thereto. In addition, the JSC shall be dissolved upon CureVac's request. For clarity, CureVac shall not have the right to be released from any obligations under this Agreement, the Manufacturing Services Agreement, or the Commercial Supply Agreement relating to the Programs or Licensed Products outside of the Development Program. For further clarity, CRISPR shall retain all rights hereunder to all Cas9 mRNA Constructs and any other deliverables delivered to CRISPR under the Development Program prior to such Change of Control, and CRISPR shall have the right to exploit such Cas9 mRNA Constructs and any other deliverables in accordance with the license grant set forth in Section 7.1.

(c) In addition to the confidentiality obligations according to Article 6, CRISPR shall take reasonable steps to ensure that any Confidential Information of CureVac provided under this Agreement is not shared with any others within CRISPR that are not required to manage, perform and exercise CRISPR's rights and obligations under this Agreement.

13.6 Termination for Challenge of CureVac Licensed Patent Rights. CureVac may terminate this Agreement by providing [\*\*\*\*\*] prior written notice to CRISPR in the event CRISPR or any of its Affiliates directly or indirectly challenges the validity of the Licensed Patent Rights in a legal proceeding or supports a Third Party in the challenge of a Licensed Patent Right in a legal proceeding (in each case before a court of competent jurisdiction). Any such termination shall only become effective if CRISPR or its Affiliate has not withdrawn such action before the end of the above notice period. In the event a Sublicensee of CRISPR challenges the validity of a CureVac Licensed Patent Right, CureVac may terminate this Agreement hereunder, if CRISPR does not terminate such sublicense agreement within the [\*\*\*\*\*] notice period.

13.7 Remedies. Except as otherwise expressly set forth in this Agreement, the termination provisions of this Article 13 are in addition to any other relief and remedies available to either Party under this Agreement and at law.

13.8 Effects of Expiration or Termination.

- (a) **License Upon Expiration.** Upon expiration, but not upon earlier termination of this Agreement, the licenses granted to CRISPR in [Section 7.1](#) shall automatically convert to the license set forth in [Section 5.5\(e\)](#).
- (b) **Termination of Licenses.** Upon any termination of this Agreement by a Party prior to expiration, except as otherwise provided in [Section 13.5](#), as of the effective date of such termination, all licenses granted by CureVac to CRISPR under this Agreement shall terminate automatically, and the Licensed Intellectual Property shall automatically revert back to CureVac.
- (c) Notwithstanding the foregoing, no termination of this Agreement shall be construed as a termination of any sublicense of any Sublicensee hereunder, and thereafter each such Sublicensee shall be considered a direct licensee of CureVac, provided (i) CureVac has approved such sublicense in accordance with [Section 7.2](#); (ii) CureVac does not assume undertakings and liabilities towards the Sublicensee beyond those stipulated herein; and (iii) the Sublicensee is then in full compliance with all terms and conditions of its sublicense.
- (d) **Post-Termination Activities.** Upon termination of this Agreement CRISPR shall provide CureVac with a written inventory of all Licensed Products that are in the process of Manufacture, in use or in stock; *provided, however*, that if CRISPR terminates this Agreement in part under [Section 13.3](#), such inventory shall only apply to the Licensed Products subject to such partial termination. All Licensed Products that are not disposed of as provided above shall be delivered to CureVac or otherwise disposed of in CureVac's sole discretion and at CRISPR's sole expense.
- (e) **Accrued Payment Claims.** Termination of this Agreement for any reason whatsoever shall not relieve CRISPR of its obligations to pay all royalties, milestones and other amounts payable to CureVac which have accrued prior to, but remain unpaid as of, the date of expiration or termination hereof.
- (f) **Reversion.** In the event of termination of this Agreement by CRISPR pursuant to [Section 13.3](#) or by CureVac pursuant to [Section 13.2](#) or [13.4](#), CureVac shall be entitled to demand from CRISPR the transfer and/or assignment, as applicable, of all right, title and interest in and to any Cas9 mRNA Constructs, and all data related thereto. Under no circumstance shall CureVac be entitled to any CRISPR Background Intellectual Property, CRISPR Improvement, CRISPR's Solely-Owned Foreground Intellectual Property, CRISPR's interest in and to any Jointly-Owned Foreground Intellectual Property, or to any CRISPR Drug Product (as defined in the Manufacturing Services Agreement) or any data related to or generated through the use of or reference to a CRISPR Drug Product.
- 13.9 **Surviving Provisions.** Notwithstanding any provision herein to the contrary, the rights and obligations of the Parties set forth in [Article 6](#) (Confidentiality), [Article 7](#) (Intellectual Property) (provided that [Sections 7.1\(a\)](#), [7.1\(c\)](#), [7.2](#), and [7.3](#) shall not survive termination by CRISPR under [Section 13.3](#) (Voluntary Termination by CRISPR) or any termination by CureVac under [Article 13](#)), [Article 8](#) (with respect to Patent Rights Covering Know-How developed prior to Termination), [Article 9](#) (Indemnification), [Section 11](#) (Insurance, Limitation of Liability), [Section 13.7](#) (Remedies), [Section 13.8](#) (Effects of Expiration or Termination), [Section 13.9](#) (Surviving Provisions), [Article 14](#) (Dispute Resolution) and [Article 15](#) (Miscellaneous, to the extent applicable), as well as any rights or obligations otherwise accrued hereunder (including any accrued payment obligations), shall survive the expiration or termination of this Agreement. Termination shall not relieve any Party from any liability which has accrued prior to such termination.

**Article 14**  
**DISPUTE RESOLUTION**

14.1 **Mandatory Procedures.** The Parties agree that any dispute arising out of or relating to this Agreement will be resolved solely by means of the procedures set forth in this [Article 14](#), and that such procedures constitute legally binding obligations that are an essential provision of this Agreement. If either Party fails to observe the procedures of this [Article 14](#), as may be modified by their written agreement, the other Party may bring an action for specific performance of these procedures in any court of competent jurisdiction.

14.2 **Dispute Resolution Procedures.** In the event of a dispute between the Parties (other than disputes arising out of the JSC), relating to the validity performance, construction or interpretation of this Agreement, upon the request of either Party by written notice, the Parties agree to meet and discuss in good faith a possible resolution thereof, which good faith efforts shall include at least one in-person meeting between the Executive Officers of each Party. If the matter is not resolved within [\*\*\*\*\*] following the written request for discussions, either Party may then invoke the provisions of [Section 14.3](#).

14.3 Any dispute (other than disputes arising from the JSC) relating to the validity performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in [Section 14.2](#), shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be London, England. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

14.4 **Performance to Continue.** Each Party will continue to perform its undisputed obligations under this Agreement pending final resolution of any dispute arising out of or relating to this Agreement; *provided, however*, that a Party may suspend performance of its undisputed obligations during any period in which the other Party fails or refuses to perform its undisputed obligations.

14.5 **Tolling.** The Parties agree that all applicable statutes of limitation and time-based defenses, as well as all time periods in which a Party must exercise rights or perform obligation hereunder, will be tolled once the dispute resolution procedures set forth in this [Section 14.5](#) have been initiated and for so long as they are pending, and the Parties will cooperate in taking all actions reasonably necessary to achieve such a result. In addition, during the pendency of any dispute under this Agreement initiated before the end of any applicable cure period, (a) this Agreement will remain in full force and effect, (b) the provisions of this Agreement relating to termination for material breach with respect to such dispute will not be effective, (c) the time period for cure as to any termination notice given prior to the initiation of arbitration will be tolled, (d) any time periods to exercise rights or perform obligations will be tolled; and (e) neither Party will issue a notice of termination pursuant to this Agreement based on the subject matter of the arbitration, until the arbitral tribunal has confirmed the material breach and the existence of the facts claimed by a Party to be the basis for the asserted material breach; *provided*, that if such breach can be cured by (i) the payment of money, the defaulting Party will have an additional [\*\*\*\*\*] within its receipt of the arbitral tribunal's decision to pay such amount or (ii) the taking of specific remedial actions, the defaulting Party will have a reasonably necessary period to diligently undertake and complete such remedial actions within such reasonably necessary period or any specific timeframe established by such arbitral tribunal's decision before any such notice of termination can be issued. Further, with respect to any time periods that have run during the pendency of the dispute, the applicable Party will have a reasonable period of time or any specific timeframe established by such arbitral tribunal's decision to exercise any rights or perform any obligations affected by the running of such time periods.

**Article 15**  
**MISCELLANEOUS**

15.1 Severability. If any one or more of the provisions of this Agreement is held to be invalid or unenforceable, the provision shall be considered severed from this Agreement and shall not serve to invalidate any remaining provisions hereof, unless the invalid or unenforceable provision is of such essential importance to this Agreement that it is to be reasonably assumed that the Parties would not have entered into this Agreement without the invalid or unenforceable provision. The Parties shall make a good faith effort to replace any invalid or unenforceable provision with a valid and enforceable one such that the objectives contemplated by the Parties when entering this Agreement may be realized.

15.2 Notices. Any notice required or permitted to be given by this Agreement shall be in writing and shall be (a) delivered by hand or by FedEx, UPS or any other similar service with tracking capabilities, (b) registered mail, or (c) delivered by facsimile followed by delivery via any of the methods set forth in this Section 15.2, in each case, addressed as set forth below unless changed by notice so given:

If to CRISPR:

CRISPR Therapeutics AG  
Baarerstrasse 14  
6300 Zug  
Switzerland  
Attention: Chief Executive Officer

and

CRISPR Therapeutics Limited  
85 Tottenham Court Road  
London W1T 4TQ  
United Kingdom  
Attention: Chief Legal Officer

with copies (which shall not constitute notice) to:

Goodwin Procter LLP  
100 Northern Avenue  
Boston, MA 02210  
Attention: [\*\*\*\*\*]  
Facsimile: [\*\*\*\*\*]  
Telephone: [\*\*\*\*\*]

and

[\*\*\*\*\*]

If to CureVac:

CureVac AG  
Paul-Ehrlich-Str. 15  
72076 Tübingen  
Germany  
Attention: CEO and General Counsel

Any such notice shall be deemed given on the date received. A Party may add, delete, or change the person or address to which notices should be sent at any time upon written notice delivered to the Party's notices in accordance with this [Section 15.2](#).

15.3 **Assignment.** Neither Party may, without the consent of the other Party, such consent not to be unreasonably withheld, conditioned or delayed, assign or transfer any of its rights and obligations hereunder; *provided* that no such consent is required for an assignment or transfer (in whole or in part) by either Party (a) to an Affiliate or (b) to a successor-in-interest by reason of merger or consolidation or sale of all or substantially all of the respective Party's assets to which this Agreement relates; *provided further* that, with respect to an assignment or transfer by a Party in accordance with the prior provisions, (i) with respect to an assignment to a successor-in-interest, such assignment includes all relevant rights and obligations under this Agreement, and (ii) any assignee or transferee shall have agreed as of such assignment or transfer to be bound by the terms of this Agreement in a writing provided to the other Party. Subject to the foregoing, this Agreement shall inure to the benefit of and be binding on the Parties' successors and permitted assigns. Any assignment or transfer in violation of the foregoing shall be null and void and wholly invalid, the assignee or transferee in any such assignment or transfer shall acquire no rights whatsoever, and the non-assigning, non-transferring Party shall not recognize, nor shall it be required to recognize, such assignment or transfer. Upon request by CRISPR, the Parties shall cooperate to enter into a separate agreement or agreements with respect to one or more Programs covered under this Agreement (i.e. severing such Program(s) from this Agreement and covering them instead in a separate agreement having the same terms as this one but being limited to such Program or Programs), which separate agreement(s) may be assigned in accordance with the foregoing provisions of this [Section 15.3](#).

15.4 **Waivers and Modifications.** The failure of any Party to insist on the performance of any obligation hereunder shall not be deemed to be a waiver of such obligation. Waiver of any breach of any provision hereof shall not be deemed to be a waiver of any other breach of such provision or any other provision on such occasion or any succeeding occasion. No, modification, release, or amendment of any obligation under or provision of this Agreement shall be valid or effective unless in writing and signed by both Parties.

15.5 **Governing Law.** This Agreement shall be governed by and construed and interpreted in accordance with the laws of Switzerland; irrespective of the choice of laws principles of the laws of Switzerland, as to all matters, including matters of validity, construction, effect, enforceability, performance and remedies, provided, that questions affecting the construction and effect of any Patent Rights shall be determined by the law of the country in which the Patent Rights have been filed, granted or issued.

15.6 Relationship of the Parties. Each Party is an independent contractor under this Agreement. Nothing contained herein is intended or is to be construed so as to constitute CureVac and CRISPR as partners, agents, or joint venturers. Neither Party shall have any express or implied right or authority to assume or create any obligations on behalf of or in the name of the other Party or to bind the other Party to any contract, agreement, or undertaking with any Third Party. There are no express or implied third party beneficiaries hereunder.

15.7 Entire Agreement. This Agreement and the attached attachments constitutes the entire agreement between the Parties as to the subject matter of this Agreement and, as of the Effective Date, supersedes and merges all prior and contemporaneous negotiations, representations, agreements, and understandings regarding the same. The Material Transfer Agreement between the Parties dated June 13, 2016, as amended from time to time, and the Confidentiality Agreement between the Parties dated February 26, 2016 are being replaced as of the Effective Date, provided that the ownership rights with respect to any Intellectual Property (as defined in the Material Transfer Agreement) discovered, created, conceived or reduced to practice under the Material Transfer Agreement prior to the Effective Date will remain to be governed by the Material Transfer Agreement. This Agreement, and its attachments, may not be amended except in a writing signed by duly authorized representatives of the Parties expressly stating that it is amending this Agreement and identifying each provision being amended.

15.8 Counterparts. This Agreement may be executed in counterparts (whether delivered by facsimile or otherwise) with the same effect as if both Parties had signed the same document. All such counterparts shall be deemed an original, shall be construed together and shall constitute one and the same instrument.

15.9 Interpretation.

(a) Each of the Parties acknowledges and agrees that this Agreement has been diligently reviewed by and negotiated by and between them, that in such negotiations each of them has been represented by competent counsel, and that the final agreement contained herein, including the language whereby it has been expressed, represents the joint efforts of the Parties and their counsel. Accordingly, in interpreting this Agreement or any provision hereof, no presumption shall apply against any Party as being responsible for the wording or drafting of this Agreement or any such provision, and ambiguities, if any, in this Agreement shall not be construed against any Party, irrespective of which Party may be deemed to have authored the ambiguous provision.

(b) The definitions of the terms herein shall apply equally to the singular and plural forms of the terms defined. Whenever the context may require, any pronoun shall include the corresponding masculine, feminine, and neuter forms. The word "will" shall be construed to have the same meaning and effect as the word "shall." The word "any" shall mean "any and all" unless otherwise clearly indicated by context. The word "including" will be construed as "including without limitation." The word "or" will be interpreted in the inclusive sense commonly associated with the term "and/or".

(c) Unless the context requires otherwise, (a) any definition of or reference to any agreement, instrument, or other document herein shall be construed as referring to such agreement, instrument, or other document as from time to time amended, supplemented, or otherwise modified (subject to any restrictions on such amendments, supplements, or modifications set forth herein or therein), (b) any reference to any Applicable Laws herein shall be construed as referring to such Applicable Laws as from time to time enacted, repealed, or amended, (c) any reference herein to any Person shall be construed to include the Person's successors and assigns, (d) all references herein to Articles, Sections, or Attachments, unless otherwise specifically provided, shall be construed to refer to Articles, Sections, and Attachments of this Agreement, and references to this Agreement includes all Articles, Sections, and Attachments hereof, (e) the words "herein", "hereof" and "hereunder", and words of similar import, will be construed to refer to this Agreement in each of their entirety, as the context requires, and not to any particular provision hereof, (f) the word "notice" means notice in writing (whether or not specifically stated) and will include notices, consents, approvals and other written communications contemplated under this Agreement, and (g) provisions that require that a Party, the Parties or any committee hereunder "agree," "consent" or "approve" or the like will require that such agreement, consent or approval be specific and in writing, whether by written agreement, letter, approved minutes or otherwise (but excluding e-mail and instant messaging).

(d) Headings and captions are for convenience only and are not be used in the interpretation of this Agreement.

15.10 Section 365(n).

(a) All licenses granted under this Agreement are deemed to be, for purposes of Section 365(n) of the U.S. Bankruptcy Code, licenses of right to "intellectual property" as defined in Section 101 of such Code. Each Party, as licensee, may fully exercise all of its rights and elections under the U.S. Bankruptcy Code and any foreign equivalent thereto in any country having jurisdiction over a Party or its assets. The Parties further agree that, if a Party elects to retain its rights as a licensee under such Code, such Party shall be entitled to complete access to any technology licensed to it hereunder and all embodiments of such technology. Such embodiments of the technology shall be delivered to the licensee Party not later than:

- (i) the commencement of bankruptcy proceedings against the licensor, upon written request, unless the licensor elects to perform its obligations under the Agreement, or
- (ii) if not delivered under Section 15.10(a)(i), upon the rejection of this Agreement by or on behalf of the licensor, upon written request.

(b) Any agreements supplemental hereto will be deemed to be "agreements supplementary to" this Agreement for purposes of Section 365(n) of the Bankruptcy Code.

## EXCLUSIVE COLLABORATION AND LICENSE AGREEMENT

This Exclusive Collaboration and License Agreement ("**Agreement**") is entered into on August 21, 2014 ("**Effective Date**"),

BY AND BETWEEN

**CureVac GmbH**, a German limited liability company with offices at Paul-Ehrlich-Str. 15, 72076 Tubingen, Germany ("**CureVac**");

AND

**Boehringer Ingelheim International GmbH**, a German limited liability company with offices at Binger StraBe 173, 55216 Ingelheim am Rhein, Germany ("**BI**").

**RECITALS**

WHEREAS, CureVac is a biotechnology company that is a pioneer and technology leader in mRNA-based vaccination approaches and especially discovers, designs and develops first-in-class mRNA vaccines and immune-therapies for the treatment of oncological diseases with unmet medical need;

WHEREAS, BI is a research based pharmaceutical company which possesses expertise relating to the research, development, manufacture, marketing and sale of pharmaceutical products, and BI aims to enter into the immunotherapeutic treatment of oncological diseases;

WHEREAS, CureVac wishes to grant an exclusive license and an exclusive option to BI, and BI wishes to take, an exclusive license and an exclusive option under such intellectual property rights; and

WHEREAS, the Parties wish (i) to mutually collaborate to Develop and Manufacture (each as defined below) the Licensed Vaccines and Licensed Products (as defined below) in the Territory (as defined below), and (ii) for BI to Commercialize (as defined below) the Licensed Vaccines and Licensed Products in the Territory, in each case in accordance with the terms and conditions set forth below.

NOW, THEREFORE, the Parties hereby agree as follows:

**1. DEFINITIONS.**

For purposes of this Agreement, the following capitalized terms shall have the following meanings, whether used in the singular or plural:

- 1.1** "**Affiliate**" shall mean and include with respect to any Party, (i) any legal entity of which the securities or other ownership interests representing fifty percent (50%) or more of the equity or fifty percent (50%) or more of the ordinary voting power or fifty percent (50%) or more of the general partnership interest are, at the time such determination is being made, owned, controlled or held, directly or indirectly, by such Party, or (ii) any legal entity which, at the time such determination is being made, is controlling or under common control with, such Party, *provided, however*, that regarding CureVac, Affiliate shall not include Mr. Dietmar Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other companies controlled by Mr. Dietmar Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG. As used in this definition, the term "**control**", whether used as a noun or verb, refers to the possession, directly or indirectly, of the power to direct, or cause the direction of, the management or policies of a legal entity, whether through the ownership of voting securities, by contract or otherwise.

- 1.2 "Applicable Laws" shall mean all applicable provisions of all statutes, laws, rules, regulations, administrative codes, ordinances, decrees, orders, decisions, guidance documents, injunctions, awards, judgments, and permits as well as licenses of or from Regulatory Authorities relating to the development, use, manufacture, marketing or regulation of the subject item.
- 1.3 "BI Background Intellectual Property" shall mean Intellectual Property Controlled by BI or its Affiliates on the Effective Date and which is necessary or useful for the Manufacture, Development and Commercialization of the Licensed Vaccines and/or a Licensed Product (including an Afatinib Vaccine) in accordance with this Agreement, but excluding Intellectual Property related to the manufacture of plasmid DNA. The BI Background Intellectual Property includes the Intellectual Property listed in Exhibit 1.3 hereto.
- 1.4 "BI Collaboration Intellectual Property" shall mean the Collaboration Intellectual Property Controlled by BI including BI's share in jointly owned Collaboration Intellectual Property.
- 1.5 "BI Intellectual Property" shall mean
- (a) BI Background Intellectual Property; **and**
  - (b) BI Collaboration Intellectual Property.
- 1.6 "Biosimilar Product" shall mean a biological medicinal product that is equivalent to a biological medicinal product that has previously obtained regulatory approval and which has an active substance that is equivalent to the active substance of the biological reference medicinal product.
- 1.7 "Calendar Quarter(ly)" shall mean the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 or December 31, for so long as this Agreement is in effect.
- 1.8 "Clinical Trials" shall mean all clinical trials to be conducted with respect to the Development of the Licensed Vaccines, including Phase I Clinical Trials, Phase II Clinical Trials and Phase III Clinical Trials.

- 1.9 "CMC Development" shall mean all research and development activities conducted in respect of the Manufacture of the Licensed Vaccines, including chemistry, manufacturing and control (CMC), test method development and stability testing, process development, manufacturing scale-up, qualification and validation, and any other activity necessary or reasonably useful or otherwise requested or required by a Regulatory Authority as a condition or in support of obtaining or maintaining Regulatory Approvals to successfully Manufacture the Licensed Vaccines for use in the Field.
- 1.10 "Collaboration Intellectual Property" shall mean any Intellectual Property generated by or on behalf of either Party under this Agreement with the exception of Intellectual Property related to the BI pDNA Process and generated under a Related Agreement specific to such BI pDNA Process.
- 1.11 "Combination Product" shall mean a pharmaceutical formulation containing as its active ingredients both a Licensed Vaccine and one or more other therapeutically active ingredients, that is packaged and labeled for sale in the Territory.
- 1.12 "Commercialization" shall mean any and all activities directed to the preparation for sale of, offering for sale of, or sale of a Licensed Product, including activities related to marketing, promoting, labelling, packaging, distributing, importing and exporting such Licensed Products, and interacting with Regulatory Authorities regarding any of the foregoing. For the avoidance of doubt, "Commercialization" shall not include the Manufacture of Licensed Vaccines. When used as a verb, to "Commercialize" and "Commercializing" shall mean to engage in Commercialization, and "Commercialized" has a correlative meaning.
- 1.13 "Commercially Reasonable Efforts" shall mean, with respect to the efforts to be expended by a Party with respect to any objective, the reasonable, diligent, good faith efforts to accomplish such objective as such Party would normally use to accomplish a similar objective under similar circumstances. It is understood and agreed that with respect to the Development and Commercialization of Licensed Vaccines and Licensed Products by BI, such efforts shall be substantially equivalent to those efforts and resources commonly used by BI for pharmaceutical development candidates or products owned by it or to which it has rights, which development candidate or product is at a similar stage in its Development or product life and is of similar market potential taking into account all scientific, commercial and other factors that BI would take into account, including efficacy, safety, expected and actual cost and time to Develop, expected and actual profitability, approved labelling, the competitiveness of alternative products in the marketplace, the expected and actual market exclusivity (including patent and other proprietary position and regulatory exclusivity) of the Licensed Vaccines and Licensed Products, the expected and actual amounts of marketing and promotional expenditures and the likelihood of receipt of a Regulatory Approval given the Regulatory Authority involved.

- 1.14 "**Confidential Information**" shall mean and include all Know How including Know How comprised in the CureVac Licensed Intellectual Property, and Know How comprised in the BI Intellectual Property, and all other proprietary information, Development Data and Materials, not in the public domain, relating to the Licensed Vaccines and Licensed Products, Afatinib, the Field, the indications, or the business, affairs, research and development activities, results of pre-clinical and clinical trials, national and multinational regulatory proceedings and affairs, finances, plans, contractual relationships and operations of the Parties. The terms and conditions of this Agreement shall be considered Confidential Information of both Parties.
- 1.15 "**Co-Packaged Product**" shall mean a single packaged product containing a Licensed Vaccine and one or more other therapeutically or prophylactically active products (including [\*\*\*\*\*]) as separate components in a co-packaged form, that is packaged and labeled for sale in the Territory.
- 1.16 "**Control**" or "**Controlled**" shall mean with respect to the subject item or right, the ability (whether by ownership or license, other than pursuant to this Agreement) by a Party to grant to the other Party access or a license as provided herein under such item or right without violating the terms of any agreement or other arrangement with any Third Party.
- 1.17 "**CureVac Background Intellectual Property**" shall mean Intellectual Property Controlled by CureVac or its Affiliates on the Effective Date and which is necessary or useful for the Non-clinical and Clinical Development and Commercialization of the Licensed Vaccines and Licensed Products in accordance with this Agreement. The CureVac Background Intellectual Property includes the Intellectual Property listed in **Exhibit 1.17** hereto. CureVac Background Intellectual Property includes the CV9202 Specific Patent Rights until such CV9202 Specific Patent Rights are assigned and transferred to BI in accordance with Section 9.4 below. CureVac Background Intellectual Property will also include the antigen specific Intellectual Property, if any, to be licensed upon exercise of the Option in accordance with Section 3.3 below.
- 1.18 "**CureVac Collaboration Intellectual Property**" shall mean the Collaboration Intellectual Property Controlled by CureVac or its Affiliates including CureVac's share in jointly owned Collaboration Intellectual Property and where such Collaboration Intellectual Property is necessary or useful for the Non-clinical and Clinical Development and Commercialization of the Licensed Vaccines and Licensed Products in accordance with this Agreement.
- 1.19 "**CureVac Licensed Intellectual Property**" shall mean
- (a) CureVac Background Intellectual Property; **and**
  - (b) CureVac Collaboration Intellectual Property.
- 1.20 "**CureVac Licensed Patent Rights**" shall mean the Patent Rights which form part of the CureVac Licensed Intellectual Property.
- 1.21 "**CureVac Licensed Manufacturing Intellectual Property**" shall mean the Intellectual Property including the Collaboration Intellectual Property including CureVac's share in jointly owned Collaboration Intellectual Property, in each case as Controlled by CureVac or its Affiliates on the date when BI takes over the CMC Development and Manufacturing of the Licensed Vaccines in accordance with Sections 6.3 or 6.5 below, if ever, and where such Intellectual Property is necessary or useful for the CMC Development and/or Manufacturing of the Licensed Vaccines and Licensed Products in accordance with this Agreement. The CureVac Licensed Manufacturing Intellectual Property as of the date when BI takes over the CMC Development and Manufacture will be listed at the respective time.

- 1.22 "CV9202" shall mean CureVac's clinical product candidate which consists [\*\*\*\*\*].
- 1.23 "CV9202 Specific Patent Rights" shall mean the Patent Rights listed in Exhibit 1.23 hereto which will be assigned and transferred to BI under the conditions set forth in Section 9.4 below.
- 1.24 "Development" shall mean all research, non-clinical, and clinical testing and drug development activities conducted in respect of the Licensed Vaccines and Licensed Products, including those necessary or reasonably useful or otherwise requested or required by a Regulatory Authority as a condition or in support of obtaining or maintaining Regulatory Approvals and to successfully Develop, Manufacture and Commercialize the Licensed Vaccines and Licensed Products for use in the Field. "Development" shall include chemistry, Manufacturing and control (CMC), test method development and stability testing, formulation development, delivery system development, non-clinical testing, mechanism studies, toxicology, pharmacokinetics, clinical studies, process development, manufacturing scale-up, qualification and validation, quality assurance/quality control, regulatory affairs activities, statistical analysis and report writing, submission of documents, market research, pharmacoeconomic studies, and epidemiological/real world data studies. Development shall mean both (a) Non-clinical and Clinical Development; and (b) CMC Development. "Develop" and "Developed" have a correlative meaning.
- 1.25 "Development Data" shall mean (i) reports of non-clinical studies and Clinical Trials, (ii) CMC Development data; and (iii) all other documentation containing or embodying any non-clinical or clinical data relating to the Licensed Vaccines and Licensed Products or the use of the Licensed Vaccines and Licensed Products in the Field, such data in each case (i) and (ii) required for the Development and Commercialization of the Licensed Vaccines and Licensed Products, including but not limited to, registration dossiers.
- 1.26 "Development Plan(s)" shall mean a plan to be mutually agreed between the Parties, as amended by the JSC from time to time, that describes the Development work to be carried out with respect to a Licensed Vaccine and/or Licensed Product, including the responsibilities of each Party, timelines and resource allocation.
- 1.27 "Field" shall mean all uses for cancer (including all infection induced tumor types) in humans, including the treatment, prevention, diagnosis and control of cancer.
- 1.28 "First Commercial Sale" shall mean, on a country-by-country basis, the first sale of each Licensed Product by or on behalf of BI, its Affiliates or Sublicensees to a Third Party customer in such country in exchange for cash or some equivalent to which financial value can be assigned after such Licensed Product has been granted all Regulatory Approvals by the applicable authorities of such country.

1.29 "FTE" shall mean a full time equivalent person-year based upon a total of [\*\*\*\*\*] working hours per calendar year of scientific or technical work carried out by a duly qualified employee of CureVac on or directly related to the work to be conducted under the Agreement. Overtime, and work on weekends, holidays and the like shall not be counted with any multiplier (e.g. time-and-a-half or double time) toward the number of hours that are used to calculate the FTE contribution. The portion of a FTE billable by CureVac for one (1) individual during a given accounting period shall be determined by dividing the number of hours worked by said individual on the work to be conducted under the Agreement during such accounting period and the number of FTE hours applicable for such accounting period based [\*\*\*\*\*] working hours per calendar year.

1.30 "FTE Rate(s)" shall mean, with respect to the following categories of CureVac employees:

- (a) Clinical: [\*\*\*\*\*];
- (b) Scientist: [\*\*\*\*\*];
- (c) Technician: [\*\*\*\*\*].

The FTE Rates include all internal overhead and costs of consumables (unless explicitly specified otherwise in the Development Plans). Excluded are consumable costs for immunomonitoring and exploratory biomarker work as specified in the Development Plans and the costs of Licensed Vaccines. If the consumer price index as published by the German Federal Statistical Office (*Statistisches Bundesamt*) changes by more than [\*\*\*\*\*] compared to the month of the Effective Date, the FTE Rates shall be adjusted accordingly with effect as of the month following such adjustment. The preceding sentence shall apply *mutatis mutandis* for subsequent changes of the consumer price index compared to the month of the last adjustment of the FTE Rates.

1.31 "Generic Competition" shall mean and shall be deemed to exist in a particular country in the Territory with respect to a particular Licensed Product in a given calendar quarter if in such country during such calendar quarter one or more Generic Products (other than a Generic Product sold by BI or its Affiliates or by a Sublicensee under a license granted by BI or its Affiliates) in the aggregate account for more than [\*\*\*\*\*] of the sum of (i) the aggregate unit sales of such Licensed Product sold by BI or its Affiliates or Sublicensees in such country, and (ii) the aggregate unit sales of the respective Generic Product in such country, as measured by IMS standard units sold based on data provided by IMS International or, if such data is not available, such other reliable data source as reasonably agreed upon by CureVac and BI. If no data is commercially available, then the Parties shall agree upon a methodology for estimating the percentage unit-based market share of Generic Products in such country.

- 1.32 "**Generic Product**" shall mean, with respect to a particular Licensed Product in a particular country, (i) any pharmaceutical product (other than the Licensed Product) that contains the same active ingredient(s) in a comparable quality and quantity as such Licensed Product, irrespective of its pharmaceutical form, and is approved for the same indication as such Licensed Product, as applicable, under an Abbreviated New Drug Application or under 505(b)(2) of the United States Federal Food, Drug and Cosmetic Act or any similar abbreviated route of approval in such country, or (ii) any biologic medicinal product (other than the Licensed Product) that is a Biosimilar Product of such Licensed Product, and is approved under a Biological Product License application submitted by any person under 42 U.S.C. § 262(k) or any similar abbreviated route of approval in such country.
- 1.33 "**Intellectual Property**" shall mean any and all Know How (including copyright and other rights therein), Patent Rights and any trade secrets, trade dress, housemarks and trademarks.
- 1.34 "**Invoice**" shall mean an original invoice sent by CureVac to BI with respect to payment due hereunder containing the information and meeting the requirements as set forth in **Exhibit 1.34**. The Parties shall modify the Invoice requirements by written agreement in the event of a change in the Applicable Laws.
- 1.35 "**Know How**" shall mean all technical, scientific and other information, inventions, discoveries, trade secrets, knowledge, technology, means, methods, processes, practices, formulae, instructions, skills, techniques, procedures, expressed ideas, technical assistance, designs, drawings, assembly procedures, computer programs, apparatuses, specifications, Development Data, results, pre-clinical, clinical, safety, manufacturing and quality control data and information (including trial designs and protocols), registration dossiers and assay and biological methodology, in each case, solely to the extent confidential and proprietary and in written, electronic or any other form now known or hereafter developed. For the avoidance of doubt, Know How includes any such information comprised or embodied in the Materials, if any. For the further avoidance of doubt, any of the foregoing that, through no fault of either of the Parties hereto, its Affiliates or Sublicensees is published or otherwise falls within the public domain shall no longer be deemed Know How.
- 1.36 "**Licensed Product(s)**" shall mean a Licensed Vaccine packaged and labeled for sale in the Territory. Unless otherwise set forth herein, Licensed Products shall include Combination Products and Co-Packaged Products. For purposes of this Agreement, Licensed Products (i) being based on different Licensed Vaccines and/or (ii) being Commercialized under a different label and brand (and not only under a label extension of the original Licensed Product) shall be considered separate Licensed Products. For clarity, the Afatinib Vaccine, the Chemo-Radiation Vaccine and the Checkpoint Inhibitor Vaccine shall be considered one and the same Licensed Product, provided they are based on CV9202. Changes to the delivery system and/or formulation of a Licensed Vaccine and/or the addition of a new indication do not result in an additional Licensed Product unless such altered Licensed Product is Commercialized under a different label and brand (and not only under a label extension of the original Licensed Product).

- 1.37 "Licensed Vaccine(s)" shall mean any of the following vaccines: (i) CV9202; and (ii) the [\*\*\*\*\*] possible vaccines each consisting of [\*\*\*\*\*], in each case for use in the Field. Upon exercise of the option in accordance with Section 3.2 below, the definition of Licensed Vaccine(s) shall be expanded by the inclusion of (iii) the Option Vaccine. For the avoidance of doubt, subject only to the Option Vaccine, a vaccine comprising CV9202 plus one or more additional RNA-encodes antigen components is not a Licensed Vaccine. For clarity, this Agreement applies to [\*\*\*\*\*] Licensed Vaccines including the one (1) Option Vaccine.
- 1.38 "Major Market Country" shall mean the [\*\*\*\*\*].
- 1.39 "Manufacture" shall mean all manufacturing operations (including bulk and formulation as well as fill and finish) for Licensed Vaccines, including all activities related to the synthesis, making, production, processing, purifying, formulating, filling, and finishing, of the Licensed Vaccine, or any intermediate thereof, including process development, process qualification and validation, scale-up, pre-clinical, clinical and commercial production and analytic development, product characterization, stability testing, quality assurance, and quality control. "Manufacturing" has a correlative meaning.
- 1.40 "Materials" shall mean any and all proprietary tangible materials (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical materials), including reagents, research tools and compositions of matter. For the avoidance of doubt, Material shall include CV9202.
- 1.41 "Net Sales" shall mean the gross amount of sales of Licensed Products invoiced by BI, its Affiliates or Sublicensees to Third Parties, less:
- (a) sales returns and allowances actually paid, granted or accrued, including trade, quantity and cash discounts and any other adjustments, including those granted on account of price adjustments or billing errors, rejected goods, damaged or defective goods, recalls, returns;
  - (b) rebates, chargeback rebates, compulsory rebates, reimbursements or similar payments granted or given to wholesalers or other distributors, buying groups, health care insurance carriers or other institutions and compulsory payments to governmental authorities and any other governmental charges imposed upon the sale of such Licensed Product to Third Parties;
  - (c) adjustments arising from consumer discount programs or other similar programs;
  - (d) non-collectable receivables related to such Licensed Product;
  - (e) customs or excise duties, sales tax, consumption tax, value added tax, and other taxes (except income taxes); and
  - (f) charges for packing, freight, shipping and insurance (to the extent that BI, its Affiliates or Sublicensees bear such cost).

Each of the foregoing deductions shall be determined as incurred in the ordinary course of business in type and amount consistent with good industry practice and in accordance with generally accepted accounting principles or more specifically, the principles of the German commercial code (*Handelsgesetzbuch*) on a basis consistent with BI's audited consolidated financial statements. All such discounts, allowances, credits, rebates, and other deductions shall be fairly and equitably allocated to the Licensed Products and other products of BI and its Affiliates and Sublicensees such that the Licensed Product does not bear a disproportionate portion of such deductions.

For sake of clarity and avoidance of doubt, sales by BI, its Affiliates or Sublicensees of a Licensed Product to any Third Party which distributes products directly to customers in countries where BI has no Affiliate or Sublicensee (e.g., a permitted recognized agent or a third party distributor) shall be considered sales to a Third Party.

Supply of Licensed Products other than for cash shall be substituted to price on bona fide arm's length sales; whereas the price shall be the average price of such Licensed Product sold for cash during the period based on quantity of drug substance sold.

Any Licensed Product used for promotional or advertising purposes or used for clinical trials or other research purposes shall not be included in Net Sales. Donations for charity reasons shall also not be Net Sales.

1.42 "**Non-clinical and Clinical Development**" shall mean any Development other than CMC Development.

1.43 "**Party**" or "**Parties**" shall mean BI or CureVac, or BI and CureVac, as the context admits.

1.44 "**Patent Right**" shall mean any and all (i) issued patents, patent applications, and future patents issued from any such patent applications; (ii) future patents issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (i); and (iii) reissues, confirmations, renewals, extensions, counterparts, divisions, continuations, continuations-in-part, supplemental protection certificates or utility models based on any patent or patent application of (i) or (ii).

1.45 "**Person**" shall mean an individual, sole proprietorship, partnership, limited partnership, limited liability partnership, corporation, limited liability company, business trust, joint stock company, trust, unincorporated association, joint venture or other similar entity or organization, including a government or political subdivision, department or agency of a government.

1.46 "**Phase I Clinical Trial**" shall mean a study of a Licensed Vaccine in human subjects principally for determining initial tolerance, immunogenicity, safety and/or pharmacokinetic information in single dose, single ascending dose, multiple dose and/or multiple ascending dose regimens.

1.47 "**Phase I/II Clinical Trial**" shall mean a study of a Licensed Vaccine in human subjects which meets the objectives of both a Phase I Clinical Trial and a Phase II Clinical Trial.

- 1.48 **"Phase II Clinical Trial"** shall mean a study of a Licensed Vaccine in human subjects principally to determine initial clinical efficacy, immunogenicity, and dose range finding before embarking on Phase III Clinical Trials, including any Phase II Clinical Trial which is part of a Phase I/II Clinical Trial or a Phase I through Phase III seamless design Clinical Trial.
- 1.49 **"Phase II/III Clinical Trial"** shall mean a study of a Licensed Vaccine in human subjects which meets the objectives of both a Phase II Clinical Trial and a Phase III Clinical Trial.
- 1.50 **"Phase III Clinical Trial"** shall mean a pivotal study of a Licensed Vaccine in human subjects with a defined dose or a set of defined doses of a Licensed Vaccine principally for the purpose of preparing and submitting applications for Regulatory Approval to the competent Regulatory Authorities in a country of the world, including any Phase III Clinical Trial which is part of a Phase II/III Clinical Trial or a Phase I through Phase III seamless design Clinical Trial.
- 1.51 **"Related Agreements"** shall mean and include all present and future clinical and commercial supply agreements, feasibility agreements, development agreements and license agreements related to the Licensed Vaccines and/or the BI pDNA Process and concluded between the Parties, including the Clinical Supply Agreement, or concluded between CureVac and BI Bio.
- 1.52 **"Regulatory Approvals"** shall mean and include all licenses, permits, authorizations and approvals of, and all registrations, filings and other notifications to, any Regulatory Authority within the Territory, including the United States Food and Drug Administration (FDA), the Japanese Pharmaceuticals and Medical Devices Agency (PMDA), and the European Medicines Agency (EMA), necessary or appropriate for the Development and Commercialization of the Licensed Vaccines and Licensed Products within the Field and in a particular country or region of the Territory.
- 1.53 **"Regulatory Authorities"** shall mean any national, supra-national, regional, state or local regulatory agency, department, bureau, commission, council or other governmental entity in each country in the Territory involved in the reviewing, granting or revoking of Regulatory Approvals.
- 1.54 **"RNActive"** shall mean CureVac's technology with respect to mRNA encoding an antigenic protein that is expressible in human cells as well as the same mRNA formed as a complex with protamine.
- 1.55 **"Sublicensee"** shall mean any Third Party licensee (aside from BI's Affiliates and any Third Party contractors used by BI in the Non-clinical and Clinical Development and Commercialization of the applicable Licensed Vaccine and/or Licensed Product on BI's behalf) which obtains rights to the CureVac Licensed Intellectual Property, regardless of whether such license is granted by BI, its Affiliates or any Sublicensee.
- 1.56 **"Target Product Profile (TPP)"** shall mean the comprehensive description of the properties which each of the Licensed Vaccines and Licensed Products is intended to have at approval. For each Licensed Vaccine more than one TPP may be defined (e.g., the Afatinib Vaccine and the Chemo-Radiation Vaccine). The Target Product Profile defines the objectives for the Development and creates the basis for the respective Development Plan.

- 1.57 "**Taxes**" shall mean all present and future taxes, import deposits assessments, and other governmental charges and any related penalties and interest not attributable to the fault or delay of BI.
- 1.58 "**Territory**" shall mean the entire world.
- 1.59 "**Third Party**" shall mean any Person aside from BI and its Affiliates and/or CureVac and its Affiliates.
- 1.60 "**Valid Claim**" shall mean with respect to a particular country, and in each case to the extent contained within (i) a Patent Right which forms part of the CureVac Background Intellectual Property or (ii) a CV9202 Specific Patent Right
- (a) any claim of an issued and unexpired patent in such country that (i) has not been held permanently revoked, unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction, which decision is un-appealed or un-appealable within the time allowed for appeal; and (ii) has not been abandoned, disclaimed, denied or admitted to be invalid or unenforceable through reissue or disclaimer or otherwise in such country; or
- (b) a claim of a pending patent application, which claim has not been abandoned or finally disallowed without the possibility of appeal or re-filing of the application; *provided, however*, that once the priority date or earliest filing date to which the pending patent application that comprises such claim refers is more than [\*\*\*\*\*] old, such claim shall not constitute a Valid Claim for purposes of this Agreement anymore unless and until a patent issues with such claim.

The word "**including**" or any variation thereof means "including without limitation" or any variation thereof and shall not be construed to limit any general statement which it follows to the specific or similar items or matters immediately following it.

Each of the following definitions is set forth in the Section of this Agreement indicated below:

<b>DEFINITION</b>	<b>SECTION</b>
[*****] Process	6.3.1

Third Party Licensor	9.7.1

**2. GRANT AND SCOPE OF LICENSE.**

**2.1 License to Develop and Commercialize Licensed Vaccines and Licensed Products.** CureVac hereby grants to BI as of the Effective Date and for the term of this Agreement, and BI hereby accepts, the exclusive license to the CureVac Licensed Intellectual Property for the Non-clinical and Clinical Development, and the Commercialization of Licensed Vaccines and Licensed Products for use in the Field and in the Territory, in accordance with the terms and conditions, and subject to the limitations of this Agreement. Furthermore, BI is entitled to manufacture Licensed Products (but not to Manufacture Licensed Vaccines, subject only to Sections 6.3, 6.5 and 6.6 below). The license shall include the right for the research, development, manufacture, use and commercialization of any diagnostic tools and delivery systems (including formulations required for such delivery systems) required or useful for the Non-clinical and Clinical Development and Commercialization of the Licensed Vaccines and Licensed Products, provided, however, that (i) as of the Effective Date the CureVac Licensed Intellectual Property, except for the Patent Rights identified by the patent family identifier [\*\*\*\*\*], does not contain any Intellectual Property specific to delivery systems, (ii) CureVac is not obligated to grant rights to BI under Intellectual Property specific to delivery systems and in-licensed by CureVac from Third Parties, and (iii) CureVac gives no representation or warranty that such research, development, manufacture use or commercialization may be possible or successful. The license is exclusive (even as to CureVac), except to the extent set forth in Exhibit 11.2. For example, the rights granted under this Section 2.1 (a) include a non-exclusive sublicense under the Patent Rights identified by the patent family identifiers as [\*\*\*\*\*] in Exhibit 1.17; (b) include an extension of CureVac's rights to BI, its Affiliates, subcontractors and permitted Sublicensees as "Direct Collaboration Partner" or "Indirect Collaboration Partner" under the Patent Rights identified by the patent family identifiers [\*\*\*\*\*] in Exhibit 1.17 and licensed to CureVac by Geneart AG, and (c) the Patent Rights identified by the patent family identifiers [\*\*\*\*\*] in Exhibit 1.17 are subject to a non-exclusive license granted to BioNTech AG, as applicable; the terms and conditions being disclosed to BI and listed in Exhibit 11.2 hereto, and all the rights and licenses listed in (a) to (b) above are subject to the respective head license agreement as set forth in Exhibit 11.2. Furthermore, the licenses are subject to CureVac's right to perform its obligations hereunder.

**2.2 Right to Sublicense.**

**2.2.1** BI shall be entitled to sublicense its rights under Section 2.1 above to any of its Affiliates. Furthermore, BI is entitled to (i) engage Third Party contractors to Non-clinically and Clinically Develop and Commercialize the Licensed Vaccines and Licensed Products on BI's behalf and (ii) to authorize wholesalers and other distributors to Commercialize the Licensed Vaccines and the Licensed Products. Any other sublicenses to Third Parties require CureVac's prior written consent. CureVac will not unreasonably withhold or delay its consent with respect to sub licenses for the Commercialization of the Licensed Vaccines and Licensed Products after receipt of Regulatory Approval on a country-by-country basis.

- 2.2.2 Any right to sublicense to a Sublicensee is subject to the respective sublicense agreement containing terms and conditions that are not inconsistent with those contained in this Agreement, and shall include provisions regarding CureVac's back licenses, CureVac's rights to Collaboration Intellectual Property, confidentiality, indemnification, audit, record-keeping and termination for CureVac's protection that are consistent with those provided herein. BI shall remain liable to CureVac for all obligations under this Agreement, including payment to CureVac of any amounts due on account of sales or other disposition of Licensed Products by Sublicensees. BI shall notify CureVac in writing of any sublicensing agreement (except intra company sublicensing agreements with BI's Affiliates and any agreements with CMOs, CROs, distributors and wholesalers) within [\*\*\*\*\*] after its execution. Upon request, BI shall provide to CureVac a copy of such sublicensing agreement (except intra company sublicensing agreements with BI's Affiliates and any agreements with CMOs, CROs, distributors and wholesalers), provided that the agreement may be redacted to the extent not necessary for CureVac to understand the scope of such sublicense and determine if BI is in compliance with this Section 2.2.2. All information provided by BI to CureVac under this Section 2.2.2 will be deemed to be Confidential Information of BI and will be subject to the terms of Article 10 hereof.
- 2.3 **Technology Data Package Transfer.** In furtherance of the rights and licenses granted by CureVac to BI under this Agreement, during the first [\*\*\*\*\*] after the Effective Date CureVac shall furnish to BI within [\*\*\*\*\*] of BI's prior request, a data package that shall include all details of the CureVac Licensed Intellectual Property which are required for the Non-clinical and Clinical Development by BI of the Licensed Vaccines ("**Data Package**"). For clarity and subject to Sections 6.3 and 6.5 below, while CureVac will remain the holder of the CureVac DMF and BI has no right under this Agreement to modify or amend the CureVac DMF or to file the same with any authority, such Data Package shall include all CMC-related documents to the extent such documents are existing and Controlled by CureVac and which are needed for regulatory purposes, in particular the most recent, entire drug master file for CV9202. For the avoidance of doubt, failure by BI to request the Data Package shall not constitute a waiver of any of BI's rights under this Agreement. BI shall not use any of the Data Package furnished by CureVac under this Section 2.3 for any purpose whatsoever, except as authorized in this Agreement or any Related Agreement. In the event BI reasonably believes that the Data Package furnished by CureVac under this Section 2.3 is incomplete, within [\*\*\*\*\*] of receipt of the Data Package, BI shall provide written notice thereof to CureVac, and CureVac shall furnish such missing data concerning such Data Package within [\*\*\*\*\*] after receipt of BI's written notice hereunder. As part of the Non-clinical and Clinical Development Support to be provided by CureVac under Section 4.1 below, CureVac shall answer all reasonable questions received from BI regarding such transferred Data Package as soon as reasonably possible after receipt.
- 2.4 **Documents and Declarations.** CureVac shall execute all documents, give all declarations regarding the licenses granted hereunder and reasonably cooperate with BI to the extent such documents, declarations and/or cooperation are required for the recording or registration of the licenses granted hereunder at the various patent offices in the Territory for the benefit of BI. BI shall reimburse CureVac for its reasonable external out-of-pocket costs associated therewith. '

- 2.5 **No Additional Rights.** Nothing in this Agreement shall be deemed or implied to be, and the Parties disclaim all implied rights to, the grant by either Party to the other Party of any right, title or interest in any product, Intellectual Property, any formulation technology, operating procedures, marketing materials or strategies, intangibles, material or proprietary rights except as are expressly set forth in this Agreement.
- 2.6 **Trademarks, Etc.** For the avoidance of doubt, BI, its Affiliates and its permitted Sublicensees shall be solely responsible for selecting and shall retain all ownership and control over all designs, trade dress and trademarks, and BI's, its Affiliates' and its permitted Sublicensees' use with respect to the Licensed Products, and subject only to Section 14.4, CureVac shall have no rights whatsoever to the use thereof.
3. **EXCLUSIVE OPTION**
- 3.1 **Option.** As of the Effective Date and in consideration for the option fee as set forth in Section 7.2, CureVac hereby grants to BI, and BI hereby accepts, an exclusive option for a maximum term of ten (10) years after the Effective Date ("**Option Period**") to obtain one additional exclusive license, for no additional fee, to use the CureVac Licensed Intellectual Property with regard to one additional vaccine that consists of [\*\*\*\*\*] for use in the Field ("**Option Vaccine**"). For clarity, in order to protect BI's exclusive option, during the Option Period CureVac shall not grant any license to any Third Party for [\*\*\*\*\*].
- 3.2 **Exercise of the Option.** BI may exercise the option under Section 3.1 once by way of written notice to CureVac during the Option Period. In such notice, BI shall propose to CureVac a [\*\*\*\*\*] and CureVac shall only be entitled to withhold its consent to such [\*\*\*\*\*] if - at the time BI exercises the option and proposes a [\*\*\*\*\*] - neither CureVac nor BI Controls the rights required to include the proposed [\*\*\*\*\*] in the Option Vaccine. Upon written agreement on the identity of such [\*\*\*\*\*] the exercise of such option shall become effective for the Option Vaccine in respect of such agreed [\*\*\*\*\*], and the option rights under this Article 3 shall terminate.
- 3.3 **Extension of CureVac Licensed Intellectual Property.** In the event CureVac Controls any additional Intellectual Property which is specific to [\*\*\*\*\*] selected by BI (e.g., Patent Rights protecting the composition of matter or use of such antigen) and is not licensed under Section 2.1, it shall inform BI hereof and upon exercise of the Option the CureVac Background Intellectual Property shall also include such specific additional Intellectual Property, *provided*, that BI reimburses CureVac for all past and future payments towards Third Parties, if any, solely to the extent such payments are required for the use of such additional Intellectual Property for the Non-clinical and Clinical Development and Commercialization of the Option Vaccine.

**4. DEVELOPMENT OF LICENSED VACCINES.****4.1 Non-clinical and Clinical Development Support.**

4.1.1 BI and CureVac will collaborate on the Development of the Licensed Vaccines, and CureVac will provide certain activities to progress the Non-clinical and Clinical Development of the Licensed Vaccines. Such activities shall include the wind down in an orderly fashion of all already ongoing Phase I Clinical Trials set forth in Exhibit 4.5A as sponsor of such study, and CureVac shall provide electronic copies of all Development Data, in particular all safety, efficacy and immunomonitoring data, of such Clinical Trials to BL. Furthermore, CureVac will provide certain activities to ensure, inter alia, a smooth transition of the Non-clinical and Clinical Development of the Licensed Vaccines to BL. The scope of the activities to be performed by CureVac, the number of Cure Vac's FTEs to perform such activities, and the budget estimations to perform such activities (including CureVac's out of pocket expenses) are set out in the respective Development Plans for the Licensed Vaccines. In addition to the FTE Rates, BI shall compensate any out of pocket expenses incurred by CureVac in accordance with the Development Plans. CureVac shall be required to make the FTEs set forth in the Development Plans available, and BI shall fully compensate such agreed FTE resources during the agreed time period and at the FTE Rates. The FTE resource commitments shall be binding on both Parties on a [\*\*\*\*\*] rolling basis. The compensation is to be paid by BI to CureVac on a Calendar Quarterly basis. Payment shall be made in arrears and within [\*\*\*\*\*] upon receipt of an Invoice detailing with supportive documentation, the FTE costs and out of pocket expenses applicable to CureVac's efforts for such applicable Calendar Quarter period, such information to include the work packages of the Development Plans worked on, the number and type of FTE assigned to each work package and the out of pocket expenses. Notwithstanding the foregoing, CRO costs incurred by CureVac after the Effective Date in connection with the Phase I Clinical Trials listed in Exhibit 4.5A shall be invoiced separately by CureVac upon CureVac's receipt of such CRO's invoice, and irrespective of whether such payments are made in advance or in arrears, such Invoice to be due and payable within [\*\*\*\*\*] upon receipt of such Invoice by BI, provided that if BI reimburses CureVac for advance payments made by CureVac to CROs, CureVac shall provide the final actual cost per invoiced period and a true up of actual cost compared to advance payment (planned cost) to BL. If the advance payment(s) turn out to be higher than the actual cost incurred by CureVac, CureVac shall reimburse the respective amount of the advance payment to BL.

4.1.2 As long as CureVac provides Non-clinical and Clinical Development support under Section 4.1.1 above, CureVac shall maintain complete and accurate books and records regarding the FTEs and all out of pocket expenses (including CRO costs) invoiced to BI, as necessary to allow the accurate calculation of payments due hereunder. CureVac shall retain these records for [\*\*\*\*\*] after the end of the calendar year to which they pertain. Once per calendar year, and no more than once for the records as to any given calendar year, BI shall have the right to engage an independent accounting firm reasonably acceptable to CureVac, at BI's expense, which shall have the right to examine in confidence the relevant CureVac records as may be reasonably necessary to determine and/or verify the amount of payments due hereunder. In the event there was an over-payment by BI hereunder, CureVac shall promptly (but in no event later than [\*\*\*\*\*] after CureVac's receipt of the independent auditor's report) make payment to BI of any overpayment amounts. In the event that there was an under-payment by BI hereunder, BI shall promptly (but in no event later than [\*\*\*\*\*] after BI's receipt of the independent auditor's report) pay CureVac the underpayment amount. In the event any payment by BI shall prove to have been incorrect by more than five percent (5%) to BI's detriment for the entire period audited, CureVac will pay the reasonable fees and costs of BI's independent auditor for conducting such audit.

**4.2 Diligence.**

4.2.1 Subject to the terms of this Agreement, BI shall use its Commercially Reasonable Efforts to progress the Non-clinical and Clinical Development of the Licensed Vaccines and Licensed Products in accordance with the respective Development Plans, including the Development Plan attached hereto as **Exhibit 4.2** and as modified and amended by the JSC from time to time in accordance with Section 8 below ("**CV9202 Development Plan**") and to Commercialize the Licensed Products in the Territory, *provided, however* that Development activities listed in the CV9202 Development Plan under the heading "Life Cycle Management" shall be at BI's sole discretion. Notwithstanding the foregoing, after First Commercial Sale of the first Licensed Product in a Major Market Country the JSC shall discuss and decide whether such Licensed Product will be Developed in a second and/or third indication. If the JSC decides to Develop such Licensed Product in a second and/or third indication, the Parties shall amend the respective Development Plan and BI's diligence obligations will be increased so that BI shall use its Commercially Reasonable Efforts to also progress the Non-clinical and Clinical Development of such second and/or third indication. The Development Plans are to set forth, inter alia, (a) the Development work (including CMC Development) to be performed by BI and by CureVac under and during the term of this Agreement; (b) the activities to be performed by CureVac to support the Non-clinical and Clinical Development as further specified in Section 4.1 above; (c) the Clinical Trials to be performed for each clinical phase, including (i) the Clinical Trials to be performed for the Apatinib Vaccine; and (ii) the Clinical Trials to be performed for the Chemo-Radiation Vaccine; and (d) the time estimated for each Clinical Trial.

4.2.2 In the event BI exercises its option under Article 3 above, BI shall promptly prepare a Development Plan for the Option Vaccine, such Development Plan to meet the criteria set forth under Section 4.2.1 above, coordinate such Development Plan for approval within the JSC, and use its Commercially Reasonable Efforts to progress the Non-clinical and Clinical Development of the Option Vaccine and any Licensed Product containing such Option Vaccine in accordance with the Development Plan, and to Commercialize such Licensed Product in the Territory. For the avoidance of doubt, the diligence obligations under Section 4.2.4 below shall also apply to the Option Vaccine in the event BI exercises such option.

4.2.3 BI shall initiate the clinical development with CV9202 of:

- (a) [\*\*\*\*\*]; **and**
- (b) [\*\*\*\*\*],

and not terminate or halt the Non-clinical and Clinical Development unless there are substantial and reasonable technical, safety, efficacy and/or regulatory reasons for doing so, and details of such technical safety, efficacy and/or regulatory have been notified to CureVac in writing through the JSC.

4.2.4 The diligence obligations set forth above include the following specific activities: BI shall

- (a) use its Commercially Reasonable Efforts, subsequent to the respective positive Phase I and Phase II Clinical Trials referenced in Section 4.2.3 above, to initiate Phase III Clinical Trials regarding the Licensed Vaccines;
- (b) conduct all Non-clinical and Clinical Development activities in a timely manner and allocate such Development budgets as are reasonable and adequate to progress the Non-clinical and Clinical Development of Licensed Vaccines hereunder;
- (c) when appropriate based on satisfactory data obtained during the Non-clinical and Clinical Development, use its Commercially Reasonable Efforts to secure all required Regulatory Approvals in the Major Market Countries following completion of all appropriate Clinical Trials; and
- (d) use its Commercially Reasonable Efforts to make the First Commercial Sale of the Licensed Products in each Major Market Country following the issuance of the Regulatory Approvals as well as pricing and reimbursement approvals (if any).

For the avoidance of doubt, the specific diligence obligations under (a) to (d) shall not apply outside of the Major Market Countries.

4.2.5 The Parties agree that BI will assume all of CureVac's rights and obligations (*Vertragsübernahme*) under the collaboration agreement between CureVac, the Cancer Research Institute and the Ludwig Institute for Cancer Research (the Cancer Research Institute and the Ludwig Institute for Cancer Research collectively "**LICR**") entered into as of October 21, 2013 ("**LICR Collaboration Agreement**"), and CureVac shall use Commercially Reasonable Efforts to procure LICR's consent thereto. BI will use Commercially Reasonable Efforts and collaborate with LICR to [\*\*\*\*\*], provided, however, that BI is not obliged to (a) [\*\*\*\*\*]; or (b) perform studies with a commercially available [\*\*\*\*\*]. For purposes of this Agreement, any data and information generated by the LICR in such combination trials and not in the public domain shall be considered Confidential Information of BI. BI will grant and hereby grants to CureVac a non-exclusive license to any such Confidential Information generated by the LICR and Controlled by BI with respect to the [\*\*\*\*\*] for CureVac to use such Confidential Information in support and promotion of its RActive technology for any purposes other than the Licensed Vaccines, provided, however, that (i) CureVac shall disclose such Confidential Information to a Third Party solely under an appropriate confidentiality agreement with such Third Party and (ii) prior to such disclosure to a Third Party CureVac shall send to BI the Confidential Information CureVac wishes to disclose and CureVac agrees to withhold disclosure of same for the time necessary to permit BI to obtain optimum patent protections such time period not to exceed [\*\*\*\*\*] except as required for coordination of such patent protection with BI's collaboration partners other than CureVac. CureVac shall comply with BI's request to withhold disclosure for the time necessary to permit BI to obtain optimum patent protection. In the event CureVac is, despite its Commercially Reasonable Efforts, unable to transfer its rights and obligations regarding the Licensed Vaccines under the LICR Collaboration Agreement to BI, CureVac will exercise the LICR Collaboration Agreement with respect to the Licensed Vaccines upon the direction of BI and BI shall refund any payments to be made to LICR and any costs incurred by CureVac under the collaboration with LICR with respect to the Licensed Vaccines to CureVac.

- 4.2.6 Subject to Section 6.3 below, CureVac shall use its Commercially Reasonable Efforts to progress the CMC Development of the Licensed Vaccines in accordance with the respective Development Plans for the Licensed Products. In particular, CureVac shall conduct all CMC Development activities in a timely manner and allocate such budgets as are reasonable and adequate to progress the CMC Development of Licensed Vaccines at CureVac hereunder in accordance with the Development Plans. Upon CureVac's request, BI shall use its Commercially Reasonable Efforts to support CureVac in the CMC Development by providing any information and/or documentation required by CureVac for the CMC Development.
- 4.3 **Regulatory Matters.** With the exception of the drug master file (or equivalent) for Licensed Vaccines and Licensed Products ("**CureVac DMF**") and all Manufacturing permits and authorizations necessary for the Manufacture of the Licensed Vaccines, BI shall be solely responsible for all regulatory matters including the filing for approvals to the Licensed Vaccines and Licensed Products in the Field. BI shall own, directly or through an Affiliate, all Regulatory Approvals. With the exception only of matters which require prompt attendance, CureVac shall have the right and the obligation to review and comment on all regulatory filings inasmuch as they relate to the Licensed Vaccines and Licensed Products, and BI will take such comments into reasonable consideration. Furthermore, BI will provide copies of all regulatory approvals and material correspondence with Regulatory Authorities in the Major Market Countries relating to the Clinical Trials with respect to Licensed Vaccines and Licensed Products to CureVac, and will reasonably consider a request by CureVac to participate in a meeting with Regulatory Authorities. Notwithstanding the foregoing, CureVac shall have the right and the obligation to participate in a meeting with Regulatory Authorities if and to the extent such meeting relates to the CMC Development. For the avoidance of doubt, BI will have final say on all regulatory matters of the Licensed Vaccines, and the dispute resolution process laid down in Sections 8.5 and 8.6 of this Agreement does not apply. CureVac shall use Commercially Reasonable Efforts to support BI on all regulatory matters with respect to the Non-clinical and Clinical Development and Commercialization of the Licensed Vaccines and Licensed Products and shall maintain all permits and authorizations necessary for the Manufacture of the Licensed Vaccines, including the CureVac DMF. CureVac shall use Commercially Reasonable Efforts to generate and provide to BI (i) CMC Development-related and Manufacturing-related documentation, data and reports, including those listed in **Exhibit 4.3**, and (ii) CMC Development-related technical and other assistance, in each case (i) and (ii) as reasonably required for obtaining Regulatory Approvals and for required interactions with Regulatory Authorities regarding the Licensed Vaccines, including scientific advices. In addition to the obligations under Section 10 below, BI shall ensure that such CMC Development- and/or Manufacturing-related documentation, data and reports are not circulated within BI's and BI's Affiliates' organizations except as required for the purposes mentioned in the foregoing sentence. Each Party shall designate one or more individual(s) to facilitate the provision of the documentation, materials, data and reports as described in this Section 4.3. To the extent required by a Party, a BI Affiliate or a CureVac Affiliate to achieve or maintain regulatory clinical trial and/or marketing application approvals or to comply with any related requests from regulatory authorities related to the Licensed Vaccines, or, if so required by CureVac or by a CureVac Affiliate, to any RNA based product owned or in-licensed by CureVac or its Affiliate, the Parties shall authorize and hereby authorize each other or their respective Affiliate (but not licensees of the other Party) to cross reference to the sections of the IND/regulatory dossiers of the clinical trials related to vaccines or RNA based products Controlled by the other Party or its Affiliate and to any other relevant regulatory filings and any other relevant documentation Controlled by the other Party or its Affiliate. The Parties shall inform each other in writing prior to any such cross-referencing. BI shall consider in good faith any request by CureVac to authorize a future licensee of CureVac to cross-reference to the sections of the IND/regulatory dossiers of the Clinical Trials related to Licensed Vaccine or Licensed Product.

- 4.4 **Competing Products.** In the event BI, any of its Affiliates or any of its Sublicensees outside the scope of this Agreement commences clinical trials or commercialization of any mRNA-based, protamine-complexed vaccine targeting any of the indications for which BI is Developing the Licensed Vaccines or Commercializing the Licensed Products ("**Competing Product**"), and irrespective of whether BI used the CureVac Licensed Intellectual Property to develop such Competing Product, CureVac shall be entitled to terminate the exclusivity of the licenses under Section 2.1 above, so that BI shall retain non-exclusive licenses under Section 2.1, but the remaining provisions of this Agreement remain in full force and effect; and BI shall grant to CureVac a non-exclusive license, including the right to grant sublicenses in multiple tiers, to use any of the BI Collaboration Intellectual Property (other than [\*\*\*\*\*] BI Background Intellectual Property) for the Development, Manufacture and Commercialization of the Licensed Vaccines.
- 4.5 **Development and Commercialization Costs.** As of the Effective Date and unless otherwise agreed, BI will bear (i) any and all costs regarding the Non-clinical and Clinical Development in accordance with the Development Plans, and Commercialization of the Licensed Vaccines and Licensed Products in the Field and in the Territory, (ii) any ongoing costs related to running Clinical Trials with respect to the Licensed Vaccines, as specified in **Exhibit 4.5A**, and (iii) the costs of future combination trials under the LICR Collaboration Agreement. Notwithstanding the foregoing, any payment obligations arising from the existing license agreements between CureVac and (i) [\*\*\*\*\*], (ii) the [\*\*\*\*\*] and (iii) [\*\*\*\*\*] as such license agreements are further specified in **Exhibit 4.5B** hereto, shall be solely borne by CureVac. Subject to Section 8.5 (fourth sentence) below, any costs incurred by CureVac in relation to CMC Development in accordance with the Development Plans will be solely borne by CureVac.

**5. REPORTING OBLIGATIONS.**

- 5.1 Regulatory Reporting.** BI shall be responsible for filing all reports required to be filed in order to maintain any Regulatory Approvals granted for Licensed Vaccines and Licensed Products in the Territory.
- 5.2 Sales Projections.** Commencing on the first December 1 following the date of the First Commercial Sale in the Territory, BI shall provide CureVac on or before December 1 in each calendar year with a confidential, non-binding sales forecast for the upcoming calendar year of the estimated aggregate (i) worldwide sales of Licensed Products and (ii) sales of Licensed Products in each Major Market Country. Subject to its diligence obligations hereunder, BI shall be solely responsible for all aspects of the commercialization and sale of Licensed Products.
- 5.3 Pharmacovigilance.** The Parties shall have in place and will maintain until the expiration (or earlier termination) of this Agreement (or, as applicable, until the obligations intended to survive termination of this Agreement have been fulfilled) systems, procedures, training programs and documentation needed to perform and comply with their pharmacovigilance regulatory obligations, and each Party shall promptly inform the other Party of any safety issues that may arise and that need to be reported under Applicable Laws. Each Party will ensure that it complies with all Applicable Laws regarding the Licensed Vaccine and Licensed Product relating to risk management, drug safety and pharmacovigilance. The Parties shall negotiate in good faith and conclude, on or before [\*\*\*\*] a pharmacovigilance agreement.

**6. MANUFACTURE AND SUPPLY.**

- 6.1 Clinical Supply.** All Licensed Vaccines required for use by BI in accordance with this Agreement for the Non-clinical and Clinical Development of the Licensed Vaccines up to and including Phase II Clinical Trials shall be Manufactured by CureVac in accordance with Applicable Laws and the terms and conditions of the Clinical Supply Agreement attached hereto as **Exhibit 6.1 ("Clinical Supply Agreement")**.
- 6.2 Phase III Clinical Supply and Commercial Supply.** CureVac shall have the right and the obligation to Manufacture Licensed Vaccines for use in Phase III Clinical Trials and for the Commercialization of Licensed Products under this Agreement, the right and the obligation to Manufacture being subject to the right of CureVac to
- (a) waive its right and obligation to Manufacture all Licensed Vaccines for use in Phase III Clinical Trials and for the Commercialization of the Licensed Products by notifying BI of such waiver in writing on or before [\*\*\*\*] and, if CureVac has not provided such notice,
- (b) waive its right and obligation to Manufacture all Licensed Vaccines for the Commercialization of the Licensed Products by notifying BI of such waiver in writing on or before [\*\*\*\*]; provided, however, that if CureVac does not notify BI in writing on or before [\*\*\*\*] that CureVac will not waive its right and obligation to Manufacture all Licensed Vaccines for the Commercialization of the Licensed Products, BI shall have the right to request by written notice to CureVac that CureVac (i) authorizes a BI Affiliate located in Austria or Germany, such Affiliate to be designated by BI in said written notice, to conduct non-GMP production of CV9202 in lab scale experiments (on "process-science" level only), *provided*, that CureVac shall have the right to observe and consult on such lab scale experiments, and (ii) provide access to such BI Affiliate to the following data and information and such additional data and information as may be agreed to by the JSC, in each case to the extent necessary or useful for such activities and Controlled by CureVac (such data and information shall be considered Confidential Information of CureVac):

- o Protocols for [\*\*\*\*\*];
- o Information on [\*\*\*\*\*]; and
- o Protocols for [\*\*\*\*\*]

in each case (i) and (ii) to enable BI to prepare for a potential future GMP Manufacturing of Licensed Vaccines by a BI Affiliate or a Permitted Third Party CMO (as defined in Section 6.3.2 below). In the event CureVac does not provide notice of waiver as set forth under (a) and (b) above and achieves all milestone events set forth under Section 6.3.1(b) below, BI shall return or destroy, as instructed by CureVac, all Confidential Information of CureVac set forth above and any materials and results generated in the course of the lab scale experiments and confirm such return or destruction in writing to CureVac, save that BI may retain copies of such results and of CureVac's Confidential Information as set forth in Section 10.5 below.

Before [\*\*\*\*\*] the Parties shall negotiate in good faith commercially reasonable terms and conditions of an amendment to the Clinical Supply Agreement and conclude such amendment in order to cover Phase III Clinical Trial supply in accordance with the terms and conditions of the binding term sheet attached as **Exhibit 6.2A** hereto, unless CureVac is providing notice of waiver as set forth in (a) above before or during such negotiations. If CureVac has not provided the notice of waiver as set forth in (a) above within the prescribed time, before [\*\*\*\*\*] the Parties shall negotiate in good faith commercially reasonable terms and conditions of a commercial supply agreement and conclude such commercial supply agreement in accordance with the terms and conditions of the binding term sheet attached as **Exhibit 6.2B** hereto, unless CureVac has provided notice of waiver as set forth in (b) above before or during such negotiations. The Parties will negotiate in good faith any amendment to the commercial supply agreement which either Party requests and which may be necessary or useful to adapt the agreement to potential changes in the Development Plan or to the Licensed Vaccine after [\*\*\*\*\*]. In order to reach a common understanding about the methods of cost allocation for the Licensed Vaccine cost calculation for the Phase III Clinical Trial supply and for the commercial supply as well as in order to be able to audit such costs, BI and CureVac shall agree upon the calculation method and the content of the calculation in good faith. On or before [\*\*\*\*\*] CureVac shall describe its current methods of cost allocation for product cost calculation, such description to detail the following elements:

- o cost center structure and costs booked to these cost centers
- o method of allocation for cost centers
- o calculation of hourly rates for personnel
- o calculation of hourly rates for plants
- o differentiation of idle capacity
- o overhead calculation method
- o definition of standard price for negotiation

### 6.3 Manufacturing by BI.

#### 6.3.1 If CureVac

- (a) provides notice of waiver as set forth in Section 6.2 (a) or (b) above within the prescribed time to BI;
- (b) fails to achieve any one of the following milestone events
  - (i) CureVac provides the results of the ongoing feasibility study concerning the (x) upscaling of the current [\*\*\*\*\*] Manufacturing process (such upscaled Manufacturing process being defined as the "[\*\*\*\*\*] **Process**"); (y) the reconstruction of CureVac's existing pilot plant to implement the [\*\*\*\*\*] Process at said pilot plant; and (z) the construction of a commercial facility for, *inter alia*, the Manufacturing of Licensed Vaccines for the Commercialization of the Licensed Products ("**Commercial Facility**"), such results (including an evaluation of at least one (1) of the CV9202 plasmid DNAs if such material has been provided to CureVac under the Material Transfer and Feasibility Study Agreement (**Exhibit 6.4A**) below on or before [\*\*\*\*\*], *provided, however*, that the outcome of the evaluation of the CV9202 plasmid DNAs shall not determine the achievement of this milestone) of the feasibility study to be provided to BI on or before [\*\*\*\*\*] or any later point in time agreed by the JSC, and the JSC confirms that the results of the ongoing feasibility study with respect to (x), (y) and (z) demonstrates that it meets the objectives set by the JSC prior to completion of the feasibility study and consequently supports CureVac's ability to Manufacture for Phase III Clinical Trial supply and commercial supply for purposes of this Agreement;
  - (ii) the comparability concept of the [\*\*\*\*\*] Process to the existing [\*\*\*\*\*] Manufacturing process at CureVac's pilot plant has been discussed and clarified with the EMA and the FDA on or before [\*\*\*\*\*] or any later point in time if so delayed by the JSC or such delay is caused by BI internal processes;
  - (iii) the EMA and the FDA accept the comparability of the [\*\*\*\*\*] Process to the existing [\*\*\*\*\*] Manufacturing process at CureVac's pilot plant on or before [\*\*\*\*\*] or any later point in time if so delayed by the JSC or such delay is caused by BI internal processes; and

- (iv) CureVac makes a final decision to build a Commercial Facility and notifies BI of such decision on or before [\*\*\*\*\*]; or
- (c) is in material breach of its obligations - if any - to Manufacture and supply Licensed Vaccines in accordance with a Related Agreement, has been notified by BI of such material breach and does not cure such material breach within the time periods set forth in the respective Related Agreement,

BI shall be entitled to Manufacture Licensed Vaccines, and CureVac shall grant and hereby grants to BI and BI accepts a non-exclusive, royalty-free and perpetual, non-transferable license (with the right to grant sub-licenses solely to Affiliates located in [\*\*\*\*\*], *provided* such Affiliate enters into a direct agreement with CureVac containing a direct extension of rights in-licensed by CureVac from Geneart with respect to the Manufacture of Licensed Vaccines and confidentiality obligations corresponding to the ones set forth in Sections 4.3 and 10 below, under CureVac's then existing CureVac Licensed Manufacturing Intellectual Property for the CMC Development and the Manufacturing of Licensed Vaccines and Licensed Products solely for use by BI under the license granted in Section 2.1, provided that any sub-license or extensions of rights granted to BI shall be subject to the terms and conditions of any then existing head-license agreements. Any dispute concerning the achievement of one of the milestone events set forth above shall be resolved in accordance with the provisions of Sections 8.5 and 8.6 below.

- 6.3.2 BI shall have the right to engage a Third Party contract manufacturer located [\*\*\*\*\*] ("**Permitted Third Party CMO**") to Manufacture Licensed Vaccines by providing written notice of such intent and the identity of the contract manufacturer to CureVac, provided that
- (a) CureVac shall be permitted to veto the engagement of such contract manufacturer if (i) CureVac has reasonable grounds to believe that such contract manufacturer will not (x) protect CureVac's Confidential Information including CureVac's proprietary Materials in accordance with the standards set forth in Sections 4.3 and 10 or (y) be able to Manufacture the Licensed Vaccines in accordance with Applicable Laws, and (ii) CureVac provides to BI written documentation supporting such reasonable grounds to BI within [\*\*\*\*\*] of receipt by CureVac of BI's written notice identifying the contract manufacturer;
  - (b) BI ensures that the Permitted Third Party CMO meets all obligations of BI under this Section 6, including the obligation set forth in Section 6.3.3 below, and BI makes available a copy of the agreement (redacted to exclude only information on compensation of the Permitted Third Party CMO) with the Permitted Third Party CMO to CureVac; **and**
  - (c) the Third Party contract manufacturer enters into a direct agreement with CureVac containing a direct extension of rights from Geneart with respect to the Manufacture of the Licensed Vaccines, confidentiality obligations and Material transfer obligations corresponding to the ones set forth in Sections 4.3 and 10.

- 6.3.3 Any improvements generated by or on behalf of BI to any CureVac Licensed Manufacturing Intellectual Property will be assigned and transferred, and are hereby assigned and transferred to CureVac (and CureVac will accept and hereby accepts such assignment and transfer) and licensed back to BI, on a non-exclusive, cost-free and perpetual basis, with the right to (a) grant sub-licenses to Affiliates and (b) enable the Permitted Third Party CMO to make use of such improvements; and any other Intellectual Property generated by BI with respect to the Manufacturing of the Licensed Vaccine, except for such Intellectual Property related to the BI pDNA Process and generated under a Related Agreement specific to such pDNA Process, will be licensed, and is hereby licensed to CureVac on a non-exclusive, cost-free and perpetual basis, with the right to sublicense, for any purpose other than the Commercialization of the Licensed Products during the term of this Agreement.
- 6.3.4 Furthermore, (a) each Party shall be released from its respective obligations to enter into any agreement contemplated by Sections 6.2 and 6.4 of this Agreement; (b) upon BI's written request, BI shall be released from any obligation under the Related Agreements to purchase Licensed Vaccines from CureVac except for such deliveries listed in a Related Agreement's Delivery Schedule which have already become binding on the date of BI's written request; **and** (c) BI shall have the right to request from CureVac by written notice the transfer of CureVac's CMC Development activities and the Manufacturing technology required for the Manufacture of Licensed Vaccines solely to the entity which will be Manufacturing the Licensed Vaccine under the licenses granted under Section 6.3.1, i.e., to BI, to a BI Affiliate or to the Permitted Third Party CMO. Upon receipt of such written notice by CureVac, CureVac shall, use Commercially Reasonable Efforts to (aa) transfer all data and information to the extent necessary or useful for such activities and Controlled by CureVac (such data and information shall be considered Confidential Information of CureVac) and (bb) provide all support, in each case (aa) and (bb) as reasonably required for BI, the BI Affiliate or the Permitted Third Party CMO, as applicable, to take over the CMC Development activities and the Manufacturing of the Licensed Vaccines. The transfer of such data and information and the support under (aa) and (bb) shall be at no cost to BI, with the exception only of travel costs and travel time, if and to the extent the transfer or support is to be provided at any place outside of Europe. -
- 6.3.5 In consideration for CureVac's significant past investments and established Manufacturing Intellectual Property, technology and processes, BI shall pay to CureVac a one-off technology transfer fee in the amount of [\*\*\*\*] solely when and if the following conditions are met: (a) the Manufacturing by BI was triggered by the events as set forth in Section 6.3.1 (a); 6.3.1 (b)(i); or Section 6.3.1 (b)(iv); (b) BI makes the First Commercial Sale of a Licensed Product in the USA; and (c) at the time of such First Commercial Sale BI, a BI Affiliate or a Permitted Third Party CMO has Manufactured Licensed Vaccines and CureVac is not Manufacturing Licensed Vaccines or is Manufacturing Licensed Vaccines only as a second source supplier of BI under a separate supply agreement with BI. Such payment shall be due and payable within [\*\*\*\*] after receipt of a respective Invoice.

**6.4 Plasmid DNA as Precursor for Licensed Vaccines.** The Parties aspire that CureVac will manufacture plasmid DNA needed as a precursor for the Manufacture of Licensed Vaccines for Phase III Clinical Trials and commercial supply and potentially also for other RNA based products owned or in-licensed by CureVac in accordance with a manufacturing process to be developed by BI's Affiliate Boehringer Ingelheim Biopharmaceuticals GmbH ("**BI Bio**") and transferred to CureVac ("**BI pDNA Process**"). To this end, CureVac will provide all necessary materials (e.g., plasmid DNA samples) as well as information and a BI Affiliate will conduct a feasibility study in accordance with the Material Transfer and Feasibility Study Agreement (Exhibit 6.4A). As soon as possible after both Parties have generated all data necessary for assessing whether the quality of the BI pDNA Process (i.e., the analytical results are within the specifications agreed between the Parties at the start of the pDNA feasibility study) meets CureVac's requirements and the plasmid DNA manufactured in accordance with the BI pDNA Process meets the requirements agreed between the Parties, including requirements for RNA based products other than Licensed Vaccines, the Parties shall discuss such data in the Joint Project Team, and the Joint Project Team will provide a recommendation to the JSC. If the JSC decides that the BI pDNA Process and the plasmid DNA manufactured in accordance with the BI pDNA Process meet the requirements set forth in the foregoing sentence, CureVac shall and BI shall ensure that BI Bio will negotiate in good faith commercially reasonable terms and conditions of a license agreement concerning the BI pDNA Process, such terms and conditions to (i) be in accordance with the terms and conditions of the binding term sheet attached hereto as **Exhibit 6.4B** and (ii) insofar as Exhibit 6.4B does not provide otherwise, substantially correspond to the terms and conditions of the license agreement between CureVac and its plasmid DNA development partner on the Effective Date. In order to ensure the availability of plasmid DNA as a precursor for the manufacture of Licensed Vaccines in case the JSC decides that the quality of the BI pDNA Process and/or the plasmid DNA manufactured in accordance with the BI pDNA Process does not meet the requirements agreed between the Parties or CureVac and BI Bio do not reach agreement on a BI pDNA Process license agreement, CureVac shall and BI shall ensure that BI Bio will negotiate in good faith commercially reasonable terms and conditions of and conclude on or before [\*\*\*\*\*] either

- (a) a license agreement concerning a manufacturing process to be developed by BI Bio and transferred to CureVac for the manufacture of plasmid DNA that will be used as precursor solely for the manufacture of Licensed Vaccines; or
- (b) a supply agreement under which BI Bio would supply plasmid DNA to CureVac, such plasmid DNA to be used solely as precursor for the manufacture of Licensed Vaccines.

If the Parties, despite good faith efforts, do not conclude one of the plasmid DNA-related agreements set forth above by [\*\*\*\*\*] the Parties shall agree on involving a Third Party in the manufacturing of plasmid DNA needed as a precursor for the Manufacture of Licensed Vaccines.

- 6.5 Manufacturing by BI After Expiry of the Agreement.** Upon expiry of the Agreement in all countries and for all Licensed Products, and if CureVac was still Manufacturing the Licensed Vaccines under this Agreement at the time of expiry, CureVac will reasonably consider to continue supplying BI at terms and conditions corresponding to the ones applicable before the expiry of the Agreement, subject only to reasonable price adjustment to reflect any changes in raw material and labor costs, and the Parties shall conduct good faith negotiations for CureVac to continue supplying Licensed Vaccines. In the event the Parties cannot agree in such good faith negotiations, BI shall have the right to request from CureVac, by written notice prior to expiry of this Agreement, the grant to BI of a non-exclusive, royalty-free and perpetual license under CureVac's then existing CureVac Licensed Manufacturing Intellectual Property for the CMC Development and the Manufacturing of Licensed Vaccines and Licensed Products, with the right to grant sub-licenses to Affiliates and to engage Permitted Third Party CMOs, for use by BI under the retained license of Section 13.1. Upon receipt of such written notice by CureVac, CureVac shall use Commercially Reasonable Efforts to (i) transfer all data and information to the extent necessary or useful for such activities and Controlled by CureVac (such data and information to be considered Confidential Information of CureVac), and (ii) provide all support, in each case (i) and (ii) as reasonably required for BI, the BI Affiliate or the Permitted Third Party CMO to take over the Manufacturing of the Licensed Vaccines, such license and transfer being subject to the additional limitations set forth in the last paragraph of Section 6.3.1 and Sections 6.3.2 and 6.3.3 applied by analogy. The transfer of such data and information and the support under (i) and (ii) shall be at no cost to BI, with the exception only of travel costs and travel time, if and to the extent the transfer or support is to be provided at any place outside of Europe. In consideration for CureVac's significant past investments and established Manufacturing Know How, technology and processes, BI shall pay to CureVac a one-off technology transfer fee in the amount of Five Million Euros (€ 5,000,000) to become due and payable within [\*\*\*\*\*] of the later of the first commercial sale by BI, a BI Affiliate or a Sublicensee of a Licensed Vaccine Manufactured by BI, a BI Affiliate or a Permitted Third Party CMO and the receipt by BI of an Invoice from CureVac.
- 6.6 Fill and Finish.** For Licensed Vaccines used for Commercialization by BI under this Agreement, CureVac and BI shall discuss in good faith the filling and finishing of CureVac Licensed Vaccines by either CureVac, BI, a BI Affiliate or a Third Party contract manufacturer with respect to the costs and quality of such filling and finishing. In case of quality issues at CureVac or if the Parties cannot reach agreement on prices for the filling and finishing of CureVac Licensed Vaccines, CureVac shall grant to BI a non-exclusive, royalty-free license, with the right to grant sub-licenses to Affiliates and to engage a Third Party contract manufacturer, under the CureVac Licensed Manufacturing Intellectual Property solely to the extent required for filling and finishing Licensed Vaccines intended for such Commercialization purposes.
- 6.7 CureVac's License to Manufacture.** For the term during which CureVac Manufactures the Licensed Vaccines under this Agreement and the Clinical Supply Agreement and the Related Agreements to be concluded in accordance with Section 6.2, BI shall grant and hereby grants to CureVac a non-exclusive license to any Intellectual Property Controlled by BI and its Affiliates (including any BI Collaboration Intellectual Property but excluding any Intellectual Property related to the BI pDNA Process and generated under a Related Agreement specific to such pDNA Process) solely to the extent required for CureVac to Manufacture the Licensed Vaccines.

**7. CONSIDERATION.**

**7.1 Upfront Payment.** In consideration for the exclusive licenses granted hereunder, BI shall pay to CureVac a non-refundable and non-creditable fee in the amount of Thirty Million Euros (€ 30,000,000) within thirty (30) days after BI's receipt of an Invoice of the respective amount from CureVac; *provided* that such amount shall not become payable until such time as BI has received a duly signed original of the Agreement from CureVac.

**7.2 Option Fee.** In consideration for the exclusive option granted hereunder, BI shall pay to CureVac a non-refundable and non-creditable option fee in the amount of Five Million Euros (€ 5,000,000) within thirty (30) days after BI's receipt of an Invoice of the respective amount from CureVac; *provided* that such amount shall not become payable until such time as BI has received a duly signed original of the Agreement from CureVac.

**7.3 Development and Regulatory Milestone Payments.** In addition to the payments under Sections 7.1 and 7.2, in further consideration for the exclusive licenses granted hereunder, and subject to the terms and conditions set forth in this Agreement, BI shall make the following Development and regulatory milestone payments to CureVac:

**7.3.1 Development and Regulatory Milestone Payments for the First Indication (on the Effective Date expected to be Lung Cancer):**

(a) [\*\*\*\*\*]

(b) [\*\*\*\*\*]

(c) [\*\*\*\*\*]

(d) [\*\*\*\*\*]

- (e) For regulatory milestones see table below:

[\*\*\*\*\*]

Provided, however, that if BI suspends the Development of the Afatinib Vaccine and/or the Chemo-Radiation Vaccine and replaces such TPP by another TPP (e.g., the combination of a Licensed Vaccine with a checkpoint inhibitor and/or a co-stimulatory molecule, a "**Checkpoint Inhibitor Vaccine**"), the applicable above milestone payments under (a) to (e) shall be payable for the other TPP replacing the Afatinib Vaccine and/or the Chemo-Radiation Vaccine. For the avoidance of doubt, milestone payments already paid for the Development of a TPP prior to suspension shall not be payable for the other TPP replacing the Afatinib Vaccine and/or the Chemo-Radiation Vaccine.

**7.3.2 Development and Regulatory Milestone Payments for the Second and Third Indications:**

In the event a Licensed Vaccine or Licensed Product is Developed in a second or third indication (e.g., head and neck cancer and/or cervical cancer) BI shall make the following Development and regulatory milestone payments for the first Licensed Vaccine reaching the respective milestones in the second indication and for the first Licensed Vaccine reaching the respective milestones in the third indication:

- (a) [\*\*\*\*\*]

- (b) [\*\*\*\*\*]

- (c) For regulatory milestones for the second and third indications see below:

[\*\*\*\*\*]

"**Initiation**" of a Clinical Trial for purposes of this Article 7 shall mean dosing of the first patient in such Clinical Trial; and "**continuation**" shall mean the final decision of a BI steering committee (International Development Committee, the International Medical Committee or an equivalent body of BI) to continue a Phase I/II Clinical Trial, a Phase II/III Clinical Trial or a Phase I through Phase III seamless design Clinical Trial. The competent steering committee shall use Commercially Reasonable Efforts to make such final decision in a timely manner and to inform CureVac on the achievement of milestones.

If any one of the milestone events under Section 7.3.1 and 7.3.2 is not required for the Development of a Licensed Vaccine or Licensed Product, such milestone payment shall become payable upon achieving the respective milestone event following the milestone event which was not required, i.e., upon the achievement of such following milestone event two milestone payments become payable hereunder. For clarity, the achievement of an Afatinib Vaccine-related milestone event does not trigger payment of a Chemo-Radiation-related milestone payment, and the achievement of a Chemo-Radiation-related milestone event does not trigger payment of an Afatinib Vaccine-related milestone payment. Further, the achievement of a regulatory milestone event for a certain territory (e.g., the EU) does not trigger payment of a regulatory milestone payment for a different territory (e.g., the USA). Each Development and regulatory milestone payment under Section 7.3.1 and Section 7.3.2 for each indication set forth above is payable only upon first achievement of such milestone for the first Licensed Vaccine or Licensed Product, and no further payments are due for repeated achievements of such milestones for such indication. For purposes of clarity, the maximum aggregate amount payable by BI pursuant to this Section 7.3 is [\*\*\*\*\*].

#### 7.4 Sales Milestone Payments.

In addition to the upfront and milestone payments specified in Sections 7.1 to 7.3 above, in further consideration for the exclusive licenses granted by CureVac to BI hereunder; and subject to the terms and conditions set forth in this Agreement, BI shall make the following one-off, sales based milestone payments:

- (a) If aggregated annual worldwide Net Sales exceed for the first time [\*\*\*\*\*]: [\*\*\*\*\*]
- (b) if aggregated annual worldwide Net Sales exceed for the first time [\*\*\*\*\*]: [\*\*\*\*\*];
- (c) if aggregated annual worldwide Net Sales exceed for the first time [\*\*\*\*\*]: [\*\*\*\*\*]; and
- (d) if aggregated annual worldwide Net Sales exceed for the first time [\*\*\*\*\*]: [\*\*\*\*\*].

For purposes of clarity, the maximum aggregate amount payable by BI pursuant to this Section 7.4 is [\*\*\*\*\*].

- 7.5 **Obligation to Inform.** BI shall inform CureVac on the occurrence of a milestone event under Sections 7.3 and 7.4 as soon as possible but in any event within [\*\*\*\*\*] after the occurrence thereof.
- 7.6 **Milestone Payment Terms.** Each milestone payment shall be due and payable within [\*\*\*\*\*] after the receipt of the respective Invoice by BI. Notwithstanding the foregoing, each sales milestone payment shall be paid together with the royalty payments of the Calendar Quarter during which the respective milestone has been achieved.
- 7.7 **Non-Refundable Payments.** All payments to be made by BI to CureVac under Sections 7.1 to 7.4 hereof are non-refundable upon expiry or termination of this Agreement for any reason. None of the payments to be made by BI to CureVac under Sections 7.1 to 7.4 may be credited against any of BI's royalty obligations under Section 7.8 hereof.
- 7.8 **Royalties.**
- 7.8.1 **Royalty Rates.** As further consideration for the rights and licenses granted by CureVac to BI under this Agreement, BI shall pay or cause payment of royalties to CureVac in an amount equal to [\*\*\*\*\*] of Net Sales of the Licensed Products.
- 7.8.2 **Royalty Calculation.** The royalties shall be calculated on the basis of Net Sales, which shall be calculated on a Licensed Product-by-Licensed Product and country-by-country basis from First Commercial Sale until the expiration of the applicable Royalty Term.
- 7.8.3 **Royalty Term.** BI's obligation to pay royalties shall begin, on a country-by-country basis, with the First Commercial Sale, and expire, on a country-by-country and Licensed Product-by-Licensed Product basis, upon the later of (i) expiry of the last to expire Valid Claim in such country; (ii) expiry of regulatory exclusivity for the respective Licensed Product in such country, provided, however, that no Generic Competition exists for such Licensed Product in such country or BI does not enforce existing regulatory exclusivity to enjoin Generic Competition despite preponderant chances of success of such action; or (iii) twelve (12) years from the date of First Commercial Sale of the respective Licensed Product (each a "**Royalty Term**"), provided, however, with respect to any country other than the Major Market Countries the Royalty Term shall expire on a Licensed Product-by-Licensed Product basis in such country at the latest fifteen (15) years from the date of First Commercial Sale of the respective Licensed Product in any country other than the Major Market Countries.

- 7.8.4 **Third Party Royalties Offset.** In the event that BI, after consultation with CureVac, reasonably determines that, in order to have freedom to operate in practicing the CureVac Licensed Intellectual Property in accordance with this Agreement in any country, BI is required to make royalty payments to one or more Third Party Licensors to obtain a license under their Patent Rights, then royalties due to CureVac for the respective Licensed Product in the respective country under this Section 7.8 shall be reduced by [\*\*\*\*\*] of the amount of such Third Party Licensor payments. Notwithstanding the foregoing, such reductions shall in no event reduce the royalty payable for such Licensed Product to less than [\*\*\*\*\*] of Net Sales in such country. For clarity, the provisions of this Section 7.8.4 shall not apply with respect to the license agreements referred to in Exhibit 4.5B.
- 7.8.5 **Countries without Patent Protection; Generic Competition.** In countries (a) where (i) sales of Licensed Product do not or no longer fall under any Valid Claim and (ii) regulatory exclusivity for the Licensed Product has expired, or (b) where the Licensed Product is experiencing Generic Competition (except where (x) BI has the primary right in accordance with Section 9.6.2 of this Agreement to bring a patent infringement action to enjoin such Generic Competition and, despite preponderant chances of success of such infringement action, notifies CureVac that BI will not take action or bring suit to prosecute such infringement; or (y) BI does not enforce existing regulatory exclusivity to enjoin such Generic Competition despite preponderant chances of success of such action), royalties set forth above shall be reduced by [\*\*\*\*\*]. Should BI obtain evidence that any of the above requirements for such royalty reduction were met during a Calendar Quarter after BI has completed preparing its Net Sales report for such Calendar Quarter, BI shall be entitled to a credit, to be applied by BI against subsequent royalty payments, in the amount by which royalties would have been reduced had due account been taken of such royalty reduction when preparing such Net Sales report. If royalties are subject to the reductions under both Section 7.8.4 and 7.8.5, the reduction under Section 7.8.4 shall be applied before the reduction under Section 7.8.5.
- 7.8.6 **Blended Royalties.** With respect to a potential step down in royalty rates to account for the expiry of certain Patent Rights, the Parties acknowledge and agree that the CureVac Licensed Intellectual Property licensed under this Agreement may justify royalty rates and/or royalty terms of differing amounts for sales of Licensed Products in the Territory, which rates could be applied separately to Licensed Products involving the exercise of CureVac Licensed Patent Rights in the Territory and/or the incorporation of Know How comprised in the CureVac Licensed Intellectual Property, and that if such royalties were calculated separately, royalties relating to the CureVac Licensed Patent Rights in the Territory and royalties relating to the Know How comprised in the CureVac Licensed Intellectual Property would last for different terms. For practicality reasons the Parties have agreed on a blended royalty rate. For clarity, this Section 7.8.6 (i) solely explains the rationale behind the royalty rates agreed on by the Parties and (ii) does not modify any of the other provisions of this Agreement.

7.8.7 **No Multiple Royalties.** No multiple royalties shall be payable because a Licensed Product, its manufacture, use or sale is or shall be covered by (i) more than one Valid Claim and/or (ii) more than one patent under the Patent Rights which form part of the CureVac Background Intellectual Property and/or the CV9202 Specific Patent Rights.

7.8.8 **Net Sales Adjustments Related to Combination Products and Co-Packaged Products.** In the event a Licensed Product is sold as a Combination Product or Co-Packaged Product, Net Sales of the Combination Product or Co-Packaged Product will be calculated, on a country-by-country basis, as follows:

If the Licensed Product and the other product are also sold separately in the applicable country, Net Sales of the Licensed Product portion of Combination Products and Co-Packaged Products will be calculated by multiplying the total Net Sales of the Combination Product or Co-Packaged Product by the fraction  $A/(A+B)$ , where A is the average gross selling price in the applicable country of the Licensed Product sold separately in the same formulation and dosage, and B is the sum of the average gross selling prices in the applicable country of all other therapeutically or prophylactically active ingredients or products in the Combination Product or Co-Packaged Product sold separately in the same formulation and dosage, during the applicable Calendar Quarter.

If the Licensed Product is sold separately, but the average gross selling price of the other product(s) cannot be determined, Net Sales of the Combination Product or the Co-Packaged Product shall be equal to the Net Sales of the Combination Product or Co-Packaged Product multiplied by the fraction  $A/C$  wherein A is the average gross selling price of the Licensed Product and C is the average gross selling price of the Combination Product or Co-Packaged Product.

If the other product(s) is/are sold separately, but the average gross selling price of the Licensed Product cannot be determined, Net Sales of the Combination Product and/or Co-Packaged Product shall be equal to the Net Sales of the Combination Product and/or Co-Packaged Product multiplied by the following formula: one (1) minus  $B/C$  wherein B is the average gross selling price of the other product(s) and C is the average gross selling price of the Combination Product and/or Co-Packaged Product.

If the average gross selling price of neither the Licensed Product nor the other product(s) can be determined, Net Sales of the Combination Product or Co-Packaged Product shall be equal to Net Sales of the Combination Product or Co-Packaged Product multiplied by a mutually agreed percentage.

The average gross selling price for such other product(s) contained in the Combination Product or Co-Packaged Product shall be calculated for each calendar year by dividing the sales amount by the units of such other product(s), as published by IMS or another mutually agreed independent source. In the initial calendar year during which a Combination Product or Co-Packaged Product is sold, forecasted average gross selling prices shall be used for royalty calculation purposes. Any over or under payment due to a difference between forecasted and actual average gross selling prices shall be paid or credited in the second royalty payment of the following calendar year. In the following calendar year the average gross selling price of the previous year shall apply from the second royalty payment on.

- 7.8.9 Royalty Payments.** Within [\*\*\*\*\*] after the end of each Calendar Quarter in which any Net Sales occur, BI shall calculate the royalty payments owed to CureVac and shall remit to CureVac the amount owed to CureVac. All royalty payments shall be computed by converting the Net Sales in each country in the Territory into the currency of Euros, using the monthly exchange rates as customarily used by BI in its regular accounting system (momentarily average rates published by the European Central Bank in Frankfurt/Main, Germany).
- 7.8.10 Reports.** Each royalty payment shall be accompanied by a written report describing the Net Sales of each Licensed Product sold by or on behalf of BI, its Affiliates and Sublicensees during the applicable Calendar Quarter for each country in which sales of any Licensed Product occurred, specifying: the gross sales (if available) and Net Sales in each country's currency, including an accounting of deductions taken in the calculation of Net Sales; the applicable exchange rate to convert from each country's currency to Euros; and the royalties payable in Euros.
- 7.8.11 Records.** BI, its Affiliates and/or its Sublicensees shall keep and maintain records of sales of the Licensed Product(s) so that the royalties payable and the royalty reports may be verified. Such records shall be open to inspection during business hours for a [\*\*\*\*\*] period after the Calendar Quarter to which such records relate, but in any event not more than once per calendar year, by a nationally recognized independent certified public accountant selected by CureVac to whom BI has no reasonable objections and retained at CureVac's expense. Said accountant shall sign a confidentiality agreement prepared by BI and reasonably acceptable to CureVac and shall then have the right to examine the records kept pursuant to this Agreement and report to CureVac the findings (but not the underlying data) of said examination of records as necessary to evidence that the records were or were not maintained and used in accordance with this Agreement. CureVac shall ensure that a copy of any report provided to CureVac by the accountant is given concurrently to BI. If said examination of records reveals any underpayment(s) of the royalty payable, then BI shall promptly pay the balance due to CureVac, and if the underpayment(s) is/are more than 5%, then BI shall also bear the expenses of said accountant. If said examination of records reveals any overpayment(s) of royalty payable, then CureVac shall credit the amount overpaid against BI's future royalty payment(s).

**7.9 Payment Terms.**

7.9.1 All payments by BI to CureVac shall be made by wire transfer payment, and shall be remitted to the following bank account:

[\*\*\*\*\*]

Invoices shall be sent to BI at the following address: Boehringer Ingelheim International GmbH [\*\*\*\*\*]

Quote the BI in-house contact person in a corresponding reference field or anywhere on the invoice/credit note outside of the address field:

Contact: [\*\*\*\*\*]

7.9.2 Payments not paid within five (5) days after the due date under this Agreement shall bear interest at an annual rate of three percent (3%) above the three-month-LIBOR rate of the respective currency for the time period in which such amount is outstanding, as disclosed from time to time by the European Central Bank which applied on the due date. Calculation of interest will be made for the exact number of days in the interest period based on a year of 360 days (actual/360) by BI.

**7.10 Taxes.**

7.10.1 All payments under or in connection with this Agreement shall be inclusive of any income taxes and each Party shall be responsible for its own income taxes assessed by a tax or other authority except as otherwise set forth in this Agreement.

7.10.2 If applicable laws require withholding of BI of any taxes imposed upon CureVac on account of any royalties and payments, paid under this Agreement, such taxes shall be deducted by BI as required by law from such remittable royalty and payment and shall be paid by BI to the proper tax authorities. Official receipts of payment of any withholding tax shall be secured and sent to CureVac as evidence of such payment. The Parties shall exercise their best efforts to ensure that any withholding taxes imposed are reduced as far as possible under the provisions of any relevant tax treaty, and BI shall forward any refund payments to CureVac without undue delay, *provided, however*, in the event BI transferred its domicile outside of Germany, BI shall bear the risk and compensate CureVac for such withholding tax not being partly or fully refunded, and if CureVac transfers its domicile outside of Germany, CureVac shall bear the risk of such withholding tax not being partly or fully refunded.

7.10.3 All payments due to the terms of this Agreement are expressed to be exclusive of value added tax (VAT) or similar indirect taxes (e.g., Goods and Service tax). VAT/indirect taxes shall be added to the payments due to the terms if legally applicable.

**8. JOINT STEERING COMMITTEE AND JOINT PROJECT TEAM.**

**8.1 Formation of the JSC.** The Parties shall form a Joint Steering Committee (the "**Joint Steering Committee**" or "**JSC**"), which shall monitor the Development of the Licensed Vaccines as described in more detail in Section 8.3 below. Each Party shall be equally represented on the Joint Steering Committee with an equal number of participants. The Joint Steering Committee shall be comprised of at least six (6) professionally and technically qualified representatives, three (3) from each Party. The Joint Steering Committee shall meet for the first time within six (6) weeks after the Effective Date and thereafter at least once a Calendar Quarter, with additional meetings to be held as the Parties deem necessary or in case a situation occurs in which a decision by the JSC is required, within [\*\*\*\*\*] after written request for such meeting by either Party. BI shall designate the chairperson of the JSC. The meeting place shall alternate between the offices of BI in [\*\*\*\*\*] and the offices of CureVac in [\*\*\*\*\*] or as otherwise decided by the JSC. JSC meetings may be conducted in person, by telephone or videoconference as agreed between the Parties, *provided, however*, that at least twice a year the JSC meeting shall be held in person. Each Party shall provide the other Party with written notice of its representatives for the JSC within [\*\*\*\*\*] after the Effective Date of this Agreement and, thereafter, immediately upon replacement, *provided, however*, that the Parties shall use Commercially Reasonable Efforts to ensure continuity on the JSC. Each Party may invite guests to the meetings, in order to discuss special technical or commercial topics relevant to the applicable agenda, *provided, however*, such guests are bound by confidentiality obligations corresponding to Sections 4.3 and 10. Prior to each meeting of the JSC each Party will make available to the other Party written copies of Development Data regarding the Development and other information relating to its respective activities and timelines. Furthermore, the Parties shall inform each other in writing at least [\*\*\*\*\*] prior to each JSC meeting of any event which could result in a material deviation from the activities and timelines set forth in the Development Plans.

**8.2 Decision Making in the JSC.** The JSC shall have the right to adopt such standing rules as shall be necessary for its work, to the extent that such rules are not inconsistent with this Agreement. A quorum of the JSC shall exist whenever at least one representative appointed by each Party is present. The representatives from each Party may give proxy to the other representatives from such Party. The representatives from each Party will collectively have one vote in decisions of the JSC, with decisions of the JSC made by unanimous vote at a meeting at which a quorum exists.

**8.3 Responsibilities of the JSC.** The Parties shall be jointly responsible for directing the activities of the JSC, which activities shall include but not be limited to

- (a) the review, validation, material modification, update and amendment of the Development Plans;
- (b) the monitoring of the Development activities under the Development Plans;
- (c) the exchange of Development Data and other technical information;

- (d) the resolution of any disputes within the Joint Project Team; and
- (e) the coordination of patents and other intellectual property rights applications regarding Joint Inventions.

For the avoidance of doubt, the JSC is not permitted to change any terms of this Agreement.

- 8.4 Minutes.** The JSC shall keep accurate and complete minutes of its meetings. The chairperson for each meeting shall be responsible for taking such minutes and distributing them to CureVac for its review and comment within two (2) weeks after the date of each meeting, and within one (1) week after the receipt thereof, CureVac shall remit such minutes back to the chairperson with its comments, if any. The Parties shall in good faith attempt as quickly as is reasonably possible to resolve any disputes as to the content of such minutes so as to have a final agreed version as quickly as is reasonably possible.
- 8.5 Decision Making Authority.** All decisions of the JSC shall be made in good faith in the best interest of this Agreement and the Parties shall use their Commercially Reasonable Efforts to take decisions unanimously. In the event that the JSC is unable to agree on any matter after good faith attempts to resolve such disagreement in a commercially reasonable fashion, then either Party may refer the disagreement to a personal face-to-face meeting between the board member representing RD&M or his/her nominated designee of BI and the CEO or CCO of CureVac, and each Party shall ensure that such meeting takes place within [\*\*\*\*\*] after the date of the relevant referral. If the board member representing RD&M or his/her nominated designee of BI and the CEO or CCO of CureVac cannot resolve such disagreement in a mutually acceptable manner within a further [\*\*\*\*\*] period after such personal face-to-face meeting, then the vote of BI with appropriate consideration of the interests of CureVac shall be decisive regarding Development and Commercialization, except in the event the disputed topic would result in (a) a substantial reduction of BI's diligence obligations under Section 4.2 hereof; (b) a delay of the Non-clinical and Clinical Development of more than [\*\*\*\*\*]; (c) a substantial change regarding the Manufacture of the Licensed Vaccines; (d) less FTE support of CureVac or an increase in FTE support of CureVac by more than [\*\*\*\*\*]; (e) the evaluation of the outcome of the ongoing feasibility study as referenced in Section 6.3.1(b) above; or (f) the evaluation of the outcome of the feasibility study with respect to the BI pDNA Process as referenced in Section 6.4 above. If BI casts its decisive vote in relation to a CMC Development matter, BI shall pay to CureVac compensation at the FTE Rates for any CureVac FTEs needed for the additional CMC Development activities demanded by BI (if any) and reimburse CureVac for any reasonable out of pocket costs incurred by CureVac in relation to such additional CMC Development activities. For the avoidance of doubt, the FTE resource commitments in the Development Plans, as set forth in Section 4.1.1 above, can only be reduced by the Parties and are not subject to the decision making process in the JSC.

- 8.6 Expert Panel Resolution.** In the event that the Parties are unable to reach an agreement on any of the issues under Section 8.5 (a) to (e) or on any Manufacturing matter within [\*\*\*\*\*] after the personal face-to-face meeting between the board member representing RD&M or his/her nominated designee of BI and the CEO or CCO of CureVac, either Party is entitled to request that the question be referred to a panel of three (3) independent experts in the Development of biologic products for the treatment of cancer in humans and on the specific issue at dispute ("**Expert Panel**"). Such request shall be made by written notice explicitly referring to this Section 8.6. Each Party shall nominate within [\*\*\*\*\*] of the request one expert, while the third expert shall be mutually agreed by the Parties within another [\*\*\*\*\*]. If a Party does not nominate the one expert within such first [\*\*\*\*\*] such expert shall be nominated by the respective other Party. If the Parties are unable to agree on the third expert, the third expert shall be selected and nominated by the two experts appointed by the Parties. Each Party shall submit to the Expert Panel a written report setting forth its proposed resolution of such dispute within the later of (i) [\*\*\*\*\*] following a referral to the panel, or (ii) [\*\*\*\*\*] after selection of such Expert Panel. The Expert Panel shall meet face-to-face to discuss the written reports and shall be entitled, at its discretion to invite for a hearing representatives of the Parties. The Expert Panel shall then select as its decision one of the proposals from the Parties, and shall not have the authority to render any substantive decision other than the proposal of either BI or CureVac. The decision of the Expert Panel shall be final and binding on the Parties and the Party whose proposal has not been selected by the Expert Panel will pay all costs of the Expert Panel.
- 8.7 Joint Project Team.** In addition to the JSC, the Parties shall jointly, unless otherwise mutually agreed, agree on and establish a project team ("**Joint Project Team**"), which shall be comprised of experts from the development disciplines of the Parties and which shall oversee and bring forward the Development. BI will have the lead of the Joint Project Team. The Joint Project Team shall meet regularly, but at least once per Calendar Quarter. Meetings of the Joint Project Team may be conducted in person, by telephone or videoconference as agreed between the Parties. Each Party shall provide the other Party with written notice of its representatives for the Joint Project Team within [\*\*\*\*\*] after the Effective Date of this Agreement and, thereafter, immediately upon replacement. Each Party may invite guests to the meetings, in order to discuss special technical or commercial topics relevant to the applicable agenda, *provided, however*, such guests are bound by confidentiality obligations corresponding to Sections 4.3 and 10. All decisions of the Joint Project Team shall be by unanimous agreement and any dispute within the Joint Project Team which cannot be resolved within four weeks will be brought to the attention of and for decision within the JSC.
- 9. INTELLECTUAL PROPERTY.**
- 9.1 Ownership of Background Intellectual Property.** BI retains all rights to the BI Background Intellectual Property, and CureVac retains all rights to the CureVac Background Intellectual Property, subject only to the licenses granted hereunder and the assignment and transfer of the CV9202 Specific Patent Rights to BI under Section 9.4 below.

**9.2 Ownership of Collaboration Intellectual Property.**

9.2.1 For any invention comprised within Collaboration Intellectual Property, CureVac and BI will inform each other and determine in good faith whether it is

- (a) either (i) dependent upon or covered by the BI Background Intellectual Property, and (x) neither dependent upon nor covered by the CureVac Background Intellectual Property and (y) not applicable to the CMC Development and/or Manufacture of the Licensed Vaccine or the manufacture of any other RNA-based product owned or in-licensed by CureVac; or (ii) solely directed to the composition of matter, the formulation or use of the Licensed Vaccine, i.e., not applicable to any other vaccine, compound or product, and not applicable to the Manufacture of the Licensed Vaccine or the manufacture of any other RNA-based product owned or in-licensed by CureVac, in which event such invention shall be solely owned by BI and shall be considered BI Collaboration Intellectual Property, irrespective as to which Party generated such Collaboration Intellectual Property. For the avoidance of doubt, any invention comprised within Collaboration Intellectual Property that is solely directed to the CV9202 Specific Patent Rights shall be solely owned by BI and shall be considered BI Collaboration Intellectual Property;
- (b) (i) dependent upon or covered by the CureVac Background Intellectual Property, and neither dependent upon nor covered by the BI Background Intellectual Property nor directed to the composition of matter, the formulation or use of the Licensed Vaccine or the CV9202 Specific Patent Rights; or (ii) directed to the CMC Development (except any invention that is solely directed to the composition of matter, the formulation or use of the Licensed Vaccines) and/or Manufacture of the Licensed Vaccines or the manufacture of any other RNA-based product owned or in-licensed by CureVac, in which event such invention shall be solely owned by CureVac and shall be considered CureVac Collaboration Intellectual Property, irrespective as to which Party generated such Collaboration Intellectual Property;
- (c) either (i) relates to both: (x) the composition of matter, the formulation or use of the Licensed Vaccine; and (y) any other CureVac Background Intellectual Property or any other vaccine, compound or product owned or in-licensed by CureVac; or (ii) relates to both: (xx) the BI Background Intellectual Property; and (yy) any other CureVac Background Intellectual Property or to the CMC Development (except any invention that is solely directed to the composition of matter, the formulation or use of the Licensed Vaccines) or Manufacture of the Licensed Vaccines or to the manufacture of any other RNA-based product owned or in-licensed by CureVac; in which event, the Parties shall discuss in good faith whether any such invention can be divided and owned in accordance with Sections (a) and (b) above, made subject to separate patent filings to be assigned accordingly; and if no such division is possible, such Collaboration Intellectual Property shall be treated as provided under Section 9.2.2.

- 9.2.2 Any Collaboration Intellectual Property which is neither solely owned by BI nor solely owned by CureVac shall be jointly owned by the Parties ("**Joint Collaboration Intellectual Property**"). Any invention within the Joint Collaboration Intellectual Property shall be a "**Joint Invention**" and any Patent Right filed with respect to such Joint Invention shall be a "**Joint Patent Right**". For the avoidance of doubt, CureVac's share in Joint Collaboration Intellectual Property which falls within the scope of BI's licenses under Sections 2.1 and/or 2.2, shall be automatically included within such license(s), on the terms and conditions contained in this Agreement.
- 9.3 Assignment and transfer of Collaboration Intellectual Property.**
- 9.3.1 **Assignment and Transfer.** The initial holder of Collaboration Intellectual Property which is to be wholly or jointly owned by the other Party in accordance with Section 9.2 above shall assign and transfer, and hereby assigns and transfers, to such other Party all or a 50 percent share, as the case may be, of its present and future rights, interest and title to any such Collaboration Intellectual Property, and the other Party shall accept and hereby accepts such assignment and transfer. At the written instruction and, if the transferring Party incurs out-of-pocket costs, at the expense of the other Party, the transferring Party agrees to make or procure all such assignments from its employees, consultants and subcontractors as are necessary to give effect to this provision and to assist the transferee in every way reasonably required by the transferee (i) to obtain Patent Rights to such Collaboration Intellectual Property in any and all countries for which Patent Rights are being sought, and to (ii) maintain and defend Patent Rights in all Collaboration Intellectual Property which have been or may be assigned as provided above. At the expense (solely for out-of-pocket costs incurred) of the other Party, the transferring Party shall execute and deliver all such documents, instruments and other papers and take all such other action which the transferee may reasonably request in order to effect the provisions of this Section 9.3.
- 9.3.2 **Back license to CureVac.** BI hereby grants to CureVac, and CureVac hereby accepts, a cost-free, fully-paid, irrevocable, perpetual, sublicensable in multiple tiers and transferable license to use the Collaboration Intellectual Property assigned and transferred hereunder from CureVac to BI for the Manufacture of the Licensed Vaccine, the exploitation of any product other than a Licensed Vaccine or Licensed Product and/or for any use outside the Field. Such license shall be exclusive with regard to the Collaboration Intellectual Property described in Section 9.2.1(a)(ii) and non-exclusive with regard to the Collaboration Intellectual Property described in Section 9.2.1(a)(i) above.
- 9.3.3 **Back license to BI.** CureVac hereby grants to BI, and BI hereby accepts, a cost-free, fully- paid, non-exclusive, irrevocable, perpetual, sublicensable in multiple tiers and transferable license to use the Collaboration Intellectual Property assigned and transferred hereunder from BI to CureVac for the exploitation outside the scope of this Agreement.
- 9.3.4 **Exploitation of joint inventions and results.** Each Party may exploit any Joint Collaboration Intellectual Property in any and all fields (except, in the case of BI, for the CMC Development or Manufacture of the Licensed Vaccines or the manufacture of any other mRNA-based product), on a non-exclusive, cost-free basis, and with no accounting or obligation to the other, and each Party hereby grants to the other Party, and the other Party hereby accepts, a non-exclusive, cost-free, perpetual, irrevocable and worldwide license (in case of CureVac with the right to transfer and sublicense in multiple tiers and in case of BI with the right to sublicense in accordance with Section 2.2 above) to the other Party's share in such Joint Collaboration Intellectual Property, subject to the licenses granted hereunder.

**9.4 Assignment and Transfer of CV9202 Specific Patent Rights.**

- 9.4.1 Upon [\*\*\*\*\*], CureVac shall assign and transfer to BI the CV9202 Specific Patent Rights. Upon such assignment, the CV9202 Specific Patent Rights shall no longer be included in the definition of CureVac Background Intellectual Property. In order to effect the assignment and transfer, CureVac will support BI, upon BI's request in executing all assignment documentation and providing any declaration which may be necessary to effect the assignment and transfer of the CV9202 Specific Patent Rights from CureVac to BL BI shall be responsible for, and will pay all out-of-pockets expenses with respect to the assignment and transfer of the CV9202 Specific Patent Rights, including the fees for notarization and legalization of the assignment documents, and for recording such assignment documents with the competent patent offices.
- 9.4.2 As of the assignment and transfer of the CV9202 Specific Patent Rights, BI shall use its best efforts to prosecute, maintain and defend the CV9202 Specific Patent Rights in at least all Major Market Countries, shall keep CureVac informed of all such prosecution, maintenance and defense efforts, and shall give CureVac reasonable opportunity to review and comment on such prosecution, maintenance and defense. BI shall not unreasonably refuse to address any of CureVac's comments made in accordance with this Section 9.4.2.
- 9.4.3 BI hereby grants to CureVac, and CureVac hereby accepts, an exclusive, irrevocable, perpetual, cost-free, sublicensable in multiple tiers and transferable license to use the CV9202 Specific Patent Rights for the Manufacture of the Licensed Vaccines, the exploitation of any product other than a Licensed Vaccine or Licensed Product and/or for any use outside the Field.

**9.5 Management of CureVac Licensed Patent Rights.**

- 9.5.1 **Filing and Prosecution of CureVac Licensed Patent Rights.** During the term of this Agreement, and subject to Sections 9.5.2 and 9.5.5 below, CureVac shall be responsible for preparing and filing the CureVac Licensed Patent Rights, and prosecuting, maintaining and defending, throughout the Territory, all of the CureVac Licensed Patent Rights and, upon BI's request, shall keep BI advised of the status of prosecution of all such patent applications included within the CureVac Licensed Patent Rights, and shall give BI before filing or response to office actions, as applicable, reasonable opportunity to review and comment upon the text of any applications or amendments for CureVac Licensed Patent Rights. CureVac shall not unreasonably refuse to address any of BI's comments made in accordance with this Section 9.5.1.

- 9.5.2 **Filing and Prosecution of Joint Patent Rights.** BI shall have the right, but not the obligation, of preparing, filing, prosecuting, maintaining and defending Joint Patent Rights anywhere in the Territory. At the latest [\*\*\*\*] before filing, the prosecuting Party shall give the non-prosecuting Party an opportunity to review and comment upon the text of any application with respect to such Joint Patent Right, shall consult with the non-prosecuting Party with respect thereto, shall not unreasonably refuse to address any of the non-prosecuting Party's comments and supply the non-prosecuting Party with a copy of the application as filed, together with notice of its filing date and serial number. The prosecuting Party shall keep the non-prosecuting Party reasonably informed of the status of the actual and prospective prosecution, maintenance and defense, including but not limited to any substantive communications with the competent patent offices that may affect the scope of such filings, and the prosecuting Party shall give the non-prosecuting Party a timely, prior opportunity to review and comment upon any such substantive communication and shall consult with such non-prosecuting Party with respect thereto, and shall not unreasonably refuse to address any of such non-prosecuting Party's comments.
- 9.5.3 **Assigned Patent Rights.** Upon assignment, BI shall have the right but not the obligation, of preparing, filing, prosecuting, maintaining and defending Patent Rights within the Collaboration Intellectual Property assigned and transferred, wholly or in part, as the case may be, by CureVac to BI in accordance with Section 9.3 (the "**Assigned Patent Rights**"), anywhere in the Territory, and shall keep CureVac advised of the status of prosecution of all such Patent Rights, and shall give CureVac before filing or response to office actions, as applicable, reasonable opportunity to review and comment upon the text of any applications or amendments or other substantive actions for such Patent Rights. BI shall not unreasonably refuse to address any of CureVac's comments made in accordance with this Section 9.5.3.
- 9.5.4 **Costs.** The costs of filing, prosecuting, maintaining and defense of the CureVac Licensed Patent Rights under Section 9.5.1 and 9.5.2 shall be borne by the Party responsible for such filing, prosecution, maintenance and defense, except for and subject to such Party's right to elect to discontinue the patent prosecution and maintenance as set forth in Section 9.5.5 below.
- 9.5.5 **Abandonment of Patent Rights.** If CureVac elects to cease the filing, prosecution, maintenance and/or defense of a CureVac Licensed Patent Right or if BI elects not to participate in filing of a patent application on a Joint Invention or to cease the prosecution, maintenance or defense of any Joint Patent Right, a CV9202 Specific Patent Right or an Assigned Patent Right in any country of the Territory, such Party shall provide the other Party with written notice immediately upon the decision to abandon the filing, prosecution, maintenance and/or defense of such CureVac Licensed Patent Right, Joint Patent Right, CV9202 Specific Patent Right or Assigned Patent Right, as the case may be, in any event, however, not later than [\*\*\*\*] before any relevant deadline relating to or any public disclosure of the relevant Patent Rights. In such event, the abandoning Party shall permit the other Party, at such other Party's sole discretion, to take over or continue, as the case may be, the filing, prosecution, maintenance and defense of such Patent Right on behalf of and in the name of the owner of such Patent Right and at such other Party's own expense. If the abandoning Party was also the prosecuting Party and if the other Party elects to take over and continue such filing, prosecution, maintenance and defense, the abandoning Party shall execute such documents and perform such acts, at the expense of the Party taking over prosecution, as may be reasonably necessary to permit such Party to take over and continue the filing, prosecution, maintenance and/or defense of such Patent Right on behalf and in the name of the respective owner or co-owners of such Patent Right and at its own expense. For the avoidance of doubt, the abandoning Party shall remain an owner or co-owner of the abandoned Patent Right but has no further say in the filing, prosecution, maintenance and defense of the Patent Right, provided, however, that the prosecuting Party shall timely inform such abandoning Party if it is decided to finally abandon the respective Patent Right, in which event the other Party shall have the right to assume sole responsibility for ongoing prosecution, maintenance and defense of such Patent Right in accordance with this Section 9.5.

**9.6 Enforcement of CureVac Licensed Patent Rights, Joint Patent Rights, CV9202 Specific Patent Rights and Assigned Patent Rights.**

- 9.6.1 If either BI or CureVac becomes aware of any infringement, anywhere in the world, of any issued CureVac Licensed Patent Right, Joint Patent Right, CV9202 Specific Patent Right or Assigned Patent Right, it will promptly notify the other Party in writing thereof.
- 9.6.2 CureVac shall have the primary right, but not the obligation, to take action to obtain a discontinuance of infringement or bring suit against a Third Party infringer of a CureVac Licensed Patent Right it is responsible for under Section 9.5.1. Upon assignment to BI under Section 9.4 of this Agreement, BI shall have the primary right to take action to obtain a discontinuance of infringement or bring suit against a Third Party infringer of CV9202 Specific Patent Rights or Assigned Patent Rights. The Party prosecuting and maintaining the Joint Patent Right shall have the primary right, but not the obligation, to take action to obtain a discontinuance of infringement or bring suit against a Third Party infringer of such Patent Right. The enforcing Party shall bear all expenses of such action or suit.
- 9.6.3 If the Party which has the primary right to bring an infringement action elects not to take action or to bring suit to prosecute such infringement, it shall notify the other Party of such election within [\*\*\*\*] after receipt of the notice of the infringement or after the election to stop any such suit. If after the expiration of the [\*\*\*\*] period (or, if earlier, the date upon which the Party which has the primary right to bring an infringement action provides written notice that it does not plan to bring such action), the Party which has the primary right to bring action has neither obtained a discontinuance of infringement of the CureVac Licensed Patent Right, the Joint Patent Right, the CV9202 Specific Patent Right or the Assigned Patent Right, as the case may be, nor filed suit against any such Third Party infringer of such Patent Rights, then the other Party shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patent Rights, provided that such other Party shall bear all the expenses of such suit.

- 9.6.4 In any litigation brought by either Party pursuant to this Section 9.6, the enforcing Party shall notify the non-enforcing Party of the commencement of that litigation and shall have the right and standing to use and sue in the other Party's name. Notwithstanding the first sentence of this paragraph, irrespective of which Party brings the infringement action hereunder, (i) the Parties shall collaborate with respect to such action; (ii) the non-enforcing Party shall have the right, at its own expense, to be represented by independent counsel in any such litigation; and (iii) the Parties shall consult with each other regarding, and agree on strategic decisions and their implementation in connection with such action. The Party bringing the infringement action hereunder shall bear all the expenses of any suit brought by it claiming infringement of any CureVac Licensed Patent Right, Joint Patent Right, CV9202 Specific Patent Right or Assigned Patent Right.
- 9.6.5 Any recoveries obtained by either Party as a result of any proceeding against a Third Party infringer under this Section 9.6 shall be allocated as follows:
- (a) Such recovery shall first be used to reimburse each Party for all reasonable litigation costs in connection with such litigation incurred by that Party;
  - (b) such recovery shall then be used to compensate each Party for the respective damages suffered from the infringement of the respective Patent Right, provided that in the event the remaining portion of the recovery is not sufficient to compensate each Party's damages, such compensation shall be paid on a pro-rata share based on the respective damages suffered, *provided, however*, if such respective damages suffered cannot be reasonably ascertained, the recovery shall be equally shared between the Parties; **and**
  - (c) the remaining portion of such recovery, if any, shall be equally shared between CureVac and BI to the extent it relates to Licensed Vaccines and Licensed Products, and shall belong to the Party Controlling the respective Patent Right to the extent it does not relate to Licensed Vaccines and Licensed Products.
- 9.6.6 Neither Party shall settle any claim or demand in any such litigation that materially negatively impacts the other Party's rights or interests under this Agreement without the prior written consent of the other Party, which consent shall not be unreasonably withheld or delayed. In addition to the foregoing, to the extent any action initiated by BI involves any infringement of CureVac Licensed Patent Rights, Joint Patent Rights, the CV9202 Specific Patent Rights or the Assigned Patent Right and is reasonably likely to relate to CureVac's products and/or technologies other than a Licensed Vaccine, BI will consult with CureVac regarding issues relating to such CureVac Licensed Patent Rights, Joint Patent Rights, the CV9202 Specific Patent Rights or the Assigned Patent Rights, CureVac's products and technologies, and the Parties will mutually agree on strategic litigation decisions regarding such issues.
- 9.6.7 The non-enforcing Party shall provide such assistance as the enforcing Party shall reasonably request in connection with any action or suit hereunder to prevent or enjoin any such infringement or unauthorized use of an issued Patent Right within the CureVac Licensed Patent Rights, Joint Patent Rights, the CV9202 Specific Patent Rights or the Assigned Patent Rights, including agreeing to be joined as a party to such action or suit and executing legal documents as reasonably requested by the enforcing Party. Such assistance will be provided by a Party, at the enforcing Party's cost. The Parties agree that, irrespective of which Party brings the action or suit pursuant to this Section 9.6, the Parties will update each other as to the status of such actions through the JSC and the enforcing Party will not unreasonably reject comments from the other Party relating to the management of such litigation.

**9.7 Infringement and Third Party Licenses.**

- 9.7.1 If the Development and Commercialization or use of any Licensed Vaccine or Licensed Product in accordance with this Agreement is alleged by a Third Party to infringe a Third Party's Patent Right, or such allegation can be reasonably expected, the Party becoming aware of such allegation shall promptly notify the other Party. Additionally, if either Party determines that, based upon the review of a Third Party's Patent Right, it may be desirable to obtain a license from such Third Party with respect thereto, such Party shall promptly notify the other Party of such determination and the Parties shall consult with each other and attempt to agree on a common strategy to either obtain a reasonable license or otherwise. If BI reasonably determines that such license from a Third Party ("**Third Party Licensor**") is necessary in order to have freedom to operate in practicing the CureVac Licensed Intellectual Property in accordance with this Agreement in any country, then BI shall have the sole right, but not the obligation, to negotiate and obtain a license from such Third Party Licensor as necessary for BI, its Affiliates, and permitted Sublicensees to Non-clinically and Clinically Develop and Commercialize the Licensed Vaccines and Licensed Products in such country.
- 9.7.2 If a Third Party sues BI or CureVac or any of their Affiliates, distributors or permitted Sublicensees alleging that BI's practice of a right granted by CureVac to BI hereunder through the Development and Commercialization of any Licensed Vaccine or Licensed Product pursuant to this Agreement infringes or will infringe said Third Party's Intellectual Property, then, upon the defending Party's request and in connection with the defense of any such Third Party infringement suit, the non-defending Party shall provide reasonable assistance to the defending Party for such defense and/or shall join in any such action if required in order to defend such claim or to assert all available defenses and claims, and to cooperate reasonably with the defending Party.
- 9.7.3 The defending Party shall not enter into a settlement that imposes a financial obligation upon the non-defending Party or which limits the scope or invalidates any Patent Right of either Party without such Party's prior written consent, which consent shall not be unreasonably withheld or delayed, and in any settlement the defending Party shall always take into consideration the interest of the non-defending Party.

- 9.8 Patent Term Extension and Supplementary Protection Certificate.** The JSC shall decide on any patent term extensions, including supplementary protection certificates and any other extensions that are now or become available in the future, wherever applicable, in order to secure the optimal protection for the Licensed Vaccine available under Applicable Laws. The JSC shall not decide to extend a Patent Right that is not a CureVac Licensed Patent Right, Joint Patent Right, CV9202 Specific Patent Right or an Assigned Patent Right in any country or other jurisdiction, without CureVac's prior written consent which CureVac shall not unreasonably delay or withhold. The Party having the responsibility to prosecute the respective Patent Right shall have the sole obligation of applying for any extension or supplementary protection certificate with respect to a Licensed Vaccine and such Patent Right in the Territory, and such Party shall keep the other Party fully informed of its efforts to obtain such extension or supplementary protection certificate. The other Party shall provide prompt and reasonable assistance, as requested by the applying Party, including by taking such action as patent holder as is required under any Applicable Law to obtain such patent extension or supplementary protection certificate. BI shall pay all expenses in regard to obtaining and maintaining any extension or supplementary protection certificate in respect of the Licensed Vaccine in the Territory.
- 9.9 CREATE Act.** This Agreement includes a joint research agreement as defined in §§ 100(h) and 102(c) of title 35, United States Code as amended by the America Invents Act. If either Party intends to disqualify as prior art subject matter in a Patent Right within the Collaboration Intellectual Property that would otherwise qualify as prior art under 35 U.S.C. §102 (a)(2) with respect to a claimed invention in any such Patent Right pursuant to the provisions of 35 U.S.C. §102(c), such Party shall first obtain the prior written consent of the other Party (including the terms and conditions under which any Patent Rights subject to a terminal disclaimer and the Patent Rights over which the application is disclaimed shall be enforced and licensed), which consent shall not be unreasonably withheld. Following receipt of such written consent, such Party shall limit any statement added to the specification of any Patent Right within the Collaboration Intellectual Property to such information which is strictly required by 35 U.S.C. § 102(c)(3) and the rules and regulations promulgated thereunder to disqualify as prior art subject matter that would otherwise qualify under 35 U.S.C. §102 (a)(2) as contemplated by the CREATE Act, and which is consistent with the terms and conditions of this Agreement.
- 10. CONFIDENTIALITY.**
- 10.1 Obligation of Confidentiality.** As of and after the Effective Date, all Confidential Information disclosed, revealed or otherwise made available to one Party ("**Receiving Party**") by or on behalf of the other Party ("**Disclosing Party**") under, or as a result of, this Agreement is made available to the Receiving Party solely to permit the Receiving Party to exercise its rights, and perform its obligations, under this Agreement or any Related Agreement. The Receiving Party shall not use any of the Disclosing Party's Confidential Information for any other purpose, and shall not disclose, reveal or otherwise make any of the Disclosing Party's Confidential Information available to any other Person, firm, corporation or other entity, without the prior written authorization of the Disclosing Party, except as explicitly stated in this Article 10.

- 10.2 Additional Obligations.** In furtherance of the Receiving Party's obligations under Section 10.1 hereof, the Receiving Party shall take all reasonable steps, and shall implement all appropriate and reasonable safeguards, to seek to prevent the unauthorized use or disclosure of any of the Disclosing Party's Confidential Information. Without limiting the generality of this Section 10.2, the Receiving Party shall disclose any of the Disclosing Party's Confidential Information only to those of its officers, employees, Affiliates, Sublicensees and consultants, and its potential Sublicensees, and consultants that have a need to know the Disclosing Party's Confidential Information, in order for the Receiving Party to exercise or confirm its rights or the scope of the licenses granted hereunder, and/or to perform its obligations under this Agreement. Furthermore, the Receiving Party shall be permitted to disclose the existence and a reasonably redacted version of this Agreement (excluding its exhibits) to its assignees and investors, and to potential assignees and investors who have a reasonable need to review the terms of this Agreement. The disclosures under this Section 10.2 are subject to such officers, employees, Affiliates, Sublicensees, consultants, assignees and investors, and potential Sublicensees, consultants, assignees and investors having executed appropriate agreements containing substantially similar terms regarding confidentiality and non-use as those set out in this Agreement or are otherwise bound by obligations of confidentiality effectively prohibiting the unauthorized use or disclosure of the Disclosing Party's Confidential Information. The Receiving Party shall furnish the Disclosing Party with written notice immediately of it becoming aware of any unauthorized use or disclosure of any of the Disclosing Party's Confidential Information by any officer, employee, Affiliate, Sublicensee, consultant, assignee or investor, or potential Sublicensee, consultant, assignee or investor of the Receiving Party, and shall take all actions that the Disclosing Party reasonably requests in order to prevent any further unauthorized use or disclosure of the Disclosing Party's Confidential Information. Furthermore, CureVac is entitled to disclose the terms and conditions of this Agreement to licensees and potential licensees, subject to redaction to show only the provisions which are relevant for the scope of the licenses granted hereunder [\*\*\*\*\*] and further subject to such licensee or potential licensee having executed an appropriate confidentiality agreement.
- 10.3 Limitations.** The Receiving Party's obligations under Sections 10.1 and 10.2 hereof shall not apply to the extent that the Receiving Party can demonstrate by competent evidence that any of the Disclosing Party's Confidential Information:
- (a) passes into the public domain, or becomes generally available to the public through no fault of the Receiving Party;
  - (b) was known to the Receiving Party or its Affiliates prior to being made available hereunder without restriction of use or disclosure;
  - (c) is disclosed, revealed or otherwise made available to the Receiving Party or its Affiliates by a Third Party, without restriction of use or disclosure, that is under no obligation of non-disclosure and/or non-use to the Disclosing Party in relation to the subject item;
  - (d) has been independently developed or created by the Receiving Party or its Affiliates without access to the Disclosing Party's Confidential Information;

- (e) is necessary or useful to be disclosed by the Receiving Party for making applications or submissions to or otherwise dealing with Regulatory Authorities in connection with the Development, Manufacture or Commercialization of a Licensed Vaccine or Licensed Product or for obtaining Patent Rights protecting Collaboration Intellectual Property, provided, however, that the Receiving Party shall furnish the Disclosing Party with as much prior written notice of such disclosure requirement as reasonably practicable; or
- (f) is required to be disclosed under Applicable Laws and to the extent required to be disclosed under Applicable Laws; provided, however, that the Receiving Party shall furnish the Disclosing Party with as much prior written notice of such disclosure requirement as reasonably practicable, so as to permit the Disclosing Party, in its sole discretion, to take appropriate action, including seeking a protective order, in order to prevent the Disclosing Party's Confidential Information from passing into the public domain or becoming generally available to the public.

**10.4 Materials.** The Parties hereby agree that any Material to be transferred from CureVac to BI under this Agreement, other than Licensed Vaccines transferred under the Clinical Supply Agreement or any Related Agreement to be concluded in accordance with Section 6.2 above, shall remain the exclusive property of CureVac, and BI shall use such Material only for purposes of this Agreement. In particular, for any Materials transferred to BI under Article 6 (i.e., to enable BI, its Affiliates or a Permitted Third Party CMO to Manufacture Licensed Vaccines) BI further agrees not use such Materials other than to Manufacture Licensed Vaccines in accordance with the terms of this Agreement. BI shall not transfer such Material to or use such Material on behalf of a Third Party other than a Permitted Third Party CMO. Furthermore, BI undertakes to keep such Materials secure and safe from loss, damage, theft, misuse and unauthorized access and to use such Materials in accordance with all Applicable Laws. Upon termination of this Agreement, BI shall cease use of and return to CureVac or destroy (as CureVac shall specify in writing promptly upon termination of this Agreement) all such Materials in its possession upon such termination, and shall certify such return or destruction in writing to CureVac.

**10.5 Return of Confidential Information.** Subject to Sections 13.1 and 14.4 and subject to any other right to retain Confidential Information, upon expiration or termination of this Agreement for any reason whatsoever, the Receiving Party shall cease all use of and return to the Disclosing Party, or destroy, as the Disclosing Party shall specify in writing promptly upon such expiration or termination, all copies of all documents and other materials that contain or embody any of the Disclosing Party's Confidential Information, except to the extent that the Receiving Party is required by Applicable Laws to retain such documents and materials, and provided further that each Party may keep a single copy of all Confidential Information within its legal archives solely to assure compliance with the provisions of this Article 10. The obligation to destroy shall also apply to copies of any computer records and files containing such Confidential Information, except to the extent created by the Receiving Party's automatic archiving and backup computer systems. Within [\*\*\*\*\*] after the date of expiration or termination of this Agreement, the Receiving Party shall confirm that the Receiving Party has complied with its obligations under this Section 10.5.

- 10.6 Survival.** All of the Receiving Party's obligations under Sections 10.1 and 10.2 hereof, with respect to the protection of the Disclosing Party's Confidential Information, shall for a period of [\*\*\*\*\*] survive the expiration or termination of this Agreement for any reason whatsoever.
- 10.7 Public Announcements.** No public announcement concerning the existence of, terms, or subject matter of this Agreement shall be made, either directly or indirectly, by any Party, without first obtaining the prior written approval of the other Party and agreement upon the nature and text of such public announcement which such agreement and approval shall not be unreasonably withheld or delayed; except as may be legally required (i) by Applicable Laws, (ii) by the listing standards or agreements of any national or international securities exchange or other similar laws of a governmental authority, market or agency, (iii) to respond to an inquiry of a governmental authority or agency, or (iv) in a judicial, administrative or arbitration proceeding. In all instances, the Party concerned shall seek appropriate confidential treatment of this Agreement and the subject matter hereof and the Parties shall agree in advance on any redacted forms of this Agreement that are filed publicly, such agreement not to be unreasonably withheld or delayed. The Party desiring to make any such public announcement (including those which are legally required) shall inform the other Party of the proposed announcement or disclosure in reasonably sufficient time prior to public release, which shall be not less than [\*\*\*\*\*] (or such shorter period as the Parties may agree upon in writing, or such shorter period applicable to those public announcements which are legally required) prior to release of such proposed public announcement, and shall provide the other Party with a written copy thereof in order to allow such other Party to comment upon such public announcement. Each Party agrees that it shall co-operate fully with the other Party with respect to all disclosures regarding this Agreement to any governmental or regulatory agencies, including requests for confidential treatment of proprietary information of either Party included in any such disclosure. Neither Party will issue a press release without the prior written consent of the other Party. The Parties agree that each Party may, following the Effective Date, issue a press release describing this Agreement in general terms, provided that the content of such press release shall first be approved by the other Party. For such purpose, the Party intending to issue the press release shall provide the other Party with a draft press release at least [\*\*\*\*\*] prior to the proposed date of disclosure.
- 10.8 Applicable Laws.** Nothing in this Agreement shall be construed as preventing or in any way inhibiting either Party from complying with Applicable Laws governing activities and obligations undertaken pursuant to this Agreement in any manner which it reasonably deems appropriate, including, for example, by disclosing to Regulatory Authorities confidential or other information received from the other Party, subject to Sections 10.3 (e) and (f) and 10.7.

**10.9 Publication.** Prior to the First Commercial Sale of a Licensed Product, publications in a journal, paper, magazine or any other such similar disclosure relating to or arising from this Agreement and/or the Development or Commercialization of Licensed Vaccines and/or Licensed Products shall not take place without the prior written agreement of both BI and CureVac, such agreement not to be unreasonably withheld, provided, however, that with respect to the Licensed Vaccines and Licensed Products CureVac shall only be permitted to use the Development Data on the Licensed Vaccines and Licensed Products as reference to market its mRNA based technologies and shall not make any other publication regarding the Licensed Vaccines and Licensed Products unless expressly permitted by BI. Any draft publication intended to be submitted for publication or disclosure by one of the Parties hereto shall first be sent to the other Party in order to allow such Party to make comments thereon, and to preserve its Intellectual Property by delaying such publication and/or removing its Confidential Information. Each Party shall comply with the other Party's request to delete references to the other Party's Confidential Information in any such publication, and agrees to withhold publication of same for the time necessary to permit the other Party to obtain optimum patent protection, such time period not to exceed [\*\*\*\*\*]. BI's obligation to provide CureVac with any draft publication intended to be submitted for publication or disclosure by BI in respect of a Licensed Product ceases upon the First Commercial Sale of such Licensed Product. Each Party's contribution shall be acknowledged in any publication by co-authorship or acknowledgment, whichever is appropriate in accordance with customary scientific practice. Once approval has been granted for a particular disclosure, such disclosed information may be subsequently disclosed without requiring additional approval for each instance of disclosure.

**11. WARRANTIES AND LIABILITIES.**

**11.1 Representations and Warranties of each Party.** Each of CureVac and BI hereby represents and warrants to the other Party hereto as follows on the Effective Date:

- (a) it is a corporation or entity duly organized and validly existing under the laws of the state or other jurisdiction of its incorporation or formation;
- (b) the execution, delivery and performance of this Agreement by such Party does not conflict with any other agreement by which it is bound, and has been duly authorized by all requisite corporate action and does not require any shareholder action or approval;
- (c) it has the power and authority to execute and deliver this Agreement and to perform its obligations hereunder; and
- (d) it shall at all times comply with all Applicable Laws relating to its activities under this Agreement.

**11.2 Additional Representations and Warranties of CureVac.** Subject to the disclosures in the attached Exhibit 11.2, CureVac hereby represents and warrants that, on the Effective Date:

- (a) it Controls the right, title and interest in the Patent Rights comprised in the CureVac Background Intellectual Property as listed in Exhibit 1.17, and to the extent licensed under this Agreement;

- (b) it is the sole and exclusive owner (free and clear of any liens, mortgages, security interests, charges, encumbrances or otherwise) of the CV9202 Specific Patent Rights listed on Exhibit 1.23;
- (c) all employee inventions covered by the Patent Rights listed in part (A)(1) of Exhibit 1.17 and on Exhibit 1.23 have been duly claimed by CureVac in accordance with the German Arbeitnehmererfindungsgesetz or CureVac has entered into binding agreements transferring the rights in and to such inventions to CureVac;
- (d) it has the right to enter into this Agreement and to grant the licenses contained herein, and neither CureVac nor any of its Affiliates is a party to or otherwise bound by any agreement that will result in any person or entity obtaining any interest in, or that would give to any entity or person any right to assert any claim in or with respect to, any of Bl's exclusive rights granted under this Agreement;
- (e) to its knowledge, no Third Party has any right, title or interest in or to any of the CureVac Licensed Patent Rights within the scope of the exclusive licenses granted hereunder;
- (f) all of the Patent Rights listed on part (A)(1) of Exhibit 1.17 and on Exhibit 1.23 are pending or issued and have not been abandoned as of the Effective Date;
- (g) to CureVac's knowledge, no claim, suit, litigation, arbitration, opposition or other proceeding before a court of law, arbitral body, Regulatory Authority or patent office is pending or has been rendered or is threatened by any Third Party which would limit, cancel or question the validity, enforceability, ownership or use of any of the Patent Rights listed on part (A)(1) of Exhibit 1.17 and on Exhibit 1.23;
- (h) Exhibits 1.17 and 1.23 list all of CureVac's and CureVac's Affiliates' Patent Rights that to the knowledge of CureVac would be infringed by the Non-Clinical and Clinical Development or Commercialization of Licensed Vaccines or Licensed Products;
- (i) to CureVac's knowledge, no Patent Rights or other Intellectual Property owned or controlled by a Third Party exist that could materially conflict with the grant of rights by CureVac to Bl under this Agreement; and
- (j) it has furnished or made available to Bl all material information that is in its possession concerning CV9202 and relevant to the safety or efficacy of CV9202, and, to CureVac's knowledge, such information is accurate, complete and true in all material respects.

**11.3 Disclaimer.** CureVac makes no representation or warranty and specifically disclaims any guarantee that the Development of the Licensed Vaccines will be successful, in whole or in part, or that the CureVac Licensed Intellectual Property will be suitable for Development and/or Commercialization of Licensed Products. Subject only to Sections 11.1 and 11.2 above, CureVac expressly disclaims any warranties or conditions, express, implied, statutory or otherwise with respect to the CureVac Licensed Intellectual Property and Licensed Vaccines and Licensed Products, including any warranty of merchantability or fitness for a particular purpose. In particular, subject only to Sections 11.1 and 11.2, CureVac expressly disclaims any warranties or conditions, express, implied, statutory or otherwise with respect to the non-infringement of the CureVac Licensed Intellectual Property and the Licensed Vaccines and Licensed Products.

**11.4 Limitation of Liability.** Subject to Section 12 of this Agreement and except in the case of gross negligence (*grobe Fahrlässigkeit*), an intentional act (*Vorsatz*) or bodily injury, neither Party shall be liable to the other Party for any indirect, incidental, punitive or consequential damages including lost profits, whether based on contract or tort, or arising under Applicable Laws or otherwise.

**12. INDEMNIFICATION.**

**12.1 CureVac's Obligations to Indemnify.** CureVac shall indemnify, defend and hold BI and its Affiliates, and its and their employees, agents, officers, and directors (individually and/or collectively referred to herein as a "**BI Party**") harmless from and against any and all losses, liabilities, damages, expenses (but excluding indirect, incidental, special, consequential or punitive losses or damages, etc.) or fees (but only reasonable attorneys fees and expenses and costs of litigation pertaining to such BI Claim) paid or payable by BI or a BI Party to a Third Party (collectively, "**BI Losses**") to the extent that such BI Losses result from or arise in connection with a claim, suit or other proceeding made or brought by a Third Party against BI or a BI Party (a "**BI Claim**") based on, resulting from, or arising in connection with:

- (a) any claim by [\*\*\*\*] regarding an allegation that the manufacture, use, sale or offer for sale of Licensed Vaccine and/or Licensed Product pursuant to and consistent with this Agreement infringes such claimant's intellectual property rights, provided, however, CureVac grants rights (in particular sub-licenses) to such intellectual property rights to BI under this Agreement;
- (b) any material breach of any of CureVac's representations or warranties set forth in this Agreement; **or**
- (c) any other grossly negligent, willful or intentionally wrongful act, error or omission on the part of CureVac, or any officer, director, employee, agent or representative of CureVac;

*provided, however,* that CureVac shall not be obligated to indemnify, defend or hold harmless BI or a BI Party from any BI Claim or for any BI Loss incurred by BI or a BI Party to the extent arising out of, or attributable to, (A) a material breach by BI, or any BI Party of any obligation, covenant, agreement, representation or warranty of BI, or a BI Party contained in this Agreement or under a Related Agreement; (B) any material violation of Applicable Laws by BI, or a BI Party, in connection with the performance of BI's or its Affiliates' obligations under this Agreement or under a Related Agreement; (C) any act or omission by BI, or a BI Party, which constitutes gross negligence, or willful or intentional misconduct on the part of BI, or a BI Party; or (D) BI Claims to the extent BI is responsible for indemnifying, defending and holding CureVac and CureVac Parties harmless for such claims as set forth in Section 12.2 or in the Clinical Supply Agreement or any Related Agreement to be concluded in accordance with Section 6.2 above.

**12.2 BI's Obligations to Indemnify.** BI shall indemnify, defend and hold CureVac and its Affiliates, and its and their officers, directors, trustees, agents and employees (individually and/or collectively referred to herein as a "**CureVac Party**") harmless from and against any and all losses, liabilities, damages, expenses (but excluding indirect, incidental, special, consequential or punitive losses or damages, etc.) or fees (but only reasonable attorney fees and expenses and costs of litigation pertaining to such CureVac Claim) paid or payable by CureVac or a CureVac Party to a Third Party (collectively, "**CureVac Losses**") to the extent that such CureVac Losses result from or arise in connection with a claim, suit or other proceeding made or brought by a Third Party against CureVac or a CureVac Party (a "**CureVac Claim**") based on, resulting from, or arising in connection with:

- (a) any material breach of any of BI's representations or warranties set forth in this Agreement;
- (b) any other grossly negligent, willful or intentionally wrongful act, error or omission on the part of BI, or any officer, director, employee, agent or representative of BI;
- (c) any claim that any of the Licensed Vaccines and Licensed Products fail to conform with the requirements of any Applicable Laws, including the failure by BI to obtain any required Regulatory Approvals for the Licensed Vaccines and Licensed Products;
- (d) any product liability claim regarding the Licensed Vaccine or Licensed Product;

*provided, however,* that BI shall not be obligated to indemnify, defend or hold harmless CureVac or a CureVac Party from any CureVac Claim or for any CureVac Loss incurred by CureVac or an CureVac Party to the extent arising out of or attributable to: (A) a material breach by CureVac, or any CureVac Party of any obligation, covenant, agreement, representation or warranty of CureVac, or any CureVac Party contained in this Agreement or in any Related Agreement; or (B) any material violation of Applicable Laws by CureVac or a CureVac Party, in connection with the performance of CureVac's or its Affiliates' obligations under this Agreement or under any Related Agreement; or (C) any act or omission by CureVac, or a CureVac Party, which constitutes gross negligence, or wilful or intentional misconduct on the part of CureVac, or a CureVac Party; or (D) CureVac Claims to the extent CureVac is responsible for indemnifying, defending and holding BI and/or any BI Party harmless for such claims as set forth in Section 12.1 or in the Clinical Supply Agreement or any Related Agreement to be concluded in accordance with Section 6.2 above.

**12.3 Indemnification Procedures.**

- 12.3.1 Each indemnified Party shall notify in English the indemnifying Party in writing (and in reasonable detail) of the Claim within [\*\*\*\*] after receipt by such indemnified Party of notice of the BI Claim or the CureVac Claim, as the case may be, or otherwise becoming aware of the existence or threatened existence thereof (such BI Claim or CureVac Claim being referred to as a "Claim"). Failure to give such notice shall not constitute a defense, in whole or in part, to any claim by an indemnified Party hereunder except to the extent the rights of the indemnifying Party are materially prejudiced by such failure to give notice. The indemnifying Party shall notify in English the indemnified Party of its intentions as to defense of the Claim or potential Claim in writing within [\*\*\*\*\*] after receipt of notice of the Claim. If the indemnifying Party assumes the defense of a Claim against an indemnified Party, the indemnifying Party shall have no obligation or liability under this Article 12 as to any Claim for which settlement or compromise of such Claim or an offer of settlement or compromise of such Claim is made by the indemnified Party without the prior written consent of the indemnifying Party.
- 12.3.2 The indemnifying Party shall assume exclusive control of the defense and settlement (including all decisions relating to litigation, defense and appeal) of any such Claim (so long as it has confirmed its indemnification obligation responsibility to such indemnified Party under this Section 12.3 with respect to a given Claim); provided, however, that the indemnifying Party may not settle such Claim in any manner that would require payment by the indemnified Party, or would materially adversely affect the rights granted to the indemnified Party hereunder, or would materially conflict with the terms of this Agreement, or adversely affect such Party or its products, without first obtaining the indemnified Party's prior written consent, which consent shall not be unreasonably withheld.
- 12.3.3 The indemnified Party shall reasonably cooperate with the indemnifying Party in its defense of the Claim (including, without limitation, copying and making documents and records available for review and making persons within its control available for pertinent testimony in accordance with the confidentiality provisions of Article 10, and neither Party shall be required to divulge privileged material to the other) at the indemnifying Party's expense. If the indemnifying Party assumes defense of the Claim, the indemnified Party may participate in, but not control, the defense of such Claim using attorneys of its choice and at its sole cost and expense, with such cost and expense not being covered by the indemnifying Party. If the indemnifying Party does not agree to assume the defense of the Claim asserted against the indemnified Party (or does not give notice that it is assuming such defense), or if the indemnifying Party assumes the defense of the Claim in accordance with this Section 12.3 yet fails to defend or take other reasonable, timely action, in response to such Claim asserted against the indemnified Party, the indemnified Party shall have the right to defend or take other reasonable action to defend its interests in such proceedings, and shall have the right to litigate, settle or otherwise dispose of any such Claim; provided, however, that no Party shall have the right to settle a Claim in a manner that would adversely affect the rights granted to the other Party hereunder, or would materially conflict with this Agreement, or would require a payment by the Party, or adversely affect the Party (its Affiliates) or its products in or outside the Territory, without the prior written consent of the Party entitled to control the defense of such Claim, which consent shall not be unreasonably withheld.

**13. TERM AND TERMINATION.**

- 13.1 Expiry.** This Agreement shall automatically become effective as of the Effective Date. It shall remain in full force and effect on a country-by-country and Licensed Product-by-Licensed Product basis, for the duration of the Royalty Term, unless terminated earlier by either Party for whatever reason. Upon expiry of this Agreement for a Licensed Product in any country, BI shall retain its license granted under Sections 2.1 (including the right to sublicense in accordance with Section 2.2) and 6.3 as an irrevocable, perpetual, fully paid-up and royalty free right to use the CureVac Licensed Intellectual Property and/or the CureVac Licensed Manufacturing Intellectual Property, as applicable, solely for such Licensed Products in such country and in the Field, such license to be exclusive for the longer of (i) the term during which CureVac supplies at least [\*\*\*\*\*] of BI's demand for Licensed Vaccines to BI; and (ii) [\*\*\*\*\*] upon expiry of this Agreement; and to be non-exclusive thereafter.
- 13.2 Termination for Convenience.** BI shall be entitled to terminate this Agreement at its sole discretion at any time by giving [\*\*\*\*\*] prior written notice.
- 13.3 Termination for Material Breach.** In the event that either Party ("**Breaching Party**") commits a material breach of any of its obligations hereunder, such material breach to include a breach of the obligations under Section 4.2, the other Party hereto ("**Non-Breaching Party**") may give the Breaching Party written notice of such material breach, which notice shall clearly identify the material breach, the intent to terminate this Agreement for such material breach and the actions or conduct that it considers to be an acceptable cure of such material breach. In the event that the Breaching Party fails to cure such material breach within [\*\*\*\*\*] in the event of a default in payment, and within [\*\*\*\*\*] in the event of any other breach, after the date of the Non-Breaching Party's notice thereof, the Non-Breaching Party may terminate this Agreement by giving written notice of termination to the Breaching Party. In case the Party receiving a notice of a material breach ("**Alleged Breaching Party**") disputes to have materially breached this Agreement, such party shall provide written notice hereof to the other Party within [\*\*\*\*\*] following its receipt of notice of termination. In such event termination of this Agreement shall not occur if the Alleged Breaching Party within [\*\*\*\*\*] after such written notice refers the dispute for resolution through a dispute resolution panel of three (3) independent legal arbitrators with expertise in pharmaceutical licensing ("**Dispute Resolution Panel**"). Each Party shall nominate within [\*\*\*\*\*] of the request one arbitrator, while the third arbitrator shall be mutually agreed by the Parties within another [\*\*\*\*\*]. If the Parties are unable to agree on the third arbitrator, the third arbitrator shall be selected and nominated by the two arbitrators appointed by the Parties. Each Party shall submit to the Dispute Resolution Panel a written report setting forth its arguments to support or to rebut a material breach which justifies a termination for cause under this Section 13.3 within the later of (i) [\*\*\*\*\*] following a referral to the Dispute Resolution Panel, or (ii) [\*\*\*\*\*] after selection of such Dispute Resolution Panel. The Dispute Resolution Panel shall meet face-to-face to discuss the written reports and shall be entitled, at its discretion to invite for a hearing representatives of the Parties or other Third Party experts, subject to each Third Party expert executing an appropriate confidentiality agreement. The Dispute Resolution Panel shall then select one of the proposals from the Parties, and shall not have the authority to render any substantive decision other than the proposal of either BI or CureVac. The decision of the Dispute Resolution Panel shall be final and binding on the Parties and the Party whose proposal has not been selected by the Dispute Resolution Panel will pay all costs of the Dispute Resolution Panel. If, as a result of such dispute resolution process, it is determined that the Alleged Breaching Party materially breached this Agreement and such Party does not cure such breach within [\*\*\*\*\*] after the date of the decision by the Dispute Resolution Panel (or within [\*\*\*\*\*] in the event of a default in payment) (the "Additional Cure Period"), then such termination shall be effective as of the expiration of the Additional Cure Period. Such dispute resolution proceeding does not suspend any obligations of either Party hereunder, and each Party shall use reasonable efforts to mitigate any damage. If as a result of such dispute resolution proceeding it is determined that the Alleged Breaching Party did not materially breach this Agreement (or such breach was cured during the Additional Cure Period), then no termination shall be effective, and this Agreement shall continue in full force and effect. Notwithstanding the foregoing, in the case of an allegation that BI has failed to devote Commercially Reasonable Efforts in relation to a Licensed Vaccine or a Licensed Product, CureVac shall not have the right to terminate this Agreement (a) if no Change of Control had occurred at the time of termination: following the first acceptance of a marketing authorization application/NDA filing in a Major Market Country; and (b) if a Change of Control had occurred at the time of termination: following initiation of or continuation into the first Phase III Clinical Trial of a Licensed Vaccine, provided that BI pays CureVac the amount of such damages that have been awarded by a dispute resolution proceeding pursuant to Section 15.6. Termination of this Agreement in accordance with this Section 13.3 shall not affect or impair the Non-Breaching Party's right to pursue any legal remedy, including the right to recover direct damages, for any harm suffered or incurred by the Non-Breaching Party as a result of such breach.

- 13.4 Termination for Challenge of CureVac Licensed Patent Rights.** CureVac may terminate this Agreement by providing [\*\*\*\*\*] prior written notice to BI in the event BI or any of its Affiliates directly or indirectly challenges the validity of the CureVac Licensed Patent Rights in a legal proceeding or supports a Third Party in the challenge of a CureVac Licensed Patent Right in a legal proceeding (in each case before a court of competent jurisdiction). Any such termination shall only become effective if BI or its Affiliate has not withdrawn such action before the end of the above notice period. In the event a Sublicensee of BI challenges the validity of a CureVac Licensed Patent Right, CureVac may terminate this Agreement hereunder, if BI does not terminate such sublicense agreement within the [\*\*\*\*\*] notice period.
- 14. CONSEQUENCES OF TERMINATION**
- 14.1 Reversion of Rights.** Subject to Section 14.6(b) below, upon termination, but not expiration, of this Agreement, BI's licenses under Article 2 and Article 6 of this Agreement automatically lapse and all of CureVac's rights to the CureVac Licensed Intellectual Property automatically revert back to CureVac.

- 14.2 Sell Off.** Immediately upon the termination of this Agreement by BI in accordance with Section 13.2 above or by CureVac in accordance with Sections 13.3 or 13.4, BI shall cease all Development and Commercialization of the Licensed Vaccines and Licensed Products under the licenses granted hereunder; provided, however, that BI shall have the right to distribute and sell its existing inventory of the Licensed Products for a period of not more than [\*\*\*\*\*] following the date of the termination hereof, subject to BI's continuing obligation to pay sales milestones and royalties with respect to the Net Sales derived from the distribution and sale of such existing inventory of the Licensed Products, in accordance with the requirements of Sections 7.3, 7.4 and 7.8 above.
- 14.3 Accrued Payment Claims.** Termination of this Agreement for any reason whatsoever shall not relieve BI of its obligations to pay all royalties, milestones and other amounts payable to CureVac which have accrued prior to, but remain unpaid as of, the date of expiration or termination hereof, or which accrue thereafter, in accordance with Section 14.2 hereof.
- 14.4 Access to Regulatory Approvals and BI Intellectual Property.**

In the event of termination of this Agreement by BI pursuant to Section 13.2 or by CureVac pursuant to Section 13.3 or 13.4, CureVac shall be entitled to demand from BI the transfer and/or assignment, as applicable, of the following:

- (a) all rights and titles which were taken from a Third Party during the course of the license and which are necessary to ongoing activities, provided that CureVac shall refund any payments to be made by BI to such Third Party after the effective date of termination for the use of such rights and titles;
- (b) Regulatory Approvals held by BI, its Affiliates or Sublicensees, and if Regulatory Approvals have not been obtained by BI, its Affiliates or Sublicensees, CureVac may require that BI transfers to CureVac the status of any application for the Regulatory Approvals and notifies the competent Regulatory Authority thereof and supplies CureVac with all documents and clinical data already prepared by BI, its Affiliates or Sublicensees for the filing of applications for Regulatory Approvals (with BI using its reasonable efforts to promptly undertake such actions); and/or
- (c) a non-exclusive, cost-free, perpetual and worldwide license (with the right to sublicense) to the BI Intellectual Property (other than Afatinib-related BI Background Intellectual Property) to the extent such BI Intellectual Property has been used for the Development, Manufacture and/or Commercialization of the Licensed Vaccines and Licensed Products, in each instance for the continued Development, Manufacture and Commercialization of the Licensed Vaccines and Licensed Products, the Patent Rights comprised in such BI Intellectual Property to be listed or otherwise identified upon CureVac's request of such license.

- 14.5 Re-assignment and Re-transfer of CV9202 Specific Patent Rights and Assigned Patent Rights.** In the event of a termination by BI pursuant to Section 13.2 or pursuant to Section 13.3, if BI elects to terminate the Agreement (Section 14.6 (a) below) or by CureVac pursuant to Section 13.3 or 13.4, BI shall re-assign and re-transfer, and hereby re-assigns and re-transfers to CureVac effective as of such termination (i) the CV9202 Specific Patent Rights and (ii) the Assigned Patent Rights or the share thereof that was assigned and transferred from CureVac to BI pursuant to Section 9.3, as the case may be, and CureVac hereby accepts such re-assignment and re-transfer. In order to effect the re-assignment and re-transfer, BI will support CureVac, upon CureVac's request in executing all assignment documentation and providing any declaration which may be necessary to effect the re-assignment and re-transfer of the CV9202 Specific Patent Rights and the Assigned Patent Rights from BI to CureVac. Except in the case of termination by BI in accordance with Sections 13.3 and 14.6(a), BI shall be responsible for, and will pay all necessary out-of- pockets expenses with respect to the re-assignment and re-transfer of the CV9202 Specific Patent Rights and the Assigned Patent Rights, including the fees for notarization and legalization of the assignment documents, and for recording such assignment documents with the competent patent offices.
- 14.6 Termination for Cause by BI.** In the event of a termination by BI in accordance with Section 13.3 above, BI may elect to
- (a) terminate the Agreement, in which case all licenses and rights granted by either Party to the other Party shall terminate, BI shall cease to Develop, Manufacture and Commercialize the Licensed Vaccines and Licensed Products and, in addition to any other legal remedy BI might have, CureVac shall reimburse BI for all reasonable expenses related to the orderly wind down of all ongoing Clinical Trials; or
  - (b) continue to exercise its rights and obligations (except as set forth in this Section 14.6(b)) hereunder, and in such case the JSC shall be disbanded, BI shall have no further diligence obligations with respect to the Licensed Vaccines and Licensed Products, and CureVac shall pay to BI the amount of such damages that have been awarded by a dispute resolution proceeding pursuant to Section 15.6 below. For the avoidance of doubt, in the event BI elects to continue to exercise its rights and obligations under this Agreement, the terms and conditions of this Agreement, including the payment obligations, shall continue to apply with the exception only of the diligence obligations and the obligation to convene and exchange information in the Joint Steering Committee.
- 14.7 Wind Down or Transfer of Development Work.** In the event of termination of this Agreement by BI pursuant to Section 13.2 or by CureVac pursuant to Section 13.3 or 13.4 and provided such termination occurs while Development activities regarding the Licensed Vaccines are still ongoing, BI shall

- (a) promptly inform CureVac on the status of the ongoing Clinical Trials, the estimated timelines, budgets and required resources of such Clinical Trials and answer any reasonable question CureVac may have regarding such Clinical Trials; **and**
- (b) wind down in an orderly fashion any Clinical Trials and cease all other Development activities, or, at the election of CureVac, permit CureVac to take over such Development activities, *provided that* BI informs CureVac in writing on all material Development activities and associated costs and CureVac provides written notice to BI of its intent to take over such Development activities prior to effective termination of this Agreement or within [\*\*\*\*\*] after receipt of the information on the ongoing Development activities, whichever is later. Upon receipt of such written notice by BI, BI shall use Commercially Reasonable Efforts to (i) transfer all data and information and (ii) provide all support, in each case (i) and (ii) as reasonably required for CureVac to take over the Development activities, and the Parties shall discuss in good faith the details of a transfer of the respective Clinical Trials and other Development activities to CureVac. If - and only if - CureVac decides to take over the Development activities, CureVac shall be responsible for the costs of such Development activities which are being incurred by either Party after the effective date of termination, with the exception only of the internal costs incurred at BI.

**14.8 Survival.** Sections 1, 4.1.2, 6.5, 7.8.11, 7.9, 9.1 to 9.6, 10.1 to 10.8, 11.4, 12, 13.1, 13.3, 14, 15.1, 15.3 to 15.15 shall survive the expiration or termination of this Agreement.

**15. GENERAL PROVISIONS.**

**15.1 Assignment.** Subject to the other terms of this Agreement, neither Party shall have the right or the power to assign any of its rights or obligations under this Agreement without the prior written consent of the other Party, such written authorization not to be unreasonably withheld or delayed; *provided, however*, that the prior written authorization of the other Party shall not be required for a Party to assign all its rights and delegate the performance of all of its obligations hereunder to (i) an Affiliate; or (ii) to a Third Party which acquires all or substantially all of its assets related to this Agreement and the Related Agreements between the Parties. Any permitted assignment hereunder by either Party to an Affiliate or to a Third Party pursuant to this Section 15.1 shall not relieve such Party of any of its obligations under this Agreement, including, but not limited to, the Party's obligation to make the payments under Article 7.

**15.2 Change of Control of CureVac.** In the event of (i) a direct or indirect acquisition by any pharmaceutical company of beneficial ownership of fifty percent (50%) or more of the shares in CureVac; or (ii) the sale or other disposition to any pharmaceutical company of all or substantially all of the assets of CureVac; or (iii) the merger, amalgamation or other form of business combination or similar transaction between CureVac and one or more pharmaceutical companies ("**Change of Control**") the following shall apply:

- (a) CureVac shall promptly give written notice of such Change of Control to BI;

- (b) Upon BI's written request, CureVac and its Affiliates shall promptly: (i) return any and all Confidential Information and Materials of BI to BI within [\*\*\*\*\*] upon BI's request, save that CureVac may retain copies of BI's Confidential Information as set forth in Section 10.5;
- (c) BI shall have the right to be released of its ongoing disclosure and information exchange obligations according to Sections 4.3 (regulatory matters including the grant of any further right of cross referencing) and 5.2 (sales forecast). In addition, the JSC and/or the Joint Project Team shall be dissolved upon BI's request.
- (d) In addition to the confidentiality obligations according to Section 10, CureVac shall take reasonable steps to ensure that any Confidential Information of BI is not shared with any others within CureVac that are not required to manage, perform and exercise CureVac's rights and obligations under this Agreement,

provided, however, that no Change of Control for purposes of this Section 15.2 shall occur if the pharmaceutical company taking control over CureVac is controlled by Mr. Dietmar Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG. The term "controlled" as used in the aforementioned sentence refers to the possession, directly or indirectly, of the power to direct, or cause the direction of, the management or policies of a legal entity, whether through the ownership of voting securities, by contract or otherwise.

**15.3 Force Majeure.** If the performance of any part of this Agreement by either Party, or any obligation under this Agreement, is prevented, restricted, interfered with or delayed by reason of any cause beyond the reasonable control of the Party liable to perform, unless conclusive evidence to the contrary is provided, the Party so affected shall, upon giving written notice to the other Party, be excused from such performance to the extent of such prevention, restriction, interference or delay, provided that the affected Party shall use its Commercially Reasonable Efforts to avoid or remove such causes of non-performance and shall continue performance with the utmost dispatch whenever such causes are removed. When such circumstances arise, the Parties shall discuss what, if any, modification of the terms of this Agreement may be required in order to arrive at an equitable solution.

**15.4 Notices.** All notices, reports and other communications between the Parties under this Agreement shall be sent by registered mail, postage prepaid and return receipt requested, by courier, or by facsimile, with a confirmation copy sent by registered mail or courier, addressed as follows:

To:	CureVac	CureVac GmbH
Attention:	Attention:	Chief Executive Officer/Geschaefsfuehrer
Address:	Address:	Paul-Ehrlich-Str. 15
		72076 Tubingen, Germany
Fax:		[*****]

With copy to:	Attention: Address:  Fax:	CureVac GmbH General Counsel Paul-Ehrlich-Str. 25 72076 Tubingen, Germany [*****]
To:	BI Attention: Address: Fax:	Boehringer Ingelheim International GmbH Head of PM Business Development & Licensing/Strategy Binger StraBe 173 55216 Ingelheim am Rhein [*****]
With copy to:	BI Attention: Address: Fax:	Boehringer Ingelheim International GmbH Head of Legal Strategic Transactions Binger StraBe 173 55216 Ingelheim am Rhein [*****]

or such other addresses or facsimile numbers as shall be furnished by like notice by such Party. Any such notice or communication given by mail shall be deemed to have been given [\*\*\*\*\*] after the date so mailed unless sent by an internationally recognized express courier and receipt confirmed, and any such notice or communication given by facsimile shall be sent with confirmation copy and shall be deemed to have been given when sent by facsimile and the appropriate answer back received, provided however, that should such answer back be automatically generated outside of regular business hours of the recipient Party, such notice shall be deemed to have been given on the next regular business day of such Party.

**15.5 Governing Law.** This Agreement and all disputes arising hereunder, shall be exclusively governed by, and interpreted and enforced in accordance with the laws of Germany, without reference to conflicts of laws principles. The validity or enforceability of the intellectual property rights shall be subject to an evaluation under the law of the country in which the intellectual property rights were applied for or have been issued.

**15.6 Dispute Resolution.**

**15.6.1** In the event of any dispute arising out of or in connection with this Agreement that cannot be settled by good faith negotiations over a period of [\*\*\*\*\*] within the JSC, and thereafter over an additional period of [\*\*\*\*\*] between senior management representatives of the Parties, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the Deutsche Institution für Schiedsgerichtsbarkeit e.V. (DIS) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be Frankfurt, Germany. The number of mediators will be one (1). The language of the mediation proceeding will be English. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration.

- 15.6.2 Any dispute relating to the validity, performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in Section 15.6.1, shall be submitted to arbitration in accordance with the Arbitration Rules of the Deutsche Institution für Schiedsgerichtsbarkeit e.V. ("**DIS Rules**"). The existence, nature and details of any such dispute(s), and all communications between the Parties related thereto, shall be considered Confidential Information of the Parties and shall be treated in accordance with the terms of Article 10 above. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction. The location of arbitration will be Frankfurt, Germany. The arbitration will be heard and determined by one (1) arbitrator, who will be jointly selected by BI and CureVac. If, within [\*\*\*\*\*] following the date upon which a claim is received by the respondent, the Parties cannot agree on a single arbitrator, the arbitration will be heard and determined by three (3) arbitrators, with one arbitrator being appointed by each Party and the third arbitrator being selected by the two Party-appointed arbitrators. If either Party fails to select an arbitrator, or if the Party-appointed arbitrators cannot agree on a third arbitrator within [\*\*\*\*\*] of the respondent receiving the claim, such arbitrator will be appointed in accordance with the DIS Rules. The arbitration award that is consistent with the provisions of this Agreement that is so given will be binding upon the Parties, accompanied by a reasoned opinion in writing (in English), and the judgment on the award may be entered in any court having competent jurisdiction thereof. Each Party will bear its own costs and expenses (including its attorney's fees) associated with any arbitration initiated under this section, and each Party will bear an equal share of the arbitrators' and administrative fees associated with any arbitration initiated under this section. The language of the arbitration proceeding will be English. Notwithstanding the provisions of this Section 15.6.2, each Party shall have the right to seek preliminary or permanent injunctive relief in any court of competent jurisdiction as such Party deems necessary to preserve its rights and to protect its interests.
- 15.7 **Severability.** If any provision of this Agreement is determined by any court or administrative tribunal of competent jurisdiction to be invalid or unenforceable, the Parties shall negotiate in good faith a replacement provision that is commercially equivalent, to the maximum extent permitted by Applicable Laws, to such invalid or unenforceable provision. The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of the other provisions of this Agreement. Nor shall the invalidity or unenforceability of any provision of this Agreement in one country or jurisdiction affect the validity or enforceability of such provision in any other country or jurisdiction in which such provision would otherwise be valid or enforceable.
- 15.8 **Entire Agreement and Amendments.** This Agreement, together with all Exhibits attached hereto, constitutes the entire agreement between the Parties regarding the subject matter hereof, and supersedes all prior agreements, understandings and communications between the Parties, with respect to the subject matter hereof, *provided, however*, that confidentiality agreements between of the Parties regarding the subject matter hereto and entered into before the Effective Date, including the reciprocal confidential disclosure agreement entered into by and between the Parties effective as of October 30, 2012, as amended by the 2nd amendment effective as of July 25, 2014, shall remain effective with respect to information exchanged between the Parties before the Effective Date. No modification or amendment of this Agreement shall be binding upon the Parties unless in writing and executed by the duly authorized representative of each of the Parties; this shall also apply to any change of this clause.

- 15.9 **Waivers.** The failure by either Party hereto to assert any of its rights hereunder, including the right to terminate this Agreement due to a breach by the other Party hereto, shall not be deemed to constitute a waiver by that Party of its right thereafter to enforce each and every provision of this Agreement in accordance with its terms.
- 15.10 **Counterparts.** This Agreement may be executed in any number of counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.
- 15.11 **Independent Contractors.** The Parties are independent contractors and this Agreement shall not constitute or give rise to an employer-employee, agency, partnership or joint venture relationship among the Parties and each Party's performance hereunder is that of a separate, independent entity.
- 15.12 **Language.** This Agreement, and any amendments or modifications thereto, shall be executed in the English language. No translation, if any, of this Agreement into any other language shall be of any force or effect in the interpretation of this Agreement or in determination of the intent of either of the Parties hereto.
- 15.13 **Headings.** The headings are placed herein merely as a matter of convenience and shall not affect the construction or interpretation of any of the provisions of this Agreement.
- 15.14 **Third Parties.** None of the provisions of this Agreement shall be for the benefit of or enforceable by any Third Party which shall be a Third Party beneficiary to this Agreement.
- 15.15 **Costs.** Except as is otherwise expressly set forth herein, each Party shall bear its own expenses in connection with the activities contemplated and performed hereunder.

- Signature page follows -

IN WITNESS WHEREOF, this Agreement has been signed by the Parties hereto in two (2) originals, each Party acknowledging receipt of one original.

REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

AMENDMENT NO. 1 TO THEEXCLUSIVE COLLABORATION AND LICENSE AGREEMENT

by and between

**CureVac GmbH**, a German limited liability company with offices at Paul-Ehrlich-Str. 15, 72076 Tübingen, Germany ("**CureVac**"), and

**Boehringer Ingelheim International GmbH**, a German limited liability company with offices at Binger Straße 173, 55216 Ingelheim am Rhein, Germany, ("**BI**").

WHEREAS, the Parties entered into that certain Exclusive Collaboration and License Agreement effective as of August 21, 2014 ("**Agreement**");

WHEREAS, the Parties acknowledge that certain developments subsequent to the Agreement's Effective Date, [\*\*\*\*\*] necessitate changes to the setup of the Clinical Trials combining CV9202 and chemo-radiotherapy set forth in the CV9202 Development Plan;

WHEREAS, the Parties acknowledge that implementing the above-mentioned changes to the setup of the Clinical Trials might have a significant impact on the time point of the milestone payments set forth in Section 7.3 of the Agreement;

WHEREAS, the Parties desire to reiterate and strengthen their common aspiration that CureVac will continue to progress the CMC Development and Manufacture of the Licensed Vaccines;

WHEREAS, the Parties wish to clarify certain matters relating to the Development of CV9202;

NOW, THEREFORE, the Parties hereby agree as follows:

1. **Definitions.** Terms defined in this Amendment No. 1 are used with those meanings in this Amendment No. 1. Terms not defined in this Amendment No. 1 are used with the meanings as defined in the Agreement.
2. **CV9202 Development Plan.** CureVac agrees that Exhibit 4.2 to the Agreement is hereby replaced in its entirety by Exhibit 4.2 attached to this Amendment No. 1. For clarity, no decision or confirmation by the JSC is required for this amendment of the CV9202 Development Plan. However, the JSC is entitled to review, validate, modify, update and amend the amended CV9202 Development Plan, as set forth in Article 8 of the Agreement.
3. **[\*\*\*\*\*] Milestone Payment.** Sections 7.3.1(c) and 7.3.1(d) of the Agreement are replaced in their entirety as follows:

"(c) [\*\*\*\*\*]

[\*\*\*\*\*]

(d) [\*\*\*\*\*]

[\*\*\*\*\*];"

4. **New CMC Development Milestone Payments.** New Section 7.3.3 is added to the Agreement as follows:

**"CMC Development Milestone Payments:**

(a) Upon the earlier of [\*\*\*\*\*]

[\*\*\*\*\*];

(b) Upon the earlier of (i) [\*\*\*\*\*]

[\*\*\*\*\*].

For clarity, if CureVac achieves the milestone event set forth in Section 7.3.1(d) prior to achieving the milestone events under Section 7.3.3, the milestone payments under Sections 7.3.1(d), 7.3.3(a) and under Section 7.3.3(b) will all become payable with achieving milestone event under Section 7.3.1(d), [\*\*\*\*\*] The milestone events under Sections 7.3.3(a) and 7.3.3(b) only lead to separate payments if they occur prior the achievement of the milestone event under Section 7.3.1(d). For further clarity, none of the two (2) milestone payments set forth in this Section 7.3.3 is payable more than once."

5. **Financial Manufacturing Support.** Both Parties agree to find an appropriate financial solution for the significant delay of the milestone payment for [\*\*\*\*\*] due to the revised CV9202 Development Plan to allow CureVac to further invest in connection with the CMC Development and/or the construction of the commercial-scale production facility in which Licensed Vaccines would be Manufactured ("**Financial Manufacturing Support**"). BI and CureVac will negotiate in good faith and agree until [\*\*\*\*\*] on the terms and conditions of such Financial Manufacturing Support ([\*\*\*\*\*]). The terms and conditions will provide that the Financial Manufacturing Support will be provided by BI earliest on [\*\*\*\*\*] and only (i) upon CureVac's written request, (ii) if no Change of Control has occurred and (iii) CureVac continues its CMC Development activities as foreseen in the CV9202 Development Plan and there are no reasonable grounds for BI to believe that CureVac is unable or unwilling to successfully complete these CMC Development activities.

6. **Consulting Support for Commercial Facility.** CureVac has already asked and may ask BI for consulting support relating to (i) the upgrade of CureVac's current manufacturing plant to a pilot plant (including scale-up of the mRNA manufacturing process) and (ii) the construction of CureVac's future commercial-scale production facility in which Licensed Vaccines would be Manufactured. In such case BI shall, at no cost to CureVac, provide all or parts of the asked for consulting support to CureVac. With respect to such consulting support rendered after the Effective Date, (i) BI makes no representation or warranty (express, implied, statutory or otherwise), (ii) Section 12.2 of the Agreement does not apply, and (iii) notwithstanding Section 11.4 of the Agreement, BI's liability (whether based on contract, tort or otherwise) is limited to intentional acts, *provided* that nothing in this Section 6 of this Amendment No. 1 excludes or limits liability for cases for which a limitation of liability is not possible under Applicable Laws.

7. **Immunomonitoring.** Phase I/II Clinical Trials and Phase II Clinical Trials immunomonitoring services by CureVac are considered fee-for-service work packages. The Parties acknowledge that within the scope of this fee-for-service work some of CureVac's immunomonitoring Know-How needs to be transferred to BI in order to enable BI to set up the study support for the Clinical Trials appropriately. Exhibit 7A to this Amendment No. 1 lists the immunomonitoring technical documentation to be provided by CureVac to BI. BI experts will work together with CureVac on a validation plan, a sample analysis plan and fulfillment of GCP requirements. In addition, BI has the right to perform quality control checks of the immunomonitoring measurements. The required activities are defined in more detail in the updated CV9202 Development Plan. If CureVac cannot provide the required capacity for a potential immunomonitoring program for Phase III Clinical Trials, BI has the right to request transfer by CureVac of the required immunomonitoring methods to a reasonably acceptable Third Party CRO to be selected by the Joint Project Team. The working hours of CureVac personnel for such method transfer shall be reimbursed by BI at the FTE Rates in accordance with a budget to be set forth in the CV9202 Development Plan.
8. **Regulatory Matters.** In accordance with Section 4.3 of the Agreement, the Parties' respective responsibilities and the costs relating to regulatory matters are further clarified in Exhibit 4.3A attached to this Amendment No. 1.
9. **Pharmacovigilance.** The last sentence of Section 5.3 of the Agreement is replaced as follows:  
  
"Detailed pharmacovigilance responsibilities and obligations are set forth in the pharmacovigilance agreement by and between the Parties effective as of [\*\*\*\*\*]."
10. **Phase ID Clinical Supply and Commercial Supply.** The deadlines set forth in Section 6.2 of the Agreement until which the Parties shall (i) negotiate in good faith commercially reasonable terms and conditions of an amendment to the Clinical Supply Agreement and conclude such amendment in order to cover Phase III Clinical Trial supply in accordance with the terms and conditions of the binding term sheet attached to the Agreement as Exhibit 6.2A and (ii) negotiate in good faith commercially reasonable terms and conditions of a commercial supply agreement and conclude such commercial supply agreement in accordance with the terms and conditions of the binding term sheet attached to the Agreement as Exhibit 6.2B, each of (i) and (ii) unless CureVac is providing notice of waiver as set forth in Section 6.2 (a) or (b) before or during such negotiations, are hereby extended until [\*\*\*\*\*].
11. **Plasmid DNA as Precursor for Licensed Vaccines.** The deadlines set forth in Section 6.4 of the Agreement are hereby extended until [\*\*\*\*\*].
12. **Full Force and Effect.** The Parties confirm that the Agreement, as amended by this Amendment No. 1, is in full force and effect.
13. **Amendment Effective Date.** This Amendment No. 1 shall enter into force on June 30, 2015.

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed by their duly authorized representatives. This Amendment may be executed in one or more counterparts, each of which will be deemed an original, but all of which will constitute but one and the same instrument.

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

AMENDMENT NO. 2 TO THEEXCLUSIVE COLLABORATION AND LICENSE AGREEMENT

by and between

**CureVac AG** (formerly CureVac GmbH), a German limited liability company with offices at Paul-Ehrlich-Str. 15, 72076 Tübingen, Germany ("CureVac"), and

**Boehringer Ingelheim International GmbH**, a German limited liability company with offices at Binger Straße 173, 55216 Ingelheim am Rhein, Germany ("BI").

WHEREAS, the Parties entered into that certain Exclusive Collaboration and License Agreement effective as of August 21, 2014 (the "**Original Agreement**"), as amended by the first amendment effective as of June 30, 2015 (the "**Amendment No. 1**") (the Original Agreement, as amended by Amendment No. 1, the "**Agreement**");

WHEREAS, the Parties wish to exchange the target product profiles described in the Agreement due to changes in the NSCLC treatment landscape and subsequent adaptation in the development strategy;

WHEREAS, the Parties wish to clarify certain matters relating to the Development of CV9202;

NOW, THEREFORE, the Parties hereby agree as follows:

1. **Definitions.** Terms defined in this Amendment No. 2 are used with those meanings in this Amendment No. 2. Terms not defined in this Amendment No. 2 are used with the meanings as defined in the Agreement.
2. **Diligence.** Section 4.2.3 of the Agreement is hereby replaced in its entirety as follows:

"Provided that CureVac has delivered to BI or BI's CRO the following amounts of Clinical Trial supply

[\*\*\*\*\*]

BI shall initiate the clinical development with CV9202 in combination with a checkpoint inhibitor [\*\*\*\*\*] (the "**Checkpoint Inhibitor Vaccine**") in a Phase 1/11 Clinical Trial in stage IV NSCLC (other than a Clinical Trial sponsored by LICR) and not terminate or halt the Nonclinical and Clinical Development unless there are substantial and reasonable technical, safety, efficacy and/or regulatory reasons for doing so, and details of such technical safety, efficacy and/or regulatory have been notified to CureVac in writing through the JSC."

3. **CV9202 Development Plan.** The Parties agree that Exhibit 4.2 to the Agreement is hereby replaced in its entirety by Exhibit 4.2 attached to this Amendment No. 2. For clarity, no decision or confirmation by the JSC is required for this amendment of the CV9202 Development Plan. However, the JSC is entitled to review, validate, modify, update and amend the amended CV9202 Development Plan, as set forth in Article 8 of the Agreement.

4. **Development and Regulatory Milestone Payments for the First Indication.** Section 7.3.1 of the Agreement is hereby replaced in its entirety as follows:

"**Development and Regulatory Milestone Payments for the First Indication (on the Effective Date expected to be [\*\*\*\*\*]**

[\*\*\*\*\*]

*Provided, however,* that if BI suspends the Development of the Checkpoint Inhibitor Vaccine and/or the Chemo-Radiation Vaccine and replaces such TPP by another TPP, the applicable above milestone payments under (a) to (e) shall be payable for the other TPP replacing the replaced TPP. For the avoidance of doubt, milestone payments already paid for the Development of a TPP prior to suspension shall not be payable for the other TPP replacing the replaced TPP.

5. **Commercial Supply Waiver.** The deadline set forth in Section 6.2(b) of the Agreement until which CureVac has the right to waive its right and obligation to Manufacture all Licensed Vaccines for the Commercialization of the Licensed Products (the "**Commercial Supply Waiver**") by notifying BI of such waiver in writing on or before [\*\*\*\*\*] is hereby extended until [\*\*\*\*\*] CureVac shall use Commercially Reasonable Efforts to provide sufficient funds and personnel resources to be allocated for (i) the construction and qualification of a [\*\*\*\*\*] pilot plant in CureVac's current site (GMP III) and (ii) the construction and qualification of the new [\*\*\*\*\*] plant (GMP IV).

6. **Commercial Supply Agreement.** The deadline set forth in Section 6.2 of the Agreement until which the Parties shall negotiate in good faith commercially reasonable terms and conditions of a commercial supply agreement and conclude such commercial supply agreement in accordance with the terms and conditions of the binding term sheet attached to the Agreement as Exhibit 6.2B, unless CureVac is providing timely notice of waiver as set forth in Section 6.2(b) of the Agreement, is hereby extended until [\*\*\*\*\*] Such supply agreement shall include that CureVac shall reserve manufacturing slots for a total amount of [\*\*\*\*\*] mRNA in the years [\*\*\*\*\*] ([\*\*\*\*\*] for initial market supplies.
7. **mRNA Manufacturing Information.** To enable BI to prepare for a potential future GMP Manufacturing of Licensed Vaccines by a BI Affiliate or a Permitted Third Party CMO (as defined in Section 6.3.2 of the Agreement), CureVac shall provide the required (i.e., required for the aforementioned purpose), transparent and up-to-date information to BI regarding its mRNA Manufacturing technology for the Licensed Vaccines, including: CureVac shall (i) deliver to BI, on or before [\*\*\*\*\*], the documents, information and data set forth in Exhibit 6.2C to this Amendment No. 2, (ii) provide to BI on a Calendar Quarterly basis updates with respect to changes to its mRNA Manufacturing technology (if any), and (iii) make reasonably available at no cost to BI 4 FTE for one day per Calendar Quarter (i.e., with further FTE days to be reimbursed to CureVac) for BI's questions with respect to the mRNA Manufacturing technology and to obtain a response to those questions in a reasonable timely manner; provided, however, that any further support, including site visits and trainings will be compensated at the FTE Rate. Further, BI will reimburse CureVac's reasonable out of pocket expenses with respect to such visits and trainings. In the event CureVac does not exercise the Commercial Supply Waiver within the prescribed time and achieves all milestone events set forth under Section 6.3.1(b) of the Agreement, then, upon CureVac's request, BI shall return or destroy, as instructed by CureVac, all Confidential Information of CureVac set forth above and confirm such return or destruction in writing to CureVac, save that BI may retain copies of such CureVac's Confidential Information as set forth in Section 10.5 of the Agreement.
8. **Confidentiality.** Section 4.3 sentence 9 of the Agreement ("In addition to the obligations under Section 10 below, BI shall ensure that such CMC Development- and/or Manufacturing-related documentation, data and reports are not circulated within BI's and BI's Affiliates' organizations except as required for the purposes mentioned in the foregoing sentence.") is hereby deleted. The Parties acknowledge and agree that, as a result of the aforementioned deletion, the side letter to the Agreement dated February 3, 2015 ceases to apply. For clarity, all CMC Development- and/or Manufacturing-related documentation, data and information, remain subject to the confidentiality obligations under Section 10 of this Agreement.
9. **Plasmid DNA as Precursor for Licensed Vaccines.** Section 6.4 of the Agreement is hereby replaced in its entirety as follows:

"The Parties agree that CureVac will source plasmid DNA needed as a precursor for the Manufacture of Licensed Vaccines for Phase III Clinical Trials and commercial supply from Lonza AG or an Affiliate of Lonza AG (Lonza AG and its Affiliates "**Lonza**") as first supplier for plasmid DNA needed for Phase III Clinical Trials supply and as first or second supplier for plasmid DNA needed for commercial supply, under a manufacturing process to be developed by Lonza, or, if Lonza is not available for such sourcing, by another competent CMO. CureVac shall use Commercially Reasonable Efforts that appropriate supply agreements between Lonza or such other CMO and CureVac for the precursor for the Manufacture of the Licensed Vaccines will be in place (anticipated deadline for supply agreement for Phase III: [\*\*\*\*\*] anticipated deadline for commercial supply agreement: [\*\*\*\*\*] If CureVac exercises the Commercial Supply Waiver, BI shall have the right to request that BI will assume all of such CureVac's rights and obligations (*Vertragsübernahme*) under the two supply agreements between CureVac and Lonza, and CureVac shall use Commercially Reasonable Efforts to procure Lonza's consent thereto."

10. **Changes to Amendment No. 1.** Sections 3, 10 and 11 of Amendment No. 1 are hereby deleted in their entireties.
11. **Full Force and Effect.** The Parties confirm that the Agreement, as amended by this Amendment No. 2, is in full force and effect.
12. **Amendment Effective Date.** This Amendment No. 2 shall enter into force on August 1, 2016.

*Signature page follows.*

IN WITNESS WHEREOF, the Parties have caused this Amendment No. 2 to be executed by their duly authorized representatives. This Amendment No. 2 may be executed in one or more counterparts, each of which will be deemed an original, but all of which will constitute but one and the same instrument.

Exhibit 6.2C: mRNA Manufacturing Information to Be Provided by CureVac

[\*\*\*\*\*]

## CONFIDENTIAL

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

AMENDMENT NO. 3 TO THEEXCLUSIVE COLLABORATION AND LICENSE AGREEMENT

by and between

**CureVac AG** (formerly CureVac GmbH), a German corporation with offices at Paul-Ehrlich-Str. 15, 72076 Tübingen, Germany ("**CureVac**"), and

**Boehringer Ingelheim International GmbH**, a German limited liability company with offices at Binger Straße 173, 55216 Ingelheim am Rhein, Germany ("**BI**").

WHEREAS, the Parties entered into that certain Exclusive Collaboration and License Agreement effective as of August 21, 2014 (the "**Original Agreement**"), as amended by the first amendment effective as of June 30, 2015 (the "**Amendment No. 1**") and by the second amendment effective as of August 1, 2016 (the "**Amendment No. 2**") (the Original Agreement, as amended by Amendment No. 1 and Amendment No. 2, the "**Agreement**");

WHEREAS, the Parties agree that [\*\*\*\*\*] militate in favor of adapting the Development strategy for CV9202 (B11361849);

WHEREAS, CureVac chose not to exercise the waiver set forth in Section 6.2(b) of the Agreement; consequently CureVac has the right and the obligation to Manufacture all Licensed Vaccines for the Commercialization of the Licensed Products;

WHEREAS, the Parties wish to clarify certain matters relating to the Development of CV9202 (B11361849);

NOW, THEREFORE, the Parties hereby agree as follows:

1. **Definitions.** Terms defined in this Amendment No. 3 are used with those meanings in this Amendment No. 3. Terms not defined in this Amendment No. 3 are used with the meanings as defined in the Agreement.
2. **Diligence.** Section 4.2.3 of the Agreement is hereby deleted in its entirety.
3. **CV9202 Development Plan.** The Parties agree that Exhibit 4.2 to the Agreement is hereby replaced in its entirety by Exhibit 4.2 attached to this Amendment No. 3.

For clarity, no decision or confirmation by the JSC is required for this amendment of the CV9202 Development Plan. However, the JSC is entitled to review, validate, modify, update and amend the amended CV9202 Development Plan, as set forth in Article 8 of the Agreement.

4. **Phase III Clinical Supply Agreement.** The deadline set forth in Section 6.2 of the Agreement until which the Parties shall negotiate in good faith commercially reasonable terms and conditions

of an amendment to the Clinical Supply Agreement and conclude such amendment in order to cover Phase III Clinical Trial supply in accordance with the terms and conditions of the binding term sheet attached to the Agreement as Exhibit 6.2A is hereby extended until [\*\*\*\*\*].

5. **Commercial Supply Agreement.** The deadline set forth in Section 6.2 of the Agreement until which the Parties shall negotiate in good faith commercially reasonable terms and conditions of a commercial supply agreement and conclude such commercial supply agreement in accordance with the terms and conditions of the binding term sheet attached to the Agreement as Exhibit 6.2B is hereby extended until the date that is [\*\*\*\*\*] after the last patient has been dosed for the first time in the ongoing Clinical Trial sponsored by LICR (“**Last Patient In**”). At least [\*\*\*\*\*] prior to then to be expected Last Patient In (as set forth in the then-current CV9202 Development Plan) the Parties shall commence negotiations for the Commercial Supply Agreement. In addition, the Parties shall conclude an amendment to the existing term sheet for commercial supply (Exhibit 6.2B to the Agreement) until [\*\*\*\*\*]. Further, CureVac shall provide a plan, to be updated at each JSC meeting, how CureVac will achieve manufacturing readiness in accordance with the CV9202 Development Plan and to ensure compatibility with CV9202 project planning at BI. The Commercial Supply Agreement shall include that CureVac shall reserve manufacturing slots for the estimated total amounts of mRNA as shown in the table below:

[\*\*\*\*\*]

6. **Section 6.3.1(b) Milestones.**

Section 6.3.1(b) of the Agreement is hereby replaced in its entirety as follows:

“(b) fails to achieve any one of the following milestone events

- (i) the JSC decides on achievement of process lock for drug substance (mRNA) development at [\*\*\*\*\*];
- (ii) the EMA and the FDA accept the comparability of the [\*\*\*\*\*] to the existing [\*\*\*\*\*] Manufacturing process at CureVac’s pilot plant on or before [\*\*\*\*\*] or any later point in time if so delayed by the JSC or such delay is caused by BI internal processes;
- (iii) the competent health authority (at present: *Regierungspräsidium Tübingen*) approves the GMP IV facility on or before [\*\*\*\*\*]; **or**
- (iv) the JSC decides on successful completion of drug substance and drug product engineering runs on or before [\*\*\*\*\*].

7. **Manufacturing Information.** Subject to Section 6.3.1 in order to enable BI to prepare for a potential future GMP Manufacturing of Licensed Vaccines by a BI Affiliate or a Permitted Third Party CMO (as defined in Section 6.3.2 of the Agreement), Section 7 of Amendment No. 2 provides that CureVac shall provide to BI the required (i.e., required for the aforementioned purpose), transparent and up-to-date information regarding its mRNA Manufacturing technology for the Licensed Vaccines. The Parties agree that the aforementioned obligation also includes the provision of the following documents, information and data to BI which CureVac shall provide to BI within [\*\*\*\*\*] after one of the conditions set forth in Section 6.3.1 has been met, the following documents to the extent they are available as of the date of the aforementioned condition is met; documents are not available to the extent they are subject to confidentiality or license restrictions precluding CureVac from disclosing the information contained in such documents to BI:

- Qualitative and quantitative composition final drug product/drug product intermediates
  - Raw material/Excipient functionality, specification, quality/grade and suppliers
  - Raw material/Excipient/starting material/drug substance/drug product/packaging material: testing procedure, incl. parameters, methods and equipment
  - Raw material/Excipient/starting material/drug substance/drug product/packaging material: storage and stability information
  - Presentation of finished drug product (parameters, appearance, packaging materials)
  - Description of manufacturing process (master cell bank, plasmid vectors, pDNA, mRNA drug substance and drug product)
  - Manufacturing equipment (pDNA, mRNA drug product)
  - Essential requirements for manufacturing process/equipment, e.g. special layout of manufacturing area, measures to avoid cross-contamination, in-process controls during manufacturing.
8. **Scope of Exclusive License.** For the avoidance of doubt, during the term of the Agreement and subject to CureVac's right to perform its obligations under the Agreement, CureVac will not grant any license under CureVac Licensed Intellectual Property to any Third Party for the Development or Commercialization of a Licensed Vaccine regardless of whether the Licensed Vaccine is protamine-complexed or otherwise formulated.
9. **PharmaJet Device.** At BI's request, CureVac and BI shall enter into good faith negotiations and conclude an agreement under which CureVac grants to BI a non-exclusive sublicense, for the Development and Commercialization of Licensed Vaccines, under the licenses granted to CureVac under that certain License and Supply Agreement by and between CureVac and PharmaJet Inc. effective as of January 14, 2013. The parties will also discuss in good faith alternative routes of licensing, such as a direct license by BI from PharmaJet.
10. **Consulting Support for Commercial Facility.** BI's consulting support for CureVac's commercial facility as outlined in Section 6 of Amendment No. 1 is deemed completed. In case further critical topics relating to CureVac's commercial facility arise both Parties will discuss whether to resume the consultancy in defined support areas. Any consultancy resumption requires a unanimous decision of the JSC to be documented in meeting minutes.
11. **Full Force and Effect.** The Parties confirm that the Agreement, as amended by this Amendment No. 3, is in full force and effect.
12. **Amendment Effective Date.** This Amendment No. 3 shall enter into force on [\*\*\*\*\*].

*Signature page follows.*

IN WITNESS WHEREOF, the Parties have caused this Amendment No. 3 to be executed by their duly authorized representatives. This Amendment No. 3 may be executed in one or more counterparts, each of which will be deemed an original, but all of which will constitute but one and the same instrument.

Exhibit 4.2: CV9202 Development Plan

[\*\*\*\*\*]

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

**Global Access Commitments Agreement**

This Global Access Commitments Agreement (including all appendices, exhibits and attachments hereto, the "**Agreement**"), is entered into as of February 13, 2015 ("**Effective Date**"), by and between the Bill & Melinda Gates Foundation, a Washington charitable trust that is a tax-exempt private foundation (the "**Foundation**"), and CureVac GmbH, a German limited company, together with its Affiliates ("**CureVac**" or the "**Company**"), in connection with the Foundation making a program-related investment in the Company by acquiring Series B Shares of the Company issued from the Company as part of one or more capital increases (the "**Shares**") (the acquisition of Shares is referred to herein as the "**Foundation Investment**"). The Foundation Investment is subject to the terms and conditions of the investment documents executed in connection with the closing ("**Closing**"), including, without limitation, this Agreement, and the Investment and Shareholders' Agreement (the "**Shareholders' Agreement**") among the Company's shareholders, dated February 13, 2015, and related documents, in each case as amended from time to time (collectively, the "**Investment Documents**"). Capitalized terms not defined herein shall have the same meaning as in the Investment Documents. The Foundation and Company are each referred to as a "**Party**" and collectively as the "**Parties**". In consideration of the Foundation making the Foundation Investment on the terms and conditions in the Investment Documents, and for other good and valuable consideration, the undersigned hereby irrevocably agree as follows:

**1. Charitable Purposes and Use of Funds**

The Foundation is making the Foundation Investment as a "program-related investment" within the meaning of Section 4944(c) of the Code. The Foundation is committed to accelerating the development of lifesaving and low-cost vaccines and drugs to reduce the burden of disease in Access Countries in furtherance of its mission to help all people lead healthy, productive lives. The Foundation requires that the innovations, products and information developed with its funding be created and managed to ensure "**Global Access**" can be achieved, in particular that (i) knowledge gained using its funding be promptly and broadly disseminated and (ii) the intended products developed with its funding and owned or Controlled by the Company be made available and accessible at reasonable cost to people most in need in Access Countries. The Foundation's primary purpose in making the Foundation Investment is to further the accomplishment of the Foundation's charitable purposes, including securing Global Access rights to new, low-cost vaccines and drugs developed (in whole or in part) through the use of the Company's Platform Technology and for certain selected Target Diseases and Conditions (collectively, the "**Charitable Purpose**"). In furtherance of the Charitable Purpose, the Foundation's investment in the Company will secure the Global Access Commitments set forth below.

The Company agrees to use the funds from the Foundation Investment solely (a) to fund the Company's new manufacturing facility which is planned to have the capacity to produce at least [\*\*\*\*\*] doses which inter alia can be used to manufacture vaccines and drugs in support of the Foundation's Charitable Purpose, and which is described in Appendix 1 ("**New Facility**") and/or (b) to continue development of the Company's Platform Technology and use of the Platform Technology to advance drug and vaccine candidates in support of the Foundation's Charitable Purpose.

---

2. **Certain Definitions**

The following terms shall have the following meanings:

(a) **“Access Countries”** means the countries (each an **“Access Country”**) on the World Bank list of low-income and lower middle-income economies (<http://www.worldbank.org/data/countryclass/classgroups.htm>) on the Effective Date, which are set forth on Appendix 2. If after the Effective Date a country which was an Access Country on the Effective Date (i) is removed from such list and (ii) if such country becomes part of the European Union or is subject to another treaty with other non-Access Countries which leads to a material increase of the risk of parallel imports, the Parties will cooperate in good faith to reasonably reduce the risk of parallel imports and if it is not possible to reduce the risk to a degree that is acceptable to both Parties, such country will be removed from the list of Access Countries for purposes of this Agreement.

(b) **“Access Country Doses”** means vaccines and drugs the Company has developed using funds from the Foundation or Foundation-supported Entities in connection with Projects and that are intended for use in the Access Countries (including, without limitation, vaccines and drugs for use in clinical trials).

(c) **“Affiliate”** means, as to any Person, any other Person that directly or indirectly controls, or is under common control with or is controlled by such Person, provided, however, that regarding CureVac, Affiliate shall not include Mr. Hopp and Dievini Hopp biotech holding GmbH & Co. KG and/or any other companies controlled by Mr. Hopp and/or Dievini Hopp biotech holding GmbH & Co. KG.

(d) **“Change in Control”** means (i) the acquisition after the date of this Agreement, directly or indirectly, by any Person or group (within the meaning of Section 13(d)(3) of the Exchange Act) of the beneficial ownership of securities of the Company possessing more than 50% of the total combined voting power of all outstanding voting securities of the Company; (ii) a merger, consolidation or other similar transaction involving the Company, except for a transaction in which the holders of the outstanding voting securities of the Company immediately prior to such merger, consolidation or other transaction hold, in the aggregate, securities possessing more than 50% of the total combined voting power of all outstanding voting securities of the surviving entity immediately after such merger, consolidation or other transaction; or (c) the sale, transfer, license or other disposition (in one transaction or a series of related transactions) of all or substantially all of the assets of the Company.

(e) **“Charitable Purpose”** has the meaning given in Section 1.

(f) **“Charitability Default”** means any event in which Company:

(i) commits a material breach of the Global Access Commitments;

(ii) fails to comply with the restrictions on the use of funds set forth in this Agreement; or

(iii) fails to comply with the U.S. tax code-related obligations set forth in Sections 9, 11 and 13 below.

(g) **“Claim”** has the meaning set forth in Section 6.

(h) “**Code**” means the Internal Revenue Code of 1986, as amended, and the regulations thereunder.

(i) “**COGS**” means [\*\*\*\*\*]. In the event the Company and the Foundation are unable to agree on the COGS amount for a Product within [\*\*\*\*\*], then the determination of COGS will be made by an independent internationally recognized accounting firm mutually acceptable to the Company and the Foundation that does not provide accounting services to the Company or the Foundation and that has expertise in calculating COGS for a pharmaceutical product.

(j) “**COGS Methodology Handbook**” means the methodology described in the “COGS Principles & Assessment Methodology Handbook” and the “COGS Handbook Appendix A Template Tables” attached at Appendix 3.

(k) “**Commitment Period**” means the period from the Effective Date until the date on which all funds received from the Foundation pursuant to the Investment Agreements have been expended in accordance with the terms of this Agreement.

(l) “**Competitor**” means a company engaged in the development of RNA vaccines and/or drugs.

(m) “**Control**” means with respect to the subject item, the possession (whether by ownership or license) by a Party of the ability to grant to the other Party access or a license as provided herein under such item or right without violating the terms of any agreement or other arrangements with any third party.

(n) “**Cure Period**” has the meaning set forth in Section 8(a).

(o) “**Developed Country**” means any country that is not an Access Country (collectively, the “**Developed Countries**”).

(p) “**Dispute**” has the meaning set forth in Section 4.

(q) “**Exchange Act**” means the Securities Exchange Act of 1934, as amended (and any successor thereto) and the rules and regulations promulgated thereunder.

(r) “**Existing Agreements**” means the collaboration agreements between the Company and third parties as such agreements exist on the Effective Date, which are listed on Appendix 4.

(s) **“Foundation-supported Entity”** means an entity that receives funding, directly or indirectly, from the Foundation, collaborates with the Foundation, or both, for the purpose of accomplishing the Foundation’s charitable objectives. For the avoidance of doubt, the Company will not be required to collaborate with and/or provide confidential information or rights to a Foundation-supported Entity that is a Competitor of the Company unless the Company determines to its reasonable satisfaction that such information is or rights are, as the case may be, protected by an appropriate confidentiality agreement and such information or rights will only be used by the Foundation-supported Entity in connection with and solely for achieving the Charitable Purpose.

(t) **“Funded Developments”** means products, services, processes, technologies, materials, software, data, other innovations, and intellectual property developed using funds from the Foundation in connection with any Project.

(u) **“GAAP”** means Generally Accepted Accounting Principles in the United States.

(v) **“Global Access”** has the meaning set forth in Section 1.

(w) **“Global Access Commitments”** has the meaning set forth in Section 3.

(x) **“Global Access License”** has the meaning set forth in Section 3(d).

(y) **“Indemnitees”** has the meaning set forth in Section 6.

(z) **“Listed Person”** has the meaning set forth in Section 155.

(aa) **“New Facility”** has the meaning given in Section 1.

(bb) **“Option Agreement”** means the agreement between the Company and [\*\*\*\*\*], which is listed in Appendix 4, as such agreement existed on the Effective Date.

(cc) **“Person”** means any individual, partnership, corporation, limited liability company, association, trust, joint venture, unincorporated organization or other legal entity.

(dd) **“Platform Technology”** means the Company’s technology for development of prophylactic and therapeutic mRNA vaccines and drugs against infectious diseases and vaccine adjuvants, comprised of long, non-coding RNA molecules and formulation/delivery technology necessary to develop the mRNA vaccines and drugs. For the avoidance of doubt, the intent of the Parties is that development activities will include the full process from pre-clinical development to delivery of Product.

(ee) **“Product”** means any drug or vaccine that is developed pursuant to a Project.

(ff) **“Project”** has the meaning set forth in Section 3(a)(i).

(gg) **“Project Commencement Period”** means the period ending on the 10-year anniversary of this Agreement.

(hh) **“Target Diseases and Conditions”** means [\*\*\*\*\*].

(ii) **“Total Manufacturing Capacity”** means Company’s capacity in vials based on its ability over any time period to manufacture and produce vaccines and/or drugs at its New Facility, which shall be forecasted and determined on a rolling quarterly basis.

(jj) "Withdrawal Rights" has the meaning set forth in Section 8(a).

3. Global Access Commitments

As a condition to the Foundation making the Foundation Investment at the initial closing and committing to invest a subsequent tranche, subject to the terms and conditions of the Investment Documents, and to ensure satisfaction of the Charitable Purpose, the Company agrees to the following "Global Access Commitments". Unless the Parties and [\*\*\*\*\*] agree otherwise, if the Parties would agree on a Project which relates to an [\*\*\*\*\*] non-exclusive pathogen under the Option Agreement, the Global Access Commitments hereunder would be subject to the rights granted to [\*\*\*\*\*] under the Option Agreement.

(a) Vaccine and Drug Development Projects.

(i) The Company will work together with the Foundation on all stages of vaccine and drug development and commercialization for Target Diseases and Conditions. Each Project will be documented in a definitive agreement between the Foundation or a Foundation-supported Entity which Project is chosen by the Foundation and approved by the Company (such approval not to be unreasonably withheld or delayed) for such Project and the Company and a project plan (each a "Project"), which may include work to be undertaken, responsibilities, participation by other parties, timelines and milestones, project management, contributions in-kind and funding requirements, a product development and marketing plan, product registration in the Access Countries, any additional global access commitments specific to the Project, terms for manufacturing and commercialization of Access Country Doses and the price for Access Country Doses, which must be an affordable price for sales for use in the Access Countries that the Parties agree will not exceed [\*\*\*\*\*]. The Company will permit the Foundation or a representative designated by the Foundation to reasonably inspect twice every [\*\*\*\*\*] during regular business hours and at the Foundation's cost the Company's books and records as well as manufacturing documentation (including but not limited to the detailed bill of materials) for the purpose of determining cost of goods sold for each Product.

(ii) The Foundation - and the Company, under the conditions set forth below - will contribute in kind or through funding to agreed-upon Projects. The specific level and allocation of funding responsibilities for a specific Project will be decided on a Project-by-Project basis as mutually agreed in good faith in writing by the Parties based on a fair allocation of the expected benefits. For the avoidance of doubt, if a Project serves solely the Foundation's charitable purposes, the expectation of the Parties is that the Foundation will fully fund the direct costs associated with such specific Project. The Company agrees that as part of the Global Access Commitments, it will accept and work on three Projects proposed by the Foundation at a time, subject to the Foundation or a Foundation-supported Entity selected by the Foundation and approved by the Company (such approval not to be unreasonably withheld or delayed) for such Project agreeing to pay its proportionate share of the funding responsibilities associated with such Projects. If the Company is working on three Foundation (or Foundation-supported Entity) Projects, then the Company will not be required to commence work on a new Project until one of the three Projects has been completed, terminated or if the Parties agreed to put a Project on hold in accordance with the terms of such Project; provided that the Company and the Foundation can work on more than three Projects in parallel if they mutually agree to do so. A Project is deemed to be completed if, as set forth in the respective project plan, no more work is to be performed on the Project by Company or its sublicensees, contractors or other collaborators. Any Project which has been terminated or put on hold shall no longer be considered an active Project for purposes of this Agreement. For the avoidance of doubt, there is no limitation on the number of Projects the Foundation can request the Company to perform (subject to the requirement that the Company is not required to work on more than three Projects at a time); provided that the Company is not obligated to accept an additional Project if the start of the proposed Project is scheduled to be after the expiry of the Project Commencement Period, but if a Project is commenced prior to the end of the Project Commencement Period, the Company will continue such Project to completion, even if this occurs after the end of the Project Commencement Period, provided, however, that the Foundation has no right to request to increase the scope of work after the end of the Project Commencement Period without the Company's consent.

(iii) Unless provided otherwise in a specific Project Agreement (as defined below), the Parties agree that any results, information, invention, patent right and other intellectual property right and any know how generated by or on behalf of the Company with respect to the Platform Technology and/or the Funded Developments shall be owned by the Company and the Company shall be responsible, in its sole discretion, to file, prosecute, maintain and defend such intellectual property rights.

(iv) The Company further agrees that it will not reject any Projects proposed by the Foundation unless the Company can demonstrate that accepting such Project would be reasonably likely to have a material adverse effect on the Company ("Good Reason"). By way of example, the Company agrees that it will not constitute Good Reason for the Company to reject a Project because the Company could make a higher profit by performing other work, but the Company will not be required to accept a Project on terms that would cause the Company to operate at a loss without any offsetting benefit.

(b) Access to Project Data and Information. Subject to Existing Agreements, the Company will [\*\*\*\*\*] to:

(i) Publish the results and information developed in connection with each Project within a reasonable period of time after such information or results are obtained in a manner that satisfies the requirement that such research be published in a form that is "available to the interested public" as described in Treasury Regulation 1.501(c)(3)-1(d)(5)(iii)(c)(2), which could include publication in a treatise, thesis, trade publication or a scientific journal, the presentation of a paper at a research conference or symposium and electronic publication, with due regard to delays or limitations on content of such publications that are necessary or useful (i) to protect the Company's intellectual property, trade secrets and confidential information covering, inter alia, the Platform Technology itself and/or (ii) to allow the Company to obtain any intellectual property rights based on the results and information developed in connection with each Project.

(ii) Promptly provide to the Foundation from time to time, upon the Foundation's request and with the agreement of the relevant Foundation-supported Entity (as appropriate), access to data and information regarding each Project, subject to the conclusion of a confidential disclosure agreement among the Foundation, the Company and, as necessary and appropriate and only upon the Company's prior written consent (not to be unreasonably withheld or delayed) the relevant Foundation-supported Entity.

(iii) Promptly provide to the Foundation from time to time, upon the Foundation's request, rights to share data and information developed in connection with each Project, with due regard to the need to protect confidential information and to avoid untimely public disclosures that may bar access to patent protection or public disclosures that may undermine trade secret protection.

(c) Manufacture of Access Country Doses. The Company agrees to manufacture Access Country Doses in an amount based on a rolling forecast provided by the Foundation to the Company of expected demand for Access Country Doses up to a maximum of [\*\*\*\*\*] of its New Facility Total Manufacturing Capacity (or the reasonable equivalent thereof in the event the New Facility is combined with or replaced by other manufacturing facilities, including, without limitation, as a result of a Change in Control). For such purpose, the Foundation will provide the Company with at least [\*\*\*\*\*] prior notice before it is required to begin manufacturing Access Country Doses. Unless and until such notice has been given by the Foundation, the Company will have the right to allocate 100% of its New Facility Total Manufacturing Capacity at the Company's discretion. For the avoidance of doubt, the Company will not be required to manufacture vaccines and drugs that have been developed by third parties (other than Foundation-supported Entities participating in any Project as provided above) unrelated to the Company using funds received from the Foundation.

(d) Non-exclusive License. Subject to the Existing Agreements, in connection with and relating solely to each Project the Company will grant the Foundation a worldwide, non-exclusive, perpetual, irrevocable, fully-paid up, royalty-free license to the Funded Developments and the background intellectual property Controlled by the Company that is covering the Platform Technology to the extent reasonably required to use, research, develop, make, sell, and offer-for-sale the Funded Developments for the specific Project, including the Products developed under such Project (the “**Global Access License**”), but any development, manufacture, sale, offer-for-sale, importation or distribution of products is limited to importation into and distribution to people in Access Countries in a manner consistent with the Foundation’s charitable purpose; provided that the Global Access License will only come into force (condition precedent) in the event of the Company’s insolvency, dissolution or an uncured Charitability Default (Section 8(a) shall apply accordingly). The Global Access License is sublicensable to (i) Foundation-supported Entities, (ii) to CROs and CMOs acting on behalf of the Foundation or the Foundation-supported Entities or (iii) to third party licensees of the Company who have entered into a collaboration and license or asset transfer agreement with the Company with respect to a pathogen covered under a Project, provided, however, that if such third party licensee refuses to enter into a sublicense agreement with the Foundation in spite of a good faith approach of the Foundation to conclude such sublicense agreement, the Foundation may grant a sublicense to any other third party. Any agreement to be concluded in the future under the Existing Agreements will have to respect and cannot limit or restrict the Global Access Commitments.

(i) The Company agrees to take such further actions, including technology transfer, as would be typical industry practice at the time for a company providing a license to a third party, to ensure that the Foundation (or its potential permitted sub-licensee) can effectively take advantage of the Global Access License if a triggering event occurs. Without limiting the foregoing, in connection with any Global Access License hereunder, the Company will take any actions reasonably necessary to grant the Foundation a license or sub-license to any third-party intellectual property applicable to the Platform Technology or the Funded Developments that is necessary to enable the Foundation to effectively take advantage of the Global Access License for the selected Projects.

(ii) Subject to the Existing Agreements, the Company shall permit the Foundation (or its sublicensees) the right to access and cross-reference any applicable IND, BLA or regulatory file Controlled by Company and relating to any Projects and shall, upon request, provide an electronic copy of each such file.

(e) The Global Access Commitments will be ongoing and will continue for as long as the Foundation continues to pursue its charitable mission except that the Company’s obligation to accept additional Projects (in lieu of abandoned Projects) will terminate upon expiry of the Project Commencement Period.

(f) The Company will provide to the Foundation the reports regarding program-related investments and such other reports as may be agreed upon between the Company and the Foundation and reasonable audit rights regarding the Company’s compliance with the use of the Foundation’s funds and the Global Access Commitments.

(g) Except for rights granted in the Existing Agreements as of the Effective Date, the Company will not grant to a third party any rights or enter into any arrangements or agreements that would limit or restrict the Foundation's rights related to the Global Access Commitments, including the Foundation's right during the Project Commencement Period to enter into Projects with the Company with respect to any Target Diseases and Conditions. For the avoidance of doubt, nothing in this Agreement prohibits the Company from entering into an agreement with a third party with respect to the development, manufacture and commercialization of a product for a Target Disease and Condition provided that such agreement does not limit or restrict the Company's ability to fulfill the Global Access Commitments, and the Foundation's consent will not be required for such an agreement. In order to confirm that CureVac's agreements with third parties relating to any Target Disease and Condition do not limit or restrict the Foundation's rights, CureVac agrees that it will include language substantially similar to the following in such agreements:

The Company and [third party] acknowledge that the Company and the Bill & Melinda Gates Foundation (the "Foundation") have entered into a Global Access Commitments Agreement (the "Global Access Agreement") pursuant to which the Company has agreed to work together with the Foundation on vaccine and drug development for certain Target Diseases and Conditions pursuant to the terms of the Global Access Agreement and any subsequent agreements entered into by the Company with respect to a particular project (each, a "Project Agreement"). The Company and [third party] agree that this [third party agreement] shall be subject to the terms of the Global Access Agreement and in no way shall this [third party agreement] limit or restrict the Foundation's rights or the Company's obligations pursuant to the Global Access Agreement or any existing Project Agreement. The Company and [third party] agree that the Foundation is a third party beneficiary of this provision and will have the right to enforce this provision in order to protect the Foundation's rights pursuant to the Global Access Agreement and any applicable Project Agreements. For the avoidance of doubt, unless otherwise agreed with the [third party], the Foundation has no claims to the results generated and to the intellectual property rights and know how Controlled by [third party]; provided that nothing in this [third party agreement] will limit or restrict the Global Access Commitments.

In the event the Company collaborates with a third party with respect to any Target Disease and Condition that becomes the subject matter of a Project hereunder, the Foundation and the Company will negotiate in good faith with such third party to attempt to combine the development efforts and align the respective project plans; provided that if the Foundation and the third party cannot reach agreement, the Foundation and the Company can proceed with such Project in accordance with the terms of this Agreement and the applicable Project Agreement.

(h) The Company and BMGF will mutually use reasonable and diligent efforts to execute and cause [\*\*\*\*\*] to execute an amendment substantially in the form attached hereto as Appendix 5, to the Option Agreement dated as of [\*\*\*\*\*] by and between the Company and [\*\*\*\*\*] as soon as reasonably possible.

**4. Representations, Warranties, Covenants of the Company.**

The Company hereby represents, warrants and covenants to the Foundation:

(a) **Project Diligence and Necessary Skill.** The Company will use all reasonable and diligent efforts to perform its obligations under a Project Agreement and to complete each Project and the Company has, and will maintain, the necessary expertise, personnel, facilities and equipment to perform each Project and its obligations under the Investment Documents.

(b) **Continuation of Business.** The Company will continue activity in those lines of business or in comparable new lines of business that are necessary to complete the Projects and to fulfill the Global Access Commitments for the Projects.

(c) **Compliance with Applicable Laws & Regulations.** The Company is in compliance and will remain in compliance in all material respects with all applicable laws and regulations (including all laws and regulations related to clinical trials, human health and safety, the protection of the environment, research, development and manufacture of vaccines and drugs intended for human use) necessary to enable the Company to perform its obligations under the Investment Documents and in connection with each Project, and as of the Effective Date the Company is not aware of any action filed or commenced against the Company alleging any failure to comply. The Company is and will remain in compliance with all applicable cGMPs, Good Clinical Practices, Good Laboratory Practices and Good Industry Practices. The Company is not aware of facts that (with or without notice or lapse of time, or both) could reasonably be expected to result in the Company being in violation in any material respect of any law materially applicable to the Company's performance of its obligations under the Investment Documents and in connection with each Project. The Company has in place and shall continue to maintain for the duration of its obligations under this Agreement and each Project, a compliance program reasonably designed to identify, prevent, and address any compliance issues.

(d) **Licenses and Permits.** The Company currently holds and will continue to hold all necessary foreign, federal, state, local and other governmental licenses, approvals and permits necessary to perform its obligations under the Investment Documents and in connection with each Project.

(e) **Records Compliance.** The Company will maintain, in accordance with and for the period required under cGMPs and applicable laws, complete and adequate records of the Funded Development pertaining to the methods, and the facilities, manufacture, procedures, testing and the like, related to each Project.

(f) **IP Due Diligence.** On the Effective Date, the Company has conducted commercially reasonable due diligence with respect to the Project Agreements, including intellectual property and freedom to operate analyses related to the Project Agreements. To the Company's knowledge on the Effective Date it owns or possesses sufficient legal rights to all trademarks, service marks, tradenames, copyrights, trade secrets, licenses, information and proprietary rights and processes and all patents necessary for its current business without any conflict with, or infringement of, the rights of others. On the Effective Date, the Company has not received any communications alleging that the Company has violated or, by conducting its business, would violate any of the patents, trademarks, service marks, tradenames, copyrights, trade secrets or other proprietary rights or processes of any other Person.

(g) **Product Modification.** In the event of any injunction or prohibition against the Company's manufacture, licensure, import, export, sale, offer-for-sale, distribution, or use of any Product by reason of infringement of a patent, proprietary, or intellectual property right, or if in Company's opinion any Product is likely to become the subject of a claim of infringement of a patent, proprietary, or intellectual property right the Company and the Foundation and/or the Foundation-supported Entity will, either: (a) procure (such as by licensing or otherwise) the right to continue to make, have made, import, export, sell, offer-for-sale, distribute, and use such Product, or (b) replace or modify such Product so it becomes non-infringing, but is equivalent or superior in terms of efficacy, quality and safety.

(h) **No Disputes.** The Company agrees to notify the Foundation of any claims with regard to any third party intellectual property or disputes with a third party with regard to a Product which arise during the term of this Agreement (including its commercialization, manufacture, sale, offer for sale, distribution, import, export and use as contemplated by the applicable Project).

(i) **Disqualification and Debarment.** On the Effective Date, the Company, its employees or contractors or agents are not and the Company will undertake reasonable efforts not to be, at the time of performance of any activity contemplated by this Agreement or in connection with any Project, (a) disqualified or debarred by any Governmental Authority for any purpose pursuant to applicable law or regulation or threatened with any such disqualification or debarment or (b) charged or convicted for conduct relating to the development or approval of, or otherwise relating to the regulation of, any Product under any applicable law or regulation.

(j) **Warranty.** Each Product is or will be manufactured by the Company (and/or its CMOs or partners) in conformity in all material respects with all applicable requirements of a vaccine or drug for human use, including all express and implied warranties related thereto.

(k) **Company is Sponsor.** In no event shall the Foundation be a sponsor of any trial, study, Product, registration, or marketing authorization or the like. Except as may be required by law, the Company shall not include the Foundation on any document relating to the foregoing or in any communication with any governmental or regulatory body without the express prior written consent of the Foundation. Any input, consultation, or communication to the Company by the Foundation or any Foundation-supported Entity shall not diminish the foregoing.

(l) **Insurance.** The Company will maintain liability, property, casualty, flood, and other insurance coverage (including product liability, clinical trial insurance) by such insurers and in such forms and amounts and against such risks as are generally consistent with the insurance coverage maintained by similarly-situated companies in like industries, including to address any risks applicable to the Projects.

(m) **Compliance with Confidentiality Obligations; No Infringement.** The Company shall perform its activities under this Agreement and in connection with each Project using reasonable efforts to prevent violation of any of its confidentiality obligations to any third party and violation or infringement of any third party trade secrets, patent rights or other intellectual property rights.

(n) **Full Power.** The Company has the full and unrestricted power and authority to enter into this Agreement, to perform its activities under this Agreement and in connection with each Project, and to disclose any information which it makes available to the Foundation under this Agreement or in connection with any Project.

5. **Representations, Warranties, Covenants of the Foundation**

The Foundation hereby represents, warrants and covenants to the Company:

(a) **Full Power.** The Foundation has the full and unrestricted power and authority to enter into this Agreement, to perform its activities under this Agreement and in connection with each Project, and to disclose any information which it makes available to the Company under this Agreement or in connection with any Project.

(b) **Compliance with Confidentiality Obligations; No Infringement.** The Foundation shall perform its activities under this Agreement and in connection with each Project using reasonable efforts to prevent violation of any of its confidentiality obligations to any third party and violation or infringement of any third party trade secrets, patent rights or other intellectual property rights.

(c) **Use of Product in Access Countries Only.** The Foundation acknowledges that the Company intends to take reasonable and diligent efforts to ensure that the Products intended for use in the Access Countries will be utilized in Access Countries only and to prevent parallel imports of such Products into non-Access Countries, which efforts may include the Company placing an indication on the packaging of the Products that they are for use in Access Countries only and are not to be exported into any other countries. If the Company reasonably believes that parallel imports of such Products outside the Access Countries are occurring, the Company will notify the Foundation and the Parties will cooperate in good faith to verify the circumstances and take such reasonable action as they mutually agree is necessary; provided that the Foundation will not be responsible for the actions of any third party or any actions outside of its control. For the avoidance of doubt and unless otherwise agreed, the Company is not required to arrange for the commercialization of Products in the Access Countries.

**6. Indemnification**

The Company will indemnify, hold harmless, and defend the Foundation and its co-chairs, trustees, directors, officers, employees, agents, representatives, consultants and grantees (collectively, the "**Indemnitees**") from and against any and all third party causes of action, claims, suits, legal proceedings, judgments, settlements, damages, penalties, losses, liabilities and costs (including reasonable attorneys' fees and costs) (each a "**Claim**") arising out of or relating to: (a) negligence or willful misconduct of the Company (including its officers, agents, employees, subgrantees, contractors or subcontractors) in connection with any Project; (b) bodily injury, death or property damage caused by any Project or Product; or (c) a material breach by the Company of any of its obligations, representations, warranties, or covenants under this Agreement or a Project Agreement, except, in each of the foregoing cases, the Company will have no obligation to indemnify, defend, or hold harmless the Foundation for any liability, loss, or expense to the extent resulting from the gross negligence or willful misconduct on the part of the Foundation.

The Company will have control over the defense and settlement of each Claim, with counsel of its own choosing; provided that the Company conducts the defense actively and diligently at the sole cost and expense of the Company and provided further that the Company will not enter into any settlement that adversely affects any Indemnitee without the applicable Indemnitee's prior written consent, such consent not to be unreasonably withheld or delayed. The Foundation will provide the Company, upon request and at no charge, with reasonable cooperation in connection with the defense and settlement of the Claim. Subject to the Company's rights above to control the defense and settlement of Claims, the Foundation and any Indemnitee may, at its own expense, employ separate counsel to monitor the defense of any Claim.

**7. Survival of Rights**

As a condition of any acquisition of the Platform Technology or the Company's manufacturing facilities directly, or through a Change in Control, the Global Access Commitments described above will survive and be assumed by the acquirer to the extent required to carry out the Global Access Commitments, and the Foundation shall have the right to review such provisions of the written agreement with such third party that relate to the assumption of the Global Access Commitments to confirm that the Global Access Commitments will survive and be assumed by the acquirer to the extent required to carry out the Global Access Commitments, and the Company will not grant to a third-party any rights to, or enter into any arrangements with respect to, the Platform Technology or its manufacturing facilities to the extent such rights or arrangements would prevent the Company (or any acquirer of the Platform Technology or manufacturing facilities) from fulfilling the above stated Global Access Commitments.

In order to confirm the Global Access Commitments will survive and be assumed by the acquirer, the Company will add language substantially similar to the following to its acquisition agreements with third parties:

The Company and [third party] acknowledge that the Company and the Bill & Melinda Gates Foundation (the "Foundation") have entered into a Global Access Commitments Agreement (the "Global Access Agreement") pursuant to which the Company has agreed to certain Global Access Commitments pursuant to the terms of the Global Access Agreement and subsequent agreements entered into by the Company with respect to particular projects (each, a "Project Agreement").

[Third party] agrees that the Global Access Agreement will continue in full force and effect following consummation of the transactions contemplated by this [acquisition agreement] and [third party] will ensure performance of the terms of the Global Access Agreement and that in no way shall this [third party agreement] limit or restrict the Foundation's rights or the Company's obligations pursuant to the Global Access Agreement or any existing Project Agreement. The Company and [third party] agree that the Foundation is a third party beneficiary of this [third party agreement] with respect to the Global Access Commitments and will have the right to enforce this provision in order to protect the Foundation's rights pursuant to the Global Access Agreement and any applicable Project Agreements.

8. **Withdrawal Right, Termination for Good Cause**

(a) **Charitability Default.** Each Party agrees that if it becomes aware of a Charitability Default it will promptly notify the other Party, and the Company shall thereafter provide to the Foundation a proposed strategy to remedy the Charitability Default, such strategy to be provided within [\*\*\*\*\*] of notification. Notwithstanding anything in this Agreement to the contrary, the Foundation will not lose any rights or remedies solely as a result of a failure to notify the Company after it becomes aware of a Charitability Default. In addition, the Company agrees to promptly notify the Foundation of any facts and circumstances it becomes aware of which - in its reasonable opinion - could reasonably cause a Charitability Default hereunder. If the Company fails to cure the Charitability Default within [\*\*\*\*\*] of notice of a Charitability Default (provided that such [\*\*\*\*\*] period will be extended by an additional [\*\*\*\*\*] if at the end of the [\*\*\*\*\*] period the Company demonstrates to the Foundation's reasonable satisfaction that despite the Company's reasonable and diligent efforts to cure the Charitability Default during the initial cure period, additional time is necessary) (the "**Cure Period**"), then, in addition to all other rights and remedies available at law or in equity, including the Global Access License set forth above and all other applicable remedies in the Investment Documents, the Foundation will have the withdrawal rights (the "**Withdrawal Right**") set forth in the Shareholders' Agreement.

(b) **Withdrawal Right.**

(i) The Company agrees that if for any reason the Withdrawal Right is removed from the Shareholders' Agreement or the Shareholders' Agreement is amended or terminated while this Agreement remains in effect, the terms of the Withdrawal Right will continue in full force and effect as if contained in this Agreement.

(ii) Notwithstanding any exercise of the Withdrawal Right, the Foundation will continue to be entitled to enforce its rights under the Global Access Commitments and in relation to any agreed Projects.

(iii) Irrespective of the Project Commencement Period, the Company has the right to terminate this Agreement without any survival of any provision of this Agreement for good cause if the Foundation does not make an initial investment in the Company (by payment into the capital reserves and the nominal capital of the Company) in the amount set forth in the definition of Financing Round I in the Shareholders' Agreement (the "**Initial Investment**") by [\*\*\*\*\*] and the default on payment of the Initial Investment is not cured within [\*\*\*\*\*] after the Foundation receives a respective payment request from the Company.

**9. Required Reporting**

In addition to any and all reports required to be delivered to the Foundation under the Investment Documents, the Company shall furnish, or cause to be furnished, to the Foundation the following reports and certifications:

(a) Within [\*\*\*\*] after the end of the Company's fiscal year during which the Foundation owns any shares of stock of the Company, a certificate from the Company signed by an officer or director of the Company and substantially in the form attached to this Agreement as Appendix 6, certifying that the requirements of the Foundation Investment were met during the immediately preceding fiscal year, describing the use of the proceeds of the Foundation Investment and evaluating the Company's development of the Platform Technology and use of the Platform Technology to advance drug and vaccine candidates in support of the Foundation's Charitable Purpose, and progress on the New Facility, and the Projects including, specifically, information regarding progress against the Global Access Commitments;

(b) Within [\*\*\*\*] after the end of the Company's fiscal year during which the Foundation ceases to own any shares of stock of the Company, a certificate from the Company signed by an officer or director of the Company and substantially in the form attached to this Agreement as Appendix 7, certifying that the requirements of the Foundation Investment were met during the term of the Foundation Investment, describing the use of proceeds of the Foundation Investment and evaluating the Company's development of the Platform Technology and use of the Platform Technology to advance drug and vaccine candidates in support of the Foundation's Charitable Purpose, and progress on the New Facility, and the Projects including, specifically, information regarding progress against the Global Access Commitments;

For the avoidance of doubt, if the Company has provided timely reports pursuant to Sections 9(a) and 9(b) that contain information sufficient to enable the Foundation to discharge any expenditure responsibility of the Foundation, within the meaning of Sections 4945(d)(4) and 4945(h) of the Code, with respect to the Foundation Investment, the Company will not be liable for a Charitability Default pursuant to Sections 9(a) or 9(b).

(c) Any other information respecting the operations, activities and financial condition of the Company as the Foundation may from time to time request to discharge any expenditure responsibility of the Foundation, within the meaning of Sections 4945(d)(4) and 4945(h) of the Code, with respect to the Foundation Investment, and to otherwise monitor the charitable benefits intended to be served by the Foundation Investment (the Foundation will pay the reasonable costs associated with preparing such information at its request);

(d) At least [\*\*\*\*], full and complete financial reports of the type ordinarily required by commercial investors under similar circumstances; and

(e) During the Project Commencement Period, within [\*\*\*\*] of the end of each calendar quarter, Company will (A) provide the Foundation with written reports in form and detail reasonably satisfactory to the Foundation and confer with the Foundation (by teleconference or in scheduled site visits as appropriate) regarding progress with respect to the Projects including information regarding progress against the Global Access Commitments and (B) coordinate with the Foundation to determine reasonable times for the Foundation's representatives to make site visits to the Company's facilities and to conduct any inspections with respect to the Projects. Such site visits may be conducted in [\*\*\*\*] by a consultant selected by the Foundation and approved by the Company (such approval not to be unreasonably withheld or delayed) who is subject to a confidentiality agreement that is reasonably acceptable to the Company and the Foundation.

**10. Assignment by Foundation**

Notwithstanding anything in this Agreement to the contrary, the Foundation will have the right to assign this Agreement to (a) any successor charitable organization of the Foundation from time to time that is a tax-exempt organization as described in Section 501(c)(3) of the Code, or (b) any tax-exempt organization as described in Section 501(c)(3) of the Code controlled by one or more trustees of the Foundation. The Foundation will notify the Company of any such assignment, including the identity of the assignee, in a timely manner. For the avoidance of doubt, if the Foundation transfers the Shares as permitted by this section, the Foundation may assign to any such transferee all of its rights attached to such Shares, including the Withdrawal Right.

**11. Access to Records**

The Company shall maintain books and records adequate to provide information ordinarily required by commercial investors under similar circumstances. The Company shall provide the Foundation or its designee(s) access at reasonable times to such books and records pertaining to the period during which the Foundation owned any shares of stock of the Company and continuing for a period of [\*\*\*\*] after the later of: (a) the date on which the Foundation no longer owns any shares of stock of the Company or (b) the date on which this Agreement is no longer in effect. Notwithstanding the foregoing, as long as the funds from the Foundation Investment are fully expended prior to the [\*\*\*\*] anniversary of the Effective Date, the Company shall not be required to maintain or provide the Foundation access to such books and records for more than [\*\*\*\*] from generation of the individual information. For the avoidance of doubt, the Foundation's access to records under this Section shall not be dependent upon the Foundation's percentage ownership in the Company.

**12. Public Reports**

The Foundation may include information about the Company in its periodic public reports to the extent such information is not confidential, except as otherwise may be required by applicable law.

**13. Prohibited Uses**

The Company shall not expend any proceeds of the Foundation Investment to carry on propaganda or otherwise to attempt to influence legislation, to influence the outcome of any specific public election or to carry on, directly or indirectly, any voter registration drive, or to participate or intervene in any political campaign on behalf of or in opposition to any candidate for public office within the meaning of Section 4945(d) of the Code. The proceeds of the Foundation Investment shall not (a) be earmarked to be used for any activity, appearance or communication associated with the activities described in the foregoing sentence, nor (b) be intended for benefit, and will not benefit, any Person having a personal or private interest in the Foundation, including descendants of the founders of the Foundation, or Persons related to or controlled by, directly or indirectly, such private interests.

**14. Disqualified Person**

To the knowledge of each of the Foundation and the Company: (1) the Company is not a “disqualified person” with respect to the Foundation (as the term “disqualified person” is defined in Section 4946(a) of the Code), and (2) no disqualified person with respect to the Foundation owns any of the Company’s outstanding stock, and (3) the Foundation does not, and one or more disqualified persons with respect to the Foundation do not, directly or indirectly, control Company.

**15. Compliance with Anti-Corruption, Anti-Bribery and Anti-Terrorism Laws**

The Company will not offer or provide money, gifts or any other thing of value, directly or indirectly, to anyone in order to improperly influence any act or decision relating to the sale of the Company’s products and services or the other matters contemplated by this Agreement, including by assisting any party to secure an improper advantage. Training and information on anti-bribery act compliance requirements is available here: [www.learnfoundationlaw.org](http://www.learnfoundationlaw.org).

The Company will not use any proceeds of the Foundation Investment, directly or indirectly, in support of activities (i) prohibited by US laws related to combatting terrorism; (ii) with any Person on the List of Specially Designated Nationals ([www.treasury.gov/sdn](http://www.treasury.gov/sdn)) (a “Listed Person”) or any Person that is, directly or indirectly, controlled by a Listed Person or in which a Listed Person, directly or indirectly, holds a significant ownership interest; or (iii) with or related to countries against which the US maintains a comprehensive embargo (currently, Cuba, Iran, (North) Sudan, Syria, and North Korea), unless such activities are fully authorized by the US government under applicable law and specifically approved by the Foundation in its sole discretion.

**16. Use of Name**

Each of the Foundation and the Company may include information on this investment in its periodic public reports or other documents required to be filed with governmental authorities, if any. In addition, the Foundation and the Company may make the investment public at any time on their web pages and as part of press releases, public reports, speeches, newsletters and other public documents. Any announcement of the Foundation Investment by any other Person, will require the Company’s and Foundation’s prior written approval. Any other use of the Foundation’s or the Company’s name or logo in any respect depends upon their respective pre-approval in writing. Notwithstanding the foregoing, the Foundation’s name and logo will not be used by any Person in any manner to market, sell or otherwise promote the Company, its products, services and/or business.

**17. Entire Agreement; Modification**

This Agreement and the other Investment Documents, including all exhibits hereto and thereto, the Confidentiality Agreement executed between the Parties on June 6, 2012, and the Project Agreements set forth all the covenants, promises, agreements, warranties, representations, conditions and understandings between the Parties with respect to the subject matter of the Investment Documents, and supersede and terminate all prior agreements, negotiation and understandings between the Parties, whether oral or written, with respect to such subject matter. No subsequent alteration, modification, amendment, change or addition to this Agreement shall be binding upon the Parties unless reduced to writing and signed by the respective authorized officers of the Parties. For the avoidance of doubt, to the extent any other Investment Document conflicts with any provisions of this Agreement that are required by the Code, the provisions of this Agreement shall control.

18. **Confidentiality**

(a) During the course of this Agreement and the Project Agreements each Party (as a “**Disclosing Party**”) may disclose certain Confidential Information owned or rightfully possessed by it to the other Party (as the “**Receiving Party**”). For the purposes of this Agreement, “**Confidential Information**” means all information, including data, communicated by the Disclosing Party to the Receiving Party in either (i) a documentary or written form, marked as confidential, or (ii) in an oral form, in which case a written record, marked as confidential, shall be provided to the Receiving Party within [\*\*\*\*\*] of the oral disclosure for the information to be considered as Confidential Information; provided that a written record of an oral disclosure will not be required if based on the nature of the information or circumstances surrounding its disclosure, the Receiving Party should reasonably regard such information as Confidential Information.

(b) Each Party, as a Receiving Party, agrees that it will (i) use the Confidential Information received from a Disclosing Party solely for the purposes contemplated by this Agreement and the Project Agreements and (ii) treat the Confidential Information of the Disclosing Party as it would treat its own confidential information but in no event less than reasonable care to avoid disclosure of the Confidential Information to any third party (which, for the avoidance of doubt, includes any Foundation-supported Entities), person, firm or corporation that is not bound by confidentiality and restricted use obligations at least as strict as those set out herein or as otherwise expressly stated herein.

(c) Notwithstanding anything to the contrary in this Agreement, the Receiving Party shall have no obligation with respect to the Confidential Information received from a Disclosing Party to the extent such information is and which the Receiving Party is clearly able to demonstrate: (i) already known by the Receiving Party at the time of disclosure as evidenced by written documentation; (ii) publicly known, or subsequently becomes publicly known, without the wrongful act or breach of this Agreement by the Receiving Party; (iii) rightfully received by the Receiving Party from a third party having the lawful right to make such a disclosure, where said disclosure is rightfully made without any obligation of confidence to the Disclosing Party; (d) approved for release or disclosure by written authorization of the Disclosing Party; (e) independently developed by or for the employees or agents of the Receiving Party or its Affiliates without the use or knowledge of the Confidential Information provided by the Disclosing Party; or (f) required to be disclosed pursuant to any competent judicial or government request, requirement or order, provided that the Receiving Party so disclosing takes reasonable steps to provide the Disclosing Party with sufficient prior notice in order to allow the Disclosing Party to contest such request, requirement or order, and provided further that such Confidential Information is disclosed only subject to reasonably available restrictions on further disclosure and use, and otherwise remains subject to the obligations of confidentiality and restricted use set forth in this Agreement.

(d) Each Receiving Party shall be entitled to disclose the Disclosing Party’s Confidential Information to its employees, board members as well as its agents and consultants who are bound by confidentiality and restricted use obligations no less strict than those set out herein.

(e) Subject to exemptions and limitations elsewhere in this Agreement, the obligations of confidentiality of Confidential Information shall remain in effect for a period of seven years from the date the Confidential Information is communicated to the Receiving Party; provided that this period is extended to [\*\*\*\*\*] with regard to any Confidential Information disclosed pursuant to the DARPA-agreements, which information the Company has identified as being subject to such longer confidentiality period pursuant to the DARPA agreements.

(f) For the avoidance of doubt, the Confidential Disclosure Agreement entered into by the Parties effective as of June 6, 2012 (the “**Initial Confidentiality Agreement**”), and Article 6 (“Confidentiality”) of the Framework Agreement for Cooperation entered into between the Parties effective December 11, 2013 (the “**Framework Agreement**”) are terminated as of the Effective Date. All Confidential Information (as defined in either the Initial Confidentiality Agreement or the Framework Agreement) that was disclosed by a Disclosing Party to a Receiving Party prior to the Effective Date, is deemed to be Confidential Information as defined in and for purposes of this Agreement and is subject to the protections and terms set forth herein for the term specified in this Agreement.

**19. Specific Performance**

The Company acknowledges and agrees that the Foundation would be damaged irreparably in the event any of the provisions of this Agreement are not performed in accordance with their specific terms or otherwise are breached or violated. Accordingly, the Company agrees that the Foundation will be entitled to seek an injunction or injunctions to prevent breaches or violations of the provisions of this Agreement and to enforce specifically this Agreement and the terms and provisions hereof in any action instituted in any court having jurisdiction over the Parties and the matter in addition to any other remedy to which it may be entitled, at law or in equity. The Company further agrees that, in the event of any action for specific performance in respect of such breach or violation, it will not assert the defense that a remedy at law would be adequate.

**20. Authority**

Each of the Company and the Foundation covenants, represents and warrants with respect to itself that it has all authority necessary to execute this Agreement and that, on execution, this Agreement will be fully binding and enforceable in accordance with its terms, and that no other consents or approvals of any other Person or third parties are required or necessary for this Agreement to be so binding.

**21. Governing Law**

This Agreement is made pursuant to, and shall be construed and enforced in accordance with, the laws of the State of New York, U.S.A. irrespective of the principal place of business, residence or domicile of the Parties hereto and without giving effect to otherwise applicable principles of conflicts of law that would give effect to the laws of another jurisdiction.

**22. Expenses**

Each of the Parties shall bear and pay for all of its own costs, fees and expenses (including legal, accounting and other professional or advisory fees and expenses) incurred or to be incurred by it, in each case, in negotiating and preparing this Agreement.

**23. Dispute Resolution**

The Parties will resolve any dispute, controversy or claim arising out of or relating to this Agreement, or the breach, termination or invalidity hereof ("**Dispute**") in accordance with this Section 23.

(a) [\*\*\*\*\*]

(b) [\*\*\*\*\*]

[\*\*\*\*\*]

(c) [\*\*\*\*\*]

(d) [\*\*\*\*\*]

24. **Waiver**

Failure or delay by either Party in exercising or enforcing any provision, right, or remedy under this Agreement, or waiver of any remedy hereunder, in whole or in part, shall not be deemed a waiver thereof, or prevent the subsequent exercise of that or any other rights or remedy.

25. **Further Assurances**

From time to time after the Effective Date, each Party shall execute, acknowledge and deliver to each other any further documents, assurances, and other matters, and will take any other action consistent with the terms and conditions of this Agreement, that may reasonably be requested by a Party and necessary or desirable to carry out the purpose of this Agreement.

26. **Interpretation**

The headings contained in this Agreement are for reference purposes only and shall not affect in any way the meaning or interpretation of this Agreement. Whenever the words “include,” “includes” or “including” are used in this Agreement, they shall be deemed to be followed by the words “without limitation.”

27. **Counterparts**

This Agreement may be executed in one or more counterparts, including by signatures delivered by facsimile or pdfs, each of which shall be deemed an original, but all of which shall be deemed to be and constitute one and the same instrument.

[OFFICER'S/DIRECTOR'S] CERTIFICATE

CUREVAC GMBH

[DATE]

This certificate is being delivered by CureVac GmbH is a private, for-profit company having its business address at Paul-Ehrlich-Str. 15, 72076 Tübingen (the "Company"), pursuant to Section 9(a) of the Global Access Commitments Agreement between the Company and the Bill & Melinda Gates Foundation dated as of [ ] (the "Agreement"). Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to them in the Agreement.

The Company certifies as follows:

1. During the fiscal year ended [DATE], the Company met the requirements of the Foundation Investment as set forth in the Agreement that were required to be complied with or performed by the Company during such time period.
2. Attached as Exhibit A to this certificate is a description of the Company's use of proceeds of the Foundation Investment during the fiscal year ended [DATE].
3. Attached as Exhibit B to this certificate is the Company's evaluation of the Company's development of the Platform Technology and use of the Platform Technology to advance drug and vaccine candidates in support of the Foundation's Charitable Purpose, and progress with respect to the New Facility and Projects, including information regarding progress against the Global Access Commitments (as set forth in the Investment Documents) during the fiscal year ended [DATE].

IN WITNESS WHEREOF, the undersigned has executed this certificate and has caused this certificate to be delivered on the date first above written.

AMENDMENT NO. 2 TO THE  
OPTION AGREEMENT

[\*\*\*\*\*]

---

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

**Definitive Agreement and Project Collaboration Plan for  
Assessment of RNA Vaccine Technology for Non-live Rotavirus Vaccines  
in Pre-clinical Models**

This Project Agreement (the "*Agreement*") is entered into by and between:

- (a) Bill & Melinda Gates Foundation (the "*Foundation*"), an independent, privately-endowed charity; and
- (b) CureVac GmbH ("*CUREVAC*"), a private, for-profit company having its business address at Paul-Ehrlich-Str. 15, 72076 Tübingen,

Each entity may be referred to individually as a "*Party*" and together as the "*Parties*".

This Agreement is effective as of May 15, 2014 (the "*Effective Date*") and will end on [\*\*\*\*\*] (the "*End Date*").

WHEREAS,

- CUREVAC and the Foundation have entered into a Framework Agreement for Cooperation having an effective date of December 11 2013 ("*Framework Agreement*");
- Under the Framework Agreement, CUREVAC and the Foundation agreed to cooperate to establish projects to pursue R&D of new candidate vaccines in the preclinical and, if appropriate, clinical phases up to and including [\*\*\*\*\*] clinical trials, acting at all times in accordance with all applicable laws, regulations and other legal standards;
- Article 2 of the Framework Agreement requires the Parties to establish a definitive binding agreement, which agreement will reflect the intent of the Framework Agreement including such terms and conditions as may be agreed in good faith between the Parties;
- Moreover, that Article 2 states that once the Parties agree to pursue a given project, they will agree in writing on a project plan ("*Project Collaboration Plan*"), including work to be undertaken, responsibilities, participation by other parties, timelines and milestones, project management, contributions in-kind and funding requirements;
- This Agreement embodies the definitive binding agreement referred to in Article 2 of the Framework Agreement and contains, in Appendix 1, a Project Collaboration Plan, also as referred to in that Article 2;
- The Parties contemplate that as and when the Parties agree to additional projects, such projects will be documented and agreed in written and signed agreements. Such agreements may take the form, as applicable and agreed by the Parties, of either (a) grant agreements, or (b) other agreements that to the extent appropriate and possible, retain the text of the body of this Agreement to the fullest extent consistent with the work to be undertaken and necessary changes to the Appendix 1 to reflect the different work to be undertaken under such new projects.

**1. Project Collaboration Plan**

1.1 During the term of this Agreement, CUREVAC agrees to undertake activities as agreed in the Project Collaboration Plan contained in Appendix 1 (the "Activities"). CUREVAC will perform the Activities described in the Project Collaboration Plan in accordance with the terms of the Project Collaboration Plan and this Agreement. Unless Appendix 1 expressly provides otherwise, the terms in the body of this Agreement will prevail over any conflicting terms contained in Appendix 1.

1.2 The Foundation will pay CUREVAC in accordance with the terms of Appendix 1 and this Agreement. The Foundation will not be obligated to pay CUREVAC for work performed or expenses incurred prior to the Effective Date of this Agreement.

**2. Independent Contractor and Work Authorization**

2.1 In performing the Activities, CUREVAC will not represent itself as an employee or agent of the Foundation. CUREVAC has no authority to obligate the Foundation by contract or otherwise. CUREVAC is not entitled to receive any employee benefits of the Foundation. Neither Party may include the name or mark of the other Party in business cards, letterhead, or email signatures.

2.2 CUREVAC is fully responsible for securing work authorization, as required, for all jurisdictions in which CUREVAC performs the Activities. CUREVAC's failure to secure required work authorization may result in the Foundation's immediate termination of this Agreement, at the discretion of the Foundation.

2.3 When requested, CUREVAC will provide the Foundation with a copy of any required work authorization (e.g., Form I-9 for U.S. work).

**3. Taxes**

3.1 The Foundation will withhold and remit applicable taxes due as a result of the Foundation providing funding for the Activities carried out by CUREVAC under this Agreement (e.g., India Tax Deducted at Source and U.S. Internal Revenue Code §1441). CUREVAC is responsible for remitting all other taxes related to: (a) the performance of the Activities or retailing of goods (e.g., business & occupation tax, employment-related taxes, sales tax, country-specific service tax, and country-specific VAT); and (b) CUREVAC's receipt of payments under this Agreement (e.g., income tax). Upon request, CUREVAC will provide the Foundation documentation verifying the remittance of such taxes. The Foundation will not withhold any amounts for employment-related taxes, but in certain circumstances as required by applicable law, the Foundation may withhold income tax. If applicable, this withholding will be addressed in Appendix 1.

3.2 CUREVAC will provide the Foundation with the requisite tax documentation, as requested by the Foundation (e.g., Form W-9, Form W-8BEN).

4. **Subcontractors.** CUREVAC will not use subcontractors (“*Subcontractor*”) to perform any Activities without the Foundation’s prior approval other than those Subcontractors specified in Appendix 1, to be updated according to the following process. Foundation shall not unreasonably withhold approval for CUREVAC’s use of Subcontractors, provided that CUREVAC provides the Foundation with the name and contact information for each Subcontractor prior to its engagement and permits the Foundation reasonable time so that it can conduct any required due diligence and conflict checks. Notwithstanding the forgoing, the Foundation reserves the right to reject any Subcontractor as a result of Foundation’s due diligence or conflicts checks or due to a Subcontractor’s inability or unwillingness to abide by the terms of this Agreement or any failure to comply with applicable laws, regulations or rules. CUREVAC will be responsible to the Foundation for all acts and omissions of CUREVAC’s Subcontractors and their compliance with the terms of this Agreement. CUREVAC will pay all Subcontractor fees and expenses directly.

5. **Security.** To the extent CUREVAC is permitted physical or electronic access to the Foundation’s facilities or systems, or is provided a Foundation email address, CUREVAC will comply with all Foundation security, facility, IT, and other applicable policies and procedures, as made available by the Foundation and updated from time to time, including but not limited to any policies on required background screening.

**6. Confidentiality and Publicity**

6.1 “*Confidential Information*” whether written, oral, or observed is defined as: (a) the terms and conditions of this Agreement and the Appendices; (b) Project Materials as defined in Section 7 of this Agreement; (c) information relating to the Foundation’s strategy, finances, investments, grant agreements, contracts, existing or prospective grantees, non-publicized or prospective grants, co-chairs, property, guests, or internal events; and (d) any other information the Foundation or CUREVAC label or indicate should be treated as confidential and/or proprietary. For the purposes of this Agreement this Section 6 substitutes in its entirety Article 6 of the Framework Agreement on “Confidentiality” including, in particular, how Confidential Information is defined and treated in connection with performance of the Activities described in the Project Collaboration Plan.

6.2 Each Party will use Confidential Information disclosed by the other Party only to perform the Activities and, except as otherwise provided in this Agreement or the Appendices, a Party receiving Confidential Information from a disclosing Party will not disclose such Confidential Information of the disclosing Party to any third party without the disclosing Party’s prior written consent. A receiving Party may disclose Confidential Information of a disclosing Party: (a) on a “need-to-know-basis” to its employees, board members, consultants, agents, representatives, trustees, officers and Subcontractors performing the Activities under this Agreement, provided the employees, board members, consultants, agents, representatives, trustees, officers and Subcontractors have agreed to comply with the requirements of this Section; and (b) to the extent required by law, regulation, or court order, provided that, in such event, the receiving Party provides the disclosing Party with as much advance notice as is feasible and permitted by law.

The obligations of this Section will survive for a period of [\*\*\*\*\*] following the expiration or termination of the Agreement.

6.3 The provisions of this Section will not apply to information or material that: (a) is generally available as part of the public domain prior to disclosure by or on behalf of a disclosing Party, or becomes so available through no fault of the receiving Party; (b) is developed independently by the receiving Party or is received by a receiving Party from a third party (with no breach of any duty owed by the third party to the disclosing Party) independent of performing the Activities, (c) is required to be disclosed under an applicable law, regulation or court order; or (d) is agreed in writing by the Party owning or controlling such information or materials.

6.4 Neither Party may use the other Party's name or marks for any promotional purpose or otherwise, nor will it refer to this Agreement or its Appendices or use the other Party's name or marks in any publicly available materials, including any news release or public announcement, without the other Party's prior written consent. Notwithstanding the foregoing the Parties agree that either Party may use the name or the mark of the other Party for stating the existing collaboration between the Parties based on this Agreement.

6.5 Each Party acknowledges that the other Party will have no adequate remedy at law if the Party breaches the terms of this Section. In such event, the non-breaching Party will have the right, in addition to any other available rights, to seek in any court of competent jurisdiction, injunctive or other relief to restrain any breach or threatened breach of this Section.

6.6 The Parties agree that each Party may, following the Effective Date, issue a press release describing this Agreement in general terms, provided that the content of any such press release shall first be approved by the other Party; such approval shall not be unreasonably withheld or delayed.

6.7 As provided in Section 9.5, the provisions of this Section will remain in force after completion or termination of this Agreement and the Appendices.

## 7. Intellectual Property

7.1. For the purposes of this Section and the Agreement as a whole, the following definitions apply:

- a. "IPR" means any patent, registered design, copyright, database right, design right, topography right, trade mark, service mark, application to register any of the aforementioned rights, trade secret, right in unpatented know-how, right of confidence and any other intellectual or industrial property right of any nature whatsoever (including in inventions) in any part of the world;
- b. "Background IPR" means IPR owned by any of the Parties prior to the Effective Date or developed independently of the Activities under this Agreement used for the Activities and CUREVAC Background IPR shall be construed accordingly and is listed in Appendix 5;
- c. "Project IPR" means IPR created in the course of the performance of the Activities.

7.2. All Background IPRs disclosed or used in the performance of the Activities by CUREVAC are and shall remain the exclusive property of CUREVAC (or where applicable the third party from whom CUREVAC derives the right to use such IPRs).

7.3. Appendix 1 to this Agreement includes a Global Access plan that describes the principles of Global Access undertaken by the Parties. To enable the appended Global Access plan to be fully enabled, CUREVAC shall promptly disclose to the Foundation all materials, processes, techniques, works of authorship, and data, ("*Project Materials*") and Project IPRs created by CUREVAC, either alone or jointly with others, as a direct result of performing the Activities. If Project Materials and/or Project IPRs (including inventions) are created by or under the direction of one of the Parties to this Agreement during the course of the Activities that Party shall promptly make a disclosure of such Project Materials and Project IPRs to the other Party and such disclosure shall, unless otherwise defined in this Agreement, be the Confidential Information of the disclosing Party.

7.4. Unless agreed by both CUREVAC and the Foundation to the contrary with any third party involved in the Activities, all Project Materials and Project IPRs created during performance of the Activities shall belong to CUREVAC.

7.5. Any and all decisions relating to the filing, prosecution and maintenance of patents that disclose and claim inventions that are Project IPRs, shall be at the discretion of CUREVAC. The Foundation shall, however, during the course of this Agreement have the right to review and provide comments on patent filing strategy - including whether Project IPR should be the subject of a patent application or should be dedicated to the public domain - and all draft patent applications. The Foundation may provide such comments either directly or through a representative of its choice and such comments shall be provided no later than [\*\*\*\*\*] after notification by CUREVAC and at its own expense. CUREVAC shall reasonably take into consideration all the Foundation's comments. All costs associated with the drafting, filing and prosecution of patent applications directed to Project IPRs shall be borne by CUREVAC, provided that CUREVAC shall be under no obligation to seek patent protection and/or maintain patents. If during this Agreement, CUREVAC determines not to continue to prosecute and/or maintain patent protection for Project IPR, CUREVAC shall inform the Foundation and allow the Foundation not less than [\*\*\*\*\*] to take over responsibility for the prosecution and maintenance of such applications and patents, in which case the responsibility, costs related to the assignment of the Project IPR as well as any future costs and rights relating to the relevant inventions and ownership thereof shall vest in the Foundation. In the event that the Foundation takes over the responsibility for such patent applications and patents, CUREVAC shall retain a non-exclusive, sublicensable, world-wide, perpetual, fully paid-up, royalty-free license for any and all purposes under Project IPRs disclosed and claimed therein.

#### **8. Indemnification.**

8.1 CUREVAC will indemnify, hold harmless, and defend the Foundation and its trustees, officers, employees, representatives and agents from and against any and all third party causes of action, claims, suits, legal proceedings, judgments, settlements, damages, penalties, losses, liabilities and costs (including reasonable attorneys' fees and costs) (each a "*Claim*") arising out of or caused by: (a) CUREVAC's breach of this Agreement; (b) CUREVAC's willful misconduct, or negligent act or omission, (c) CUREVAC's conduct of Activities; (d) CUREVAC's violation of any applicable laws or regulations, including failure to comply with any applicable taxing authority; (e) CUREVAC's infringement, misappropriation, or violation of the valid intellectual property rights of any third party; (f) any and all employment related claims whatsoever made in connection with the performance of Activities under this Agreement and the Appendix 1; and (g) personal injury or unemployment compensation Claims made by CUREVAC's employees or any Subcontractors, notwithstanding any protections CUREVAC might otherwise have under applicable workers' compensation or unemployment insurance law. The Foundation may, at its own expense, employ separate counsel to monitor and participate in the defense of any Claim under this Section.

8.2 In any case of liability according to Section 8.1 and to any other provision of this Agreement CUREVAC will only be liable for willful conduct or gross negligence. Under no circumstances CUREVAC shall be liable for punitive, incidental, consequential or indirect damages.

**9. Term and Termination**

9.1 This Agreement will commence on the Effective Date and will remain in effect until terminated by either Party as provided in this Section.

9.2 Either Party may terminate the Agreement (a) upon [\*\*\*\*\*] prior written notice, with or without cause; (b) if a Party fails to cure a material breach of the Agreement within [\*\*\*\*\*] of written notice of such breach; (c) in the event that performance of the Activities infringes or otherwise violates the intellectual property rights of any third party; or (d) as otherwise mutually agreed by the Parties.

9.3 CUREVAC will be entitled to compensation (pursuant to the compensation terms stated in Appendix 1) for Activities performed or expenses incurred in compliance with this Agreement through the effective date of termination. However, CUREVAC must use commercially reasonable efforts to stop performing Activities or incurring expenses under this Agreement and its Appendix 1 as soon as possible after receiving notice of termination. Within [\*\*\*\*\*] of the effective date of termination, CUREVAC will provide a final invoice reflecting any and all un-billed compensation and expenses for Activities performed pursuant to the Appendix 1 through the effective date of termination. The Foundation's payment of CUREVAC's final invoice will represent satisfaction in full of any and all fees, expenses, and other obligations by the Foundation to CUREVAC with regard to the Activities performed pursuant to Appendix 1. CUREVAC will promptly refund to the Foundation any payment made to CUREVAC and not applicable to initiated activities as of the effective date of termination. The Foundation will incur no liability to CUREVAC or its subcontractors for damages of any kind resulting solely from terminating this Agreement in accordance with its terms.

9.4 Upon the expiration or early termination of this Agreement, if requested by the disclosing Party, the receiving Party will promptly return to the disclosing Party all Confidential Information of the disclosing Party and copies of Project Materials (final or in process) specifically requested by the disclosing Party provided however that such disclosed Confidential Information or Material belongs to the receiving Party and CUREVAC shall be entitled to retain the original Project Materials.

9.5 Sections 3, 4, 5, 6, 7, 8, 9, and 11-17 will survive the termination of this Agreement for any reason.

**10. Insurance.** CUREVAC will maintain (and upon request provide evidence of) insurance necessary to meet its liability obligations under this Agreement and the Appendix 1, provided that the amounts of coverage will be no less than that specified in the commercial general liability insurance held by CUREVAC shortly before the Effective Date and as set out in Appendix 3; and (b) statutory workers' compensation in the amount required by law. CUREVAC will be solely responsible for the payment of all premiums and deductibles under any such policy and will notify the Foundation of any material change in the type or the amount of coverage provided under each policy.

**11. Warranties.** CUREVAC warrants that: (a) the Activities will be performed faithfully, diligently, to the best of its ability and in a professional and workmanlike manner; (b) the Activities will be performed in compliance with all applicable laws and regulations; (c) to the best of its knowledge, the Project Materials and Activities provided by CureVac will not infringe, misappropriate or violate the rights of any third party (CUREVAC notes that the disclosures in the attached Appendix 3 are or may be subject to third party disputes, such Appendix 3 might be amended from time to time); (d) it has full power and authority to enter into this Agreement, and by signing this Agreement, to bind CUREVAC and its affiliates, successors and assigns; and (e) that it has the right to perform the Activities in accordance with this Agreement.

Each Party warrants that: (a) it will perform its obligations under this Agreement in compliance with all applicable laws and regulations; (b) it has full power and authority to enter into this Agreement, and by signing this Agreement, to bind itself, and its successors and assigns; and (c) entering into this Agreement will not cause a breach of any of the its obligations towards any third party.

## **12. Anti-Corruption, Anti-Bribery and Terrorist Financing**

**12.1 Anti-Corruption and Anti-Bribery:** In connection with this Agreement, CUREVAC will ensure that no payments, gifts or other items of value have been or will be offered, received, provided or authorized by or on behalf of CUREVAC to or from any individual in violation of the UK Bribery Act, the US Foreign Corrupt Practices Act or any similar anti-bribery legislation applicable to this Agreement, the Parties, or the jurisdiction in which the Activities are performed or business is transacted.

**12.2 Terrorist Financing:** CUREVAC will not transact business with, or provide material support or resources directly or indirectly to, or permit Foundation payments to be transferred directly or indirectly to any individual, corporation or other entity that the CUREVAC knows, or has reason to know, supports, advocates, facilitates, or participates in any terrorist activity (including without limitation to any individual or organization identified by the U.S. government as a Foreign Terrorist Organization, a Specially Designated Terrorist, or a Specially Designated Global Terrorist).

**12.3** In addition to other remedies available under this Agreement, the Foundation may recover from CUREVAC the amount or value of any prohibited payment described in Section 12.1 or 12.2, as well as the amount of any loss resulting from termination of this Agreement under Section 9.2(b) for reason of any prohibited payment described in Section 12.1 or 12.2.

**13. Affiliates.** With the exception of Activities performed by a Subcontractor in accordance with Section 4, all Activities performed under this Agreement and Appendix 1 will be performed by CUREVAC or one of its affiliates. With respect to either Party, the term "affiliates" means any entity or entities that directly or indirectly control, are controlled by, or are under the same control as such Party, or any other entities that are formally part of CUREVAC's affiliate network. Each affiliate has the authority to perform Activities under this Agreement. CUREVAC and its affiliates will be governed in all respects by the terms of this Agreement and the Appendix 1.

**14. Governing Law.** This Agreement will be governed and construed in accordance with the laws of the State of Washington, excluding that body of law known as conflicts of law. Venue for all purposes under this Agreement will be in the state or federal courts located in Seattle, Washington, U.S.A. and each Party hereby submits to the jurisdiction of those courts.

**15. Severability and Non-Waiver.** If any provision of this Agreement is held to be invalid or unenforceable to any extent, this Agreement will continue in full force and effect and such provision will be amended to the least extent necessary to conform to applicable laws and to accomplish the Parties' intentions. No waiver of any provision of this Agreement will be effective unless it is in writing and signed by both Parties, and no such waiver will result in the waiver of any other provision of this Agreement. Failure of either Party at any time to enforce any of the provisions of this Agreement or Appendix 1 will not be construed as a waiver of such provisions or in any way affect the validity of this Agreement Appendix 1 or parts thereof.

**16. Notices.** Any notice under this Agreement (including Appendix 1) must be in writing and will be deemed delivered: (a) three days after being mailed by certified mail; (b) one day after delivery by one-day courier to the other Party at the address set forth above, or at such other address as may be notified in writing by the other Party from time to time; or (c) upon transmission by email or facsimile, if the receiving Party confirms receipt in writing.

**17. Entire Agreement; Amendments; Assignment.** This Agreement is the Parties' final, exclusive and complete understanding and agreement, and supersedes all prior and contemporaneous understandings and agreements relating to the subject matter of this Agreement. This Agreement may be amended only by a subsequent written instrument signed by both Parties other than the Framework Agreement.

Subject to the other terms of this Agreement, neither Party shall have the right to assign any of its rights or obligations under this Agreement without the prior written consent of the other Party, such written authorization not to be unreasonably withheld or delayed; provided, however, that the prior written authorization of the Foundation shall not be required for CUREVAC to assign any of its rights, or delegate the performance of any of its obligations hereunder to an affiliate or to a third party which acquires all or substantially all of the assets related to this Agreement. Any permitted assignment hereunder by either Party pursuant to this Section 17 shall not relieve such Party of any of its obligations under this Agreement. Subject to the foregoing, this Agreement will bind and benefit the successors and assigns of the Parties.

**18. Counterparts; Original.** This Agreement, including Appendix 1 or amendments, may be executed in counterparts which, when taken together, will constitute one Agreement. Copies of this Agreement will be equally binding as originals and faxed or scanned and emailed counterpart signatures will be sufficient to evidence execution, though the Foundation or CUREVAC may require the other Party to deliver original signed documents.

**19. Headings.** The headings of this Agreement are intended solely for convenience and will not be deemed to constitute part of this Agreement or to affect the construction or interpretation hereof.

**20. Shipping & Handling.** CUREVAC will comply with all laws, rules and regulations in interstate or foreign commerce regarding the use, exporting, shipping and handling and disposal of samples, materials, and/or biologics.

**21. Management of the Project.** CUREVAC acknowledges and agrees that the Foundation's activities in connection with this project, including its review of any study design, documents and plans and providing feedback and input, do not modify CUREVAC's obligation to obtain all applicable legal, regulatory and ethical approval for the activities being conducted. Any potential product CUREVAC is seeking to develop and all related activities are CUREVAC's responsibility, regardless of any input or feedback provided by the Foundation. Under this Agreement, at no point will CUREVAC use any of the Project Materials in humans or in clinical studies or trials.

**22. Use of Animals in Research.**

22.1 CUREVAC will be responsible for the humane care and treatment of animals under this Agreement and to adhere to the official guidelines for animal research applicable in the country and locality where the trial is being conducted. CUREVAC may not commence studies involving animals until all requisite approvals are in place and notification to that effect has been provided to the Foundation. For purposes of this provision, an "animal" is defined as any live, vertebrate animal used or intended for use in research, research training, experimentation, biological testing or for related purposes. In the case of multi-national collaborations, the standards of each country may be followed, as long as (a) differences do not interfere with the design and analysis of the Activities and (b) regulations in CUREVAC and the host country do not conflict with the management of the Activities.

22.2 CUREVAC agrees to take responsibility for compliance of all Subcontractors (if any) with the appropriate animal welfare laws, rules and regulations. CUREVAC must report annually as a part of its progress report that the activities are being conducted in accordance with applicable laws in each respective venue (e.g., U.S. entities must use the U.S. Public Health Service standards. Non-U.S. entities may cite national laws or the CIOMS International Guiding Principles for Biomedical Research Involving Animals (see [www.cioms.ch/publications/guidelines frame guidelines.htm](http://www.cioms.ch/publications/guidelines%20frame%20guidelines.htm)) if there is no relevant national standard.

**23. Coverage for All Sites.** CUREVAC agrees that for each venue in which any part of the Activities is conducted (either by CUREVAC or a Subcontractor) all legal and regulatory approvals for the activities being conducted will be obtained in advance of commencing the regulated activity. CUREVAC further specifically agrees that it will not enroll human subjects under this Agreement.

**24. Regulated Research.** The coverage requirements set forth in the preceding paragraph include but are not limited to regulations relating to: research involving human subjects; clinical trials, including management of data confidentiality; research involving animals; research using substances or organisms classified as Select Agents by the U.S. Government; use or release of genetically modified organisms; research use of recombinant DNA; and/or use of any organism, substance or material considered to be a biohazard, including adherence to all applicable standards for transport of specimens, both locally and internationally, as appropriate. As applicable, regulated activities and their documentation are to be conducted under the applicable international, national, and local standards. Documentation of research results should be consistent with regulations and the need to establish corroborated dates of invention and reduction to practice with respect to inventions where this is relevant.

**25. Institutional Review Board (IRB) and Other Ethical Committee Approval.** CUREVAC agrees to obtain the review and approval of all final protocols by the appropriate Institutional Animal Care and Use Committee (or equivalent competent institution) approval of studies involving animals, and Institutional Biosafety Committee for biohazards and recombinant DNA. CUREVAC agrees to provide prompt notice to the Foundation if the facts and circumstances change regarding the approval status of such committees for any final protocol(s).

The Parties agree to the terms of this Agreement.

**II. Budget and Payment**

1. Over All Cost Estimates

Outcome	[*****]	[*****]	[*****]	Total
[*****]	[*****]	[*****]	[*****]	[*****]
[*****]	[*****]	[*****]	[*****]	[*****]
[*****]	[*****]	[*****]	[*****]	[*****]
[*****]	[*****]	[*****]	[*****]	[*****]
[*****]	[*****]	[*****]	[*****]	[*****]
<b>TOTAL</b>	[*****]	[*****]	[*****]	<b>\$2,522,006</b>

- a. The overall estimates of costs for the activities planned under this Agreement are as described in the budget previously provided covering both fees and expenses. The Parties agree to quarterly invoicing and payments based on an actual time and materials basis of both fees and expenses.
- b. The Foundation and CUREVAC have agreed that the Foundation will fully fund the related costs and shall reimburse CUREVAC accordingly.
- c. Any material change in scope of work from what is described in this Appendix will be evaluated as a potential amendment to this Agreement for its effect on time and budget estimates and then a joint decision will be made by the Parties as to whether to incorporate the Amendment and how to manage the associated expenses.

## 2. Reimbursement by Foundation and Invoicing by CUREVAC

- a. The Foundation will fully reimburse CUREVAC for the cost for reasonable third-party expenses included in the table above, previously approved by Foundation, that are actually incurred by CUREVAC in connection with the activities contemplated under this Agreement. With each invoice, CUREVAC will provide: (a) a detailed itemized listing of all expenses incurred under this Agreement; and (b) receipts for any individual expenses that exceed [\*\*\*\*\*]. CUREVAC may provide either an original or a copy of receipts. The receipt requirements do not apply to subcontractor fees and expenses.
- b. The Foundation will only reimburse expenses in accordance with Foundation 's Consultant Travel and Expense Reimbursement Policy (the "*Consultant Travel and Expense Reimbursement Policy*") located at <http://www.gatesfoundation.org/Documents/expense.pdf>, as may be updated from time to time. The Foundation will fully reimburse CUREVAC for travel (airfare, lodging, meals, and ground transportation).
- c. In incurring expenses that will be submitted to the Foundation for reimbursement, CUREVAC will have discretion and control over selection of providers, and such selection will be made independently of the Foundation, except as otherwise provided in the Consultant Travel and Expense Reimbursement Policy.
- d. CUREVAC will submit invoices to the Foundation for any amounts owing under this Agreement. Each invoice will contain enough detail of expenses incurred by CUREVAC to enable the Foundation to determine the accuracy of the amount(s) invoiced and include the contract number for this Agreement.
- e. CUREVAC will deliver each invoice to the Foundation within [\*\*\*\*\*] of the period during which the expenses were incurred by CUREVAC or upon the execution of this Agreement at the discretion of CUREVAC. Upon completion of activities under this Agreement, CUREVAC will identify the "final invoice" and will not invoice the Foundation any further amounts unless the Parties execute an amendment to this Agreement. The Foundation's payment to CUREVAC of each properly-submitted invoice will be due [\*\*\*\*\*] after the Foundation receives that invoice.
- f. CUREVAC will maintain complete and accurate records to support all invoiced amounts, including but not limited to those factors that comprise or affect direct and subcontracted labor hours, labor rates, and expenses. Such records will be made available to the Foundation at a mutually agreed-upon location for the Foundation's examination and audit once every 12 months during reasonable business hours, upon thirty (30) days' advance written notice, from the Effective Date of this Agreement until eighteen (18) months after its expiration. CUREVAC will also provide reasonable assistance to interpret such records if requested by the Foundation.
- g. [\*\*\*\*\*].

**III. Global Access Plan**

1. CUREVAC and the Foundation agree that the overarching goal of the projects under the Framework Agreement and this Agreement is to improve the processes and technologies for the development, manufacture and delivery of CUREVAC vaccines and other products with the aim of making them more available and more accessible in terms of cost, quantity, and quality to people most in need in the Developing Countries. This is a critical aspect of the Global Access objective of the Foundation. A related aspect of Global Access is to ensure that information and data resulting from activities under the Framework Agreement are promptly and broadly disseminated without jeopardizing intellectual property protection to the relevant scientific and educational communities, since the Foundation's and CUREVAC's support may result in incremental technological advances, discoveries, data and information which could be critical to advancing the Foundation's charitable objectives.
2. The Foundation recognizes that intellectual property protection for the result of work connected with or arising from the Framework Agreement and related projects could be important to realizing these Global Access objectives in Developing Countries<sup>1</sup>, whilst promoting sustainability of R&D and commercialization of CUREVAC's vaccines or technologies in emerging or developed economies. CUREVAC commits to manage Project IPR to best achieve these Global Access objectives in the Developing Countries, through the sub licensing thereof or the supply of CUREVAC's vaccines, adjuvants or other products (at CUREVAC's entire discretion).
3. In the event the success criteria for this Project have been met, the Parties will meet and determine, in good faith, whether to take the resulting vaccine candidate(s) forward.
4. In the event that CUREVAC elects not to participate in further development and trials of the resulting vaccine candidate(s) in accordance with the previous paragraph and the Foundation wishes to proceed, CUREVAC and the Foundation will enter into good faith negotiations to conclude an agreement whereby the Foundation and one or more of its partners or grantees reasonably agreed-to by CUREVAC will proceed with such development and trials. For the purpose of clarity, nothing in this Agreement obligates CUREVAC to participate in or proceed with such development and trials even if the success criteria for this Agreement have been met.
5. The negotiations contemplated in the previous paragraph will address any necessary licenses to Background and Project IPR as well as access and permissions to use data generated by CUREVAC under this Agreement for the purpose of enabling the Foundation and its partner(s) or grantee(s) to proceed with the development and trials.

[\*\*\*\*\*]

---

<sup>1</sup> "Developing Countries" means the countries that are eligible for GAVI support based on a Gross National Income (GNI) per capita below or equal to US\$ 1,520. These countries are identified at [http://www.countries\\_eligible\\_for\\_support/](http://www.countries_eligible_for_support/).

REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

THIS AGREEMENT is made the 15<sup>th</sup> day of February 2019 (the "Effective Date").

**BETWEEN:**

1. **COALITION FOR EPIDEMIC PREPAREDNESS INNOVATIONS**, a not-for-profit international association existing under Norwegian law with address at Marcus Thranesgate 2, PO Box 123 Torshov, N-0412 Oslo, Norway ("CEPI"); and
2. **CUREVAC AG**, a German corporation with address at Paul-Ehrlich-Strasse 15, 72076 Tübingen (the "**Partner**").

**WHEREAS:**

- A. CEPI is a public-private not-for-profit coalition including civil and philanthropic organizations, established: (i) to finance, coordinate and support the development of new vaccine platform technologies and new vaccines to prevent and contain infectious disease epidemics; (ii) working with its partners and relevant government agencies to ensure that vaccines developed are provided on an equitable basis to all populations who need them; and (iii) to ensure adequate stockpiles and manufacturing capacity of vaccines and vaccine platforms developed for epidemic situations.
- B. The Partner has applied to CEPI under call "CfP2: Platform Technologies to enable rapid vaccine development for epidemic prone infections" for funding to undertake a project entitled "Rapid Response mRNA Vaccine Platform for Epidemic Preparedness" led by [\*\*\*\*\*], of the Partner.
- C. Partner is a biopharmaceutical company that is a pioneer and technology leader in messenger ribonucleic acid ("mRNA") based vaccination approaches. Partner Controls intellectual property rights regarding the development and manufacture of mRNA based products, including manufacturing know-how licensed from Tesla Grohmann Automation GmbH ("**TGA**"). The manufacturing know-how licensed from TGA is targeted at establishing an automated manufacturing platform. Partner is interested to make its intellectual property available to further develop under this Agreement, including the TGA know-how for an automated manufacturing platform for the manufacture of mRNA-based products (the Platform, as defined below).
- D. This Agreement sets out the terms and conditions governing the performance of the project, funding of the project and how the results of the project will be used to further CEPI's mission.

IT IS AGREED as follows:

1. **DEFINITIONS AND INTERPRETATION**

1.1 In this Agreement the following words have the meaning given below or given to them in relevant Clauses of this Agreement:

- 1.1.1. **“Additional Work Package”** means a Work Package of work under the Project to be agreed between the Parties from time to time in addition to those agreed upon on the Effective Date, and funded by CEPI which may be related to Products;
- 1.1.2. **“Additional Work Package Statements”** means the statement of activities, timeline, Partner Contribution, Milestones, Milestone Dates, Additional Work Package budget and payment schedule for a particular Additional Work Package agreed between the Parties. The template for Work Package Statements is the same as that for Additional Work Package Statements and is attached at [Schedule 1](#);
- 1.1.3. **“Affiliate”** means any corporation or other business entity controlled by, controlling or under common control with the relevant Party. “control”, “controlled” and “controlling” for purposes of this definition shall mean: (i) direct or indirect beneficial ownership of fifty percent (50%) or more of the voting interest in an entity; or (ii) possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of that entity (whether through ownership of securities or other ownership interests, by contract or otherwise). Regarding the Partner, Affiliate shall not include Mr. Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other entity controlled by Mr. Hopp and/or dievini Hopp Bio Tech holding GmbH & Co. KG;
- 1.1.3. **“Affected Territory”** means the geographic area of any country where there is an Outbreak or that is at risk of an Outbreak taking into account epidemiological data, travel and migration patterns and the lack of availability of other products or product candidates;
- 1.1.4. **“Agreement”** means this agreement including any Schedules attached hereto and any Work Package Statements and Additional Work Package Statements;
- 1.1.5. **“Approved Regulatory Authority”** means the EU European Medicines Agency, the US Food and Drug Administration, SwissMedic, Japanese PMDA, Australian Therapeutic Goods Agency, South Korean Ministry of Drug Safety, Health Canada, the United Kingdom Medicines and Healthcare Products Regulatory Agency (MHRA) or Singapore Health Sciences Authority and, in each case, any successor authority and any other regulatory authority agreed to by the Parties as being an Approved Regulatory Authority;
- 1.1.6. **“Assessors”** as defined in Clause 9.3
- 1.1.7. **“Background Technology”** means the Technology in the Field Controlled by Partner on the Effective Date, excluding, however, the Technology that Partner has licensed from Acuitas Therapeutics, Inc. (subject only to the limited license set forth below), and only to the extent such Technology is required for:
  - (i) undertaking any Work Packages or Additional Work Packages;
  - (ii) the protection or exploitation of Project Technology;
  - (iii) Developing the Platform;
  - (iv) Manufacturing Products; and
  - (v) the Technology Transfer of the Platform to Trusted Manufacturer(s).

- 1.1.8. In accordance with and subject to the terms and conditions of this Agreement, included in the Background Technology will be a license from Acuitas Therapeutics, Inc. for the Project Vaccine, for a term of [\*\*\*\*\*] years after the Effective Date. Partner agrees to use its Reasonable Efforts to secure an extension of the [\*\*\*\*\*] years license on behalf of CEPI to cover use of this Background Technology for Project Vaccine in the Field for the term of this Agreement. The Background Technology is described in Schedule 3;
- 1.1.9. “**Business Day**” means a day on which banks are normally open for business and which is not a Saturday or Sunday, or a bank or public holiday in Norway, England and Wales or Germany;
- 1.1.10. “**CEPI Group**” means CEPI, including its offices in Norway, UK, India and the United States and its Affiliates;
- 1.1.11. “**CEPI Production Timeframe**” means CEPI’s timeframe for the Development and Manufacture of the Project Vaccine for use in the Field in the Affected Territory:
- (i) release of Project Vaccine for use in clinical trials and commencement of clinical trial(s) in humans within [\*\*\*\*\*] weeks of the identification of the antigen with Outbreak Potential;
  - (ii) demonstration of the achievement of clinical benefit (i.e. an immune response likely to result in clinical benefit in humans) within [\*\*\*\*\*] weeks of the administration of the first dose of the Project Vaccine in humans in the clinical trial(s); and
  - (iii) Manufacture, fill, finish, release and distribution in the Affected Territory of [\*\*\*\*\*] doses of Project Vaccine within [\*\*\*\*\*] weeks of demonstration of clinical benefit;
- 1.1.12. “**CEPI Policies**” means the CEPI policies and procedures in effect as of the date of this Agreement as listed below and attached hereto as Schedule 10, together with any amendments thereto and any new policies and procedures acceded to by the Parties pursuant to Clause 4.2:
- (i) Animals in Research Policy;
  - (ii) Clinical Trials Policy;
  - (iii) Equitable Access Policy;
  - (iv) Shared Risks/Shared Benefits Policy;
  - (v) Management of Technology;
  - (vi) Scientific Integrity;
  - (vii) Anti-Corruption Policy;
  - (viii) International Sanctions Policy;

- (ix) Policy for Managing Conflict of Interest;
- (x) Procurement Policy and Procedures;
- (xi) Transparency and Confidentiality Policy; and
- (xii) Travel Policy.

For the avoidance of doubt, the terms and conditions of this Agreement shall have precedents over the CEPI Policies.

- 1.1.13. “**Commercial Benefits**” means any financial and non-financial benefits, rewards and/or results generated from or arising from the exploitation of the Project Technology in the Field, resulting in any way from the CEPI funding and/or Partner Contribution or to which CEPI funding or the Partner Contribution have contributed in any way whatsoever, including any government-paid incentives such as Priority Review Vouchers (“PRV”) and other derivative or follow-on products (including antibodies and assays);
- 1.1.14. “**Commercial Use**” means the exploitation of the Project Technology in the Field;
- 1.1.15. “**Condition(s) Precedent**” as defined in Clause 12.1
- 1.1.16. “**Confidential Information**” means any and all non-public data, results, Know-How, software (including non-open source code), plans, details of research work, discoveries, inventions, intended publications, intended or pending patent applications, designs, technical information, business plans, budgets and strategies, business or financial information or other information in any medium and in any form, and any physical items, prototypes, compounds, samples, components, non-public Regulatory Filings, non-public submissions to Regulatory Authorities or other articles or Materials disclosed on or after the Effective Date of this Agreement by one Party to the other Party whether orally or in writing or in any other form;
- 1.1.17. “**Contractor Result**” means any tangible or intangible goods or services produced as a result of any work conducted by Sub-Contracting by a Partner pursuant to this Agreement and which is listed as a Contractor Result in the relevant Work Package Statement or is agreed to be a Contractor Result by the JMAG;
- 1.1.18. “**Control**” and “**Controlled**” shall mean with respect to the subject item, the possession (whether by ownership or license, other than pursuant to this Agreement) by a Party of the right to grant to the other Party access or a license as provided herein under such item or right without violating the terms of any agreement or other arrangement with any Third Party;
- 1.1.19. “**Cost of Goods**” means the formula for calculating the cost of goods set by Gates attached as [Schedule 7](#) but excluding all CEPI funding for work included in the Work Packages or Additional Work Packages and other non-repayable public or philanthropic funding received by the Partner and used to Develop the Background Technology and the Project Technology and to Manufacture and market the Product for use in the Field in the Affected Territory;

- 1.1.20. **"Data"** means any and all scientific, technical or test data including Know-How, research data, clinical pharmacology data, immunogenicity data, CMC data (including analytical and quality control data and stability data), pre-clinical data, clinical data, information concerning clinical trials, pharmacoeconomic data and data in publications, Regulatory Filings, submissions to Regulatory Authorities, Platform Confirmations, marketing approvals and Master Files related thereto;
- 1.1.21. **"Defaulting Party"** as defined in Clause 19.2
- 1.1.22. **"Deliverables"** means those tangible and/or intangible works or services which are to be delivered in accordance with the respective Work Package Statement or Additional Work Package Statement;
- 1.1.23. **"Develop"** or **"Development"** means those development activities that are required (i) to perform the Work Packages or Additional Work Packages with respect to the Project Vaccine; and (ii) to obtain Platform Confirmation from at least one Approved Regulatory Authority. Development of the Project Vaccine may include stability testing, toxicology, formulation and process development, CMC development, manufacturing process validation, statistical analysis, pre-clinical and clinical studies, as further defined in the applicable Work Package or Additional Work Package; and **"Developing"** shall be construed accordingly. For the avoidance of doubt, where this Agreement refers to "development" in the lower case, the same kinds of activities are contemplated; however, such activities will not occur pursuant to a Work Package between the Parties;
- 1.1.24. **"Disclosure Letter"** means the letter from the Partner to CEPI attached hereto as Schedule 12, setting out disclosures known by the Partner against the Warranties;
- 1.1.25. **"Documents"** means reports, research notes, charts, graphs, comments, computations, analyses, recordings, photographs, paper, notebooks, books, files, ledgers, records, tapes, discs, diskettes, CD-ROMs, computer programs and documents thereof, computer information storage means, samples of material, other graphic or written data and any other media on which Know-How can be permanently stored;
- 1.1.26. **"Effective Date"** means the date of final execution of this Agreement;
- 1.1.27. **"Field"** means the diagnosis, prevention and treatment of infections caused by:

- (i) the pathogens listed in the WHO R&D blueprint priority (December 2015 or January 2017) as updated from time to time (including: Arenaviral hemorrhagic fevers (including Lassa Fever), Crimean Congo Haemorrhagic Fever (CCHF), Filoviral diseases (including Ebola and Marburg), Middle East Respiratory Syndrome Coronavirus (MERS-CoV) (or other highly pathogenic coronaviral diseases, such as SARS), Nipah and related henipaviral diseases, Rift Valley Fever (RVF), Severe Fever with Thrombocytopenia Syndrome (SFTS) and Zika unless, at the time of CEPI's request to work with Partner, Partner is already committed to working with Gates based on a proposal according to the Global Access Commitments Agreement dated February 13, 2015;
- (ii) Chikungunya;
- (iii) Lassa Fever; and
- (iv) novel or previously unrecognized pathogens likely to result in an Outbreak or risk of an Outbreak unless, at the time of CEPI's request to work with Partner, Partner is already committed to working with Gates based on a proposal according to the Global Access Commitments Agreement dated February 13, 2015 or unless products to treat such infections are already commercialized, commercialization has failed, or Partner has a commercial interest in such products. Such commercial interest of Partner is assumed for the following pathogens: [\*\*\*\*\*]. If CEPI is interested to develop a product with respect to such novel or previously unrecognized pathogen under this Agreement, it shall notify Partner hereof and Partner shall respond within [\*\*\*\*\*] business days as of the notification whether the product is within or outside the Field, and with respect to any such pathogen other than the ones listed above for which the commercial interest is assumed, Partner shall provide information on its commercial interest. With respect to pathogens which fall under this (iv), for which the Partner has previously declared commercial interest, and for which the commercial interest is not assumed, CEPI may after six (6) months as from Partner's providing the aforementioned information reasonably request from Partner a confirmation including appropriate information, that Partner's commercial interest continues and consequently such pathogen remains to be outside the Field.

1.1.28. "Financial Documents" means:

- (i) the Financial Summary and Reporting Form; and
- (ii) the most recent audited financial statement of the Partner, auditor's report for such financial statement and management letter to the auditors for such financial statement, and
- (iii) where requested by CEPI pursuant to Clause 3.13, the most recent audited Project statements;

1.1.29. "Financial Summary and Reporting Form" means a report by the Partner to CEPI in the prescribed form (a template which is attached as Schedule 8) providing up-to-date details of actual and forecast costs for each current Work Package or Additional Work Package;

1.1.30. "Gates" means the Bill & Melinda Gates Foundation of P.O. Box 23350, Seattle WA 98102, USA;

1.1.31. "Improvements" means any improvement, modification, enhancement and update and includes all Technology related thereto;

1.1.32. "Initial Project Term" means [\*\*\*\*\*] years as from the Effective Date;

- 1.1.33. “**IPDP**” means the Integrated Product Development Plan setting out the studies and other activities to be performed in a Work Package or Additional Work Package, using the CEPI funding attached as Schedule 6;
- 1.1.34. “**JMAG**” has the meaning set forth in Clause 5.3;
- 1.1.35. “**Know-How**” means any technical and other information which is not in the public domain, including information comprising or relating to concepts, discoveries, data, designs, formulae, ideas, inventions, methods, models, assays, research plans, procedures, designs for experiments and tests and results of experimentation and testing (including results of research or development), processes (including manufacturing processes, specifications, and techniques), laboratory records, chemical, pharmacological, toxicological, clinical, analytical and quality control data, trial data, case report forms, data analyses, reports, manufacturing data or summaries and information contained in submissions to and information from ethical committees and Regulatory Authorities (including the Master File) and computer programs or algorithms including those relating to manufacturing and source code for manufacturing processes. Know-How includes Documents containing Know-How, including any rights such as trade secrets, copyright, database or design rights protecting such Know-How. The fact that an item is known to the public shall not be taken to preclude the possibility that a compilation including the item, or a development relating to the item, is not known to the public;
- 1.1.36. “**Manufacturing**” or “**Manufacture**” means subject to GMP, production on the Platform of Project Vaccine and Products or constituents thereof, including active ingredients, excipients, adjuvants, preservatives or other additives;
- 1.1.37. “**Master File**” means all drug master files relating to Product that may be filed with any Regulatory Authority;
- 1.1.38. “**Material**” means any chemical or biological substance including any: organic or inorganic element; nucleotide or nucleotide sequence including DNA and RNA sequences; gene; vector or construct including plasmids, phages or viruses; host organism including bacteria, fungi, algae, protozoan; hybridomas; eukaryotic or prokaryotic cell line or expression system or any development strain or product of that cell line or expression system; protein including any peptide or amino acid sequence, enzyme, antibody or protein conferring targeting properties and any fragment of a protein or a peptide enzyme or antibody; drug or pro-drug including bulk drug substance, filled product and any manufacturing intermediates; assay or reagent; any other genetic or biological material or micro-organism; transgenic animals, clinical samples and up to date pathogen samples;
- 1.1.39. “**Milestone**” has the meaning as set forth in Clause 3.6;
- 1.1.40. “**Milestone Criteria**” means the criteria described in the relevant Work Package Statement which the Parties target to achieve by agreed dates (the “**Milestone Dates**”). The Milestone Criteria and Milestone Date(s) for each Work Package/Additional Work Package are set out in the relevant Work Package Statement or Additional Work Package Statement;
- 1.1.41. “**Outbreak**” means:

- (i) the occurrence in a community or region of cases of an illness with a frequency in excess of normal expectancy;
- (ii) a public health emergency of international concern declared by WHO; and/or
- (iii) a public health emergency on a national or regional scale declared by the relevant national or regional government;

1.1.42. **"Parties"** means the parties to this Agreement and **"Party"** shall be interpreted accordingly;

1.1.43. **"Partner Contribution"** means the financial and in-kind contributions to be made by the Partner to any Work Package/Additional Work Package as set out in Schedule 2 and individual Work Package Statements/Additional Work Package Statements, but excluding any of the Partner's sunk costs as of the Effective Date in the Platform and/or the Project Vaccines to be developed under the Project as of the Effective Date;

1.1.44. **"Partner Financial Records"** means accounting and other financial records relating to the CEPI funding, Partner Contribution and the activities funded by the foregoing, income and expenditure associated with the Project, the Platform, and the systems used by the Partner to administer the Project financially and otherwise;

1.1.45. **"Partner's Right of First Refusal"** shall have the meaning given to it in Clause 8.3.3;

1.1.46. **"Payment Schedule"** means the schedule setting out the proposed dates for payments of CEPI funding and/or payments or contributions comprising the Partner Contribution set out in the relevant Work Package Statement/Additional Work Package Statement;

1.1.47. **"Platform"** means the automation solution for Partner's processes of RNA manufacturing developed by Partner and Tesla Grohmann Automation Solution GmbH ("TGA") under the Development and Intellectual Property Agreement dated December 22, 2017, including the Know-How licensed from TGA thereunder;

1.1.48. **"Platform Confirmation"** means the approval of the Platform by Regulatory Authorities, taking into account that currently Regulatory Authorities do not in general have the legal power to grant marketing approval for vaccine production platforms, obtaining confirmation from Regulatory Authorities that applications for approval of clinical trials may rely on existing Data prepared in conjunction with the application for prior vaccines developed on the Platform;

1.1.49. **"Product"** means any form or dosage of pharmaceutical composition or preparation for use in humans which is intended to prevent, diagnose or treat diseases within the Field and in an Affected Territory, and which incorporates, comprises or relies on the Background Technology and/or the Project Technology, and/or is Manufactured on the Platform. Product may be a Project Vaccine. For the avoidance of doubt, a Product may be developed or Manufactured outside of the Affected Territory, but exclusively for marketing within the Affected Territory;

1.1.50. **"Project Lead"** means [\*\*\*\*\*] of the Partner;

- 1.1.51. **“Project”** means the activities set out in the Work Package Statements/Additional Work Package Statements;
- 1.1.52. **“Project Standards”** shall have the meaning given to it in Clause 4;
- 1.1.53. **“Project Technology”** means Technology that is created, devised or arises out of the undertaking and performance of any Work Package/Additional Work Package, the activities set out in the IPDP and any other activities undertaken and performed pursuant to this Agreement;
- 1.1.54. **“Project Term”** shall have the meaning set forth in Clause 19.1;
- 1.1.55. **“Project Vaccine”** means vaccines targeting Lassa, to be Developed and Manufactured, pursuant to this Agreement;
- 1.1.56. **“Public Health License”** has the meaning given to it at Clause 11.1;
- 1.1.57. **“Quarterly Report”** means a written report to CEPI in the form of the template in Schedule 9 outlining Work Package/Additional Work Package progress, key risks and risk mitigation strategies and up to date financial details relating to the Project;
- 1.1.58. **“Reasonable Efforts”** means:
- (i) with respect to the Partner, in good faith making no less commercially reasonable effort and committing no less resources than those commonly used by the Partner or, if greater, a company of similar size and with similar resources to the Partner and its Affiliates in the vaccine industry when applied to platforms, compounds, vaccines and products at a similar stage of development, life cycle and healthcare potential to the Platform and Product being developed, taking into account (a) all relevant factors including issues of safety and efficacy, product profile, difficulty in Developing or Manufacturing, sourcing raw materials necessary therefor, regulatory approvals, the patent or other proprietary position of the Platform or Project Vaccine and the regulatory requirements involved; and (b) the Parties’ joint aim of developing the Platform and Project Vaccine in a diligent and timely manner as indicated by the Milestones and Milestone Dates;
  - (ii) with respect to the CEPI Group, the use of reasonable efforts and resources, in good faith, in the exercise of prudent legal, medical, scientific judgement (as applicable) considering CEPI’s mission and the healthcare potential of the applicable Platform and Product;
- 1.1.59. **“Regulatory Authority”** means any governmental authority whose review or approval is necessary or useful for the development and/or marketing activities of the Product in a given country in the Affected Territory including the Approved Regulatory Authorities;
- 1.1.60. **“Regulatory Filing”** means all approvals, licenses, registrations, variations applications, submissions and authorizations made to or received from a Regulatory Authority necessary for the development and/or marketing activities of Product including INDs, and the Master File relating to the Product;

- 1.1.61. “**RNA Optimizer Toolkit**” shall mean the methodology used and processes applied at Partner at the date of CEPI’s request according to Clause 8.3.3 to provide optimized nucleotide sequences;
- 1.1.62. “**Safety Issues**” shall have the meaning given to it in Clause 7.11.6;
- 1.1.63. “**Stage Gate**” means a point of control where the Parties determine as to whether a Work Package/Additional Work Package has been completed or a Milestone Criterion has been achieved;
- 1.1.64. “**Stage Gate Criteria**” means the criteria described in the relevant agreed Work Package Statement/Additional Work Package Statement that CEPI requires to be satisfied, including the dates specified in the Work Package Statement/Additional Work Package Statement for satisfaction of the Stage Gate Criteria (the “**Stage Gate Dates**”) for CEPI to advance the Project;
- 1.1.65. “**Sub-Contract(s)**” contracts concluded between Partner and Sub-Contractor;
- 1.1.66. “**Sub-Contractor**”, shall have the meaning set forth in Clause 10.1.1;
- 1.1.67. “**Team Charter**” means the Team Charter attached as Schedule 11, which includes, for example, the composition of the JMAG and the procedures on how the JMAG renders decisions;
- 1.1.68. “**Technology**” means any Know-How together with all intellectual property rights and similar or equivalent rights anywhere in the world which currently exist or are recognized in the future (whether or not registered) covering such Know-How; and applications, extension and renewals in respect of the foregoing including patent applications, patents resulting from any such applications, utility certificates, improvement patents and models, certificates of addition and all foreign counterparts in all countries, including any divisional applications and divisional patents, refiling, renewals, continuations, continuations-in-part, patents of addition, extensions (including patent term extensions), reissues, substitutions, confirmations, registrations, re-validations, pipeline and administrative protections and additions, supplementary protection certificates and equivalent protection, designs, trademarks and trade names, copyright and related rights, and database rights;
- 1.1.69. “**Technology Transfer Materials**” means the materials required to be made available to a Trusted Manufacturer to enable such Trusted Manufacture to (i) adapt, develop and use the Platform for the Manufacture of Products for use in the Field and in the Affected Territories (ii) develop, formulate, recreate and show equivalence (where relevant) to Products developed by Partner under an Additional Work Package. For the avoidance of doubt, Technology Transfer Materials do not include RNA Optimizer Toolkit technology.
- 1.1.70. “**Terminating Party**” as defined in Clause 19.2;
- 1.1.71. “**Termination Date**” shall have the meaning set forth in Clause 20.1;
- 1.1.72. “**Third Party**” means a legal entity other than a Party and a Party’s Affiliates;

1.1.73. “**Transfer Agent**” as defined in Clause 9.3.

1.1.74. “**Trusted Manufacturer**” means a Third Party nominated by the Partner and appointed by CEPI, or nominated by CEPI and appointed by the Partner if so agreed in Additional Work Package Statements;

1.1.75. “**Underspend**” means any CEPI funding paid to the Partner for a given Work Package/Additional Work Package that is unspent (as reflected by the Partner’s actual expenditure in the Partner’s Financial Summary and Reporting Form) following completion of the work specified in a Work Package Statement/Additional Work Package Statement or at the date of termination or expiration of this Agreement;

1.1.76. “**Wellcome**” means The Wellcome Trust Limited as trustee of the Wellcome Trust of 215 Euston Road, London NW1 2BE;

1.1.77. “**Work Package**” means the activities to be done under the Project agreed between the Parties as of the Effective Date, including Work Packages 3 and 5 which need to be refined and agreed upon at a later stage, and any future activities agreed by the Parties to be described in an “Additional Work Package”;

1.1.78. “**Work Package Budget**” means the maximum amount of funding to be provided by CEPI to the Partner for the relevant Work Package as set out in the Work Package Statement; and

1.1.79. “**Work Package Statement**” means the statement of activities, timeline, Partner Contribution, Milestones, Milestone Dates, Work Package Budget and Payment Schedule for a particular Work Package agreed between the Parties. The template for Work Package Statements is attached as Schedule 1 and the Work Package Statements for Work Packages 1, 2 and 4 are attached as Schedule 5 (with Work Packages 3 and 5 to be finalized and signed later).

1.2 Any phrase introduced by the terms “including”, “include”, “in particular” or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

1.3 Any provision in this Agreement referring to “Project Vaccine” will apply respectively to any Product which the Parties will agree to develop under an Additional Work Package.

1.4 Where reference is made in this Agreement to any Party’s prior written consent being required in respect of any matter, the respective other Party shall give not less than [\*\*\*\*\*] written notice to such Party of the matter for which such consent is required or a different period of time mutually agreed in writing by the Parties.

2. **PROJECT OBJECTIVES**

2.1 CEPI is entering into this Agreement to further CEPI's mission by developing a vaccine platform technology that can be available for use in outbreaks of infectious diseases with epidemic potential to enable rapid vaccine development, manufacture, scale up and clinical benefit at a cost of goods in line with the methodology to determine pricing obligations set out in the CEPI Equitable Access Policy and the Cost of Goods to address global health concerns.

2.2 Partner is supporting CEPI to fulfill its mission, while it is interested to advance the Platform for the manufacture of mRNA based products.

3. **PROJECT FUNDING**

3.1 **Project Funding.** CEPI agrees to contribute funding for the Project of up to a maximum amount of US \$ 34,022,694 United States Dollars subject to the terms and conditions of this Agreement. The budget for the Project (excluding the Partner Contribution) as of the Effective Date is set out in Schedule 4.

3.2 **Payment Administration.** CEPI shall make all payments to the Partner in United States Dollars (USD (\$)) unless otherwise agreed between the Parties by electronic wire transfer of immediately available funds directly to the Partner's bank account designated below:

Account Name: [\*\*\*\*\*]

Account No.: [\*\*\*\*\*]

Bank: [\*\*\*\*\*]

Sort code: [\*\*\*\*\*]

Swift code: [\*\*\*\*\*]

Branch: [\*\*\*\*\*]

Account Currency: USD

Partner shall ensure that the bank account designated above is a separate bank account with a bank with credit rating A, is in the name of the Partner, is described as a CEPI funding account and that the bank account does not go into debit during the Project Term.

3.3 **Work Packages.** The Project to be funded under this Agreement comprises a number of Work Packages. The Work Package Statements and Work Package Budgets agreed between the Parties for the Work Packages are set out in Schedule 5. The undertakings in those documents setting forth the undertakings hereunder (like to Develop, Manufacture and mmarket) shall prevail the undertakings set forth in general terms hereunder. This shall also apply to parameters set forth in those Work Packages that deal with or modify the CEPI Production Timeframe. As of the Effective Date, the Parties have agreed upon three (3) Work Packages which form an integral part of this Agreement, subject to the terms and conditions of this Agreement. [\*\*\*\*\*] further Work Packages [\*\*\*\*\*] will be finalized and signed between the Parties after the Effective Date subject to a successful Stage Gate Review.

3.4 **First Payment.** CEPI's practice is to make biannual funding payments in advance for the work planned to take place in the next [\*\*\*\*\*] period. CEPI will pay the [\*\*\*\*\*] tranche of CEPI funding for the Work Packages to the Partner within [\*\*\*\*\*] of the latter of receipt by CEPI of a payment request for the relevant amount or execution of this Agreement by the last of the Parties hereto.

3.5 **Subsequent payments.** Partner must request payment of subsequent tranches of CEPI funding by providing CEPI with:

3.5.1. a payment request for the relevant amount on or prior to the date set out in the relevant payment schedule;

3.5.2. Quarterly Reports for two calendar quarters immediately prior to the payment request; and

3.5.3. up to date, true, complete and accurate Financial Documents.

CEPI will pay subsequent tranches of CEPI funding for the relevant Work Package(s) within [\*\*\*\*\*] of receipt of the documents referred to above. CEPI may reschedule or adjust future payments of CEPI funding to address any Underspend that is not returned to CEPI and is carried over by notice in writing to the Partner.

3.6 **Milestones.** Each Work Package Statement sets out one or more milestones (each a “**Milestone**”) for that Work Package together with Milestone Criteria and the Milestone Dates for the Milestone(s). When the Partner considers that a Milestone has been completed, the Partner shall promptly notify CEPI and as soon as reasonably practicable provide the JMAG with a report setting out evidence of the achievement of the Milestone Criteria by the relevant Milestone Date.

3.7 **Stage Gates.** On the completion of each Work Package, CEPI will conduct a review of Project progress (“**Stage Gate Review**”) by convening a CEPI-selected “**Stage Gate Committee**.” The Partner agrees to participate in the Stage Gate Review and to provide reasonably requested information and hold face-to-face meetings with the Stage Gate Committee and CEPI in a timely fashion to avoid disruption and delay between Work Packages. When the Partner considers that a Work Package has been completed, the Partner shall promptly notify CEPI and, as soon as reasonably practicable, provide CEPI with a report setting out evidence of the achievement of the Stage Gate Criteria by the relevant Stage Gate Date or, where any Stage Gate Criteria or Stage Gate Date have not been achieved, a detailed explanation with supporting evidence as to why this was the case. If the Stage Gate Committee has concerns in relation to the documents referred to above, CEPI shall provide reasonable details of the concerns to Partner and may request additional information. CEPI shall, as soon as reasonably practicable, notify the Partner whether CEPI is willing in principle to fund Work Package 4.3, Work Packages 3 and 5 or the next planned Additional Work Package(s) or declines to fund the next planned Additional Work Package(s). Where CEPI is willing to fund the next planned Additional Work Package(s), the Partner promptly shall provide CEPI with a draft Additional Work Package Statement(s) and the Parties shall agree and sign the Additional Work Package Statement(s) in good faith within [\*\*\*\*\*] to ensure smooth transition for activities to be pursued in any such Additional Work Packages.

3.8 **No obligation to fund.** CEPI is not obliged to make any payment of CEPI funding to the Partner under this Agreement where:

3.8.1. CEPI and/or the Partner have not agreed and/or signed the applicable Work Package Statement; and/or

- 3.8.2. the Partner has breached a material obligation set out in this Agreement that is incapable of remedy or has not been remedied within the applicable cure period;
- 3.9 **Use of CEPI funding.** Partner agrees to use CEPI funding and Partner Contribution in accordance with the Work Package Budgets for the purposes described in the relevant Work Package Statements unless otherwise agreed in writing by CEPI in advance.
- 3.10 **Amendment of Work Package Statements.** During the course of a given Work Package, circumstances may arise, which necessitate amendment of a Work Package Statement. The Partner shall notify CEPI promptly of the need for amendment of a Work Package Statement and provide suggested amendments and written justification for same to CEPI. The Parties agree to use reasonable endeavors to negotiate and agree in good faith necessary amendments within [\*\*\*\*\*] to ensure the continuity of the Project and the Work Package.
- 3.11 **Third Party funding or support for the Project.** The Partner may seek other funding or support (whether in kind or otherwise) for the Project or any Work Package, whether commercial or non-commercial but undertakes not to accept such funding without CEPI's prior written consent.
- 3.12 **Expenditure of CEPI funding.** The Partner shall ensure that the control of expenditure of the CEPI funding and the Partner Contribution are governed by the normal standards, procedures and formal audit arrangements that exist in the Partner. CEPI shall have the right to ask for confirmation from the Partner's external auditors that the external auditors have signed their opinion on the Partner's annual accounts of the Partner without qualification and the management letter from the auditors raises no matters that did or could significantly affect the administration of grants awarded by CEPI. If the auditors have raised any such matters in their management letter, CEPI may require the Partner to provide it with relevant extracts from the letter and/or other information.
- 3.13 **Project Audit.** On CEPI's reasonable request, and no more often than once every [\*\*\*\*\*] the Partner shall procure the Partner's external auditors to conduct a Project audit and to provide CEPI with audited Project statements (in accordance with ISA800) at CEPI's cost and expense.
- 3.14 **Terrorism.** Partner will use all Reasonable Efforts to ensure that no CEPI funding will be used to fund individuals or entities associated with terrorism.
- 3.15 **Partner Financial Records.** The Partner shall maintain and retain the Partner Financial Records for [\*\*\*\*\*] from the end of the financial year the records relate to.
- 3.16 **Audit by CEPI.** The Partner shall provide access to the Partner Financial Records to auditors and other personnel from or appointed by CEPI: (i) annually at a mutually agreeable time and location, (ii) on request from CEPI, where CEPI has reasonable grounds indicating that the Partner is in breach of a material obligation under this Agreement, has misapplied CEPI funding or misstated the Partner Contribution; and (iii) on request from CEPI where CEPI is subject to a financial review or audit required by law or by one or more of CEPI's funders. Such access shall include the right to reasonably inspect during regular business hours at times coordinated with the Partner any equipment or facilities acquired or funded under the CEPI funding or Partner Contribution. CEPI shall bear the cost of the audit unless the Partner is shown to have breached a material obligation of this Agreement, have misapplied CEPI funding or overstated the Partner Contribution. In these circumstances the Partner shall bear the reasonable costs of CEPI's auditors.

3.17 **Specific Project cost code.** The Partner shall maintain a separate accounting cost code specific to the Project, and all costs and income properly relating to the Project (including the Partner Contribution) shall be accounted for through that cost code. The Partner shall ensure that appropriate records are kept supporting the entries made on the cost code.

The provisions in this Clause 3 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

#### 4. **PROJECT, STANDARDS AND RECORDS MANAGEMENT**

4.1 **Project Standards.** In performing its obligations under this Agreement, the Partner shall comply with all applicable laws and requirements (including those of Regulatory Authorities), the terms and conditions of this Agreement and the CEPI Policies (the "**Project Standards**"). The Partner is responsible for the management, monitoring and control of all work undertaken by or on behalf of the Partner under any Work Package and compliance with the Project Standards.

4.2 **New CEPI Policies and amendments to CEPI Policies.** CEPI shall give the Partner at least [\*\*\*\*\*] advance notice of the introduction of any new CEPI policy or amendment, update or withdrawal of a CEPI Policy together with a copy of the new or amended CEPI Policy. Where the new CEPI policy or update, amendment or withdrawal will, or is likely to have, a material impact on this Agreement, the Parties shall consult and agree in good faith how to proceed and CEPI shall consider in good faith any reasonable suggestions, comments or concerns raised by the Partner. Subject to agreement by the Partner, any updated or amended CEPI Policy shall replace the equivalent existing CEPI Policy and Schedule 10 shall be updated accordingly.

4.3 **Animals in Research.** Where any Work Package includes work involving animals, the Partner must ensure that such work complies with both the Wellcome policy on the use of animals in research and the principles set out in the document "Responsibility in the use of animals in bioscience research: Expectations of the major research council and charitable funding bodies" (<http://www.wellcome.ac.uk/About-us/Policy/Policy-and-position-statements/WTD040129.htm>). If procedures regulated under the UK Animals (Scientific Procedures) Act 1986 are to be used in any Work Package, the research must comply with such Act (regardless of where the work is carried out), be approved by the local ethical review process and be conducted with due consideration for the principles of the 3Rs (replacement, reduction and refinement of the use of animals in research).

4.4 **Research involving human participants.** Where any Work Package includes work involving human subjects, the Partner must ensure that such work complies with requirements of Clause 9 and:

- (i) The Wellcome Trust's Policy on Clinical Trials (<https://wellcome.ac.uk/funding/guidance/wellcome-trust-policy-position-clinical-trials>),

- (ii) the Wellcome Trust's Policy on Research involving human participants (<https://wellcome.ac.uk/funding/guidance/wellcome-trust-policy-position-research-involving-human-participants>);
- (iii) the Wellcome Trust's Policy on the use of personal information in research (<https://wellcome.ac.uk/funding/guidance/policy-use-personal-information-research>), and
- (iv) the Wellcome Trust's guidance notes on research involving people in low- and middle- income countries (<https://wellcome.ac.uk/funding/guidance/guidance-notes-research-involving-people-low-and-middle-income-countries>).

4.5 **Project Records.** The Partner shall ensure that all staff and Sub-Contractors working on the Project keep full, detailed and accurate records of all of their activities and results obtained in connection with each Work Package of the Project; including scientific records of all research, development and other work carried out in respect of each Work Package of the Project and the results of such research, development and other work is performed in accordance with GLP, GCP and GMP as applicable and in a way which is appropriate for patenting and regulatory purposes.

4.6 **Access to records.** Upon CEPI's request, the Partner shall make available (and shall procure that its Sub-Contractors make available) to CEPI all records generated in connection with any Work Package of the Project (except for any records which at the time of the request should remain blinded to CEPI in the interests of the integrity of a clinical trial).

4.7 **Accuracy of data.** The Partner shall use Reasonable Effort to ensure that the Data it maintains and reports to CEPI and the JMAG, are complete, reliable, accurate and not misleading.

The provisions in this Clause 4 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

## 5. PROJECT MANAGEMENT AND OVERSIGHT

5.1 **Project Lead.** The Partner shall ensure that the Project is managed and operated in accordance with the Team Charter set out in Schedule 11 and shall ensure that the Project Lead has sufficient Project management support to ensure efficient co-ordination of each Work Package on a day-to-day basis.

5.2 **Project Lead replacement.** If the Project Lead ceases to be involved with the Project, ceases to be employed by or provide services to the Partner, ceases to carry out research at premises controlled by the Partner, is prevented from working on the Project through illness or injury for a period of over [\*\*\*\*] or dies, the Partner shall promptly notify CEPI and the Parties will agree on a suitable replacement Project Lead as soon as possible, such agreement not be unreasonably withheld, delayed or conditioned by CEPI.

5.3 **Joint Monitoring and Advisory Group.** The Parties shall establish and operate a joint monitoring and advisory group (the "JMAG") in accordance with the Team Charter.

5.4 **Project oversight.** CEPI may appoint a site visit group made up of a small team of independent experts together with some CEPI observers (including representatives of CEPI's funders) to consult with the Partner's staff working on the Project, to evaluate progress, performance and key issues and to report back to CEPI and the JMAG on its findings. The Stage Gate Committee (described above) also will be involved in Project oversight. The site visit group shall be bound by confidentiality obligations towards the Partner, no less strict than CEPI's confidentiality obligations towards the Partner. CEPI shall notify Partner in advance of any independent expert who is an employee or contractor of Third Parties who develop, manufacture and/or otherwise use competitive mRNA technologies. Partner shall have a right to object to the appointment of such independent expert if it has reasonable grounds to believe that such independent expert may get access to Confidential Information. Partner agrees that the site visit group shall have reasonable access during normal working hours and at mutually agreed times to visit the premises where any Work Package activities are being conducted. The site visit group will report back to CEPI on the progress, management and conduct of the then-current Work Package and Project. CEPI will share information from the site visit group with the JMAG.

The provisions in this Clause 5 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

6. **IPDP**

6.1 **Current IPDP.** Schedule 6 sets out the IPDP agreed between the Parties as of the Effective Date.

6.2 **Amendment of IPDP.** The Parties recognize that the IPDP will need to be amended and refined over time as more information becomes available. The Partner is responsible for keeping the IPDP up to date and amending, expanding, altering and refining the IPDP. Where CEPI funding or the Partner Contribution is used to fund specific Development activities as part of the Project, any amendment, expansion, alteration or refinement to the IPDP affecting the Work Packages must be agreed in writing by the JMAG and any corresponding amendments to any Work Package Statement must also be agreed in writing by the Parties.

The provisions in this Clause 6 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

7. **PARTNER OBLIGATIONS**

7.1 **Project.** The Partner agrees to use Reasonable Efforts during the Project to:

7.1.1. perform and complete the activities detailed in the Work Package Statements for each Work Package funded by the CEPI funding and/or the Partner Contribution in accordance with the agreed timeframe for such Work Package and within the agreed budget for such Work Package;

7.1.2. achieve the Milestone Criteria and Stage Gate Criteria for each Work Package by the applicable Milestone Dates and Stage Gate Dates; provided that if the performance of criteria under a Work Package Statement is delayed or otherwise not achieved, but likely to be achieved in due course, the Parties may agree for the Milestone Criteria and/or Stage Gate Criteria to be met, or the Milestone and/or Stage Gate Dates to be extended; and

7.1.3. complete the Project by [\*\*\*\*\*]

- 7.2 **Regulatory.** Subject to specific Work Packages, the Partner agrees to use Reasonable Efforts develop the regulatory strategy for the Platform for use in the Field and the Project Vaccine for use in the Field, in both cases in accordance with the relevant Work Package Statement for review and approval by JMAG. Such strategy shall include the strategy with respect to any data, market or other regulatory exclusivity periods that may be applicable in the Affected Territory or a territory which may be served by an Approved Regulatory Authority.
- 7.3 **IND or CTA.** Subject to specific Work Packages, the Partner agrees to use Reasonable Efforts to file for, obtain and maintain an IND or a CTA for Project Vaccine Developed by Partner for use in the Field in both a territory served by an Approved Regulatory Agency and the Affected Territory.
- 7.4 **Master Files for the Platform, and for the commercial use of Project Vaccine.** At the request and cost of CEPI pursuant to a specific request from a Regulatory Agency, the Partner agrees to provide copies of Master Files and existing Data for Products to Regulatory Authorities that request such information to support Regulatory Filings and submissions for the Platform and/or for Project Vaccines for use in the Field.
- 7.5 **Meetings with Regulatory Authorities.** The Partner shall invite a CEPI nominee to observe relevant interactions between the Partner and Regulatory Authorities relating to the Platform and Project Vaccines for use in the Field. At CEPI's reasonable request, the Partner will request a meeting with Regulatory Authorities to deal with any significant unresolved issues. The Parties acknowledge and agree that CEPI is bound by confidentiality obligations to the Partner pursuant to Clause 17 of this Agreement and that confidentiality concerns will not prevent the Partner and the Regulatory Authorities from having open and frank discussions in CEPI's presence.
- 7.6 **Trusted Manufacturers.** Subject to the undertakings to be defined in the Additional Work Packages and - upon Partner's request, subject to a separate confidentiality agreement to be concluded between the Partner and the Trusted Manufacturer - the Partner will support CEPI in appointing one or more Trusted Manufacturers that are technically and operationally capable of and willing to rapidly Manufacture Product for use in the Field in the Affected Territory on an ongoing basis both during and after completion of the Project, in accordance with CEPI's requirements, as set forth herein.
- 7.6.1. Subject to the undertakings in the Additional Work Packages the Partner shall:
- (i) grant appointed Trusted Manufacturers all necessary rights to use (on a non-exclusive, royalty-free and license-fee free basis) the Background Technology and Project Technology to further Develop the Platform, and to Manufacture Products for use in the Field in the Affected Territory in accordance with the CEPI Production Timescale and in the quantities reasonably likely to be necessary in the event of an Outbreak or risk of Outbreak in the Field and at a cost of goods in line with the methodology to determine pricing obligations set out in the CEPI Equitable Access Policy;

- (ii) provide the Technology Transfer Materials to the Trusted Manufacturers and ensure that such Technology Transfer Materials are kept up to date, in particular, at each date on which the Partner requests any payment from CEPI, on the occurrence of one or more Conditions Precedent and on termination or expiration (for whatever reason) of this Agreement;
- (iii) at the request of CEPI, enable Trusted Manufacturers to establish a warm base for the further Development of the Platform, and Manufacturing of Products for use in the Field in the Affected Territory;
- (iv) collaborate with public sector agencies to use the Platform to Manufacture Products for use in the Field in the Affected Territory in accordance with the CEPI Production Timeframe in the quantities reasonably likely to be necessary and at a cost of goods in line with the methodology to determine pricing obligations set out in the CEPI Equitable Access Policy, in particular before any Outbreak or when there is Risk of Outbreak; and
- (v) provide all necessary commercially reasonable support to the Trusted Manufacturers to facilitate the foregoing.

7.7 **Partner nominees for Trusted Manufacturers.** Upon CEPI's request, Partner will use Reasonable Efforts to notify CEPI of suitable Trusted Manufacturers for appointment by CEPI.

7.8 **CEPI nominees for Trusted Manufacturers.** CEPI may nominate by notice in writing to Partner Third Parties as suggested Trusted Manufacturers. The Partner shall consider any Third Parties nominated by CEPI as potential Trusted Manufacturers in good faith. Where a Third Party nominated by CEPI is not acceptable to the Partner on reasonable grounds (including commercial grounds), the Partner shall notify CEPI promptly of its decision and the reasonable grounds and CEPI shall not appoint such Third Party as a Trusted Manufacturer.

7.9 **Additional Trusted Manufacturers.** Subject to specific Additional Work Packages, CEPI has the right during the Project Term to pursue the appointment of additional Trusted Manufacturers where such additional capacity is necessary or useful to:

- 7.9.1. develop and/or increase Manufacturing capacity for Products for use in the Field in the Affected Territory to satisfy demand or likely demand;
- 7.9.2. develop and provide warm base Manufacturing capacity for emergency planning and contingency planning;
- 7.9.3. Manufacture emergency stockpiles of Products for use in the Field in the Affected Territory.

Partner shall consider CEPI's requests for additional Trusted Manufacturers in good faith and shall within [\*\*\*\*\*] of receipt of such request notify CEPI in writing whether the Partner agrees or declines to support the appointment of additional Trusted Manufacturers by CEPI together with the grounds for its decision.

7.10 **Disputes as to Trusted Manufacturers.** In the event that the Parties are unable to reach agreement on the identity, number and/or necessary aggregate capacity of Trusted Manufacturers, the matter shall be resolved in accordance with the dispute resolution procedure set out in Clause 22.

- 7.11 **Partner reporting and compliance:** Subject to specific Work Packages, Partner shall provide the following reports, notifications and samples to CEPI:
- 7.11.1. **Financial reports.** The Partner shall make the reports required under Clause 3 in accordance with the terms thereof.
  - 7.11.2. **Project Technology.** The Partner shall ensure that the Project Lead promptly notifies JMAG and CEPI in writing of all Project Technology, and if required by CEPI, provides any assay or animal model for testing by a neutral Third Party acceptable to both CEPI and the Partner. The Partner shall share all Data and results with CEPI and the JMAG in as close to real-time as possible.
  - 7.11.3. **Patents.** Partner shall inform the JMAG about patent applications filed for Project Technology.
  - 7.11.4. **Epidemiology.** Partner agrees to make data generated pursuant to clinical trials in the Field that are relevant to the epidemiology of any disease in the Field publicly available within [\*\*\*\*\*] of the generation of such data.
  - 7.11.5. **Quarterly Reports.** Partner shall provide Quarterly Reports to CEPI within [\*\*\*\*\*] of the end of each Project quarter.
  - 7.11.6. **Safety Issues.** The Partner shall notify CEPI and relevant JMAG members immediately by email (with receipt acknowledgement) as well as in writing in accordance with Clause 21.9:
    - (i) on receipt of any information that raises any material concerns regarding safety or efficacy of Product or the Platform;
    - (ii) where any data relating to a Product discloses a serious adverse event;
    - (iii) where a serious adverse event is suspected;
    - (iv) on the occurrence of a serious adverse event, serious adverse reaction, or any other material safety signal;
    - (v) of any Product recalls; and
    - (vi) of any recommendations from the data safety monitoring board for a clinical trial of a Product to end a clinical trial;(together, the “**Safety Issues**”).
  - 7.11.7. **Pharmacovigilance.** The Partner shall notify CEPI promptly in writing of any relevant event under any pharmacovigilance activities;
-

7.11.8. **Insurance.** The Partner shall:

- (i) provide CEPI with a copy of each insurance policy and certificate referred to in Clause 18.9 annually on renewal; and
- (ii) notify CEPI of any claims made under the insurance policies referred to in Clause 18.9 during the Project Term and for at least the duration of any applicable statutory period of limitation afterwards.

7.11.9. **Equitable Access.** Subject to Work Packages, Partner shall provide the following to CEPI to the extent not already included in the reports and information provided by the Partner to CEPI:

- (i) progress report on the scale-up of the Platform for Manufacturing and a good faith estimate of the cost of the scale-up where such scale-up is necessary;
- (ii) progress report on the scale-up of Manufacturing of Project Vaccine for use in the Field to fulfill any requirements of an Approved Regulatory Authority for the grant of marketing approval for such Project Vaccine for use in the Field in the Affected Territory;
- (iii) progress reports on submissions to Regulatory Authorities for a Platform Confirmation or plans to do the same;
- (iv) a good faith estimate of the number of doses of each Project Vaccine for use in the Field the Partner and/or Trusted Manufacturers are capable of producing, using the Platform and dates by when Partner estimates such volume will be achieved;
- (v) a good faith estimate of Cost of Goods of doses of each Project Vaccine for use in the Field for both the investigational stockpile and any additional doses; and
- (vi) the documents and information any estimates are based on together with any information on any factors that may impact the cost of each Project Vaccine use in the Field.

7.11.10. **Partner Funder Requirements.** The Partner shall notify CEPI promptly of any commitments made by Partner to other funders, such as Gates, for example, that arise or otherwise become applicable after the Effective Date and may have an impact on CEPI's ability to utilize Project Technology in the event of an Outbreak or risk of an Outbreak and provide an informational copy of such commitments to CEPI.

7.11.11. **Publication of details of clinical trials under the Project.** The Partner shall publish details of any clinical trial under the Project on a publicly accessible clinical trials register as required under law and, as applicable, prior to the commencement of patient recruitment for such clinical trial, and shall provide to CEPI evidence of such publication within [\*\*\*\*\*] of the same.

7.11.12. **Publications.** The Partner shall ensure that the Project Lead furnishes CEPI with a copy of any proposed publication or presentation which relates to Project Technology at least [\*\*\*\*\*] in advance of the submission of such proposed publication or presentation to a journal, editor or publication.

7.11.13. **Open Access.** A copy of the final manuscript of all research publications, journal articles, scholarly monologues and book chapters that relate to any Work Package of the Project must be deposited into PubMed Central (or Europe PubMed Central) or otherwise made freely available upon acceptance for publication or immediately after the publisher's official date of final publication. All peer-reviewed published research funded, in whole or in part, by CEPI shall be published in accordance with the following requirements of Gates: <https://www.gatesfoundation.org/How-We-Work/General-Information/Open-Access-Policy>.

7.11.14. **Open Data.** The Partner shall publicly share Data and results (including negative results) arising from the CEPI funding as close to real time as possible in accordance with CEPI's Transparency Policy and customary research publication norms. The Partner shall share its Data through an easily discoverable public route (website or system) which includes a metadata description, where patient privacy is upheld, and the system follows a request-for-information approach (where requests are fulfilled subject to an independent review and approval step). If, according to a CEPI policy, Partner Know-How is to be published such shall only occur, provided such Partner Know-How does not contain any Background Technology of the Partner, or Improvements to Background Technology of the Partner, and provided the JMAG has made a decision on this beforehand, taking the Partner's reasonable concerns into account.

7.11.15. **Regulatory Filings.** Subject to specific Work Packages the Partner shall regularly update the JMAG on Regulatory Filings and submissions relating to the Platform and the Project Vaccine for use in the Field and put copies of the following on the JMAG electronic archiving service in a timely manner:

- (i) all submissions to Regulatory Authorities and Regulatory Filings in respect of the Platform and Project Vaccine for use in the Field together with all Data included or referenced therein (other than ministerial submissions that do not involve safety or efficacy issues);
- (ii) documents and information exchanged between any Regulatory Authority and the Partner relating to the Platform and/or Project Vaccine for use in the Field;
- (iii) Master Files for Product Vaccines for use in the Field; and
- (iv) the equivalent of a Master File in relation to the Platform.

The provisions in this Clause 7 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

## 8. **OUTBREAK AND RISK OF OUTBREAK IN THE FIELD**

8.1 **Notification of Outbreak or Outbreak risk.** CEPI shall notify Partner if there is an Outbreak in the Field or risk of an Outbreak in the Field.

- 8.2 **During or after the Project where Outbreak or risk of an Outbreak can be addressed by a Project Vaccine:** On receipt of such notice, subject to the respective Work Packages, the Work Package Statements and the Work Package Budgets the Partner agrees to make Reasonable Efforts to:
- 8.2.1. continue the Development, and Manufacturing the Project Vaccine for use in the Field in the Affected Territory in accordance with the existing or mutually agreed upon IPDP and Work Package Statements;
  - 8.2.2. Manufacture the Project Vaccine for use in the Field in the Affected Territory in accordance with the CEPI Production Timeframe and in the quantities reasonably likely to be necessary and at a Cost of Goods in line with the methodology to determine pricing obligations set out in the CEPI Equitable Access Policy;
  - 8.2.3. establish directly or to enter into an agreement with CEPI, a public sector agency or another Third Party, for the supply of Project Vaccine for use in the Affected Territory;
  - 8.2.4. at the request of CEPI, agree in good faith with CEPI how the Development, and Manufacturing of the Project Vaccine can be accelerated and the amount of any additional funding necessary for such acceleration; and
  - 8.2.5. make the Partner Contribution in accordance with the Work Package Statements.
- 8.3 **When an Outbreak or risk of an Outbreak Cannot be Addressed by a Project Vaccine:** During the Initial Project Term and for [\*\*\*\*\*] thereafter where an Outbreak or risk of Outbreak in the Field cannot be addressed by a Project Vaccine or other Product Developed subject to an Additional Work Package, CEPI may notify Partner of its interest to develop such other Product, and CEPI and Partner may agree that Partner either develops such Product, or utilizes the RNA Optimizer Toolkit to assist CEPI to develop a candidate vaccine against that pathogen in the Field and to produce a vaccine stockpile, in each case pursuant to an Additional Work Package to be negotiated in good faith and agreed upon.
- 8.3.1. If Partner declines to enter into such agreement to develop Product, and subject to Partner's obligations under Clause 8.3.2 below, then CEPI has the right to develop and stockpile such Products for potential use in the Field and to have such Product Manufactured by a Third Party in accordance with the Public Health License under Clause 11 below.
  - 8.3.2. Upon CEPI's notice in accordance with this Clause 8.3.2, Partner agrees to use Reasonable Efforts to submit optimized antigen nucleotide sequences utilizing the RNA Optimizer Toolkit for up to [\*\*\*\*\*] specified pathogens (based on amino acid sequences of such antigens provided by CEPI) under Additional Work Packages within the Field and during the Initial Project Term and for [\*\*\*\*\*] thereafter in order for CEPI to start its own product development. Partner agrees to provide up to [\*\*\*\*\*] optimized antigen nucleotide sequences per specified pathogen. If Partner agrees to develop another Product, such Product shall count against such [\*\*\*\*\*] pathogens above. For the avoidance of doubt regarding the scope of these activities, the Parties shall prepare an Additional Work Package that clarifies the specifications of these activities. For clarity, Partner will not be required to undertake any further development activities with respect to a Product, and CEPI with other partners will solely be responsible to advance the candidate Product for emergency use authorization or other marketing approval, such as, for example, pre-clinical studies.

8.3.3 CEPI will give Partner a Partner Right of First Refusal to Manufacture a Product developed pursuant to the foregoing Clause 8.3.2 on the Platform, subject to an Additional Work Package to be negotiated between the Parties in good faith and agreed upon setting out the activities to be conducted, Milestone Criteria, Milestone Dates, Work Package Budget, CEPI funding and the Partner Contribution. If the Partner declines to carry out such activities:

- (i) CEPI may exercise the Public Health License and the activities shall be carried out by Trusted Manufacturers; and
- (ii) the Partner shall comply with the provisions of Clause 12.

If the Partner agrees to carry out the activities, but the Parties are unable to reach agreement by the deadline, or are unable to agree the Additional Work Package Statement within [\*\*\*\*\*] of CEPI's receipt of the Partner's written notice referred to above, the terms submitted by CEPI will apply.

9. **CLINICAL TRIALS.**

9.1 **Clinical trials under the Project.** Subject to specific Work Packages where any Work Package includes a clinical trial, the Partner must:

- 9.1.1. be the sponsor of the clinical trial (unless CEPI and the Partner otherwise agree in writing);
- 9.1.2. ensure that the clinical trial is conducted in accordance with GCP;
- 9.1.3. be responsible for obtaining and maintaining all Regulatory Approvals (including ethical committee approvals) necessary or reasonably useful for the conduct of the clinical trial and appropriate clinical trial insurance cover;
- 9.1.4. establish a trial steering committee (TSC) comprised solely of members who are independent of the Partner and who are not involved in the clinical trial. The TSC shall approve the clinical trial protocol and monitor the progress of the clinical trial, including any changes to the protocol;
- 9.1.5. notify CEPI in writing immediately of the occurrence of any Safety Issues;
- 9.1.6. obtain or have obtained from each subject in the clinical trial, prior to enrollment and in accordance with all applicable laws and regulations, and as a condition of that clinical trial subject's participation in the clinical trial, his or her informed consent to;
- 9.1.7. to the extent legally permitted, give direct access to his or her medical records;
- 9.1.8. to the extent legally permitted, process Data relating to him or her and to the movement of that Data to other countries, including countries outside of the European Economic Area; and

9.1.9. to the extent legally permitted, transfer such Data to the Partner, CEPI and/or Trusted Manufacturer(s) and the use of such Data in obtaining marketing approval and/or Platform Confirmation.

9.2 **Clinical trial data.** Subject to specific Work Packages with respect to each clinical trial under the Project:

9.2.1. the Partner shall procure that the Data is complete and include all completed case report forms and all other clinical trial documentation required to be in the possession of a clinical trial sponsor by Article 15(5) of Directive 2001/20/EC, Article 16 of Directive 2005/28/EC or other relevant applicable law;

9.2.2. a CEPI representative or nominee shall have the right (except for any matters which should remain blinded to CEPI in the interests of the integrity of the clinical trial) to:

- attend meetings of the TSC and the data safety monitoring board (DSMB) for the clinical trial as an observer;
- receive all papers that a member of the TSC or DSMB would be entitled to receive; and
- attend TSC or DSMB meetings by telephone or other electronic means rather than in person.

9.3 **Samples.** CEPI may engage one or more neutral external Third Party laboratories or Third Party collaborators ("Assessors") to perform additional testing (at CEPI's cost) on biological samples in order to provide CEPI with directly comparable evaluations of similar vaccines produced by CEPI's portfolio of vaccine platforms. In order to maintain appropriate blinding, CEPI may, in its sole discretion and at its own cost, also engage certain neutral Third Party entities to transport the samples from Partner to the Assessor as well as other services, for example, addressing import/export issues or documentation for biological samples (the "Transfer Agent"). The results of the testing, analysis, meta-analysis or other assessments will be subject to the confidentiality obligations under this Agreement. Upon request, CEPI will provide Partner with data or other assessments it receives from the Assessors regarding Partner's own Project Vaccines, Products and/or Platforms. To enable CEPI to conduct such testing to the extent available, Partner agrees to:

- provide CEPI's designated Assessor an agreed number of doses of the Project Vaccines, representative of the final drug product, for animal immunogenicity studies;
- provide CEPI's designated Assessor an agreed number of doses of the Project Vaccines, representative of the final drug product, for animal challenge studies;
- provide CEPI's designated Assessors (either directly or through the Transfer Agent) with agreed volumes of biological samples (e.g. serum, PBMCs) from human subjects vaccinated with the Project Vaccines in Phase 1 clinical trials at specified timepoints agreed with CEPI for immunology testing;
- provide CEPI's designated Assessors (either directly or through the Transfer Agent) with an agreed number of samples from clinical studies under the Project for use in future research carried out by or on behalf of CEPI in the Field;
- include language in the informed consent forms used in connection with the collection of the biological samples described herein, granting permission for such samples and any associated data (both duly anonymized) to be used for the purposes indicated in this Clause 9 and also that all such informed consent forms have been approved by any and all appropriate ethical committees or institutional review boards; and
- obtain informed consent from the human subjects vaccinated with the Project Vaccines in clinical trials that gives permission for the collection and use of such samples and associated data (duly anonymized and, upon CEPI's request, blinded) for the purposes indicated in this Clause 9, and also that all such informed consents satisfy the requirements of any and all appropriate ethical committees or institutional review boards.

Any samples to be transferred or exported by or on behalf of the Partner (either directly to the Assessor or via a Transfer Agent) from a clinical trial site or an Affected Territory must be transferred and/or exported pursuant to the terms and conditions of a suitable to-be-agreed-upon material transfer agreement (for example, the Draft WHO Blueprint MTA or similar) to be entered into between the Partner and the Assessor (and the Transfer Agent if appropriate) in addition to any other applicable laws and regulations. Partner undertakes to ensure that all requisite informed consent documentation allowing the provision, transportation, use and analysis of relevant samples have been obtained; furthermore, Partner will have obtained any and all ethical committee or institutional review board approvals necessary prior to its undertakings pursuant to this Clause 9.

9.4 **Data.** CEPI may engage one or more Assessors to perform certain assessments and/or meta-analyses of data (at CEPI's cost) to provide CEPI with directly comparable assessments of equivalent vaccines produced by CEPI's portfolio of vaccine platforms. The results of the data analysis or other assessments will be subject to the confidentiality and data protection obligations and the limitations of the Public Health License under this Agreement. Upon request, CEPI will provide the results of such data analysis as regards their own data to the Partner. To enable CEPI or its Assessors to conduct such analyses, subject to specific Work Packages, the Partner agrees to take Reasonable Efforts as follows:

- 9.4.1. to provide data or other information generated by Partner under this Agreement to CEPI's designated Assessor as CEPI shall request, including without limitation, data regarding CMC, formulation or the results of any of its pre-clinical or clinical trials (duly anonymized and, upon CEPI's request, blinded);
- 9.4.2. to provide CEPI's designated Assessor with other data (duly de-identified and, upon CEPI's request, blinded) from the Development as CEPI may reasonably request in order to conduct comparative assessments and meta-analyses thereof;
- 9.4.3. to include language in the informed consent forms used in connection with the use of data or the collection of samples from which such data is derived, granting permissions for such data (duly de-identified) to be used for the purposes indicated in this Clause 9, and also that all such informed consent forms have been approved by any and all appropriate ethical committees or institutional review boards; and
- 9.4.4. to obtain informed consent from the human subjects vaccinated with the Project Vaccines in clinical trials that gives permission for the use of data (duly de-identified and, at CEPI's request, blinded) and for the collection of samples from which data is derived (ensure that all requisite informed consent documentation allowing the provision, transportation, use and analysis of data by CEPI or its designated Assessors as indicated in this Clause 9; and also that all such informed consents satisfy the requirements of any and all appropriate ethical committees or institutional review boards.

The provisions in this Clause 9 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

#### 10. COLLABORATORS AND SUB-CONTRACTORS.

10.1 **Contractors and Sub-Contractors.** Where the Partner wishes to use a Third Party collaborator or Sub-Contractor to conduct any specific part of the Project or a Work Package assigned to the Partner and to be delegated to such party (hereinafter the "Sub-Contractor"), it shall seek the consent of the JMAG which shall not be unreasonably withheld, conditioned or delayed, prior to entering into any agreement with such Sub-Contractor(s), unless (x) Partner has a standing contractual relationship with such Sub-Contractor, such Sub-Contractor is providing services for Partner also in the context of other projects; or (y) such Sub-Contractor is explicitly named, with full identification details provided, including registered address and, where relevant, company number, along with a clear explanation of the role such Sub-Contractor shall perform and what Contractor Results and Deliverables they shall produce in the Work Package Statement; and shall ensure that:

- 10.1.1. the Sub-Contractor grant rights to the Partner to use any Contractor Results and Deliverables generated by the Sub-Contractor;
- 10.1.2. a suitable written Sub-Contract agreement is put in place between the Partner and the Sub-Contractor. For the avoidance of doubt, CEPI must approve all Sub-Contractors that:
  - (i) will be allocated CEPI funds in an amount greater than USD \$ [\*\*\*\*\*] per year to conduct any part of the Project;
  - (ii) will conduct a clinical trial; or
  - (iii) will have rights to Manufacture, distribute or otherwise commercialize a Product;
- 10.1.3. the agreement with the Sub-Contractor is consistent with both the Work Package approach to the Project and the Milestones, Milestone Criteria, Milestone Dates, Stage Gate Criteria and Stage Gate Dates for the applicable Work Package(s), and - with respect to agreements or work orders with Sub-Contractors, which are concluded specifically to perform the Work Packages, - the termination provisions are consistent with this Agreement so that such subcontracting agreement or work order automatically terminates or is capable of termination on termination of this Agreement or termination of any Work Package, and prohibits the Sub-Contractor from sub-contracting its obligations; and
- 10.1.4. the agreement with the Sub-Contractor complies with the provisions of this Agreement required to be imposed on Sub-Contractors or contains provisions that enable the Partner to comply with its obligations under this Agreement including this Clause 10, Clause 3 (Financial Records and audit requirements) Clause 4 (*Project Standards, Records and Management*), Clause 5 (*Project Management and Oversight*), and Clause 17 (*Confidentiality*).

10.2 **Partner Affiliates.** The Partner may perform its obligations under this Agreement through an Affiliate. The Partner shall be responsible for the acts and omissions of the Affiliate as if they were the Partner's own acts and omissions.

The provisions in this Clause 10 shall apply mutatis mutandis to Additional Work Packages and Additional Work Package Statements.

#### 11. **PUBLIC HEALTH LICENSE**

11.1 The Partner hereby grants to CEPI with effect from the Effective Date, a non-exclusive, worldwide, royalty-free and license-fee free license (except in respect of the sharing of Commercial Benefits pursuant to Clause 13) under the Background Technology and Project Technology to:

- 11.1.1. develop the Platform for use in the Field via Trusted Manufacturers;
- 11.1.2. Manufacture and market Product for use in the Field in the Affected Territory via Trusted Manufacturers;
- 11.1.3. Develop the Project Vaccine;
- 11.1.4. compare and contrast the relative advantages and disadvantages of the Platform and alternative platforms for use in the Field; and
- 11.1.5. compare and contrast the relative advantages and disadvantages of Product for use in the Field in the Affected Territory against the advantages and disadvantages of alternative equivalent products for use in the Field in the Affected Territory;

(together, the "**Public Health License**"); provided however that CEPI may not exercise the rights granted under the Public Health License unless and until the occurrence of one or more Conditions Precedent.

- 11.2 **Covenant not to sue.** During the term of the Public Health License under this Clause 11, Partner shall not sue CEPI, or any Third Party which holds a permitted sublicense to the Background Technology from CEPI or a sublicensee of CEPI, for infringement of any Technology Controlled by the Partner, by developing Products in the Field and for the Affected Territory, even if such Technology is not part of the Background Technology.
- 11.3 **Third Party license fees.** To the extent the Public Health License triggers payments to Third Parties, including license fees and royalty payments, CEPI shall assume these payment obligations, and reimburse any payments made by Partner for such use.
- 11.4 **No implied licenses.** Except for the rights and licenses granted to CEPI, the Partner retains all rights under its Technology.
12. **CONDITIONS PRECEDENT AND EXERCISE OF THE PUBLIC HEALTH LICENSE**
- 12.1 **Exercise of Public Health License.** CEPI may exercise the Public Health License by notice in writing to the Partner on the occurrence of one or more of the events set out below (each a “**Condition Precedent**” and together the “**Conditions Precedent**”):
- 12.1.1. except where failure is due to reasonable scientific, safety or regulatory issues, the Partner:
- (i) materially fails to Develop the Platform and/or the Project Vaccines in accordance with the Work Package Statements or Additional Work Package Statements as they relate to Products and/or the IPDP; or
  - (ii) fails to use Reasonable Efforts to satisfy any Milestone Criteria or Stage Gate Criteria by the relevant Milestone Date or Stage Gate Date; and in each case, fails to remedy the situation within [\*\*\*\*] of the receipt by Partner of notice from CEPI identifying the failure and requiring its remedy (or as otherwise as agreed in writing by the Parties);
- 12.1.2. CEPI terminates the Agreement in accordance with Clause 19.2 below.
- 12.1.3. in the event of an Outbreak or Outbreak risk:
- (i) the Partner does not exercise the Partner Right of First Refusal or declines to enter into an agreement under Clause 8.3.1;
  - (ii) the Partner informs CEPI that it will not be able to Develop and Manufacture Project Vaccine in accordance with the CEPI Production Timeframe, in sufficient quantities and at an appropriate cost given the nature and health implications of the Outbreak or Outbreak risk;
  - (iii) the Partner’s Development and Manufacture of Project Vaccine for use in the Field does not achieve the CEPI Production Timeframe, in appropriate quantities and/or at an appropriate cost given the nature and health implications of the Outbreak or Outbreak risk; or
  - (iv) CEPI, in good faith, based on actual non-performance or late performance has reason to assume that the Partner is unable or unwilling to Develop or Manufacture Project Vaccine for use in the Field in sufficient quantities in accordance with the CEPI Production Timeframe and at an appropriate cost given the nature and health implications of the Outbreak or Outbreak risk;

- 12.1.4. if by the date [\*\*\*\*] following successful completion of the Project the Cost of Goods for the Project Vaccines for use in the Field exceeds the level public service agencies agree is affordable based on objective economic criteria to be determined between the Parties for use in the Affected Territory;
- 12.1.5. if by the date [\*\*\*\*] following successful completion of the Project, the Cost of Goods for a specific Project Vaccine for use in the Field exceeds the level public service agencies agree is affordable based on objective economic criteria to be determined between the Parties for use in the Affected Territories;
- 12.1.6. where one or more Project Vaccine becomes subject to a pattern of serious adverse events (as defined in the ICH Guidelines) or either Party receives notice from a Regulatory Authority, independent review committee, a data safety monitoring board or another similar clinical trial or post-marketing body alleging significant concern regarding a patient safety issue, in each case in which CEPI, in good faith, reasonably believes would seriously impact the long-term viability of one or more of the Project Vaccines for use in the Field;
- 12.1.7. there are material Safety Issues and/or quality issues in relation to use of the Platform that will seriously impact the long-term viability of the Platform; and
- 12.1.8. on termination of the Agreement where the Partner is the Defaulting Party.
- 12.2 **Disputes relating to the occurrence of a Conditions Precedent.** In the event that the Parties dispute the occurrence one or more of the Conditions Precedents, the matter shall be resolved in accordance with the dispute resolution procedure set out at Clause 22 provided however that any arbitration decision shall be made within [\*\*\*\*] of the date of the reference to arbitration. Whilst the dispute is subject to arbitration, on the occurrence of an Outbreak in the Field and/or risk of an Outbreak in the Field, CEPI shall be entitled to exercise the Public Health License solely to have Developed Project Vaccines, and to have Manufactured and marketed Product via the Trusted Manufacturer for use in the Field in the Affected Territory to address the Outbreak or Outbreak risk. In such event, the Partner shall use all reasonable endeavors to give assistance to CEPI and/or the Trusted Manufacturer(s) including: (i) transferring to the Trusted Manufacturer(s) all Data, Materials, Confidential Information and Regulatory Filings (including the Master File) necessary or desirable for CEPI to conduct such Development of Products including Project Vaccines, Manufacturing and marketing; and (ii) executing any necessary documents.
- 12.3 **Effects of exercise of the Public Health License.** On exercise of the Public Health License, CEPI, after consultation with Partner, shall have the discretion to make any reasonable decisions in relation to the Development of the Platform for use in the Field, the Development of Products including Project Vaccine, Manufacturing and marketing of the Product for use in the Field in the Affected Territory by the Trusted Manufacturer(s). The Partner shall use all reasonable endeavors to give assistance to CEPI and/or the Trusted Manufacturer(s) in relation to such Manufacturing for use in the Field in the Affected Territory including executing any necessary documents.
- 12.4 **Rights of action.** Following exercise of the Public Health License, CEPI shall have the right to take all such action as it shall consider necessary or appropriate at its discretion and expense to bring or defend an action on behalf of the Partner in relation to Project Vaccine for use in the Field and use of the Platform in the Field. The Partner shall (at CEPI's cost) provide all reasonable assistance to CEPI as CEPI may request in relation to such action, including granting CEPI the right to bring an action in the name of the Partner (if necessary).

- 12.5 **Release of Technology Transfer Materials.** On the exercise of the Public Health License, the Partner shall release immediately the Technology Transfer Materials.
- 12.6 **Contracts.** Subject to applicable confidentiality obligations, the Partner shall provide CEPI with copies of all Sub-Contracts which relate to the Development of the Platform for use in the Field, the Development of Project Vaccine, and the Manufacturing of Product in the Field and access to which is required for the Third Party Manufacture within [\*\*\*\*] of exercise of the Public Health License. Provided that exercise of the Public Health License was not caused directly or indirectly by the Sub-Contractor and that Sub-Contractor is not then in breach, the Partner shall use all Reasonable Efforts, at CEPI's reasonable request, to facilitate the conclusion of a direct contractual relationship between the Sub-Contractor and CEPI or Trusted Manufacturer to the extent required for CEPI or its nominee.
- 12.7 **Clinical trials after exercise of Public Health License.** Where CEPI has exercised the Public Health License and a clinical trial of Project Vaccines/ Products for use in the Field is to be conducted, CEPI shall:
- 12.7.1. ensure that the clinical trial has an appropriate Sponsor;
  - 12.7.2. comply with CEPI's insurance obligations pursuant to Clause 18.10 and ensure appropriate clinical trial liability insurance cover for the clinical trial is in place;
  - 12.7.3. ensure that the clinical trial is conducted in accordance with GCP;
  - 12.7.4. ensure that all Regulatory Approvals (including ethical committee approvals) necessary or reasonably useful for the conduct of the clinical trial are obtained;
  - 12.7.5. ensure that a trial steering committee (TSC) is established which shall approve the clinical trial protocol and monitor the progress of the clinical trial, including any changes to the protocol. The TSC shall only include members who are independent of CEPI and who are not otherwise involved in the clinical trial;
  - 12.7.6. communicate to Partner in writing immediately the occurrence of any Safety Issues; and
  - 12.7.7. ensure that, to the extent possible, prior to enrolment and in accordance with all applicable laws and regulations, and as a condition of that clinical trial subject's participation in the clinical trial, each subject provides his or her informed consent -to the extent legally permitted - to:
    - (i) direct access to his or her medical records;
    - (ii) process Data relating to him or her and to the movement of that Data to other countries, including countries outside of the European Economic Area;
    - (iii) transfer of such Data to the Partner, CEPI and/or Trusted Manufacturer(s) and the use of such Data in obtaining marketing approval and/or Platform Confirmation; and
    - (iv) use of samples in accordance with Clause 9.3.

13. **COMMERCIAL BENEFITS ARISING FROM COMMERCIAL USE**

13.1 **Commercial Use.** In the event of any Commercial Use by Partner of Products, which are developed, Manufactured or commercialized by or on behalf of CEPI in the Field in an Affected Territory using Project Technology, the Partner shall:

13.1.1. notify CEPI promptly of such Commercial Use; and

13.1.2. comply with the CEPI Equitable Access Policy set out in the relevant CEPI Policy at [Schedule 10](#) with respect to such Products, and subject to Section 13.2 below.

13.2 **Commercial Benefits sharing agreement.** The Parties shall agree in good faith how such Commercial Benefits (if any) are to be managed in a fair, equitable and proportionate manner, taking account the financial contribution of each of the Parties to the Background Technology and Project Technology being exploited, the public and philanthropic nature of the CEPI funding, any other non-repayable public or philanthropic financial contribution to the foregoing, the public benefit derived from the Commercial Use, and any private or ancillary benefit that may arise. The Parties shall execute a separate agreement implementing their good faith agreement on how such Commercial Benefits are to be managed in a fair, equitable and proportionate manner as of the Effective Date of this Agreement. For the avoidance of doubt, Commercial Benefits generated outside the Field and/or outside the scope of Clause 13.1 will not be shared between the Parties.

13.3 **Use of Product in Affected Territory Only.** CEPI intends to take Reasonable Efforts to ensure that the Products will be utilized in the Affected Territory only and to prevent parallel imports of such Products into other countries, which efforts may include CEPI or its contractor or licensee placing an indication on the packaging of the Products that they are for use in countries of the Affected Territory only and are not to be exported into any other countries. If either Party becomes aware that parallel imports of such Products outside the Affected Territory are occurring, the Parties will inform each other and will cooperate in good faith to verify the circumstances and take such reasonable action as they mutually agree is necessary.

14. **BACKGROUND TECHNOLOGY AND PROJECT TECHNOLOGY**

14.1 **Background Technology.** Partner shall have the right but not the obligation to prosecute, maintain and defend the patent rights which are part of the Background Technology.

14.2 **Ownership of Project Technology.** Except as expressly provided below and to the extent feasible and legally possible, all Project Technology shall be either the property of the Partner or be licensed from Third Parties, and any patents in respect of Project Technology shall be applied for in the name of the Partner. The Partner shall procure that:

14.2.1. any Affiliate, Third Party collaborator, Third Party funder, co-owner or Sub-Contractor of the Partner shall assign all its right, title and interest in Project Technology promptly to the Partner to the extent Controlled and shall retain rights in the same to the extent stipulated under the agreement between Partner and Sub-Contractor

14.2.2. it shall have in place contracts with those working on or funding all Work Packages of the Project to ensure that the Project Technology shall vest in the Partner and not with any members of staff individually. Where by local applicable law such rights do vest in individual members of staff, the Partner shall ensure that it has all rights to take assignment of all right title and interest in the same and the Partner shall bear the costs of any necessary contribution to such individual or other costs of assignment; and

14.2.3. where a Partner has appointed NIH or another government entity or university as a Third Party Sub-Contractor and such government entity is required by law or otherwise to retain ownership of Contractor Results they have generated in the conduct of activities described in a Work Package Statement ("**Government Results**"), the Partner shall ensure that the government entity provides Partner with sufficient rights and license (including via option to license where the government entity is unable to provide licenses in advance of generation) to any such Government Results in order to enable the Partner or CEPI to further Develop the Platform and Develop and Manufacture Project Vaccines and Manufacture Products in accordance with the terms and conditions of this Agreement.

14.3 **Patent protection and Project Technology.** The Partner has the rights but no obligation to take responsibility for seeking and maintaining protection for Project Technology at its sole cost, including the filing, prosecution, maintenance, extension and defense of any patent applications or patents in respect of Project Technology

14.4 **Infringement.** The Partner shall immediately give notice to CEPI if it becomes aware of:

14.4.1. any infringement or suspected infringement or misappropriation of the Background Technology and/or Project Technology; and

14.4.2. any claim by a Third Party that an action carried out under the Project infringes the intellectual property or other rights of any Third Party.

14.5 **Rights of Action.** Prior to the exercise of the Public Health License, the provisions of Clause 14.3 will apply and Partner will consult with CEPI about what action it should take. Where CEPI has exercised the Public Health License the provisions of Clause 12.3 shall apply.

14.6 **Platform Improvements and/or Product Improvements.** To the extent it is contractually able to do so, Partner shall ensure that it has the right to grant the Public Health License to CEPI in respect of future Platform Improvements and/or Improvements of the Product comprising Background Technology. To the extent that CEPI is contractually able to do so, CEPI hereby grants to Partner, and Partner hereby accepts, a non-exclusive, irrevocable, perpetual, worldwide license, sublicensable in multiple ties, to use the Improvements made by or on behalf of CEPI to the Product or to the Platform for any purposes inside and outside the Field. The undertakings herein shall be in force during the Project Term and for [\*\*\*\*] thereafter,

15. **PROJECT TECHNOLOGY – EXPLOITATION**

15.1 **Partner's Undertakings.** To the extent it is contractually able to do so, Partner shall obtain CEPI's prior written consent before exploiting, or allowing a Third Party to exploit any of the Project Technology within the Field, provided the exploitation is in conflict with or goes against CEPI's mission, the CEPI Policies or the provisions of this Clause.

15.2 **Right of Reference.** The Parties grant each other a right of reference to the regulatory materials relating to the Platform and the Product for use in their respective fields of use.

16. **ANNOUNCEMENTS AND PUBLICATIONS**

16.1 **Announcements**

- 16.1.1. Except for announcements required by law or any competent regulatory authority, the Parties shall consult on and agree in writing upon the form of all press releases, publications and public announcements concerning this Agreement, the Project and the CEPI funding.
- 16.1.2. The Partner must include an acknowledgement of CEPI funding in a form approved by CEPI in advance in all press releases, publications or public announcements relating to the Project and the Platform and/or Product.
- 16.1.3. In accordance with the CEPI policies, a summary of the progress and outcomes of the Project, the terms and conditions of this Agreement, the name of the Partner and the Project Lead, and the amount of the CEPI funding and Partner Contribution will be published or otherwise disseminated to the public in an appropriate form.
- 16.1.4. **Patent publications.** Following publication of any patent in respect of the Project Technology, the Partner shall have the right to publish and reproduce any such publication freely with due acknowledgement of the sources including, where appropriate, sources of funding and the individuals and communities from whom data has been collected.

17. **CONFIDENTIALITY**

- 17.1 **Confidentiality Obligations.** Subject to the provisions of this Clause 17, each Party undertakes that both during the Project Term and for a period of [\*\*\*\*\*] after its termination, it shall keep confidential and not disclose to any person any Confidential Information of the Party disclosed to or obtained by it in connection with this Agreement. Each Party shall take all reasonable security precautions in relation to the Confidential Information under its control. Where the Partner engages any Sub-Contractor, the Partner shall ensure that such Sub-Contractor is bound by confidentiality and non-use obligations which are at least as onerous as those set out in this Agreement. Each Party shall ensure that all staff and third parties to whom Confidential Information of the other Party is disclosed are:

- 17.1.1. informed of the provisions of Clause 17 of this Agreement; and
- 17.1.2. bound by confidentiality and non-use obligations at least as onerous as those herein.

- 17.2 **Exceptions.** Clause 17.1 shall not apply to:

- 17.2.1. information which is or was already known to the receiving Party at the time of disclosure under this Agreement, as shown by the receiving Party's written records, without any obligation to keep it confidential;
- 17.2.2. information which is independently developed by employees of the receiving Party who have not had access to the Confidential Information of the disclosing Party as evidenced by the receiving Party's written records;
- 17.2.3. information which at the time of being disclosed or obtained by the receiving Party under this Agreement or at any time thereafter, is published or otherwise generally available to the public other than due to default by the receiving Party of its obligations hereunder;

- 17.2.4. the disclosure of Confidential Information to a Party's Affiliates officers, employees, staff, consultants or professional advisors on a need-to-know basis and in the case of the Partner, to collaborators and contractors pursuant to Clause 17.1 who are bound by confidentiality and non-use obligations at least as onerous as those herein;
- 17.2.5. the disclosure of information by either Party to the JMAG, Stage Gate Committee or any site visit group is permitted but is subject to the confidentiality obligations under this Clause 17;
- 17.2.6. the disclosure of information which is required to be disclosed by a competent Court or regulatory authority or otherwise by applicable law (including any requirements for disclosure under the Freedom of Information Act 2000), provided that where it is free to do so, the receiving Party shall give notice of such disclosure to the disclosing Party as soon as reasonably practicable; and/or
- 17.2.7. the disclosure of Partner's Confidential Information by CEPI where such disclosure is expressly provided for in the terms of this Agreement (including where CEPI has exercised the Public Health License) and disclosure to any member of the CEPI Group and CEPI's funders including but not be limited to the Financial Documents and the records referred to in Clauses 3 and 4 above.

17.3 In recognition of CEPI's mission, nothing in this Clause 17 shall prevent CEPI from using the Confidential Information, or comparing the Confidential Information to information already in its possession, in each case solely to inform its assessment of applications made to it for funding in furtherance of CEPI's mission and other projects funded by it in furtherance of CEPI's mission.

18. **WARRANTIES, LIABILITY AND INSURANCE**

18.1 **Warranties.** On the Effective Date the Partner warrants to CEPI (subject to any matters disclosed in the Disclosure Letter that the warranties set out below (the "**Warranties**") are true and correct and that the Partner is in compliance with the Warranties:

- 18.1.1. it has the requisite authority to enter into this Agreement;
- 18.1.2. it has full power and authority to assume all of its obligations and commitments under this Agreement;

- 18.1.3. to its present knowledge and belief, it is the legal and beneficial owner and/or licensee of all right, title and interest in and to all Background Technology used in the Project at the time they are used;
- 18.1.4. save as disclosed in the Disclosure Letter, it does not, to its present knowledge, infringe, misappropriate or violate the intellectual property, privacy or publicity rights of any Third Party;
- 18.1.5. it has not granted any Third Party any right in respect of any Project Technology (other than in accordance with the terms of this Agreement), and has not charged or encumbered any of the same;
- 18.1.6. save as disclosed in the Disclosure Letter, to its present knowledge, the Background Technology and Project Technology are not subject to any claim, opposition, attack, assertion or other arrangements of whatever nature which may impugn upon the use, validity, enforceability or ownership of any such Technology, and there are no grounds or other circumstances which may give rise to the same;
- 18.1.7. save as disclosed in the Disclosure Letter, ownership of any equipment or Deliverables developed with CEPI funding, shall vest in the Partner;
- 18.1.8. it has not itself or through any of its staff, collaborators or Sub-Contractors, disclosed to any Third Party (other than under appropriate confidentiality obligations) any Confidential Information relating to the Project, nor is it obliged so to do;
- 18.1.9. to its present knowledge, other than under the Global Access Commitments Agreement with Gates dated February 13, 2015, no person has the right to call for the assignment of, grant of a license to it of or the right to any lien or encumbrance over any Background Technology or Project Technology under any option, grant or other agreement for use in the Field, nor is there any conditional or unconditional agreement or circumstance whereby such a right may arise;
- 18.1.10. to its present knowledge, no person has any right or claim to any payment or other compensation in respect of the use or exploitation of the Background Technology or Project Technology under this Agreement, except as set forth in pre-existing license agreements with Third Parties, reasonably redacted copies of which license agreements have been delivered to CEPI prior to the Effective Date or as set forth in license agreements under negotiation at the Effective Date that contemplate the execution of this Agreement, copies of the drafts of which have been delivered to CEPI prior to the Effective Date;
- 18.1.11. the Partner was the sponsor of all clinical trials from which Data was obtained;
- 18.1.12. the Partner will disclose to CEPI all relevant Safety Issues and adverse information in relation to the safety and efficacy of the Platform and Project Vaccine that come to its attention;
- 18.1.13. to its present knowledge the Partner has disclosed to CEPI all material communications with Regulatory Authorities, any ethical committee refusal to grant approval for a clinical trial, any suspension of a clinical trial, whether initiated by the sponsor, an ethical committee, a Regulatory Authority or an investigator, any action or recommendation of a data safety monitoring board to suspend the clinical trial, and all findings of any audit for a clinical trial for compliance with GCP relating to the Platform and Project Vaccine;

18.1.14. to its present knowledge none of the Partner, its Affiliates, Sub-Contractors, nor any officer or employee of the foregoing has been debarred or is subject to debarment by a Regulatory Authority anywhere;

18.1.15. to its present knowledge, all Financial Documents were true, complete and accurate at the date of such document; and

18.1.16. all CEPI funding has been deposited in the designated bank account in the currency of US dollars in the name of the Partner and into which only the CEPI funding and interest earned on that money has been deposited.

18.2 **No implied warranties.** Except as expressly provided in this Agreement, neither Party gives any warranties or makes any representations with respect to any of the Background Technology, the Project Technology, the Platform or any Products derived from them, or their fitness for any purpose.

18.3 **Obligation to inform.** The Partner will use Reasonable Efforts to inform CEPI of any matter which it becomes aware of during the Project Term and which would have been subject of a disclosure under the Disclosure Letter, if it had been known on the Effective Date.

18.4 **Liability cap.** Either Party's maximum liability in aggregate to the respective other Party arising out of this Agreement shall not exceed the aggregate of the Work Package Budgets for the Work Packages comprising the Project.

18.5 **Exclusions.** Except as provided by Clause 18.6, neither Party shall be liable to the other Party for indirect loss of profits, incidental or consequential damages, whether in contract, warranty, negligence, tort, strict liability or otherwise, arising out of any breach of or failure to perform any of the provisions of this Agreement.

18.6 **Exclusions from liability cap.** Nothing in this Agreement shall limit the liability of either Party for:

18.6.1. personal injury or death arising out of that Party's negligence or willful misconduct; or

18.6.2. fraud or fraudulent misrepresentation or willful misconduct.

18.7 **Third Party Claims.** The Partner agrees to indemnify CEPI and hold CEPI harmless from and against any and all claims, damages, and liabilities asserted by Third Parties (including claims for negligence) which arise directly or indirectly from a material breach of Partner or its grossly negligent conduct under this Agreement except to the extent such claims are in connection with the negligence or willful conduct by CEPI. And CEPI agrees to indemnify Partner and hold Partner harmless from and against any and all claims, damages, and liabilities asserted by Third Parties (including claims for negligence) which arise directly or indirectly from a material breach of CEPI or its grossly negligent conduct under this Agreement except to the extent such claims are in connection with the negligence or willful conduct by the Partner.

18.8 **Conduct of Third Party claims.** The Parties shall use reasonable endeavors to avoid, dispute, resist, appeal, compromise or defend any Third Party claims brought against it and to minimize its losses, claims, liabilities, costs, charges and expenses and give the other Party prompt written notice of any Third Party claim for which it requires indemnification under this Clause 18 together with copies of all relevant papers and official documents. The Parties shall agree how to respond to and handle the Third Party claim in an efficient manner. The Parties agree not to take any material action in respect of any Third Party claim without the consent of the other Party (such consent not to be unreasonably withheld, conditioned or delayed), including settlement of any such Third Party claim.

18.9 **Partner insurance obligations.** The Partner will obtain and continuously maintain the insurance on a claims arising basis with an insurance company of a credit rating of A or better as set out below and CEPI will bear such costs to the extent modifications of the insurance coverage are triggered by the collaboration hereunder:

18.9.1. **During the period covered by the IPDP.** clinical trials insurance as follows:

- (i) the Partner (to the extent the Partner is the sponsor of a clinical trial of Project Vaccine) shall obtain and shall ensure that any Sub-Contractor that is the sponsor of a clinical trial shall obtain, clinical trial insurance on a claims arising basis of at least € [\*\*\*\*\*] per patient and € [\*\*\*\*\*] for all insured events from one study per claim including non-negligence cover, such insurance to be effective from the commencement date of the clinical trial until at least [\*\*\*\*\*] after the completion of the clinical trial or such longer period as is required by the relevant ethical committee or an applicable statutory period of limitation;
- (ii) During the Project Term and for [\*\*\*\*\*] afterwards, general commercial liability insurance including contractual liability of at least € [\*\*\*\*\*] per insured event for personal injury and property damage;
- (iii) The Partner shall comply with the terms of these insurance policies for the term and for at least the duration of any applicable statutory period of limitation afterwards;
- (iv) The Parties acknowledge that as at the Effective Date the World Health Organization (“WHO”) is considering an insurance mechanism which would provide insurance cover for the suppliers of investigational products for use in the case of a “Public Health Emergency of International Concern” declared by WHO. The Parties agree that when this mechanism is in place the Parties will discuss in good faith the impact of such arrangement on the Parties’ obligations under this Agreement and how it will apply to the supply of Product in an Outbreak or Outbreak risk.

18.10 **CEPI insurance obligations.** On exercise of the Public Health License, CEPI will procure that:

18.10.1. equivalent insurance protection for the Partner to that specified at Clause 18.9 is in place in respect of the Development and Manufacturing of Project Vaccine for use in the Field in the Affected Territories conducted by or on behalf of CEPI;

18.10.2. procure that the insurer notes Partner’s interest on each such insurance policy;

18.10.3. provide Partner with a copy of each such insurance policy and certificate and annually on renewal; notify Partner of any claims made under these policies relating to Project Vaccine for use in the Field in the Affected Territory for the Project Term and for at least the duration of any applicable statutory period of limitation afterwards; and

18.10.4. procure compliance with the terms of these insurance policies for the Project Term and for at least the duration of any applicable statutory period of limitation afterwards.

19. **TERM, TERMINATION AND EFFECTS OF TERMINATION**

19.1 **Term.** This Agreement shall commence on the Effective Date and, unless otherwise agreed between the Parties in a Work Package or Additional Work Package, shall continue in full force and effect for a term of three (3) years from the Effective Date and then expires or earlier if terminated pursuant to this Clause 19 (the “**Project Term**”).

19.2 **Termination.** Either Party (the “**Terminating Party**”) may terminate at any time by giving written notice of termination to other Party (the “**Defaulting Party**”) where:

19.2.1. the Defaulting Party commits a breach of a material obligation set out in this Agreement which is not capable of remedy or, where capable of remedy, has not been remedied within [\*\*\*\*\*] of the receipt by it of a notice from the Terminating Party identifying the breach and requiring its remedy or as otherwise agreed in writing by the Parties; or

19.2.2. the Defaulting Party is unable or admits inability to pay its debts as they fall due, suspends making payments on any of its debts or, by reason of actual or anticipated financial difficulties commences negotiations with one or more of its creditors with a view to rescheduling any of its indebtedness, or has filed in any court or agency pursuant to any statute or regulation of any state or country, a petition in bankruptcy or insolvency or for reorganization or for an arrangement or for the appointment of a receiver or trustee of the Defaulting Party or of its assets, or if the Defaulting Party proposes a written agreement or composition or extension of its debts, or if the Defaulting Party is served with an involuntary petition against it, filed in any insolvency proceeding, and such petition is not dismissed within [\*\*\*\*\*] after the filing thereof, or if the Defaulting Party has proposed or is a party to any dissolution or liquidation (other than where the Defaulting Party is a creditor claiming repayment in such dissolution or liquidation), or if the Defaulting Party makes an assignment for the benefit of its creditors.

19.3 **Additional CEPI termination rights.** In addition to the termination rights above, CEPI shall be entitled to terminate this Agreement unilaterally with immediate effect by providing written notice to the Partner in the following circumstances:

19.3.1. the Partner takes any action incompatible with or which would have an adverse effect (or by omitting to take any action has or would have a similar adverse effect) on CEPI’s mission or reputation or the Partner’s ability to comply with its obligations under the Agreement including where the Partner is unable to achieve the next Milestone Criteria or Stage Gate Criteria by the relevant Milestone Date Stage Gate Date or by the expiry of any cure period agreed between the Parties in writing, or where the Partner fails to take corrective action within any period of time granted to the Partner by CEPI; or

19.3.2. the Parties are unable to agree a suitable replacement Project Lead within [\*\*\*\*\*] of the notification referred to in Clause 5.2;

19.3.3. the JMAG does not approve the IPDP or Marketing Activities Plan;

19.3.4. on a change of Control of the Partner without CEPI's prior written agreement, unless the Third Party in Control of the Partner: (i) has confirmed in writing to CEPI that it has sufficient capital, expertise and commitment, either itself or through the Partner, to carry on the Partner's business as a going concern and (ii) to meet the Partner's obligations under this Agreement to at least at the same level as the Partner prior to such change of Control; and

19.3.5. where there are material Safety Issues and/or quality issues in relation to one or more Project Vaccines or use of the Platform that will seriously impact the long-term viability of one or more of Project Vaccines or the Platform. In such circumstances, the Partner shall immediately cease using the Platform and cease Developing and Manufacturing a Project Vaccines directly or indirectly for use in the Field except to the extent required to identify the cause of the Safety Issue and immediately commence a Product recall.

19.4 **Dispute.** Where there is a dispute between the Parties in relation to this Clause, the matter shall be resolved in accordance with the dispute resolution procedure set out below, and the Parties shall comply with the provisions of this Agreement unless and until the dispute is settled.

## 20. EFFECTS OF TERMINATION

20.1 **CEPI's right to use the Background Technology and Project Technology, where the Partner is the Defaulting Party or where termination is pursuant to Clause 19.3.** With effect from the expiry of the Project Term ("**Termination Date**"), CEPI's licenses hereunder to the Background Technology and Project Technology in the Field and in the Affected Territories, as well as the Commercial Benefits sharing shall survive to:

20.1.1. Develop and use the Platform for use in the Field via Trusted Manufacturers; Manufacture Product for use in the Field via Trusted Manufacturers;

20.1.2. compare and contrast the relative advantages and disadvantages of the Platform and alternative platforms for use in the Field; and

20.1.3. compare and contrast the relative advantages and disadvantages of Project Vaccines for use in the Field against the advantages and disadvantages of alternative equivalent products for use in the Field.

20.2 **Provisions of Clause 8.** With effect from the Termination Date, the provisions of Clause 8 will cease to have effect.

- 20.3 **Partner supplies of Product.** The Partner shall have the right to exhaust supplies of Project Vaccines then in inventory in performance of its obligations under any agreement for supply with a public sector agency or if no such agreement exists at the Termination Date, immediately transfer ownership of the same to CEPI at no cost and inform any Third Party GMP storage facility of the same forthwith.
- 20.4 **Transfer of applications to and approvals from Regulatory Authorities.** The Partner shall use all reasonable endeavors to transfer to CEPI (or its nominee) promptly and at the Partner's cost, all submissions to Regulatory Authorities, Regulatory Filings, Platform Confirmations and Master Files related thereto.
- 20.5 **Materials.** To the extent not already provided, the Partner shall provide to CEPI (or its nominee) at the Partner's cost all Materials, Data, Documents and Know-how required to exercise CEPI's rights under this Clause within [\*\*\*\*\*] of CEPI requesting such Materials.
- 20.6 **Contracts.** Subject to applicable confidentiality obligations, the Partner shall provide CEPI with copies of all Sub-Contracts which relate to the Development of the Platform for use in the Field, the Development of Project Vaccine and the Manufacturing of Product in the Field and access to which is required for Third Party Manufacturers within [\*\*\*\*\*] of the Termination Date. Provided that the termination of this Agreement was not caused directly or indirectly by the Sub-Contractor and that Sub-Contractor is not then in breach, the Partner shall use all Reasonable Efforts, at CEPI's reasonable request, to facilitate the conclusion of a direct contractual relationship between the Sub-Contractor and CEPI or Trusted Manufacturer, to the extent required for CEPI or its nominee.
- 20.7 **Unspent CEPI funding.** Where termination occurs prior to the end of a Work Package and affects such Work Package, CEPI shall not be required to make any further payments of CEPI funding to the Partner under this Agreement or any Work Package Statement other than to reimburse the Partner for any non-cancellable expenses incurred in accordance with the Work Package Budget prior to the Termination Date and the Partner shall return any Work Package Budget received from CEPI under the Work Package Budget under this Agreement which is unspent at the date of termination (after deduction of costs incurred and non-cancellable commitments incurred prior to the date of termination) within [\*\*\*\*\*] after the date of the notice of termination.
- 20.8 **Repayment of CEPI funding by Partner.**
- 20.8.1. **Where termination is due to any material financial irregularity or as a consequence of fraudulent or illegal activity by the Partner.** Partner shall repay to CEPI (to the extent it is able to without triggering its insolvency, breach of another philanthropic donor's grant or contract with Partner) the amount of funds directly related to such financial irregularity or fraudulent or illegal activity within [\*\*\*\*\*] of the notice of termination. The Partner shall use its Reasonable Efforts to insert and enforce similar reimbursement provisions in its agreements with Sub-Contractors.
- 20.8.2. **Where termination is for failure to achieve one or more Milestones by the applicable Milestone Date and such failure constitutes a material breach by Partner** of its obligations under this Agreement, and that breach has not been remedied, Partner will return a sum equal to the CEPI funding that CEPI has paid to it for the then ongoing Work Package or Additional Work Package, as at the date of notice of termination (less the unspent funds, which are to be handled in accordance with Clause and also less funds which have been spent or reasonably committed to third parties) to CEPI within [\*\*\*\*\*] of the notice of termination.

- 20.9 **Use of Platform and Project Vaccines by Partner.** Consistent with other obligations in this Agreement, the Partner may at its discretion continue to use the Project Technology for any purpose.
- 20.10 **Effects of Termination where CEPI is the Defaulting Party.** Where termination occurs prior to the end of the Project Term, CEPI shall make all payments agreed to be made for any Work Package in regard to expenditures that have been committed by the Partner.
- 20.11 **Project Technology.** Subject to Clauses 13 and 20, the Partner may at its discretion use the Project Technology for any purpose.
- 20.12 **Survival of Clauses.**
- 20.12.1. Termination and expiry of this Agreement howsoever arising shall be without prejudice to the rights and duties of either Party accrued prior to termination. The Clauses in this Agreement which expressly or impliedly have effect after or notwithstanding termination (including Clauses 1, 3.12, 3.13, 3.15, 3.16, 4.6, 8 (except where Clause 20.2 applies), 11 to 17 inclusive, 18.4, 18.5, 18.6, 18.7, 18.8, 20 to 22 inclusive shall continue to be enforceable notwithstanding termination. Unless otherwise agreed, the Parties shall not enter into any further Work Package Statements after the date of termination.
- 20.12.2. If the Partner terminates this Agreement during or after the Project Term for cause, owing to a material and unrepaired breach by CEPI, the licenses granted under this Agreement shall terminate and the survival under this Clause 20.11 shall not apply.
- 20.13 **Clinical Trial Wind-down.** Where at the date of termination there is an on-going clinical trial, unless agreed otherwise by the Parties in writing, the Partner shall procure that no further trial subjects are entered into the clinical trial, and the JMAG and TSC shall work together to plan for the appropriate and ethical completion or wind-down of Development activities in an orderly fashion, with due regard for patient safety and the rights of any subjects that are participants in clinical trial and in consultation with any relevant ethical committee.
21. **GENERAL**
- 21.1 **Conflicts.** If there is any conflict between the provisions of:
- 21.1.1. the main body of this Agreement and the CEPI Policies, then the provisions of this Agreement shall prevail;
- 21.1.2. the main body of this Agreement and any Work Package Statement, then the provisions of the Work Package Statement shall prevail; and
- 21.1.3. any Work Package Statement and the CEPI Policies, then the provisions of the Work Package Statement shall prevail,

- 21.2 **Waiver.** Neither Party shall be deemed to have waived any of its rights or remedies under this Agreement unless the waiver is expressly made in writing and signed by a duly authorized representative of that Party. In particular, no delay or failure of either Party in exercising or enforcing any of its rights or remedies under this Agreement shall operate as a waiver of those rights or remedies nor shall any single or partial exercise or enforcement of any right or remedy by a Party preclude or impair any other exercise or enforcement of that right or remedy by that Party.
- 21.3 **Entire Agreement.** This Agreement, including its Schedules attached hereto, together with the Work Package Statements and the CEPI Policies constitutes the entire agreement and understanding between the Parties relating to the subject matter hereof and together they supersede and replace all prior drafts, previous understandings, arrangements, representations or agreements, whether in writing or oral, between the Parties relating to the subject matter of this Agreement. Each Work Package Statement shall be part of this Agreement and shall not form a separate contract to it.
- 21.4 **Variation.** No variation, amendment, modification or supplement to this Agreement shall be valid unless and until it is made in writing and signed by a duly authorized representative of each Party. Once a Work Package Statement has been signed by both Parties, no amendment shall be made to it except if the amendment is in writing, has been approved by the JMAG and has been signed by a duly authorized representative of each Party.
- 21.5 **Assignment.** Neither Party shall, without the prior written consent of the other Party assign, transfer, convey or declare a trust over this Agreement or make any other disposition (whether in whole or in part) of any of its rights and obligations hereunder to any Third Party, including by novation, except that CEPI may transfer its rights and obligations to Wellcome, Gates or an organization of equivalent charitable mission, if CEPI considers (in good faith) that CEPI will not be in a position to fulfil its obligations or exercise its rights in the future. Partner shall have a right to assign this Agreement to an Affiliate or a Third Party which acquires all or substantially all of the assets related to the collaboration under this Agreement. In the event that the Partner is considering any of the actions referred to above, Partner shall promptly notify CEPI and CEPI will have the right to conduct such due diligence as CEPI, in its sole discretion, deems appropriate prior to such action completing and prior to CEPI notifying the Partner of its decision.
- 21.6 **Severance of Terms.** If the whole or any part of this Agreement is or becomes or is declared illegal, invalid or unenforceable in any jurisdiction for any reason (including both by reason of the provisions of any legislation and also by reason of any court or competent authority which either has jurisdiction over this Agreement or has jurisdiction over either Party): in the case of the illegality, invalidity or un-enforceability of the whole of this Agreement it shall terminate only in relation to the jurisdiction in question; and in the case of the illegality, invalidity or un-enforceability of part of this Agreement that part shall be severed from this Agreement in the jurisdiction in question and that illegality, invalidity or un-enforceability shall not in any way whatsoever prejudice or affect the remaining parts of this Agreement, which shall continue in full force and effect. If in the reasonable opinion of any Party any severance under this Clause materially affects the commercial basis of this Agreement, the Parties shall discuss, in good faith, ways to eliminate the material effect.

- 21.7 **Costs.** Each Party shall bear its own legal costs, legal fees and other expenses incurred in the preparation, negotiation and execution of this Agreement and any Work Package Statements.
- 21.8 **Further Assurances.** Each Party shall perform such acts and execute such documents as may be reasonably required for securing to or vesting in the other Party the rights agreed to be granted to it under or pursuant to this Agreement.
- 21.9 **Notices.** Any notice to be given pursuant to this Agreement shall be in writing in the English language and shall be delivered by overnight courier, by registered, recorded delivery or certified mail (postage prepaid) to the address of the recipient Party set out below or such other address as a Party may from time to time designate by written notice to the other Party:

Address of the Partner:

Partner

CureVac AG

Paul-Ehrlich-Strasse 15

72076 Tübingen

Germany

For the attention of: CEO

With a copy to: Director Legal

CEPI

Gibbs Building, 215 Euston Road

Bloomsbury, London

NW1 2BE

United Kingdom

For the attention of: [\*\*\*\*\*] General Counsel

With a copy to: [\*\*\*\*\*] Director of Vaccine Development

Any notice given pursuant to this Clause shall be deemed to have been received on the day of receipt, provided receipt occurs on a Business Day of the recipient Party or otherwise on the next following Business Day of the recipient. The Parties agree that email and fax are not valid methods of giving notice under this Agreement except that notification of Safety Issues as required by Clause 7.6 should be communicated to the relevant JMAG Members by email (with receipt acknowledgement) in the interests of urgency as well as sent in writing in accordance with this Clause 21.9.

- 21.10 **Partnership.** Nothing in this Agreement shall be taken to constitute a partnership between the Parties. Except as specifically provided in this Agreement, neither Party shall by reason of this Agreement be empowered to act as agent for the other Party nor to pledge the credit of the other Party nor shall either Party be held liable for or incur liability in respect of the acts or defaults of the other Party to this Agreement.
- 21.11 **Counterparts.** This Agreement may be executed in any number of counterparts, including electronic counterparts, and by the Parties on separate counterparts, but shall not be effective until each Party has executed at least one counterpart. Each counterpart shall constitute an original of this Agreement, but all the counterparts shall together constitute one and the same instrument.
- 21.12 **Rights of Third Parties.** Except for Wellcome and Gates, a person who is not a Party has no right under the Contracts (Rights of Third Parties) Act 1999 to enforce or to enjoy the benefit of any term of this Agreement.
- 21.13 **Force Majeure.** Neither Party shall be deemed to have defaulted under or to be in breach of this Agreement for failure or delay in fulfilling material obligations when such failure or delay is directly caused by an event, including but not limited to war, acts of war, insurrections, acts of terrorism, acts of God (excluding the outbreak of disease) or acts, omissions or delays in acting or failure to act by any of CEPI's funders. Should any of the aforementioned occur, each Party shall inform the other in writing of such event, act, omission or delay and the Parties will discuss the situation, and acting in good faith, agree on the appropriate course of action under the circumstances. In the event of issues regarding CEPI funders, then those courses of action may include, without limitation, revised payment schedules or assignment pursuant to Clause 21.5 above.
22. **DISPUTE RESOLUTION, GOVERNING LAW AND JURISDICTION**
- 22.1 **Escalation process.** Any question, difference or dispute which may arise concerning the construction, meaning or effect of this Agreement, or concerning the rights or liabilities of the Parties hereunder, or any other matter arising out of or in connection with this Agreement shall first be submitted to the Chief Executive Officer of CEPI and the Chief Executive Officer of the Partner (the "**Senior Officers**") for resolution (each of whom may call on others to advise them as they see fit) unless this Agreement expressly provides otherwise. The Senior Officers shall discuss the matter in good faith and in a timely manner and endeavor to reach a mutually agreeable solution. If the Parties are unable to resolve such dispute through such negotiations within [\*\*\*\*\*] of such dispute being escalated to the Senior Officers, then in respect of any dispute, controversy or claim other than those that concern: the validity or infringement of Technology; anti-trust, anti-monopoly or competition law or regulation; and/or breach or threatened breach of Clauses 14, 15 and 17, the Parties irrevocably submit to arbitration in accordance with Clause 22.2. In respect of disputes relating to the validity or infringement of Technology; anti-trust, anti-monopoly or competition law or regulation; and/or breach or threatened breach of Clauses 14, 15 and 17, the Parties irrevocably submit to the exclusive jurisdiction of the Courts of England and Wales.
- 22.2 **Arbitration.** Any disputes to be resolved by binding arbitration shall be referred to and finally resolved by arbitration under the Rules of the London Court of International Arbitration, which Rules are deemed to be incorporated by reference into this Clause. The number of arbitrators shall be one in event of a dispute in connection with an Outbreak. Otherwise the number of arbitrators shall be three. The seat, or legal place, of arbitration shall be London, England. The language to be used in the arbitral proceedings shall be English.
- 22.3 **Governing Law.** This Agreement (and any dispute, controversy, proceedings or claim of whatever nature arising out of this Agreement or its formation) shall be governed by and construed in accordance with the laws of England and Wales, except for questions regarding the validity of patents, which shall be resolved in the courts having jurisdiction over the patents in question and in accordance with the laws applicable to such patents.

**SCHEDULE 1**  
**TEMPLATE FOR WORK PACKAGE STATEMENTS**

**WORK PACKAGE STATEMENT**  
[Description of Work Package]

**MADE ON** \_\_\_\_\_ (the “**Effective Date**”)

**BETWEEN:**

1. **COALITION FOR EPIDEMIC PREPAREDNESS INNOVATIONS**, a not-for-profit international association existing under Norwegian law with address at Marcus Thranesgate 2, PO box 123 Torshov, N-0412 Oslo Norway (“**CEPI**”); and
2. XXXXXXXXXXXX, a private company existing under XXXXX law with address at XXXXXXXXXXXXXXXXXXXXXXXXXXXX. (“XXXXXXXX”, or the “**Partner**”).

**INTRODUCTION**

This document is a Work Package Statement pursuant to the Framework Partnering Agreement dated [ \_\_\_\_\_ ] and entered into by the Parties (the “**Partnering Agreement**”) and outlines the tasks and actions which take place during the execution of [description of disease and work package].

**NOW IT IS AGREED THAT:**

1. Defined terms in this Work Package Statement shall have the meaning given to them in the Partnering Agreement unless otherwise stated.
2. The Partner shall:
  - a. perform all activities set out in Schedule 1 and provide the Partner Contribution, if any, set out in Schedule 2 to deliver the Deliverables set out in Schedule 3, Part 1;
  - b. use Reasonable Efforts to achieve the Milestones Criteria set out in Schedule 3, Part 2 by the applicable Milestone Date;
  - c. ensure that all Contractor Results are produced on behalf of the Partner, as set out in Schedule 3, Part 3; and
  - d. use Reasonable Efforts to achieve the Stage Gates set out in Schedule 4 by the applicable Stage Gate Date.
3. CEPI shall make payments to the Partner up to a maximum of the Work Package Budget set out in Schedule 5 in accordance with Clauses 3.7 – 3.12 of the Partnering Agreement.
4. The terms and provisions of the Partnering Agreement are incorporated by reference to this Work Package Statement and all rights and obligations arising under this Work Package Statement shall be governed by and construed in accordance with the terms of the Partnering Agreement.

IN WITNESS whereof the Parties through their duly authorised representatives have executed this Agreement.

TEMPLATE FINANCIAL SUMMARY AND REPORTING FORM

This file consists of seven worksheets (in addition to this one):

1. **Cover Letter, Quarterly** should be completed, signed by an authorised representative for the awardee, and submitted to CEPI (in pdf) together with the quarterly financial report.
2. **Financial Summary.** In order to follow the disbursement cycles, the columns are divided into biannual groups (two quarters), and the rows are grouped by the work packages.
  - First, choose the relevant year and quarter by clicking the + on top of the sheet
  - Second, choose the relevant work package(s) by clicking the + on the left-hand side

Once every six months the projected expenditure for the upcoming period should be completed. Please note that the projected expenditure cannot exceed six months. Please fill in the actual expenditure for the relevant quarter and the relevant sub-work package. Please include only expenditure that has actually been incurred and reimbursed during the quarterly period.
3. **Notes.** Please explain expenditure that deviates notably from the projections.
4. **Financial Narrative.** Please answer the narrative questions. We recommend that a transcript of your complete transactions for the current quarterly reporting period is provided in a separate attachment.
5. **Work-Package Statement.** For completion by CEPI only - visible for Awardee's reference.
6. **Asset register** should be completed upon purchase of new equipment/capital expenditure.
7. **Biannual Payment Request** should be completed, signed by an authorised representative for the awardee, and submitted to CEPI (in pdf) when requesting payment for the upcoming biannual period.

The file is protected. It is only possible to insert data into yellow and green cells:

*Enter information into light yellow cells*  
*Enter actual expenditures into green cells*

If you need more space to write in the yellow cells, drag the boundary to expand it:

**1. Six-Month Projection**

Please describe the components of your projected six-month expenditure, commenting on all cost categories.

**2. Personnel**

Please describe whether the staff and FTE were needed for the current quarterly period as anticipated, and if they were deployed as expected. (Please provide your transaction list demonstrating your actual quarterly Personnel costs).

**3. Travel**

Please describe whether planned travel was undertaken as expected during the current quarterly period. Please describe the travel that was undertaken. (Please provide your transaction list demonstrating your actual quarterly Travel costs).

**4. Consultants**

Please individually list any consultants that were deployed and reimbursed during the current quarterly period, including the number of billable units. (Please provide your transaction list demonstrating your actual quarterly Consultant costs).

**5. Equipment & Capital Expenditure**

Please describe whether equipment items were purchased in line with your projected expenditure for the current quarterly period. (Please provide your transaction list demonstrating your actual quarterly Equipment & Capital Expenditure costs).

**6. Other Direct Costs**

Please describe whether other direct costs were as expected in-line with your projected expenditure for the current quarterly period. (Please provide your transaction list demonstrating your actual quarterly Other Direct Costs).

**7. Sub-awards**

Please individually list the sub-awardees that were deployed and reimbursed during the quarterly period. (Please provide your transaction list demonstrating your actual quarterly Sub-award costs).

**8. Work-Package**

Please describe your confidence that the total remaining Work Package funds per cost category are sufficient to complete the Work Package activities. For example, do you expect to incur new or unplanned costs in order to complete the Work Package activities.

**9. Risk**

Please describe any potential technical or financial risks that may have an impact on the project's financial performance.

**10. Non-USD expenditure**

If you have indicated non-USD expenditure on the cover letter, please explain which portion of your actual expenditure was incurred in each currency.

**11. Procurement**

During the current quarterly period did you procure any goods, services or supplies, or, engage any subawardee, subcontractors or other third parties who were not specifically named in the Work Package budget? If yes, please list the third party name, value and a brief description of the goods, services or supplies and describe how you complied with the CEPI Procurement Procedure.

**Progress**

(Please insert progress chart from latest monthly report.)

**Overall Status**

- No delays. All milestones can be reached in time
- Milestone is under pressure. Risk contingencies developed
- Milestone cannot be reached, delay expected

(Please update the following table based on activities which have been completed within the last six months).

Milestones/Deliverables	Activity
WP X.Y	Milestone achieved
<b>Stage Gate</b>	
WP X.Y	Stage Gate achieved

**Communication**

*(Please update the following table with the communication activities from the quarter and the planned ones for the next three months).*

Past three months			Next three months		
Type of communication	Who	When	Type of communication	Who	When

**Intellectual Property**

*(Please fill in the table below. This is a reflection of the obligations outlined in the agreed Partnership Agreement)*

During the previous 3 months;

Have you or any subawardee generated any of the following? If yes, please describe below.	
New or novel scientific or test data? Including clinical data, CMC data, pharmacological data or toxicological data? <i>(Please insert details here)</i>	New or novel invention, work or discovery? Including concepts, data, designs, formulae, methods, models, assays, procedures, processes, specifications or algorithms? <i>(Please insert details here)</i>

If you or any subawardee has generated any novel invention, work or discovery, please describe if you have or if will you seek intellectual protection for a registered patent, design right, trade-mark, trade-name, database right, copyright or other right subsisting in any part of the world? <i>(Please insert details here)</i>
--

Have you or any subawardee made any formal submissions to any Regulatory Authority relating to the development, manufacture or marketing of any product, results, foreground intellectual property or other outputs from the CEPI project? If yes, please describe below and provide copies of all minutes, communications and other submission documentation. <i>(Please insert details here)</i>
---

During the next 3 months, do you or any subawardee intend to publish or disseminate any foreground intellectual property, results or data from the CEPI project? If yes, please describe:		
The foreground intellectual property, results or data that you wish to publish or disseminate?	The authors who will be named?	How you will comply with CEPI's open access requirements set out in the Partnering Agreement and CEPI's Open Access Policy ?
<i>(Please insert details here)</i>	<i>(Please insert details here)</i>	<i>(Please insert details here)</i>

During the next 3 months, do you intend to deploy, use or exploit any foreground intellectual property, results or outputs from the CEPI project outside of the CEPI project? If yes, please describe below.			
Your proposed or intended further use or exploitation?	If the use or exploitation will occur in the Field of the CEPI project and/or in an Affect Territory?	If the use or exploitation is for the purpose of Development or Marketing activities?	If the use or exploitation is for the purpose of generating commercial revenue
<i>(Please insert details here)</i>	<i>(Please insert details here)</i>	<i>(Please insert details here)</i>	<i>(Please insert details here)</i>

**Forecast**

*(Please provide a forecast for the next six months of milestones/deliverables and any Stage Gates due. Please explain briefly the main activities which will need to be completed).*

<b>Milestones/Deliverables</b>	<b>Activity</b>
WP X.Y	<i>Milestone/Deliverable(s) and date due</i>
<b>Stage Gate</b>	
WP X.Y	<i>Stage Gate(s) and due date</i>
<b>Intellectual Property</b>	
Area covered	<i>Please outline any proposed filing within the next 6 months</i>

**Change Control**

*(Please describe any agreed changes to activities of the project and impact the impact that this may have on timelines. Insert the date that was originally targeted for completion of the activity, and revised date.)*

<b>Function</b>	<b>Change</b>	<b>Impact</b>	<b>Initial date</b>	<b>Revised date</b>

**WORKPACKAGE STATEMENT**  
**Development of CureVac Outbreak Response**  
**To Novel Coronavirus (2019-nCoV)**

**MADE ON:** 27 January 2020

**BETWEEN:**

1. COALITION FOR EPIDEMIC PREPAREDNESS INNOVATIONS, a not-for-profit international association existing under Norwegian law with address at Marcus Thranesgate 2, PO box 123 Torshov, N-0412 Oslo Norway ("CEPI"); and
2. CureVac Ag, a private company existing under German law with address at Paul-Ehrlich-Strasse 15, 72076 Tubingen Germany ("Partner").

**INTRODUCTION:** This document is a Work Package Statement pursuant to the Framework Partnering Agreement dated 15 February 2019 and entered into by the Parties (the "Partnering Agreement") and outlines the tasks and actions which take place during the execution of [description of disease and work package].

**NOW IT IS AGREED THAT:**

1. Defined terms in this Work Package Statement shall have the meaning given to them in the Partnering Agreement unless otherwise stated.
  2. The Partner shall:
    - a. perform all activities set out in Schedule 1 and provide the Partner Contribution, if any, set out in Schedule 2 to deliver the Deliverables set out in Schedule 3, Part 1;
    - b. use reasonable Efforts to achieve the Milestones Criteria set out in Schedule 3, Part 2 by the applicable Milestone Date;
    - c. ensure that all Contractor Results are produced on behalf of the Partner, as set out in Schedule 3, Part 3; and
    - d. use Reasonable Efforts to achieve the Stage Gates set out in Schedule 4 by the applicable Stage Gate Date.
  3. CEPI shall make payments to the Partner up to a maximum of the Work Package Budget set out in Schedule 5 in accordance with Clauses 3.7- 3.12 of the Partnering Agreement.
  4. The terms and provisions of the Partnering Agreement are incorporated by reference to this Work Package Statement and all rights and obligations arising under this Work Package
-

Draft additional work package 2020-01-27

Statement shall be governed by and construed in accordance with the terms of the Partnering Agreement.

IN WITNESS whereof the Parties through their duly authorised representatives have executed this Agreement.

**Development and Option Agreement**

This Development and Option Agreement (this "Agreement"), dated as of April 29, 2016 (the "Effective Date"), is made by and between CureVac AG, a German stock corporation with offices at Paul- Ehrlich-Strasse 15, 72076 Tubingen, Germany ("CureVac"), and Acuitas Therapeutics Inc., a British Columbia corporation ("Acuitas"). Each of CureVac and Acuitas may be referred to herein as a "Party" or together as the "Parties."

**WHEREAS**, Acuitas has expertise and intellectual property relating to the development of LNP Technologies (as defined below);

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below); and

**WHEREAS**, the Parties believe that certain proprietary Acuitas LNP Technology (as defined below) could be useful for the formulation and delivery of CureVac's proprietary mRNA Constructs; and

**WHEREAS**, the Parties are interested in evaluating the development of products incorporating Acuitas LNP Technology and CureVac Technology (as defined below), and Acuitas wishes to grant to CureVac, and CureVac wishes to obtain, an option to obtain a license under the Acuitas LNP Technology to develop and commercialize one or more specific products of CureVac, all in accordance with the terms and conditions set forth below.

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

**ARTICLE 1**

**Definitions**

The following terms and their correlatives will have the following meanings:

**1.1** "Acuitas Background Technology," means any and all LNP Technology that is Controlled by Acuitas or any of its Affiliates as of the Effective Date or during the Term, but excluding any Acuitas Program Know-How and Acuitas Program Patents, and necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. For the avoidance of doubt, the rights granted to Acuitas [\*\*\*\*\*] shall not fall under this definition. The Patents and Know-How comprised in the Acuitas Background Technology as of the Effective Date are listed in **Exhibit 1.1** attached hereto.

**1.2** "Acuitas Indemnitees" has the meaning set forth in Section 8.7(b).

- 1.3 "Acuitas LNP Technology" means the Acuitas Background Technology and the Acuitas Program Technology.
- 1.4 "Acuitas Program Know-How" means any and all Program Know-How owned by Acuitas in accordance with Section 6.2, including Acuitas' right and interest in any Jointly-Owned Program Know-How (as defined in Section 6.2(c)).
- 1.5 "Acuitas Program Patents" means any and all Patents that claim any of the Acuitas Program Know-How, including Acuitas' right and interest in any Jointly-Owned Program Patents (as defined in Section 6.2(c)).
- 1.6 "Acuitas Program Technology" means the Acuitas Program Know-How and the Acuitas Program Patents. For clarity, all Acuitas Program Technology will be "Controlled" by Acuitas for purposes of this Agreement.
- 1.7 "Acuitas Work Plan Leader" has the meaning set forth in Section 2.1.
- 1.8 "[\*\*\*\*\*] Target" has the meaning as defined in Section 1.60 below.
- 1.9 "Affiliate" of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with the power to direct the management and policies of such entity, provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. Regarding CureVac, Affiliate shall not include Mr. Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other entity controlled by Mr. Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG.
- 1.10 "Agreement" has the meaning set forth in the Preamble
- 1.11 "Approved Partner" means with respect to any Third Party to whom CureVac wishes to disclose Acuitas Confidential Information or transfer Acuitas LNP Technology or Materials provided by Acuitas to CureVac, (i) [\*\*\*\*\*] or (ii) any Third Party providing services set forth in the Work Plan to CureVac.
- 1.12 "Bankrupt Party," has the meaning set forth in Section 9.4(b).
- 1.13 "Calendar Quarter" means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31.
- 1.14 "Change of Control" with respect to Acuitas, shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the "beneficial owner", directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Acuitas then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Acuitas representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Acuitas or has the power, directly or indirectly, to elect a majority of the members of the Acuitas' board of directors, or similar governing body; or (ii) Acuitas enters into a merger, consolidation or similar transaction with another person or entity; or (iii) Acuitas sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Acuitas' consolidated total assets to which this Agreement relates; or (iv) the holders of capital stock of Acuitas approve a plan or proposal for the liquidation or dissolution of Acuitas.

- 1.15 "Concurrent Reserved List Limits" has the meaning set forth in Section 4.2(d).
- 1.16 "Confidential Information" has the meaning set forth in Section 7.1.
- 1.17 "Contract Year" will refer to the twelve (12)-month period beginning with the Effective Date and on each anniversary thereafter.
- 1.18 "Control" or "Controlled" means with respect to Technology, a Party owns or has a license to use and practice such intellectual property right without violating the terms of any agreement with any Third Party and without owing any milestone, royalty or other monetary obligations to a Third Party.
- 1.19 "CureVac Background Technology," means any and all mRNA Technology that is owned or licensed by CureVac or any of its Affiliates as of the Effective Date or during the Term, but excluding any CureVac Program Know-How and CureVac Program Patents, and necessary or useful for the research, development, manufacturing and commercialization of a Licensed Product.
- 1.20 "CureVac Indemnitees" has the meaning set forth in Section 8.7(a).
- 1.21 "CureVac Program Know-How" means any and all Program Know-How owned by CureVac in accordance with Section 6.2, including CureVac's right and interest in any Jointly-Owned Program Know-How.
- 1.22 "CureVac Program Patents" means any and all Patents that claim any of the CureVac Program Know-How, including CureVac's right and interest in any Jointly-Owned Program Patents (as defined in Section 6.2(c)).
- 1.23 "CureVac Program Technology," means the CureVac Program Know-How and the CureVac Program Patents. For clarity, all CureVac Program Technology will be "Controlled" by CureVac for purposes of this Agreement.
- 1.24 "CureVac Technology," means, collectively, CureVac Background Technology and CureVac Program Technology.
- 1.25 "CureVac Work Plan Leader" has the meaning set forth in Section 2.1.
- 1.26 "Diligent Efforts" means, with respect to the efforts to be expended by each Party with respect to any activity set forth in the Work Plan, active and sustained efforts to conduct the applicable activity, or to attempt to achieve the applicable requirement or goal, in a prompt and expeditious manner, as is reasonably practicable under the circumstances consistent with the Work Plan (including the level of FTE funding and budget for out-of-pocket and Third Party contractors set forth therein) and the terms of this Agreement.

- 1.27 "Disclosing Party" has the meaning set forth in Section 7.1.
- 1.28 "[\*\*\*\*\*] Technology" is an Improvement to [\*\*\*\*\*] at the time such Improvement is discovered, created, conceived, developed or reduced to practice.
- 1.29 "Effective Date" has the meaning set forth in the Preamble.
- 1.30 "Escrow Agent" shall mean a partner with [\*\*\*\*\*] the agent selected by Acuitas in good faith to maintain in confidence the Restricted Target List and to respond to CureVac's Target Notices on behalf of Acuitas. All costs and expenses incurred through the Escrow Agent will be borne by Acuitas.
- 1.31 "Exclusive License Agreement" means an exclusive license agreement in the form attached hereto as **Exhibit 1.31**.
- 1.32 "Executive Officers" has the meaning set forth in Section 2.2(d).
- 1.33 "FTE" means a full-time person, or more than one person working the equivalent of a full-time person, where "full-time" is determined by the standard practices in the biopharmaceutical industry in the geographic area in which such personnel are working, but includes at least [\*\*\*\*\*] hours per year, and includes the performance of the Works and Services and scientific management oversight as reasonably required but, for clarity, excludes the manufacture of Formulated Product for research and clinical activities as set forth in the Work Plan. In no event shall one person be counted as more than one FTE.
- 1.34 "FTE Costs" mean the actual FTEs employed by Acuitas in the conduct of the Works and Services multiplied by an annual rate per FTE equal to [\*\*\*\*\*]. Such FTE Costs represent reimbursement for all costs of providing the Works and Services (including salaries, benefits, lab supplies, reagents, equipment and overhead, as well as other G&A costs).
- 1.35 "Formulated Product" means product produced by Acuitas in accordance with the Work Plan that incorporates CureVac mRNA Constructs formulated with Acuitas LNP Technology.
- 1.36 "Formulated Product Fee" means the fees to be charged by Acuitas for supply of Formulated Product to CureVac under this Agreement, which fees are set forth in the Work Plan and will include all costs of materials used in the Formulated Product or its manufacture. In no event will the Formulated Product Fees include any costs otherwise reimbursed by CureVac or the cost of any Formulated Product manufactured by a GMP manufacturer under any technology transfer from Acuitas pursuant to Section 3. HO-
- 1.37 "Improvement" means, with respect to the [\*\*\*\*\*] any change, modification, variation or revision of such Technology, whether patentable, copyrightable or not

1.38 "Indemnified Party" has the meaning set forth in Section 8.7(c).

1.39 "Indemnification Claim Notice" has the meaning set forth in Section 8.7(c).

1.40 "JDC" has the meaning set forth in Section 2.2(a).

1.41 "JDC Deadlock" has the meaning set forth in Section 2.2(d).

1.42 "Know-How" means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form now known or hereafter developed.

1.43 "Law" or "Laws" means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.

1.44 "License Agreement" means either an Exclusive License Agreement or Non-exclusive License Agreement.

1.45 "Licensed Product" means (i) [\*\*\*\*\*] product comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended [\*\*\*\*\*] where the Target is selected from the Targets available to CureVac on the Reserved Target List and where such product is derived from, is based on, or utilizes any Acuitas LNP Technology; and/or (ii) [\*\*\*\*\*] Licensed Vaccine Product. If a given protein, e.g., an antibody comprises separated amino acid-chains, or a given Vaccine comprises multiple antigens or antibodies, which may be delivered as separated mRNA Constructs (combined in one LNP or delivered in separated LNPs), such product would be considered as one Licensed Product. For the avoidance of doubt, the term Licensed Product in respect of a given Target encompasses all variants of such Target, including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been made (for example, mutated versions, derivatives or fragments) and species homologs and orthologs thereof, provided, however, that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses substantially similar biological activity to such Target(s) (for example antigenicity in case of antigens).

1.46 "Licensed Vaccine Product" means [\*\*\*\*\*] product that is comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended to express a [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets selected from the Targets available to CureVac on the Reserved Target List, in any combination, if any, and where such product is a Vaccine and is derived from, is based on, or utilizes any Acuitas LNP Technology. Licensed Vaccine Products may consist of [\*\*\*\*\*] mRNA Constructs encoding for the [\*\*\*\*\*] Target and [\*\*\*\*\*] Targets each of which is reserved pursuant to Article 4.

- 1.47 "LNP Technology" means Technology that claim, embody or incorporate delivery systems (and components thereof) based on or incorporating lipid nanoparticles.
- 1.48 "Losses" has the meaning set forth in Section 8.7(a).
- 1.49 "Mammalian Target" means a Target that is encoded by and expressed by a mammal including a human. For clarity all Targets that are antibodies are "Mammalian Targets".
- 1.50 "Material Transfer Agreements" means the [\*\*\*\*\*] both as amended from time to time.
- 1.51 "Materials" means any tangible chemical or biological material, including any compounds, LNP, DNA, RNA (including mRNA), clones, cells, and any expression product, progeny, derivative or other improvement thereto, along with any tangible chemical or biological material embodying any Know-How, Controlled by a Party.
- 1.52 "inRNA Construct" means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5' UTR, the associated open reading frame, 3'UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct.
- 1.53 "mRNA Technology," means Technology that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.
- 1.54 "Non-exclusive License Agreement" means a non-exclusive license agreement in the form attached hereto as **Exhibit 1.54**.
- 1.55 "Non-Mammalian Target" means a Target that is encoded by and expressed by a non-mammalian organism.
- 1.56 "Option" has the meaning set forth in Section 5.1.
- 1.57 "Option Exercise Fee" means with respect to each Non-exclusive License Agreement for which CureVac has exercised the Option to enter into in accordance with Article 5, [\*\*\*\*\*] dollars (US[\*\*\*\*\*]) and with respect to each Exclusive License Agreement for which CureVac has exercised the Option to enter into in accordance with Article 5, three hundred thousand dollars (US\$300,000). In addition, in the event that upon Option exercise a Licensed Agreement includes more than [\*\*\*\*\*] Targets, each [\*\*\*\*\*] Target in [\*\*\*\*\*] will have an additional Option Exercise Fee under a Non-exclusive License Agreement of [\*\*\*\*\*] US Dollars (US[\*\*\*\*\*]) if it is a [\*\*\*\*\*] or [\*\*\*\*\*] US Dollars (US[\*\*\*\*\*]) if it is a [\*\*\*\*\*] and under an Exclusive License Agreement an additional Option Exercise Fee of [\*\*\*\*\*] dollars [\*\*\*\*\*] if it is a [\*\*\*\*\*] or [\*\*\*\*\*] dollars (US\$[\*\*\*\*\*]) if it is a [\*\*\*\*\*].
- 1.58 "Option Notice" has the meaning set forth in Section 5.1.
- 1.59 "Option Period" has the meaning set forth in Section 5.1.

1.60 "Patent(s)" means an (i) issued patent, a patent application, and a future patent issued from any such patent application, (ii) a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (i), and (iii) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (i) or (ii), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder).

1.61 "Pre-Existing Restrictions" means, with respect to a Target proposed for inclusion on the Reserved Target List pursuant to Section 4.2(b), that Acuitas or its Affiliates have granted to a Third Party with respect to a Target for which CureVac requests in the case of an exclusive reservation, a non-exclusive or exclusive license or option or in the case of a non-exclusive reservation, an exclusive license or option in each case pursuant to a *bona fide* written agreement that is executed in good faith in the ordinary course of business prior to the date of the Target Notice and that is still in effect on such date, to develop and commercialize a product that is comprised of Lipid Nanoparticles (LNP) containing a mRNA Construct encoding such Target or a Third Party has delivered a Target Notice with respect to such Target prior to the Target Notice by CureVac and has subsequently elected to enter into a *bona fide* written agreement that is executed in good faith in the ordinary course of business.

1.62 "[\*\*\*\*\*] Target" will mean the designated [\*\*\*\*\*] Target of a Licensed Vaccine Product. Each [\*\*\*\*\*] Target encoded for in the Licensed Vaccine Product will be termed an "[\*\*\*\*\*] Target".

1.63 "Program" means the program of activities using Acuitas LNP Technology and CureVac Technology for the development of Licensed Products incorporating CureVac's mRNA Constructs that the Parties engage in under this Agreement pursuant to the Work Plan.

1.64 "Program Improvement Technology" means Program Technology which constitutes an Improvement to either Party's or both Parties' Technology at the time such Improvement is discovered, created, conceived, developed or reduced to practice. Program Improvement Technology will be either Sole Improvement Technology or Dual Improvement Technology. For the avoidance of doubt, Program Improvement Technology will not include any Improvement arising out of a Party's internal research and development efforts or collaborations with Third Parties, in each case conducted outside of the Program; *provided* that such Improvement is not developed using or with reference to the Technology, Confidential Information or Material of the other Party.

1.65 "Program Know-How" means all Know-How, including Know-How embodied in Materials, created, conceived, developed or reduced to practice in connection with activities performed pursuant to the Work Plan or using Formulated Product as set forth in the Work Plan under this Agreement (whether solely by or on behalf of one Party or jointly by or on behalf of the Parties).

1.66 "Program Technology," means all Program Know-How and all Patents directed to or disclosing such Program Know-How.

1.67 "Receiving Party" has the meaning set forth in Section 7.1.

1.68 "Records" has the meaning set forth in Section 3.3(a).

1.69 "Reserved Target" means a Target with respect to which CureVac shall have delivered to the Escrow Agent a Target Reservation Request and in response thereto the Escrow Agent shall have delivered to CureVac a Target Response Notice under Section 4.2(c)(i) for such Target to become a Reserved Target. A Reserved Target that is replaced pursuant to Section 4.2 will no longer be deemed a Reserved Target. For avoidance of doubt: (i) the term Reserved Target includes all variants of such Target, including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been made (for example, mutated versions, derivatives or fragments) and species homologs and orthologs thereof, provided however that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses substantially similar biological activity to such Target(s) (for example antigenicity in case of antigens); and (ii) if a given protein, e.g., an antibody comprises separated amino acid chains which might be delivered by separated mRNA Constructs such proteins would be defined as one Reserved Target.

1.70 "Reserved Target List" means collectively, the list of all Reserved Targets.

1.71 "Restricted Target List" has the meaning set forth in Section 4.2(a).

1.72 "Sole Improvement Technology" means, without regard to inventorship, an Improvement to one Party's Technology that is not also an Improvement to the other Party's Technology at the time such Improvement is discovered, created, conceived, developed or reduced to practice.

1.73 "Target" means either: (a) [\*\*\*\*\*] naturally occurring human protein encoded by a specific gene locus, as identified by the applicable transcript identifier (i.e., [\*\*\*\*\*]), gene identifier (i.e., [\*\*\*\*\*]), gene name and synonyms and DNA sequence coordinates, together with all variants of such protein, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof, provided however that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring human protein (for example immunogenicity in case of antigens); or (b) [\*\*\*\*\*] protein that is not covered by subclause (a) above, together with any variants, mutated versions, derivatives or fragments of such protein, provided that any such variant, mutated version, derivative or fragment [\*\*\*\*\*]. If a given protein, e.g., an antibody comprises separated amino acid chains which might be delivered by separated mRNA Constructs such proteins would be defined as one Target.

1.74 "Target Notice" has the meaning set forth in Section 4.2(b).

1.75 "Target Reservation and Maintenance Fees" means the annual fees set forth in Section 4.4.

1.76 "Target Response Notice" has the meaning set forth in Section 4.2(c).

1.77 "[\*\*\*\*\*]" has the meaning set forth in Section 1.1.

1.78 "[\*\*\*\*\*] License" has the meaning set forth in Section 1.1.

1.79 "Technology" means collectively Patents and Know-How.

1.80 "Term" has the meaning set forth in Section 9.1.

1.81 "Third Party" means any person or entity other than CureVac, Acuitas and their respective Affiliates.

1.82 "Third Party Claims" has the meaning set forth in Section 8.7(a).

1.83 "[\*\*\*\*\*] Patent Rights" means any and all Patents resulting from the research collaboration conducted between Acuitas and [\*\*\*\*\*] of the [\*\*\*\*\*] from about [\*\*\*\*\*] to the Effective Date together with associated Know-How to the extent this Know-How is known to Acuitas and can be provided by Acuitas without breaching any confidentiality obligations of Acuitas. For avoidance of doubt, such results include those of the research summarized in [\*\*\*\*\*]

1.84 "Vaccine" means any product primarily intended (i) to elicit an adaptive immune response in the recipient against a specific disease-causing organism or malignancy as the result of presentation of antigen(s) associated with the disease-causing organism or malignancy; or (ii) to provide passive immune protection against a specific disease-causing organism.

1.85 "Work Plan" has the meaning set forth in Section 3.1(a).

1.86 "Work Plan Leaders" has the meaning set forth in Section 2.1.

1.87 "Works and Services" means the activities to be performed by Acuitas pursuant to the Work Plan.

## ARTICLE 2

### Governance

2.1 **Management.** Management of the Program activities will be under the responsibility of Michael Hope, Chief Scientific Officer, for Acuitas (the "Acuitas Work Plan Leader") and Patrick Baumhof for CureVac (the "CureVac Work Plan Leader," and together with the Acuitas Work Plan Leader, the "Work Plan Leaders"). Each Work Plan Leader will be the primary point of contact for the other Party on all matters relating to the Program activities.

#### 2.2 **Joint Development Committee.**

(a) **Development Committee.** As soon as practicable, the Parties will establish a Joint Development Committee, comprised of up to [\*\*\*\*\*] representatives of CureVac and up to [\*\*\*\*\*] representatives of Acuitas (the "JDC"). One such representative from each Party will be such Party's Work Plan Leader. Each Party may replace its Work Plan Leader and other JDC representatives at any time upon written notice to the other Party, provided, however, that each Party shall use commercially reasonable efforts to ensure continuity on the JDC. With the consent of the other Party (which will not be unreasonably withheld), each Party may invite non-voting employees and consultants to attend JDC meetings of the JDC, subject to their agreement to be bound to the same extent as a permitted subcontractor under Section 3.4.

(b) **Meetings.** While in existence, the JDC will meet each Calendar Quarter by teleconference, videoconference or in person and, at a minimum, one of such meetings each calendar year will be in person (which in-person meeting will be held on an alternating basis in Tübingen, Germany and in Vancouver, BC), unless agreed otherwise by the JDC representatives. The JDC will have a quorum if at least [\*\*\*\*\*] representative of each Party is present or participating. Each Party will be responsible for all of its own expenses of participating in the committee meetings. The Parties will endeavor to schedule meetings of the JDC at least [\*\*\*\*\*] months in advance. The Parties will alternate in preparing the meeting agenda, and the Party that was responsible for preparing the meeting agenda will prepare and circulate for review and approval by the other Party written minutes of such meeting within [\*\*\*\*\*] days after such meeting. The Parties will agree on the minutes of each meeting promptly, but in no event later than the next meeting of the JDC.

(c) **Responsibilities.** The JDC will oversee and supervise the overall performance of the Work Plan and within such scope will:

- (i) review the efforts of the Parties and allocate those resources for the Work Plan committed by the Parties hereunder;
- (ii) revise and approve any revisions to the Work Plan regularly and in any event at least [\*\*\*\*\*] days before the start of each Calendar Quarter during the Term;
- (iii) form such other committees as the JDC may deem appropriate, provided that such committees may make recommendations to the JDC but may not be delegated JDC decision-making authority;
- (iv) address such other matters relating to the activities of the Parties under this Agreement as either Party may bring before the JDC, including any matters that are delegated to the JDC to decide as provided in this Agreement; and
- (v) attempt to resolve any disputes on an informal basis.

(d) **Decision-making.** The JDC will make decisions only by unanimous consent. In the event the JDC is unable to reach agreement as to a matter within the JDC's jurisdiction (such event, a "**JDC Deadlock**"), upon the written request of a Party, such matter will be referred to a senior executive of each Party (the "**Executive Officers**") (or their designees, which designee is required to have decision-making authority on behalf of such Party), who will attempt in good faith to resolve such JDC Deadlock by negotiation and consultation for a [\*\*\*\*\*]-day period following receipt of such written notice. If, despite such efforts, agreement on a particular matter cannot be reached by the Executive Officers within such [\*\*\*\*\*]-day period, then CureVac shall have the final decision-making authority with respect to such JDC Deadlock, subject to Section 3.1(c).

(e) **Limits on JDC Authority.** Each Party will retain the rights, powers and discretion granted to it under this Agreement and no such rights, powers, or discretion will be delegated to or vested in the JDC unless such delegation or vesting of rights is expressly provided for in this Agreement or the Parties expressly so agree in writing. The JDC will not have the power to amend, modify or waive compliance with this Agreement (other than as expressly permitted hereunder). Notwithstanding anything herein to the contrary, the JDC will not have the power to require any Party to perform any activities that are materially greater in scope or more costly than those provided for in the Work Plan then in effect or otherwise under this Agreement.

ARTICLE 3

**The Program**

3.1 **Program Generally.** The Parties will jointly conduct the Program. It is intended that Acuitas will be responsible for the lipid chemistry and LNP formulation and characterization work, CureVac will be responsible for mRNA Construct development and Acuitas and CureVac will each undertake preclinical studies as allocated in the Work Plan.

(a) **Work Plan Preparation.** The development activities to be undertaken by the Parties with respect to the Program will be described in a detailed written development plan (the "**Work Plan**"). The Work Plan includes a description of activities undertaken by the Parties under the Material Transfer Agreements and prior to the execution of this Agreement. The initial Work Plan, which will cover the initial [\*\*\*\*\*] months of the Program, is attached hereto as **Exhibit 3.1 (a)**.

(b) **Work Plan Contents.** The Work Plan will include (i) all activities to be undertaken by each Party with respect to the Program, including Acuitas' manufacture and supply of Formulated Product, (ii) a detailed budget of the FTE activities, FTE Costs and out-of-pocket costs to be incurred by Acuitas for which CureVac will reimburse Acuitas in connection with the performance of the Works and Services, (iii) the Materials to be provided by one Party to the other, (iv) forecasting and ordering procedures for the Formulated Product, and (v) the projected timelines for completion of all activities set forth therein. The goal of the Work Plan and Program will be to evaluate and produce LNP formulations that are safe and efficacious for delivery of CureVac's mRNA Constructs and to advance the development of such mRNA-LNP formulations. The Parties will use commercially reasonable efforts to develop LNP formulations which do not infringe Third Party Technology (for avoidance of doubt, [\*\*\*\*\*]). The Program will include activities with respect to Reserved Targets but may also include activities with respect to Targets that are not on the CureVac Reserved List provided all such Targets have been pre-cleared with the Escrow Agent and confirmed not subject to exclusive Pre-existing Restrictions. Pre-clearance with the Escrow Agent will not reserve any Targets not on the CureVac Reserved List and Acuitas, through the Escrow Agent, will notify CureVac upon any such Target becoming subject to an exclusive Pre-existing Restriction at which time, CureVac will terminate all activities under the Program with respect to such Target.

(c) **Amendments to the Work Plan.** The Work Plan will be reviewed as necessary at each meeting of the JDC, and at any other time upon the request of either Party, and will be modified in accordance with the goal as defined in Section 3.1(b) and as appropriate at the direction of the JDC to reflect material scientific (and other) developments. Each Calendar Quarter, the JDC will update the Work Plan to cover the subsequent [\*\*\*\*\*] months of the Program in detail. In all events, the Work Plan will be consistent and not conflict with the terms of this Agreement, and in the event of any conflict between the Work Plan and this Agreement, the terms of this Agreement will control. The Work Plan may be amended by the JDC to accelerate, decelerate, add or remove activities thereunder including reducing or eliminating Acuitas' responsibilities for an activity thereunder, provided that Acuitas' written consent is required in order to amend the Work Plan to significantly accelerate or decelerate the planned Acuitas activities, materially change the Acuitas resources required to perform the Work Plan activities or to require allocation by Acuitas of FTEs significantly greater than or less than those provided for in the Work Plan, such consent not to be unreasonably withheld, delayed or conditioned. CureVac may not amend the Work Plan to include any activities that are subject to exclusive Pre-existing Restrictions.

(d) **Obligations Under the Work Plan.** During the Term, each Party will perform the Works and Services in a professional manner and in accordance with the Work Plan, and each Party will use Diligent Efforts to meet the objectives and timelines set forth therein. It is understood that the activities and goals of the Work Plan are experimental and that successful results cannot be guaranteed. The Parties will otherwise conduct the Program on the terms and conditions set forth in this Agreement and in accordance with the Work Plan. Each Party will cooperate with and provide reasonably requested non-financial support to the other Party in such other Party's performance of its responsibilities under the Work Plan. In addition to the reporting obligations set forth in Section 3.3(b), each Party will keep the other Party reasonably informed of such Party's activities under the Program and will reasonably consult with such other Party and consider such other Party's comments and advice with respect to all material decisions relating to such activities in good faith.

(e) **Supply of Formulated Product.** Acuitas will manufacture and supply CureVac with Formulated Product as set forth in the Work Plan and CureVac will pay to Acuitas the Formulated Product Fee for such Formulated Product. CureVac will use the Formulated Product solely for research purposes in laboratory animals and/or *in vitro* studies but will not use Formulated Product in humans.

(f) **Technology Transfer to Contract Manufacturing Organization.** Following CureVac's exercise of an Option, Acuitas will be responsible to transfer the formulation process for that Licensed Product to a GMP manufacturer. In order to ensure a smooth transfer of the manufacturing process upon Option Notice, at CureVac's discretion the Parties will perform some preparatory technology transfer activities, to a GMP manufacturer that is reasonably acceptable to Acuitas, such technology transfer starting after the Effective Date. The activities to be performed with respect to such technology transfer, the rights and obligations of the Parties, and the reimbursement of Acuitas for such technology transfer activities are set forth in the Technology Transfer Agreement in **Exhibit 3.1 (f)** hereto, and will be otherwise governed by the terms and conditions of this Agreement.

(g) **Payment for External Expenses.** On a Calendar Quarterly basis, CureVac will reimburse Acuitas for any reasonable external costs that are incurred by Acuitas in connection with performing the Works and Services in accordance with the Work Plan and Work Plan budget, such external costs being specified in the Work Plan or agreed by the JDC. Acuitas will send a reasonably detailed invoice to CureVac no later than [\*\*\*\*\*] days after the end of each Calendar Quarter, which invoice shall include a detailed summary of and reasonable documentation for all such external costs. CureVac agrees to pay undisputed amounts in each such invoice within [\*\*\*\*\*] days of CureVac's receipt thereof. Except for such reimbursement of external costs, CureVac's payments to Acuitas with respect to FTE Costs as set forth in Section 3.2, each Party will bear its own costs of performing the Work Plan.

3.2 **FTEs.**

(a) **Generally.** Acuitas will perform the Works and Services under the Work Plan and as part of the Program. The actual number of Acuitas FTEs committed to work on the Program at any particular point in time will be set forth in the Work Plan. The Parties will prepare the Work Plan, which will determine the number of Acuitas FTEs to be funded each year. Notwithstanding anything to the contrary set forth herein, in no event will (i) Acuitas be required to devote any FTEs to the conduct of the Program other than those funded by CureVac or (ii) CureVac be required to fund more than the actual number of FTEs devoted by Acuitas to the Work Plan.

(b) **FTEs.** Acuitas shall ensure that those individuals selected by Acuitas to perform the Works and Services and otherwise support the activities to be undertaken by Acuitas pursuant to the Work Plan will have sufficient scientific expertise, skill, training and competency to perform the proposed work and have similar skills, training and competency as those FTEs employed by Acuitas to perform work on Acuitas' internal programs and for Third Parties. In the event that CureVac has concerns regarding the selection of an individual to perform the Works and Services or other activities under this Agreement, the Parties will discuss such concerns in good faith.

(c) **FTE Costs.** CureVac will reimburse Acuitas on a Calendar Quarter-by-Calendar Quarter basis for FTE Costs incurred to conduct the Work Plan (including the manufacture of Formulated Product) and provided such FTE Costs are either set forth in the Work Plan or pre-agreed by the JDC. Acuitas will send a reasonably detailed invoice to CureVac no later than [\*\*\*\*\*] days after the end of each Calendar Quarter, which invoice shall include a summary of all activities by the name of each individual, number of hours devoted by each such individual, and Works and Services type/activity performed by each such individual during such Calendar Quarter. CureVac agrees to pay undisputed amounts in each such invoice within [\*\*\*\*\*] days of CureVac's receipt thereof.

3.3 **Program Records, Reports and Materials.**

(a) **Records.** Each Party will maintain, or cause to be maintained, records of its activities under the Program in sufficient detail and in good scientific manner appropriate for scientific, Patent and regulatory purposes, which will properly reflect all work included in the Program ("**Records**") for a period of at least [\*\*\*\*\*] years after the creation of such Records. CureVac will have the right to request and receive a copy of any such Records maintained by Acuitas; and Acuitas will have the right to request and receive a copy of any such Records maintained by CureVac to the extent such Records are required by Acuitas to exercise its rights under this Agreement.

(b) **Program Reports.** During the Term each Party will furnish to the JDC a summary written report within [\*\*\*\*\*] days after the end of each Calendar Quarter describing its progress under the Work Plan as part of the Program. Within [\*\*\*\*\*] days following expiration or earlier termination of this Agreement, each Party will furnish to the JDC a final summary written report. Acuitas shall promptly provide all additional information with respect to the Acuitas LNP Technology that is reasonably requested by CureVac and necessary or useful for CureVac to determine whether to exercise an Option with respect to any Licensed Product.

(c) **Materials.**

(i) Each Party will, during the Term, furnish to each other samples of Materials which comprise, embody or incorporate CureVac Technology or Acuitas LNP Technology only as expressly set forth in the Work Plan. Acuitas will furnish to CureVac the quantities of Formulated Product as set forth in the Work Plan and will use commercially reasonable efforts to provide any additional quantities which will be required in performance of the Program. In addition, each Party will, upon the other Party's reasonable written request, furnish to such other Party other samples of Materials which comprise, embody or incorporate CureVac Technology or Acuitas LNP Technology that are in such Party's Control and are reasonable (both in quantity and identity) and useful for the other Party to carry out its responsibilities under the Work Plan, provided (A) such Materials are reasonably and readily available in excess of the providing Party's own requirements, and (B) supply of such Materials will not, in the providing Party's reasonable judgment, (1) conflict with the providing Party's internal or Third Party research programs, (2) conflict with the providing Party's internal policies regarding such Materials or (3) violate any agreement to which the providing Party is a party. Upon termination or expiration of this Agreement and unless such Material is necessary or useful for the exercise of a Party's rights or obligations under another or future License Agreement, Materials will, at the providing Party's option and request to be made (if at all) within three (3) months after such termination or expiration or the effective date of termination, be returned to the providing Party or destroyed. The provision of Materials hereunder by either Party will not constitute any grant, option or license under any Patents or Know-How, except as expressly set forth herein.

(ii) Each Party will use such Materials only in accordance with the Work Plan and otherwise in accordance with the terms and conditions of this Agreement. Except with the prior written consent of the supplying Party, the Party receiving any Materials will not distribute or otherwise allow the release of Materials to any Third Party, except, with respect to either Party, to any permitted subcontractors under Section 3.4 and, with respect to CureVac, to any Approved Partners. All Materials delivered to the receiving Party will remain the sole property of the providing Party and will be used in compliance with all applicable Law and only to perform activities set forth in the Work Plan. The Materials supplied under this Agreement will be used with prudence and appropriate caution in any experimental work because not all of their characteristics may be known.

3.4 **Permitted Subcontracting.** Acuitas may, with the prior written consent of CureVac, subcontract its activities to be performed under the Work Plan to an Approved Partner or a Third Party, and CureVac may subcontract its activities to be performed under the Work Plan to any Third Party, provided that Acuitas Confidential Information related to LNP Technology formulations is provided to such Party subject to the confidentiality obligations under Article 7 below. Any such Third Party will have entered into a written agreement with the subcontracting Party that includes terms and conditions protecting and limiting use and disclosure of Confidential Information and Materials and Know-How at least to the same extent as under this Agreement, and (in the case of Approved Partners described in clause (ii) of the definition thereof) requiring such Third Party and its personnel to assign to the subcontracting Party all right, title and interest in and to any Patents and Know-How and Materials created, conceived, developed or reduced to practice in connection with the performance of subcontracted activities in accordance with this Agreement in order to give effect to the provisions of Article 6. CureVac shall use commercially reasonable efforts to obtain the foregoing assignment for Approved Partners described in clause (i) of the definition thereof, and if CureVac is unable to obtain such assignment, CureVac shall obtain a non-exclusive, perpetual, irrevocable, royalty-free, and sublicensable license under the applicable Know-How and Patents. Any such subcontracting activities will be described in the reports for the Program required by Section 3.3(b).

3.5 **Program Licenses.**

(a) **By Acuitas.** Subject to the terms and conditions of this Agreement, Acuitas hereby grants to CureVac a worldwide, non-exclusive license under the Acuitas LNP Technology, solely to the extent needed to enable CureVac to perform its activities set forth in the Work Plan and for no other purpose. The foregoing licenses shall not include the right to grant sublicenses, except to Affiliates of CureVac, to Approved Partners or to permitted subcontractors in accordance with Section 3.4.

(b) **By CureVac.** Subject to the terms and conditions of this Agreement, CureVac hereby grants to Acuitas a worldwide, non-exclusive license under CureVac Technology, solely to the extent needed to enable Acuitas to perform its activities set forth in the Work Plan and for no other purpose. The foregoing license shall not include the right to grant sublicenses, except to permitted subcontractors in accordance with Section 3.4.

(c) **Option for additional Licenses.** For the event that, in their reasonable judgment, CureVac, its Affiliates or sublicensees consider it necessary to obtain a sublicense [\*\*\*\*] to practice the Acuitas LNP Technology in accordance with the Work Plan, Acuitas hereby grants to CureVac the option to acquire one or more sublicenses under any such [\*\*\*\*] Technology, to the extent Acuitas has the right to grant sublicenses. Such sublicense will be granted at the terms of Acuitas' main Third Party license agreement on the effective date of the sublicense, and where such terms are equivalent to the terms and conditions that would be applicable to Acuitas if Acuitas were developing the product under the Third Party license. The scope of each such option for sublicense is equivalent to the scope of the licenses granted to CureVac under Section 3.5 (a) above, provided, however, that CureVac will have the option to extend the sublicense with respect to a License Agreement at the terms of Acuitas' main Third Party license agreement, and the sublicense will then also have the scope equivalent to the scope of the licenses granted to CureVac under the License Agreements, provided that they will only become effective upon the respective License Agreement becoming effective and provided CureVac opts for such extension in writing. CureVac is entitled to exercise the option at any time during the Term, and upon written notice of CureVac that it exercises the option, the Parties shall finalize in good faith the terms of such sublicense agreement according to the terms of Acuitas' main Third Party license agreement.

(d) **No Other Licenses.** No license or right is or will be created or granted hereunder by implication, estoppel or otherwise. All licenses and rights are or will be granted only as expressly provided in this Agreement.

3.6 **Program** [\*\*\*\*\*]. In the event during [\*\*\*\*\*], CureVac shall actually pay to Acuitas combined FTE Costs, Reservation and Maintenance Fees and License Fees ([\*\*\*\*\*]), Acuitas will within [\*\*\*\*\*] days following the last day of the applicable Contract Year, [\*\*\*\*\*].

#### ARTICLE 4

##### **Reserved Targets**

4.1 **Generally.** CureVac will select the Targets that will be the subject of the work performed as part of the Program from the Reserved Target List. CureVac shall have the right, but not the obligation, to reserve Targets (or replace a Reserved Target with a new Target) in accordance with this Article 4.

##### 4.2 **Restricted Target List.**

(a) **Pre-existing Restrictions.** Acuitas shall maintain - at the Escrow Agent - a current and up-to-date list of Targets that are subject to Pre-Existing Restrictions (the "**Restricted Target List**"). Such list will also identify the scope of the Pre-Existing Restrictions. Acuitas represents, warrants and covenants to CureVac that (i) the Restricted Target List is and will at all times be accurate; and (ii) Acuitas or the Escrow Agent will not add any Reserved Targets to the Restricted Target List or grant to any Third Party any exclusive or non-exclusive licenses or options under the Acuitas LNP Technology with respect to any Reserved Targets that would preclude Acuitas from entering into an Exclusive License Agreement or a Non-Exclusive License Agreement with respect to such Reserved Target as set forth herein.

(b) **Target Notices.** If CureVac desires to include a Target as a Reserved Target hereunder, CureVac will notify the Escrow Agent in writing of the same, which notice will identify, in addition to such proposed Target and whether CureVac wishes to exclusively or non- exclusively reserve such Target, (i) the information on the Target Reservation Request Form attached hereto as **Exhibit 4.2 A** or Vaccine Target Reservation Request Form attached hereto as **Exhibit 4.2 B**, and (ii) the identity of each Reserved Target (if any) that CureVac desires to remove as a Reserved Target (each such notice, a "**Target Notice**").

(c) **Target Response Notices.**

(i) The Escrow Agent - on behalf of Acuitas - will review each Target Notice provided by CureVac hereunder to determine whether or not any such proposed Target is on the Restricted Target List as of the date of such Target Notice. Within [\*\*\*\*\*] days of the Escrow Agent's receipt of a Target Notice, the Escrow Agent will provide CureVac with written notice that includes the information set forth in subsection (c)(ii) and (iii) (each such notice, a "Target Response Notice").

(ii) If, as of the date of CureVac's Target Notice for a Target, such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Third Party Restrictions that restrict Acuitas from granting the applicable license to CureVac under the Acuitas LNP Technology hereunder or under a License Agreement with respect to such Target, then such Target will not become a Reserved Target. The Target Response Notice issued for such Target will certify to CureVac that such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Third Party Restrictions that restrict Acuitas from granting the applicable license to CureVac under the Acuitas LNP Technology hereunder or under a License Agreement and that such Target is not a Reserved Target.

(iii) If, as of the date of CureVac's Target Notice for a Target, such Target is not listed on the Restricted Target List, or is listed on the Restricted Target List but is not listed as being subject to Pre-Existing Third Party Restrictions that restrict Acuitas from granting the applicable license to CureVac under the Acuitas LNP Technology hereunder or under a License Agreement with respect to such Target, then such Target will become a Reserved Target and will be added to the Reserved Target List subject to the Concurrent Reserved List Limits set forth in subsection (d) below.

(d) **Concurrent Reserved List Limits.** The following concurrent reserved list limits will apply to all Reserved Targets ("Concurrent Reserved List Limits").

(i) **Minimum Number Reserved Targets.** During the Term, CureVac will maintain [\*\*\*\*\*] Target on the Reserved Target List. CureVac may select additional Reserved Targets at any time during the Term up to the totals allowed for in subparagraph (ii) below. For the avoidance of doubt: (i) if CureVac removes a Reserved Target from the Reserved Target List the number of Reserved Targets on the Reserved Target List reduces respectively; and (ii) if CureVac exercises an Option in respect of a License Agreement, the Reserved Target that is the subject of the License Agreement remains on the Reserved Target List but is identified as a licensed Target and is not subject to any further Target Reservation and Maintenance Fees.

(ii) **Maximum Number Reserved Targets.** CureVac will have the right to select up to [\*\*\*\*\*] Targets at any one time to be placed on the Reserved Target List provided no more than [\*\*\*\*\*] may be exclusive Reserved Targets.

(iii) **Reserved Vaccine Target List.** In the case of Targets intended to be used in a Licensed Vaccine Product, CureVac will notify the Escrow Agent of the [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets, if any. The [\*\*\*\*\*] Target will count as a single Reserved Target, however, [\*\*\*\*\*] Targets will not be counted against the total number of Reserved Targets available to CureVac, provided, however, that the total number of [\*\*\*\*\*] Targets on the Reserved Target List cannot be more than [\*\*\*\*\*] at any time of which not more than [\*\*\*\*\*]. For the avoidance of doubt, if CureVac exercises an Option in respect of a License Agreement that includes [\*\*\*\*\*] Targets, the number of [\*\*\*\*\*] Targets on the Reserved Target List reduces respectively by the number of [\*\*\*\*\*] Targets included in such License Agreement.

**4.3 Expiration of Pre-Existing Restrictions.** If any Pre-Existing Restrictions identified in a Target Response Notice that precluded Acuitas from granting CureVac a non-exclusive or exclusive, as applicable, license under the Acuitas LNP Technology later expire or otherwise are modified or terminate such that Acuitas is no longer precluded under the terms of the applicable Third Party agreement from granting the applicable rights to CureVac with respect to such Target, the Escrow Agent will notify CureVac of such event and CureVac will have an exclusive option, for a period of [\*\*\*\*\*] days following delivery of notice to CureVac, to add such Target to the Reserved Target List as a Reserved Target in accordance with Section 4.2 (c), subject to the Concurrent Reserved List Limits. For clarity, CureVac will at all times thereafter have the right to provide a Target Notice for such Target to the Escrow Agent pursuant to Section 4.2(b) but such Target Notice will be subject to any intervening Pre-Existing Third Party Restrictions.

**4.4 Fees.**

**(a) Target Reservation and Maintenance Fees.** CureVac will pay to Acuitas the fees shown below per Contract Year for each Reserved Target added to the Reserved Target List pursuant to Section 4.2 as a non-exclusive Target:

(i) [\*\*\*\*\*]

(ii) [\*\*\*\*\*]

(iii) [\*\*\*\*\*]

or the fees shown below per Contract Year for each Reserved Target added to the Reserved Target List pursuant to Section 4.2 as an exclusive Target:

(iv) [\*\*\*\*\*]

(v) [\*\*\*\*\*]

(vi) [\*\*\*\*\*]

In the case of Targets for Vaccines, instead of the fees set forth in (i) to (vi) above, CureVac will pay to Acuitas the fees shown below per Contract Year for each non- exclusively Reserved [\*\*\*\*\*] Target added to the Reserved Target List pursuant to Section 4.2 together with each associated [\*\*\*\*\*] Target:

(vii) [\*\*\*\*\*]

(viii) [\*\*\*\*\*]

(ix) [\*\*\*\*\*]

or the fees shown below per Contract Year for each exclusively Reserved Primary Vaccine Target added to the [\*\*\*\*\*] List pursuant to Section 4.2 together with each associated [\*\*\*\*\*] Target:

(x) [\*\*\*\*\*]

(xi) [\*\*\*\*\*]

(xii) [\*\*\*\*\*]

**(b)** Each such payment will be due within [\*\*\*\*\*] after CureVac's receipt of an invoice from Acuitas following (i) the date on which the Reserved Target is added to the Reserved Target List and (ii) the beginning of each Contract Year thereafter during which the Reserved Target remains on the Reserved Target List. If a Reserved Target is removed from the Reserved Target List, CureVac may credit, within [\*\*\*\*\*] days, the portion of the annual fee previously paid that corresponds to the remainder of the Contract Year to new Reserved Target. For the first and the last Contract Year during which a Reserved Target is on the Reserved Target List, the payments shall be made on a *pro rata temporis* basis, i.e., shall be reduced accordingly.

**(c)** **Credit.** Once paid by CureVac as set forth above, up to [\*\*\*\*\*] dollars (US\$[\*\*\*\*\*]) of the cumulative Target Reservation and Maintenance Fees paid with respect to a particular Target will be credited against the Option Exercise Fees for an Exclusive License Agreement and up to [\*\*\*\*\*] dollars (US\$[\*\*\*\*\*]) of the cumulative Target Reservation and Maintenance Fees paid with respect to a particular Target will be credited against the Option Exercise Fees for a Non-exclusive License Agreement. In the case of a Licensed Vaccine Product, only the [\*\*\*\*\*] Target Reservation and Maintenance Fees will be credited against the license fee for a License Agreement for the Licensed Vaccine Product.

ARTICLE 5

**CureVac License Options**

5.1 **Option.** From the period commencing on the Effective Date and ending on the expiration of the Term (the "**Option Period**"), CureVac will have options (each, an "**Option**"), on a Reserved Target by Reserved Target basis, to enter into a maximum of [\*\*\*\*\*] under the Acuitas LNP Technology with respect to Licensed Product(s) containing mRNA Construct(s) intended to express such Reserved Target in the applicable form (non-exclusive or exclusive) set forth in Exhibit 1.54 and Exhibit 1.31, provided that the Exhibits to such template agreements are to be prepared or updated in accordance with the terms of the respective License Agreement and this Agreement. In the event CureVac opts for an exclusive license of a Reserved Target for Licensed Vaccine Products, the exercise notice will identify the [\*\*\*\*\*] Target and the [\*\*\*\*\*] Target(s), if any, and the exclusivity will apply with respect to the [\*\*\*\*\*] Target, and will cover any combination of the [\*\*\*\*\*] Target, with or without and with one or several of the [\*\*\*\*\*] Targets, if any. CureVac may exercise each such Option by providing to Acuitas, prior to the expiration of the Term, written notice of Option exercise, setting forth the particular Reserved Target which is intended to be expressed by the Licensed Products (each such notice, an "**Option Notice**"). A separate Option Notice and Option Exercise Fee will be required for each License Agreement with respect to which CureVac exercises an Option pursuant to this Section 5.1, and CureVac will pay to Acuitas the Option Exercise Fee for each such License Agreement as set forth in Section 5.3. If not exercised prior to the expiration of the Term, the Options granted to CureVac under this Article 5 with respect to all Licensed Products will terminate in full and will no longer be exercisable. In the event that CureVac terminates a license(s) during the Term, the Target(s) subject to the license(s) will be removed from the Reserved Target List and CureVac may replace such Target(s) on the Reserved Target List in accordance with Article 4 and may exercise an option to take a license to such Target(s) in accordance with this Article 5. For clarity no more than [\*\*\*\*\*] active licenses can be held at any time.

5.2 **CureVac's Exercise of Option.** Within [\*\*\*\*\*] business days of CureVac's delivery of an Option Notice to Acuitas, CureVac and Acuitas will enter into a License Agreement with respect to Licensed Products containing mRNA Constructs intended to express the respective Reserved Target for which CureVac has issued an Option Notice.

5.3 **Option Exercise Fee.** Within [\*\*\*\*\*] business days after entry into a License Agreement for Licensed Product(s), Acuitas will issue an invoice to CureVac for the Option Exercise Fee less any amounts creditable against such Option Exercise Fee for such License Agreement pursuant to Section 4.4(c). Each such payment will be due within [\*\*\*\*\*] days after CureVac's receipt of such invoice from Acuitas.

ARTICLE 6

**Ownership of Program Technology**

6.1 **Disclosure of Program Know-How.** Each Party will promptly (and at least on a Calendar Quarterly basis) disclose to the other Party any Program Know-How that is created, conceived or reduced to practice by or on behalf of such Party and owned by the other Party pursuant to Section 6.2(c), and will provide such documentation regarding same as such other Party may reasonably request.

6.2 Ownership.

- (a) **CureVac Owned Technology.** As between the Parties, CureVac will continue to own all right, title and interest in and to the CureVac Background Technology.
- (b) **Acuitas Owned Technology.** As between the Parties, Acuitas will continue to own all right, title and interest in and to the Acuitas Background Technology.
- (c) **Sole and Joint Program Know-How.**

(i) Except as set forth in subsection (iii) below, each Party will solely own all right, title and interest in and to all Program Technology that is discovered, created, conceived, developed or reduced to practice solely by or on behalf of such Party ("Solely-Owned Program Know-How"), and all Patents arising therefrom that claim such Solely-Owned Program Know-How ("Solely-Owned Program Patents") and together with the Solely-Owned Program Know-How, the "Solely-Owned Technology"), and all right, title and interest in and to all Solely- Owned Technology will automatically vest solely in such Party.

(ii) Except as set forth in subsection (iii) below, the Parties will jointly own any and all Program Know-How that is discovered, created, conceived, developed or reduced to practice jointly by or on behalf of the Parties ("Jointly-Owned Program Know-How") and all Patents arising therefrom that claim such Jointly-Owned Program Know-How ("Jointly-Owned Program Patents") and together with the Jointly-Owned Program Know-How, the "Jointly-Owned Technology"). Each Party will have an undivided one-half interest in and to such Jointly-Owned Program Technology. Acuitas will have a right to grant non-exclusive licenses (with the right to grant sublicenses through multiple tiers) to CureVac's share in such Jointly-Owned Technology to the extent such license is required to exercise and exploit the Acuitas LNP Technology, and CureVac will have a right to grant non-exclusive licenses (with the right to grant sublicenses through multiple tiers) to Acuitas' share in such Jointly-Owned Technology to the extent such license is required to exercise or exploit the CureVac Technology, i.e., neither Party is to be blocked in the use of its own Technology by Jointly- Owned Technology. Subject to the licenses hereunder or under any License Agreement, any further license requires the prior written consent of the other Party. Without limiting Acuitas' right to grant non-exclusive licenses to Jointly- Owned Technology as set forth in the preceding two sentences, Acuitas shall not assign or transfer its ownership interest in, or otherwise encumber its ownership interest in, the Jointly-Owned Program Technology without the prior written consent of CureVac, which consent shall not be unreasonably withheld, delayed or conditioned. In any event, the ownership rights in Jointly-Owned Program Technology remain subject to the licenses hereunder or under any License Agreement, other intellectual property rights of the other Party and the other terms and conditions of this Agreement. To the extent applicable and at the reasonable written request of a Party, the other Party will in writing grant such consents and confirm that no such accounting is required to effect the foregoing regarding Jointly-Owned Program Technology. Each Party, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), Approved Partners, consultants and agents, hereby assigns (and to the extent such assignment can only be made in the future hereby agrees to assign), to the other Party a joint and undivided interest in and to all Jointly-Owned Program Technology.

(iii) Notwithstanding subsections (i) and (ii) above,

(A) Acuitas will solely own any Program Improvement Technology that is Sole Improvement Technology to any Acuitas Background Technology, regardless of the Party or Parties such Program Improvement Technology was discovered, created, conceived, developed or reduced to practice by or on behalf of, and CureVac, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), Approved Partners, consultants and agents, hereby assigns (and to the extent such assignment can only be made in the future hereby agrees to assign), all of its rights, title and interest in such Sole Improvement Technology to Acuitas.

(B) CureVac will solely own any Program Improvement Technology that is Sole Improvement Technology to any CureVac Background Technology, regardless of the Party or Parties such Program Improvement Technology was discovered, created, conceived, developed or reduced to practice by or on behalf of, and Acuitas, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), consultants and agents, hereby assigns (and to the extent such assignment can only be made in the future hereby agrees to assign), all of its rights, title and interest in such Sole Improvements Technology to CureVac.

(C) For clarity, nothing herein shall prevent (1) Acuitas from independently developing, owning and using outside of the Program any Know-How that is similar or related to any CureVac Technology, and (2) CureVac from independently developing, owning and using outside of the Program any Know-How that is similar or related to any Acuitas LNP Technology, provided that in each case such Know-How is not developed using or with reference to CureVac Technology or Acuitas LNP Technology, respectively, or any Confidential Information or Material of CureVac or Acuitas, respectively.

(d) [\*\*\*\*] **Improvements.** To the extent that a particular item of Program Technology constitutes [\*\*\*\*] Technology, the Parties shall discuss in good faith whether any such [\*\*\*\*] Technology can be divided and owned in accordance with subsection (iii) (A) and (B) above, made subject to separate Patent filings to be assigned accordingly; and to the extent no such division is possible and notwithstanding the rights and licensed with respect to Jointly Owned Technology, the owner or co-owner of such [\*\*\*\*] Technology shall [\*\*\*\*] i.e., the Acuitas LNP Technology in case of a [\*\*\*\*] Technology is [\*\*\*\*] and the CureVac Technology in case the [\*\*\*\*] Technology is [\*\*\*\*].

**6.3 Inventorship.** Inventorship determination for all Patents worldwide arising from any Program Know-How and thus the ownership thereof will be made in accordance with applicable laws. Each Party will ensure that each individual and each subcontractor conducting any activities under this Agreement on behalf of such Party will be under written obligation to assign to such Party all of its right, title and interest in and to the Program Technology.

**6.4 Prosecution and Maintenance.**

**(a) General.** Subject to the remainder of this Section 6.4 and to any License Agreement, Acuitas will have the sole right, but not the obligation to file, prosecute, and maintain (at its sole expense) Patents within the Acuitas LNP Technology other than: (i) Patents within Jointly-Owned Program Technology and (ii) Patents within Dual Improvement Technology (collectively "Joint Interest Patents"). Upon filing, Acuitas will provide CureVac with copies of all applications for all such Patents, and all other material submissions and correspondence with any patent authorities regarding such Patents, in sufficient time (not to be less than [\*\*\*\*] days) to allow for review and comment by CureVac. In addition, Acuitas will provide CureVac and its counsel with an opportunity to consult with Acuitas and its counsel regarding prosecution and maintenance of any such Patents, and shall, prior to filing, revise such documents to reflect CureVac's reasonable comments, provided that Acuitas will have the right to make the final determination in the event of any disagreement between the Parties related to any decision in connection with the filing, prosecution and maintenance of such Patents. Subject to any License Agreement, CureVac will have the first right, but not the obligation to file, prosecute and maintain the Joint Interest Patents, and the Parties will share equally all costs incurred by CureVac in connection with such efforts. CureVac shall (i) provide all information reasonably requested by Acuitas with respect to the Joint Interest Patents, (ii) promptly notify Acuitas in writing with respect to all significant developments regarding the Joint Interest Patents, (iii) promptly provide Acuitas with a copy of each material communication from any patent authority regarding such Patents, and (iv) provide Acuitas with drafts of each material filing (including without limitation draft patent applications and responses to office actions and similar filings) with respect to such Patents a reasonable amount of time (but at least [\*\*\*\*] days) in advance of the anticipated filing date and shall, prior to filing, revise such documents to reflect Acuitas' reasonable comments, provided that CureVac will have the right to make the final determination in the event of any disagreement between the Parties related to any decision in connection with the filing, prosecution and maintenance of the Joint Interest Patents. If CureVac intends to abandon any Joint Interest Patent, it shall notify Acuitas sufficiently in advance, and subject to any License Agreement Acuitas shall have the right to prosecute, maintain such Patent at its sole expense and all right, title and interest in the Patent will vest in Acuitas, provided that such Patent(s) will remain to be included in the Acuitas LNP Technology and licensed to CureVac under this Agreements and under any License Agreement for any Licensed Products.

(b) **Cooperation.** Each Party will reasonably cooperate with the other Party in the prosecution and maintenance of the Patents within the Acuitas LNP Technology and Joint Interest Patents. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants to execute all documents, as reasonable and appropriate so as to enable the prosecution and maintenance of any such Patents in any country.

**6.5 Patent Enforcement and Defense.**

(a) **Notice.** To the extent not in breach of an obligation of confidentiality, each Party will promptly notify, in writing, the other Party upon learning of any actual or suspected infringement of any Patents comprised in the Acuitas LNP Technology by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any Patents comprised in the Acuitas LNP Technology, and will, along with such notice, supply the other Party with any evidence in its possession pertaining thereto.

(b) **Enforcement.** As between the Parties and subject to any License Agreement, Acuitas will have the sole right, but not the obligation, to seek to abate any infringement of the Patents comprised in the Acuitas LNP Technology by a Third Party, or to file suit against any such Third Party for such infringement, other than Joint Interest Patents *provided* that Acuitas shall bear all the expense of such suit or abatement of infringement. As between the Parties and subject to any License Agreement, CureVac will have the first right, but not the obligation, to seek to abate any infringement of the Joint Interest Patents by a Third Party, or to file suit against any such Third Party for such infringement; *provided* that CureVac shall bear all the expense of such suit or abatement of infringement. If CureVac elects not to take action or to bring suit to prosecute such infringement or to continue such action or suit, it shall notify Acuitas of such election within [\*\*\*\*\*] days after becoming aware of or receipt of the notice of the infringement or after the election to stop any such action or suit. If after the expiration of the [\*\*\*\*\*] days period (or, if earlier, the date upon which CureVac provides written notice that it does not plan to bring such action) CureVac has neither obtained a discontinuance of infringement nor filed suit against any such Third Party infringer of such Joint Interest Patent, then, and subject to any License Agreement, Acuitas shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of the Joint Interest Patents, *provided* that Acuitas shall bear all the expenses of such suit.

(c) **Defense.** As between the Parties and subject to any License Agreement, Acuitas will have the sole right, but not the obligation, to defend against a declaratory judgment action or other action challenging any Patents comprised in the Acuitas LNP Technology, other than Joint Interest Patents; *provided* that Acuitas shall bear all the expense of such defense. As between the Parties and subject to any License Agreement, CureVac will have the first right, but not the obligation, to defend against a declaratory judgment action or other action challenging the Joint Interest Patents; *provided* that CureVac shall bear all the expense of such defense. If CureVac does not take steps to defend within a commercially reasonable time, or elects not to continue any such defense (in which case it will promptly provide notice thereof to CureVac), then, and subject to any License Agreement, Acuitas will have the right (but not the obligation) to defend any such Patent; *provided* that Acuitas shall bear all the expense of such defense. Notwithstanding the foregoing and subject to any License Agreement, any response to a Third Party infringer's counterclaim of invalidity or unenforceability of any Patent comprised in the Acuitas LNP Technology shall be controlled by the Party who controls the relevant enforcement proceeding pursuant to Section 6.5 (b) unless otherwise mutually agreed by the Parties.

**(d) *Withdrawal, Cooperation and Participation.*** With respect to any infringement or defensive action identified above in this Section 6.5 which may be controlled by either CureVac or Acuitas, and subject to any License Agreement:

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 6.5.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents and enforcing and defending them, incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

**(e) *Settlement.*** Neither Party will settle or consent to an adverse judgment in any action described in this Section 6.5 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any Patents comprised in the Acuitas LNP Technology involved therewith, without the prior written consent of the other Party (such consent not to be unreasonably withheld or delayed).

(f) *Damages.* Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Acuitas and described in Section 6.5 in each case will be used first to reimburse the controlling Party, then the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be divided [\*\*\*\*\*]% to the Party controlling the action and [\*\*\*\*\*]% to the other Party.

## ARTICLE 7

### Confidentiality.

7.1 **Confidential Information.** Each Party ("Disclosing Party") may disclose to the other Party ("Receiving Party"), and Receiving Party may acquire during the course and conduct of activities under the Agreement, certain proprietary or confidential information of Disclosing Party in connection with this Agreement. The term "Confidential Information" means all information of any kind, whether in written, oral, graphical, machine-readable or other form, whether or not marked as confidential or proprietary, that are disclosed or made available by or on behalf of the Disclosing Party to the Receiving Party in connection with this Agreement, including any of the foregoing of Third Parties; provided that Program Know-How will be considered the Confidential Information of the Party (or Parties) owning such Program Know-How, and Dual Improvement Technology will be considered Confidential Information of both Parties, even if only owned by one Party. Notwithstanding the foregoing, either Party may use and disclose Dual Improvement Technology or Jointly-Owned Technology in connection with such Party's permitted exploitation of such Technology, provided that the recipient is bound by confidentiality obligations corresponding to the obligations under this Agreement.

7.2 **Restrictions.** During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this Agreement or any License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors (subject to Section 3.4) and Approved Partners, consultants or agents who have a need to know such Confidential Information in order to perform its obligations and exercise its rights under this Agreement or any License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Section 7.2. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

7.3 **Exceptions.** Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no fault or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information.

7.4 **Permitted Disclosures.** Receiving Party may disclose Disclosing Party's Confidential Information to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

- (a) in order and to the extent required to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (b) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing Patents in connection with Receiving Party's rights and obligations pursuant to this Agreement or a License Agreement; and
- (c) to acquirers or permitted assignees; investment bankers, investors and lenders, including potential acquirers, assignees, investment bankers, and lenders;
- (d) in the case of CureVac, to Approved Partners, but in case the Approved Partner is only a potential licensee or assignee, only such information that is reasonably necessary or useful for the potential licensee or partner to evaluate the applicable Licensed Product, including design of experiments conducted under the Work Plan, data and results generated under the Work Plan, and LNP/Licensed Product manufacturing processes, but excluding the particular chemical structure and formulation of any LNPs (which excluded information may be disclosed to such potential licensee or partner upon Acuitas' prior written consent); provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party adequate time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsections (c) and (d), each of those entities are required to comply with the restrictions on use and disclosure in Section 7.2 (other than investment bankers, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

7.5 **Return of Confidential Information.** Upon expiry or earlier termination of the Agreement, upon written request of a Party (such request, if made, to be made within [\*\*\*\*] months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under a License Agreement, if any, or as set forth in this Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures.

7.6 **Publications.** Notwithstanding anything in this Agreement to the contrary, Acuitas shall be permitted to publish the results of the Program only with the prior written consent of CureVac. Acuitas shall submit any proposed publication of the results of the Program to CureVac. Following receipt of the proposed publication by CureVac, CureVac will use commercially reasonable efforts to provide written approval or disapproval, at CureVac's discretion, within [\*\*\*\*] days. Expedited reviews for abstracts or poster presentations, or for other publications that may relate to potential patent applications, may be arranged if mutually agreeable to the Parties. CureVac is permitted to publish the results of the Program provided, however, that it will not disclose Acuitas Confidential Information in any publication by CureVac of the results of the Program or any Licensed Product development by CureVac without Acuitas' prior written consent, which will not be unreasonably withheld, conditioned or delayed in the event such Acuitas Confidential Information is reasonably required to support the results of the Program so published.

7.7 **Terms of this Agreement; Publicity.** The Parties agree that the existence and terms of the Parties' relationship and this Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 7.4. Except as required by Law, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

## ARTICLE 8

### Warranties; Covenants; Limitations of Liability; Indemnification

8.1 **Representations and Warranties.** Each Party represents and warrants to the other as of the Effective Date that (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated, (b) it has the legal right and power to enter into this Agreement, to extend the rights and licenses granted or to be granted to the other in this Agreement, and to fully perform its obligations hereunder, (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this Agreement and the performance of its obligations hereunder and (d) this Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms.

8.2 **Additional Representations and Covenants of Acuitas.** Acuitas hereby represents and warrants to CureVac as of the Effective Date as follows:

(a) **Impairment.** Neither Acuitas nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that would in any way conflict with or impair the scope of any rights or licenses granted to CureVac hereunder or that would be granted to CureVac under any License Agreement, including under any of the agreements which Acuitas has identified to CureVac prior to the Effective Date. The foregoing shall not apply to Pre-existing Third Party Restrictions.

(b) **Patents.** Exhibit 1.1 sets forth a complete and accurate list of all Patents included in the Acuitas Background Technology, indicating the owner, licensor and/or co-owner(s), if applicable. Acuitas is and will remain entitled to grant to CureVac the licenses specified herein or under a License Agreement during the Term, to the Patents and the Know-How within the Acuitas Background Technology. To Acuitas' knowledge, the Patents listed on Exhibit 1.1 have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the Patents included in the Acuitas Background Technology listed on Exhibit 1.1 is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Acuitas' knowledge as of the Effective Date, no Acuitas Background Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the Effective Date, neither Acuitas nor any of its Affiliates has received any notice alleging that the Patents in the Acuitas Background Technology listed on Exhibit 1.1 are invalid or unenforceable, or challenging Acuitas' ownership of or right to use any such rights.

- (c) **Entire LNP Technology.** The Acuitas LNP Technology licensed to CureVac under this Agreement or any License Agreement comprises all LNP Technology Controlled by Acuitas.
- (d) **Encumbrances.** Acuitas and its Affiliates are not subject to any payment obligations to Third Parties as a result of the execution or performance of this Agreement. As of the Effective Date, neither Acuitas nor any of its Affiliates has granted any liens or security interests on the Acuitas Background Technology, and the Acuitas Background Technology is free and clear of any mortgage, pledge, claim, security interest, covenant, easement, encumbrance, lien or charge of any kind. Subject to Pre-Existing Third Party Restrictions, Acuitas is the sole owner of the entire right, title and interest in and to all Acuitas Background Technology.
- (e) **Defaults.** The execution, delivery and performance by Acuitas of this Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which Acuitas is a party or by which it is bound, including each of the agreements which Acuitas has identified to CureVac prior to the Effective Date, in each case as would reasonably be expected to have a material adverse effect on the rights granted to CureVac hereunder or under any License Agreement.
- (f) **Litigation.** There is no action, suit, proceeding or investigation pending or, to the knowledge of Acuitas, currently threatened in writing against or affecting Acuitas that questions the validity of this Agreement or the right of Acuitas to enter into this Agreement or consummate the transactions contemplated hereby or that relates to the Acuitas LNP Technology.
- (g) **Infringement.** Neither Acuitas nor any of its Affiliates has received any notice of any claim, nor does Acuitas or its Affiliates have any knowledge of any basis for any claim, that any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Acuitas LNP Technology in connection with the performance of the Work Plan or the use of Acuitas LNP Technology in connection with the production, use, research, development, manufacture or commercialization of any product as contemplated by a License Agreement.

(h) **Third Party Infringement.** To Acuitas' knowledge, no Third Party is infringing or has infringed any Patent within the Acuitas LNP Technology or is misappropriating or has misappropriated any Know-how within the Acuitas LNP Technology.

(i) **[\*\*\*\*\*] Patent Rights.** Acuitas will use commercially reasonable efforts to resolve at its cost and without any financial liability for CureVac [\*\*\*\*\*] with respect to any [\*\*\*\*\*] Patent Rights which would reasonably be infringed by the use of the Acuitas LNP Technology under this Agreement and/or the License Agreements, in order to enable CureVac to use such [\*\*\*\*\*] Patent Rights for purposes of this Development and Option Agreement and the License Agreements, if so required. In the event Acuitas is not able to resolve the potential dispute with respect to the [\*\*\*\*\*] Patent Rights with the result that the [\*\*\*\*\*] Patent Rights are Controlled by Acuitas, royalties payable by CureVac for a license under any [\*\*\*\*\*] Patent Rights which would reasonably be infringed by the use of the Acuitas LNP Technology will be treated as set forth in Section 4.3(d) of the License Agreement.

8.3 **Disclosure Letter under License Agreements.** Acuitas shall promptly inform CureVac in the event it receives information of any event or circumstance which it would need to disclose under Section 9.2 of any of the License Agreements.

8.4 **Disclaimers.** Without limiting the respective rights and obligations of the Parties expressly set forth herein, each Party specifically disclaims any guarantee that the Program will be successful, in whole or in part. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED IN THIS AGREEMENT, THE PARTIES MAKE NO REPRESENTATIONS AND EXTEND NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED.

8.5 **No Consequential Damages.** NOTWITHSTANDING ANYTHING IN THIS AGREEMENT OR OTHERWISE, NEITHER PARTY WILL BE LIABLE TO THE OTHER OR ANY THIRD PARTY WITH RESPECT TO ANY SUBJECT MATTER OF THIS AGREEMENT FOR ANY INDIRECT, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES; PROVIDED THAT THIS SECTION 8.5 WILL NOT APPLY TO BREACHES OF ARTICLES 6 OR 7 OR THE PARTIES' INDEMNIFICATION RIGHTS AND OBLIGATIONS UNDER ARTICLE 8.

8.6 **Performance by Others.** The Parties recognize that each Party may perform some or all of its obligations under this Agreement through Affiliates, Approved Partners and/or permitted subcontractors provided, however, that each Party will remain responsible and liable for the performance by its Affiliates, Approved Partners and/or permitted subcontractors and will cause its Affiliates and permitted subcontractors to comply with the provisions of this Agreement in connection therewith.

**8.7 Indemnification.**

(a) **Indemnification by Acuitas.** Acuitas will indemnify CureVac, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the CureVac Indemnitees to the extent arising from or occurring as a result of: (i) the breach by Acuitas of any provision of this Agreement; or (ii) any negligence or willful misconduct on the part of any Acuitas Indemnitee; or (iii) any alleged infringement or misappropriation of Patents or other intellectual property rights by CureVac in the conduct of the Work Plan based solely on CureVac's use of Acuitas LNP Technology as permitted hereunder in the performance of the Program (excluding, for clarity, infringement of Patents, Know-How or Materials covering CureVac Technology used by CureVac in the performance of the Work Plan), except in each case (i)-(iii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this Agreement.

(b) **Indemnification by CureVac.** CureVac will indemnify Acuitas, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "Acuitas Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against Acuitas Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any provision of this Agreement; or (ii) any negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) any alleged infringement or misappropriation of Patents or other intellectual property rights by Acuitas in the conduct of the Work Plan based solely on Acuitas' use of CureVac Technology as permitted hereunder in the performance of the Program (excluding, for clarity, infringement of Acuitas LNP Technology used by Acuitas in the performance of the Work Plan), except in each case (i)-(iii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of an Acuitas Indemnitee or Acuitas' breach of this Agreement.

(c) **Notice of Claim.** All indemnification claims provided for in subsections (a) and (b) above will be made solely by such Party to this Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under subsections (a) or (b) above but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

(d) **Defense, Settlement, Cooperation and Expenses.**

(i) Control of Defense. At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified

Party within [\*\*\*\*\*] days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such legal counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will immediately deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) Right to Participate in Defense. Without limiting subsection (i) above, any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to employ counsel of its choice for such purpose; provided, however, that such employment will be at the Indemnified Party's own cost and expense unless (A) the indemnifying Party has failed to assume the defense and employ counsel in accordance with subsection (i) above (in which case the Indemnified Party will control the defense) or (B) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any such reasonable costs and expenses of counsel for the Indemnified Party.

(iii) Settlement. With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business or Patents of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to consent to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with subsection (i) above, the indemnifying Party will have authority to consent to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (which consent will not be unreasonably withheld, conditioned or delayed). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party, such consent not to be unreasonably withheld.

(iv) Cooperation. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, the Indemnified Party will, and will cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.

(v) Costs and Expenses. Except as provided above in this Section 8.7, the costs and expenses, including reasonable attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

**8.8 Insurance.** Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program to protect against potential liabilities and risk arising out of activities to be performed under this Agreement and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this Agreement. The coverage limits set forth herein will not create any limitation on a Party's liability to the other under this Agreement.

## ARTICLE 9

### Term and Termination

**9.1 Term.** This Agreement will commence as of the Effective Date and, unless sooner terminated or extended in accordance with the terms hereof or by mutual written consent, will continue for a period of five (5) years (the "Term").

#### **9.2 Termination by CureVac.**

**(a) Breach, Change of Control.** CureVac will have the right to terminate this Agreement or the Program in full upon delivery of written notice to Acuitas in the event of (i) any material breach by Acuitas of any terms and conditions of this Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by CureVac to Acuitas specifying the nature of the alleged breach; or (ii) a Change of Control. In the event of a termination of the Program for Acuitas' material breach or a Change of Control, the JDC will be disbanded. Acuitas will receive no further Acuitas FTE funding (except for termination for Change of Control), and Acuitas will conduct a technology transfer and provide necessary licenses to CureVac or its Third Party designee each as reasonably necessary for CureVac or such Third Party designee to complete the conduct of the Program. For avoidance of doubt, termination of the Program will not terminate CureVac's reservation of Reserved Targets or the Options subject to the payments associated therewith.

**(b) Discretionary Termination.** CureVac will have the right to terminate this Agreement in full at any time without cause by giving [\*\*\*\*] prior written notice to Acuitas. Upon termination by CureVac pursuant to this subsection, CureVac will pay to Acuitas all remaining unpaid Target Reservation and Maintenance Fees, and any amounts payable to Acuitas for any Works and Services performed pursuant to the Work Plan up through the date of such termination.

**9.3 Termination by Acuitas.** Acuitas will have the right to terminate this Agreement in full upon delivery of written notice to CureVac in the event of any material breach by CureVac of any terms and conditions of this Agreement, provided that such breach has not been cured within [\*\*\*\*] days after written notice thereof is given by Acuitas to CureVac specifying the nature of the alleged breach. CureVac hereby agrees that Acuitas is entitled to receive payment of any amounts payable to Acuitas for any Works and Services performed pursuant to the Work Plan up through the date of such termination.

**9.4 Termination Upon Bankruptcy.**

All rights and licenses granted under or pursuant to this License Agreement by Acuitas are, and will otherwise be deemed to be, for purposes of Section 65.11(7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act, R.S.C. 1985, c. C-36 (the "Insolvency Legislation"), a grant of "right to use intellectual property" as used in the Insolvency Legislation. The Parties agree that CureVac and its Affiliates, as licensees of such rights under this Agreement, will retain and may fully exercise all of their rights and elections under the Insolvency Legislation subject to the payment of amounts provided for herein. Without limiting CureVac's rights under the Insolvency Legislation, if Acuitas becomes insolvent or makes an assignment for the benefit of its creditors or there is filed by or against the Acuitas any bankruptcy, receivership, reorganization or similar proceeding (an "Insolvency Event") pursuant to or under the Insolvency Legislation or otherwise, CureVac shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of Acuitas, shall be promptly delivered to it (i) before this License Agreement is rejected by or on behalf of Acuitas, within thirty (30) days after CureVac's written request, unless Acuitas, or its trustee or receiver, elects within thirty (30) days to continue to perform all of its obligations under this License Agreement, or (ii) after any rejection of this License Agreement by or on behalf of Acuitas, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 10.4(b) and under Section 65.11(7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act are in addition to and not in substitution of any and all other rights, powers, and remedies that each party may have under this License Agreement, the Insolvency Legislation, and any other applicable Laws. CureVac shall have the right to perform the obligations of Acuitas hereunder with respect to such intellectual property, but neither such provision nor such performance by CureVac shall release Acuitas from any such obligation or liability for failing to perform it.

**9.5 Effects of Termination.**

(a) A material breach of this Agreement by either Party may only constitute a material breach under one or several License Agreements [\*\*\*\*\*]. In the event of a dispute with respect to payment obligations, Acuitas is not considered to be [\*\*\*\*\*] for purposes of this Section 9.5(a) if CureVac makes payment of the disputed amount to a Third Party trustee selected by CureVac and reasonably acceptable to Acuitas. The Third Party trustee shall confirm to Acuitas that it holds such payment and will forward the monies to Acuitas or return the monies to CureVac once the dispute has been finally resolved and depending on the outcome of the resolved dispute.

(b) Upon termination by either Party under Sections 9.2, 9.3 or 9.4, (a) Acuitas will terminate all Works and Services in progress in an orderly manner as soon as practical and in accordance with a schedule agreed to by CureVac, (b) Acuitas will deliver to CureVac any Materials in its possession or control and all deliverables developed through termination or expiration, (c) unless such termination is by CureVac for Acuitas' material breach pursuant to Section 9.2(a), CureVac will pay Acuitas any monies due and owing Acuitas, up to the time of termination or expiration, for Works and Services actually performed and all authorized expenses actually incurred (as specified in the Work Plan) and (d) if such termination is of the entire Agreement (and not the Program only) by CureVac for Acuitas' material breach, Acuitas will refund to CureVac any Target Reservation and Maintenance Fees for the remainder of the Contract Year in which such termination is effective.

**9.6 Survival.** In addition to the termination consequences set forth in Section 9.5, the following provisions will survive termination or expiration of this Agreement, as well as any other provision which by its terms or by the context thereof, is intended to survive such termination: Sections 3.1 (f), 3.3, 8.4, 8.5, 8.7, 8.8, 9.4, 9.5, 9.6, 10.1, 10.4, 10.6, 10.7, 10.9, 10.10 and 10.11 and Articles 1, 6 and 7. Termination or expiration of this Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at Law or in equity with respect to any breach of this Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this Agreement.

**ARTICLE 10**

**Miscellaneous**

**10.1 Dispute Resolution.**

(a) **Dispute Escalation.** In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves or the Program directors. In the event that such dispute is not resolved on an informal basis within [\*\*\*\*\*] days, any Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive), who will attempt in good faith to resolve such dispute by negotiation and consultation for a [\*\*\*\*\*] day period following receipt of such written notice

(b) **Dispute Resolution.** In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be London, England. The number of mediators will be one (1). The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] days following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration. Any dispute relating to the validity performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 10.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be London, England. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

(c) **Injunctive Relief.** Notwithstanding the dispute resolution procedures set forth in this Section 10.1, in the event of an actual or threatened breach hereunder, the aggrieved Party may seek equitable relief (including restraining orders, specific performance or other injunctive relief) in any court or other forum, without first submitting to any dispute resolution procedures hereunder.

(d) **Tolling.** The Parties agree that all applicable statutes of limitation and time-based defenses (such as estoppel and laches) will be tolled while the dispute resolution procedures set forth in this Section 10.1 are pending, and the Parties will cooperate in taking all actions reasonably necessary to achieve such a result.

(e) **Prevailing Party.** The prevailing Party in any action, proceeding or suit related to this Agreement will be entitled to recover from the losing Party all reasonable out-of-pocket fees, costs and expenses (including those of attorneys, professionals and accountants and all those arising from appeals and investigations) incurred by the prevailing Party in connection with such arbitration or suit.

(f) **Cumulative Remedies.** All rights and remedies of the Parties hereunder will be cumulative and in addition to all other rights and remedies provided hereunder or available by agreement, at Law or otherwise. Each Party acknowledges and agrees that breach of Section 4.4 or Article 7 may cause irreparable harm and damage to the other and that such damage may not be ascertainable in money damages and that as a result thereof the non-breaching Party may be entitled to seek from a court equitable or injunctive relief restraining any breach or future violation of the terms contained herein by the breaching Party without the necessity of proving actual damages or posting bond. Such right to equitable relief is in addition to whatever remedies either Party may be entitled to as a matter of Law or equity, including money damages.

**10.2 Relationship of Parties.** Nothing in this Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied Third Party beneficiaries hereunder.

**10.3 Compliance with Law.** Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

**10.4 Governing Law.** This Agreement will be governed by and construed in accordance with the Laws of England and Wales, without respect to its conflict of Laws rules, provided that any dispute relating to the scope, validity, enforceability or infringement of any Patents or Know-How will be governed by, and construed and enforced in accordance with, the substantive Laws of the jurisdiction in which such Patents or Know-How apply.

**10.5 Counterparts; Facsimiles.** This Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this Agreement by either Party will constitute a legal, valid and binding execution and delivery of this Agreement by such Party

**10.6 Headings.** All headings in this Agreement are for convenience only and will not affect the meaning of any provision hereof.

**(a) Waiver of Rule of Construction.** Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this Agreement. Accordingly, the rule of construction that any ambiguity in this Agreement will be construed against the drafting party will not apply.

**(b) Interpretation.** Whenever any provision of this Agreement uses the term “including” (or “includes”), such term will be deemed to mean “including without limitation” (or “includes without limitations”). “Herein,” “hereby,” “hereunder,” “hereof” and other equivalent words refer to this Agreement as an entirety and not solely to the particular portion of this Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Exhibits in this Agreement are to Sections and Exhibits of this Agreement. References to any Sections include Sections and subsections that are part of the related Section.

**10.7 Further Assurances.** Each Party shall take all customary and reasonable actions and do all things reasonably necessary or proper, including under applicable law, to make effective and further the intents and purposes of the transactions contemplated by this Agreement, including executing any further instruments reasonably requested by the other Party.

**10.8 Binding Effect.** This Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

**10.9 Assignment.** This Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this Agreement, except as expressly permitted hereunder, without the prior written consent of the other Party, which consent will not be unreasonably withheld; provided that either Party may assign this Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this Agreement (whether by merger, consolidation or otherwise).

**10.10 Notices.** All notices, requests, demands and other communications required or permitted to be given pursuant to this Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid to the following addresses:

If to CureVac: CureVac AG  
Paul-Ehrlich-Str. 15  
72076 Tubingen  
Germany  
Attention: CEO and General Counsel

If to Acuitas: Acuitas Therapeutics Inc.  
2714 West 31st Avenue  
Vancouver, B.C.  
Canada V6L 2A1  
Attention: President and CEO

With a copy to: McCarthy Tetrault LLP  
Suite 2400 745 Thurlow Street  
Vancouver, B.C.  
Canada V6E 0C5  
Attention: Miranda Lam, Esq.

Either Party may change its designated address by notice to the other Party in the manner provided in this Section 10.10.

**10.11 Amendment and Waiver.** This Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

**10.12 Severability.** In the event that any provision of this Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the Agreement to preserve (to the extent possible) their original intent.

**10.13 Entire Agreement.** This Agreement together with any License Agreements (including all appendices and exhibits hereto and thereto) entered into during the Term and the Material Transfer Agreements are the sole agreements with respect to the subject matter and supersede all other agreements and understandings between the Parties with respect to same, provided, however, that the terms and conditions under this Agreement apply with respect to the activities which have been performed by the Parties under the Material Transfer Agreement but which are also set forth under the Work Plan, and to such extent this Agreement replaces the Material Transfer Agreements,

**10.14 Force Majeure.** Neither Acuitas nor CureVac will be liable for failure of or delay in performing obligations set forth in this Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Acuitas or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

[Signature page to follow]

IN WITNESS WHEREOF, the Parties have caused this Development and Option Agreement to be executed by their respective duly authorized officers as of the Effective Date.

**Exclusive License Agreement**

This License Agreement ("License Agreement"), dated as of [\_\_\_\_\_] (the "License Agreement Effective Date"), is made by and between Acuitas Therapeutics Inc., a British Columbia corporation ("Acuitas"), and CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tübingen, Germany ("CureVac"). Each of Acuitas and CureVac may be referred to herein as a "Party" or together as the "Parties."

**WHEREAS**, Acuitas has proprietary LNP Technology;

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below);

**WHEREAS**, Acuitas and CureVac are parties to that certain Development and Option Agreement (dated April 29, 2016) (the "Development and Option Agreement") pursuant to which CureVac has options to take licenses under the Acuitas LNP Technology (as defined below) with respect to CureVac's mRNA Constructs; and

**WHEREAS**, pursuant to the terms of the Development and Option Agreement, CureVac has exercised an option with respect to the Target (as defined below) and the Parties are now entering into a licensing arrangement whereby CureVac will have a license under the Acuitas LNP Technology to develop and commercialize Licensed Products (as defined below) based on such Target.

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

**1. Definitions.**

The following terms and their correlatives will have the following meanings:

1.1 "Acuitas LNP Technology" means any and all LNP Technology Controlled by Acuitas or any of its Affiliates as of the License Agreement Effective Date or at any time during the Term, including Acuitas' right and interest in any Technology created, conceived or reduced to practice under the Development and Option Agreement and/or the Technology Transfer Agreement and Acuitas' interest in any such Technology jointly owned by CureVac or its Affiliates and Acuitas or its Affiliates and necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. Unless otherwise set forth herein, Acuitas LNP Technology will include Joint Interest Patents. For the avoidance of doubt, the rights granted to Acuitas by [\*\*\*\*\*] shall not fall under this definition. The Acuitas LNP Technology existing as of the License Agreement Effective Date is listed in **Appendix 1.1** attached hereto.

1.2 "Acuitas Indemnitees" has the meaning set forth in Section 9.6(a).

1.3 “Affiliate” of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term “control” (including, with correlative meanings, the terms “controlled by” and “under common control with”) as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with power to direct the management and policies of such entity, provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. Regarding CureVac, Affiliate shall not include Mr. Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other entity controlled by Mr. Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG.

1.4 “cGMP” means current Good Manufacturing Practices as specified in the U.S. C.F.R., ICH Guideline Q7A, or equivalent Laws of an applicable Regulatory Authority at the time of manufacture.

1.5 “Calendar Quarter” means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31.

1.6 “Change of Control” with respect to Acuitas, shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the “beneficial owner”, directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Acuitas then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Acuitas representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Acuitas or has the power, directly or indirectly, to elect a majority of the members of the Acuitas’ board of directors, or similar governing body; or (ii) Acuitas enters into a merger, consolidation or similar transaction with another person or entity, or (iii) Acuitas sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Acuitas’ consolidated total assets to which this Agreement relates; or (iv) the holders of capital stock of Acuitas approve a plan or proposal for the liquidation or dissolution of Acuitas.”

1.7 “Combination Product” means a Licensed Product that includes at least one additional active ingredient other than a Licensed Product. Drug delivery vehicles, adjuvants, and excipients shall not be deemed to be “active ingredients”, except in the case where such delivery vehicle, adjuvant, or excipient is recognized as an active ingredient in accordance with 21 C.F.R. 210.3(b)(7) or equivalent Laws in other jurisdictions, provided however, should lipid nanoparticles comprised in a Licensed Product be characterized as “active ingredients” at any time during the Term, such lipid nanoparticles will not be considered an “active ingredient” for the purposes of this definition.

1.8 “Competitive Product” shall mean a product that [\*\*\*\*\*] as a Licensed Product.

1.9 “Indication” shall mean an individual disease or clinical condition with respect to which at least one adequate and well controlled study is required to support inclusion of such disease or condition in the indication statement of an FDA approved package insert for a Licensed Product.

- 1.10 "Confidential Information" has the meaning set forth in Section 8.1.
- 1.11 "Control" or "Controlled" means, with respect to any Know-How or Patent, the possession (whether by ownership or license, other than by a license or sublicense granted pursuant to this License Agreement or the Development and Option Agreement) by Acutias or its Affiliates of the ability to grant to CureVac a license or access to such Know-How or Patent as provided herein to such item, without violating the terms of any agreement or other arrangement with any Third Party and without owing any milestone, royalty or other monetary obligations to a Third Party.
- 1.12 "Covered Product" has the meaning set forth in Section 4.3.
- 1.13 "Covers", with reference to (a) a Patent, means that the manufacture, development or commercialization of a Licensed Product would infringe a Valid Claim of such Patent in the country in which such activity occurs; and (b) Know-How, means that the manufacture, development or commercialization of a Licensed Product incorporates or embodies such Know-How.
- 1.14 "CureVac Indemnitees" has the meaning set forth in Section 9.6(b).
- 1.15 "Late-Stage Development" means with respect to a product that [\*\*\*\*\*] Studies have been initiated.
- 1.16 "Development and Option Agreement" has the meaning set forth in the Preamble.
- 1.17 "Disclosing Party" has the meaning set forth in Section 8.1
- 1.18 "Field of Use" means all [\*\*\*\*\*].
- 1.19 "First Commercial Sale" means the first sale for use or consumption of any Licensed Product in a country after all required Regulatory Approvals for commercial sale of such Licensed Product have been obtained in such country.
- 1.20 "Indemnification Claim Notice" has the meaning set forth in Section 9.6(c).
- 1.21 "Indemnified Party" has the meaning set forth in Section 9.6(c).
- 1.22 "Joint Interest Patents" means the Patents listed in **Appendix 1.22** hereto, as amended from time to time.
- 1.23 "Know-How" means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form.

- 1.24 “Law” or “Laws” means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.
- 1.25 “License Agreement” has the meaning set forth in the Preamble.
- 1.26 “License Agreement Effective Date” has the meaning set forth in the Preamble.
- 1.27 “Licensed Product” means: (i) [\*\*\*\*\*] product comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended to express the Target and where such product is derived from, is based on, or utilizes any Acuitas LNP Technology; and/or (ii) [\*\*\*\*\*] Licensed Vaccine Product. If a given protein, e.g., an antibody comprises separated amino acid-chains, or a given Vaccine comprises multiple antigens or antibodies, which might be delivered as separated mRNA Constructs (combined in one LNP or delivered in separated LNPs), such product would be considered as one Licensed Product. For the avoidance of doubt, the term “Licensed Product” in respect of the Target encompasses all variants of such Target, including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been made (for example, mutated versions, derivatives or fragments) and species homologs and orthologs thereof, provided however that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses [\*\*\*\*\*] to such Target(s) (for example [\*\*\*\*\*]).
- 1.28 “Licensed Vaccine Product” means [\*\*\*\*\*] product that is comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended to express a [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets in any combination, if any, and where such product is a Vaccine and is derived from, is based on, or utilizes any Acuitas LNP Technology. Licensed Vaccine Products may consist of [\*\*\*\*\*] mRNA Constructs encoding for the [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets all of which, i.e., the [\*\*\*\*\*] Target with [\*\*\*\*\*] of the [\*\*\*\*\*] Targets, if any, are considered the Target (for avoidance of doubt, a Licensed Vaccine Product must contain the [\*\*\*\*\*] Target and optionally any or all of the [\*\*\*\*\*] Targets, if any). CureVac may remove or add further [\*\*\*\*\*] Targets to this License Agreement in accordance with Section 4.2 below.
- 1.29 “LNP Technology” means Technology that claims, embodies or incorporates delivery systems (and components thereof) based on or incorporating lipid nanoparticles (LNP).
- 1.30 “LNP Technology Patent(s)” means Patents comprised in the Acuitas LNP Technology, including any future Patent which will become part of the Acuitas LNP Technology during the Term and further including Acuitas’ rights in the Joint Interest Patents, unless otherwise set forth herein.
- 1.31 “Losses” has the meaning set forth in Section 9.6(a).
- 1.32 “Major Market Country/ics” means the [\*\*\*\*\*].
- 1.33 “Mammalian Target” means a Target that is encoded by and expressed by a mammal including a human. For clarity all Targets that are antibodies are “Mammalian Targets”.

1.34 “mRNA Construct” means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5’ UTR, the associated open reading frame, 3’UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct.

1.35 “mRNA Technology” means Technology that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.

1.36 “Milestones” means the milestones payable pursuant to Section 4.1.

1.37 “Milestone Event” has the meaning set forth in Section 4.1.

1.38 “Milestone Payment” has the meaning set forth in Section 4.1.

1.39 “Net Sales” means, with respect to any Licensed Product, the amount received by CureVac and its Affiliates and Sublicensees for *bona fide* sales of such Licensed Product to a Third Party (other than Affiliates and Sublicensees but including distributors for resale), less:

(a) discounts (including cash, quantity and patient program discounts), retroactive price reductions, commissions, charge-back payments and rebates granted to managed health care organizations or to federal, state and local governments, their agencies, and purchasers and reimbursers or to trade customers;

(b) credits or allowances actually granted upon claims, damaged goods, rejections or returns of, and for uncollectable amounts on, such Licensed Product, including such Licensed Product returned in connection with recalls or withdrawals;

(c) freight out, postage, shipping and insurance charges for delivery of such Licensed Product;

(d) taxes or duties levied on, absorbed or otherwise imposed on the sale of such Licensed Product, including value-added taxes, or other governmental charges otherwise imposed upon the billed amount, as adjusted for rebates and refunds;

(e) any invoiced amounts from a prior period which are not collected and are written off by CureVac or its Affiliates, including bad debts;

(f) wholesaler and distributor administration fees; and

(g) other customary deductions taken in the ordinary course of business in accordance with IFRS (International Financial Reporting Standards) principles.

Net Sales shall not include any payments among CureVac, its Affiliates and Sublicensees. Net Sales shall be determined in accordance with generally accepted accounting principles, consistently applied. Net Sales for any Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/(A+B)$ , where A is the weighted average price paid for the Licensed Product contained in such Combination Product sold separately in finished form in such country, and B is the weighted average invoice price paid for the other active ingredients contained in such Combination Product sold separately in finished form in such country, if such Licensed Product and such other active ingredients are each sold separately in such country’.

If such other active ingredients are not sold separately in such country, then Net Sales for such Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction A/C, where C is the weighted average invoice price paid for such Combination Product in such country. If such Licensed Product is not sold separately in finished form in such country, Net Sales for such Licensed Product will be determined by CureVac's good faith estimate of the relative contribution of such Licensed Product and each such other active ingredients in such Combination Product, and shall take into account in good faith any applicable allocations and calculations that may have been made for the same period in other countries.

1.40 "Non-Mammalian Target" means a Target that is encoded by and expressed by a non-mammalian organism.

1.41 "Patent(s)" means an (i) issued patent, a patent application, and a future patent issued from any' such patent application, (ii) a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (i), and (iii) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (i) or (ii), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder).

1.42 "Patent Costs" means the reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents and enforcing and defending them.

1.43 "Phase I Study" means a human clinical trial of a Licensed Product in any country, the primary purpose of which is the determination of safety and which may include the determination of pharmacokinetic and/or pharmacodynamic profiles in healthy individuals or a diseased patient population. A Phase 1 Study in a diseased patient population may include, in addition to primary determination of safety, dose exploration and a determination of preliminary efficacy of a product in the target patient population. For clarity, a particular human clinical trial of a Licensed Product will not be considered both a Phase 1 Study and a Phase 2 Study for the purposes of Milestone payments under Section 4.1.

1.44 "Phase 2 Study" means a human clinical trial of a Licensed Product in any country, and which is: (a) a human clinical trial (other than a Phase 1 Study) in which the primary purpose is dose exploration, dose response, duration of effect, kinetics or preliminary efficacy and safety of a product in the target patient population, or (b) a controlled dose-ranging clinical trial to evaluate further the efficacy and safety of such product in the target patient population and to define the optimal dosing regimen.

- 1.45 “Phase 3 Study” means a human clinical trial of a Licensed Product in any country, and which is: (a) a controlled study of a product in the target patient population of the efficacy and safety of such product which is prospectively designed to demonstrate statistically whether such product is effective and safe for use in a particular indication in a manner sufficient to obtain Regulatory Approval to market such product.
- 1.46 “[\*\*\*\*\*] Target” will mean the designated [\*\*\*\*\*] Target of a Licensed Vaccine Product. Each [\*\*\*\*\*] Target encoded for in the Licensed Vaccine Product will be termed an “[\*\*\*\*\*] Target”.
- 1.47 “Receiving Party” has the meaning set forth in Section 8.1
- 1.48 “Regulatory Approval” means, with respect to a country or extra-national territory, any and all approvals (including BLAs and MAAs), licenses, registrations or authorizations of any Regulatory Authority necessary in order to commercially distribute, sell or market a product in such country or some or all of such extra-national territory, including any pricing or reimbursement approvals.
- 1.49 “Regulatory Authority” means any national (e.g., the FDA), supra-national (e.g., the EMA), regional, state or local regulatory agency, department, bureau, commission, council or other governmental authority, in any jurisdiction in the world, involved in the granting of Regulatory Approval.
- 1.50 “Royalty Term” has the meaning set forth in Section 4.3(d).
- 1.51 “Solely Owned TP” has the meaning set forth in Article 5
- 1.52 “Sublicensee” means any Third Party that is granted a sublicense as permitted by Section 2.2, either directly by CureVac or its Affiliates or indirectly by any other Sublicensee hereunder.
- 1.53 “Target(s)” means the protein(s) as described in **Appendix 1.53 a or b** hereto, together with all variants of such protein(s), including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments) and species homologs, orthologs thereof, provided however that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses substantially similar biological activity to such protein(s) (for example antigenicity in case of antigens). If a given protein (e.g., an antibody) comprises separated amino acid chains which might be delivered by separated mRNA Constructs such protein is defined as one Target.
- 1.54 “Technology” means collectively Patents and Know-How.
- 1.55 “Technology Transfer Agreement” has the meaning set forth in Section 2.3
- 1.56 “[\*\*\*\*\*]” has the meaning set forth in Section 1.1.
- 1.57 “[\*\*\*\*\*] License” has the meaning set forth in Section 1.1.
- 1.58 “Term” has the meaning set forth in Section 10.1.

1.59 “Territory” means worldwide.

1.60 “Third Party” means any person or entity other than CureVac, Acuitas and their respective Affiliates.

1.61 “Third Party Claims” has the meaning set forth in Section 9.6(a).

1.62 “[\*\*\*\*\*] Patent Rights” means any and all Patents resulting from the research collaboration conducted between Acuitas and [\*\*\*\*\*] of the [\*\*\*\*\*] from about [\*\*\*\*\*] to the effective date of the Development and Option Agreement together with associated Know-How to the extent this Know-How is known to Acuitas and can be provided by Acuitas without breaching any confidentiality obligations of Acuitas. For avoidance of doubt, such results include those of the research summarized in [\*\*\*\*\*]

1.63 “Vaccine” means any product primarily intended (i) to elicit an adaptive immune response in the recipient against a specific disease-causing organism or malignancy as the result of presentation of antigen(s) associated with the disease-causing organism or malignancy; or (ii) to provide passive immune protection against a specific disease-causing organism.

1.64 “Valid Claim” means, with respect to a particular country, any claim of (i) an issued and unexpired Patent; or (ii) a pending Patent claim, comprised within the Acuitas LNP Technology in such country that (a) has not been revoked or held unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction from which no further appeal is possible (other than to the United States Supreme Court or to an equivalent court in the respective jurisdiction) and (b) has not been abandoned, disclaimed, denied or admitted to be invalid or unenforceable through reissue or disclaimer or otherwise in such country; and with respect to a pending Patent claim provided such Patent has been pending for less than five (5) years of the earliest priority date of filing of such pending Patent.

**2. License Grants; Technology Transfer.**

2.1 Licenses by Acuitas. Subject to the terms and conditions of this License Agreement, Acuitas hereby grants to CureVac an exclusive, non-transferrable license, with the right to sublicense only as permitted by Section 2.3(b), under the Acuitas LNP Technology, to develop, have developed, make, have made, use and have used, sell, offer for sale, have sold and import and have imported Licensed Products in the Field of Use in the Territory. For the avoidance of doubt, in case of a Target for Licensed Vaccine Products, the exclusivity of the license applies with respect to the [\*\*\*\*\*] Target, and will cover (i) [\*\*\*\*\*] of the [\*\*\*\*\*] Target with or without, and with one or several [\*\*\*\*\*] Targets; and (ii) the use of the [\*\*\*\*\*] Target (but not any of the [\*\*\*\*\*] Targets) for any Licensed Product including but not limited to Vaccines.

2.2 Option for additional Technology licenses. For the event that, in their reasonable judgment CureVac, its Affiliates or sublicensees considers it necessary to [\*\*\*\*\*] above in order to develop, have developed, make, have made, use and have used (including for research and development), sell, offer for sale, have sold, import and have imported a Licensed Product incorporating Acuitas LNP Technology in the Field of Use in the Territory, Acuitas hereby grants to CureVac the option to acquire one or more sublicensees under any such in-licensed Technology, to the extent Acuitas has the right to grant such sublicensees. Such sublicense will be granted at the terms and conditions of Acuitas' main Third Party license agreement on the effective date of the sublicense agreement, and where such terms and conditions are equivalent to the terms and conditions that would be applicable to Acuitas if Acuitas were developing, making and/or selling the product under the Third Party license. The scope of each such option for a sublicense is equivalent to the scope of the license granted to CureVac under Section 2.1 above, in each case being in respect of such additional Third Party LNP Technology. CureVac is entitled to exercise such an option at any time during the Term, and upon written notice of CureVac that it exercises the option, the Parties shall finalize in good faith the terms and conditions of such sublicense agreement according to the terms and conditions of Acuitas' main Third Party license agreement.

2.3 Sublicensing Rights.

- (a) *Transfer.* The license granted in Section 2.1 is transferable only upon a permitted assignment of this License Agreement in accordance with Section 11.11.
- (b) *CureVac Sublicenses.* The licenses granted in Section 2.1 may be sublicensed (with the right to sublicense through multiple tiers), in full or in part, by CureVac, its Affiliates or Sublicensees to CureVac's Affiliates and Third Parties provided, that for any sublicense to Third Parties:
- (i) Each sublicense will be in writing and on terms consistent with and subject to the terms of this License Agreement,
  - (ii) CureVac will provide Acuitas with a copy of any sublicense agreement with a Sublicensee within [\*\*\*\*\*] days of execution thereof, which sublicense agreement may be redacted as necessary to protect commercially sensitive information and shall be treated as CureVac Confidential Information hereunder;
  - (iii) CureVac will be responsible for any and all obligations of such Sublicensee as if such Sublicensee were CureVac hereunder; and
  - (iv) Any sublicense granted by CureVac to any rights licensed to it hereunder shall terminate immediately upon the termination of the license from Acuitas to CureVac and its Affiliates with respect to such rights, provided that such sublicensed rights shall not terminate if, as of the effective date of such termination pursuant to Sections 10.2, 10.3(a) or 10.4, a Sublicensee is not in material default of its obligations under its sublicense agreement, and within [\*\*\*\*\*] days of such termination and a written notice by Acuitas and disclosure of this License Agreement to the Sublicensee, the Sublicensee agrees in writing to be bound directly to Acuitas under a license agreement substantially similar to this License Agreement with respect to the rights sublicensed hereunder, substituting such Sublicensee for CureVac.
- (c) *Subcontractors.* For clarity purposes, CureVac is entitled to engage contract research organizations and contract manufacturing organizations for the development and manufacture of Licensed Products on behalf of CureVac. To the extent such contract organizations require a license to perform such subcontracted activities under applicable Laws, CureVac is entitled to grant a limited license without an obligation to meet the conditions of Section 2.3 (b)(ii) and (iv).

2.4 **Technology Transfer.** After the License Agreement Effective Date and promptly upon written request by CureVac, Acuitas will conduct a full transfer of Acuitas LNP Technology to CureVac and/or its designee(s) (which designee(s) may be an Affiliate or Third Party manufacturers, and which Third Party manufacturers may also be a backup manufacturer or a second manufacturer of Licensed Products) as required for the applicable transferee of the then-current process. The technology transfer activities, the rights and obligations of the Parties, the reimbursement of Acuitas for the technology transfer activities, and the rights and licenses to any Technology generated in the course of the technology transfer are set forth in the Technology Transfer Agreement ("Technology Transfer Agreement") in **Appendix 2.4** hereto, *provided, however*, that such Technology Transfer Agreement and its Appendices may be amended to reflect any developments and any specific requirements with respect to the then current process on the effective date of the Technology Transfer Agreement which become known to the Parties only after the effective date of the Development and Option Agreement.

2.5 **Updates to Appendix 1.1.** Acuitas shall notify CureVac at least once every [\*\*\*\*] months of Patents that are added to the Acuitas LNP Technology following the License Agreement Effective Date or any Patents that have been abandoned or discontinued in accordance with the terms of this License Agreement. Appendix 1.1 shall be automatically updated to include any such added Patents provided that, with written notice to Acuitas, CureVac may elect to exclude any particular Patents from the Acuitas LNP Technology. Following any such notice by CureVac, the Acuitas Patents that CureVac identifies for exclusion from this License Agreement will no longer be licensed to CureVac hereunder, and CureVac shall not have any obligations hereunder with respect to such Patent.

2.6 **Documents and Declarations.** Acuitas shall execute all documents, give all declarations regarding the licenses granted hereunder and reasonably cooperate with CureVac to the extent such documents, declarations and/or cooperation are required for the recording or registration of the licenses granted hereunder at the various patent offices in the Territory for the benefit of CureVac, its Affiliates or their Sublicensees.

3. **License Limitations.** No licenses or other rights are granted by Acuitas hereunder to use any trademark, trade name, trade dress or service mark owned or otherwise Controlled by Acuitas or any of its Affiliates. All licenses and other rights are or shall be granted only as expressly provided in this License Agreement, and no other licenses or other rights is or shall be created or granted by either Party hereunder by implication, estoppel or otherwise.

4. **Payments and Royalties.**

4.1 **Milestone Payments.** CureVac will make milestone payments (each, a "**Milestone Payment**") to Acuitas upon the first occurrence of each of the milestone events (each, a "**Milestone Event**") by Licensed Product as set forth below in this Section 4.1. CureVac will notify Acuitas of the achievement of each Milestone Event within [\*\*\*\*] business days of such achievement. Each Milestone Payment will be payable to Acuitas by CureVac within [\*\*\*\*] days of the achievement of the specified Milestone Event and receipt of a respective invoice from Acuitas, and such payments when owed or paid will be non-refundable and non-creditable. If one or more of the Milestone Events set forth below are not achieved or not required for any reason, the payment for such skipped Milestone Event will be due [\*\*\*\*]. The maximum total of all Milestone Payments for all Licensed Products payable under this License Agreement is [\*\*\*\*].

<i>Milestone Event</i>	<i>Milestone Payment</i>
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

\*[\*\*\*\*\*] payments are payable for the [\*\*\*\*\*] for the [\*\*\*\*\*] For the avoidance of doubt, only license agreements concluded on the basis of the Development and Option Agreement will count towards the number of Active Agreements for the applicable [\*\*\*\*\*] payments. Provided a Licensed Product under this License Agreement is the first product comprised of Lipid Nanoparticles (LNP) containing one or more mRNA Constructs intended to express a protein that is a licensed product under this or any other exclusive license agreement entered into between the Parties on the basis of the Development and Option Agreement to reach a Phase 1, Phase 2 or Phase 3 milestone, the first three clinical Milestone Payments (i.e., [\*\*\*\*\*]) If a Licensed Product under this License Agreement is not the first product under any exclusive license agreement entered into between the Parties on the basis of the Development and Option Agreement, but the first (and any subsequent) exclusive license agreement is terminated and the Licensed Product under this License Agreement therefore becomes the "first product" (i.e., no other exclusive license agreement under the Development and Option Agreement takes such place), [\*\*\*\*\*] in clinical development milestones will be applied to the Licensed Product under this License Agreement for any clinical milestones not achieved under the first or any subsequent exclusive license agreements.

4.2 License Maintenance Fee for [\*\*\*\*\*] Targets.

(a) *Excess [\*\*\*\*\*] Targets.* Upon the first dosing of the first patient in the first Phase 3 Study for the first Licensed Vaccine Product under this License Agreement anywhere in the Territory, CureVac will notify Acuitas in writing of the identity of any [\*\*\*\*\*] Target(s) not included in such Licensed Product (“[\*\*\*\*\*] Target(s)”). At CureVac’s election, to be made in such notice, and on an [\*\*\*\*\*] Target-by-[\*\*\*\*\*] Target basis, (i) this License Agreement will be amended to remove reference to the [\*\*\*\*\*] Target and all rights to such [\*\*\*\*\*] Target will revert back to Acuitas; or (ii) CureVac will retain its rights under this License Agreement to such [\*\*\*\*\*] Target and will pay to Acuitas a license maintenance fee for such retained [\*\*\*\*\*] Target of [\*\*\*\*\*] per year if the [\*\*\*\*\*] Target is a Non-Mammalian Target and [\*\*\*\*\*] per year if the [\*\*\*\*\*] Target is a Mammalian Target and for as long as the [\*\*\*\*\*] Target is not part of any other Licensed Vaccine Product developed under this License Agreement. Thereafter, CureVac is entitled to remove any retained [\*\*\*\*\*] Target from this License Agreement upon prior written notice to Acuitas and upon receipt of such notice the obligation to pay license maintenance fees for such removed [\*\*\*\*\*] Target terminates.

(b) *Inclusion of Further [\*\*\*\*\*] Targets.* In the event CureVac desires to include [\*\*\*\*\*] Targets for which [\*\*\*\*\*] was exercised under the Development and Option Agreement or to reintroduce a removed [\*\*\*\*\*] Target into the License Agreement, CureVac will notify the Escrow Agent of the identify and other information describing each protein as set forth in Appendix 1.53(b) that it desires to be an [\*\*\*\*\*] Target. If such protein is available, the Escrow Agent will notify CureVac, such protein will become an [\*\*\*\*\*] Target and CureVac will make the payment for such [\*\*\*\*\*] Target(s) as though such [\*\*\*\*\*] Target had been reserved at the time the [\*\*\*\*\*] Target was reserved and the option to exercise the License Agreement including the [\*\*\*\*\*] Target had then included such [\*\*\*\*\*] Target. For avoidance of doubt, the number of [\*\*\*\*\*] Targets for purposes of calculating the option payment will not be reduced for [\*\*\*\*\*] Targets that have been removed from the Licensed Agreement, if any. This License Agreement will then be amended to include reference to such further [\*\*\*\*\*] Target(s).

4.3 Royalties.

(a) *Royalty.* Subject to the remainder of this Section 4.3, on a country-by-country basis and a Covered Product-by-Covered Product basis, “**Covered Product**” being a Licensed Product which is Covered by one or more Valid Claims, CureVac will pay to Acuitas a royalty of [\*\*\*\*\*] of Net Sales of the Covered Product whether [\*\*\*\*\*]. On a country by country basis, in the event a Licensed Product is not a Covered Product in such country, CureVac will pay to Acuitas a royalty on Net Sales equal to the Minimum Royalty set forth in subsection (c) below.

(b) *Third Party Royalty Payments.* If CureVac or its Affiliate or Sublicensee, in its reasonable judgment, considers it necessary or useful to obtain a license from any Third Party under any LNP Technology that Covers a Licensed Product in order to develop, manufacture or commercialize such Licensed Product the amount of CureVac’s royalty obligations under Sections 4.3(a) will be reduced by [\*\*\*\*\*]%) of the amount of the royalty payments made to such Third Party (“Third Party Royalty Payments”), *provided, however*, that such reduction shall not result in less than the Minimum Royalty due to Acuitas under Section (c) below. For avoidance of doubt, Third Party Royalty Payments will include payments by CureVac in connection with Acuitas sublicenses under Section 2.2.

(c) *Minimum Royalty.* Except as set forth in subsection (d) below, in no event will the Royalty payable by CureVac to Acuitas for any Licensed Product (whether or not a Covered Product) be less than the following according to which [\*\*\*\*\*] such Licensed Product corresponds to:

- (i) [\*\*\*\*\*]
- (ii) [\*\*\*\*\*]
- (iii) [\*\*\*\*\*]

(d) *Third Party Royalty Reduction/Minimum Royalty applicable in the event of CureVac having rights under the [\*\*\*\*\*] Patent Rights* If CureVac or its Affiliates or Sublicensees, in their reasonable judgment, consider it necessary or useful to obtain [\*\*\*\*\*] Patent Rights in order to develop, manufacture and/or commercialize a Licensed Product and CureVac does not obtain such rights from Acuitas under the Acuitas LNP Technology at no additional cost, then the amount of CureVac's royalty obligations under Sections 4.3(a) will be [\*\*\*\*\*] made by CureVac, its Affiliates or Sublicensees to Acuitas or any Third Party for such rights, provided that the Minimum Royalty payable to Acuitas in accordance with Section 4.3 (c) will not be less than as shown below and according to which [\*\*\*\*\*] such Licensed Product falls into. Provided however that CureVac or its Affiliates or Sublicensees cannot elect to take [\*\*\*\*\*] Patent Rights from a Third Party if such [\*\*\*\*\*] Patent Rights are included in rights from Acuitas under the Acuitas LNP Technology and provided to CureVac its Affiliates or Sublicensees at no additional cost. For greater clarity the minimum royalties owing to Acuitas as shown below are in respect of both royalty reductions arising under Section 4.3 (b) and/or arising under this Section 4.3(d):

- (i) [\*\*\*\*\*]
- (ii) [\*\*\*\*\*]
- (iii) [\*\*\*\*\*]

In the event that [\*\*\*\*\*] Patent Rights are included in the Acuitas LNP Technology (i.e., are at no additional cost to CureVac) and Cover a Licensed Product then the Minimum Royalty payable to Acuitas in accordance with Section 4.3 (c) will not be less than the following according to which [\*\*\*\*\*] such Licensed Product corresponds to:

- (i) [\*\*\*\*\*]
- (ii) [\*\*\*\*\*]
- (iii) [\*\*\*\*\*]

(e) *Term.* The royalty term ("Royalty Term") shall expire on a country-by-country and Licensed Product-by-Licensed Product basis, on the last to occur of (i) expiration of the last to expire Valid Claim in the Acuitas LNP Technology that, but for the license described herein from Acuitas to CureVac for the applicable Licensed Product, is infringed by the making, using or sale of such Licensed Product, (ii) expiration of any period of data exclusivity, market exclusivity or supplemental protection certificates covering the Licensed Product in such country; and (iii) ten (10) years after First Commercial Sale of Licensed Product in such country. For the avoidance of doubt, upon exhaustion of the obligation to pay Royalties to Acuitas as set forth above the continued use of Acuitas Know-How comprised in the LNP Technology for the development, manufacture and/or sale of the Licensed Product shall not, in and of itself, obligate CureVac to pay further royalties to Acuitas. Thereafter, CureVac's license under Section 2.1 will become irrevocable, fully paid-up and royalty-free on a country-by-country and Licensed Product-by-Licensed Product basis.

(f) *Blended Royalty.* The Parties acknowledge and agree that the Acuitas LNP Technology licensed under this License Agreement may justify royalty rates and/or Royalty Terms of differing amounts for the sale of Licensed Products in the Territory, depending on the number of LNP Technology Patents and their respective expiry. The Parties have determined in light of such considerations and for reasons of mutual convenience that blended royalty rates for the Acuitas LNP Technology licensed hereunder will apply during a single Royalty Term for sales of a Licensed Product in the Territory. Consequently, the Parties have agreed to adopt the royalty rates set forth in this Section 4.3 with respect to the sales of Licensed Products in the Territory as blended royalty rates.

#### 4.4 Payment Terms.

(a) *Manner of Payment.* All payments to be made by CureVac hereunder will be made in U.S. dollars by wire transfer to such bank account as Acuitas may designate.

(b) *Records and Audits.* CureVac shall keep, and shall cause each of its Affiliates and Sublicensees, as applicable, to keep adequate books and records of accounting for the purpose of calculating all royalties payable to Acuitas hereunder. For the [\*\*\*\*\*] years next following the end of the calendar year to which each shall pertain, such books and records of accounting (including those of CureVac's Affiliates) shall be kept at each of their principal places of business and shall be open for inspection at reasonable times and upon reasonable notice by an independent certified accountant selected by Acuitas, and which is reasonably acceptable to CureVac, for the sole purpose of inspecting the royalties due to Acuitas under this License Agreement. In no event shall such inspections be conducted hereunder more frequently than once every [\*\*\*\*\*] months. Such accountant must have executed and delivered to CureVac and its Affiliates, a confidentiality agreement as reasonably requested by CureVac, which shall include provisions limiting such accountant's disclosure to Acuitas to only the results and basis for such results of such inspection. The results of such inspection, if any, shall be binding on both Parties. Any underpayments shall be paid by CureVac within [\*\*\*\*\*] days of notification of the results of such inspection. Any overpayments shall be fully creditable against amounts payable in subsequent payment periods. Acuitas shall pay for such inspections, except that in the event there is any upward adjustment in aggregate royalties payable for any calendar year shown by such inspection of more than [\*\*\*\*\*]% of the amount paid, CureVac shall reimburse Acuitas for any reasonable out-of-pocket costs of such accountant.

(c) *Reports and Royalty Payments.* For as long as royalties are due under Section 4.3, CureVac shall furnish to Acuitas a written report for each Calendar Quarter, showing the amount of Net Sales of Licensed Products and royalty due for such Calendar Quarter. Reports shall be provided within [\*\*\*\*\*] days of the end of the Calendar Quarter for Net Sales generated by CureVac and its Affiliates, and within [\*\*\*\*\*] days of the end of the Calendar Quarter for Net Sales generated by Sublicensees. Royalty payments for each Calendar Quarter shall be due at the same time as the last such written report for the Calendar Quarter. The report shall include, at a minimum, the following information for the applicable Calendar Quarter, each listed by Licensed Product and by country of sale: (i) the number of units of Licensed Products sold by CureVac and its Affiliates and Sublicensees on which royalties are owed to Acuitas hereunder; (ii) the gross amount received for such sales; (iii) Net Sales; (iv) the amounts of any credits or reductions permitted by Section 4.3; and (v) the computations for any Acuitas currency conversions pursuant to subsection (d) below. CureVac will require each Sublicensee to share with Acuitas the information listed in the foregoing clauses as it relates to Net Sales made by such Sublicensee, and to the extent practicable, will include such Sublicensee information in such report. All such reports shall be treated as Confidential Information of CureVac. In the event of a Change of Control by an acquirer that is commercializing a Competitive Product, reports shall be limited to (iii) and (v) above.

(d) *Currency Exchange.* With respect to Net Sales invoiced in U.S. dollars, the Net Sales and the amounts due to Acuitas hereunder will be expressed in U.S. dollars. With respect to Net Sales invoiced in a currency other than U.S. dollars, payments will be calculated based on standard methodologies employed by CureVac or its Affiliates or Sublicensees for consolidation purposes for the Calendar Quarter for which remittance is made for royalties.

(e) *Taxes.* CureVac may withhold from payments due to Acuitas amounts for payment of any withholding tax that is required by Law to be paid to any taxing authority with respect to such payments. CureVac will provide Acuitas all relevant documents and correspondence, and will also provide to Acuitas any other cooperation or assistance on a reasonable basis as may be necessary to enable Acuitas to claim exemption from such withholding taxes and to receive a refund of such withholding tax or claim a foreign tax credit. CureVac will give proper evidence from time to time as to the payment of any such tax. The Parties will cooperate with each other in seeking deductions under any double taxation or other similar treaty or agreement from time to time in force. Such cooperation may include CureVac making payments from a single source in the U.S., where possible. Apart from any such permitted withholding and those deductions expressly included in the definition of Net Sales, the amounts payable by CureVac to Acuitas hereunder will not be reduced on account of any taxes, charges, duties or other levies.

(f) *Blocked Payments.* In the event that, by reason of applicable law in any country, it becomes impossible or illegal for CureVac or its Affiliates or Sublicensees to transfer, or have transferred on its behalf, payments owed to Acuitas hereunder, CureVac will promptly notify Acuitas of the conditions preventing such transfer and such payments will be deposited in local currency in the relevant country to the credit of Acuitas in a recognized banking institution designated by Acuitas or, if none is designated by Acuitas within a period of [\*\*\*\*\*] days, in a recognized banking institution selected by CureVac or its Affiliate or Sublicensee, as the case may be, and identified in a written notice given to Acuitas.

(g) *Interest Due.* If any payment due to Acuitas under this License Agreement is overdue (and is not subject to a good faith dispute), then CureVac will pay interest thereon (before and after any judgment) at an annual rate of the lesser of [\*\*\*\*\*]% above the prime rate as reported in The Wall Street Journal, Eastern Edition, and the maximum rate permitted by applicable Law, such interest to run from the date upon which payment of such sum became due until payment thereof in full together with such interest.

(h) *Mutual Convenience of the Parties.* The royalty and other payment obligations set forth hereunder have been agreed to by the Parties for the purpose of reflecting and advancing their mutual convenience, including the ease of calculating and paying royalties and other amounts to Acuitas.

5. **Ownership and Inventorship of IP.**

Solely-Owned IP. As between the Parties, each Party will own and retain all right, title and interest in and to any and all Know-How and Patents arising therefrom that are discovered, created, conceived, developed or reduced to practice solely by or on behalf of such Party under or in connection with this License Agreement ("Solely Owned IP"). Subject to the licenses hereunder and the other terms and conditions of this License Agreement or any other agreement between the Parties, each Party will be solely responsible for the prosecution and maintenance, and the enforcement and defense, of any Patents within its Solely Owned IP.

6. **Patent Prosecution and Maintenance.**

6.1 Generally. As between the Parties and subject to Section 6.2 below, Acuitas (or its Third Party licensor, if any) will have the sole right, at its sole costs, to prosecute and maintain LNP Technology Patents, other than the Joint Interest Patents. Upon filing, Acuitas will provide CureVac with copies of all applications for all such LNP Technology Patents, and all other material submissions and correspondence with any patent authorities regarding such LNP Technology Patents, in sufficient time (not to be less than [\*\*\*\*] days) to allow for review and comment by CureVac. In addition, Acuitas will provide CureVac and its counsel with an opportunity to consult with Acuitas and its counsel regarding prosecution and maintenance of any such LNP Technology Patents, and Acuitas will not unreasonably refuse to address all reasonable comments timely made by or on behalf of CureVac. As between the Parties, CureVac will have the first right to prosecute and maintain any and all Joint Interest Patents and the Parties will share equally all costs incurred by CureVac in connection with such efforts. Upon filing, CureVac will provide Acuitas with copies of all applications for such Joint Interest Patents, and all other material submissions and correspondence with any patent authorities regarding such Joint Interest Patents, in sufficient time (not to be less than [\*\*\*\*] days) to allow for review and comment by Acuitas. In addition, CureVac will provide Acuitas and its counsel with an opportunity to consult with CureVac and its counsel regarding prosecution and maintenance of any such Joint Interest Patents, and CureVac will consider in good faith all reasonable comments timely made by or on behalf of Acuitas.

6.2 Election Not to Prosecute or Maintain or Pay Patent Costs.

(a) *By Acuitas.* If Acuitas elects not (i) to file, prosecute or maintain any LNP Technology Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay the Patent Costs associated with prosecution or maintenance of any such LNP Technology Patents then in each such case Acuitas will so notify CureVac, promptly in writing and in good time to enable Acuitas to meet any deadlines by which an action must be taken to preserve such LNP Technology Patent in such country, if CureVac so requests. Upon receipt of each such notice by Acuitas, CureVac will have the right, but not the obligation, to notify Acuitas in writing on a timely basis that Acuitas should continue the prosecution and/or maintenance of such LNP Technology Patent in the respective country, and thereafter, Acuitas would prosecute and maintain such LNP Technology Patent in such country at the sole direction of CureVac, Acuitas would make available to CureVac all documentation and correspondence with respect to such LNP Technology Patent, and CureVac would compensate the reasonable Patent Costs incurred by Acuitas in connection with such efforts, i.e., Patent Costs which Acuitas would not have had incurred if it had elected not to file, prosecute or maintain the respective LNP Technology Patent. CureVac's license to such LNP Technology Patent hereunder under Section 2.1 will be, irrevocable and royalty free, and such LNP Technology Patent will thereafter no longer be part of the Acuitas LNP Technology for purposes of this License Agreement. CureVac is entitled to discontinue the payment of Patent Costs for any LNP Technology Patents at any time, provided that it will so notify Acuitas in writing in time for such discontinuance.

(b) *By CureVac.* If CureVac elects not (i) to file, prosecute or maintain any Joint Interest Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents then in each such case CureVac will so notify Acuitas, promptly in writing and in good time to enable CureVac to meet any deadlines by which an action must be taken to preserve such Joint Interest Patent in such country at Acuitas' expense, if Acuitas so requests. Upon receipt of each such notice by CureVac, Acuitas will have the right, but not the obligation, to notify CureVac in writing on a timely basis that CureVac should transfer the prosecution or maintenance of such Joint Interest Patent to Acuitas and at Acuitas' sole expense and such LNP Technology Patent will thereafter no longer be part of the Acuitas LNP Technology for purposes of this License Agreement. Acuitas is entitled to discontinue the payment of Patent Costs for any Joint Interest Patents at any time, provided that it will so notify CureVac in writing in time for such discontinuance.

6.3 Patent Extensions. If any election for LNP Technology Patent term restoration or extension, supplemental protection certificate or any of their equivalents is to be made with respect to any LNP Technology Patent, then the Parties will discuss and seek to reach mutual agreement whether or not to take such action, provided that if the Parties are not able to reach mutual agreement within [\*\*\*\*\*] days, then CureVac will have the sole right to make the final decision whether or not to seek such patent term restoration or extension, supplemental protection certificate or any of their equivalents with respect to: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of conclusion of such discussions, [\*\*\*\*\*] and provided further that the exercise of such right by CureVac will not increase or otherwise change the rights or obligations of the Parties hereunder. Acuitas will have the sole right to make the final decision whether or not to seek Patent term restoration or extension, supplemental protection certificate or any equivalents for any product but the Licensed Products with respect to all other Patents within the Acuitas LNP Technology. Without the prior written consent of CureVac, Acuitas shall not apply for any term restoration or extension, supplemental protection certificate or any of their equivalents for any Licensed Product.

6.4 Regulatory Exclusivity Periods. With respect to any Patent listings required for any regulatory exclusivity periods for Licensed Products the Parties will discuss and seek to reach mutual agreement, subject to Applicable Law, on which LNP Technology Patents to list, provided that if the Parties are not able to agree within [\*\*\*\*\*] days, CureVac will have the right to make the final decision with respect to: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of conclusion of such discussions, [\*\*\*\*\*] and provided further that the exercise of such right by CureVac will not increase or otherwise change the rights or obligations of the Parties hereunder. Except where required under Applicable Law, without the written consent of CureVac, Acuitas will not apply for, and is not authorized under this Agreement to apply for, any Patent listings required for any regulatory exclusivity periods for any Licensed Product. For the avoidance of doubt, Acuitas is not restricted from applying for any Patent listings required for any regulatory exclusivity periods for any product but the Licensed Products.

6.5 Cooperation. Each Party will reasonably cooperate with the other Party in those activities involving the LNP Technology Patents set forth in Sections 6.1 to 6.4. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants and agents of CureVac and Acuitas and their respective Affiliates and Sublicensees to execute all documents, as reasonable and appropriate so as to enable such activities in respect of any such LNP Technology Patents in any country.

7. Patent Enforcement and Defense.

7.1 Notice. To the extent not in breach of an obligation of confidentiality, each Party will promptly notify, in writing, the other Party upon learning of any actual or suspected infringement of any LNP Technology Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any LNP Technology Patents, and will, along with such notice, supply the other Party with any evidence in its possession pertaining thereto.

7.2 Enforcement and Defense.

(a) Enforcement. As between the Parties, Acuitas (or its Third Party licensor, or licensee if any) will have the first right, but not the obligation, to seek to abate any infringement of the LNP Technology Patents by a Third Party, or to file suit against any such Third Party for such infringement *provided* that (i) Acuitas shall bear all the expense of such suit or abatement of infringement, and (ii) CureVac shall have the first right but not the obligation to take action or bring suit against such Third party infringer with respect to: (A) Joint Interest Patents; and/or (B) any other LNP Technology Patents that, on the date of first notice of such infringement, are necessary or useful [\*\*\*\*\*] *provided* that CureVac shall bear all the expense of such suit or abatement of infringement. If the Party first responsible for such enforcement elects not to take action or to bring suit to prosecute such infringement or to continue such action or suit, it shall notify the other Party of such election within [\*\*\*\*\*] days after become aware of or receipt of the notice of the infringement or after the election to stop any such action or suit. If after the expiration of the [\*\*\*\*\*] days period (or, if earlier, the date upon which the responsible Party provides written notice that it does not plan to bring such action) the responsible Party has neither obtained a discontinuance of infringement nor filed suit against any such Third Party infringer of such Patent, then (i) in the case of an election by Acuitas (or its Third Party licensor, or licensee if any) not to prosecute an infringement of an LNP Technology Patent, CureVac shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, *provided* the infringement is [\*\*\*\*\*] being the subject of this License Agreement, and further *provided* that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to prosecute an infringement of a Joint Interest Patents or LNP Technology Patent, Acuitas shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, *provided* that Acuitas shall bear all the expenses of such suit.

(b) *Defense.* As between the Parties, Acuitas (or its Third Party licensor or licensee, if any) will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging any LNP Technology Patents, other than: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of first notice of such action, [\*\*\*\*\*] and as between the Parties, CureVac will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging Joint Interest Patents and/or such other LNP Technology Patents. If the Party first responsible for such defense does not take steps to defend within a commercially reasonable time, or elects not to continue any such defense (in which case it will promptly provide notice thereof to the other Party), then (i) in the case of an election by Acuitas (or its Third Party licensor, or licensee if any) not to defend an LNP Technology Patent, CureVac shall have the right, but not the obligation, to take defend any LNP Technology Patents that cover Licensed Product and no other product licensed or optioned by Acuitas to a Third Party or commercialized by Acuitas provided that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to defend the Joint Interest Patents, Acuitas shall have the right, but not the obligation, to take action or bring suit to defend such Patents, provided that Acuitas shall bear all the expenses of such suit,

(c) Notwithstanding the foregoing, any response to a Third Party infringer's counterclaim of invalidity or unenforceability of any LNP Technology Patents shall be controlled by the Party who controls the relevant enforcement proceeding pursuant to Section 7.2 (a) unless otherwise mutually agreed by the Parties.

(d) *Withdrawal, Cooperation and Participation.* With respect to any infringement or defensive action identified above in this Section 7.2 which may be controlled by either CureVac or Acuitas:

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 7.2.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and Sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those Patent Costs incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

(e) *Settlement.* Neither Party will settle or consent to an adverse judgment in any action described in this Section 7.2 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any LNP Technology Patents involved therewith, without the prior written consent of the other Party (such consent not to be unreasonably withheld or delayed).

(f) *Damages.* Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Acuitas and described in Section 7.2(a) or 7.2(b) in each case will be used first to reimburse the controlling Party, and thereafter the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be divided as follows:

- (i) To the extent such recovery reflects [\*\*\*\*\*]; and
- (ii) To the extent such recovery reflects [\*\*\*\*\*]

**8. Confidentiality.**

8.1 **Confidential Information.** Each Party ("**Disclosing Party**") may disclose to the other Party ("**Receiving Party**"), and Receiving Party may acquire during the course and conduct of activities under this License Agreement, certain proprietary or confidential information of Disclosing Party in connection with this License Agreement. The term "**Confidential Information**" means all information of any kind, whether in written, oral, graphical, machine-readable or other form, whether or not marked as confidential or proprietary, that are disclosed or made available by or on behalf of the Disclosing Party to the Receiving Party in connection with this License Agreement.

8.2 **Restrictions.** During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors, consultants and agents who have a need to know such Confidential Information in order to perform their obligations and exercise their rights under this License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Section 8.2. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

8.3 **Exceptions.** Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no fault or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information.

8.4 **Permitted Disclosures.** Receiving Party may disclose Disclosing Party's Confidential Information to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

- (a) in order and to the extent required to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (b) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing LNP Technology Patents in connection with Receiving Party's rights and obligations pursuant to this License Agreement; and
- (c) to acquirers or permitted assignees; investment bankers, investors and lenders, including potential acquirers, assignees, investment bankers, and lenders;
- (d) in the case of CureVac, to (i) subcontractors; or (ii) potential licensees or collaboration partners, but in case (ii) only such information that is reasonably necessary or useful for the potential licensee or partner to evaluate the applicable Licensed Product, and LNP/Licensed Product manufacturing processes, but excluding the particular chemical structure and formulation of any LNPs (which excluded information may be disclosed to such potential licensee or partner upon Acuitas' prior written consent);

provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party adequate time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsections (c) and (d), each of those entities are required to comply with the restrictions on use and disclosure in Section 8.2 (other than investment bankers, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

8.5 Return of Confidential Information. Upon expiry or earlier termination of this License Agreement, upon written request of a Party (such request, if made, to be made within three (3) months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under another License Agreement, if any, or as set forth in this License Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures.

8.6 Publications. Notwithstanding anything in this License Agreement to the contrary, CureVac is permitted to publish the results of its development under this License Agreement, provided, however, that it will not disclose Acuitas Confidential Information in any publication by CureVac of the results of any Licensed Product development by CureVac without Acuitas' prior written consent, which will not be unreasonably withheld, conditioned or delayed.

8.7 Terms of this License Agreement; Publicity. The Parties agree that the existence and terms of the Parties' relationship and this License Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 8.4. Except as required by Law, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this License Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

9. Warranties; Limitations of Liability; Indemnification.

9.1 Representations and Warranties. Each Party represents and warrants to the other as of the License Agreement Effective Date that:

- (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated,

- (b) it has the legal right and power to enter into this License Agreement, to extend the rights and licenses granted or to be granted to the other in this License Agreement, and to fully perform its obligations hereunder,
- (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this License Agreement and the performance of its obligations hereunder and
- (d) this License Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms.

9.2 **Additional Representations of Acuitas.** Except as set forth on **Appendix 9.2**, Acuitas hereby represents and warrants to CureVac as of the License Agreement Effective Date as follows:

(a) **Impairment.** Neither Acuitas nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that would in any way conflict with or impair the scope of any rights or licenses granted to CureVac hereunder, including under any of the agreements which Acuitas has identified to CureVac prior to the License Agreement Effective Date.

(b) **Patents.** **Appendix 1.1** sets forth a complete and accurate list of all LNP Technology Patents. Acuitas Controls, and will Control during the Term, the LNP Technology Patents listed on Appendix 1.1 and the Know-How within the Acuitas LNP Technology, and is entitled to grant the licenses specified herein. To Acuitas' knowledge, the LNP Technology Patents have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the LNP Technology Patents is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Acuitas' knowledge as of the License Agreement Effective Date, no Acuitas LNP Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the License Agreement Effective Date, neither Acuitas nor any of its Affiliates has received any notice alleging that the LNP Technology Patents are invalid or unenforceable, or challenging Acuitas' ownership of or right to use any such rights.

(c) **Entire LNP Technology.** The Acuitas LNP Technology licensed to CureVac under this License Agreement comprises all Technology owned or in-licensed by Acuitas which is required to develop, manufacture and commercialize the Licensed Products.

(d) **Encumbrances.** Acuitas and its Affiliates are not subject to any payment obligations to Third Parties as a result of the execution or performance of this License Agreement. As of the License Agreement Effective Date, neither Acuitas nor any of its Affiliates has granted any liens or security interests on the Acuitas LNP Technology, and the Acuitas LNP Technology as licensed hereby is free and clear of any mortgage, pledge, claim, security interest, covenant, easement, encumbrance, lien or charge of any kind.

(e) *Defaults.* The execution, delivery and performance by Acuitas of this License Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which Acuitas is a party or by which it is bound, including each of the agreements which Acuitas has identified to CureVac prior to the License Agreement Effective Date, in each case as would reasonably be expected to have a material adverse effect on the rights granted to CureVac hereunder.

(f) *Litigation.* There is no action, suit, proceeding or investigation pending or, to the knowledge of Acuitas, currently threatened in writing against or affecting Acuitas that questions the validity of this License Agreement or the right of Acuitas to enter into this License Agreement or consummate the transactions contemplated hereby or that relates to the Acuitas LNP Technology.

(g) *Infringement.* Neither Acuitas nor any of its Affiliates has received any notice of any claim, nor does Acuitas or its Affiliates have any knowledge of any basis for any claim, that any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Acuitas LNP Technology in connection with the production, use, research, development, manufacture or commercialization of any Licensed Product.

(h) *Third Party Infringement.* To Acuitas' knowledge, no Third Party is infringing or has infringed any Patent within the Acuitas LNP Technology or is misappropriating or has misappropriated any Know-how within the Acuitas LNP Technology.

9.3 *Disclaimers.* Without limiting the respective rights and obligations of the Parties expressly set forth herein, each Party specifically disclaims any guarantee that any Licensed Product will be successful, in whole or in part. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED IN THIS LICENSE AGREEMENT, THE PARTIES MAKE NO REPRESENTATIONS AND EXTEND NO WARRANTY OF ANY KIND UNDER THIS LICENSE AGREEMENT, EITHER EXPRESS OR IMPLIED.

9.4 *No Consequential Damages.* NOTWITHSTANDING ANYTHING IN THIS LICENSE AGREEMENT OR OTHERWISE, NEITHER PARTY WILL BE LIABLE TO THE OTHER OR ANY THIRD PARTY WITH RESPECT TO ANY SUBJECT MATTER OF THIS LICENSE AGREEMENT FOR ANY INDIRECT, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES; PROVIDED THAT THIS SECTION 9.4 WILL NOT APPLY TO BREACHES OF A PARTY'S OBLIGATIONS OR UNDER ARTICLE NINE OR THE PARTIES' INDEMNIFICATION RIGHTS AND OBLIGATIONS UNDER SECTION 9.6.

9.5 *Performance by Others.* The Parties recognize that each Party may perform some or all of its obligations under this License Agreement through Affiliates and permitted subcontractors provided, however, that each Party will remain responsible and liable for the performance by its Affiliates and permitted subcontractors and will cause its Affiliates and permitted subcontractors to comply with the provisions of this License Agreement in connection therewith.

9.6 Indemnification.

(a) *Indemnification by CureVac.* CureVac will indemnify Acuitas, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "Acuitas Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the Acuitas Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any provision of this License Agreement; (ii) any negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) the development or commercialization by or on behalf of CureVac or any of its Affiliates or Sublicensees of Licensed Product other than if related to an LNP component thereof, except in each case (i)-(iii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of an Acuitas Indemnitee or Acuitas' breach of this License Agreement.

(b) *Indemnification by Acuitas.* Acuitas will indemnify CureVac, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against CureVac Indemnitees to the extent arising from or occurring as a result of: (i) the breach by Acuitas of any provision of this License Agreement; or (ii) any negligence or willful misconduct on the part of any Acuitas Indemnitee, except in each case (i) and (ii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this License Agreement.

(c) *Notice of Claim.* All indemnification claims provided for in Sections 9.6(a) and 9.6(b) will be made solely by such Party to this License Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under Section 9.6(a) and 9.6(b), but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and estimated amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

(d) *Defense, Settlement, Cooperation and Expenses.*

(i) *Control of Defense.* At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified Party within [\*\*\*\*\*] days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will immediately deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) *Right to Participate in Defense.* Without limiting Section 9.6(d)(i), any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to employ counsel of its choice for such purpose; provided, however, that such employment will be at the Indemnified Party's own cost and expense unless (i) the indemnifying Party has failed to assume the defense and employ counsel in accordance with Section 9.6(d)(i) (in which case the Indemnified Party will control the defense) or (ii) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any such costs and expenses of counsel for the Indemnified Party.

(iii) *Settlement.* With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with Section 9.6(d)(i), the indemnifying Party will have authority to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (such consent not to be unreasonably withheld, delayed or conditioned). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the prior written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party, such consent not to be unreasonably withheld, delayed or conditioned.

(iv) *Cooperation.* Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, the Indemnified Party will, and will cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith, at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.

(v) *Costs and Expenses.* Except as provided above in this Section 9.6(d), the costs and expenses, including attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

9.7 *Insurance.* Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program (including product liability insurance) to protect against potential liabilities and risk arising out of activities to be performed under this License Agreement, and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this License Agreement. Subject to the preceding sentence, such liability insurance or self-insurance program will insure against all types of liability, including personal injury, physical injury or property damage arising out of the manufacture, sale, use, distribution or marketing of Licensed Product. The coverage limits set forth herein will not create any limitation on a Party's liability to the other under this License Agreement.

**10. Term and Termination.**

10.1 *Term.* This License Agreement will commence as of the License Agreement Effective Date and, unless sooner terminated in accordance with the terms hereof or by mutual written consent, will continue on a Licensed Product-by-Licensed Product and a country-by-country basis, until there are no more payments owed Acuitas in such country (the longest such period of time hereunder, the "*Term*"). Upon there being no more such payments hereunder in such country, the license contained in Section 2.1 will become fully paid up and will remain in effect with respect to such Licensed Product in such country.

10.2 Termination by Acuitas.

(a) *Breach.* Acuitas will have the right to terminate this License Agreement in full upon delivery of written notice to CureVac in the event of any material breach by CureVac of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by Acuitas to CureVac specifying the nature of the alleged breach.

(b) *Disputed Breach.* If CureVac disputes in good faith the existence or materiality of a breach specified in a notice provided in accordance with Section 10.2(a), and CureVac provides Acuitas notice of such dispute within such [\*\*\*\*\*] period, then Acuitas shall not have the right to terminate this License Agreement under Section 10.2(a) unless and until it is finally determined, in accordance with Section 11.1, that CureVac has materially breached this License Agreement and that CureVac fails to cure such breach within [\*\*\*\*\*] following such decision. It is understood and agreed that during the pendency of such dispute, all of the terms and conditions of this License Agreement shall remain in effect and the Parties shall continue to perform all of their respective obligations hereunder. During the pendency of any such dispute, CureVac shall pay to Acuitas all Acuitas Milestone payments and royalty payments set forth herein.

10.3 Termination by CureVac.

(a) *Breach.* CureVac will have the right to terminate this License Agreement in full upon delivery of written notice to Acuitas in the event of any material breach by Acuitas of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by CureVac to Acuitas specifying the nature of the alleged breach.

(b) *Discretionary Termination.* CureVac will have the right (i) to terminate this License Agreement in full at its discretion for any reason by delivering written notice to Acuitas, such termination to be effective [\*\*\*\*\*] following the date of such notice..

(c) *Alternative to Termination Under Section 10.3(a).* If CureVac has the right to terminate this License Agreement under Section 10.3(a) as a result of a material breach by Acuitas (including following expiration of all applicable cure periods thereunder) that fundamentally impairs the value of CureVac's rights hereunder with respect to the Licensed Target, then CureVac may, in lieu of exercising such termination right, elect by written notice to Acuitas before the end of such applicable cure period to have this License Agreement continue in full force and effect for the Term, provided that the following will apply: starting immediately after the end of such applicable cure period, CureVac may [\*\*\*\*\*] the Acuitas Milestone Payments and the royalty rates set forth in Article Four. In the event Acuitas notifies CureVac within [\*\*\*\*\*] of receipt of CureVac's notice that Acuitas reasonably and in good-faith disputes CureVac's right to terminate this License Agreement pursuant to Section 10.3(a), CureVac shall instead deposit [\*\*\*\*\*] of such Acuitas Milestone Payments and royalty payments into an escrow account maintained by a mutually agreeable Third Party pending the resolution of such dispute in accordance with Section 11.1. In the event that it is established through the dispute resolution process that CureVac did have the right to terminate this License Agreement under Section 10.3(a), then the escrowed funds shall be released to CureVac and the [\*\*\*\*\*] shall apply going forward. In the event that it is established through the dispute resolution process that CureVac did not have the right to terminate this License Agreement under Section 10.3(a), then the escrowed funds shall be released to Acuitas, with interest, and CureVac shall resume full payment under this License Agreement (i.e., as if no [\*\*\*\*\*] had been made pursuant to this Section 10.3(c)).

10.4 Termination Upon Bankruptcy.

All rights and licenses granted under or pursuant to this License Agreement by Acuitas are, and will otherwise be deemed to be, for purposes of Section 65.11 (7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act, R.S.C. 1985, c. C-36 (the "Insolvency Legislation"), a grant of "right to use intellectual property" as used in the Insolvency Legislation. The Parties agree that CureVac and its Affiliates and Sublicensees, as licensees of such rights under this License Agreement, will retain and may fully exercise all of their rights and elections under the Insolvency Legislation subject to the payment of amounts provided for herein. Without limiting CureVac's rights under the Insolvency Legislation, if Acuitas becomes insolvent or makes an assignment for the benefit of its creditors or there is filed by or against the Acuitas any bankruptcy, receivership, reorganization or similar proceeding (an "Insolvency Event") pursuant to or under the Insolvency Legislation or otherwise, CureVac shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of Acuitas, shall be promptly delivered to it (i) before this License Agreement is rejected by or on behalf of Acuitas, within [\*\*\*\*\*] after CureVac's written request, unless Acuitas, or its trustee or receiver, elects within [\*\*\*\*\*] to continue to perform all of its obligations under this License Agreement, or (ii) after any rejection of this License Agreement by or on behalf of Acuitas, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 10.4(b) and under Section 65.11(7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act are in addition to and not in substitution of any and all other rights, powers, and remedies that each party may have under this License Agreement, the Insolvency Legislation, and any other applicable Laws. CureVac shall have the right to perform the obligations of Acuitas hereunder with respect to such intellectual property, but neither such provision nor such performance by CureVac shall release Acuitas from any such obligation or liability for failing to perform it.

10.5 Effects of Termination. Upon termination (but not expiration pursuant to Section 10.1) of this License Agreement for any reason:

- (a) *Termination for Acuitas' Breach.* In the event of a termination by CureVac for Acuitas' breach, the rights and licenses granted to CureVac under this License Agreement shall become perpetual and irrevocable and survive the termination of this License Agreement.
- (b) *Cessation of Rights.* Except as otherwise expressly provided herein, including in Sections 8.5, 10.5(a) and 10.5(c), all rights and licenses granted by Acuitas to CureVac in Section 2.1 will terminate.

(c) *Sell Off.* Notwithstanding the termination of CureVac's licenses and other rights under this License Agreement, CureVac shall retain the right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products, in each case that is intended for distribution, sale or disposition in the Territory, for a period of not more than three (3) months following the date of the effective termination, as though this License Agreement had not been terminated, and such distribution, sale or other disposition shall not constitute infringement of the Patents or other intellectual property or proprietary rights of Acuitas or its Affiliates. CureVac's right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products pursuant to this Section 10.5 (c) shall be subject to CureVac's continuing obligation to pay royalties with respect to the Net Sales.

10.6 *Survival.* In addition to the termination consequences set forth in Section 10.5, the following provisions will survive termination or expiration of this License Agreement: Articles 1 and 8 and Sections 4.4, 5.1, 9.3, 9.4, 9.6, 9.7, 10.4, 10.5, 10.6, 11.1, 11.2, 11.5, 11.7, 11.8, 11.9, 11.10, 11.11 and 11.12. Termination or expiration of this License Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at law or in equity with respect to any breach of this License Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this License Agreement.

## 11. General Provisions.

### 11.1 Dispute Resolution.

(a) *Disputes.* Disputes arising under or in connection with this License Agreement will be resolved pursuant to this Section 11.1; provided, however, that in the event a dispute cannot be resolved without an adjudication of the rights or obligations of a Third Party (other than any CureVac Indemnitees or Acuitas Indemnitees identified in Section 9.6), the dispute procedures set forth Sections 11.1(c) and 11.1(c) will be inapplicable as to such dispute.

(b) *Dispute Escalation.* In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves. In the event that such dispute is not resolved on an informal basis within [\*\*\*\*\*], any Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive), who will attempt in good faith to resolve such dispute by negotiation and consultation for a [\*\*\*\*\*] period following receipt of such written notice

(c) *Dispute Resolution.* In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be London, England. The number of mediators will be one (1). The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration. Any dispute relating to the validity performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 11.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be London, England. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator s)) and enforceable in any court of competent jurisdiction.

(d) *Injunctive Relief.* Notwithstanding the dispute resolution procedures set forth in this Section 11.1, in the event of an actual or threatened breach hereunder, the aggrieved Party may seek equitable relief (including restraining orders, specific performance or other injunctive relief) in any court or other forum, without first submitting to any dispute resolution procedures hereunder.

(e) *Tolling.* The Parties agree that all applicable statutes of limitation and time-based defenses (such as estoppel and laches) will be tolled while the dispute resolution procedures set forth in this Section 11.1 are pending, and the Parties will cooperate in taking all actions reasonably necessary to achieve such a result.

(f) *Prevailing Party.* The prevailing Party in any arbitration under Section 11.1 (c) or any other suit related to this License Agreement will be entitled to recover from the losing Party all out-of-pocket fees, costs and expenses (including those of attorneys, professionals and accountants and all those arising from appeals and investigations) incurred by the prevailing Party in connection with such arbitration or suit.

11.2 Cumulative Remedies and Irreparable Harm. All rights and remedies of the Parties hereunder will be cumulative and in addition to all other rights and remedies provided hereunder or available by agreement, at Law or otherwise. Each Party acknowledges and agrees that breach of any of the terms or conditions of this License Agreement may cause irreparable harm and damage to the other and that such damage may not be ascertainable in money damages and that as a result thereof the non-breaching Party may be entitled to seek from a court equitable or injunctive relief restraining any breach or future violation of the terms contained herein by the breaching Party without the necessity of proving actual damages or posting bond. Such right to equitable relief is in addition to whatever remedies either Party may be entitled to as a matter of Law or equity, including money damages.

11.3 Relationship of Parties. Nothing in this License Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied third party beneficiaries hereunder (except for CureVac Indemnitees and Acuitas Indemnitees for purposes of Section 9.6). For clarity, CureVac does not grant to Acuitas any rights or licenses under this License Agreement to any CureVac technology or intellectual property rights.

11.4 Compliance with Law. Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

11.5 Governing Law. This License Agreement will be governed by and construed in accordance with the Laws of England and Wales, without respect to its conflict of Laws rules, provided that any dispute relating to the scope, validity, enforceability or infringement of any Patents or Know-How will be governed by, and construed and enforced in accordance with, the substantive Laws of the jurisdiction in which such Patents or Know-How apply.

11.6 Counterparts; Facsimiles. This License Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this License Agreement by either Party will constitute a legal, valid and binding execution and delivery of this License Agreement by such Party.

11.7 Headings. All headings in this License Agreement are for convenience only and will not affect the meaning of any provision hereof.

11.8 Waiver of Rule of Construction. Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this License Agreement. Accordingly, the rule of construction that any ambiguity in this License Agreement will be construed against the drafting party will not apply.

11.9 Interpretation. Whenever any provision of this License Agreement uses the term “including” (or “includes”), such term will be deemed to mean “including without limitation” (or “includes without limitations”). “Herein,” “hereby,” “hereunder,” “hereof” and other equivalent words refer to this License Agreement as an entirety and not solely to the particular portion of this License Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Appendices in this License Agreement are to Sections and Appendices of this License Agreement. References to any Sections include Sections and subsections that are part of the related Section.

11.10 Binding Effect. This License Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

11.11 Assignment. This License Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this License Agreement, except as expressly permitted hereunder or otherwise without the prior written consent of the other Party, which consent will not be unreasonably withheld; provided that either Party may assign this License Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this License Agreement (whether by merger, consolidation or otherwise).

11.12 Notices. All notices, requests, demands and other communications required or permitted to be given pursuant to this License Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid to the following addresses:

If to CureVac: CureVac AG  
Paul-Ehrlich-Str. 15 72076 Tubingen Germany  
Attention: CEO and General Counsel

If to Acuitas: Acuitas Therapeutics Inc.  
2714 West 31st Avenue  
Vancouver, B.C.  
Canada V6L 2A1  
Attention: President and CEO

With a copy to: McCarthy Tetrault LLP  
Suite 2400 745 Thurlow Street  
Vancouver, B.C.  
Canada V6E 0C5  
Attention: [\*\*\*\*\*]

Either Party may change its designated address by notice to the other Party in the manner provided in this Section 11.12.

11.13 Amendment and Waiver. This License Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

11.14 Severability. In the event that any provision of this License Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the License Agreement to preserve (to the extent possible) their original intent.

11.15 Entire Agreement. This License Agreement together with the Development and Option Agreement and any other license agreements entered into during the Term pursuant to the Development and Option Agreement are the sole agreement with respect to the subject matter hereof and supersedes all other agreements and understandings between the Parties with respect to same.

11.16 Force Majeure. Neither Acuitas nor CureVac will be liable for failure of or delay in performing obligations set forth in this License Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Acuitas or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

*[Remainder of this Page Intentionally Left Blank]*

WITNESS WHEREOF, the Parties have caused this License Agreement to be executed by their respective duly authorized officers as of the License Agreement Effective Date.

**Non-Exclusive License Agreement**

This License Agreement ("License Agreement"), dated as of [\_\_\_\_\_] (the "License Agreement Effective Date"), is made by and between Acuitas Therapeutics inc., a British Columbia corporation ("Acuitas"), and CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tubingen, Germany ("CureVac"). Each of Acuitas and CureVac may be referred to herein as a "Party," or together as the "Parties."

**WHEREAS**, Acuitas has proprietary LNP Technology;

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below);

**WHEREAS**, Acuitas and CureVac are parties to that certain Development and Option Agreement (dated April 29, 2016) (the "Development and Option Agreement") pursuant to which CureVac has options to take licenses under the Acuitas LNP Technology (as defined below) with respect to CureVac's mRNA Constructs; and

**WHEREAS**, pursuant to the terms of the Development and Option Agreement, CureVac has exercised an option with respect to the Target (as defined below) and the Parties are now entering into a licensing arrangement whereby CureVac will have a license under the Acuitas LNP Technology to develop and commercialize Licensed Products (as defined below) based on such Target.

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

**1. Definitions.**

The following terms and their correlatives will have the following meanings:

1.1 "Acuitas LNP Technology" means any and all LNP Technology Controlled by Acuitas or any of its Affiliates as of the License Agreement Effective Date or at any time during the Term, including Acuitas' right and interest in any Technology created, conceived or reduced to practice under the Development and Option Agreement and/or the Technology Transfer Agreement and Acuitas' interest in any such Technology jointly owned by CureVac or its Affiliates and Acuitas or its Affiliates and necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. Unless otherwise set forth herein, Acuitas LNP Technology will include Joint Interest Patents. For the avoidance of doubt, the rights granted to Acuitas by [\*\*\*\*\*] shall not fall under this definition. The Acuitas LNP Technology existing as of the License Agreement Effective Date is listed in **Appendix 1.1** attached hereto.

1.2 "Acuitas Indemnities" has the meaning set forth in Section 9.6(a).

1.3 "Affiliate" of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with power to direct the management and policies of such entity, provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. Regarding CureVac, Affiliate shall not include Mr. Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other entity controlled by Mr. Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG.

1.4 "cGMP" means current Good Manufacturing Practices as specified in the U.S. C.F.R., ICFI Guideline Q7A, or equivalent Laws of an applicable Regulatory Authority at the time of manufacture.

1.5 "Calendar Quarter" means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31

1.6 "Change of Control" with respect to Acuitas, shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the "beneficial owner", directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Acuitas then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Acuitas representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Acuitas or has the power, directly or indirectly, to elect a majority of the members of the Acuitas' board of directors, or similar governing body; or (ii) Acuitas enters into a merger, consolidation or similar transaction with another person or entity; or (iii) Acuitas sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Acuitas' consolidated total assets to which this Agreement relates; or (iv) the holders of capital stock of Acuitas approve a plan or proposal for the liquidation or dissolution of Acuitas."

1.7 "Combination Product" means a Licensed Product that includes at least one additional active ingredient other than a Licensed Product. Drug delivery vehicles, adjuvants, and excipients shall not be deemed to be "active ingredients", except in the case where such delivery vehicle, adjuvant, or excipient is recognized as an active ingredient in accordance with 21 C.F.R. 210.3(b)(7) or equivalent Laws in other jurisdictions, provided however, should lipid nanoparticles comprised in a Licensed Product be characterized as "active ingredients" at any time during the Term, such lipid nanoparticles will not be considered an "active ingredient" for the purposes of this definition.

1.8 "Competitive Product" shall mean a product that [\*\*\*\*\*] as a Licensed Product.

1.9 "Indication" shall mean an individual disease or clinical condition with respect to which at least one adequate and well controlled study is required to support inclusion of such disease or condition in the indication statement of an FDA approved package insert for a Licensed Product.

- 1.10 "Confidential Information" has the meaning set forth in Section 8.1
- 1.11 "Control" or "Controlled" means, with respect to any Know-How or Patent, the possession (whether by ownership or license, other than by a license or sublicense granted pursuant to this License Agreement or the Development and Option Agreement) by Acutias or its Affiliates of the ability to grant to CureVac a license or access to such Know-How or Patent as provided herein to such item, without violating the terms of any agreement or other arrangement with any Third Party and without owing any milestone, royalty or other monetary obligations to a Third Party.
- 1.12 "Covered Product" has the meaning set forth in Section 4.3
- 1.13 "Covers", with reference to (a) a Patent, means that the manufacture, development or commercialization of a Licensed Product would infringe a Valid Claim of such Patent in the country in which such activity occurs; and (b) Know-How, means that the manufacture, development or commercialization of a Licensed Product incorporates or embodies such Know-How.
- 1.14 "CureVac Indemnitees" has the meaning set forth in Section 9.6(b)
- 1.15 "Late-Stage Development" means with respect to a product that [\*\*\*\*\*] Studies have been initiated.
- 1.16 "Development and Option Agreement" has the meaning set forth in the Preamble.
- 1.17 "Disclosing Party" has the meaning set forth in Section 8.1
- 1.18 "Field of Use" means all [\*\*\*\*\*].
- 1.19 "First Commercial Sale" means the first sale for use or consumption of any Licensed Product in a country after all required Regulatory Approvals for commercial sale of such Licensed Product have been obtained in such country.
- 1.20 "Indemnification Claim Notice" has the meaning set forth in Section 9.6(c).
- 1.21 "Indemnified Party" has the meaning set forth in Section 9.6(c).
- 1.22 "Joint Interest Patents" means the Patents listed in **Appendix 1.22** hereto, as amended from time to time.
- 1.23 "Know-How" means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form.

- 1.24 "Law" or "Laws" means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.
- 1.25 "License Agreement" has the meaning set forth in the Preamble.
- 1.26 "License Agreement Effective Date" has the meaning set forth in the Preamble.
- 1.27 "Licensed Product" means: (i) [\*\*\*\*\*] product comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended to express the Target and where such product is derived from, is based on, or utilizes any Acuitas LNP Technology; and/or (ii) [\*\*\*\*\*] Licensed Vaccine Product. If a given protein, e.g., an antibody comprises separated amino acid-chains, or a given Vaccine comprises multiple antigens or antibodies, which might be delivered as separated mRNA Constructs (combined in one LNP or delivered in separated LNPs), such product would be considered as one Licensed Product. For the avoidance of doubt, the term "Licensed Product" in respect of the Target encompasses all variants of such Target, including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been made (for example, mutated versions, derivatives or fragments) and species homologs and orthologs thereof, provided however that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses [\*\*\*\*\*] to such Target(s) (for example [\*\*\*\*\*]).
- 1.28 "Licensed Vaccine Product" means [\*\*\*\*\*] product that is comprised of Lipid Nanoparticles (LNP) containing [\*\*\*\*\*] mRNA Constructs intended to express a [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets in any combination, if any, and where such product is a Vaccine and is derived from, is based on, or utilizes any Acuitas LNP Technology. Licensed Vaccine Products may consist of [\*\*\*\*\*] mRNA Constructs encoding for the [\*\*\*\*\*] Target and the [\*\*\*\*\*] Targets all of which, i.e., the [\*\*\*\*\*] Target with any combination of the [\*\*\*\*\*] Targets, if any, are considered the Target (for avoidance of doubt, a Licensed Vaccine Product must contain the [\*\*\*\*\*] Target and optionally any or all of the [\*\*\*\*\*] Targets, if any). CureVac may remove or add further [\*\*\*\*\*] Targets to this License Agreement in accordance with Section 4.2 below.
- 1.29 "LNP Technology," means Technology that claims, embodies or incorporates delivery systems (and components thereof) based on or incorporating lipid nanoparticles (LNP).
- 1.30 "LNP Technology Patent(s)," means Patents comprised in the Acuitas LNP Technology, including any future Patent which will become part of the Acuitas LNP Technology during the Term and further including Acuitas' rights in the Joint Interest Patents, unless otherwise set forth herein.
- 1.31 "Losses" has the meaning set forth in Section 9.6(a).
- 1.32 "Major Market Country/ies" means the [\*\*\*\*\*].
- 1.33 "Mammalian Target" means a Target that is encoded by and expressed by a mammal including a human. For clarity all Targets that are antibodies are "Mammalian Targets".

1.34 “mRNA Construct” means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5' UTR, the associated open reading frame, 3'UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct.

1.35 “mRNA Technology” means Technology that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.

1.36 “Milestones” means the milestones payable pursuant to Section 4.1.

1.37 “Milestone Event” has the meaning set forth in Section 4.1.

1.38 “Milestone Payment” has the meaning set forth in Section 4.1.

1.39 “Net Sales” means, with respect to any Licensed Product, the amount received by CureVac and its Affiliates and Sublicensees for *bona fide* sales of such Licensed Product to a Third Party (other than Affiliates and Sublicensees but including distributors for resale), less:

(a) discounts (including cash, quantity and patient program discounts), retroactive price reductions, commissions, charge-back payments and rebates granted to managed health care organizations or to federal, state and local governments, their agencies, and purchasers and reimbursers or to trade customers;

(b) credits or allowances actually granted upon claims, damaged goods, rejections or returns of, and for uncollectable amounts on, such Licensed Product, including such Licensed Product returned in connection with recalls or withdrawals;

(c) freight out, postage, shipping and insurance charges for delivery of such Licensed Product;

(d) taxes or duties levied on, absorbed or otherwise imposed on the sale of such Licensed Product, including value-added taxes, or other governmental charges otherwise imposed upon the billed amount, as adjusted for rebates and refunds;

(e) any invoiced amounts from a prior period which are not collected and are written off by CureVac or its Affiliates, including bad debts;

(f) wholesaler and distributor administration fees; and

(g) other customary deductions taken in the ordinary course of business in accordance with IFRS (International Financial Reporting Standards) principles.

Net Sales shall not include any payments among CureVac, its Affiliates and Sublicensees. Net Sales shall be determined in accordance with generally accepted accounting principles, consistently applied. Net Sales for any Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/(A+B)$ , where A is the weighted average price paid for the Licensed Product contained in such Combination Product sold separately in finished form in such country, and B is the weighted average invoice price paid for the other active ingredients contained in such Combination Product sold separately in finished form in such country, if such Licensed Product and such other active ingredients are each sold separately in such country.

If such other active ingredients are not sold separately in such country, then Net Sales for such Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction A/C, where C is the weighted average invoice price paid for such Combination Product in such country. If such Licensed Product is not sold separately in finished form in such country, Net Sales for such Licensed Product will be determined by CureVac's good faith estimate of the relative contribution of such Licensed Product and each such other active ingredients in such Combination Product, and shall take into account in good faith any applicable allocations and calculations that may have been made for the same period in other countries.

1.40 "Non-Mammalian Target" means a Target that is encoded by and expressed by a non-mammalian organism.

1.41 "Patent(s)" means an (i) issued patent, a patent application, and a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (i), and (iii) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (i) or (ii), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder).

1.42 "Patent Costs" means the reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents and enforcing and defending them.

1.43 "Phase 1 Study" means a human clinical trial of a Licensed Product in any country, the primary purpose of which is the determination of safety and which may include the determination of pharmacokinetic and/or pharmacodynamic profiles in healthy individuals or a diseased patient population. A Phase 1 Study in a diseased patient population may include, in addition to primary determination of safety, dose exploration and a determination of preliminary efficacy of a product in the target patient population. For clarity, a particular human clinical trial of a Licensed Product will not be considered both a Phase 1 Study and a Phase 2 Study for the purposes of Milestone payments under Section 4.1.

1.44 "Phase 2 Study" means a human clinical trial of a Licensed Product in any country, and which is: (a) a human clinical trial (other than a Phase 1 Study) in which the primary purpose is dose exploration, dose response, duration of effect, kinetics or preliminary efficacy and safety of a product in the target patient population, or (b) a controlled dose-ranging clinical trial to evaluate further the efficacy and safety of such product in the target patient population and to define the optimal dosing regimen.

1.45 "Phase 3 Study" means a human clinical trial of a Licensed Product in any country, and which is: (a) a controlled study of a product in the target patient population of the efficacy and safety of such product which is prospectively designed to demonstrate statistically whether such product is effective and safe for use in a particular indication in a manner sufficient to obtain Regulatory Approval to market such product.

- 1.46 “[\*\*\*\*\*] Target” will mean the designated [\*\*\*\*\*] Target of a Licensed Vaccine Product. Each [\*\*\*\*\*] Target encoded for in the Licensed Vaccine Product will be termed an “[\*\*\*\*\*] Target”.
- 1.47 “Receiving Party” has the meaning set forth in Section 8.1.
- 1.48 “Regulatory Approval” means, with respect to a country or extra-national territory, any and all approvals (including BLAs and MAAs), licenses, registrations or authorizations of any Regulatory Authority necessary in order to commercially distribute, sell or market a product in such country or some or all of such extra-national territory, including any pricing or reimbursement approvals.
- 1.49 “Regulatory Authority” means any national (e.g., the FDA), supra-national (e.g., the EMA), regional, state or local regulatory agency, department, bureau, commission, council or other governmental authority, in any jurisdiction in the world, involved in the granting of Regulatory Approval.
- 1.50 “Royalty Term” has the meaning set forth in Section 4.3(d).
- 1.51 “Solely Owned IP” has the meaning set forth in Article 5.
- 1.52 “Sublicensee” means any Third Party that is granted a sublicense as permitted by Section 2.2, either directly by CureVac or its Affiliates or indirectly by any other Sublicensee hereunder.
- 1.53 “Target(s)” means the protein(s) as described in **Appendix 1.53 a or b** hereto, together with all variants of such protein(s), including the wild types, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments) and species homologs, orthologs thereof, provided however that any such naturally occurring variant, engineered variant or species homolog or ortholog possesses substantially similar biological activity to such protein(s) (for example antigenicity in case of antigens). If a given protein (e.g., an antibody) comprises separated amino acid chains which might be delivered by separated mRNA Constructs such protein is defined as one Target.
- 1.54 “Technology” means collectively Patents and Know-How.
- 1.55 “Technology Transfer Agreement” has the meaning set forth in Section 2.3.
- 1.56 “[\*\*\*\*\*]” has the meaning set forth in Section 1.1.
- 1.57 “[\*\*\*\*\*] License” has the meaning set forth in Section 1.1.
- 1.58 “Term” has the meaning set forth in Section 10.1.
- 1.59 “Territory” means worldwide.

1.60 “Third Party” means any person or entity other than CureVac, Acuitas and their respective Affiliates.

1.61 “Third Party Claims” has the meaning set forth in Section 9.6(a).

1.62 “[\*\*\*\*\*] Patent Rights” means any and all Patents resulting from the research collaboration conducted between Acuitas and [\*\*\*\*\*] of the [\*\*\*\*\*] from about [\*\*\*\*\*] to the effective date of the Development and Option Agreement together with associated Know-How to the extent this Know-How is known to Acuitas and can be provided by Acuitas without breaching any confidentiality obligations of Acuitas. For avoidance of doubt, such results include those of the research summarized in [\*\*\*\*\*].

1.63 “Vaccine” means any product primarily intended (i) to elicit an adaptive immune response in the recipient against a specific disease-causing organism or malignancy as the result of presentation of antigen(s) associated with the disease-causing organism or malignancy; or (ii) to provide passive immune protection against a specific disease-causing organism.

1.64 “Valid Claim” means, with respect to a particular country, any claim of (i) an issued and unexpired Patent; or (ii) a pending Patent claim, comprised within the Acuitas LNP Technology in such country that (a) has not been revoked or held unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction from which no further appeal is possible (other than to the United States Supreme Court or to an equivalent court in the respective jurisdiction) and (b) has not been abandoned, disclaimed, denied or admitted to be invalid or unenforceable through reissue or disclaimer or otherwise in such country; and with respect to a pending Patent claim provided such Patent has been pending for less than five (5) years of the earliest priority date of filing of such pending Patent.

## 2. License Grants; Technology Transfer.

2.1 Licenses by Acuitas. Subject to the terms and conditions of this License Agreement, Acuitas hereby grants to CureVac a non-exclusive, non-transferrable license, with the right to sublicense only as permitted by Section 2.3(b), under the Acuitas LNP Technology, to develop, have developed, make, have made, use and have used, sell, offer for sale, have sold and import and have imported Licensed Products in the Field of Use in the Territory. For the avoidance of doubt, in case of a Target for Licensed Vaccine Products, the non-exclusivity of the license applies with respect to the [\*\*\*\*\*] Target, and will cover (i) [\*\*\*\*\*] Target with or without, and with one or several [\*\*\*\*\*] Targets; and (ii) the use of the [\*\*\*\*\*] Target (but not any of the [\*\*\*\*\*] Targets) for any Licensed Product including but not limited to Vaccines.

2.2 Option for additional Technology licenses. For the event that, in their reasonable judgment CureVac, its Affiliates or sublicensees considers it necessary to [\*\*\*\*\*] above in order to develop, have developed, make, have made, use and have used (including for research and development), sell, offer for sale, have sold, import and have imported a Licensed Product incorporating Acuitas LNP Technology in the Field of Use in the Territory, Acuitas hereby grants to CureVac the option to acquire one or more sublicenses under any such in-licensed Technology, to the extent Acuitas has the right to grant such sublicenses. Such sublicense will be granted at the terms and conditions of Acuitas’ main Third Party license agreement on the effective date of the sublicense agreement, and where such terms and conditions are equivalent to the terms and conditions that would be applicable to Acuitas if Acuitas were developing, making and/or selling the product under the Third Party license. The scope of each such option for a sublicense is equivalent to the scope of the license granted to CureVac under Section 2.1 above, in each case being in respect of such additional Third Party LNP Technology. CureVac is entitled to exercise such an option at any time during the Term, and upon written notice of CureVac that it exercises the option, the Parties shall finalize in good faith the terms and conditions of such sublicense agreement according to the terms and conditions of Acuitas’ main Third Party license agreement.

2.3 Sublicensing Rights.

(a) *Transfer.* The license granted in Section 2.1 is transferable only upon a permitted assignment of this License Agreement in accordance with Section 11.11.

(b) *CureVac Sublicenses.* The licenses granted in Section 2.1 may be sublicensed (with the right to sublicense through multiple tiers), in full or in part, by CureVac, its Affiliates or Sublicensees to CureVac's Affiliates and Third Parties provided, that for any sublicense to Third Parties:

(i) Each sublicense will be in writing and on terms consistent with and subject to the terms of this License Agreement,

(ii) CureVac will provide Acuitas with a copy of any sublicense agreement with a Sublicensee within [\*\*\*\*] days of execution thereof, which sublicense agreement may be redacted as necessary to protect commercially sensitive information and shall be treated as CureVac Confidential Information hereunder;

(iii) CureVac will be responsible for any and all obligations of such Sublicensee as if such Sublicensee were CureVac hereunder; and

(iv) Any sublicense granted by CureVac to any rights licensed to it hereunder shall terminate immediately upon the termination of the license from Acuitas to CureVac and its Affiliates with respect to such rights, provided that such sublicensed rights shall not terminate if, as of the effective date of such termination pursuant to Sections 10.2, 10.3(a) or 10.4, a Sublicensee is not in material default of its obligations under its sublicense agreement, and within [\*\*\*\*] days of such termination and a written notice by Acuitas and disclosure of this License Agreement to the Sublicensee, the Sublicensee agrees in writing to be bound directly to Acuitas under a license agreement substantially similar to this License Agreement with respect to the rights sublicensed hereunder, substituting such Sublicensee for CureVac.

(c) *Subcontractors.* For clarity purposes, CureVac is entitled to engage contract research organizations and contract manufacturing organizations for the development and manufacture of Licensed Products on behalf of CureVac. To the extent such contract organizations require a license to perform such subcontracted activities under applicable Laws, CureVac is entitled to grant a limited license without an obligation to meet the conditions of Section 2.3 (b)(ii) and (iv).

2.4 Technology Transfer. After the License Agreement Effective Date and promptly upon written request by CureVac, Acuitas will conduct a full transfer of Acuitas LNP Technology to CureVac and/or its designee(s) (which designee(s) may be an Affiliate or Third Party manufacturers, and which Third Party manufacturers may also be a backup manufacturer or a second manufacturer of Licensed Products) as required for the applicable transferee of the then-current process. The technology transfer activities, the rights and obligations of the Parties, the reimbursement of Acuitas for the technology transfer activities, and the rights and licenses to any Technology generated in the course of the technology transfer are set forth in the Technology Transfer Agreement ("Technology Transfer Agreement") in **Appendix 2.4** hereto, *provided, however*, that such Technology Transfer Agreement and its Appendices may be amended to reflect any developments and any specific requirements with respect to the then current process on the effective date of the Technology Transfer Agreement which become known to the Parties only after the effective date of the Development and Option Agreement.

2.5 Updates to Appendix 1.1. Acuitas shall notify CureVac at least once every [\*\*\*\*\*] months of Patents that are added to the Acuitas LNP Technology following the License Agreement Effective Date or any Patents that have been abandoned or discontinued in accordance with the terms of this License Agreement. Appendix 1.1 shall be automatically updated to include any such added Patents provided that, with written notice to Acuitas, CureVac may elect to exclude any particular Patents from the Acuitas LNP Technology. Following any such notice by CureVac, the Acuitas Patents that CureVac identifies for exclusion from this License Agreement will no longer be licensed to CureVac hereunder, and CureVac shall not have any obligations hereunder with respect to such Patent.

2.6 Documents and Declarations. Acuitas shall execute all documents, give all declarations regarding the licenses granted hereunder and reasonably cooperate with CureVac to the extent such documents, declarations and/or cooperation are required for the recording or registration of the licenses granted hereunder at the various patent offices in the Territory for the benefit of CureVac, its Affiliates or their Sublicensees.

2.7 Conversion to an Exclusive License. In the event CureVac desires to convert the non-exclusive license granted in Section 2.1 to an exclusive license, then CureVac will notify the Escrow Agent thereof. If the Target the subject of this License Agreement is available for an exclusive license, the Escrow Agent will notify CureVac thereof, and thereupon: (i) the license granted in Section 2.1 will become an exclusive license; (ii) the financial provisions of this License Agreement equal to those amounts and percentages as set forth in a corresponding exclusive license agreement under the Development and Option Agreement; and (iii) this License Agreement will be deemed automatically amended to correspond thereto. Within [\*\*\*\*\*] days of such conversion of this License Agreement to exclusive (the "Conversion Date"), CureVac will pay to Acuitas an amount equal to sum of the difference between: (a) any amounts paid to Acuitas under this License Agreement up to the Conversion Date; and (b) the corresponding amounts CureVac would have paid Acuitas had this License Agreement been exercised on the Effective Date as an exclusive license agreement under the Development and Option Agreement.

3. License Limitations. No licenses or other rights are granted by Acuitas hereunder to use any trademark, trade name, trade dress or service mark owned or otherwise Controlled by Acuitas or any of its Affiliates. All licenses and other rights are or shall be granted only as expressly provided in this License Agreement, and no other licenses or other rights is or shall be created or granted by either Party hereunder by implication, estoppel or otherwise.

4. **Payments and Royalties.**

4.1 **Milestone Payments.** CureVac will make milestone payments (each, a “**Milestone Payment**”) to Acuitas upon the first occurrence of each of the milestone events (each, a “**Milestone Event**”) by Licensed Product as set forth below in this Section 4.1. CureVac will notify Acuitas of the achievement of each Milestone Event within [\*\*\*\*\*] business days of such achievement. Each Milestone Payment will be payable to Acuitas by CureVac within [\*\*\*\*\*] days of the achievement of the specified Milestone Event and receipt of a respective invoice from Acuitas, and such payments when owed or paid will be non-refundable and non-creditable. If one or more of the Milestone Events set forth below are not achieved or not required for any reason, the payment for such skipped Milestone Event will be due [\*\*\*\*\*]. The maximum total of all Milestone Payments for all Licensed Products payable under this License Agreement is [\*\*\*\*\*].

<i>Milestone Event</i>	<i>Milestone Payment</i>
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

\*[\*\*\*\*\*] payments are payable for the [\*\*\*\*\*] [\*\*\*\*\*] for the [\*\*\*\*\*] Active Agreements and [\*\*\*\*\*] for the [\*\*\*\*\*] Active Agreements. For the avoidance of doubt, only license agreements concluded on the basis of the Development and Option Agreement will count towards the number of Active Agreements for the applicable [\*\*\*\*\*] payments. Provided a Licensed Product under this License Agreement is the first product comprised of Lipid Nanoparticles (LNP) containing one or more mRNA Constructs intended to express a protein that is a licensed product under this or any other exclusive license agreement entered into between the Parties on the basis of the Development and Option Agreement to reach a Phase 1, Phase 2 or Phase 3 milestone, the first three clinical Milestone Payments (i.e., [\*\*\*\*\*]) If a Licensed Product under this License Agreement is not the first product under any exclusive license agreement entered into between the Parties on the basis of the Development and Option Agreement, but the first (and any subsequent) exclusive license agreement is terminated and the Licensed Product under this License Agreement therefore becomes the “first product” (i.e., no other exclusive license agreement under the Development and Option Agreement takes such place), [\*\*\*\*\*] in clinical development milestones will be applied to the Licensed Product under this License Agreement for any clinical milestones not achieved under the first or any subsequent exclusive license agreements.

4.2 License Maintenance Fee for [\*\*\*\*\*] Targets.

(a) *Excess [\*\*\*\*\*] Targets.* Upon the first dosing of the first patient in the first Phase 3 Study for the first Licensed Vaccine Product under this License Agreement anywhere in the Territory, CureVac will notify Acuitas in writing of the identity of any [\*\*\*\*\*] Target(s) not included in such Licensed Product (“[\*\*\*\*\*] Target(s)”). At CureVac’s election, to be made in such notice, and on an [\*\*\*\*\*] Target-by- [\*\*\*\*\*] Target basis, (i) this License Agreement will be amended to remove reference to the [\*\*\*\*\*] Target and all rights to such [\*\*\*\*\*] Target will revert back to Acuitas; or (ii) CureVac will retain its rights under this License Agreement to such [\*\*\*\*\*] Target and will pay to Acuitas a license maintenance fee for such retained Excess [\*\*\*\*\*] Target of [\*\*\*\*\*] per year if the [\*\*\*\*\*] Target is a Non-Mammalian Target and [\*\*\*\*\*] per year if the [\*\*\*\*\*] Target is a Mammalian Target and for as long as the Excessed [\*\*\*\*\*] Target is not part of any other Licensed Vaccine Product developed under this License Agreement. Thereafter, CureVac is entitled to remove any retained [\*\*\*\*\*] Target from this License Agreement upon prior written notice to Acuitas and upon receipt of such notice the obligation to pay license maintenance fees for such removed [\*\*\*\*\*] Target terminates.

(b) *Inclusion of Further [\*\*\*\*\*] Targets.* In the event CureVac desires to include [\*\*\*\*\*] Targets for which [\*\*\*\*\*] was exercised under the Development and Option Agreement or to reintroduce a removed [\*\*\*\*\*] Target into the License Agreement, CureVac will notify the Escrow Agent of the identify and other information describing each protein as set forth in Appendix 1.53(b) that it desires to be an [\*\*\*\*\*] Target. If such protein is available, the Escrow Agent will notify CureVac, such protein will become an [\*\*\*\*\*] Target and CureVac will make the payment for such [\*\*\*\*\*] Target(s) as though such [\*\*\*\*\*] Target had been reserved at the time the [\*\*\*\*\*] Target was reserved and the option to exercise the License Agreement including the [\*\*\*\*\*] Target had then included such [\*\*\*\*\*] Target. For avoidance of doubt, the number of [\*\*\*\*\*] Targets for purposes of calculating the option payment will not be reduced for [\*\*\*\*\*] Targets that have been removed from the Licensed Agreement, if any. This License Agreement will then be amended to include reference to such further [\*\*\*\*\*] Target(s).

4.3 Royalties.

(a) *Royalty.* Subject to the remainder of this Section 4.3, on a country-by-country basis and a Covered Product-by-Covered Product basis, “**Covered Product**” being a Licensed Product which is Covered by one or more Valid Claims, CureVac will pay to Acuitas a royalty of [\*\*\*\*\*] of Net Sales of the Covered Product in [\*\*\*\*\*] of Net Sales of the Covered Product in [\*\*\*\*\*] or [\*\*\*\*\*] of Net Sales of the Covered Product in Tier Three. On a country by country basis, in the event a Licensed Product is not a Covered Product in such country, CureVac will pay to Acuitas a royalty on Net Sales equal to the Minimum Royalty set forth in subsection (c) below.

(b) *Third Party Royalty Payments.* If CureVac or its Affiliate or Sublicensee, in its reasonable judgment, considers it necessary or useful to obtain a license from any Third Party under any LNP Technology that Covers a Licensed Product in order to develop, manufacture or commercialize such Licensed Product the amount of CureVac's royalty obligations under Sections 4.3(a) will be reduced by [\*\*\*\*\*] of the amount of the royalty payments made to such Third Party ("Third Party Royalty Payments"), *provided, however*, that such reduction shall not result in less than the Minimum Royalty due to Acuitas under Section (c) below. For avoidance of doubt, Third Party Royalty Payments will include payments by CureVac in connection with Acuitas sublicenses under Section 2.2.

(c) *Minimum Royalty.* Except as set forth in subsection (d) below, in no event will the Royalty payable by CureVac to Acuitas for any Licensed Product (whether or not a Covered Product) be less than the following according to which [\*\*\*\*\*] such Licensed Product corresponds to:

(i) [\*\*\*\*\*]

(ii) [\*\*\*\*\*]

(iii) [\*\*\*\*\*]

(d) *Third Party Royalty Reduction/Minimum Royalty applicable in the event of CureVac having rights under the [\*\*\*\*\*] Patent Rights* If CureVac or its Affiliates or Sublicensees, in their reasonable judgment, consider it necessary or useful to obtain [\*\*\*\*\*] Patent Rights in order to develop, manufacture and/or commercialize a Licensed Product and CureVac does not obtain such rights from Acuitas under the Acuitas LNP Technology at no additional cost, then the amount of CureVac's royalty obligations under Sections 4.3(a) will be [\*\*\*\*\*] made by CureVac, its Affiliates or Sublicensees to Acuitas or any Third Party for such rights, provided that the Minimum Royalty payable to Acuitas in accordance with Section 4.3 (c) will not be less than as shown below and according to which [\*\*\*\*\*] such Licensed Product falls into. Provided however that CureVac or its Affiliates or Sublicensees cannot elect to take [\*\*\*\*\*] Patent Rights from a Third Party if such [\*\*\*\*\*] Patent Rights are included in rights from Acuitas under the Acuitas LNP Technology and provided to CureVac its Affiliates or Sublicensees at no additional cost. For greater clarity the minimum royalties owing to Acuitas as shown below are in respect of both royalty reductions arising under Section 4.3 (b) and/or arising under this Section 4.3(d):

(i) [\*\*\*\*\*]

(ii) [\*\*\*\*\*]

(iii) [\*\*\*\*\*]

In the event that [\*\*\*\*\*] Patent Rights are included in the Acuitas LNP Technology (i.e., are at no additional cost to CureVac) and Cover a Licensed Product then the Minimum Royalty payable to Acuitas in accordance with Section 4.3 (c) will not be less than the following according to which [\*\*\*\*\*] such Licensed Product corresponds to:

(i) [\*\*\*\*\*]

(ii) [\*\*\*\*\*]

(iii) [\*\*\*\*\*]

(e) *Term.* The royalty term ("Royalty Term") shall expire on a country-by-country and Licensed Product-by-Licensed Product basis, on the last to occur of (i) expiration of the last to expire Valid Claim in the Acuitas LNP Technology that, but for the license described herein from Acuitas to CureVac for the applicable Licensed Product, is infringed by the making, using or sale of such Licensed Product, (ii) expiration of any period of data exclusivity, market exclusivity or supplemental protection certificates covering the Licensed Product in such country; and (iii) ten (10) years after First Commercial Sale of Licensed Product in such country. For the avoidance of doubt, upon exhaustion of the obligation to pay Royalties to Acuitas as set forth above the continued use of Acuitas Know-How comprised in the LNP Technology for the development, manufacture and/or sale of the Licensed Product shall not, in and of itself, obligate CureVac to pay further royalties to Acuitas. Thereafter, CureVac's license under Section 2.1 will become irrevocable, fully paid-up and royalty-free on a country-by-country and Licensed Product-by-Licensed Product basis.

(f) *Blended Royalty.* The Parties acknowledge and agree that the Acuitas LNP Technology licensed under this License Agreement may justify royalty rates and/or Royalty Terms of differing amounts for the sale of Licensed Products in the Territory, depending on the number of LNP Technology Patents and their respective expiry. The Parties have determined in light of such considerations and for reasons of mutual convenience that blended royalty rates for the Acuitas LNP Technology licensed hereunder will apply during a single Royalty Term for sales of a Licensed Product in the Territory. Consequently, the Parties have agreed to adopt the royalty rates set forth in this Section 4.3 with respect to the sales of Licensed Products in the Territory as blended royalty rates.

4.4 Payment Terms.

(a) *Manner of Payment.* All payments to be made by CureVac hereunder will be made in U.S. dollars by wire transfer to such bank account as Acuitas may designate.

(b) *Records and Audits.* CureVac shall keep, and shall cause each of its Affiliates and Sublicensees, as applicable, to keep adequate books and records of accounting for the purpose of calculating all royalties payable to Acuitas hereunder. For the [\*\*\*\*\*] years next following the end of the calendar year to which each shall pertain, such books and records of accounting (including those of CureVac's Affiliates) shall be kept at each of their principal places of business and shall be open for inspection at reasonable times and upon reasonable notice by an independent certified accountant selected by Acuitas, and which is reasonably acceptable to CureVac, for the sole purpose of inspecting the royalties due to Acuitas under this License Agreement. In no event shall such inspections be conducted hereunder more frequently than once every [\*\*\*\*\*] months. Such accountant must have executed and delivered to CureVac and its Affiliates, a confidentiality agreement as reasonably requested by CureVac, which shall include provisions limiting such accountant's disclosure to Acuitas to only the results and basis for such results of such inspection. The results of such inspection, if any, shall be binding on both Parties. Any underpayments shall be paid by CureVac within [\*\*\*\*\*] days of notification of the results of such inspection. Any overpayments shall be fully creditable against amounts payable in subsequent payment periods. Acuitas shall pay for such inspections, except that in the event there is any upward adjustment in aggregate royalties payable for any calendar year shown by such inspection of more than [\*\*\*\*\*] of the amount paid, CureVac shall reimburse Acuitas for any reasonable out-of-pocket costs of such accountant.

(c) *Reports and Royalty Payments.* For as long as royalties are due under Section 4.3, CureVac shall furnish to Acuitas a written report for each Calendar Quarter, showing the amount of Net Sales of Licensed Products and royalty due for such Calendar Quarter. Reports shall be provided within [\*\*\*\*\*] days of the end of the Calendar Quarter for Net Sales generated by CureVac and its Affiliates, and within [\*\*\*\*\*] days of the end of the Calendar Quarter for Net Sales generated by Sublicensees. Royalty payments for each Calendar Quarter shall be due at the same time as the last such written report for the Calendar Quarter. The report shall include, at a minimum, the following information for the applicable Calendar Quarter, each listed by Licensed Product and by country of sale: (i) the number of units of Licensed Products sold by CureVac and its Affiliates and Sublicensees on which royalties are owed to Acuitas hereunder; (ii) the gross amount received for such sales; (iii) Net Sales; (iv) the amounts of any credits or reductions permitted by Section 4.3; and (v) the computations for any Acuitas currency conversions pursuant to subsection (d) below. CureVac will require each Sublicensee to share with Acuitas the information listed in the foregoing clauses as it relates to Net Sales made by such Sublicensee, and to the extent practicable, will include such Sublicensee information in such report. All such reports shall be treated as Confidential Information of CureVac. In the event of a Change of Control by an acquirer that is commercializing a Competitive Product, reports shall be limited to (iii) and (v) above.

(d) *Currency Exchange.* With respect to Net Sales invoiced in U.S. dollars, the Net Sales and the amounts due to Acuitas hereunder will be expressed in U.S. dollars. With respect to Net Sales invoiced in a currency other than U.S. dollars, payments will be calculated based on standard methodologies employed by CureVac or its Affiliates or Sublicensees for consolidation purposes for the Calendar Quarter for which remittance is made for royalties.

(e) *Taxes.* CureVac may withhold from payments due to Acuitas amounts for payment of any withholding tax that is required by Law to be paid to any taxing authority with respect to such payments. CureVac will provide Acuitas all relevant documents and correspondence, and will also provide to Acuitas any other cooperation or assistance on a reasonable basis as may be necessary to enable Acuitas to claim exemption from such withholding taxes and to receive a refund of such withholding tax or claim a foreign tax credit. CureVac will give proper evidence from time to time as to the payment of any such tax. The Parties will cooperate with each other in seeking deductions under any double taxation or other similar treaty or agreement from time to time in force. Such cooperation may include CureVac making payments from a single source in the U.S., where possible. Apart from any such permitted withholding and those deductions expressly included in the definition of Net Sales, the amounts payable by CureVac to Acuitas hereunder will not be reduced on account of any taxes, charges, duties or other levies.

(f) *Blocked Payments.* In the event that, by reason of applicable law in any country, it becomes impossible or illegal for CureVac or its Affiliates or Sublicensees to transfer, or have transferred on its behalf, payments owed to Acuitas hereunder, CureVac will promptly notify Acuitas of the conditions preventing such transfer and such payments will be deposited in local currency in the relevant country to the credit of Acuitas in a recognized banking institution designated by Acuitas or, if none is designated by Acuitas within a period of [\*\*\*\*\*] days, in a recognized banking institution selected by CureVac or its Affiliate or Sublicensee, as the case may be, and identified in a written notice given to Acuitas.

(g) *Interest Due.* If any payment due to Acuitas under this License Agreement is overdue (and is not subject to a good faith dispute), then CureVac will pay interest thereon (before and after any judgment) at an annual rate of the lesser of [\*\*\*\*\*] above the prime rate as reported in The Wall Street Journal, Eastern Edition, and the maximum rate permitted by applicable Law, such interest to run from the date upon which payment of such sum became due until payment thereof in full together with such interest.

(h) *Mutual Convenience of the Parties.* The royalty and other payment obligations set forth hereunder have been agreed to by the Parties for the purpose of reflecting and advancing their mutual convenience, including the ease of calculating and paying royalties and other amounts to Acuitas.

5. **Ownership and Inventorship of IP.**

**Solely-Owned IP.** As between the Parties, each Party will own and retain all right, title and interest in and to any and all Know-How and Patents arising therefrom that are discovered, created, conceived, developed or reduced to practice solely by or on behalf of such Party under or in connection with this License Agreement ("**Solely Owned IP**"). Subject to the licenses hereunder and the other terms and conditions of this License Agreement or any other agreement between the Parties, each Party will be solely responsible for the prosecution and maintenance, and the enforcement and defense, of any Patents within its Solely Owned IP.

6. **Patent Prosecution and Maintenance.**

6.1 **Generally.** As between the Parties and subject to Section 6.2 below, Acuitas (or its Third Party licensor, if any) will have the sole right, at its sole costs, to prosecute and maintain LNP Technology Patents, other than the Joint Interest Patents. Upon filing, Acuitas will provide CureVac with copies of all applications for all such LNP Technology Patents, and all other material submissions and correspondence with any patent authorities regarding such LNP Technology Patents, in sufficient time (not to be less than [\*\*\*\*\*] days) to allow for review and comment by CureVac. In addition, Acuitas will provide CureVac and its counsel with an opportunity to consult with Acuitas and its counsel regarding prosecution and maintenance of any such LNP Technology Patents, and Acuitas will not unreasonably refuse to address all reasonable comments timely made by or on behalf of CureVac. As between the Parties, CureVac will have the first right to prosecute and maintain any and all Joint Interest Patents and the Parties will share equally all costs incurred by CureVac in connection with such efforts. Upon filing, CureVac will provide Acuitas with copies of all applications for such Joint Interest Patents, and all other material submissions and correspondence with any patent authorities regarding such Joint Interest Patents, in sufficient time (not to be less than [\*\*\*\*\*] days) to allow for review and comment by Acuitas. In addition, CureVac will provide Acuitas and its counsel with an opportunity to consult with CureVac and its counsel regarding prosecution and maintenance of any such Joint Interest Patents, and CureVac will consider in good faith all reasonable comments timely made by or on behalf of Acuitas.

6.2 Election Not to Prosecute or Maintain or Pay Patent Costs.

(a) *By Acuitas.* If Acuitas elects not (i) to file, prosecute or maintain any LNP Technology Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay the Patent Costs associated with prosecution or maintenance of any such LNP Technology Patents then in each such case Acuitas will so notify CureVac, promptly in writing and in good time to enable Acuitas to meet any deadlines by which an action must be taken to preserve such LNP Technology Patent in such country, if CureVac so requests. Upon receipt of each such notice by Acuitas, CureVac will have the right, but not the obligation, to notify Acuitas in writing on a timely basis that Acuitas should continue the prosecution and/or maintenance of such LNP Technology Patent in the respective country, and thereafter, Acuitas would prosecute and maintain such LNP Technology Patent in such country at the sole direction of CureVac, Acuitas would make available to CureVac all documentation and correspondence with respect to such LNP Technology Patent, and CureVac would compensate the reasonable Patent Costs incurred by Acuitas in connection with such efforts, i.e., Patent Costs which Acuitas would not have had incurred if it had elected not to file, prosecute or maintain the respective LNP Technology Patent. CureVac's license to such LNP Technology Patent hereunder under Section 2.1 will be, irrevocable and royalty free, and such LNP Technology Patent will thereafter no longer be part of the Acuitas LNP Technology for purposes of this License Agreement. CureVac is entitled to discontinue the payment of Patent Costs for any LNP Technology Patents at any time, provided that it will so notify Acuitas in writing in time for such discontinuance.

(b) *By CureVac.* If CureVac elects not (i) to file, prosecute or maintain any Joint Interest Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents then in each such case CureVac will so notify Acuitas, promptly in writing and in good time to enable CureVac to meet any deadlines by which an action must be taken to preserve such Joint Interest Patent in such country at Acuitas' expense, if Acuitas so requests. Upon receipt of each such notice by CureVac, Acuitas will have the right, but not the obligation, to notify CureVac in writing on a timely basis that CureVac should transfer the prosecution or maintenance of such Joint Interest Patent to Acuitas and at Acuitas' sole expense and such LNP Technology Patent will thereafter no longer be part of the Acuitas LNP Technology for purposes of this License Agreement. Acuitas is entitled to discontinue the payment of Patent Costs for any Joint Interest Patents at any time, provided that it will so notify CureVac in writing in time for such discontinuance.

6.3 Patent Extensions. If any election for LNP Technology Patent term restoration or extension, supplemental protection certificate or any of their equivalents is to be made with respect to any LNP Technology Patent, then the Parties will discuss and seek to reach mutual agreement whether or not to take such action, provided that if the Parties are not able to reach mutual agreement within [\*\*\*\*\*] days, then CureVac will have the sole right to make the final decision whether or not to seek such patent term restoration or extension, supplemental protection certificate or any of their equivalents with respect to: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of conclusion of such discussions, [\*\*\*\*\*] and provided further that the exercise of such right by CureVac will not increase or otherwise change the rights or obligations of the Parties hereunder. Acuitas will have the sole right to make the final decision whether or not to seek Patent term restoration or extension, supplemental protection certificate or any equivalents for any product but the Licensed Products with respect to all other Patents within the Acuitas LNP Technology. Without the prior written consent of CureVac, Acuitas shall not apply for any term restoration or extension, supplemental protection certificate or any of their equivalents for any Licensed Product.

6.4 Regulatory Exclusivity Periods. With respect to any Patent listings required for any regulatory exclusivity periods for Licensed Products the Parties will discuss and seek to reach mutual agreement, subject to Applicable Law, on which LNP Technology Patents to list, provided that if the Parties are not able to agree within [\*\*\*\*\*] days, CureVac will have the right to make the final decision with respect to: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of conclusion of such discussions, [\*\*\*\*\*] and provided further that the exercise of such right by CureVac will not increase or otherwise change the rights or obligations of the Parties hereunder. Except where required under Applicable Law, without the written consent of CureVac, Acuitas will not apply for, and is not authorized under this Agreement to apply for, any Patent listings required for any regulatory exclusivity periods for any Licensed Product. For the avoidance of doubt, Acuitas is not restricted from applying for any Patent listings required for any regulatory exclusivity periods for any product but the Licensed Products.

6.5 Cooperation. Each Party will reasonably cooperate with the other Party in those activities involving the LNP Technology Patents set forth in Sections 6.1 to 6.4. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants and agents of CureVac and Acuitas and their respective Affiliates and Sublicensees to execute all documents, as reasonable and appropriate so as to enable such activities in respect of any such LNP Technology Patents in any country.

7. Patent Enforcement and Defense.

7.1 Notice. To the extent not in breach of an obligation of confidentiality, each Party will promptly notify, in writing, the other Party upon learning of any actual or suspected infringement of any LNP Technology Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any LNP Technology Patents, and will, along with such notice, supply the other Party with any evidence in its possession pertaining thereto.

7.2 Enforcement and Defense.

(a) *Enforcement.* As between the Parties, Acuitas (or its Third Party licensor, or licensee if any) will have the first right, but not the obligation, to seek to abate any infringement of the LNP Technology Patents by a Third Party, or to file suit against any such Third Party for such infringement *provided* that (i) Acuitas shall bear all the expense of such suit or abatement of infringement, and (ii) CureVac shall have the first right but not the obligation to take action or bring suit against such Third party infringer with respect to: (A) Joint Interest Patents; and/or (B) any other LNP Technology Patents that, on the date of first notice of such infringement, are necessary or useful [\*\*\*\*\*]; *provided* that CureVac shall bear all the expense of such suit or abatement of infringement. If the Party first responsible for such enforcement elects not to take action or to bring suit to prosecute such infringement or to continue such action or suit, it shall notify the other Party of such election within [\*\*\*\*\*] days after become aware of or receipt of the notice of the infringement or after the election to stop any such action or suit. If after the expiration of the [\*\*\*\*\*] days period (or, if earlier, the date upon which the responsible Party provides written notice that it does not plan to bring such action) the responsible Party has neither obtained a discontinuance of infringement nor filed suit against any such Third Party infringer of such Patent, then (i) in the case of an election by Acuitas (or its Third Party licensor, or licensee if any) not to prosecute an infringement of an LNP Technology Patent, CureVac shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, *provided* the infringement [\*\*\*\*\*] being the subject of this License Agreement, and further *provided* that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to prosecute an infringement of a Joint Interest Patents or LNP Technology Patent, Acuitas shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, *provided* that Acuitas shall bear all the expenses of such suit.

(b) *Defense.* As between the Parties, Acuitas (or is Third Party licensor or licensee, if any) will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging any LNP Technology Patents, other than: (i) Joint Interest Patents; and (ii) any other LNP Technology Patents that, on the date of first notice of such action, [\*\*\*\*\*], and as between the Parties, CureVac will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging Joint Interest Patents and/or such other LNP Technology Patents. If the Party first responsible for such defense does not take steps to defend within a commercially reasonable time, or elects not to continue any such defense (in which case it will promptly provide notice thereof to the other Party), then (i) in the case of an election by Acuitas (or its Third Party licensor, or licensee if any) not to defend an LNP Technology Patent, CureVac shall have the right, but not the obligation, to take defend any LNP Technology Patents that cover Licensed Product and no other product licensed or optioned by Acuitas to a Third Party or commercialized by Acuitas *provided* that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to defend the Joint Interest Patents, Acuitas shall have the right, but not the obligation, to take action or bring suit to defend such Patents, *provided* that Acuitas shall bear all the expenses of such suit.

(c) Notwithstanding the foregoing, any response to a Third Party infringer's counterclaim of invalidity or unenforceability of any LNP Technology Patents shall be controlled by the Party who controls the relevant enforcement proceeding pursuant to Section 7.2 (a) unless otherwise mutually agreed by the Parties.

(d) *Withdrawal, Cooperation and Participation.* With respect to any infringement or defensive action identified above in this Section 7.2 which may be controlled by either CureVac or Acuitas:

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 7.2.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and Sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those Patent Costs incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

(e) *Settlement.* Neither Party will settle or consent to an adverse judgment in any action described in this Section 7.2 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any LNP Technology Patents involved therewith, without the prior written consent of the other Party (such consent not to be unreasonably withheld or delayed).

(f) *Damages.* Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Acuitas and described in Section 7.2(a) or 7.2(b) in each case will be used first to reimburse the controlling Party, and thereafter the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be divided as follows:

- (i) To the extent such recovery reflects [\*\*\*\*\*]; and
- (ii) To the extent such recovery reflects reasonable [\*\*\*\*\*].

**8. Confidentiality.**

8.1 *Confidential Information.* Each Party ("Disclosing Party") may disclose to the other Party ("Receiving Party"), and Receiving Party may acquire during the course and conduct of activities under this License Agreement, certain proprietary or confidential information of Disclosing Party in connection with this License Agreement. The term "Confidential Information" means all information of any kind, whether in written, oral, graphical, machine-readable or other form, whether or not marked as confidential or proprietary, that are disclosed or made available by or on behalf of the Disclosing Party to the Receiving Party in connection with this License Agreement.

8.2 *Restrictions.* During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors, consultants and agents who have a need to know such Confidential Information in order to perform their obligations and exercise their rights under this License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Section 8.2. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

8.3 *Exceptions.* Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no fault or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information.

8.4 **Permitted Disclosures.** Receiving Party may disclose Disclosing Party's Confidential Information to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

- (a) in order and to the extent required to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (b) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing LNP Technology Patents in connection with Receiving Party's rights and obligations pursuant to this License Agreement; and
- (c) to acquirers or permitted assignees; investment bankers, investors and lenders, including potential acquirers, assignees, investment bankers, and lenders;
- (d) in the case of CureVac, to (i) subcontractors; or (ii) potential licensees or collaboration partners, but in case (ii) only such information that is reasonably necessary or useful for the potential licensee or partner to evaluate the applicable Licensed Product, and LNP/Licensed Product manufacturing processes, but excluding the particular chemical structure and formulation of any LNPs (which excluded information may be disclosed to such potential licensee or partner upon Acuitas' prior written consent);

provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party adequate time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsections (c) and (d), each of those entities are required to comply with the restrictions on use and disclosure in Section 8.2 (other than investment bankers, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

8.5 **Return of Confidential Information.** Upon expiry or earlier termination of this License Agreement, upon written request of a Party (such request, if made, to be made within three (3) months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under another License Agreement, if any, or as set forth in this License Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures.

8.6 **Publications.** Notwithstanding anything in this License Agreement to the contrary, CureVac is permitted to publish the results of its development under this License Agreement, provided, however, that it will not disclose Acuitas Confidential Information in any publication by CureVac of the results of any Licensed Product development by CureVac without Acuitas' prior written consent, which will not be unreasonably withheld, conditioned or delayed.

8.7 **Terms of this License Agreement; Publicity.** The Parties agree that the existence and terms of the Parties' relationship and this License Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 8.4. Except as required by Law, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this License Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

9. **Warranties; Limitations of Liability; Indemnification.**

9.1 **Representations and Warranties.** Each Party represents and warrants to the other as of the License Agreement Effective Date that:

- (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated,
- (b) it has the legal right and power to enter into this License Agreement, to extend the rights and licenses granted or to be granted to the other in this License Agreement, and to fully perform its obligations hereunder,
- (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this License Agreement and the performance of its obligations hereunder and
- (d) this License Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms.

9.2 **Additional Representations of Acuitas.** Except as set forth on **Appendix 9.2**, Acuitas hereby represents and warrants to CureVac as of the License Agreement Effective Date as follows:

(a) **Impairment.** Neither Acuitas nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that would in any way conflict with or impair the scope of any rights or licenses granted to CureVac hereunder, including under any of the agreements which Acuitas has identified to CureVac prior to the License Agreement Effective Date.

(b) **Patents.** **Appendix 1.1** sets forth a complete and accurate list of all LNP Technology Patents. Acuitas Controls, and will Control during the Term, the LNP Technology Patents listed on Appendix 1.1 and the Know-How within the Acuitas LNP Technology, and is entitled to grant the licenses specified herein. To Acuitas' knowledge, the LNP Technology Patents have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the LNP Technology Patents is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Acuitas' knowledge as of the License Agreement Effective Date, no Acuitas LNP Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the License Agreement Effective Date, neither Acuitas nor any of its Affiliates has received any notice alleging that the LNP Technology Patents are invalid or unenforceable, or challenging Acuitas' ownership of or right to use any such rights.

(c) *Entire LNP Technology.* The Acuitas LNP Technology licensed to CureVac under this License Agreement comprises all Technology owned or in-licensed by Acuitas which is required to develop, manufacture and commercialize the Licensed Products.

(d) *Encumbrances.* Acuitas and its Affiliates are not subject to any payment obligations to Third Parties as a result of the execution or performance of this License Agreement. As of the License Agreement Effective Date, neither Acuitas nor any of its Affiliates has granted any liens or security interests on the Acuitas LNP Technology, and the Acuitas LNP Technology as licensed hereby is free and clear of any mortgage, pledge, claim, security interest, covenant, easement, encumbrance, lien or charge of any kind.

(e) *Defaults.* The execution, delivery and performance by Acuitas of this License Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which Acuitas is a party or by which it is bound, including each of the agreements which Acuitas has identified to CureVac prior to the License Agreement Effective Date, in each case as would reasonably be expected to have a material adverse effect on the rights granted to CureVac hereunder.

(f) *Litigation.* There is no action, suit, proceeding or investigation pending or, to the knowledge of Acuitas, currently threatened in writing against or affecting Acuitas that questions the validity of this License Agreement or the right of Acuitas to enter into this License Agreement or consummate the transactions contemplated hereby or that relates to the Acuitas LNP Technology.

(g) *Infringement.* Neither Acuitas nor any of its Affiliates has received any notice of any claim, nor does Acuitas or its Affiliates have any knowledge of any basis for any claim, that any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Acuitas LNP Technology in connection with the production, use, research, development, manufacture or commercialization of any Licensed Product.

(h) *Third Party Infringement.* To Acuitas' knowledge, no Third Party is infringing or has infringed any Patent within the Acuitas LNP Technology or is misappropriating or has misappropriated any Know-how within the Acuitas LNP Technology.

9.3 *Disclaimers.* Without limiting the respective rights and obligations of the Parties expressly set forth herein, each Party specifically disclaims any guarantee that any Licensed Product will be successful, in whole or in part. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED IN THIS LICENSE AGREEMENT, THE PARTIES MAKE NO REPRESENTATIONS AND EXTEND NO WARRANTY OF ANY KIND UNDER THIS LICENSE AGREEMENT, EITHER EXPRESS OR IMPLIED.

9.4 No Consequential Damages. NOTWITHSTANDING ANYTHING IN THIS LICENSE AGREEMENT OR OTHERWISE, NEITHER PARTY WILL BE LIABLE TO THE OTHER OR ANY THIRD PARTY WITH RESPECT TO ANY SUBJECT MATTER OF THIS LICENSE AGREEMENT FOR ANY INDIRECT, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES; PROVIDED THAT THIS SECTION 9.4 WILL NOT APPLY TO BREACHES OF A PARTY'S OBLIGATIONS OR UNDER ARTICLE NINE OR THE PARTIES' INDEMNIFICATION RIGHTS AND OBLIGATIONS UNDER SECTION 9.6.

9.5 Performance by Others. The Parties recognize that each Party may perform some or all of its obligations under this License Agreement through Affiliates and permitted subcontractors provided, however, that each Party will remain responsible and liable for the performance by its Affiliates and permitted subcontractors and will cause its Affiliates and permitted subcontractors to comply with the provisions of this License Agreement in connection therewith.

9.6 Indemnification.

(a) Indemnification by CureVac. CureVac will indemnify Acuitas, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "Acuitas Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the Acuitas Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any provision of this License Agreement; (ii) any negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) the development or commercialization by or on behalf of CureVac or any of its Affiliates or Sublicensees of Licensed Product other than if related to an LNP component thereof, except in each case (i)-(iii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of an Acuitas Indemnitee or Acuitas' breach of this License Agreement.

(b) Indemnification by Acuitas. Acuitas will indemnify CureVac, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against CureVac Indemnitees to the extent arising from or occurring as a result of: (i) the breach by Acuitas of any provision of this License Agreement; or (ii) any negligence or willful misconduct on the part of any Acuitas Indemnitee, except in each case (i) and (ii) to the extent arising from or occurring as a result of the negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this License Agreement.

(c) Notice of Claim. All indemnification claims provided for in Sections 9.6(a) and 9.6(b) will be made solely by such Party to this License Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under Section 9.6(a) and 9.6(b), but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and estimated amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

(d) *Defense, Settlement, Cooperation and Expenses.*

(i) *Control of Defense.* At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified Party within [\*\*\*\*\*] days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will immediately deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) *Right to Participate in Defense.* Without limiting Section 9.6(d)(i), any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to employ counsel of its choice for such purpose; provided, however, that such employment will be at the Indemnified Party's own cost and expense unless (i) the indemnifying Party has failed to assume the defense and employ counsel in accordance with Section 9.6(d)(i) (in which case the Indemnified Party will control the defense) or (ii) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any such costs and expenses of counsel for the Indemnified Party.

(iii) *Settlement.* With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with Section 9.6(d)(i), the indemnifying Party will have authority to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (such consent not to be unreasonably withheld, delayed or conditioned). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the prior written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party, such consent not to be unreasonably withheld, delayed or conditioned.

(iv) *Cooperation.* Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, the Indemnified Party will, and will cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith, at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.

(v) *Costs and Expenses.* Except as provided above in this Section 9.6(d), the costs and expenses, including attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

9.7 *Insurance.* Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program (including product liability insurance) to protect against potential liabilities and risk arising out of activities to be performed under this License Agreement, and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this License Agreement. Subject to the preceding sentence, such liability insurance or self-insurance program will insure against all types of liability, including personal injury, physical injury or property damage arising out of the manufacture, sale, use, distribution or marketing of Licensed Product. The coverage limits set forth herein will not create any limitation on a Party's liability to the other under this License Agreement.

**10. Term and Termination.**

10.1 Term. This License Agreement will commence as of the License Agreement Effective Date and, unless sooner terminated in accordance with the terms hereof or by mutual written consent, will continue on a Licensed Product-by-Licensed Product and a country-by-country basis, until there are no more payments owed Acuitas in such country (the longest such period of time hereunder, the "Term"). Upon there being no more such payments hereunder in such country, the license contained in Section 2.1 will become fully paid up and will remain in effect with respect to such Licensed Product in such country.

**10.2 Termination by Acuitas.**

(a) *Breach.* Acuitas will have the right to terminate this License Agreement in full upon delivery of written notice to CureVac in the event of any material breach by CureVac of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] days after written notice thereof is given by Acuitas to CureVac specifying the nature of the alleged breach.

(b) *Disputed Breach.* If CureVac disputes in good faith the existence or materiality of a breach specified in a notice provided in accordance with Section 10.2(a), and CureVac provides Acuitas notice of such dispute within such [\*\*\*\*\*] day period, then Acuitas shall not have the right to terminate this License Agreement under Section 10.2(a) unless and until it is finally determined, in accordance with Section 11.1, that CureVac has materially breached this License Agreement and that CureVac fails to cure such breach within [\*\*\*\*\*] days following such decision. It is understood and agreed that during the pendency of such dispute, all of the terms and conditions of this License Agreement shall remain in effect and the Parties shall continue to perform all of their respective obligations hereunder. During the pendency of any such dispute, CureVac shall pay to Acuitas all Acuitas Milestone payments and royalty payments set forth herein.

**10.3 Termination by CureVac.**

(a) *Breach.* CureVac will have the right to terminate this License Agreement in full upon delivery of written notice to Acuitas in the event of any material breach by Acuitas of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] days after written notice thereof is given by CureVac to Acuitas specifying the nature of the alleged breach.

(b) *Discretionary Termination.* CureVac will have the right (i) to terminate this License Agreement in full at its discretion for any reason by delivering written notice to Acuitas, such termination to be effective [\*\*\*\*\*] days following the date of such notice..

(c) *Alternative to Termination Under Section 10.3(a).* If CureVac has the right to terminate this License Agreement under Section 10.3(a) as a result of a material breach by Acuitas (including following expiration of all applicable cure periods thereunder) that fundamentally impairs the value of CureVac's rights hereunder with respect to the Licensed Target, then CureVac may, in lieu of exercising such termination right, elect by written notice to Acuitas before the end of such applicable cure period to have this License Agreement continue in full force and effect for the Term, provided that the following will apply: starting immediately after the end of such applicable cure period, CureVac may [\*\*\*\*\*] the Acuitas Milestone Payments and the royalty rates set forth in Article Four. In the event Acuitas notifies CureVac within [\*\*\*\*\*] days of receipt of CureVac's notice that Acuitas reasonably and in good-faith disputes CureVac's right to terminate this License Agreement pursuant to Section 10.3(a), CureVac shall instead deposit [\*\*\*\*\*] of such Acuitas Milestone Payments and royalty payments into an escrow account maintained by a mutually agreeable Third Party pending the resolution of such dispute in accordance with Section 11.1. In the event that it is established through the dispute resolution process that CureVac did have the right to terminate this License Agreement under Section 10.3(a), then the escrowed funds shall be released to CureVac and the [\*\*\*\*\*] shall apply going forward. In the event that it is established through the dispute resolution process that CureVac did not have the right to terminate this License Agreement under Section 10.3(a), then the escrowed funds shall be released to Acuitas, with interest, and CureVac shall resume full payment under this License Agreement (i.e., as if [\*\*\*\*\*] had been made pursuant to this Section 10.3(c)).

10.4 Termination Upon Bankruptcy.

All rights and licenses granted under or pursuant to this License Agreement by Acuitas are, and will otherwise be deemed to be, for purposes of Section 65.11(7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act, R.S.C. 1985, c. C-36 (the "Insolvency Legislation"), a grant of "right to use intellectual property" as used in the Insolvency Legislation. The Parties agree that CureVac and its Affiliates and Sublicensees, as licensees of such rights under this License Agreement, will retain and may fully exercise all of their rights and elections under the Insolvency Legislation subject to the payment of amounts provided for herein. Without limiting CureVac's rights under the Insolvency Legislation, if Acuitas becomes insolvent or makes an assignment for the benefit of its creditors or there is filed by or against the Acuitas any bankruptcy, receivership, reorganization or similar proceeding (an "Insolvency Event") pursuant to or under the Insolvency Legislation or otherwise, CureVac shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of Acuitas, shall be promptly delivered to it (i) before this License Agreement is rejected by or on behalf of Acuitas, within [\*\*\*\*\*] days after CureVac's written request, unless Acuitas, or its trustee or receiver, elects within [\*\*\*\*\*] days to continue to perform all of its obligations under this License Agreement, or (ii) after any rejection of this License Agreement by or on behalf of Acuitas, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 10.4(b) and under Section 65.11(7) of the Bankruptcy and Insolvency Act, R.S.C. 1985, c. B-3 and Section 32(6) of the Companies' Creditors Arrangement Act are in addition to and not in substitution of any and all other rights, powers, and remedies that each party may have under this License Agreement, the Insolvency Legislation, and any other applicable Laws. CureVac shall have the right to perform the obligations of Acuitas hereunder with respect to such intellectual property, but neither such provision nor such performance by CureVac shall release Acuitas from any such obligation or liability for failing to perform it.

10.5 Effects of Termination. Upon termination (but not expiration pursuant to Section 10.1) of this License Agreement for any reason:

- (a) *Termination for Acuitas' Breach.* In the event of a termination by CureVac for Acuitas' breach, the rights and licenses granted to CureVac under this License Agreement shall become perpetual and irrevocable and survive the termination of this License Agreement.
- (b) *Cessation of Rights.* Except as otherwise expressly provided herein, including in Sections 8.5, 10.5(a) and 10.5(c), all rights and licenses granted by Acuitas to CureVac in Section 2.1 will terminate.
- (c) *Sell Off.* Notwithstanding the termination of CureVac's licenses and other rights under this License Agreement, CureVac shall retain the right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products, in each case that is intended for distribution, sale or disposition in the Territory, for a period of not more than three (3) months following the date of the effective termination, as though this License Agreement had not been terminated, and such distribution, sale or other disposition shall not constitute infringement of the Patents or other intellectual property or proprietary rights of Acuitas or its Affiliates. CureVac's right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products pursuant to this Section 10.5 (c) shall be subject to CureVac's continuing obligation to pay royalties with respect to the Net Sales.

10.6 Survival. In addition to the termination consequences set forth in Section 10.5, the following provisions will survive termination or expiration of this License Agreement: Articles 1 and 8 and Sections 4.4, 5.1, 9.3, 9.4, 9.6, 9.7, 10.4, 10.5, 10.6, 11.1, 11.2, 11.5, 11.7, 11.8, 11.9, 11.10, 11.11 and 11.12. Termination or expiration of this License Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at law or in equity with respect to any breach of this License Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this License Agreement.

## 11. General Provisions.

### 11.1 Dispute Resolution.

- (a) *Disputes.* Disputes arising under or in connection with this License Agreement will be resolved pursuant to this Section 11.1; provided, however, that in the event a dispute cannot be resolved without an adjudication of the rights or obligations of a Third Party (other than any CureVac Indemnitees or Acuitas Indemnitees identified in Section 9.6), the dispute procedures set forth Sections 11.1(c) and 11.1(c) will be inapplicable as to such dispute.
- (b) *Dispute Escalation.* In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves. In the event that such dispute is not resolved on an informal basis within [\*\*\*\*\*] days, any Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive), who will attempt in good faith to resolve such dispute by negotiation and consultation for a [\*\*\*\*\*] day period following receipt of such written notice

(c) *Dispute Resolution.* In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be London, England. The number of mediators will be one (1). The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] days following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration. Any dispute relating to the validity performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 11.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be London, England. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

(d) *Injunctive Relief.* Notwithstanding the dispute resolution procedures set forth in this Section 11.1, in the event of an actual or threatened breach hereunder, the aggrieved Party may seek equitable relief (including restraining orders, specific performance or other injunctive relief) in any court or other forum, without first submitting to any dispute resolution procedures hereunder.

(e) *Tolling.* The Parties agree that all applicable statutes of limitation and time-based defenses (such as estoppel and laches) will be tolled while the dispute resolution procedures set forth in this Section 11.1 are pending, and the Parties will cooperate in taking all actions reasonably necessary to achieve such a result.

(f) *Prevailing Party.* The prevailing Party in any arbitration under Section 11.1(c) or any other suit related to this License Agreement will be entitled to recover from the losing Party all out-of-pocket fees, costs and expenses (including those of attorneys, professionals and accountants and all those arising from appeals and investigations) incurred by the prevailing Party in connection with such arbitration or suit.

11.2 *Cumulative Remedies and Irreparable Harm.* All rights and remedies of the Parties hereunder will be cumulative and in addition to all other rights and remedies provided hereunder or available by agreement, at Law or otherwise. Each Party acknowledges and agrees that breach of any of the terms or conditions of this License Agreement may cause irreparable harm and damage to the other and that such damage may not be ascertainable in money damages and that as a result thereof the non-breaching Party may be entitled to seek from a court equitable or injunctive relief restraining any breach or future violation of the terms contained herein by the breaching Party without the necessity of proving actual damages or posting bond. Such right to equitable relief is in addition to whatever remedies either Party may be entitled to as a matter of Law or equity, including money damages.

11.3 *Relationship of Parties.* Nothing in this License Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied third party beneficiaries hereunder (except for CureVac Indemnitees and Acuitas Indemnitees for purposes of Section 9.6). For clarity, CureVac does not grant to Acuitas any rights or licenses under this License Agreement to any CureVac technology or intellectual property rights.

11.4 **Compliance with Law.** Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

11.5 **Governing Law.** This License Agreement will be governed by and construed in accordance with the Laws of England and Wales, without respect to its conflict of Laws rules, provided that any dispute relating to the scope, validity, enforceability or infringement of any Patents or Know-How will be governed by, and construed and enforced in accordance with, the substantive Laws of the jurisdiction in which such Patents or Know-How apply.

11.6 **Counterparts; Facsimiles.** This License Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this License Agreement by either Party will constitute a legal, valid and binding execution and delivery of this License Agreement by such Party.

11.7 **Headings.** All headings in this License Agreement are for convenience only and will not affect the meaning of any provision hereof.

11.8 **Waiver of Rule of Construction.** Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this License Agreement. Accordingly, the rule of construction that any ambiguity in this License Agreement will be construed against the drafting party will not apply.

11.9 **Interpretation.** Whenever any provision of this License Agreement uses the term “including” (or “includes”), such term will be deemed to mean “including without limitation” (or “includes without limitations”). “Herein,” “hereby,” “hereunder,” “hereof and other equivalent words refer to this License Agreement as an entirety and not solely to the particular portion of this License Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Appendices in this License Agreement are to Sections and Appendices of this License Agreement. References to any Sections include Sections and subsections that are part of the related Section.

11.10 **Binding Effect.** This License Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

11.11 **Assignment.** This License Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this License Agreement, except as expressly permitted hereunder or otherwise without the prior written consent of the other Party, which consent will not be unreasonably withheld; provided that either Party may assign this License Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this License Agreement (whether by merger, consolidation or otherwise).

11.12 **Notices.** All notices, requests, demands and other communications required or permitted to be given pursuant to this License Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid to the following addresses:

If to CureVac: CureVac AG  
Paul-Ehrlich-Str. 15

Attention: [\*\*\*\*\*]

Either Party may change its designated address by notice to the other Party in the manner provided in this Section 11.12.

11.13 **Amendment and Waiver.** This License Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

11.14 **Severability.** In the event that any provision of this License Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the License Agreement to preserve (to the extent possible) their original intent.

11.15 **Entire Agreement.** This License Agreement together with the Development and Option Agreement and any other license agreements entered into during the Term pursuant to the Development and Option Agreement are the sole agreement with respect to the subject matter hereof and supersedes all other agreements and understandings between the Parties with respect to same.

11.16 Force Majeure. Neither Acuitas nor CureVac will be liable for failure of or delay in performing obligations set forth in this License Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Acuitas or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

## EXECUTION COPY

## SIDE AGREEMENT AND AMENDMENT NUMBER ONE

to the

## DEVELOPMENT AND OPTION AGREEMENT

THIS SIDE AGREEMENT AND AMENDMENT ("**Amendment Agreement**") to the DEVELOPMENT AND OPTION AGREEMENT is entered into effective as of December 1, 2016 (the "**Amendment One Date**"), by and between ACUITAS THERAPEUTICS INC., with offices at 2714 West 31<sup>st</sup> Avenue, Vancouver, British Columbia, V6L 2A1, Canada ("**Acuitas**"), and CUREVAC AG, a company incorporated in Germany whose registered office is at Paul-Ehrlich-Straf3e 15, 72076 Tübingen, Germany ("**CureVac**").

RECITALS

**WHEREAS**, Acuitas and CureVac entered into that certain Development and Option Agreement effective April 29th 2016 (the "**D&O Agreement**") relating to the evaluation of and options to licence Acuitas LNP Technology for the research, development, manufacture and/or commercialisation of products incorporating Acuitas LNP Technology and CureVac Technology;

**WHEREAS**, both Acuitas and CureVac desire to include in the Work Plan the evaluation of Acuitas LNP Technology together with CureVac Technology relating to Gene Editing; and

**WHEREAS**, to enable the prompt commencement of such evaluation both Acuitas and CureVac desire to agree to certain side terms and conditions to, and to make certain amendments to the provisions of, the D&O Agreement so that a limited such evaluation may be commenced.

**NOW, THEREFORE**, in consideration of the mutual covenants and representations contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

AGREEMENT1. **Definitions.**

- 1.1. "**DNA Sequence**" means, for the purpose of this Amendment Agreement only, any sequence of DNA [\*\*\*\*\*] as such DNA Sequence(s) and Gene Target(s) are specified in Exhibit 3.1 or are subsequently reserved in accordance with Paragraph 2.3 hereof.
  - 1.2. "**Gene Target**" means, for the purpose of this Amendment Agreement only [\*\*\*\*\*] and/or pre-defined variants thereof, as such coding or non-coding sequence(s) and/or variant(s) are specified in Exhibit 3.1 or are subsequently reserved in accordance with Paragraph 2.3 hereof.
-

- 1.3. “**DNA Editing Protein**” means, for the purpose of this Amendment Agreement only, a Target encoded by an mRNA that upon delivery to a cell or micro-organism is intended to Gene Edit a human, animal, microorganism or virus coding or non-coding sequence within the genome of the human or animal cell, or microorganism or virus.
  - 1.4. “**Gene Edit**” means, for the purpose of this Amendment Agreement only, to correct, modify, insert, delete, activate, inactivate or repair a coding or non-coding sequence within the genome of a human or animal cell, or microorganism or virus; and “**Gene Editing**” has the corresponding meaning.
  - 1.5. “**Guide RNA**” means, for the purpose of this Amendment Agreement only, [\*\*\*\*\*]
  - 1.6. The definition of “**Approved Partner**” in Section 1.11 of the D&O Agreement shall be replaced in its entirety by the following:

“1.11 “**Approved Partner**” means with respect to any Third Party to whom CureVac wishes to disclose Acuitas Confidential Information or transfer Acuitas LNP Technology or Materials provided by Acuitas to CureVac: (i) any Third Party licensee of CureVac Technology; (ii) any Third Party providing services set forth in the Work Plan to CureVac; or (iii) [\*\*\*\*\*].”
  - 1.7. All capitalised terms used in this Amendment Agreement and not otherwise defined in this Amendment Agreement have the meanings assigned them in the D&O Agreement.
2. **Target Reservation.**
- 2.1. On the Amendment One Date, the DNA Editing Protein [\*\*\*\*\*] on the Reserved Target List as a non-exclusive Target.
  - 2.2. Until the conclusion of the Gene Editing Work Plan, CureVac hereby covenants to not submit any Target Notice for any other DNA Editing Protein.
  - 2.3. In addition to the DNA Editing Protein Target, for the purpose of this Amendment Agreement only CureVac may non-exclusively reserve up to [\*\*\*\*\*] Gene Targets, and optionally up to [\*\*\*\*\*] DNA Sequences for each Gene Target, in each case at [\*\*\*\*\*]. The DNA Editing Protein Target counts as a single Reserved Target, however, [\*\*\*\*\*] available to CureVac under Article 4 of the D&O Agreement. CureVac will however be required to submit to the Escrow Agent for clearance and reservation all Gene Targets and DNA Sequences in accordance with Gene Target/DNA Sequence preclearance and reservation requirements analogous to those set forth for Targets in Sections 4.2 of the D&O Agreement.
3. **Program extension and Work-Plan for Gene Editing.**
- 3.1. The Parties hereby append Exhibit 3.1 (the “**Gene Editing Work Plan**”) as attached to this Amendment Agreement to the Work-Plan.
-

- 3.2. On the Amendment One Date, the Gene Editing Work Plan relates: (i) only to the use of [\*\*\*\*\*] as a DNA Editing Protein; and (ii) only to the Gene Targets and (iii) only to the DNA Sequences, such Gene Targets and DNA Sequences having been pre-cleared by the Escrow Agent by a mechanism analogous to that set forth in Section 4.2 of the D&O Agreement.
- 3.3. Acuitas hereby acknowledges that certain parts of the Gene Editing Work Plan include the evaluation of: (i) LNPs containing [\*\*\*\*\*] mRNA Constructs intended to express the DNA Editing Protein [\*\*\*\*\*] without containing [\*\*\*\*\*] Guide RNA(s), and/or without containing [\*\*\*\*\*] DNA Sequences; and (ii) separate LNPs containing [\*\*\*\*\*] Guide RNA(s), and/or containing [\*\*\*\*\*] DNA Sequences, in each case without containing said mRNA Construct(s), although the LNPs of (ii) are intended to be evaluated only in connection with those of (i).
- 3.4. Until the conclusion of the Gene Editing Work Plan, CureVac hereby covenants to neither: (i) submit any additional DNA Editing Proteins for pre-clearance by the Escrow Agent; nor (ii) change the scope of the Gene Editing Work Plan beyond that stated in (i) to (iii) of Paragraph 3.2 hereof, without obtaining the prior consent of Acuitas, such consent not to be unreasonably withheld or conditioned.
- 3.5. For the period during which [\*\*\*\*\*] is on the Reserved Target List, Acuitas hereby covenants not to provide any Third Party with any exclusive right, or option to obtain any exclusive right, under the Acuitas LNP Technology that would prevent CureVac from taking non-exclusive rights to any Gene Target or DNA Sequence which has been reserved in accordance with Section 2.3.
- 3.6. The second to last sentence of Section 3.4 of the D&O Agreement shall be replaced in its entirety by the following:
- “CureVac shall use commercially reasonable efforts to obtain the foregoing assignment for Approved Partners, and if CureVac is unable to obtain such assignment, CureVac shall obtain: (x) [\*\*\*\*\*]; or (y) [\*\*\*\*\*], or seek to protect any such Know-How by any other form of intellectual property, without prior written permission from CureVac. CureVac shall not give such permission without the prior consent of Acuitas, such consent not to be unreasonably withheld or conditioned.”
4. **Licensed Product Option for Gene Editing.** Acuitas and CureVac shall discuss and negotiate in good faith, for the duration of the Gene Editing Work Plan, on the terms and conditions under which the D&O Agreement (and associated License Agreements) will be amended to encompass Licensed Products useful for Gene Editing for the purposes of Article 5 CureVac License Options; it being hereby agreed between the Parties that, with reference to the D&O Agreement (and associated License Agreements) on the Amendment One Date, the financial terms (including reservation costs, option exercise fees, milestones and royalties applied to any such Licensed Products useful for Gene Editing will be consistent with the corresponding financial terms already provided for in the D&O Agreement (and associated License Agreements) *provided*, that: (i) [\*\*\*\*\*] (ii) [\*\*\*\*\*] will be applied for Guide RNAs (with the applicability of such reservation costs for multiple Gene Targets to be discussed during such negotiations); and (iii) each DNA Editing Protein as a Target will count as a single Reserved Target, [\*\*\*\*\*] Reserved Targets available to CureVac under Article 4 of the D&O Agreement. For clarity, the terms “DNA Sequence” and “Gene Target” (and correspondingly, “Guide RNA”), as used in this Paragraph 4, will not be limited to those sequences specified in Exhibit 3. I hereof, but will be redefined by such amendment based on the definitions herein.
-

5. **Amendment of Section 3.5(c) of the D&O Agreement.**

5.1. Section 3.5(c) of the D&O Agreement is hereby amended to add the following at the end of such section:

“Acuitas shall not be required to maintain the licenses to In-Licensed Technology with respect to which CureVac shall not have exercised the option set forth in this subsection (c). Accordingly, Acuitas is free to enter into new licenses and modify or terminate existing licenses to any In-Licensed Technology until such time as it is licensed to CureVac; *provided*, that Acuitas has given CureVac at least [\*\*\*\*\*] days’ prior written notice of any modification or termination of any existing license to any In-Licensed Technology, such notice to specify the In-Licensed Technology to be modified or terminated. The parties acknowledge that any exercise of a sublicense to any In-Licensed Technology must be in accordance with the terms of Acuitas’ main Third Party license agreement.”

5.2. Acuitas represents and warrants that, on the Amendment One Date, it has no intent to immediately modify or terminate any existing license to any In-Licensed Technology to which CureVac has the option under Section 3.5(c) of the D&O Agreement.

6. **Miscellaneous.**

6.1. Except as expressly stated in this Amendment Agreement, the D&O Agreement remains unchanged and in full force and effect.

6.2. The provisions of ARTICLE IO of the D&O Agreement shall be applied by analogy to this Amendment Agreement.

---

IN WITNESS WHEREOF, the Parties have caused Amendment Agreement to be executed by their respective duly authorised officers as of the Amendment One Date.

EXHIBIT 3.1: Gene Editing Work Plan

[\*\*\*\*\*]

---

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

## DEVELOPMENT AND INTELLECTUAL PROPERTY AGREEMENT

**THIS DEVELOPMENT AND INTELLECTUAL PROPERTY AGREEMENT** (the “**Agreement**”) is effective as of November 24, 2015 (the “**Effective Date**”), by and between **TESLA GROHMANN AUTOMATION GMBH**, a company established under the laws of Germany with offices at Rudolf-Diesel-Straße 14, 54595 Prüm (“**TGA**”), and **CUREVAC AG**, a German stock corporation with its principal place of business located at Paul-Ehrlich-Straße 15, 72076 Tübingen, Germany (“**CureVac**”). CureVac and TGA are each referred to herein as a “**Party**” and collectively as the “**Parties**.”

## PREAMBLE

WHEREAS, CureVac is a biotechnology company that is a pioneer and technology leader in mRNA-based pharmaceutical products and vaccination approaches using its RActive® technology. CureVac discovers, designs and develops first-in-class mRNA vaccines and therapies for the treatment of diseases with unmet medical need. CureVac has substantial knowledge and expertise in the area of the messenger RNA technology;

WHEREAS, TGA has intellectual property and more than thirty years of expertise in the engineering, development and manufacturing of state-of-the-art automation solutions for processes in the automotive, consumer electronics, and biotechnological industry;

WHEREAS, CureVac wishes for TGA to perform services and deliver products as defined in one or more Approved Work Orders, and TGA is willing to perform such services and deliver such products;

WHEREAS, the Parties have planned [\*\*\*\*\*] for development - including (i) the [\*\*\*\*\*] further detailed in [\*\*\*\*\*] (“**Work Order I**,” enclosed herewith as **Annex 1**) and (ii) the [\*\*\*\*\*] as described in [\*\*\*\*\*] (“**Work Order II**,” enclosed herewith as **Annex 2**) - and may agree to additional phases of development in connection herewith; and

WHEREAS, TGA and CureVac wish to allocate rights in any Intellectual Property developed in connection with the Work under this Agreement as set forth herein;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereto, intending to be legally bound, agree as follows:

## 1) DEFINITIONS AND INTERPRETATION.

1.1 Definitions. Terms used herein with initial capitalization have the meanings specified below or where used in this Agreement:

- (a) “**Acceptance**” or “**Accepted**” shall have the meaning set forth in § 640 BGB (German Civil Code) and shall relate to both the Deliverable(s) and the Engineering Report I in **Annex 1**.
- (b) “**Affiliate(s)**” means and includes with respect to any Party, (i) any legal entity of which the securities or other ownership interests representing fifty percent (50%) or more of the equity or fifty percent (50%) or more of the ordinary voting power or fifty percent (50%) or more of the general partnership interest are, at the time such determination is being made, owned, controlled or held, directly or indirectly, by such legal entity, or (ii) any legal entity which, at the time such determination is being made, is controlling or under common control with, such Party. As used in this definition, the term “control”, whether used as a noun or verb, refers to the possession, directly or indirectly, of the power to direct, or cause the direction of, the management or policies of a legal entity, whether through the ownership of voting securities, by contract or otherwise. Notwithstanding the foregoing, with respect to CureVac, Affiliate shall not include Mr. Dietmar Hopp or dievini Hopp BioTech Holding GmbH & Co. KG, or any other person controlled by Mr. Dietmar Hopp or dievini Hopp BioTech Holding GmbH & Co. KG (other than CureVac or its Affiliates other than the foregoing).

- (c) **“Approved Work Order”** means a Work Order that describes certain Work that TGA and CureVac will perform in connection with this Agreement and that is approved in writing by authorized representatives of both Parties.
- (d) **“Background IP”** means, collectively, the CureVac Background IP and the TGA Background IP.
- (e) **“Claim”** means any demand, or any civil, criminal, administrative or investigative claim, action or proceeding (including arbitration) asserted, commenced or threatened against an entity or person by a Third Party.
- (f) **“Commercially Reasonable Efforts”** means taking all such steps and performing in such a manner as a well-managed and diligent company would undertake where it was acting in a determined, prudent and reasonable manner to achieve a particular desired result for its own benefit.
- (g) **“Confidential Information”** as defined in Annex 4.
- (h) **“CureVac Background IP”** means, collectively, (i) any and all Intellectual Property or Know-How that was created, conceived, acquired, owned, or controlled by CureVac and/or any Affiliate of CureVac prior to the Effective Date of the Agreement and (ii) any and all Intellectual Property or Know-How that is created, conceived, acquired, owned, or controlled by CureVac and/or any Affiliate of CureVac, independently from TGA and TGA's Confidential Information, after the Effective Date of the Agreement which is independent of, and not derived from, the Parties' efforts under this Agreement, excluding Joint Inventions and Joint IP, both (i) and (ii) being reasonably necessary or useful for the development, manufacturing and commercialization of the Deliverables and/or Machine in accordance with this Agreement and/or to practice the Joint IP.
- (i) **“Development Fee”** has the meaning given in Section 10.3(a) below.
- (j) **“Development Fee Period”** has the meaning given in Section 10.3(b) below.
- (k) **“Deliverable”** means, any (tangible) result of Work which includes collectively, the machinery, controllers, computers, component parts, materials, drawings, manuals, and other personal property specifically identified as a TGA deliverable in an Approved Work Order, and may include prototypes and/or final manufacturing versions of the foregoing.
- (l) **“Engineering Report”** means the final Deliverable under Work Order 1 (see page 18 of **Annex 1**), including the “Feinkonzept”.
- (m) **“Intellectual Property”** means (i) Patents, trade names, trademarks, copyright, trade dress, industrial and other designs, rights in Confidential Information, Know-How, and other forms of intellectual property throughout the world, all whether or not registered or protected, or capable of such registration or protection (ii) all applications (or rights to apply) for, and renewals or extensions of, any of the rights described in the foregoing clause (i) and (ii) and all rights and applications that are similar or equivalent to the rights and application described in the foregoing clauses (i) and (ii), which exist now, or which come to exist in the future, in any part of the world.
- (n) **“IP Milestone Fee”** has the meaning given in Section 10.3(a)(ii) below.
- (o) **“IP Milestone Fee Period”** has the meaning given in Section 10.3(c).
- (p) **“Joint IP”** means, collectively, Intellectual Property in or arising from a Joint Invention.
- (q) **“Joint IP Fee Period”** means, as applicable the Development Fee Period or IP Milestone Fee Period.
- (r) **“Joint Invention”** means any of the following conceived or first reduced to practice by TGA, CureVac, or any person employed by or working under the direction of TGA or CureVac under this Agreement, excluding Background IP: (i) any invention, process, information (e.g. Know-How), or any experimental, development or research activities, including engineering related thereto, whether or not patentable; or (ii) any improvement in the design of the Deliverable(s) or any alternative or improved method of accomplishing the objectives of this Agreement; or (iii) derivatives of any of the foregoing.

- (s) **"Know-How"** means any and all technical information and know-how owned or controlled by a Party, including without limitation, inventions, trade secrets, systems, programs, specifications, methods, improvements, data, instructions, processes, formulae, expert opinions and other information (in written or other tangible form) including, without limitation, any biological, chemical, pharmacological, toxicological, clinical, assay, control and manufacturing data, biological materials, manufacturing or related technology, analytical methodology, chemical and quality control procedures, protocols, techniques, improvements and results of experimentation and testing.
- (t) **"Machine"** means a functional unit comprising one or more Deliverables required for its functionality and/or incorporates, requires the use of, or derives from any Joint IP, Joint Invention, and/or TGA Background IP. For the avoidance of doubt, each prototype machine Deliverable which is used for non-evaluative machine production and each TGA Machine shall be deemed to be a Machine.
- (u) **"Medical Product"** means, collectively, any and all drug candidate or product that is developed or to be developed and/or commercialized by CureVac or licensed or sublicensed by CureVac to any Third Party, made by a Machine.
- (v) **"Net Sales"** means the gross amounts received by CureVac, its Affiliates, distributors and sublicensees (including their respective affiliates) (each, a **"Selling Party"**) from Third Party customers for sales or distribution of one or more Medical Products, less the Net Sales Deductions actually incurred, allowed, paid, accrued, or specifically allocated in its financial statements in accordance with generally-accepted accounting principles.
- (w) **"Net Sales Deductions"** means:
- (i) any and all of the following deductions, but shall not include any such deduction(s) to the extent resulting from or related to a Selling Party's intention or attempt, in whole or in part, to avoid paying any IP Milestone Fees hereunder:
- (a) discounts (including trade, quantity and cash discounts) actually allowed, cash and non-cash coupons, retroactive price reductions, and charge-back payments and rebates granted to any Third Party (including to governmental entities or agencies, purchasers, reimbursers, customers, distributors, wholesalers, and group purchasing and managed care organizations or entities (and other similar entities and institutions)) which effectively reduced the selling price or gross sales of the Medical Product(s) and when they have not already been deducted on the invoiced amount;
  - (b) credits or allowances, if any, on account of price adjustments, recalls, justified claims of Third Party customers, justified rejections or returns of items previously sold (including Medical Product returned in connection with recalls or withdrawals) and amounts written off by reason of uncollectible debt; provided, that, if the debt is thereafter paid, the corresponding amount shall be added to the Net Sales of the period during which it is paid;
  - (c) insurance, customs charges, freight, postage, shipping, handling, and other transportation costs incurred by a Selling Party in shipping Medical Product to a Third Party when they are not invoiced to the Third Party; and
  - (d) import taxes, export taxes, excise taxes (including annual fees due under Section 9008 of the United States Patient Protection and Affordable Care Act of 2010 (Pub. L. No. 111-48) and other comparable laws), sales tax, value-added taxes, consumption taxes, duties or other governmental taxes levied on, absorbed, determined and/or imposed with respect to such sales (excluding income or net profit taxes or franchise taxes of any kind).

(ii) The calculations set forth in this Section shall be determined in accordance with applicable accounting principles (such as GAAP or IFRS). Transfers of the Medical Product(s) among CureVac, its Affiliates, its distributors and Sublicensees for the purpose of subsequent resale to Third Parties will not generate Net Sales; with respect to such transfers, only the gross amounts invoiced in connection with the subsequent resale of the Medical Product(s) to Third Parties will be included in the calculation of Net Sales.

(x) **"Patents"** means patents and patent applications, including without limitation utility patents, model patents and design patents and certificates of invention, provisional applications, divisional applications, continuations, continuations-in-part, reissues, extensions (including supplemental protection certificates), reexaminations or renewals thereof.

(y) **"Requirements"** as defined in Section 2.5.

(z) **"Term"** as defined in Section 13.

(aa) **"TGA Background IP"** means, collectively, (i) any and all Intellectual Property or Know-How that was created, conceived, acquired, owned, or controlled by TGA and/or any Affiliate of TGA prior to the Effective Date of the Agreement, and (ii) any and all Intellectual Property or Know-How that is created, conceived, acquired, owned, or controlled by TGA and/or any Affiliate of TGA, independently from CureVac and CureVac's Confidential Information, after the Effective Date of the Agreement which is independent of, and not derived from, the Parties' efforts under this Agreement, excluding Joint Inventions and Joint IP, both (i) and (ii) being reasonably necessary or useful for the development, manufacturing and commercialization of the Deliverables and/or Machine in accordance with this Agreement and/or to practice the Joint IP.

(bb) **"TGA Machine"** means, a Machine produced by or for TGA and sold or delivered hereunder to CureVac and/or CureVac's authorized purchaser(s) or licensee(s), or other authorized parties. For the avoidance of doubt, the term TGA Machine does not include any Machines produced by or for any Third Party under a direct or indirect license from CureVac.

(cc) **"Third Party"** means any party other than any of the Parties hereto and its Affiliates; employees of any of the Parties shall be considered Third Parties.

(dd) **"Work"** means, collectively, the research, design, and development of Deliverable(s) and any related services and functions for which TGA is responsible, as each of the foregoing is described in the applicable Approved Work Order.

1.2 **Interpretation.** The division of this Agreement into Articles and Sections and the insertion of headings are for convenience of reference only and will not affect the construction or interpretation of this Agreement. Section references are to sections of the document in which the reference is contained and will be deemed to refer to and include all subsections of the referenced section. Unless the context requires otherwise, words importing the singular include the plural and vice versa and words importing gender include all genders. Unless the context requires otherwise, (a) "including" (and any of its derivative forms) means including but not limited to, (b) "may" means has the right, but not the obligation to do something and "may not" means does not have the right to do something, and (c) "will" and "shall" apply to a mandatory obligation, not a permissive statement. In the event of a conflict between the English language version of this Agreement and any translations hereof, the English language version shall control.

## 2) SUBJECT MATTER OF THE AGREEMENT.

2.1 Starting on the Effective Date and continuing through the Term, TGA will perform the Work in accordance with the terms of this Agreement and of the applicable Approved Work Order. Upon signature or written approval of an Approved Work Order by both Parties, the terms of the applicable Approved Work Order, together with the terms of this Agreement, will become a binding contract between the Parties with respect to its subject matter. The Parties intend to memorialize each Work Order using the form attached hereto as Annex 3 (Form of Work Order).

- 2.2 TGA has already completed the Work under Annex 1 (Work Order I) as of the Effective Date, and CureVac has granted Acceptance for the resulting Engineering Report provided by TGA. Work Order I is an Approved Work Order.
- 2.3 For purposes of Annex 2 (Work Order II), TGA will perform the Work for which it is responsible thereunder for [\*\*\*\*\*] each Deliverable as described therein. CureVac will support TGA in performing its obligations hereunder. The Parties acknowledge that the Work is for [\*\*\*\*\*]. Notwithstanding anything to the contrary in Work Order II, TGA shall render services laid out in Work Order II, but only be obligated to use Commercially Reasonable Efforts with regard to Deliverables and to (a) meet the detailed Requirements set forth therein, and (b) provide reasonable post-Acceptance support, sustained engineering support, upgrades, and training to CureVac with respect to the Deliverables at fees or rates quoted by TGA or, if applicable, at fees or rates mutually agreed by the Parties.
- 2.4 The Parties shall meet quarterly to review the Work under each Approved Work Order either in person, by videoconference, or by telephone. The Parties will at least meet once per year in person. Each Party may propose a meeting date and time, and the other Party will use Commercially Reasonable Efforts to accommodate such date and time.
- 2.5 The target requirements for the Deliverables, such as design and development process, verification and validation requirements, regulatory, functional and technical needs, development and manufacturing cost objectives (collectively, the "**Requirements**") will be set forth in the applicable Approved Work Order.
- 2.6 If and to the extent that the Parties wish to enter into an additional Work Order and/or if CureVac wishes to order one or more TGA Machines from TGA, the Parties shall negotiate in good faith the terms and conditions (including pricing and volumes if applicable) for such an agreement; provided, however, that neither Party shall be obligated to enter into any such agreement. The Parties will reference the agreed terms and conditions in Annex 6 in connection with any discussion about orders for TGA Machines.

### 3) TGA OBLIGATIONS.

- 3.1 TGA covenants that the Deliverables will comply with the electrical, mechanical and engineering certifications, regulations, and standards as defined under the Approved Work Order and as applicable at the location of delivery of Deliverables. Unless agreed otherwise in an Approved Work Order, TGA shall deliver each Deliverable Ex Works (Incoterms 2010) at its facility located at [\*\*\*\*\*].
- 3.2 TGA will: (a) use Commercially Reasonable Efforts to ensure that the Deliverables (i) are free from defects in material and workmanship and (ii) conform to the Requirements; and (b) perform the Work in a good, professional and workmanlike manner, in accordance with industry standards.
- 3.3 TGA shall provide, at CureVac's cost, CureVac with all the documents as reasonably requested for CureVac to comply with the applicable laws, rules, and regulations for the location of application of Machines, if and to the extent that such documents are available to TGA and/or that TGA can reasonably generate such documents.

### 4) CHANGES.

- 4.1 Either Party may propose one or more reasonable change(s) under this Agreement (including changes with respect to the Deliverables or the Requirements) by delivering a written proposal to the other Party. The other Party shall respond in writing to any such proposal within a reasonable time, taking into account the level of complexity and priority of the contemplated changes(s), and shall use Commercially Reasonable Efforts to estimate the following in connection with the proposed change: (a) any anticipated impact(s) on the Deliverables or Requirements; (b) any estimated impact(s) on the implementation schedule; and (c) any necessary adjustment to the price.

4.2 The Parties shall negotiate in good faith each proposed change under this Agreement. No change shall be effective unless approved and signed by authorized representatives of each Party using a form substantially similar to Annex 6 to memorialize the change.

**5) FINANCIAL CONDITIONS.**

5.1 The consideration and payment terms under Work Order I are set forth in **Annex 1**.

5.2 The consideration and payment terms under Work Order II are set forth in **Annex 2**.

5.3 Unless expressly stated otherwise in an Approved Work Order, CureVac will pay undisputed amounts for all Work and Deliverables within [\*\*\*\*\*] net upon receipt of a related invoice. The consideration and payment terms shall be set forth either in an Approved Work Order signed by both Parties or, in the absence of such Approved Work Order, in the TGA proposal Accepted in writing by CureVac against which CureVac is supposed to issue an order which TGA is supposed to accept. Any wrongfully withheld amounts due shall be subject to statutory interest per applicable law.

5.4 CureVac will pay all Development Fees and IP Milestone Fees as set forth in Section 10) below.

5.5 The Parties intend that, if CureVac orders TGA Machines, the pricing will take into account volumes and economies of scale of producing the TGA Machines.

**6) LIABILITY.**

6.1 Exclusions of Liability. Subject to Section 6.3 below and except as expressly set forth herein or in an Approved Work Order, the Parties agree as follows to the maximum extent permitted by applicable laws: [\*\*\*\*\*].

6.2 Limitations of Liability. Subject to Section 6.3 below and except as expressly set forth herein or in an Approved Work Order, the Parties agree as follows: (a) TGA's total liability under this Agreement shall not exceed an amount equal to [\*\*\*\*\*]; and (b) CureVac's total liability under this Agreement shall not exceed an amount equal to the following: (1) for Work and Deliverables, the [\*\*\*\*\*]; and (2) with respect to Intellectual Property, the [\*\*\*\*\*].

6.3 Exceptions. The limitations and exclusions set forth in Sections 6.1 and 6.2 will not apply with respect to: [\*\*\*\*\*].

6.4 **Force Majeure.** “**Force Majeure Event**” means an event beyond the reasonable control of a Party that delays or prevents the Party from performing its obligations under the Agreement potentially including embargoes, war, acts of war (whether war be declared or not), acts of terrorism, insurrections, riots, civil commotions, strikes, lockouts or other labor disturbances, fire, floods, earthquakes or other acts of God, or generally applicable action or inaction by any governmental authority, but excluding any government action or inaction that is specific to such Party, provided that (a) the affected Party is without fault in causing or failing to prevent the event, (b) the event cannot be circumvented through the use of commercially reasonable alternative sources, workaround plans or other means. In the event of a Force Majeure Event, the affected Party shall not be liable for any failure or delay in performing any of its obligations under or pursuant to this Agreement, and such a failure or delay shall not constitute a breach of this Agreement. The Party seeking to rely on this clause shall notify the other Party in writing of such force majeure circumstances as soon as reasonably practical and use reasonable endeavors in any situation where it has invoked this clause to cure such force majeure circumstances or to perform its relevant obligations as soon as possible. The time for performance of the affected obligations or the applicable Work Order shall be extended by a period equivalent to the period of the delay. Should a Force Majeure Event prevent any of the Parties from performing part or all of its obligations under any Approved Work Order for a period of [\*\*\*\*\*] or more, the unaffected Party shall have the right to terminate the Approved Work Order upon giving [\*\*\*\*\*] prior written notice. In the event of such termination, the other Party shall be paid for all Work or services performed prior to the date of termination. If the Force Majeure Event leads to a prevention of any Party from performing under this Agreement as a whole, such Party may terminate all Approved Work Orders and this Agreement if the Force Majeure Event continues for more than [\*\*\*\*\*].

7) **REPRESENTATIONS AND WARRANTIES.** Each Party represents and warrants to the other as follows: (a) it is duly incorporated, validly existing, in good standing, and has the power and authority to carry on its business, to hold property and to enter into this Agreement; (b) the terms of the Agreement are not inconsistent with its other contractual arrangements; and (c) the person executing this Agreement on its behalf has the full power and authority to enter into this Agreement on its behalf.

8) **INDEMNIFICATION.**

8.1 TGA shall defend and indemnify CureVac, CureVac’s Affiliates, and their respective directors, officers, employees, agents, successors, and assigns (collectively, the “**CureVac Indemnitees**”) from and against any and all costs, fees, penalties, expenses, damages, reasonable attorneys’ fees and all other liabilities whatsoever (“**Losses**”) arising out of or relating to the following against any Indemnified Party: (i) any Claim that any Deliverable or Machine infringes any Intellectual Property of a Third Party, where such Claim is based solely on TGA Background IP; and (ii) any Claim with respect to the gross negligence or willful misconduct of any of the TGA Indemnitees. The foregoing is subject to Section 8.4 below.

8.2 CureVac shall defend and indemnify TGA, TGA’s Affiliates, and their respective directors, officers, employees, agents, successors, and assigns (collectively, the “**TGA Indemnitees**”) from and against any and all Losses arising out of or relating to any of the following against any Indemnified Party: (a) any Claim that any Deliverable or Machine infringes any Intellectual Property of a Third Party, where such Claim is based solely on CureVac Background IP; (b) any Claim for death or bodily injury, or the damage, loss or destruction of real or tangible personal property of any Third Party or any Affiliate of CureVac (including CureVac’s, Affiliates, and their respective subcontractors) caused by, or alleged to be caused by or related to, the operation or use of any Machine, Deliverable, or Medical Product; or (c) any Claim by, on behalf of, or relating to, any employees, agents, independent contractors, and/or directors of CureVac, its Affiliates, or any of their respective subcontractors in connection with this Agreement and/or the use, development, or production of Machine(s), Deliverable(s), or Medical Product(s). The foregoing is subject to Section 8.4 below.

8.3 The Party seeking indemnification hereunder (as applicable, the “**Indemnified Party**”) will give the other Party (the “**Indemnifying Party**”) prompt written notice of any Claim for which indemnification is sought hereunder. Failure to give notice will not diminish the Indemnifying Party’s obligation under this Section if the Indemnifying Party has or receives knowledge of the existence of such Claim by any other means or if the failure does not materially prejudice its ability to defend the Claim. The Indemnifying Party may select legal counsel to represent the Indemnified Party (said counsel to be reasonably satisfactory to the Indemnified Party) and otherwise control the defense of such Claim. If the Indemnifying Party elects to control the defense of such Claim, the Indemnified Party may participate in the defense at its own expense. If the Claim is one that cannot by its nature be defended solely by the Indemnifying Party, then the Indemnified Party will make available information and assistance as the Indemnifying Party may reasonably request. The Indemnifying Party may not, without the prior written consent of the Indemnified Party, (i) consent to the entry of any judgment or enter into any settlement that provides for injunctive or other non-monetary relief affecting any indemnitee hereunder, or (ii) consent to the entry of any judgment or enter into any settlement unless such judgment or settlement provides for an unconditional and full release of the Indemnified Party and the other indemnitees hereunder and does not diminish any of the Indemnified Party’s rights under this Agreement or result in additional fees or charges to the Indemnified Party.

8.4 Each Party’s respective obligations to indemnify (exclusive of the obligation to defend) will not apply if and to the extent that Losses were caused by the willful misconduct, intentional misconduct, or gross negligence of such Party, but only as expressly agreed in writing by such Party or as determined by a court of competent jurisdiction in a final judgment which is not subject to appeal.

9) **CONFIDENTIALITY.** The confidentiality terms set forth in **Annex 4** (Confidentiality) shall govern the Parties’ respective obligations with respect to confidentiality under this Agreement.

**10) INTELLECTUAL PROPERTY.**

10.1 Background IP.

- (a) Each Party reserves sole and exclusive ownership of its Background IP. Each Party’s Background IP shall be deemed to be such Party’s Confidential Information for purposes of this Agreement. BACKGROUND IP IS PROVIDED HEREUNDER “AS-IS, WHERE IS”, WITHOUT WARRANTY OF ANY KIND.
- (b) The Parties each acknowledge that (i) neither the Deliverables nor the Machines may be manufactured without rights to the Joint IP and TGA Background IP, and (ii) neither the Deliverables nor the Machines may be operated without rights to the Joint IP, TGA Background IP, and CureVac Background IP. Accordingly, the Parties agree to the license and other terms herein.
- (c) TGA grants to CureVac, and CureVac hereby accepts, a non-exclusive, royalty-free except as otherwise specified in this Section, perpetual, irrevocable as to existing Machines, world-wide license to use, sublicense, and distribute TGA Background IP that is incorporated into any Deliverable or Joint IP or is reasonably required to use or maintain any Deliverable or Joint IP in a cost-effective or efficient manner (e.g., tools).
- (d) CureVac grants to TGA, and TGA hereby accepts, a limited, non-exclusive, non-transferable, no-charge license during the Term to CureVac Background IP as required for TGA to perform its obligations with respect to (i) the Work under any Approved Work Order and/or (ii) any order for the manufacture and sale of Machines to CureVac or its authorized purchasers.

10.2 Joint Inventions.

- (a) Ownership of Inventions. All Intellectual Property generated under this Agreement shall be Joint IP. TGA and CureVac shall each have an equal and undivided one-half (1/2) joint ownership interest in any and all Joint Inventions and Joint IP. Inventorship of Joint Inventions will be determined in accordance with the patent laws of the country in which the Invention is created.
- (b) Licenses in Joint IP.

- (i) TGA grants to CureVac, and CureVac hereby accepts, an exclusive (only with respect to Machines, and for the duration of the Joint IP Fee Period, after which the license shall be non-exclusive), royalty-free except as otherwise specified in this Section, perpetual, irrevocable as to existing Machines, world-wide license to TGA's interest in Joint IP. For the avoidance of doubt, nothing in this Agreement shall be construed to limit CureVac's ability and right to use such Joint IP subject to compliance with the terms of this Section 10.
  - (ii) CureVac grants to TGA, and TGA hereby accepts, a non-exclusive, royalty-free, perpetual, irrevocable as to existing Machines, worldwide license to CureVac's interest in Joint IP (A) to perform its obligations under this Agreement, and (B) for applications and use unrelated to Machines. For the avoidance of doubt, nothing in this Agreement shall be construed to limit TGA's ability and right to use Joint IP in applications and context unrelated to Machines.
- (c) Rights in Joint IP. The Parties agree as follows with respect to the Joint Inventions and Joint IP:
- (i) CureVac may sublicense (in multiple tiers) Joint IP to one or more Third Parties that commit in writing to be subject to obligations substantially similar to the ones under this Agreement, including confidentiality obligations at least as protective as those set forth in Annex 4 and audit provisions similar to Section 14.2; and
  - (ii) Subject to CureVac's compliance with the terms of this Section 10), TGA shall not, without CureVac's prior written consent, (A) license any rights in Joint IP to any Third Party, or (B) manufacture for and deliver to any Third Party one or more Machines.
- (d) Prosecution. The Parties shall discuss in good faith the filing and protection of Joint IP. Unless otherwise agreed by the Parties, the Parties agree that neither Party may file an application, registration, extension, renewal, or re-issuance for Joint IP without first giving notice to, and offering to discuss the filing in good faith with, the other Party. Each Party agrees to refrain from submitting any such filing until after it has made reasonable efforts to discuss the filing with the other Party, with the expectation that the Parties will allow at least [\*\*\*\*] to review and discuss the filing. The filing Party shall bear its own costs and expenses for any such filing.
- (e) Infringement. The Parties shall discuss in good faith the protection of Joint IP against infringement or misappropriation by Third Parties. TGA may at its expense take steps to protect Joint IP to the extent related to the manufacture of Machines, and CureVac may at its expense take steps to protect Joint IP to the use of Machines for production of Medical Products.

### 10.3 Joint IP Fees.

- (a) In consideration of the Work, TGA's contributions to Joint IP and Joint Inventions, and the rights, and obligations in Sections 10.1 (Background IP) and 10.2(b) above, CureVac shall pay TGA the following during the applicable Joint IP Fee Period:
  - (i) [\*\*\*\*] (the "**Development Fee**"); and
  - (ii) [\*\*\*\*] (the "**IP Milestone Fee**").
- (b) Development Fees. During the period of time beginning on the Effective Date and continuing until 10 years after the date that a Machine is first used commercially (i.e., for commercial, as opposed to testing or evaluation of the Machine, purposes) to produce one or more Medical Products intended (or the charitable equivalent of a sale) to generate Net Sales, ("**Development Fee Period**"), CureVac will pay a Development Fee per Machine [\*\*\*\*] For example:

- (i) [\*\*\*\*\*];
- (ii) [\*\*\*\*\*];
- (iii) [\*\*\*\*\*]

**TABLE 1: DEVELOPMENT FEES**

Incremental Volumes of Machines (Aggregate)	Development Fee
Machines [*****]	[*****] per Machine
Machines [*****]	[*****] per Machine
Machines [*****]	[*****] per Machine
Machines [*****] and more	[*****] per Machine

(c) **IP Milestone Fees.** During the period of time beginning on the Effective Date and continuing until the earlier of (i) 10 years after the date that a Machine is first used commercially (i.e., for commercial, as opposed to testing or evaluation of the Machine, purposes) to produce one or more Medical Products intended (or the charitable equivalent of a sale) to generate Net Sales, and (ii) [\*\*\*\*\*] in aggregate Net Sales (the “**IP Milestone Fee Period**”), CureVac will pay [\*\*\*\*\*] per Table 2 below based [\*\*\*\*\*] by any and all Medical Products, provided that each “Net Sales” bracket and each related “IP Milestone Fee” bracket in the table below may only be consummated once. Once the IP Milestone fee of [\*\*\*\*\*] for reaching [\*\*\*\*\*] in Net Sales is reached and paid, [\*\*\*\*\*] For example:

- (i) [\*\*\*\*\*]

**TABLE 2: IP MILESTONE FEES**

Net Sales (aggregate)	IP Milestone Fee (USD)
[*****]	[*****]

(d) Reporting and Payment.

(i) For each year during the Joint IP Fee Period, CureVac shall report to TGA no later than [\*\*\*\*\*] of the subsequent year the following:

(a) [\*\*\*\*\*] and

(b) [\*\*\*\*\*]

(ii) CureVac shall pay the Development Fee and the IP Milestone Fee, if applicable, for each year to TGA no later than the end of April of the subsequent year.

(iii) If and to the extent that CureVac knowingly fails to report any [\*\*\*\*\*] for any year during the Joint IP Fee Period or fails to pay any Development Fee(s) when due and fails to promptly cure (and in any event within [\*\*\*\*\*] after learning of such failure), the applicable Development Fee shall be subject to [\*\*\*\*\*].

(iv) The provisions of this Section are essential to TGA's agreement. This Section 10.3 shall survive the expiration or termination of this Agreement or of any Approved Work Orders for any reason whatsoever. Further, the Parties agree that the provisions of this Section 10.3, including CureVac's obligations to pay Development Fees and IP Milestone Fees in accordance with the terms hereof, shall remain fully enforceable and valid notwithstanding any of the following: the expiration, invalidity of, or challenges to the validity of any Background IP and/or Joint IP, including Patents; any change(s) in market conditions or business environment; any change(s) to CureVac's corporate and/or ownership structure; as far as legally possible the insolvency or status of CureVac and/or any of its Affiliates as debtor(s) in bankruptcy, insolvency, receivership, or similar proceedings.

10.4 After expiration of the Joint IP Fee Period, CureVac shall have a non-exclusive, fully paid-up, worldwide, irrevocable, perpetual, transferable and sublicensable (in multiple tiers) license under Joint IP and Joint Inventions (including TGA's interest in such Joint IP and Joint Inventions), and to the TGA Background IP that is incorporated into any Deliverable, Joint IP, or Joint Invention, and/or that is reasonably required to use or practice any Joint IP or Joint Invention.

10.5 Personnel. Each Party is responsible for having in place with each of its employees, agents, contractors, subcontractors, and other personnel (either directly or indirectly through their respective employers) such agreements respecting Intellectual Property as are necessary to comply with this Agreement. Without limiting the foregoing, in the event that a Party engages a subcontractor to perform any activities assigned to it under this Agreement, such Party shall use Commercially Reasonable Efforts to ensure that such subcontractor has agreed to assign to the Party engaging such subcontractor (and if not possible to grant a fully-paid, exclusive, royalty-free, worldwide license to such Party, with the right to sublicense through multiple tiers, under) all inventions made by such subcontractor in the course of performing such subcontracted work that relate to any activities covered by this Agreement.

10.6 General. Except for the rights expressly granted in this Agreement, nothing in this Agreement will operate to transfer interest in any Intellectual Property by implication, estoppel or otherwise. All licenses and rights of use granted under or pursuant to this Agreement shall be deemed to be licenses to rights in "intellectual property" for the purposes of Section 365(n) of the United States Bankruptcy Code.

11) **INSURANCE**. Each Party shall procure and maintain insurance as required by applicable law.

**12) SUBCONTRACTING.**

12.1 TGA shall not subcontract the performance of any Work under this Agreement or an Approved Work Order to a Third Party without the prior written consent of CureVac. CureVac shall not unreasonably withhold, condition, or delay its consent to any such proposed arrangement; provided, however, that CureVac may condition its consent on certification by TGA that the subcontractor is subject to confidentiality obligations no less protective than those applicable to TGA under this Agreement. If CureVac wishes to verify the existence of such confidentiality obligation, the Parties shall designate by mutual agreement a Third Party to confirm the existence of such obligation.

12.2 TGA may, in the ordinary course of business, procure and use Third Party services and products that are not dedicated to performance of the Work, and TGA may procure and use Third Party parts, components, material, and equipment in connection with the Work. TGA may also engage individual independent contractors to supplement its employee workforce. Such arrangements do not constitute subcontracting for the purposes of this Section.

**13) TERM AND TERMINATION.**

13.1 This Agreement shall commence as of the Effective Date and shall remain in force until the expiration of the last Joint IP Fee Period, unless terminated earlier under this Section or by mutual written agreement of the Parties as applicable (such period is the "**Term**"). The Parties may agree to extend Term in writing. This Agreement and each Approved Work Order may only be terminated as provided in this Section 13) and Section 6.4 (Force Majeure). The term of each Approved Work Order (each a "**Work Order Term**") will be set forth therein.

13.2 The Parties may terminate an Approved Work Order as follows:

- (a) The Parties may terminate an Approved Work Order by mutual written consent, as signed by an authorized representative of each Party;
- (b) If one Party materially breaches its obligations under this Agreement or an Approved Work Order and does not cure such breach within a reasonable period (not to be less than [\*\*\*\*]) following written notice of such breach by the other Party, then the Party that is not in breach may terminate the affected Approved Work Order(s) and, in the event of any such termination:
  - (i) the breaching Party will reimburse the terminating Party for any non-cancellable costs reasonably incurred by the terminating Party, in reliance on the terminated Approved Work Order(s), subject to Section 6) (Liability) above;
  - (ii) for termination by TGA due to CureVac's material breach with respect to that Approved Work Order, (A) CureVac shall pay TGA a termination fee [\*\*\*\*] (B) CureVac grants and TGA accepts a non-exclusive, fully paid-up, sublicenseable (in multiple tiers), worldwide, irrevocable and perpetual license to the CureVac Background IP and to CureVac's interest in Joint IP to manufacture Machines relevant to or deriving from that Approved Work Order, and (C) CureVac will provide the information and existing documentation with respect to such CureVac Background IP and Joint IP as reasonably required for TGA or a Third Party to enable such manufacturing of the Machines; and
  - (iii) for termination by CureVac due to TGA's material breach with respect to that Approved Work Order, TGA grants and CureVac accepts a fully paid-up, sublicenseable (in multiple tiers), worldwide, irrevocable and perpetual license to the TGA Background IP and to TGA's interest in Joint IP reasonably required for CureVac to complete the Work under the Approved Work Order either on its own or with another supplier (to the extent such rights are not already granted hereunder), and (C) TGA will provide the information and existing documentation (but without any continuation of Work or other services) with respect to such TGA Background IP and Joint IP as reasonably required for CureVac or a Third Party to enable the completion of such Work.

(c) Either Party may terminate an Approved Work Order for convenience (i.e. without cause) by giving written notice to the other Party and agreeing to the following:

(i) for termination by TGA, TGA grants CureVac and CureVac accepts a fully paid-up, sublicenseable (in multiple tiers), worldwide, irrevocable and perpetual license to the TGA Background IP and its interest in Joint IP to the extent reasonably required for CureVac to complete the Work under the Approved Work Order either on its own or with another supplier (to the extent such rights are not already granted hereunder) and TGA will provide the information and existing documentation (but without any continuation of Work or other services) with respect to such TGA Background IP and Joint IP as reasonably required for CureVac or a Third Party to enable the completion of such Work; and

(ii) for termination by CureVac, CureVac shall pay TGA a termination fee [\*\*\*\*\*].

(d) If a Party terminates an Approved Work Order for the other Party's breach according to Section 13.2(b) above, the terminating Party may in its discretion convert such termination to a termination for convenience hereunder upon written notice to the other Party.

(e) Either Party may terminate all Approved Work Orders hereunder upon written notice if the other Party is declared insolvent, becomes a debtor in a bankruptcy, insolvency, receivership, or similar proceeding commenced by a Third Party that is not dismissed within [\*\*\*\*\*] after commencement, proceedings in bankruptcy or insolvency are instituted by or against it, undergoes voluntary or involuntary dissolution, and undergoes serious financial difficulties that may lead to the opening of insolvency proceedings in the near future or makes an assignment for the benefit of its creditors. In that case, the effects of termination laid out in Section 13.2(b) above shall apply. In the event of a Party's insolvency, the affected Party shall be treated as a breaching Party under Section 13.2(b) above.

(f) As set forth in Section 6.4 with respect to a Force Majeure Event.

13.3 This Agreement contemplates the long-term allocation of certain rights with respect to Intellectual Property, Indemnification, and other issues. Accordingly, the Parties agree that any termination of Approved Work Order(s) hereunder shall not affect the Parties' other rights and obligations under this Agreement.

#### 14) GENERAL.

14.1 Advertising. Neither Party will use the other Party's name nor marks, refer to or identify the other Party in any advertising or publicity releases or promotional or marketing correspondence to others without such other Party's written approval.

14.2 Audit.

- (a) During business hours and upon reasonable advance notice not more than once each calendar year, TGA's appointed independent auditor may inspect, examine and audit the records and data of CureVac, CureVac's Affiliates, and their respective agents and subcontractors that pertain to CureVac's obligations under Section 10) (Intellectual Property) of this Agreement to verify (a) the accuracy of CureVac's reports and payments per Section 10) (Intellectual Property) and (b) CureVac's compliance with this Agreement. In support of the foregoing right, CureVac will keep and maintain (i) financial records relating to the Agreement in accordance with generally accepted accounting principles, (ii) records substantiating CureVac's invoices, (iii) records pertaining to CureVac's compliance with the Agreement, and (iv) such other operational records with respect to Intellectual Property and related fees and other monetary amounts as CureVac keeps in the ordinary course of its business. TGA may not audit a time period for a particular issue more than once. CureVac will retain such records for the longer of [\*\*\*\*\*] after the end of each year of a Joint IP Fee Period or as required by applicable Laws. CureVac will make such records available to TGA's auditors for examination and copying upon request. TGA shall bear its own costs and expenses for any audit pursuant to this provision; provided, however, that if an audit reveals that CureVac has not paid TGA in aggregate amounts due under this Agreement (including Development Fees and IP Milestone Fees) for any calendar year shown by such inspection of more than [\*\*\*\*\*] CureVac shall promptly reimburse TGA for the actual costs and expenses of such audit. Any underpayments shall be paid by CureVac within [\*\*\*\*\*] of notification of the results of such audit.
- (b) Upon notice by TGA of its intention to conduct an audit of IP Milestone Fees, but no more than once per calendar year, CureVac shall at its expense provide an annual certification by a reputable Third Party accounting firm as to the accuracy of the reports submitted by CureVac with respect to Net Sales and IP Milestone Fees.
- 14.3 Non-Solicitation. The Parties recognize that the employees of the other Party, and such employees' loyalty and service to such Party, constitute a valuable asset of such Party. Accordingly, during the Term of this Agreement and for a period of [\*\*\*\*\*] thereafter, CureVac as well as TGA agrees not to actively solicit employment with any person who was employed by the related other Party within [\*\*\*\*\*] of such person's employment by such Party.
- 14.4 Relationship of Parties. The relationship between the Parties is that of independent contractors and neither Party will have the authority to bind or act on behalf of the other Party without its prior written consent. This Agreement will not constitute, create, or in any way be interpreted as a joint venture, partnership or business organization of any kind.
- 14.5 Entire Agreement. This Agreement, its Annexes, and all documentation attached hereto or expressly incorporated by reference herein, will constitute the entire understanding of the Parties relating to the subject matter of this Agreement and will not be changed or modified except in writing and signed by authorized representatives of the Parties. All prior agreements, whether written or oral between the Parties relating to the subject matter of this Agreement, are superseded by this Agreement and are of no further force or effect. For clarity, other than the terms and provisions in this Agreement no commercial or legal terms, in particular no general terms and conditions, of one Party will apply. The preamble and recitals on page 1 of this Agreement and Annexes 3, 4, 5 and 6 hereto form an integral part of this Agreement and are hereby incorporated by reference herein. Work Orders I and II are attached hereto for reference as, respectively, Annexes 1 and 2, and per Section 2.1 above each Work Order is a separate contract which incorporates the terms and conditions of this Agreement.
- 14.6 Conflict of Terms. In the event of a conflict between the terms of this Agreement and the terms of any Approved Work Order or Annex (including any agreements incorporated by reference through an Annex), the terms of this Agreement will govern.
- 14.7 Severability. If any provision of this Agreement will be deemed void or unenforceable in whole or in part for any reason whatsoever, the remaining provisions will remain in full force and effect, and the Parties will negotiate in good faith to modify the Agreement to preserve (to the extent possible) their original intent and the surviving clauses of this Agreement shall be construed to give maximum effect to the intention of the Parties as of the date last signed below.
- 14.8 Non-Waiver. No failure or delay of one of the Parties to insist upon strict performance of any of its rights or powers under this Agreement will operate as a waiver thereof, nor will any other single or partial exercise of such right or power preclude any other further exercise of any rights or remedies provided by law.

14.9 Governing Law and Dispute Resolution.

- (a) This Agreement will be governed by and construed in accordance with the laws of Germany, excluding its conflict of laws rules. The United Nations Convention on Contracts for the International Sale of Goods will not apply in any way to this Agreement or to the transactions contemplated by this Agreement or otherwise to create any rights or to impose any duties or obligations on any Party to this Agreement.
- (b) In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves or the liaison. In the event that such dispute is not resolved on an informal basis within [\*\*\*\*\*] any Party may, by written notice to the other, have such dispute referred to each Party's managing executive or director or his or her designee (who will be a senior executive), who will attempt in good faith to resolve such dispute by negotiation and consultation for an additional [\*\*\*\*\*] period following receipt of such written notice.
- (c) If the Parties are unable to resolve such dispute in connection with this Agreement or its validity through good-faith negotiations within [\*\*\*\*\*], the dispute shall be finally settled in accordance with the Arbitration Rules of the German Institution of Arbitration (DIS) ("**Arbitrator**") in accordance with the then-current DIS-Arbitration Rules 98, available at <http://www.disarb.org/en/16/rules/dis-arbitration-rules-98-id10>, without recourse to the ordinary courts of law. The existence, content and result of the arbitration shall be held in confidence by the Parties, their representatives, any other participants, and the Arbitrator. The arbitration will be conducted by three arbitrator(s) selected in accordance with the Arbitrator rules. Any demand for arbitration and any counterclaim will specify in reasonable detail the facts and legal grounds forming the basis for the claimant's request for relief and will include a statement of the total amount of damages claimed, if any, and any other remedy sought by the claimant. The arbitration will be conducted in the German language in Frankfurt am Main, Germany. Each Party will bear its own expenses in the arbitration and will share equally the costs of the arbitration; provided, however, that (i) the Arbitrators may, in their discretion, award reasonable costs and fees to the prevailing Party, and (ii) the Arbitrator shall award reasonable costs and fees to TGA if TGA prevails in an action for unreported and/or unpaid Development Fees and/or IP Milestone Fees. The Arbitrators will have full power and authority to determine issues of arbitrability and to interpret or construe the applicable provisions of this Agreement and to fashion appropriate remedies for breaches hereof (including interim or permanent injunctive relief); provided that the Arbitrators will not have any right or authority: (i) in excess of the authority of a court having jurisdiction over the Parties and the dispute would have absent this arbitration agreement; (ii) to award damages in excess of the types and limitation of damages found in this Agreement; or (iii) to modify the terms of this Agreement. The award of the Arbitrators will be issued within [\*\*\*\*\*] of the completion of the hearing, shall be in writing, and shall state the reasoning on which the award is based. The Parties further consent to the jurisdiction of any state or federal court with subject matter jurisdiction located within a district that encompasses assets of a Party against whom a judgment (or award) has been rendered for the enforcement of the judgment (or award) against the assets of such Party.

14.10 Assignment.

- (a) Unless otherwise provided for in this Agreement, each Party agrees that it shall not assign or transfer this Agreement, any Approved Work Order, or any of its rights or obligations thereunder (including legal and beneficial ownership stakes in Joint IP and Joint Inventions) without the other Party's prior written consent, and any attempt to do so shall be void.

- (b) Each Party may propose to assign this Agreement, delegate performance of any obligations under this Agreement, or transfer any ownership rights in Joint IP and/or Joint Inventions to an Affiliate of such Party or any other Third Party (the "**Proposed Assignee**") upon prior written consent by the other Party, provided that either Party may assign this Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this Agreement (whether by merger, consolidation or otherwise). Each Party agrees that it shall not unreasonably withhold, condition, or delay its consent to such proposal (each, a "**Proposed Transfer**") by the other Party; provided, however, that each Party may withhold consent in its sole discretion in the following circumstances: (i) the Proposed Assignee does not agree in writing to be subject to the terms and conditions of this Agreement; (ii) the Proposed Assignee does not agree in writing to assume the corresponding obligations hereunder, including without limitation the obligations in Sections 10) (Intellectual Property) and 14.2 (Audits); (iii) the Proposed Assignee is not financially solvent and capable of complying with such terms and conditions and of performing such obligations hereunder; or (iv) if the Proposed Transfer entails transfer of CureVac's interest in any Joint IP and the Proposed Transfer would, or is reasonably likely to, impair, frustrate, or avoid the timely payment to TGA of Development Fees and/or IP Milestone Fees. TGA may condition its consent to a Proposed Transfer in any of the foregoing circumstances on CureVac guaranteeing the payment of the Development Fees and IP Milestone Fees and/or the performance of the obligations under this Agreement by the Proposed Assignee, using a form of guarantee approved by TGA. The Party seeking to assign and/or delegate to an Affiliate pursuant to this Subsection shall provide copies of the written commitments by the assignee or delegate (as applicable) and provide evidence establishing such entity's financial solvency and capacity for performance under the Agreement. Any attempted or actual assignment or delegation which is not made in full compliance with this Subsection shall be void.
- (c) Any assignment or delegation of rights, duties, or obligations shall not relieve the applicable Party (i.e. TGA or CureVac) of any responsibility under this Agreement, and such Party shall be responsible as if the assigned or delegated rights, duties, or obligations were retained by such Party except in case of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this Agreement (whether by merger, consolidation or otherwise). This Agreement will be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns.
- 14.11 Survival. Any provision of this Agreement that contemplates or governs performance or observance subsequent to termination or expiration will survive the expiration or termination thereof for any reason, including without limitation Section 8) (Indemnification), Section 10, and Section 13.2(d).
- 14.12 Expenses. Each Party shall bear its own fees and other expenses (including attorneys' fees) in connection with the negotiation, preparation and execution of this Agreement.
- 14.13 Counterparts, Execution of Agreement. This Agreement may be executed in several counterparts, all of which shall constitute one and the same Agreement. In the event that any signature is delivered by facsimile transmission or by an e-mail which contains a portable document format (.pdf) file of an executed signature page, such executed signature page shall create a valid and binding obligation of the Party executing it (or on whose behalf such signature page is executed) with the same force and effect as if such executed signature page were an original thereof. Changes to this Agreement shall be executed in the same way as laid out in this paragraph.

ANNEX 2: Work Order II

Upon finalization and signature by both Parties, Work Order II shall be automatically included in this Annex 2 without any further action of the Parties.

APPROVED WORK ORDER NO. \_\_

1. **Introduction.** This Work Order (“Work Order”) is issued under and pursuant to the Development and Intellectual Agreement dated June 16, 2016 (the “Agreement”) by and between Tesla Grohmann Automation GmbH (“TGA”) and CureVac AG (“CureVac”). Capitalized terms used but not defined in this Work Order will have the meanings given them in the Agreement. The Term of this Work Order shall be from [date] (the “Work Order Effective Date”) through [date].
2. **Services and Performance Measurement.**
  - (a) TGA will perform the following Work pursuant to this Work Order [describe Work, any required resources, any Deliverables, and any deadlines or milestones]:
3. **Acceptance Tests.** The Deliverables must pass the following Acceptance tests (if any). If no Acceptance tests are described in this space, each Deliverable shall be deemed to be Accepted if and to the extent that it conforms to the applicable Requirements.
4. **Charges.** CureVac will pay TGA for performance of the Work under this Work Order as follows [e.g., fixed price, time and materials, and any deadlines or milestones]:
5. **Additional Services.** CureVac may request additional Work after the Work Order Effective Date. Unless otherwise agreed by the Parties in writing, the fees for such Work will be calculated by multiplying the hours worked by TGA personnel by TGA’s then-current billing rates or, if applicable, by the rates quoted by TGA.

Intending to be legally bound, each of the undersigned parties has caused its duly authorized representative to execute this Approved Work Order as of the date last entered below.

ANNEX 4: Confidentiality

1. Various Confidentiality Agreements.
  - a. TGA and CureVac previously signed Exchange of Confidential Information and Non Disclosure Agreement by and between TGA and CureVac dated November 24, 2015 (the "2015 NDA").
  - b. TGA, CureVac, and Vici AG International ("Vici") signed a Multiparty Non-Disclosure Agreement dated July 31, 2017 (the "Multiparty NDA") superseding the 2015 NDA.
  - c. TGA and CureVac now agree to the confidentiality obligations of this Annex 4 for purposes of this Agreement. Notwithstanding anything to the contrary in the 2015 NDA and the Multiparty NDA, TGA and CureVac may retain copies of Confidential Information disclosed pursuant to the 2015 NDA or the Multiparty NDA provided that such Confidential Information shall be henceforth subject to the terms and conditions of this Annex 4.
  - d. Each Party agrees that, as of the date of signature of this Agreement, it shall not disclose to Vici any Confidential Information received subject to this Annex 4 or the 2015 NDA, except to the extent expressly authorized by the original Disclosing Party (i.e. upon disclosure or later in writing). If and to the extent that a Party discloses any such Confidential Information to Vici, the disclosed Confidential Information shall then be subject to the Multiparty NDA.
2. Confidential Information. "Confidential Information" shall mean information disclosed by one Party ("Disclosing Party") to the other Party ("Receiving Party") including, but not limited to, trade secrets, physical samples, financial, business, sales or technical information, terms of agreements, negotiations or proposals, all data, and such other information disclosed (a) in written or other tangible form and marked "Confidential" or with words of similar import, (b) orally or visually and identified as confidential or proprietary information at the time of disclosure, or (c) under circumstances by which Receiving Party should reasonably understand such information is to be treated as confidential, whether or not marked "Confidential" or otherwise. Confidential Information shall be deemed to include any such information disclosed by TGA or CureVac pursuant to the 2015 NDA or Multiparty NDA (but excluding any information disclosed by a Third Party under the Multiparty NDA).
3. Purpose. Disclosing Party may disclose Confidential Information to Receiving Party for purposes of fulfilling and facilitating the rights and obligations and objectives of the Parties under the Development and Intellectual Property Agreement ("Purpose").
4. Non-Use and Non-Disclosure Obligations. Subject to Section 5 of this NDA and subject to the licenses granted under the Development and Intellectual Property Agreement, Receiving Party shall not: (a) use Disclosing Party's Confidential Information for any reason, other than as required for the Purpose; or (b) disclose Disclosing Party's Confidential Information to any individual or third party except to its employees, consultants, directors, and such of their Affiliates that (i) have a "need to know" such Confidential Information for furtherance of the Purpose, and (ii) are bound to confidentiality under terms no less protective than the terms of this NDA (collectively, "Authorized Recipients"). Receiving Party shall implement and maintain appropriate organizational, technical, and administrative security measures, exercising the same degree of care in protecting Disclosing Party's Confidential Information that it uses for its own confidential information of a similar nature, but in no event less than reasonable care. Promptly after becoming aware of any unauthorized use or disclosure of, and/or unauthorized attempts to access or modify, any of Disclosing Party's Confidential Information in the custody or control of Receiving Party or its Authorized Recipients, Receiving Party shall notify Disclosing Party in writing and cooperate with Disclosing Party to investigate and mitigate any adverse effects therefrom. Receiving Party shall be responsible for any unauthorized use or disclosure of Confidential Information by any of its Authorized Recipients.
5. Exceptions. The obligations of Section 4 of this NDA shall not apply to information that: (a) is already known to Receiving Party at the time of disclosure without obligation of confidentiality to Disclosing Party, (b) is or becomes publicly known through no wrongful act or omission of Receiving Party, (c) is rightfully received by Receiving Party from a third party which is without obligation of confidentiality, (d) is approved for release by written authorization of Disclosing Party, or (e) was developed by Receiving Party independently and without the use or benefit of any of the Confidential Information.

6. A disclosure of Confidential Information that is required to be made by Receiving Party pursuant to any request, order or requirement of a court, administrative agency or any other governmental agency shall not be deemed a breach of this NDA, provided that Receiving Party has: (x) immediately notified Disclosing Party in writing of such, request, order or requirement, to the extent permitted by law, (y) given Disclosing Party a reasonable opportunity to contest disclosure or seek an appropriate protective order, and (z) cooperated reasonably with Disclosing Party to narrow the scope of such disclosure to only that portion of the Confidential Information that is necessary to fulfill the request, order or requirement. Each Party is hereby given notice of the immunity set forth in 18 USC § 1833(b).
7. Ownership. Subject to the licenses granted under this Development and Intellectual Property Agreement all Confidential Information and derivations thereof shall remain the sole and exclusive property of Disclosing Party and no license or other right to such Confidential Information or either Party's Intellectual Property is granted or implied hereby unless otherwise provided for in the Development and Intellectual Property Agreement.
8. As-Is Disclosures. Each Disclosing Party warrants that it has the right to disclose any Confidential Information to Receiving Party. Except for the foregoing and unless stated otherwise in this Development and Intellectual Property Agreement: (a) no other warranties are made whether express, implied or statutory, (b) all Confidential Information is provided on an "AS IS" basis, and (c) no representation, warranty, assurance, or guarantee is made by Disclosing Party with respect to the accuracy, performance, completeness, or suitability of the Confidential Information or non-infringement of third-party rights based on use of the Confidential Information by Receiving Party.
9. Return of Confidential Information. Subject to the licenses granted under this Development and Intellectual Property Agreement Confidential Information, and all copies thereof, remain the property of Disclosing Party. Upon termination of this NDA, expiration of this NDA, or the written request of Disclosing Party, Receiving Party shall promptly return to Disclosing Party all documents, presentations, and other tangible items of Confidential Information furnished by Disclosing Party or, at the request of Disclosing Party, certify in writing that all such Confidential Information has been destroyed; provided, however, that the Receiving Party may retain and use such Confidential Information if and to the extent permitted by this Development and Intellectual Property Agreement. Receiving Party shall also use reasonable efforts to delete all electronic copies of Disclosing Party's Confidential Information under the Receiving Party's control. Notwithstanding anything to the contrary herein: (a) no Party will be required to delete electronic Confidential Information stored in back-up/archival storage in accordance with its policies, provided that any such retained Confidential Information will continue to be subject to the terms of this Agreement; and (b) each Party may retain copies of the Confidential Information to the extent required to comply with applicable legal and regulatory requirements, provided, however, that such Confidential Information shall remain subject to the terms and conditions herein.
10. Survival. Notwithstanding any expiration or termination of this Agreement, the clauses in this Annex shall survive for [\*\*\*\*\*] following the date of any such expiration or termination of this Development and Intellectual Property Agreement.
11. Injunctive Relief. The Parties acknowledge and agree that any breach of this NDA by Receiving Party would cause irreparable harm to Disclosing Party for which monetary damages would not provide an adequate remedy. The Parties agree that in the event of such a breach of this NDA, in addition to any other available remedies, Disclosing Party will be entitled to temporary and permanent injunctive relief restraining Receiving Party from disclosing or using, in whole or in part, any Confidential Information.

With reference to Section 2.6 of the Agreement, the Parties agree to the following terms and conditions in connection with any orders for non-prototype and non-developmental TGA Machines.

1. Equipment Warranty.

- a. TGA represents and warrants that TGA Machines shall, during the Warranty Period: (i) conform to and operate in accordance with the applicable Specifications, and (ii) be free from defects in material and workmanship (this is the “**Equipment Warranty**”).
- b. Defined Terms.
  - i. The “**Warranty Period**” for each TGA Machine shall be a period of [\*\*\*\*\*] after delivery, unless expressly agreed otherwise in writing by the Parties.
  - ii. “**Specifications**” means the specifications and requirements applicable to a TGA Machine, as agreed in writing by both Parties.
- c. EXCEPT AS EXPRESSLY SET FORTH HEREIN, TGA MAKES NO REPRESENTATION NOR WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE TGA MACHINES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE, WHETHER ARISING BY LAW, COURSE OF DEALING, COURSE OF PERFORMANCE, TRADE USAGE, OR OTHERWISE, AND WHETHER ORAL, WRITTEN EXPRESS, IMPLIED, OR STATUTORY, ALL OF WHICH ARE HEREBY WAIVED BY CUREVAC, ON BEHALF OF ITSELF AND EACH OF ITS AFFILIATES, AUTHORIZED PURCHASERS, AND LICENSEES.
- d. The EQUIPMENT Warranty shall not apply to any of the following (each, an “**Excluded Issue**”):
  - i. equipment or any products not furnished by TGA;
  - ii. if applicable, operation of a system into which the TGA Machine is incorporated where TGA has not provided or expressly approved in writing all components of such system;
  - iii. prototype versions of TGA Machines (i.e. Deliverables);
  - iv. unless expressly agreed otherwise in writing by the Parties, hardware, equipment, software, and any other items provided to TGA by or for CureVac;
  - v. defects or non-conformities to the extent caused by any of the following:
    1. normal wear and tear;
    2. design, software, equipment, data, or material expressly required by CureVac for which TGA does not have any design, development, or verification responsibilities;
    3. installation, maintenance, or use by any party other than TGA or its subcontractors in a manner that does not conform with reasonable and industry-standard written instructions furnished by TGA upon delivery of the TGA Machine;
    4. abnormal use or use by CureVac for a purpose other than the specified and/or agreed purposes at Final Acceptance; or
    5. uncorrected misuse, negligence, modification by CureVac in a manner not approved or authorized by TGA (either in writing, in person or by phone), or any accident for which CureVac is responsible.

e. Procedure for Equipment Warranty.

- i. CureVac will inspect each TGA Machine within a reasonable time after receipt, using Commercially Reasonable Efforts to evaluate whether the TGA Machine conforms to the Equipment Warranty within [\*\*\*\*\*] after receipt.
- ii. CureVac shall give prompt written notice to TGA if and to the extent that a TGA Machine fails to conform to the Equipment Warranty. If CureVac gives any such notice during the Warranty Period, CureVac shall provide all available information regarding the alleged non-conformity and cooperate reasonably with TGA's efforts to confirm the existence and nature of the non-conformity. In the event of a disagreement or dispute as to the existence of a non-conformity with respect to the Equipment Warranty, the Parties will designate by mutual agreement a third party that will make the technical determination of the existence of the non-conformity and whether such non-conformity resulted from a breach of the Equipment Warranty.
- iii. If and to the extent that a TGA Machine fails to conform to the Equipment Warranty, TGA will – at TGA's sole cost, as CureVac's sole remedy, and as determined by TGA in its sole but reasonable discretion – repair or replace the TGA Machine within a reasonable time after confirming the existence and nature of the non-conformity.
- iv. If TGA repairs or replaces a TGA Machine hereunder which has an Excluded Issue (defined above), TGA may charge its standard rates and fees for such repair or replacement and the repaired or replaced TGA Machine (as applicable) shall count as an additional Machine for purposes of the Development Fee.

**Development and Option Agreement**

This Development and Option Agreement (this "**Agreement**"), dated as of 1 January 2018 (the "**Effective Date**"), is made by and between CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tübingen, Germany ("**CureVac**"), and Arcturus Therapeutics Inc., a Delaware corporation with offices at 10628 Science Center Drive # 200, San Diego, CA 92121, USA ("**Arcturus**"). Each of CureVac and Arcturus may be referred to herein as a "**Party**" or together as the "**Parties**".

**WHEREAS**, Arcturus has expertise and intellectual property relating to the development of LMD Technologies that embody or incorporate delivery systems (and components thereof) for molecular therapeutics based on or incorporating lipid-enabled and unlocked nucleomonomer agents for delivery of nucleic acids as specified in Exhibit 1.5, the Arcturus LMD Technology (as defined below); and

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below); and

**WHEREAS**, the Parties believe that certain proprietary Arcturus LMD Technology (as defined below) could be useful for the formulation and delivery of CureVac's proprietary mRNA Constructs; and

**WHEREAS**, the Parties are interested in evaluating the development of products incorporating Arcturus LMD Technology and CureVac Technology (as defined below), and Arcturus wishes to grant to CureVac, and CureVac wishes to obtain, an option to obtain a license under the Arcturus LMD Technology to develop and commercialize one or more specific products of CureVac, all in accordance with the terms and conditions set forth below.

**WHEREAS**, the Parties intend to also co-develop an ornithine transcarbamylase ("OTC") deficiency product and possibly other products under a contemporaneously executed co-development and co-commercialization agreement ("**Co-Development Agreement**").

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

**ARTICLE 1****Definitions**

The following terms and their correlatives will have the following meanings:

**1.1** "**Affiliate**" of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with the power to direct the management and policies of such entity, provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. [\*\*\*\*\*].

1.2 "Agreement" has the meaning set forth in the Preamble.

1.3 "Arcturus Background Technology," means any and all LMD Technology for delivering RNA therapeutics that is Controlled by Arcturus or any of its Affiliates as of the Effective Date or during the Term, including the LUNAR™ platform, but excluding any Arcturus Program Know-How and Arcturus Program Patents, and necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. The Patents and Know-How comprised in the Arcturus Background Technology as of the Effective Date are listed in **Exhibit 1.3** attached hereto.

1.4 "Arcturus Indemnitees" has the meaning set forth in Section 8.7(b).

1.5 "Arcturus Lipid-Mediated Delivery Technology" or "Arcturus LMD Technology," means Arcturus Background Technology and Arcturus Program Technology.

1.6 "Arcturus Program Know-How" means any and all Program Know-How owned by Arcturus in accordance with Section 6.2, including Arcturus' right and interest in any Jointly-Owned Program Know-How (as defined in Section 6.2(c)).

1.7 "Arcturus Program Patents" means any and all Patents that claim any of the Arcturus Program Know-How, including Arcturus' right and interest in any Jointly-Owned Program Patents (as defined in Section 6.2(c)).

1.8 "Arcturus Program Technology," means the Arcturus Program Know-How and the Arcturus Program Patents.

1.9 "Arcturus Work Plan Leader" has the meaning set forth in Section 2.2.

1.10 "Business Day," means a day other than a Saturday, Sunday, or bank or other public holiday in San Diego, California, USA or Tübingen, Germany or Boston, Massachusetts, USA.

1.11 "Calendar Quarter" means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31.

1.12 "Change of Control" shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the "beneficial owner", directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Arcturus' then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Arcturus representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Arcturus or has the power, directly or indirectly, to elect a majority of the members of Arcturus' board of directors, or similar governing body; or (ii) Arcturus enters into a merger, consolidation or similar transaction with another person or entity; or (iii) Arcturus sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Arcturus' consolidated total assets to which this Agreement relates; or (iv) the holders of capital stock of Arcturus approve a plan or proposal for the liquidation or dissolution of Arcturus; *provided, however*, that

(a) subsections (i) to (iii) shall only apply if the person or entity or Third Party acquiring control is (i) a pharmaceutical company which has experience in developing and/or commercializing pharmaceutical products (i.e., is a strategic, not financial investor or partner) or (ii) a competitor, i.e., a company in the business of mRNA development, manufacturing and/or commercialization and

(b) a bona fide financing transaction with Third Parties that does not otherwise meet the requirements of subsection (a) shall not constitute a Change of Control.

1.13 "Co-Development Agreement" has the meaning set forth in the Preamble.

1.14 "Concurrent Reserved List Limits" has the meaning set forth in Section 4.2(d).

1.15 "Confidential Information" of a Party means all proprietary Know-How, unpublished patent applications and other non-public information and data of a financial, commercial, business, operational, scientific or technical nature of such Party that is disclosed by or on behalf of such Party or any of its Affiliates or otherwise made available to the other Party or any of its Affiliates, whether made available orally, in writing or in electronic form in connection with this Agreement, including information comprising or relating to concepts, discoveries, inventions, data, designs or formulae in connection with this Agreement. In addition, any non-public information related to this Agreement or the Products hereunder and disclosed by a Party to the other Party (or their respective Affiliates) under the Confidentiality Agreement will be deemed such Party's Confidential Information hereunder. Program Know-How will be considered the Confidential Information of the Party (or Parties) owning such Program Know-How, and Jointly-Owned Program Know-How will be considered Confidential Information of both Parties.

1.16 "Confidentiality Agreement" means that certain Confidentiality Agreement between the Parties dated as of [\*\*\*\*\*].

1.17 "Contract Year" will refer to the twelve (12)-month period beginning with the Effective Date and on each anniversary thereafter.

1.18 "Control" or "Controlled" means, with respect to Technology, that a Party owns or has a license to use and practice the respective Patent or Know-How without violating the terms of any agreement with any Third Party.

1.19 "CTA" means a clinical trial application.

1.20 "CureVac Background Technology" means any and all mRNA Technology that is Controlled by CureVac or any of its Affiliates as of the Effective Date or during the Term, but excluding any CureVac Program Know-How and CureVac Program Patents, and necessary or useful for the research, development, manufacturing and commercialization of a Licensed Product.

1.21 "CureVac Indemnitees" has the meaning set forth in Section 8.7(a).

- 1.22 "CureVac Program Know-How" means any and all Program Know-How owned by CureVac in accordance with Section 6.2, including CureVac's right and interest in any Jointly-Owned Program Know-How.
- 1.23 "CureVac Program Patents" means any and all Patents that claim any of the CureVac Program Know-How, including CureVac's right and interest in any Jointly-Owned Program Patents (as defined in Section 6.2(c)).
- 1.24 "CureVac Program Technology" means the CureVac Program Know-How and the CureVac Program Patents.
- 1.25 "CureVac Technology" means, collectively, CureVac Background Technology and CureVac Program Technology.
- 1.26 "CureVac Work Plan Leader" has the meaning set forth in Section 2.2.
- 1.27 "Diligent Efforts" means, with respect to the efforts to be expended by each Party with respect to any activity set forth in the Work Plan, active and sustained efforts as such Party would normally use to accomplish a similar task or obligation under similar circumstances to conduct the applicable activity, or to attempt to achieve the applicable requirement or goal, in a reasonable manner that is consistent with the achievement of the goals set forth in the Work Plan (including the level of FTE funding and budget for out-of-pocket and Third Party contractors set forth therein) and the terms of this Agreement.
- 1.28 "Disclosing Party" has the meaning set forth in Section 7.1.
- 1.29 "DNA Sequence" means any sequence of DNA intended to be inserted or copied into a DNA Target as set forth on **Exhibit 4.2**.
- 1.30 "DNA Target" means a defined coding and/or non-coding sequence (e.g., a gene) within the genome of a human or animal cell or virus and/or variants thereof.
- 1.31 "DNA Editing Protein" means a Target encoded by an mRNA that upon delivery to a cell is intended to Gene Edit a human, animal or virus coding or non-coding sequence within the genome of the human or animal cell or virus.
- 1.32 "Dual Improvement Technology" is an Improvement to both the Arcturus Background Technology and the CureVac Background Technology at the time such Improvement is discovered, created, conceived, developed or reduced to practice.
- 1.33 "Effective Date" has the meaning set forth in the Preamble.
- 1.34 "Escrow Agent" shall be the agent selected by Arcturus in good faith to maintain in confidence the Restricted Target List and to respond to CureVac's Target Notices on behalf of Arcturus.
- 1.35 "Exclusive License Agreement" means an exclusive license agreement in the form attached hereto as **Exhibit 1.34**.
- 1.36 "Executive Officers" has the meaning set forth in Section 2.3(d).

1.37 "Formulated Product(s)" means a product (including Licensed Products) manufactured by or on behalf of Arcturus in accordance with the Work Plan that incorporate CureVac mRNA Constructs formulated with Arcturus Lipid-Mediated Delivery Technology.

1.38 "FTE" means a full-time person, or more than one person working the equivalent of a full-time person, where "full-time" is determined by the standard practices in the biopharmaceutical industry in the geographic area in which such personnel are working, consisting of a total of 1880 hours per year of Work directed to the Work Plan or work pursuant to this Agreement. Any person who devotes less than 1880 hours per year on the applicable activities shall be treated as an FTE on a pro-rated basis, based upon the actual number of hours worked by such person on such activities, divided by 1880. Any person who devotes more than 1880 hours per year on the applicable activities shall be treated as one (1) FTE, i.e., in no event shall one person be counted as more than one FTE. FTE activities shall include the performance of the Work and scientific management oversight, as reasonably required, but, for clarity, exclude (i) the work of general corporate or administrative personnel, overhead (including facilities costs), insurances and similar costs and (ii) the manufacture of Formulated Product for research and clinical activities as set forth in the Work Plan.

1.39 "FTE Costs" means an initial rate of [\*\*\*\*\*] Dollars (\$[\*\*\*\*\*]) per FTE per year, which shall apply through [\*\*\*\*\*]. Thereafter, the FTE Rate shall be changed bi-annually at the end of each second calendar year to reflect any percentage increase or decrease (as the case may be) in the Consumer Price Index in the U.S. (index for all items) ("CPI") (based on the change in the CPI from the most recent index available as of the Effective Date to the most recent index available as of the date of the calculation of such revised FTE Cost rate).

1.40 "Gene Edit" means to correct, modify, insert, delete, activate, inactivate or repair a coding or non-coding sequence within the genome of a human or animal cell or virus and "Gene Editing" has the corresponding meaning.

1.41 "Guide RNA" means a modified or unmodified RNA sequence intended to direct a DNA Editing Protein to a specific DNA Target.

1.42 "Improvement" means, with respect to the Arcturus Background Technology and/or the CureVac Background Technology any change, modification, variation or revision of such Technology, whether patentable, copyrightable or not.

1.43 "Initial Term" has the meaning set forth in Section 9.1(a).

1.44 "IND" means an investigational new drug.

1.45 "Indemnified Party," has the meaning set forth in Section 8.7(c).

1.46 "Indemnification Claim Notice" has the meaning set forth in Section 8.7(c).

1.47 "IP Subcommittee" has the meaning set forth in Section 6.4.

1.48 "JDC" has the meaning set forth in Section 2.3(a).

1.49 "JDC Deadlock" has the meaning set forth in Section 2.3(d).

1.50 "Jointly-Owned Program Patents" has the meaning set forth in Section 6.2(c).

1.51 "Know-How" means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form now known or hereafter developed.

1.52 "Law" or "Laws" means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.

1.53 "License Agreement" means an Exclusive License Agreement or Non-Exclusive License Agreement.

1.54 "Licensed Product" means [\*\*\*\*\*] product comprised of (i) Lipid-mediated delivery systems, which are covered by Arcturus Lipid-Mediated Delivery Technology; and containing (ii) one or more mRNA Constructs as the active pharmaceutical ingredient(s) intended to express a Target which is subject to a License Agreement. In case of two or more mRNA Constructs these constructs may be contained in the same or separate LMDs. Licensed Product includes mRNA-LMD products which are administered jointly or separately, and mRNA-LMD products which are administered simultaneously or sequentially as a combination medicinal product or treatment. For Gene Editing purposes, a Licensed Product may contain other RNA(s) (i.e., Guide RNA(s)) and/or DNA Sequence(s) which can be delivered together or separately (combined in one LMD or delivered in separate LMDs), in addition to the one or more mRNA Constructs intended to express the DNA Editing Protein.

1.55 "LMD Technology" means Technology that claims, embodies or incorporates delivery systems (and components thereof) based on or incorporating lipid-mediated delivery (LMD) systems.

1.56 "Losses" has the meaning set forth in Section 8.7(a).

1.57 "Material Transfer Agreement" means the Material Transfer Agreement dated [\*\*\*\*\*], as amended from time to time.

1.58 "Materials" means any tangible chemical or biological material, including any compounds, LMD, DNA, RNA (including mRNA), clones, cells, and any expression product, progeny, derivative or other improvement thereto, along with any tangible chemical or biological material embodying any Know-How, Controlled by a Party.

1.59 "Maximum Target" has the meaning set forth in Section 4.2(d).

1.60 "mRNA Construct" means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5' UTR, the associated open reading frame, 3'UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct.

- 1.61 "mRNA Technology," means Technology that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.
- 1.62 "Non-Exclusive License Agreement" means a form Non-Exclusive License Agreement to be negotiated by the Parties within [\*\*\*\*\*] days following the execution of this Agreement, on the basis of the terms and conditions of the Exclusive License Agreement and taking into account the specific circumstances of a non-exclusive licensing Option exercise by CureVac. Such form Non-Exclusive License Agreement shall be incorporated by reference into this Agreement as **Exhibit 1.61**.
- 1.63 "Non-Rare Disease Target" means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of equal to or more than [\*\*\*\*\*] in [\*\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Non-Rare Disease Target.
- 1.64 "Option" has the meaning set forth in Section 5.1
- 1.65 "Option Exercise Fee" has the meaning set forth in Section 5.3.
- 1.66 "Option Notice" has the meaning set forth in Section 5.1.
- 1.67 "Option Period" has the meaning set forth in Section 5.1.
- 1.68 "Patent(s)" means an (i) issued patent, a patent application, and a future patent issued from any such patent application, (ii) a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (i), and (iii) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (i) or (ii), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder).
- 1.69 "Pre-Existing Restrictions" means, with respect to a Target on the Restricted Target List pursuant to Section 4.2(a), that Arcturus or its Affiliates have granted to a Third Party with respect to a Target a non-exclusive, co-exclusive or an exclusive license or option pursuant to a *bona fide* written agreement that is in effect at the time of a request by CureVac pursuant to Section 4.2.
- 1.70 "Program" means each program of activities using Arcturus LMD Technology and CureVac Technology for the development of a Licensed Product incorporating CureVac's mRNA Constructs that the Parties engage in under this Agreement pursuant to the Work Plan. "Programs" shall mean several or all of these programs, as the context admits.
- 1.71 "Program Improvement Technology," means Program Technology which constitutes an Improvement to either Party's or both Parties' Technology at the time such Improvement is discovered, created, conceived, developed or reduced to practice. Program Improvement Technology will be either Sole Improvement Technology of a Party or Dual Improvement Technology of the Parties. For the avoidance of doubt, Program Improvement Technology will not include any Improvement arising out of a Party's independent research and development efforts or collaborations with Third Parties, in each case conducted outside of the Program; *provided* that such Improvement is not developed based upon, using or with reference to the Technology, Confidential Information or Material of the other Party.

1.72 "Program Know-How" means all Know-How, including Know-How embodied in Materials, created, conceived, developed or reduced to practice in connection with activities performed pursuant to the Work Plan or using Formulated Product as set forth in the Work Plan under this Agreement (whether solely by or on behalf of one Party or jointly by or on behalf of the Parties).

1.73 "Program Technology" means all Program Know-How and all Patents directed to or disclosing such Program Know-How.

1.74 "Rare Disease Target" means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of less than [\*\*\*\*\*] in [\*\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Rare Disease Target.

1.75 "Receiving Party" has the meaning set forth in Section 7.1.

1.76 "Records" has the meaning set forth in Section 3.3(a).

1.77 "Reserved Target" means a Target with respect to which CureVac shall have delivered to the Escrow Agent a Target Notice and in response thereto the Escrow Agent shall have delivered to CureVac a Target Response Notice under Section 4.2(c)(i) for such Target to become a Reserved Target. A Reserved Target that is replaced pursuant to Section 4.2 will no longer be deemed a Reserved Target.

1.78 "Reserved Target List" means collectively, the list of all Reserved Targets.

1.79 "Restricted Target List" has the meaning set forth in Section 4.2(a).

1.80 "Sole Improvement Technology," means, without regard to inventorship, an Improvement to one Party's Technology that is not also an Improvement to the other Party's Technology at the time such Improvement is discovered, created, conceived, developed or reduced to practice. For clarity, Sole Improvement Technology of a Party shall exist only with respect to activities of the Parties pursuant to this Agreement (i.e., not to any Improvement or Technology independently developed by one Party without the use of Technology of the respective other Party).

1.81 "Solely-Owned Program Know-How" has the meaning set forth in Section 6.2(c).

1.82 "Solely-Owned Program Patents" has the meaning set forth in Section 6.2(c).

1.83 "Solely-Owned Program Technology" has the meaning set forth in Section 6.2(c).

1.84 "Target" means

(a) up to N proteins (N = [\*\*\*\*\*]), including all possible combinations resulting from removing one of the N proteins (N minus [\*\*\*\*\*] proteins), together with all variants of such proteins, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof; provided, however, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring protein; and

(b) [\*\*\*\*\*] antigens of a given pathogen, including [\*\*\*\*\*] antigen and any combination of such antigens, together with all variants of such antigens, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof provided, however, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring antigen; and

(c) a DNA Target, provided, however, that the first DNA Target for each DNA Editing Protein would not count as a Target. Each subsequent DNA Target for this DNA Editing Protein would count as a Target. For clarity, a DNA Editing Protein would be defined as a Target under (a) above and count as a single Target.

If a given protein, e.g., an antibody or enzyme, comprises separated amino acid chains which might be delivered by separated mRNA Constructs, such protein would be defined as one Target.

- 1.85 "Target Notice" has the meaning set forth in Section 4.2(b).
- 1.86 "Target Reservation Request Form" has the meaning set forth in Section 4.2 (b).
- 1.87 "Target Response Notice" has the meaning set forth in Section 4.2(c).
- 1.88 "Technology" means collectively Patents and Know-How.
- 1.89 "Term" has the meaning set forth in Section 9.1.
- 1.90 "Third Party" means any person or entity other than CureVac, Arcturus and their respective Affiliates.
- 1.91 "Third Party Claims" has the meaning set forth in Section 8.7(a).
- 1.92 "Work Plan" has the meaning set forth in Section 3.1(a).
- 1.93 "Work Plan Leaders" has the meaning set forth in Section 2.2.
- 1.94 "Work" means the activities to be performed by Arcturus pursuant to the Work Plan.

## ARTICLE 2

### Fee and Governance

2.1 **One-Time Fee.** In consideration for the rights granted by Arcturus to CureVac hereunder, including the right to reserve Targets in accordance with Section 4 below, within thirty (30) days as of the Effective Date, CureVac shall pay to Arcturus a one-time non-refundable fee of [\*\*\*\*\*].

2.2 **Management.** Management of the Program activities will be under the responsibility of the individual designated in writing within [\*\*\*\*] days of the Effective Date for Arcturus (the "Arcturus Work Plan Leader") and of the individual designated in writing within [\*\*\*\*] days of the Effective Date for CureVac (the "CureVac Work Plan Leader"), and together with the Arcturus Work Plan Leader, the "Work Plan Leaders"). Each Work Plan Leader will be the primary point of contact for the other Party on all matters relating to the Program activities.

2.3 **Joint Development Committee.**

(a) **Development Committee.** As soon as practicable, the Parties will establish a Joint Development Committee, comprised of up to [\*\*\*\*] representatives of CureVac and up to [\*\*\*\*] representatives of Arcturus (the "JDC"). One such representative from each Party will be such Party's Work Plan Leader. Each Party may replace its Work Plan Leader and other JDC representatives at any time upon written notice to the other Party, provided, however, that each Party shall use Diligent Efforts to ensure continuity on the JDC. With the consent of the other Party (which will not be unreasonably withheld, delayed or conditioned), each Party may invite non-voting employees and consultants to attend meetings of the JDC, subject to their agreement to be bound to the same extent as a permitted subcontractor under Section 3.4.

(b) **Meetings.** While in existence, the JDC will meet each Calendar Quarter by teleconference, videoconference or in person and, at a minimum, one of such meetings each calendar year will be in person (which in-person meeting will be held on an alternating basis in Tübingen, Germany and in San Diego, CA), unless agreed otherwise by the JDC representatives. The JDC will have a quorum if at least one (1) representative of each Party is present or participating. Each Party will be responsible for all of its own expenses of participating in the committee meetings. The Parties will endeavor to schedule meetings of the JDC at least [\*\*\*\*] months in advance. The Parties will alternate in preparing the meeting agenda, and the Party that was responsible for preparing the meeting agenda will prepare and circulate for review and approval by the other Party written minutes of such meeting within [\*\*\*\*] days after such meeting. The Parties will agree on the minutes of each meeting promptly, but in no event later than the next meeting of the JDC.

(c) **Responsibilities.** The JDC will oversee and supervise the overall performance of the Work Plan, prepare and maintain minutes of meetings and provide a forum for discussion of the Programs and Work Plans, and within such scope will:

- (i) review the efforts of the Parties and allocate those resources under the Work Plan committed by the Parties hereunder;
- (ii) revise and approve any revisions to the Work Plan regularly and in any event at least [\*\*\*\*] days before the start of each Calendar Quarter during the Term;
- (iii) coordinate the activities of the Parties under the Work Plan and oversee the implementation thereof;

- (iv) form such other committees as the JDC may deem appropriate, provided that such committees may make recommendations to the JDC but may not be delegated JDC decision-making authority;
- (v) address such other matters relating to the activities of the Parties under this Agreement as either Party may bring before the JDC, including any matters that are delegated to the JDC to decide as provided in this Agreement, such as CureVac's consent to subcontractors; and
- (vi) attempt to resolve any disputes on an informal basis.

**(d) Decision-making.** The JDC will make decisions only by unanimous consent, with each Party having only one vote by its representatives (regardless of the number of each such representatives present from a Party). In the event the JDC is unable to reach agreement as to a matter within the JDC's jurisdiction (such event, a "**JDC Deadlock**"), upon the written request of a Party, such matter will be referred to a senior executive of each Party (the "**Executive Officers**") (or their designees, which designee is required to have decision-making authority on behalf of such Party), who will attempt in good faith to resolve such JDC Deadlock by negotiation and consultation for a [\*\*\*\*\*]- day period following receipt of such written notice. If, despite such efforts, agreement on a particular matter cannot be reached by the Executive Officers within such [\*\*\*\*\*]- day period, then CureVac shall have the final decision-making authority with respect to such JDC Deadlock, provided, however, that

(i) CureVac's final decision-making authority shall not apply if CureVac proposes (a) to amend the Work Plan to materially accelerate, decelerate, increase, add or remove planned activities to be performed by Arcturus thereunder, including significantly reducing or eliminating Arcturus' responsibilities for an activity thereunder; (b) to materially change the Arcturus resources required to perform the Work Plan activities, including the timing of such resources; or (c) to require allocation by Arcturus of FTEs materially greater than or less than those provided for in the Work Plan. For purposes of this Section 2.3(d), the term "materially" shall mean, in relation to resources and FTE amounts set forth in the Work Plan, [\*\*\*\*\*] percent ([\*\*\*\*\*]%) or more of the relevant resource or FTE, and

(ii) In the event that CureVac desires Work with respect to which it does not have final decision-making authority pursuant to Section 2.3(d)(i) or is otherwise materially outside of the Work Plan with respect to a Program, Arcturus shall consider any proposal from CureVac in writing in good faith.

**(e) Limits on JDC Authority.** Each Party will retain the rights, powers and discretion granted to it under this Agreement and no such rights, powers, or discretion will be delegated to or vested in the JDC unless such delegation or vesting of rights is expressly provided for in this Agreement or the Parties expressly so agree in writing. The JDC will not have the power to amend, modify or waive compliance with this Agreement (other than as expressly permitted hereunder). Notwithstanding anything herein to the contrary, the JDC will not have the power to require any Party to perform any activities that are materially greater in scope or more costly than those provided for in the Work Plan then in effect or otherwise under this Agreement.

## ARTICLE 3

**The Program**

3.1 **Programs Generally.** The Parties will jointly conduct each Program. It is intended that Arcturus will be responsible for the lipid chemistry and LMD formulation using the Arcturus LMD Technology, and for characterization work, CureVac will be responsible for mRNA Construct development, and Arcturus and CureVac will each undertake preclinical studies as allocated in each Work Plan.

(a) **Work Plan Preparation.** The development activities to be undertaken by the Parties with respect to a Program will be described in a detailed written development plan (the "Work Plan"). The initial Work Plan includes a description of activities undertaken by the Parties under the Material Transfer Agreements and prior to the execution of this Agreement. The initial Work Plan, which will cover the initial twelve (12) months of the Program, is attached hereto as **Exhibit 3.1(a)**.

(b) **Work Plan Contents.** Each Work Plan will include (i) all activities to be undertaken by each Party with respect to a Program, including Arcturus' manufacture and supply of Formulated Product, (ii) a detailed budget of the FTE activities, FTE Costs and out-of-pocket costs to be incurred by Arcturus for which CureVac will reimburse Arcturus in connection with the performance of the Work, (iii) the Materials to be provided by one Party to the other, (iv) forecasting and ordering procedures for the Formulated Product, and (v) the projected timelines for completion of all activities set forth therein. The goal of each Work Plan and related Program will be to evaluate and produce tailored Arcturus LMD Technology formulations that are safe and efficacious for delivery of CureVac's mRNA Constructs and to advance the development of such mRNA-LMD formulations against a Target. Each Program will include activities with respect to Reserved Targets but may also include activities with respect to Targets that are not on the CureVac Reserved Target List. As defined in the Work Plan, CureVac will perform up to [\*\*\*\*\*] pivotal animal studies to make a go/ no go decision for a particular LMD composition for a given Target.

(c) **Amendments to the Work Plan.** Each Work Plan will be reviewed as necessary at each meeting of the JDC, and at any other time upon the request of either Party, and will be modified in accordance with the objectives defined in Section 3.1(b) and as appropriate at the direction of the JDC to reflect material scientific (and other) developments. Each Calendar Quarter, the JDC will update the Work Plans to cover the subsequent six (6) months of the Program in detail. In all events, the Work Plan will be consistent and not conflict with the terms of this Agreement, and in the event of any conflict between the Work Plan and this Agreement, the terms of this Agreement will control.

(d) **Obligations Under the Work Plans.** During the Term, each Party will use Diligent Efforts and perform the Work in a professional manner and in accordance with the Work Plan, and each Party will use Diligent Efforts to meet the objectives and timelines set forth therein. It is understood that the activities and goals of the Work Plan are experimental and that successful results cannot be guaranteed. The Parties will otherwise conduct the Program on the terms and conditions set forth in this Agreement and in accordance with the Work Plan. Each Party will cooperate with and provide reasonably requested non-financial support to the other Party in such other Party's performance of its responsibilities under the Work Plan. The Parties will use Diligent Efforts to develop LMD formulations which do not infringe Third Party Technology. In addition to the reporting obligations set forth in Section 3.3(b), each Party will keep the other Party reasonably informed of such Party's activities under the Program and will reasonably consult with such other Party and consider such other Party's comments and advice with respect to all material decisions relating to such activities in good faith.

(e) **Supply of Formulated Products.** Arcturus will use Diligent Efforts to manufacture and supply CureVac with Formulated Product as set forth in the Work Plan.

(f) **Technology Transfer to Contract Manufacturing Organization.** Following CureVac's exercise of an Option and entry into a License Agreement, Arcturus will use Diligent Efforts to transfer the formulation process for the Licensed Products that are intended to express the intended Target to a reputable and competent GMP manufacturer selected by CureVac and reasonably acceptable to Arcturus. Arcturus and CureVac will agree on a technology transfer or other means to support availability of Licensed Products as part of the License Agreement. Specifically, the License Agreement will provide that upon written request by CureVac, Arcturus will conduct a technology transfer to CureVac and/or its designee(s). Such designee(s) may be an Affiliate, sublicensee or Third Party manufacturers, and which Third Party manufacturers may also be a backup manufacturer or a second manufacturer of Licensed Products as required for the applicable transferee of the then-current process.

### 3.2 **FTEs.**

(a) **Generally.** Arcturus will perform the Work under the Work Plan, and as part of the Program CureVac will fund up to [\*\*\*\*\*] scientists per year at Arcturus to perform the Work as defined and in accordance with the Work Plan for a period of up to [\*\*\*\*\*] months at the FTE Costs. The Parties may agree to extend the performance of Work by Arcturus for an additional year.

(b) **FTEs.** Arcturus shall ensure that those individuals selected by Arcturus to perform the Work and Services and otherwise support the activities to be undertaken by Arcturus pursuant to the Work Plan will have sufficient scientific expertise, skill, training and competency to perform the proposed work and have similar skills, training and competency as those FTEs employed by Arcturus to perform work on Arcturus' internal programs and for Third Parties. In the event that CureVac has concerns regarding the selection of an individual to perform the Work or other activities under this Agreement, the Parties will discuss such concerns in good faith.

(c) **Reimbursement.** CureVac will reimburse Arcturus on a Calendar Quarter-by-Calendar Quarter basis for FTE Costs incurred to conduct the Work Plan in accordance with the Work Plan or pre-agreed by the JDC. Arcturus will send a reasonably detailed invoice to CureVac no later than [\*\*\*\*\*] days after the end of each Calendar Quarter, which invoice shall include a summary of all activities by the name of each FTE, number of hours devoted by each such FTE, and activity performed by each such FTE during such Calendar Quarter. CureVac agrees to pay undisputed amounts in each such invoice within [\*\*\*\*\*] days of CureVac's receipt thereof. Any amounts subject to dispute shall be reviewed by the JSC and if not resolved within [\*\*\*\*\*] days, shall be subject to Section 10.1.

**3.3 Program Records, Reports, Materials and Formulated Product.**

(a) **Records.** Each Party will maintain, or cause to be maintained, records of its activities under a Program in sufficient detail and in good scientific manner appropriate for scientific, Patent and regulatory purposes, which will properly reflect all work included in a Program ("**Records**") for a period of at least [\*\*\*\*\*] years after the creation of such Records. CureVac will have the right to receive a copy of any such Records maintained by Arcturus which shall be used subject to the terms of this Agreement. Arcturus will have the right to receive a copy of any such Records maintained by CureVac to the extent such Records are required by Arcturus to exercise its rights or perform its obligations under this Agreement.

(b) **Program Reports.** During the Term, each Party will furnish to the JDC a summary written report within [\*\*\*\*\*] days after the end of each Calendar Quarter describing its progress under the Work Plan as part of a Program. Within [\*\*\*\*\*] days following expiration or earlier termination of this Agreement, each Party will furnish to the JDC a final summary written report. Arcturus shall promptly provide all additional information with respect to the Arcturus LMD Technology that is reasonably requested by CureVac and necessary or useful for CureVac to determine whether to exercise an Option with respect to any Target.

(c) **Materials and Formulated Product.**

(i) The Parties will, during the Term, furnish to each other Materials which comprise, embody or incorporate CureVac Technology or Arcturus LMD Technology only as expressly set forth in the Work Plan.

(ii) Arcturus will furnish to CureVac the quantities of Formulated Product as set forth in the Work Plan. In the event requested in writing by CureVac, to furnish additional Formulated Product of up to [\*\*\*\*\*]% in excess of the total quantities set forth in the Work Plan for a Program, Arcturus shall use Diligent Efforts to supply such quantities. Arcturus shall consider in good faith furnishing additional quantities which may be required in the performance of the Program pursuant to any separate request by CureVac.

(iii) In addition, each Party will, upon the other Party's reasonable written request, furnish to such other Party other samples of Materials which comprise, embody or incorporate CureVac Technology or Arcturus LMD Technology that are in such Party's Control and are reasonable (both in quantity and identity) and useful for the other Party to carry out its responsibilities under the Work Plan, provided (A) such Materials are reasonably and readily available in excess of the providing Party's own requirements, and (B) supply of such Materials will not, in the providing Party's reasonable judgment, (1) conflict with the providing Party's internal or Third Party research programs, (2) conflict with the providing Party's internal policies regarding such Materials or (3) violate any agreement to which the providing Party is a party.

(iv) Each Party will use such Materials only in accordance with the Work Plan and otherwise in accordance with the terms and conditions of this Agreement, and the provision of Materials hereunder by either Party will not constitute any grant, option or license under any Patents or Know-How, except as expressly set forth herein. In any event, all Materials delivered to the receiving Party will remain the sole property of the providing Party and will be used in compliance with all applicable Laws. The Materials supplied under this Agreement will be used with prudence and appropriate caution in any experimental work, because not all of their characteristics may be known. In the event that the Parties enter into a License Agreement with respect to a Program, the Materials may be retained subject to such License Agreement.

(v) Except with the prior written consent of the supplying Party, the Party receiving any Materials will not distribute or otherwise allow the release of Materials to any Third Party, except, with respect to either Party, to any permitted subcontractors under Section 3.4 and, with respect to CureVac, to any Third Party licensee or assignee or potential licensee or assignee of CureVac Technology in accordance with this Agreement.

**3.4 Permitted Subcontracting.** Either Party may subcontract its activities to be performed under the Work Plan to a Third Party, provided that (i) Arcturus shall obtain, through the JSC, consent by CureVac for such subcontracting, such consent not to be unreasonably withheld, delayed or conditioned, and (ii) CureVac shall inform Arcturus about any subcontracting (including the identity of the subcontracting party and work to be performed) without undue delay, and in any event within [\*\*\*\*\*] Business Days of entry into the subcontracting agreement. Any such subcontracting Party will have entered into a written agreement with the subcontractor that

(a) includes terms and conditions protecting and limiting use and disclosure of Confidential Information and Materials and Know-How at least to the same extent as under this Agreement, and the subcontracting Party shall use Diligent Efforts to ensure compliance with the obligations of Confidentiality (including return or destruction on termination) as set forth in Article 7,

(b) provides for reasonable auditing rights, with regard to the work provided by the Third Party subcontractor, of the subcontracting Party and third parties authorized by the subcontracting Party, and

(c) requires such Third Party subcontractor and its personnel to assign to the subcontracting Party all right, title and interest in and to any Patents and Know-How and Materials created, conceived, developed or reduced to practice in connection with the performance of subcontracted activities pursuant to this Agreement, consistent with the requirements of Section 6, provided, however, that in the event of a subcontracting or sublicensing to a collaboration partner of CureVac, CureVac shall obtain at least a customary non-blocking, back-license of Improvements to Arcturus Background IP generated by or jointly with such collaborators of CureVac, i.e., a non-exclusive, royalty-free, and sublicensable license under the applicable Know-How and Patents generated (if any).

**3.5 Program Licenses.**

(a) **By Arcturus.** Subject to the terms and conditions of this Agreement, Arcturus hereby grants to CureVac a worldwide, non-exclusive license under the Arcturus LMD Technology, including the right to grant sublicenses, limited in accordance with this Section 3.5, to research and pre-clinically develop (including the right to manufacture for such purposes), but expressly without the right to clinically develop or commercialize (including the right to manufacture for such purpose) except with the prior written consent of Arcturus) and in any event solely to the extent necessary:

(i) to enable CureVac, Affiliates of CureVac and subcontractors selected in accordance with Section 3.4 to perform CureVac's activities set forth in the Work Plan,

(ii) to conduct research projects with academic partners (any such agreements of which (i) shall include back-licenses or grants of rights by the academic partner to Patents and Know-How (other than data) to meet the requirements of Section 6 and (ii) will not require Arcturus to enter into a license agreement with or make payments to such academic partner in order for Arcturus to use and exploit the Arcturus Background Technology), and

(iii) to permit, under confidentiality and non-use restrictions in accordance with this Agreement, to Third Party collaborators of CureVac who license or intend to license CureVac Technology to explore the Arcturus LMD Technology (any such agreements of which shall include back- licenses by the Third Party collaborator to Patents and Know-How (other than data) consistent with the requirements of Section 6).

(b) **By CureVac.** Subject to the terms and conditions of this Agreement, CureVac hereby grants to Arcturus a worldwide, non-exclusive license under CureVac Technology, solely to the extent necessary to enable Arcturus to perform its activities set forth in the Work Plan and for no other purpose. The foregoing license shall not include the right to grant sublicenses, except to permitted subcontractors in accordance with Section 3.4.

(c) **No Other Licenses.** No license or right is or will be created or granted hereunder by implication, estoppel or otherwise. All licenses and rights are or will be granted only as expressly provided in this Agreement.

**ARTICLE 4****Reserved Targets**

**4.1 Generally.** CureVac will select the Targets that will be the subject of the Works to be performed as part of a Program from the Reserved Target List. CureVac shall have the right, but not the obligation, to reserve Targets (or replace a Reserved Target with a new Target) in accordance with this Article 4.

**4.2 Restricted Target List.**

**(a) Pre-existing Restrictions.** Arcturus shall maintain at the Escrow Agent an updated monthly (as of the final day of each month) list of Targets that are subject to Pre-Existing Restrictions (the "Restricted Target List"). The Restricted Target List will identify whether the Pre-Existing Restrictions are exclusive, non-exclusive or co-exclusive. Arcturus represents, warrants and covenants to CureVac that (i) the Restricted Target List is and will at all times be accurate in accordance with this Section 4.2(a); and (ii) Arcturus or the Escrow Agent will not add any Reserved Targets to the Restricted Target List or grant to any Third Party any licenses or options under the Arcturus LMD Technology with respect to the then current Reserved Target List that would preclude Arcturus from entering into a License Agreement with respect to such Reserved Target as set forth herein.

**(b) Target Notices.**

(i) If CureVac desires to include a Target as a Reserved Target hereunder, CureVac will notify the Escrow Agent in writing (with contemporaneous information in writing to Arcturus about the notification to the Escrow Agent) of the Targets for potential inclusion on the Reserved Target List, which notice will provide (i) the information on the Target Reservation Request Form attached hereto as **Exhibit 4.2**; and (ii) the identity of each Reserved Target (if any) that CureVac desires to remove as a Reserved Target (each such notice, a "Target Notice"). For clarity, the Target Notices shall not include more Targets than the Maximum Targets then available (taking into consideration any removed Targets previously reserved) and shall be deemed to be a request for an exclusive license at the outset unless there is a Pre-Existing Restriction. For clarity, CureVac's rights to enter into a Non-Exclusive License Agreement shall apply only if the Pre-Existing Restriction permits a non-exclusive license right to such proposed Reserved Target.

(ii) Notwithstanding the formal Target reservation mechanism described herein, Arcturus and the Escrow Agent will in good faith respond to any interim requests (not to exceed [\*\*\*\*\*] per month) on whether certain Targets can be reserved as Reserved Targets prior to the monthly consideration date, in order to assist CureVac in planning of development projects. For clarity, the interim requests shall not include more Targets than the Maximum Targets then available (taking into consideration any removed Targets previously reserved). In case of an interim request, the Escrow Agent (i) will request from Arcturus an update of the Reserved Target List, such update to be provided by Arcturus to the Escrow Agent within [\*\*\*\*\*] Business Days of the request, and (ii) provide CureVac with a Target Response Notice in accordance with subsection (c).

(c) **Target Response Notices.**

(i) The Escrow Agent, on behalf of Arcturus, will review each Target Notice provided by CureVac hereunder to determine whether or not any such proposed Target is on the Restricted Target List and if listed, the applicable Pre-Existing Restriction as of the date of such Target Notice. Within [\*\*\*\*\*] days of the Escrow Agent's receipt of a Target Notice, the Escrow Agent will provide CureVac with written notice that includes the information set forth in subsection (c)(ii) and (iii) (each such notice, a "Target Response Notice").

(ii) If, as of the date of CureVac's Target Notice for a Target, such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Restrictions that restrict Arcturus from granting the applicable license (i.e., an exclusive or non-exclusive license in accordance with a License Agreement) to CureVac under the Arcturus LMD Technology with respect to such Target, then such Target shall not be available to become a Reserved Target. The Target Response Notice issued for such Target will certify to CureVac that such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Restrictions that restrict Arcturus from granting the applicable license.

If, as of the date of CureVac's Target Notice for a Target, such Target is not listed on the Restricted Target List, then such Target will become a Reserved Target and will be added to the Reserved Target List subject to the Concurrent Reserved List Limits set forth in subsection (d) below. To the extent that the Pre-Existing Restriction is non-exclusive, then such Target may be added by CureVac to Reserved Target List, but CureVac shall only have the option to enter into a Non- Exclusive License Agreement.

(d) **Concurrent Reserved List Limits and Removal of Targets.** The following concurrent reserved list limits will apply to all Reserved Targets ("Concurrent Reserved List Limits").

(i) Reserved Targets and Removal thereof. CureVac may select Reserved Targets up to the totals allowed for in subparagraph (ii) below, in accordance with the process specified in Sections 4.2(b) and (c). CureVac shall have the right to remove a Target or replace a Target on the Reserved Target List with another Target, in accordance with the process specified in Section 4.2(b), provided (A) the total number of Targets on the Reserved Target List does not exceed the Maximum Targets at any one time; and (B) a newly nominated Target is not on the Restricted Target List. Any abandoned Target(s) revert(s) back to Arcturus.

(ii) Maximum Number Reserved Targets. CureVac will have the right to select up to [\*\*\*\*\*] Targets at any one time to be placed on the Reserved Target List as exclusive Reserved Targets; provided that the [\*\*\*\*\*] total shall be reduced by each exercise of an Option (the "Maximum Targets") (e.g., [\*\*\*\*\*]), with such reduction in the total Targets applying from and after the date of exercise of an Option.

(iii) For clarification, the selection of any program under the Co-Development Agreement shall not constitute the selection of a Target in accordance with this Section 4.2. If one of the Reserved Targets is selected for co-development under the Co-Development Agreement, such Reserved Target shall be removed from the Reserved Target List with the effect that CureVac shall be entitled to nominate a new Target in accordance with this Section 4.2.

**4.3 Expiration of Pre-Existing Restrictions.** If any Pre-Existing Restrictions identified in a Target Response Notice that precluded Arcturus from granting CureVac a license (whether or not CureVac has elected to designate such Target on the Reserved Target List on a non-exclusive basis subject to the Pre-Existing Restriction) under the Arcturus LMD Technology later expire or otherwise are modified or terminate such that Arcturus is no longer precluded under the terms of the applicable Third Party agreement from granting a license to CureVac with respect to such Target, the Escrow Agent will notify CureVac of such event and CureVac will have an exclusive option, for a period of [\*\*\*\*\*] days following delivery of notice to CureVac, to add (or extend its rights as identified by the Escrow Agent with respect to) such Target to the Reserved Target List as a Reserved Target in accordance with Section 4.2(c), subject to the Concurrent Reserved List Limits. For clarity, CureVac will at all times thereafter have the right to provide a Target Notice for such Target to the Escrow Agent pursuant to Section 4.2(b) but such Target Notice will be subject to any intervening Pre-Existing Restrictions.

**4.4 Escrow Agent.** Arcturus shall ensure that the Escrow Agent meets the requirements set forth herein. All costs and expenses incurred through the Escrow Agent will be borne by Arcturus.

## ARTICLE 5

### CureVac License Options

#### 5.1 Option.

(a) From the period commencing on the Effective Date and ending on the expiration of the Term (the "Option Period"), CureVac will have a total of [\*\*\*\*\*] options (each, an "Option"), on a Reserved Target-by-Reserved Target basis, to enter into a maximum of [\*\*\*\*\*] licenses under the Arcturus LMD Technology with respect to the development, manufacture and commercialization of Licensed Products containing mRNA Constructs intended to express such Reserved Target in the form of the License Agreement, *provided, however*, that

(i) to the extent the Reserved Target is only available on a non-exclusive basis, the Parties shall enter into a Non-Exclusive License Agreement, and

(ii) the appendices to the License Agreement are to be prepared or updated for each specific Target, in accordance with the terms of this Agreement.

(b) CureVac may exercise each such Option by providing to Arcturus, prior to the expiration of the Term, irrevocable written notice of Option exercise, setting forth the particular Reserved Target which is intended to be expressed by the Licensed Products (each such notice, an "Option Notice"). A separate Option Notice and Option Exercise Fee will be required for each License Agreement with respect to which CureVac exercises an Option pursuant to this Section 5.1, and CureVac will pay to Arcturus the Option Exercise Fee for each such License Agreement as set forth in Section 5.3. If not exercised prior to the expiration of the Term, the Options granted to CureVac under this Article 5 will terminate in full and will no longer be exercisable. In the event that CureVac terminates a license(s) during the Term, the Target(s) subject to the license(s) will be removed from the Reserved Target List and the number of remaining Options and/or License Agreements shall be reduced by one (1) (i.e., the exercise of an Option reduces the total number of Options remaining by one regardless of whether CureVac elects to continue such License Agreement in effect).

(c) In the event that CureVac terminates a License Agreement during the Term, no additional or replacement Options shall be granted or reinstated and the Target(s) subject to such license(s) will no longer be available as a Target pursuant to this Agreement.

5.2 **CureVac's Exercise of Option.** As soon as practicable following CureVac's delivery of an Option Notice to Arcturus but in any event within [\*\*\*\*\*] Business Days, CureVac and Arcturus will enter into a License Agreement with respect to the Reserved Target for which such Option Notice is provided, provided, however, that if the Parties fail to prepare the appendices to the License Agreement in accordance with Section 5.1(a)(ii) within [\*\*\*\*\*] Business Days following CureVac's delivery of an Option Notice to Arcturus, the License Agreement with respect to the Reserved Target shall nevertheless enter into force (including payment obligations of CureVac in accordance with the terms of the License Agreement) and the Parties shall complete the appendices as soon as practicable thereafter.

5.3 **Option Exercise Fee.** If CureVac exercises its Option for a Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Option Exercise Fee of [\*\*\*\*\*]; and if CureVac exercises its Option for a Non-Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Option Exercise Fee of [\*\*\*\*\*], hereinafter both the "Option Exercise Fee". Within [\*\*\*\*\*] Business Days after exercise of the Option for Licensed Product(s), Arcturus will issue an invoice to CureVac for the Option Exercise Fee. Each such payment will be subject to entry into the License Agreement and due within [\*\*\*\*\*] days after CureVac's receipt of such invoice from Arcturus.

5.4 **Co-Development Agreement.** For clarification, the selection of any program under the Co-Development Agreement shall not constitute the exercise of an Option in accordance with this Section 5, and, accordingly, no Option Exercise Fee will be payable and any paid Option Exercise Fee shall be credited against any other payments by CureVac applied first to any outstanding payment obligations to Arcturus, and to the extent any remaining amounts remain creditable, then to the next due future payment obligations.

5.5 **Enablement.** Arcturus will (a) with respect to any Reserved Targets, during the Term remain entitled to grant to CureVac the licenses to the Patents and the Know-How within the Arcturus Background Technology under a License Agreement, and (b) subject to the unrestricted rights of Arcturus and its Affiliates to grant to a Third Party a non-exclusive, co-exclusive or an exclusive license or option with respect to a Target, use reasonable efforts to allow the potential for License Agreements to be available for Targets identified by CureVac to Arcturus for research and for election to become a Reserved Target pursuant to this Agreement during the Term.

## ARTICLE 6

**Background Technology; Ownership of Program Technology**

6.1 **Disclosure of Program Know-How.** Each Party will promptly (and at least on a Calendar Quarterly basis) disclose to the other Party any Program Know-How that is created, conceived or reduced to practice by or on behalf of such Party and owned by the other Party pursuant to Section 6.2(c), and will provide such documentation regarding the Program Know-How as such other Party may reasonably request.

6.2 **Ownership.**

- (a) **CureVac Background Technology.** As between the Parties, CureVac will continue to own all right, title and interest in and to the CureVac Background Technology.
- (b) **Arcturus Background Technology.** As between the Parties, Arcturus will continue to own all right, title and interest in and to the Arcturus Background Technology.
- (c) **Program Technology.**

(i) Except as set forth in subsections (iii) and (iv) below, each Party will solely own all right, title and interest in and to all Program Technology that is discovered, created, conceived, developed or reduced to practice solely by or on behalf of such Party ("Solely-Owned Program Know-How"), and all Patents arising therefrom that claim such Solely-Owned Program Know-How ("Solely-Owned Program Patents") and together with the Solely-Owned Program Know-How, the "Solely-Owned Program Technology") and all right, title and interest in and to all Solely-Owned Technology will automatically vest solely in such Party. For clarity, Solely-Owned Program Technology shall not exist with respect to any Dual Improvement Technology and in the event of any conflict, such Know-How and Patents shall be deemed Dual Improvement Technology.

(ii) Except as set forth in subsections (i) above and (iii) below, the Parties will jointly own in equal share any and all Program Technology that is not Sole Improvement Technology or that is Dual Improvement Technology ("Jointly-Owned Program Technology"). All Know-How in Jointly-Owned Program Technology shall be referred to as "Jointly-Owned Program Know-How" and all Patents in Jointly-Owned Program Technology shall be referred to as "Jointly-Owned Program Patents". Each Party will have an undivided one-half interest in and to such Jointly-Owned Program Technology.

Arcturus will have a right to grant licenses (with the right to grant sublicenses through multiple tiers) to CureVac's share in such Jointly-Owned Program Technology to exercise and exploit the Arcturus LMD Technology, *provided, however, that*

(A) Arcturus shall not have the right to grant licenses to Jointly-Owned Program Know-How and Jointly-Owned Program Patents with respect to mRNA Constructs or DNA Targets to a Third Party

(x) prior to and within the first [\*\*\*\*\*] immediately following the filing of the respective Jointly-Owned Program Patent without CureVac's prior written consent and

(y) during [\*\*\*\*\*] after the period specified in (a), without offering to CureVac the first right to obtain such license(s) on substantially similar financial and other terms and conditions agreed with the Third Party, such right to be exercised by CureVac within [\*\*\*\*\*] days following CureVac's receipt of a written notification from Arcturus about its intention to grant such license(s) to a Third Party, such notification to include the material financial and other terms and conditions of such license and other material information relevant for such license(s); and

(B) CureVac will have a right to grant licenses (with the right to grant sublicenses through multiple tiers) to Arcturus' share in such Jointly-Owned Program Technology to exercise or exploit the CureVac Technology and the Program Technology, which license grant may be exclusive with respect to a Licensed Product only pursuant to a License Agreement,

i.e., subject to (A) and (B) above, neither Party is to be blocked or limited in the use of or rights to license and sublicense its own Technology by Jointly-Owned Program Technology; the Parties agree that the licenses (as between the Parties) to the respective other Party's share in such Jointly-Owned Program Technology shall be perpetual, irrevocable, non-exclusive, cost-free license, subject to the licenses hereunder or under any License Agreement.

The Jointly-Owned Program Technology shall be assignable only (A) with the applicable, rights, restrictions and obligations in this Agreement and (B) subject to notification from the assigning Party to the other Party about the assignment and a written confirmation from the assignee to be bound by the applicable, rights, restrictions and obligations in this Agreement with respect to the assigned Jointly-Owned Program Technology. In any event, the ownership rights in Jointly-Owned Program Technology remain subject to the licenses hereunder or under any License Agreement, other intellectual property rights of the other Party and the other terms and conditions of this Agreement.

To the extent any Jointly-Owned Program Technology is discovered, created, conceived, developed or reduced to practice solely or predominantly by or on behalf of one Party, then such Party, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), consultants and agents, hereby assigns, a share of its interest in and to such Jointly-Owned Program Technology to the other Party, so that each Party owns an undivided one-half interest.

(iii) Notwithstanding subsections (i) and (ii) above,

(A) Arcturus will solely own any Program Improvement Technology that is Sole Improvement Technology to any Arcturus Background Technology, regardless of the Party or Parties such Sole Improvement Technology was discovered, created, conceived, developed or reduced to practice by or on behalf of, and CureVac, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), consultants and agents, hereby assigns all of its rights, title and interest in such Sole Improvement Technology to Arcturus.

(B) CureVac will solely own any Program Improvement Technology that is Sole Improvement Technology to any CureVac Background Technology, regardless of the Party or Parties such Sole Improvement Technology was discovered, created, conceived, developed or reduced to practice by or on behalf of, and Arcturus, for itself and on behalf of its and its Affiliates' employees, subcontractors (subject to Section 3.4), consultants and agents, hereby assigns, all of its rights, title and interest in such Sole Improvement Technology to CureVac.

(C) For clarity, nothing herein shall prevent (1) Arcturus from independently developing, owning and using outside of a Program any Know-How that is similar or related to any CureVac Technology, and (2) CureVac from independently developing, owning and using outside of a Program any Know-How that is similar or related to any Arcturus LMD Technology, provided that in each case such Know-How is not developed based upon, using or with reference to CureVac Technology or Arcturus LMD Technology, respectively. All of the respective independently developed intellectual property pursuant to this Section (iii)(C) shall be deemed Arcturus Background Technology and CureVac Background Technology, respectively.

(iv) **Dual Improvements.** To the extent that a particular item of Program Technology constitutes Dual Improvement Technology, the Parties shall discuss in good faith whether any such Dual Improvement Technology can be divided, assigned and owned in accordance with subsection (iii) (A) and (B) above, or made subject to separate Patent filings to be assigned accordingly; and to the extent no such division is possible, the Dual Improvement Technology shall be treated as Jointly-Owned Program Technology in accordance with Section 6.2(c)(i).

(v) Each Party hereby agrees to take, upon the request of the other Party, any reasonable action to implement and give effect to the assignments and grants that the Parties intended, or a Party agreed to make, in this Section 6.2(c), including, without limitation, executing any assignment document and other documentation, provide any testimony, and provide any other assistance.

### 6.3 **Inventorship.**

(a) Inventorship determination for all Program Technology, including Patents worldwide arising from any Program Know-How, will be made in accordance with applicable patent laws. Notwithstanding the previous sentence, ownership determinations for all Program Technology, as between the Parties, will be made in accordance with Section 6.2(c).

(b) Each Party will ensure that each employee, consultant and each subcontractor conducting any activities under this Agreement on behalf of such Party will be subject to written agreements to assign to such Party all of its right, title and interest in and to the Program Technology so that such Party can comply with its obligations with respect to the ownership allocation of the Program Technology as set forth above. In addition, each Party shall be solely responsible for payments that may be required to any of such Party's employees or consultants and subcontractors in connection with or with respect to such agreements, including moral rights payments.

### 6.4 **Prosecution and Maintenance.**

(a) **IP Subcommittee.** The JDC shall establish a subcommittee regarding the Arcturus Background Technology and the Program Technology ("**IP Subcommittee**"). Sections 2.3(a) and (b) shall apply accordingly to the IP Subcommittee. In particular, in the IP Subcommittee, each Party shall

(i) promptly notify the other Party with respect to all developments regarding the Arcturus Background Technology and the Program Technology significant for the development under any Work Plan and/or all developments that would reasonably be considered to negatively impact the rights of CureVac pursuant to this Agreement or any License Agreement,

(ii) provide to the other Party information about the status of and the general strategy in relation to Patents with respect to Programs included in the Arcturus Background Technology, CureVac Background Technology and Program Technology as may be applied to any Program or potential Licensed Product in order to enable the other Party to provide input regarding the strategy for the prosecution of such Patents with a view to enabling potential Licensed Products and/or enhancing the potential strength of the Arcturus Background Technology and Program Technology generally, and

(iii) to directly or through appropriately qualified designees, consult with the prosecuting Party and its counsel regarding prosecution and maintenance of any such Patents as may be applied to any Program or potential Licensed Products without the requirement of a meeting of the IP Subcommittee, it being understood that in such consultation the prosecuting Party shall take the other Party's comments reasonably into account, *provided, however*, that the prosecuting Party will have the right to make the final determination in the event of any disagreement between the Parties related to any decision in connection with the filing, prosecution and maintenance of such Patents.

For clarity, the discussions regarding the general strategy and any particular Patents shall not require either Party to disclose the confidential information of any Third Party whose rights, information or data may be implicated in any such Patents or Know-How.

(b) **CureVac Patents.** As between the Parties, CureVac shall have the sole right, but not the obligation, to file, prosecute, and maintain (at its sole expense) Patents within CureVac Background Technology and Sole Improvement Technology to any CureVac Background Technology (collectively "**CureVac Sole Patents**") at its sole expense.

(c) **Arcturus Patents.**

(i) Subject to the remainder of this Section 6.4 and to any License Agreement, as between the Parties, Arcturus shall have the sole right, but not the obligation, to file, prosecute, and maintain (at its sole expense) Patents within Arcturus Background Technology and Sole Improvement Technology to any Arcturus Background Technology (collectively "**Arcturus Sole Patents**") at its sole expense.

(ii) In relation to Patents within Sole Improvement Technology with respect to which CureVac has delivered an Option Notice, if Arcturus intends to abandon such Patent, it shall notify CureVac sufficiently in advance, and subject to any License Agreement, CureVac shall have the right to take over ownership of and prosecute, maintain such Patent at its sole expense, which Patent shall then be considered a CureVac Program Patent.

(iii) Arcturus shall, during the Term, based on information with respect to Targets and Reserved Targets disclosed by CureVac to Arcturus and existing Programs, use Diligent Efforts to enable the rights to the Options (and License Agreements) available to CureVac pursuant to this Agreement; provided that nothing herein shall limit the rights of Arcturus and Affiliates to grant to a Third Party a non-exclusive, co-exclusive or an exclusive license or other option with respect to any Target that is not a Reserved Target or otherwise subject to a License Agreement.

(d) **Jointly-Owned Program Patents.** Subject to the remainder of this Section 6.4 and to any License Agreement, CureVac will have the first right, but not the obligation to file, prosecute, and maintain Jointly-Owned Program Patents, and the Parties shall share equally all costs incurred by CureVac in connection with such efforts. CureVac shall, regarding the Jointly-Owned Program Patents,

(i) promptly notify Arcturus in writing with respect to all significant developments,

(ii) provide Arcturus with drafts of each material filing (including without limitation draft patent applications and responses to office actions and similar filings) for all such Patents,

(iii) provide to Arcturus all other material submissions and correspondence with any patent authorities regarding such Patents, in sufficient time in advance of the anticipated filing date (not to be less than [\*\*\*\*] days) to allow for review and comment by Arcturus

(iv) provide Arcturus and its counsel with an opportunity to consult with CureVac and its counsel regarding prosecution and maintenance of any such Jointly-Owned Program Patents, and shall, prior to filing, revise such documents to reflect Arcturus's reasonable comments, provided that CureVac will have the right to make the final determination in the event of any disagreement between the Parties

related to any decision in connection with the filing, prosecution and maintenance of such Jointly- Owned Program Patents.

(v) If CureVac intends to abandon such Jointly-Owned Program Patent, it shall notify Arcturus sufficiently in advance, and subject to any License Agreement, Arcturus shall have the right to take over ownership of and prosecute, maintain such Patent at its sole expense, which Patent shall then be considered an Arcturus Sole Patent.

(e) **Information Regarding Arcturus Patents.** Arcturus will provide semi-annual updates on the status of the Arcturus Sole Patents with respect to any Programs and Reserved Targets during the Term.

(f) **Cooperation.** Each Party will reasonably cooperate with the other Party in the prosecution and maintenance of the Patents within the Program Technology. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants to execute all documents, as reasonable and appropriate so as to enable the prosecution and maintenance of any such Patents in any country.

#### 6.5 **Patent Enforcement and Defense.**

(a) **Notice.** To the extent not in breach of an obligation of confidentiality,

(i) Arcturus will promptly notify, in writing, CureVac upon learning of any actual or suspected infringement of any CureVac Sole Patents and Jointly-Owned Program Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any such Patents, and will, along with such notice, supply CureVac with any evidence in its possession pertaining thereto, and

(ii) CureVac will promptly notify Arcturus, in writing, upon learning of any actual or suspected infringement of any Arcturus Sole Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any such Patents, and will, along with such notice, supply Arcturus with any evidence in its possession pertaining thereto.

**(b) Enforcement.** As between the Parties and subject to any License Agreement,

(i) Arcturus will have the sole right, but not the obligation, to seek to abate any infringement of the Arcturus Sole Patents by a Third Party, or to file suit against any such Third Party for such infringement, *provided* that Arcturus shall bear all the expense of such suit or abatement of infringement, and

(ii) CureVac will have the sole right, but not the obligation, to seek to abate any infringement of the CureVac Sole Patents and Jointly-Owned Program Patents by a Third Party, or to file suit against any such Third Party for such infringement; *provided* that CureVac shall bear all the expense of such suit or abatement of infringement.

**(c) Defense.** As between the Parties and subject to any License Agreement, Arcturus will have the sole right, but not the obligation, to defend against a declaratory judgment action or other action challenging any Arcturus Sole Patents and Jointly-Owned Program Patents; *provided* that Arcturus shall bear all the expense of such defense. As between the Parties and subject to any License Agreement, CureVac will have the sole right, but not the obligation, to defend against a declaratory judgment action or other action challenging the CureVac Patents; *provided* that CureVac shall bear all the expense of such defense.

**(d) Withdrawal, Cooperation and Participation.** With respect to any infringement or defensive action identified above in this Section 6.5 which may be controlled by either CureVac or Arcturus, and subject to any License Agreement:

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 6.5.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents and enforcing and defending them, incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

(e) **Settlement.** Neither Party will settle or consent to an adverse judgment in any action described in this Section 6.5 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any Patents owned by the other Party, without the prior written consent of the other Party (such consent not to be unreasonably withheld, delayed or conditioned).

(f) **Damages.** Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Arcturus and described in Section 6.5 in each case will be used first to reimburse the controlling Party, then the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be retained by the controlling Party.

6.6 **Updates.** Arcturus shall inform CureVac within [\*\*\*\*\*] Business Days in writing of any significant developments with respect the Arcturus Program Technology that would reasonably be considered to negatively impact the rights of CureVac pursuant to this Agreement or any License Agreement.

## ARTICLE 7

### Confidentiality

7.1 **Confidential Information.** Each Party ("**Disclosing Party**") may disclose to the other Party ("**Receiving Party**"), and Receiving Party may acquire during the course and conduct of activities under the Agreement, certain Confidential Information of Disclosing Party in connection with this Agreement. Notwithstanding the foregoing, either Party may use and disclose Jointly-Owned Program Technology in connection with such Party's permitted exploitation of such Technology, provided that the recipient is bound by confidentiality obligations corresponding to the obligations under this Agreement with respect to the subject matter of this Agreement.

7.2 **Restrictions.** During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this Agreement or any License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors (subject to Section 3.4) and consultants or agents who have a need to know such Confidential Information in order to perform its obligations and exercise its rights under this Agreement or any License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Article 7. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

7.3 **Exceptions.** Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no fault or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information as documented by the internal records of the Receiving Party.

7.4 **Permitted Disclosures.** The Receiving Party may only use any such Confidential Information for the purposes of performing its obligations or exercising its rights under this Agreement. Notwithstanding the obligations set forth in Sections 7.1 and 7.2, a Party may disclose the other Party's Confidential Information (including this Agreement and the terms herein) in the following instances to the extent reasonably required:

- (a) in order to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (b) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing Patents in connection with Receiving Party's rights and obligations pursuant to this Agreement or a License Agreement;
- (c) to attorneys, accountants, auditors, acquirers, licensees, partners, permitted assignees, financial advisors, investors and lenders, including potential acquirers, licensees, partners, assignees, financial advisors, investors and lenders;

provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party reasonably adequate time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsection (c), each of those persons or entities are required to comply with the restrictions on use and disclosure in Section 7.2 (other than financial advisors, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

**7.5 Return of Confidential Information.** Upon expiry or earlier termination of the Agreement, upon written request of a Party (such request, if made, to be made within [\*\*\*\*\*] months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under a License Agreement, if any, or as set forth in this Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures. Upon request of the requesting Party, the Receiving Party shall confirm in writing to the requesting Party the destruction or return of all copies of the Confidential Information of the requesting Party.

**7.6 Publications.** Notwithstanding anything in this Agreement to the contrary, Arcturus shall be permitted to publish the results of a Program only with the prior written consent of CureVac. Arcturus shall submit any proposed publication of the results of a Program to CureVac. Following receipt of the proposed publication by CureVac, CureVac will use Diligent Efforts to provide written approval or disapproval, at CureVac's discretion, within [\*\*\*\*\*] days. Expedited reviews for abstracts or poster presentations, or for other publications that may relate to potential patent applications, may be arranged if mutually agreeable to the Parties. CureVac is permitted to publish the results of a Program provided, however, that it will not disclose Arcturus Confidential Information in any publication by CureVac of the results of a Program or any Licensed Product development by CureVac without Arcturus' prior written consent, which will not be unreasonably withheld, conditioned or delayed in the event such Arcturus Confidential Information is reasonably required to support the results of a Program so published.

**7.7 Terms of this Agreement; Press Release.** The Parties agree that the existence and terms of the Parties' relationship and this Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 7.4. Except as mutually agreed or otherwise required by Law or securities exchange regulation, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

## ARTICLE 8

**Warranties; Limitations of Liability; Indemnification**

**8.1 Representations and Warranties.** Each Party represents and warrants to the other as of the Effective Date that (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated, (b) it has the legal right and power to enter into this Agreement, to extend the rights and licenses granted or to be granted to the other in this Agreement, and to fully perform its obligations hereunder, (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this Agreement and the performance of its obligations hereunder (d) this Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms, and (e) the execution, delivery and performance by a Party of this Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which such Party is a party or by which it is bound.

**8.2 Additional Representations and Covenants of Arcturus.** Arcturus hereby represents and warrants to CureVac as of the Effective Date as follows:

- (a) **Impairment.** Neither Arcturus nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that (i) conflicts with or impairs the scope of any rights or licenses granted to CureVac hereunder or (ii) to the knowledge of Arcturus, would otherwise conflict with or limit rights that would be granted to CureVac under any License Agreement.
- (b) **Patents. Exhibit 1.3** sets forth a complete and accurate list of all Patents included in the Arcturus Background Technology, indicating any licensor and/or co-owner(s), if applicable. Arcturus is entitled to grant to CureVac the licenses to the Patents and the Know-How within the Arcturus Background Technology for the purposes of this Agreement, including to enter into a License Agreement, subject to the rights of Arcturus and its Affiliates to grant to a Third Party a non-exclusive, co-exclusive or an exclusive license or option with respect to a Target. To Arcturus' knowledge, the Patents listed on **Exhibit 1.3** have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the Patents included in the Arcturus Background Technology listed on **Exhibit 1.3** is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Arcturus' knowledge as of the Effective Date, no Arcturus Background Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the Effective Date, neither Arcturus nor any of its Affiliates has received any notice alleging that the Patents in the Arcturus Background Technology listed on **Exhibit 1.3** are invalid or unenforceable, or challenging Arcturus' ownership of or right to use any such rights.
- (c) **Arcturus LMD Technology.** The Arcturus LMD Technology licensed to CureVac under this Agreement comprises all Arcturus LMD Technology Controlled by Arcturus (i) which is necessary or useful for purposes of this Agreement and (ii) to the knowledge of Arcturus, which would be necessary or useful for purposes of a License Agreement.

(d) **Encumbrances.** It has the right to grant the license and rights herein to CureVac and it has not granted any liens, security interest, encumbrance, license, right or interest in, to or under the Arcturus Background Technology to any Third Party that is inconsistent with the license granted to CureVac under Section 3.1.

(e) **Litigation.** There is no action, suit, proceeding or investigation pending or, to the knowledge of Arcturus, currently threatened against or affecting Arcturus that questions the validity of this Agreement or the right of Arcturus to enter into this Agreement or consummate the transactions contemplated hereby or that relates to the Arcturus LMD Technology.

(f) **Infringement.** Neither Arcturus nor any of its Affiliates has received any written notice of any claim that, nor does Arcturus or its Affiliates have any knowledge of any claim, any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Arcturus LMD Technology (i) in connection with the performance of this Agreement and (ii) to the knowledge of Arcturus, with respect to any product under a License Agreement.

(g) **Third Party Infringement.** To Arcturus' knowledge, no Third Party is infringing or has infringed any Patent within the Arcturus LMD Technology or is misappropriating or has misappropriated any Know-how within the Arcturus LMD Technology.

### 8.3 **Mutual Covenants.**

(a) **No Debarment.** In the course of the performance by the Parties, neither Party nor its Affiliates shall use any employee or consultant who has been debarred by any regulatory authority or, to such Party's or its Affiliates' knowledge, is the subject of debarment proceedings by a regulatory authority. Each Party shall notify the other Party promptly upon becoming aware that any of its or its Affiliates' employees or consultants has been debarred or is the subject of debarment proceedings by any regulatory authority.

(b) **Compliance.** Each Party and its Affiliates shall comply in all material respects with all applicable Laws (including all anti-bribery laws) in the performance of its obligations under this Agreement.

**8.4 No Other Warranties.** EXCEPT AS EXPRESSLY STATED IN THIS ARTICLE 8, (A) NO REPRESENTATION, CONDITION OR WARRANTY WHATSOEVER IS MADE OR GIVEN BY OR ON BEHALF OF ARCTURUS OR CUREVAC; AND (B) ALL OTHER CONDITIONS AND WARRANTIES WHETHER ARISING BY OPERATION OF LAW OR OTHERWISE ARE HEREBY EXPRESSLY EXCLUDED, INCLUDING ANY CONDITIONS AND WARRANTIES OF MERCHANTABILITY, POTENTIAL FOR SUCCESS OF A PROGRAM, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

**8.5 No Consequential Damages.** Notwithstanding anything in this Agreement or otherwise, neither Party will be liable to the other or any Third Party with respect to any subject matter of this Agreement for any indirect or consequential damages, provided that this Section 8.5 will not apply to breaches of Article 6 or 7 or the Parties' indemnification rights or obligations under Section 8.7, or in the event of willful misconduct.

**8.6 Performance by Others.** The Parties recognize that each Party may perform some or all of its obligations under this Agreement through Affiliates, permitted subcontractors or other permitted Third Parties, provided, however, that each Party will remain fully responsible and liable for the performance by its Affiliates and/or permitted subcontractors and Third Parties and will cause its Affiliates, permitted subcontractors or other permitted Third Parties to comply with the provisions of this Agreement in connection therewith.

**8.7 Indemnification.**

**(a) Indemnification by Arcturus.** Arcturus will indemnify CureVac, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the CureVac Indemnitees to the extent arising from or occurring as a result of:

(i) the breach of any representation or warranty by Arcturus under this Agreement; or (ii) any gross negligence or willful misconduct on the part of any Arcturus Indemnitee; or (iii) any alleged infringement or misappropriation of Patents or other intellectual property rights by CureVac in the conduct of the Work Plan based solely on CureVac's use of Arcturus LMD Technology as permitted hereunder (excluding, for clarity, infringement of Patents, Know- How or Materials covering CureVac Technology used by CureVac in the performance of the Work Plan), except in each of cases (i)-(iii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this Agreement.

**(b) Indemnification by CureVac.** CureVac will indemnify Arcturus, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "Arcturus Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against Arcturus Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any representation or warranty under this Agreement; or (ii) any gross negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) any alleged infringement or misappropriation of Patents or other intellectual property rights by Arcturus in the conduct of the Work Plan based solely on Arcturus' use of CureVac Technology as permitted hereunder (excluding, for clarity, infringement of Arcturus LMD Technology used by Arcturus in the performance of the Work Plan), except in each of cases (i)-(iii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of an Arcturus Indemnitee or Arcturus' breach of this Agreement.

**(c) Notice of Claim.** All indemnification claims provided for in subsections (a) and (b) above will be made solely by such Party to this Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under subsections (a) or (b) above but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

**(d) Defense, Settlement, Cooperation and Expenses.**

(i) Control of Defense. At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified Party within [\*\*\*\*\*] days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to

indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such legal counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will as soon as practicable deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) Right to Participate in Defense. Without limiting subsection (i) above, any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to engage counsel of its choice for such purpose; provided, however, that such engagement will be at the Indemnified Party's own cost and expense unless (A) the indemnifying Party has failed to promptly assume the defense and engage counsel in accordance with subsection (i) above (in which case the Indemnified Party will control the defense) or (B) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any reasonable costs and expenses of counsel for the Indemnified Party.

- (iii) **Settlement.** With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business, Patents or Technology of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to consent to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with subsection (i) above, the indemnifying Party will have authority to consent to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (which consent will not be unreasonably withheld, conditioned or delayed). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party.
- (iv) **Cooperation.** Regardless of whether the indemnifying Party chooses to defend any Third Party Claim, the Indemnified Party will, and will use Diligent Efforts to cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.
- (v) **Costs and Expenses.** Except as provided above in this Section 8.7, the costs and expenses, including reasonable attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

**8.8 Insurance.** Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program to protect against potential liabilities and risk arising out of activities to be performed under this Agreement and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this Agreement. The coverage limits set forth in any such programs or policies will not create any limitation on a Party's liability to the other under this Agreement.

## ARTICLE 9

**Term and Termination****9.1 Term.**

(a) This Agreement will commence as of the Effective Date and, unless sooner terminated or extended in accordance with the terms hereof or by mutual written consent, will continue for a period of eight (8) years (the "Initial Term", as may be extended pursuant to Section 9.1(b), the "Term").

(b) Not later than sixty (60) days prior to the expiration of the Initial Term, CureVac shall have the option to extend the Term on an annual basis for up to three (3) years, by providing written notice to Arcturus, subject to payment by CureVac to Arcturus of a non-refundable annual extension fee of one million US dollars (U.S. \$1,000,000), payable within [\*\*\*\*\*] Business Days after exercise of such option.

(c) The Parties agree that this Agreement and the Co-Development Agreement relate to different projects and, therefore, the validity, term and termination of this Agreement shall be independent from the validity, term and termination of the Co-Development Agreement.

**9.2 Termination by CureVac.**

(a) **Breach, Change of Control.** CureVac will have the right to terminate this Agreement in full or on a Program-by-Program basis upon delivery of written notice to Arcturus in the event of

(i) any material breach by Arcturus

(A) of any terms and conditions of this Agreement, provided that such breach has not been cured within sixty (60) days after written notice thereof is given by CureVac to Arcturus specifying in reasonable detail the nature of the alleged breach; or

(B) in particular the failure of the Escrow Agent to send the Target response notice within the period provided for in Section 4.2(c)(i), provided that such failure has not been cured neither within a first cure period of five (5) Business Days after written notice thereof is given by CureVac to Arcturus nor within a second cure period of five (5) Business Days after written notice of the lapse of the first cure period is given by CureVac to Arcturus, or

(ii) a Change of Control of Arcturus.

In the event of a termination of this Agreement or a Program under this subsection, (i) the JDC will be disbanded or, if applicable, cease to be responsible for the terminated Programs, (ii) Arcturus will receive no further Arcturus FTE funding (if applicable, for the terminated Programs), and (iii) Arcturus will conduct a technology transfer of Arcturus Technology existing at the time of such transfer and provide necessary licenses to CureVac or its Third Party designee each as reasonably necessary for CureVac or such Third Party designee to complete the conduct of a Program, and (iv) the Option Exercise Fee and the payments under the License Agreement(s) (if applicable, in relation to the terminated Programs) will be reduced by [\*\*\*\*\*]%. For avoidance of doubt, termination of the Agreement or a Program will not terminate CureVac's reservation of Reserved Targets or the Options subject to the payments associated therewith. For clarity, except in cases of willful misconduct, the remedy set forth in this Section 9.2(a) shall be the sole and exclusive remedy of CureVac under this Agreement (i.e., without limitation of any remedies that may be separately available under any License Agreement) in the event that CureVac elects to terminate a Program but otherwise continue the Agreement in effect.

In the event of a Change of Control of Arcturus, CureVac shall decide, no later than the later of: (i) ten (10) Business Days' written notice following the receipt of a written notification that the closing date of such Change of Control has occurred or (ii) [\*\*\*\*\*] months written notice following the receipt of a written notification that the signing date of such Change of Control has occurred, to (a) terminate this Agreement, (b) to continue this Agreement and elect (as set forth in such written notice) to have the JDC disbanded and Arcturus to undertake a technology transfer and provide necessary licenses to CureVac or its Third Party designee each as reasonably necessary for CureVac or such Third Party designee to complete the conduct of any then ongoing Programs in accordance with the Work Plan; or (c) continue the Agreement and receive reasonable assurance in writing from the acquirer that the CureVac Confidential Information is not shared with any other entities within the acquirer's group that are not required to manage, perform and exercise Arcturus' rights and obligations under this Agreement.

**(b) Discretionary Termination.** CureVac will have the right to terminate this Agreement in full at any time without cause by giving sixty (60) days' prior written notice to Arcturus. Upon termination by CureVac pursuant to this subsection, CureVac will pay to Arcturus any amounts payable to Arcturus for any Work performed pursuant to the Work Plan up through the date of such termination, subject to Arcturus' transfer of all deliverables under the Work Plan to CureVac.

**9.3 Termination by Arcturus.** Arcturus will have the right to terminate this Agreement in full upon delivery of written notice to CureVac in the event of (i) any material breach by CureVac of any terms and conditions of this Agreement, provided that such breach has not been cured within sixty (60) days after written notice thereof is given by Arcturus to CureVac specifying in reasonable detail the nature of the alleged breach. CureVac hereby agrees that Arcturus is entitled to receive payment of any amounts payable to Arcturus pursuant to this Agreement, including amounts for any Work performed pursuant to the Work Plan, up through the date of such termination. For clarity, a breach by CureVac under this Agreement shall not constitute a breach under a License Agreement unless such breach is also separately a breach pursuant to such License Agreement.

**9.4 Termination Upon Bankruptcy.** All rights and licenses granted under or pursuant to this Agreement by Arcturus or CureVac or their Affiliates are, and will otherwise be deemed to be, for purposes of Section 365(n) of the U.S. Bankruptcy Code, licenses of right to "intellectual property" as defined under Section 101 of the U.S. Bankruptcy Code. The Parties agree that the Parties and their respective Affiliates and permitted Third Party sublicensees, as licensees of such rights under this Agreement, will retain and may fully exercise all of their rights and elections under the U.S. Bankruptcy Code and any foreign counterparts thereto. Without limiting the Parties' rights under Section 365(n) of the U.S. Bankruptcy Code, if a case under U.S. Bankruptcy Code is commenced by or against a Party, the other Party shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of such other Party, shall be promptly delivered to it (i) before this Agreement is rejected by or on behalf of the bankrupt Party, within thirty (30) days after the other Party's written request, unless the bankrupt Party, or its trustee or receiver, elects within thirty (30) days to continue to perform all of its obligations under this Agreement, or (ii) after any rejection of this Agreement by or on behalf of the bankrupt Party, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 9.4 and under Section 365(n) of the U.S. Bankruptcy Code are in addition to and not in substitution of any and all other rights, powers, and remedies that each Party may have under this Agreement, under the U.S. Bankruptcy Code, and any other applicable Laws. The non-bankrupt Party shall have the right to perform the obligations of the bankrupt Party hereunder with respect to such intellectual property, but neither such provision nor such performance by the non-bankrupt Party shall release the bankrupt Party from any such obligation or liability for failing to perform it.

**9.5 Effects of Termination.** Upon termination by:

(a) CureVac under Sections 9.2 or 9.4, (i) Arcturus will terminate all Work in progress in an orderly manner as soon as practicable and transfer all deliverables under the Work Plan to CureVac in its Control in the state of such deliverable as of the effective date of termination; (ii) each of the Parties will return or destroy any Materials of the other Party in its Control, based upon written instructions from the other Party within [\*\*\*\*\*] days of the effective date of termination, unless such Material is necessary or useful for the exercise of a Party's rights or obligations under a License Agreement in which event the Party retaining the Material will notify the other Party of retention pursuant to the requirements of and subject to such License Agreement; and (iii) all rights and licenses pursuant to this Agreement except with respect to any then existing Programs (for which licenses to CureVac or its Third Party designee shall be granted to complete the Program and enter into a License Agreement under the terms of Section 9.2(a)(ii)) shall terminate and be of no further force and effect, it being understood that termination hereunder shall not affect any then existing License Agreement;

(b) Arcturus under Section 9.3, (i) CureVac will promptly pay Arcturus any monies due and owing Arcturus, as of the date of termination, for Work and Services actually performed and all expenses actually incurred as specified in the Work Plan as well as any amounts incurred for orderly wind down any then existing Third Party commitments entered into as of the date of notice of termination to perform the Work Plan; (ii) each of the Parties will return or destroy any Materials of the other Party in its Control, based upon written instructions from the other Party within [\*\*\*\*\*] days of the effective date of termination, unless such Material is necessary or useful for the exercise of a Party's rights or obligations under a License Agreement in which event the Party retaining the Material will notify the other Party of retention pursuant to the requirements of and subject to such License Agreement; and (iii) all rights and licenses pursuant to this Agreement shall terminate and be of no further force and effect, it being understood that termination hereunder shall not affect any then existing License Agreement.

**9.6 Survival.** In addition to the termination consequences set forth in Section 9.5, the following provisions will survive termination or expiration of this Agreement, as well as any other provision which by its terms or by the context thereof, is intended to survive such termination: Sections 1, 3.1(f) (to the extent a License Agreement is executed prior to the effective date of termination), 3.3(a), 6.2, 6.3, 7, 8.5, 8.7, 9.2, 9.5, 9.6 and 10. Termination or expiration of this Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at Law or in equity with respect to any breach of this Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this Agreement.

## ARTICLE 10

### Miscellaneous

#### **10.1 Dispute Resolution.**

(a) **Dispute Escalation.** In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves or the Program directors. In the event that such dispute is not resolved on an informal basis within [\*\*\*\*\*] days, either Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive with the appropriate authority to determine the matter for such Party), who will attempt in good faith to resolve such dispute by negotiation and consultation for a [\*\*\*\*\*] day period following receipt of such written notice

(b) **Dispute Resolution.**

(i) In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be New York City, New York, USA. The number of mediators will be [\*\*\*\*\*]. The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] days following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration.

(ii) Any dispute relating to the validity performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 10.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be New York City, New York, USA. The number of arbitrators will be [\*\*\*\*\*]. The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

**10.2 Relationship of Parties.** Nothing in this Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied Third Party beneficiaries hereunder.

**10.3 Compliance with Law.** Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

**10.4 Governing Law.** This Agreement will be governed by and construed in accordance with the Laws of State of New York, USA, without respect to its conflict of Laws rules.

**10.5 Counterparts; Facsimiles.** This Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this Agreement by either Party will constitute a legal, valid and binding execution and delivery of this Agreement by such Party

**10.6 Headings.** All headings in this Agreement are for convenience only and will not affect the meaning of any provision hereof.

**(a) Waiver of Rule of Construction.** Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this Agreement. Accordingly, the rule of construction that any ambiguity in this Agreement will be construed against the drafting party will not apply.

**(b) Interpretation.** Whenever any provision of this Agreement uses the term "including" (or "includes"), such term will be deemed to mean "including without limitation" (or "includes without limitations"). "Herein," "hereby," "hereunder," "hereof" and other equivalent words refer to this Agreement as an entirety and not solely to the particular portion of this Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Exhibits in this Agreement are to Sections and Exhibits of this Agreement. References to any Sections include Sections and subsections that are part of the related Section.

**10.7 Further Assurances.** Each Party shall take all customary and reasonable actions and do all things reasonably necessary or proper, including under applicable Law, to make effective and further the intents and purposes of the transactions contemplated by this

Agreement, including executing any further instruments reasonably requested by the other Party.

**10.8 Binding Effect.** This Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

**10.9 Assignment.** This Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this Agreement, except as expressly permitted hereunder, without the prior written consent of the other Party, which consent will not be unreasonably withheld, delayed or conditioned; provided that either Party may assign this Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this Agreement (whether by merger, consolidation or otherwise).

**10.10 Notices.** All notices, requests, demands and other communications required or permitted to be given pursuant to this Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid or facsimile (and promptly confirmed by personal delivery, registered or certified mail or overnight courier) to the addresses set forth below (or to such address as a Party may subsequently provide by written notice in accordance with this Section 10.10).

If to CureVac:

CureVac AG  
Paul-Ehrlich-Str. 15  
72076 Tübingen

with a copy to (which copy shall not constitute notice):

Coolley LLP  
3175 Hanover St.  
Palo Alto, CA 94303  
Attn: Glen Y. Sato  
Fax: (650) 849-7400

**10.11 Amendment and Waiver.** This Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

**10.12 Severability.** In the event that any provision of this Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the Agreement to preserve (to the extent possible) their original intent.

**10.13 Entire Agreement.** This Agreement together with any License Agreements (including all appendices and exhibits hereto and thereto) entered into during the Term and the Material Transfer Agreements and the Confidentiality Agreement are the sole agreements with respect to the subject matter and supersede all other agreements and understandings between the Parties with respect to same, provided, however, that the terms and conditions under this Agreement apply with respect to the activities which have been performed by the Parties under the Material Transfer Agreement but which are also set forth under the Work Plan, and to such extent this Agreement replaces the Material Transfer Agreements. In case of conflict between this Agreement and the Confidentiality Agreement, this Agreement shall prevail.

**10.14 Force Majeure.** Neither Arcturus nor CureVac will be liable for failure of or delay in performing obligations set forth in this Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Arcturus or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

**AMENDMENT TO DEVELOPMENT AND OPTION AGREEMENT**

THIS AMENDMENT TO DEVELOPMENT AND OPTION AGREEMENT (this "Amendment"), dated as of May 3, 2018, is made by and between CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tübingen, Germany ("CureVac"), and Arcturus Therapeutics Inc., a Delaware corporation with offices at 10628 Science Center Drive #200, San Diego, CA 92121, USA ("Arcturus"). Each of CureVac and Arcturus may be referred to herein as a "Party," or together as the "Parties".

WHEREAS, the Parties are parties to that certain Development and Option Agreement, dated as of January 1, 2018 (the "Development and Option Agreement");

WHEREAS, pursuant to Section 3.2 of the Development and Option Agreement, CureVac is responsible for funding up to [\*\*\*\*\*] scientists per year at Arcturus to perform the Work as defined and in accordance with the Work Plan for a period of up to [\*\*\*\*\*] months at the FTE costs;

WHEREAS, CureVac is now prepared to invest and commit to the full number of [\*\*\*\*\*] FTEs for the full period of [\*\*\*\*\*] months, provided Arcturus can provide security as to CureVac's access to the Technology generated in performance of the Work pursuant to the Development and Option Agreement; and

WHEREAS, CureVac and Arcturus desire to amend the Development and Option Agreement as provided in this Amendment in accordance with Section 10.11 of the Development and Option Agreement.

NOW, THEREFORE, in consideration of the foregoing and the promises and mutual agreements contained in this Amendment, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound, the Parties agree as follows:

SECTION 1. Irrevocable Offer.

- (a) The heading of Article 5 of the Development and Option Agreement is hereby amended and restated in its entirety as follows: "Irrevocable Offer to Licenses" and the Table of Contents is updated accordingly. The heading of Section 5.1 of the Development and Option Agreement is amended and restated in its entirety as follows: "Irrevocable Offer."
- (b) Section 5.1(a) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

" (a) Arcturus hereby makes a final, binding irrevocable offer (the "Irrevocable Offer") to CureVac to enter into, on the terms of, and subject to the conditions set forth in, the Exclusive License Agreement or, if the Reserved Target is only available on a non-exclusive basis, the Non-Exclusive License Agreement, on a Reserved Target-by-Target basis, a maximum of [\*\*\*\*\*] licenses under the Arcturus LMD Technology with respect to the development, manufacture and commercialization of Licensed Products containing mRNA Constructs intended to express such Reserved Target in the form of the License Agreement. Upon the execution of this Amendment, the Irrevocable Offer shall remain valid and legally binding on Arcturus and in effect, and the Irrevocable Offer from Arcturus shall be irrevocable and open for acceptance from CureVac for the period commencing on the Effective Date and ending on the expiration of the Term (the "Offer Period")."

---

(c) Section 5.1(b) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“(b) If, prior to the expiration of the Offer Period, CureVac delivers written notice to Arcturus of its intention to enter into a license for a Reserved Target, which such notice shall set forth the particular Reserved Target which is intended to be expressed by the Licensed Products (each such notice, an “Acceptance Notice”), then upon delivery thereof, for the Reserved Target set forth in such Acceptance Notice, the licenses and all other rights under the applicable License Agreement shall immediately be in effect without the requirement of either Party to execute any further documentation and there shall exist a legal, valid and binding obligation of Arcturus, enforceable against Arcturus in accordance with the terms of the Exclusive License Agreement or, if the Reserved Target set forth in such Acceptance Notice is only available on a non-exclusive basis, the Non- Exclusive License Agreement. A separate Acceptance Notice and Acceptance Fee will be required for each License Agreement with respect to which CureVac accepts the Irrevocable Offer pursuant to this Section 5.1, and CureVac will pay to Arcturus the Acceptance Fee for each such License Agreement as set forth in Section 5.3. In the event that CureVac terminates a license(s) during the Term, the Target(s) subject to the license(s) will be removed from the Reserved Target List and the number of License Agreements for which the Irrevocable Offer exists shall be reduced by one (1) (i.e. the delivery of an Acceptance Notice reduces the total number of License Agreements for which CureVac may accept the Irrevocable Offer by one regardless of whether CureVac elects to continue such License Agreement in effect).”

(d) Section 5.1(c) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“(c) In the event that CureVac terminates a License Agreement during the Term, the Targets subject to such license(s) will no longer be available as a Target pursuant to this Agreement.”

(e) Section 5.2 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.2 CureVac’s Acceptance of Irrevocable Offer. As soon as practicable following CureVac’s delivery of each Acceptance Notice to Arcturus, CureVac and Arcturus will prepare the appendices to the corresponding License Agreement. The License Agreement shall nevertheless enter into force (including payment obligations of CureVac in accordance with the terms of the License Agreement) upon delivery of the Acceptance Notice by CureVac.”

(f) Section 5.3 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.3 Acceptance Fee. If CureVac delivers an Acceptance Notice for a Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Acceptance Fee of [\*\*\*\*\*] and if CureVac delivers an Acceptance Notice for a Non-Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Acceptance Fee of [\*\*\*\*\*], hereinafter both the “Acceptance Fee”. On the [\*\*\*\*\*] it delivers an Acceptance Notice, CureVac shall pay the applicable Acceptance Fee by wire transfer in immediately available funds to the bank account of Arcturus set forth on Schedule 3 (or such other bank account notified in writing to CureVac prior to such date).”

(g) Section 5.4 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.4 Co-Development Agreement. For clarification, the selection of any program under the Co-Development Agreement shall not constitute the delivery of an Acceptance Notice in accordance with this Section 5, and accordingly, no Acceptance Fee will be payable and any paid Acceptance Fee shall be credited against any other payments by CureVac applied first to any outstanding payment obligations to Arcturus, and to the extent any remaining amounts remain creditable, then to the next due future payment obligations.”

(g) Definitions. Each of the following Sections of the Development and Option Agreement are hereby amended and restated in their entirety as “Intentionally Omitted.” : Section 1.35, Section 1.62, Section 1.64, Section 1.65, Section 1.66 and Section 1.67 The following Sections are inserted immediately following Section 1.94 of the Development and Option Agreement:

“1.95 Irrevocable Offer” has the meaning set forth in Section 5.1(a).

1.96 Acceptance Notice” has the meaning set forth in Section 5.1(b).

1.97 Acceptance Fee” has the meaning set forth in Section 5.3.”

(h) Additional Modifications.

(i) In Section 3.1(f) of the Development and Option Agreement, the occurrence of “exercise of an Option and entry into a License Agreement” in the first sentence is hereby replaced with “delivery of an Acceptance Notice and the entering into force of a License Agreement”.

(ii) In Section 3.3(c) of the Development and Option Agreement, the occurrence of “whether to exercise an Option” in the third sentence is hereby replaced with “whether to delivery an Acceptance Notice”.

(iii) In Section 4.2(c)(iii) of the Development and Option Agreement, the occurrence of “option” in the second sentence is hereby replaced with “right”.

(iv) In Section 4.2(d)(ii) of the Development and Option Agreement, the occurrence of “shall be reduced by each exercise of an Option” in the first sentence is hereby replaced with “shall be reduced by each delivery of an Acceptance Notice” and the occurrence of “applying from and after the date of exercise of an Option.” in the first sentence is hereby replaced with “applying from and after the date of an Acceptance Notice.”.

(v) In Section 6.4(c)(ii) of the Development and Option Agreement, the occurrence of “an Option Notice” in the first sentence is hereby replaced with “an Acceptance Notice”.

(vi) In Section 6.4(c)(iii) of the Development and Option Agreement, the occurrence of “to the Options” in the first sentence is hereby replaced with “pursuant to the Irrevocable Offer”.

(vii) In Section 9.2(a)(iv) of the Development and Option Agreement, the occurrence of “the Option Exercise Fee” is hereby replaced with “the Acceptance Fee”.

(viii) In Section 9.2(a) of the Development and Option Agreement, in the sentence immediately following subsection (iv), the occurrence of “or the Options” is hereby replaced with “or the Irrevocable Offers”.

SECTION 2. License Agreements.

(a) “Non-Exclusive License Agreement” means the terms of the Non-Exclusive License Agreement agreed by the Parties, incorporated by reference into the Development and Option Agreement and set forth on Schedule 1-A to this Amendment.

(b) “Exclusive License Agreement” means the terms of the License Agreement agreed by the Parties, incorporated by reference into the Development and Option Agreement and set forth on Schedule 1-B to this Amendment.

SECTION 3. Grant of Security Interest.

(a) As collateral security for the prompt and complete payment and performance when due (whether at stated maturity, by acceleration or otherwise) of all of its obligations under the Development and Option Agreement, and whether direct or indirect (including those acquired by assumption), absolute or contingent, due or to become due, now existing or hereafter arising and including interest and fees that accrue after the commencement by or against Arcturus of any proceeding under any bankruptcy or insolvency Law naming Arcturus as the debtor in such proceeding, regardless of whether such interest and fees are allowed claims in such proceeding, Arcturus hereby mortgages, pledges, assigns and hypothecates to CureVac, and grants to CureVac a Lien on and continuing security interest in, all the right, title and interest of Arcturus, in, to, and under the following property, wherever located, whether now owned or in the future acquired by Arcturus and whether now existing or in the future coming into existence owned by Arcturus (collectively, the “Collateral”):

(i) the Patents and Know-How set forth on Exhibit 1.3 of the Development and Option Agreement;

(ii) the LUNAR™ platform;

(iii) all other Arcturus Background Technology;

(iv) all other Arcturus Program Technology; and

(v) to the extent not otherwise included, all books, records, writings, data bases, information and other property relating to, used or useful in connection with, or evidencing, embodying, incorporating or referring to any of the foregoing, all claims and insurance proceeds arising out of the loss, nonconformity or any interference with the use of, or any defect or infringement of rights in, or damage to, any of the foregoing, and all proceeds, products, offspring, rents, issues, profits and returns of and from, and all distributions on and rights arising out of, any of the foregoing;

provided that the Collateral shall not exceed the property to which CureVac has or may have rights to pursuant to the terms of the Development and Option Agreement.

For purposes of this Amendment, "Lien" means a pledge, lien, charge or security interest of any kind or nature.

(b) Notwithstanding anything herein to the contrary, in no event shall the Collateral include or the security interest granted under Section 3(a) attach to (i) any Collateral if and to the extent that a security interest therein is prohibited by or in violation of any Law applicable to Arcturus or (ii) any "intent-to-use" application for registration of a trademark or service mark filed pursuant to Section 1(b) of the Lanham Act, 15 U.S.C. § 1051, prior to the filing of a "Statement of Use" pursuant to Section 1(d) of the Lanham Act or an "Amendment to Allege Use" pursuant to Section 1(c) of the Lanham Act with respect thereto, solely to the extent, if any, that, and solely during the period, if any, in which, the grant of a security interest therein would impair the validity or enforceability of any registration that issues from such intent-to-use application under applicable Law and (ii) any Collateral if and to the extent that a grant of a security interest therein would violate or invalidate any lease, license or other agreement applicable thereto to which Arcturus is party as of the date of this Amendment or create a right of termination in favor of any other party thereto (after giving effect to the applicable anti-assignment provisions of the UCC or other applicable Law).

(c) Arcturus makes to CureVac each of the representations and warranties set forth on Part I of Schedule 2.

(d) Arcturus agrees that it will comply with each of the covenants set forth on Part II of Schedule 2.

(e) For the avoidance of doubt, Arcturus shall be permitted, subject to the security interest granted under Section 3(a), to license the Collateral and in connection therewith, CureVac shall acknowledge and respect such licenses in writing the rights of such licensees as reasonably requested by any licensee of the Collateral.

(f) CureVac may exercise from time to time any rights and remedies available to it under the UCC and under any other applicable Law.

SECTION 4. Additional Expenses. In consideration for the rights granted pursuant to Section 1 and Section 3 of this Amendment, CureVac agrees to perform the Work under the Work Plan as part of which CureVac will fund [\*\*\*\*\*] scientists per year at Arcturus for a period of [\*\*\*\*\*] months at the FTE Costs.

SECTION 5. Ratification of Agreement. Except as expressly provided in this Amendment, all of the terms, covenants, and other provisions of the Development and Option Agreement are hereby ratified and confirmed and shall continue to be in full force and effect in accordance with their respective terms. From and after the date hereof, all references to the Development and Option Agreement shall refer to the Development and Option Agreement as amended by this Amendment. Capitalized terms used but not defined in this Amendment shall have the meanings assigned to them in the Development and Option Agreement.

SECTION 6. Governing Law. This Amendment shall be governed by and construed in accordance with the Laws of the State of New York, USA, without respect to its conflict of Laws rules. In the event of a dispute arising out of or relating to this Amendment, the provisions of Section 10.1 of the Development and Option Agreement shall govern the resolution of such dispute.

SECTION 7. Counterparts. This Amendment may be executed and in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this Amendment by either Party will constitute a legal, valid and binding execution and delivery of this Amendment by such Party.

*[signature page follows]*

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed by their respective duly authorized officers as of the date hereof.

## License Agreement

This License Agreement ("License Agreement"), effective as of delivery of an Acceptance Notice in accordance with Section 5.1(b) of the Development and Option Agreement (as defined below) (the "License Agreement Effective Date"), is made by and between Arcturus Therapeutics Inc., a Delaware corporation ("Arcturus"), and CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tuebingen, Germany ("CureVac"). Each of Arcturus and CureVac may be referred to herein as a "Party," or together as the "Parties."

**WHEREAS**, Arcturus has expertise and intellectual property relating to the development of LMD Technologies (as defined below) that embody or incorporate delivery systems (and components thereof) for molecular therapeutics based on or incorporating lipid-enabled and unlocked nucleomonomer platform for delivery of nucleic acids as specified in **Appendix 1.3**, the Arcturus LMD Technology; and

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below); and

**WHEREAS**, Arcturus and CureVac are parties to that certain Development and Option Agreement (dated January 1, 2018, and amended as of May 3, 2018) (the "Development and Option Agreement") pursuant to which CureVac has options to take licenses under the Arcturus LMD Technology (as defined below) with respect to CureVac's mRNA Constructs; and

**WHEREAS**, pursuant to the terms of the Development and Option Agreement, CureVac has exercised an option to obtain a license pursuant to this Agreement with respect to the Target (as defined below) and the Parties are now entering into a licensing arrangement whereby CureVac will have a license under the Arcturus LMD Technology to develop and commercialize Licensed Products (as defined below) with respect to such Target.

**WHEREAS**, the Parties intend to also co-develop an ornithine transcarbamylase ("OTC") deficiency product and possibly other products under a separate co-development and co-commercialization agreement ("Co-Development Agreement").

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

### 1. **Definitions.**

The following terms and their correlatives will have the following meanings:

**1.1** "Affiliate" of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with the power to direct the management and policies of such entity, provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. [\*\*\*\*\*].

---

1.2 “Arcturus Indemnitees” has the meaning set forth in Section 9.6(a).

1.3 “Arcturus LMD Technology” means any and all LMD Technology for delivering RNA therapeutics that is Controlled by Arcturus or any of its Affiliates as of the Effective Date or during the Term, including the LUNAR™ platform, a description of which technology, as in existence as of the License Agreement Effective Date, is set forth on **Appendix 1.3**.

1.4 “Arcturus Technology” means any Patents and Know-How that are Controlled by Arcturus or any of its Affiliates as of the License Agreement Effective Date or during the Term and that are necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. The Patents and Know-How comprised in the Arcturus Technology as of the License Agreement Effective Date are listed in **Appendix 1.4** hereto. Arcturus Technology shall include the Arcturus LMD Technology. Notwithstanding the foregoing, Arcturus Technology shall exclude

(a) any Patents and Know-How acquired by Arcturus after License Agreement Effective Date if Arcturus is required to make any payment to a Third Party in connection with the grant, maintenance or exercise of a sublicense to CureVac, unless CureVac agrees in writing to reimburse Arcturus for all such payments; *provided, however*, that such payments shall reduce CureVac’s royalty obligations in accordance with Section 4.3(b),

(b) any Patents and Know-How of a Third Party (including its Affiliates) that becomes Arcturus’ Affiliate after the License Agreement Effective Date as a result of a Change of Control, but only if and to the extent that it is not LMD Technology, and

(c) any Patents that CureVac elects to exclude pursuant to Section 2.3.

1.5 “Arcturus Technology Patent(s)” means any and all Patents comprised in the Arcturus Technology during the Term, unless otherwise set forth herein. For clarity, Arcturus Technology Patents include Arcturus’ interest in the Joint Interest Patents.

1.6 “Business Day” means a day other than a Saturday, Sunday, or bank or other public holiday in San Diego, California, USA or Tübingen, Germany or Boston, Massachusetts, USA.

1.7 “cGMP” means current Good Manufacturing Practices as specified in the U.S. C.F.R., ICH Guideline Q7A, or equivalent Laws of an applicable Regulatory Authority at the time of manufacture.

1.8 “Calendar Quarter” means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31.

---

1.9 “Change of Control” with respect to Arcturus, shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the “beneficial owner”, directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Arcturus then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Arcturus representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Arcturus or has the power, directly or indirectly, to elect a majority of the members of Arcturus’ board of directors, or similar governing body; or (ii) Arcturus enters into a merger, consolidation or similar transaction with another person or entity; or (iii) Arcturus sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Arcturus’ consolidated total assets to which this License Agreement relates, *provided however*, that:

(a) subsections (i) to (iii) shall only apply if the person or entity or Third Party acquiring control is (i) a pharmaceutical company which has experience in developing and commercializing pharmaceutical products (i.e., is a strategic, not financial investor or partner) or (ii) a competitor, i.e., a company whose business consists principally of mRNA development, manufacturing and/or commercialization, and

(b) a bona fide financing transaction with Third Parties that does not otherwise meet the requirements of subsection (a) shall not constitute a Change of Control.

1.10 “Combination Product” means a Licensed Product that includes at least one additional active pharmaceutical ingredient other than LMDs, mRNA Constructs, and other RNAs (i.e., Guide RNA(s)) or DNA Sequence(s). Drug delivery vehicles, adjuvants, and excipients shall not be deemed to be “active ingredients”, except in the case where such delivery vehicle, adjuvant, or excipient is recognized as an active ingredient in accordance with 21 C.F.R. 210.3(b)(7) or equivalent Laws in other jurisdictions, *provided however*, should LMDs comprised in a Licensed Product be characterized as “active ingredients” at any time during the Term, such LMDs will not be considered an “active ingredient” for the purposes of this definition.

1.11 “Confidential Information” of a Party means all proprietary Know-How, unpublished patent applications and other non-public information and data of a financial, commercial, business, operational, scientific or technical nature of such Party that is disclosed by or on behalf of such Party or any of its Affiliates or otherwise made available to the other Party or any of its Affiliates, whether made available orally, in writing or in electronic form in connection with this License Agreement, including information comprising or relating to concepts, discoveries, inventions, data, designs or formulae in connection with this License Agreement. In addition, any non-public information related to this License Agreement or the Licensed Products hereunder and disclosed by a Party to the other Party (or their respective Affiliates) under the Development and Option Agreement will be deemed such Party’s Confidential Information hereunder. Technology will be considered the Confidential Information of the Party (or Parties) owning such Technology, and jointly-owned Technology will be considered Confidential Information of both Parties.

1.12 “Control” or “Controlled” means with respect to Technology, a Party owns or has a license to use and practice the respective Patent or Know-How without violating the terms of any agreement with any Third Party.

1.13 “CTA” means a clinical trial application.

---

- 1.14 “CureVac Indemnitees” has the meaning set forth in Section 9.6(b).
- 1.15 “Development and Option Agreement” has the meaning set forth in the Preamble.
- 1.16 “Diligent Efforts” means, with respect to the efforts to be expended by each Party with respect to the activities of a Party pursuant to this Agreement, active and sustained efforts to conduct the applicable activity, or to attempt to achieve the applicable requirement or goal, in a prompt and expeditious manner, as is reasonably practicable under the circumstances (including the level of FTE funding and budget for out-of-pocket and Third Party contractors set forth therein) and the terms of this Agreement.
- 1.17 “Disclosing Party” has the meaning set forth in Section 8.1
- 1.18 “Field of Use” means the treatment and diagnosis of all diseases and conditions.
- 1.19 “First Commercial Sale” means the first sale for use or consumption of any Licensed Product in a country after all required Regulatory Approvals for commercial sale of such Licensed Product have been obtained in such country.
- 1.20 “FTE” means a full-time person, or more than one person working the equivalent of a full-time person, where “full-time” is determined by the standard practices in the biopharmaceutical industry in the geographic area in which such personnel are working, consisting of a total of 1880 hours per year of work on the applicable activities. Any person who devotes less than 1880 hours per year on the applicable activities shall be treated as an FTE on a pro-rated basis, based upon the actual number of hours worked by such person on such activities, divided by 1880. Any person who devotes more than 1880 hours per year on the applicable activities shall be treated as one (1) FTE, i.e., in no event shall one person be counted as more than one FTE. FTE activities shall include the performance of the applicable activities and scientific management oversight, as reasonably required, but, for clarity, exclude (i) the work of general corporate or administrative personnel, overhead (including facilities costs), insurances and similar costs.
- 1.21 “FTE Costs” means an initial rate of [\*\*\*\*\*] Dollars (\$[\*\*\*\*\*]) per FTE per year, which shall apply through December 31, 2019. Thereafter, the FTE Rate shall be changed bi-annually at the end of each second calendar year to reflect any percentage increase or decrease (as the case may be) in the Consumer Price Index in the U.S. (index for all items) (“CPI”) (based on the change in the CPI from the most recent index available as of the Effective Date to the most recent index available as of the date of the calculation of such revised FTE Cost rate).
- 1.22 “IND” means an investigational new drug application, or equivalent application or submission for approval to conduct human clinical trials.
- 1.23 “Indemnification Claim Notice” has the meaning set forth in Section 9.6(c).
- 1.24 “Indemnified Party” has the meaning set forth in Section 9.6(c).
- 1.25 “Indication” means an individual disease or clinical condition with respect to which at least one adequate and well controlled study is required to support inclusion of such disease or condition in the indication statement of an FDA approved package insert for a Licensed Product.
-

1.26 "Initiation" means in connection with a clinical trial in any of its phases 1 through 3 the first dosing of the fifth patient or fifth healthy subject.

1.27 "Inventions" has the meaning set forth in Section 5.1.

1.28 "Joint Interest Patents" means the Patents generated under the Development and Option Agreement and jointly owned by the Parties. Such Joint Interest Patents are listed in **Appendix 1.28** hereto, as amended from time to time.

1.29 "Know-How" means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form now known or hereafter developed.

1.30 "Late Stage Development" means Development after the Initiation of a Phase 3 Study.

1.31 "Law" or "Laws" means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.

1.32 "License Agreement" has the meaning set forth in the Preamble.

1.33 "License Agreement Effective Date" has the meaning set forth in the Preamble.

1.34 "Licensed Product" means [\*\*\*\*\*] product comprised of (i) LMD systems, which are covered by Arcturus LMD Technology; and containing (ii) one or more mRNA Constructs as the active pharmaceutical ingredient(s) intended to express the Target. In case of two or more mRNA Constructs these constructs may be contained in the same or separate LMDs. Licensed Product includes mRNA-LMD products which are administered jointly or separately, and mRNA-LMD products which are administered simultaneously or sequentially as a combination medicinal product or treatment. For Gene Editing purposes a Licensed Product may contain other RNA(s) (i.e., Guide RNA(s)) and/or DNA Sequence(s) which can be delivered together or separately (combined in one LMD or delivered in separate LMDs), in addition to the one or more mRNA Constructs intended to express the DNA Editing Protein.

1.35 "LMD Technology," means Technology Controlled by Arcturus that claims, embodies or incorporates delivery systems (and components thereof) based on or incorporating lipid-mediated delivery (LMD) systems.

1.36 "Losses" has the meaning set forth in Section 9.6(a).

---

1.37 "Materials" means any tangible chemical or biological material, including any compounds, LMD, DNA, RNA (including mRNA), clones, cells, and any expression product, progeny, derivative or other improvement thereto, along with any tangible chemical or biological material embodying any Know-How, Controlled by Arcturus.

1.38 "mRNA Construct" means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5' UTR, the associated open reading frame, 3'UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct, such mRNA Construct being covered by mRNA Technology.

1.39 "mRNA Technology," means Technology Controlled by CureVac that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.

1.40 "Milestones" means the milestones payable pursuant to Section 4.1.

1.41 "Milestone Event" has the meaning set forth in Section 4.1.

1.42 "Milestone Payment" has the meaning set forth in Section 4.1.

1.43 "Net Sales" means, with respect to any Licensed Product, the gross amount received by CureVac and its Affiliates and Sublicensees for *bona fide* sales of such Licensed Product to a Third Party (other than Affiliates and Sublicensees but including distributors for resale), less deductions, in each case to the extent reasonable, customary, actually allowed and taken in connection with the sale of such Licensed Product and not otherwise recovered or reimbursed:

(a) discounts (including cash, quantity and patient program discounts), retroactive price reductions, commissions, charge-back payments and rebates granted to managed health care organizations or to federal, state and local governments, their agencies, and purchasers and reimbursers or to trade customers;

(b) credits or allowances actually granted upon claims, damaged goods, rejections or returns of, such Licensed Product and not in excess of the selling price of such Product, including such Licensed Product returned in connection with recalls or withdrawals;

(c) freight out, postage, shipping and insurance charges for delivery of such Licensed Product;

(d) taxes or duties levied on, absorbed or otherwise imposed on the sale of such Licensed Product, including value-added taxes, or other governmental charges otherwise imposed upon the billed amount, as adjusted for rebates and refunds; and

(e) wholesaler and distributor administration fees

(f) other customary deductions taken in the ordinary course of business in accordance with IFRS (International Financial Reporting Standards) principles.

If a single item falls into more than one of the above categories above, such items will not be deducted more than once.

---

Net Sales shall not include any payments among CureVac, its Affiliates and Sublicensees. Net Sales shall be determined in accordance with generally accepted accounting principles, consistently applied across all products. Net Sales for any Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/(A+B)$ , where A is the weighted average price paid for the Licensed Product contained in such Combination Product sold separately in finished form in such country, and B is the weighted average invoice price paid for the other active ingredients contained in such Combination Product sold separately in finished form in such country, if such Licensed Product and such other active ingredients are each sold separately in such country.

If such other active ingredients are not sold separately in such country, then Net Sales for such Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/C$ , where C is the weighted average invoice price paid for such Combination Product in such country. If such Licensed Product is not sold separately in finished form in such country, Net Sales for such Licensed Product will be determined by CureVac's good faith estimate of the relative contribution of such Licensed Product and each such other active ingredients in such Combination Product, and shall take into account in good faith any applicable allocations and calculations that may have been made for the same period in other countries.

**1.44** "Non-Rare Disease Target" means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of equal to or more than [\*\*\*\*\*] in [\*\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Non-Rare Disease Target.

**1.45** "Patent(s)" means (a) an issued patent, a patent application, and a future patent issued from any such patent application, (b) a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (a), and (c) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (a) or (b), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder)

**1.46** "Patent Costs" means the reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents with respect to Licensed Products and enforcing and defending them.

**1.47** "Phase 1 Study," means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(a) or corresponding foreign regulations.

**1.48** "Phase 2 Study" means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(b) or corresponding foreign regulations.

---

1.49 “Phase 3 Study” means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(c) or corresponding foreign regulations.

1.50 “Pre-Existing Licensing Restrictions” means, with respect to the Target, that Arcturus or its Affiliates have granted to a Third Party with respect to the Target a non-exclusive, co-exclusive or an exclusive license or option pursuant to a *bona fide* written agreement that is in effect at the time of the submission of the Acceptance Notice by CureVac pursuant to Section 5.1(b) of the (amended) Development and Option Agreement.

1.51 “Pre-Existing Prosecution, Enforcement and Defense Restrictions” means, with respect to the Target, those certain prosecution, enforcement and defense rights granted by Arcturus or its Affiliates to a Third Party(ies) with respect to the Patents pursuant to the *bona fide* written agreement(s) set forth on Exhibit 1.51 hereto as such *bona fide* written agreement(s) were in effect as of the Effective Date of the Development and Option Agreement. For clarity, the exercise of such foregoing rights by a Third Party with respect to Patents that are not specific to the Target or Licensed Products shall be deemed a Pre-Existing Prosecution, Enforcement and Defense Restriction.

1.52 “Rare Disease Target” means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of less than [\*\*\*\*] in [\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Rare Disease Target.

1.53 “Receiving Party” has the meaning set forth in Section 8.1.

1.54 “Regulatory Approval” means, with respect to a country or extra-national territory, any and all approvals (including BLAs and MAAs), licenses, registrations or authorizations of any Regulatory Authority necessary in order to commercially distribute, sell or market a product in such country or some or all of such extra-national territory, including solely to the extent required as a condition to commercial sale to end users, any pricing or reimbursement approvals.

1.55 “Regulatory Authority” means any national (e.g., the FDA), supra-national (e.g., the EMA), regional, state or local regulatory agency, department, bureau, commission, council or other governmental authority, in any jurisdiction in the world, involved in the granting of Regulatory Approval.

1.56 “Royalty Reduction” has the meaning set forth in Section 4.3(b).

1.57 “Royalty Term” has the meaning set forth in Section 4.3(d).

1.58 “Sublicensee” means any Third Party that is granted a sublicense as permitted by Section 2.2, either directly by CureVac or its Affiliates or indirectly by any other Sublicensee hereunder.

1.59 “Sublicense Income” means the fees and other payments, including upfront payments as well as development, regulatory milestone payments received by CureVac or its Affiliates from a Sublicensee, excluding: (a) royalty payments and net sales milestones; (b) reimbursement of costs and expenses, including for patent prosecution and enforcement and (c) equity or premium on equity and (d) loans or loans forgiven either (i) as a result of financial distress of the borrower or (ii) that are not specific to the Licensed Product.

---

**1.60** “Target” means the Target identified in **Appendix 1.60** hereto. The Target includes

(a) up to N (N= [\*\*\*\*]) proteins, including all possible combinations resulting from removing one of the N proteins (N minus [\*\*\*\*] proteins), together with all variants of such proteins, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof; *provided, however*, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring protein; and

(b) [\*\*\*\*] antigens of a given pathogen, including [\*\*\*\*] antigen and any combination of such antigens, together with all variants of such antigens, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof, *provided, however*, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring antigen; and

(c) a DNA Target, *provided, however*, that the first DNA Target for each DNA Editing Protein would not count as a Target. Each subsequent DNA Target for this DNA Editing Protein would count as a Target. For clarity, a DNA Editing Protein would be defined as a Target under (a) above and count as a single Target.

If a given protein, e.g., an antibody or enzyme, comprises separated amino acid chains which might be delivered by separated mRNA Constructs, such proteins would be defined as one Target.

**1.61** “Technology,” means collectively Patents and Know-How.

**1.62** “Term” has the meaning set forth in Section 10.1.

**1.63** “Territory,” means worldwide.

**1.64** “Third Party,” means any person or entity other than CureVac, Arcturus and their respective Affiliates.

**1.65** “Third Party Claims” has the meaning set forth in Section 9.6(a).

**1.66** “Valid Claim” means a claim of

(a) an issued and unexpired patent (as may be extended through supplementary protection certificate or patent term extension) or

(b) a pending patent application, *provided, however*, that once the priority date or earliest filing date to which the pending patent application refers is more than seven years old, such claim shall not constitute a Valid Claim for purposes of this License Agreement anymore, unless and until a patent issues with such claim included in the Arcturus Technology Patents, which claim has not been revoked, held invalid or unenforceable by a patent office, court or other governmental agency of competent jurisdiction in a final and non-appealable decision (or decision from which no appeal was taken within the allowable time period) and has not been disclaimed, denied, abandoned or admitted to be invalid or unenforceable through reissue, re-examination or disclaimer or otherwise.

---

2. **License Grants; Technology Transfer.**

2.1 **Licenses by Arcturus.** Subject to the terms and conditions of this License Agreement, Arcturus hereby grants to CureVac a non-exclusive license, with the right to sublicense in multiple tiers under the Arcturus Technology Patents and the Arcturus Know-How, in each case solely to develop, have developed, make, have made, use and have used, sell, offer for sale, have sold and import and have imported Licensed Products in the Field of Use in the Territory. Arcturus covenants that, except as required by the Pre-Existing Licensing Restriction, Arcturus will not grant to any Third Party any additional licenses under the Arcturus Technology to develop, have developed, make, have made, use and have used, sell, offer for sale, have sold and import and have imported Licensed Products (or any LMD Product directed to the Target) in the Field of Use in the Territory.

2.2 **Sublicensing Rights.**

(a) **CureVac Sublicenses.** The licenses granted in Section 2.1 may be sublicensed (with the right to sublicense through multiple tiers), in full or in part, by CureVac, its Affiliates or Sublicensees to CureVac's Affiliates and Third Parties provided, that for any sublicense:

(i) Each sublicense will be in writing (*provided, however*, that not each sublicense to Affiliates must be in writing) and on terms consistent with and subject to the terms of this License Agreement, including but not limited to the limitations on patent prosecution, enforcement and defense rights of such Sublicensee as set forth in Sections 6.1(d) and 7.2(a);

(ii) CureVac will be responsible for any and all obligations of such Sublicensee (including Affiliates and Sublicensees) as if such Sublicensee were CureVac hereunder;

(iii) CureVac provide to Arcturus a copy of such sublicense agreement within thirty (30) days of execution (which copy may be redacted for terms that are not otherwise required to confirm conformance with the terms of this License Agreement); and

(iv) Any sublicense granted by CureVac (and any further sublicenses) to any rights licensed to it hereunder shall terminate immediately upon the termination of this License Agreement, provided that for sublicense to a Third Party, such sublicensed rights shall not terminate if, as of the effective date of such termination pursuant to Sections 10.2, 10.3(a) or 10.4, such Sublicensee is not in material default of its obligations under its sublicense agreement, and within [\*\*\*\*\*] days of such termination and the disclosure of this License Agreement to the Sublicensee, the Sublicensee agrees in writing to be bound directly to Arcturus under a license agreement substantially similar to this License Agreement with respect to the rights sublicensed hereunder, substituting such Sublicensee for CureVac.

---

(b) *Subcontractors.* For clarity purposes, CureVac is entitled to engage contract research organizations and contract manufacturing organizations for the development and manufacture of Licensed Products on behalf of CureVac. To the extent such contract organizations require a license to perform such subcontracted activities under applicable Laws, CureVac is entitled to grant a limited license solely to perform the work for which the subcontractor is engaged, without an obligation to meet the conditions of Section 2.2 (a)(iii).

(c) *Technology Transfer.* Following the License Agreement Effective Date, Arcturus will use Diligent Efforts to transfer the formulation process for the Licensed Products that are intended to express the Target to CureVac or a reputable and competent GMP manufacturer selected by CureVac and reasonably acceptable to Arcturus. Upon written request by CureVac, Arcturus will conduct a technology transfer to CureVac and/or its designee(s). Arcturus will make its personnel available without charge for a total of [\*\*\*\*\*] hours during normal working hours for such transfer, and for additional hours in excess of [\*\*\*\*\*] up to a total of [\*\*\*\*\*] hours to be invoiced monthly at the then current FTE Cost. Such designee(s) may be an Affiliate, sublicensee or Third Party manufacturers selected by CureVac and reasonably acceptable to Arcturus, and which Third Party manufacturers may also be a backup manufacturer or a second manufacturer of Licensed Products as required for the applicable transferee of the then- current process. CureVac shall reimburse Arcturus for the reasonable cost (including internal FTE Cost) incurred to conduct such technology transfer as specified above.

**2.3 Updates to Appendix 1.4: Exclusion of Certain Patents.** Arcturus shall notify CureVac at least once every [\*\*\*\*\*] months of Patents that are added to the Arcturus Technology following the License Agreement Effective Date or any Patents that have been abandoned or discontinued in accordance with the terms of this License Agreement. **Appendix 1.4** shall be deemed automatically updated to include any such added Patents, provided that with written notice to Arcturus, CureVac may elect upon [\*\*\*\*\*] days' irrevocable written notice to Arcturus to exclude any particular Arcturus Technology Patents. Following any such written notice by CureVac, upon the expiration of the notice period the identified Arcturus Technology Patents that CureVac specifies for exclusion from this License Agreement will no longer be licensed to CureVac hereunder, and CureVac shall not have any rights (including rights pursuant to this Agreement) under such Arcturus Technology Patents nor obligations hereunder with respect to such Arcturus Technology Patents. For clarity, in the event that the Licensed Product is subsequently determined to be covered or otherwise infringe a Valid Claim of any excluded patent hereunder, then such infringement shall be deemed to be a material breach of this License Agreement by CureVac.

**2.4 Documents and Declarations.** At CureVac's reasonable request and cost and expense, Arcturus shall execute all documents, deliver declarations regarding the licenses granted hereunder, and Arcturus shall reasonably cooperate with CureVac to the extent such documents, declarations and/or cooperation are required to give effect to this License Agreement and/or for the recording or registration of the licenses granted hereunder at the various patent offices in the Territory for the benefit of CureVac, its Affiliates or their Sublicensees.

---

2.5 **Diligence; Reporting.** CureVac shall use Diligent Efforts to develop, manufacture and commercialize Licensed Products in the Field of Use in the Territory, and shall keep Arcturus reasonably informed as to the progress and results of its and its Affiliates' and Sublicensees' development, manufacture and commercialization of the Licensed Product. Without limiting the foregoing, CureVac shall provide Arcturus with a written report of the development, manufacture and commercialization of the Licensed Product within [\*\*\*\*\*] days after the end of each calendar year, and shall promptly respond to Arcturus reasonable questions or requests for additional information relating to such activities.

2.6 **Compliance.** CureVac shall at all times comply with all applicable Laws (including anti-bribery laws) in the development, manufacture and commercialization of the Licensed Product and the performance of its other obligations under this License Agreement, and shall not use any employee or consultant who has been debarred by any Regulatory Authority or, to CureVac's knowledge, is the subject of debarment proceedings by a regulatory authority.

2.7 **Updates.** Arcturus shall inform CureVac within [\*\*\*\*\*] Business Days of intellectual property matters affecting the Arcturus Technology Patents and the Arcturus Know-How of which it becomes aware that would reasonably be considered to negatively impact the rights of CureVac pursuant to this Agreement.

2.8 **Material.** CureVac shall have the right to retain Material provided by Arcturus under the Development and Option Agreement, to the extent such Material is necessary or useful for the exercise of a CureVac's rights or obligations under this License Agreement. Following the License Agreement Effective Date, only the provisions of this License Agreement, but not of the Development and Option Agreement, shall apply in relation to such Material.

3. **License Limitations.**

3.1 **Reserved Rights.** No licenses or other rights are granted by Arcturus hereunder to use any trademark, trade name, trade dress or service mark owned or otherwise Controlled by Arcturus or any of its Affiliates. All licenses and other rights are or shall be granted only as expressly provided in this License Agreement, and no other licenses or other rights is or shall be created or granted by either Party hereunder by implication, estoppel or otherwise. CureVac shall not, and shall not permit any of its Affiliates or Sublicensees to, practice or use any Arcturus Technology outside of the scope of the license granted to it under Section 2.1 or in contravention of Section 3.1. Arcturus retains the exclusive right to practice, license and otherwise exploit the Arcturus Technology outside the scope of the licenses granted to CureVac under Section 2.1 and in an event to practice any rights that are not exclusive pursuant to Section 2.1.

---

3.2 Other Licenses. Arcturus acknowledges the rights granted to CureVac pursuant to this Agreement and shall not grant licenses under Arcturus Technology to Third Parties that are in conflict with this License Agreement it being understood that a license to enable or implement any Pre- Existing Licensing Restriction with respect to the Target shall not be deemed a conflict hereunder. In addition, Arcturus shall use Diligent Efforts to undertake that any licenses obtained from Third Parties will be sublicensable to CureVac, to the extent required or useful for the Licensed Product, provided that CureVac shall be responsible for an allocable portion of the payment and obligations that may be required in order to obtain rights with respect to the Licensed Product pursuant to such Third Party agreement.

4. Payments and Royalties.

4.1 Milestone Payments. CureVac will make milestone payments (each, a "Milestone Payment") to Arcturus upon the first occurrence of each of the milestone events (each, a "Milestone Event") by Licensed Product as set forth below in this Section 4.1. CureVac will notify Arcturus of the achievement of each Milestone Event (whether achieved by CureVac, its Affiliates or Sublicensees) within (i) [\*\*\*\*\*] Business Days of such achievement, if the Milestone Event is achieved by CureVac or its Affiliates, or (ii) [\*\*\*\*\*] Business Days of the receipt by CureVac of a notification about the achievement, if the Milestone Event is achieved by a Sublicensee.

Each Milestone Payment will be non-refundable, non-creditable and payable to Arcturus by CureVac within [\*\*\*\*\*] days of delivery of an invoice from Arcturus following notification from CureVac pursuant to the preceding paragraph, provided that if no such notification is timely provided by CureVac, the Milestone Payment shall be deemed payable [\*\*\*\*\*] days after (A) the achievement of such Milestone Event, if the Milestone Event is achieved by CureVac or its Affiliates, or (B) after the receipt by CureVac of the notification from CureVac pursuant to Section 4.1(ii). For clarity, the term "non-refundable" is not intended to limit either Party's rights to pursue damages arising from a breach of this Agreement.

If one or more of the Milestone Events set forth below are not achieved or not required for any reason, the payment for such skipped Milestone Event will be due at the same time as the payment for the next achieved Milestone Event. For clarity: [\*\*\*\*\*].

For clarity, to the extent that a Licensed Product is initiated against a Rare Disease Target and later expanded to a non-Rare Disease Target, then any and all Milestone Payments not previously made shall be due and payable upon the achievement of the next non-Rare Disease Milestone (e.g., [\*\*\*\*\*]).

4.2 Sublicensing Revenues. If within twenty-four (24) months after the License Agreement Effective Date CureVac grants a sublicense to a Third Party under this License Agreement for the development and commercialization of Licensed Products, then CureVac will pay to Arcturus [\*\*\*\*\*] of all Sublicense Income actually received by CureVac, to the extent the Sublicense Income exceeds the Option Exercise Fee paid by CureVac under the Development and Option Agreement to exercise the Option for this License Agreement and the Milestone Payments paid by CureVac under this License Agreement. The payments will be made within [\*\*\*\*\*] days after receipt by CureVac from the Third Party. For purposes of clarity, if CureVac grants a sublicense to Third Parties later than [\*\*\*\*\*] months after the License Agreement Effective Date, CureVac will not owe any Sublicensing Income to Arcturus.

4.3 Royalties.

(a) *Royalty*. Subject to the remainder of this Section 4.3, on a country-by-country basis and a Licensed Product-by-Licensed Product basis, CureVac will pay to Arcturus (i) a royalty of [\*\*\*\*\*] of Net Sales of the Licensed Product (ii) as well as of any net sales milestones (without offset for any reductions pursuant to Section 4.3(b)) for such Licensed Product received from the Sublicensee.

(b) *Third Party Payments and Royalty Reductions.* If CureVac or its Affiliate or Sublicensee, in its reasonable judgment, considers it necessary or useful to obtain a license from any Third Party under any LMD Technology that Covers a Licensed Product in order to develop, manufacture or commercialize such Licensed Product, the amount of CureVac's royalty obligations under Sections 4.3(a) will be reduced by [\*\*\*\*\*] of the amount of the upfront, milestone and royalty payments made to such Third Party on account of the development, manufacture or commercialization of such Licensed Product ("Royalty Reductions"), *provided, however*, that any Royalty Reduction shall not result in less than the minimum royalty due to Arcturus under Section (c) below.

(c) *Minimum Royalty.* In no event will the Royalty payable by CureVac to Arcturus for any Licensed Product be less than (i) [\*\*\*\*\*] if the reduction in subsection (e) does not apply; or (ii) [\*\*\*\*\*] if the reduction in subsection (e) also applies.

(d) *Term.* The royalty term ("Royalty Term") shall expire on a country-by-country and Licensed Product-by-Licensed Product basis, on the last to occur of (i) expiration of the last to expire Valid Claim in the Arcturus Technology that, but for the license described herein from Arcturus to CureVac for the applicable Licensed Product, is infringed by the making, using or sale of such Licensed Product, (ii) expiration of any period of data exclusivity, market exclusivity or supplemental protection certificates covering the Licensed Product in such country; and (iii) ten (10) years after First Commercial Sale of Licensed Product in such country. For the avoidance of doubt, upon exhaustion of the obligation to pay Royalties to Arcturus as set forth above the continued use of Arcturus Know-How comprised in the Arcturus Technology for the development, manufacture and/or sale of the Licensed Product shall not, in and of itself, obligate CureVac to pay further royalties to Arcturus. Thereafter, CureVac's license under Section 2.1 will become irrevocable, perpetual, fully paid-up and royalty-free on a country-by-country and Licensed Product-by-Licensed Product basis.

(e) *Know-How Royalty.* On a country-by-country, and a Licensed -Product-by-Licensed Product basis, in the event that during the Royalty Term a Licensed Product is not covered by a Valid Claim, the royalty otherwise payable for such Licensed Product, after the Royalty Reductions above, will be reduced by [\*\*\*\*\*].

#### 4.4 Payment Terms.

(a) *Manner of Payment.* All payments to be made by CureVac hereunder will be made in U.S. dollars by wire transfer to such bank account as Arcturus may designate.

---

(b) *Records and Audits.* CureVac shall keep, and shall cause each of its Affiliates and Sublicensees, as applicable, to keep adequate books and records of accounting for the purpose of calculating all royalties and other amounts payable to Arcturus hereunder. For the [\*\*\*\*\*] years next following the end of the calendar year to which each shall pertain, such books and records of accounting (including those of CureVac's Affiliates and Sublicensees) shall be kept at each of their principal places of business and shall be open for inspection at reasonable times and upon reasonable notice by an independent certified accountant selected by Arcturus, and which is reasonably acceptable to CureVac, for the sole purpose of inspecting the Net Sales calculations and supporting details to the extent reasonably necessary and resulting royalties and other amounts due to Arcturus under this License Agreement. In no event shall such inspections be conducted hereunder more frequently than once every [\*\*\*\*\*] months. Such accountant must have executed and delivered to CureVac and its Affiliates, a confidentiality agreement as reasonably requested by CureVac, which shall include provisions limiting such accountant's disclosure to Arcturus to only the results and basis for such results of such inspection. The results of such inspection, if any, shall be binding on both Parties. Any underpayments plus interest from the original due date shall be paid by CureVac within [\*\*\*\*\*] days of notification of the results of such inspection. Any overpayments shall be fully creditable against amounts payable in subsequent payment periods. Arcturus shall pay for such inspections, except that in the event there is any upward adjustment in aggregate royalties and other amounts payable for any calendar year shown by such inspection of more than [\*\*\*\*\*] of the amount paid, CureVac shall reimburse Arcturus for any reasonable out-of-pocket costs of such accountant.

(c) *Reports and Royalty Payments.* For as long as royalties are due under Section 4.3, CureVac shall furnish to Arcturus written reports.

(i) Reports shall be provided within [\*\*\*\*\*] days of (1) the end of the Calendar Quarter if Net Sales are generated by CureVac and its Affiliates, and (2) the receipt of corresponding information (which may be estimated) from Sublicensees but in any event within [\*\*\*\*\*] days of the end of the Calendar Quarter with respect to Net Sales generated by such Sublicensees.

(ii) Royalty payments for each Calendar Quarter shall be due within [\*\*\*\*\*] Business Days of delivery of an invoice from Arcturus following submission of a royalty report from CureVac, but only subject to the prior receipt by CureVac of the corresponding royalty payment from the Sublicensee, if applicable; however such royalty payments due to Arcturus shall not be reduced by deductions which exceed those covered by the Net Sales definition according to Section 1.43.

(iii) The report shall include, at a minimum, the following information for the applicable Calendar Quarter for each Licensed Product if Net Sales are generated by CureVac and its Affiliates: (i) the gross sales by country reasonably required for the calculation of royalty payments due according to this Agreement, (ii) the calculation in reasonable detail of the Net Sales from such gross sales amounts, including the deductions pursuant to the definition of Net Sales and the amounts of any credits or reductions permitted by Section 4.2; and (iii) the computations for any Arcturus currency conversions pursuant to subsection (d) below.

---

(iv) CureVac will require each Sublicensee to share with Arcturus the information listed in the foregoing clauses as it relates to Net Sales made by such Sublicensee, and to the extent practicable, will include such Sublicensee information in such report; provided that the level of detail with respect to the items subject to report pursuant to Section 4.4(c)(iii) shall be limited to the information that CureVac actually receives from any such Sublicensee. All such reports shall be considered the Confidential Information of CureVac, subject to Section 4.4(b).

(d) *Currency Exchange.* With respect to Net Sales invoiced in U.S. dollars, the Net Sales and the amounts due to Arcturus hereunder will be expressed in U.S. dollars. With respect to Net Sales invoiced in a currency other than U.S. dollars, payments will be calculated based on the average of the closing exchange rates reported by the Wall Street Journal (<http://quotes.wsj.com/fx/EURUSD>), or such other source as the Parties may agree in writing, of the applicable reporting period for the payment due.

(e) *Taxes.* CureVac may withhold from payments due to Arcturus amounts for payment of any withholding tax that is required by Law to be paid to any taxing authority with respect to such payments. CureVac will provide Arcturus all relevant documents and correspondence, and will also provide to Arcturus any other cooperation or assistance on a reasonable basis as may be necessary to enable Arcturus to claim exemption from such withholding taxes and to receive a refund of such withholding tax or claim a foreign tax credit. CureVac will give proper evidence from time to time as to the payment of any such tax. The Parties will cooperate with each other in seeking deductions under any double taxation or other similar treaty or agreement from time to time in force. CureVac shall use Diligent Efforts to minimize withholding taxes. In the event that any tax deduction or withholding obligation arises or increases as a direct result of any reincorporation, redomiciliation, change in source of payments under this Agreement or other similar corporate structuring actions undertaken by CureVac from and after the License Agreement Effective Date, then CureVac shall increase the payment (in respect of which such deduction or withholding of tax is required to be made) to ensure that Arcturus receives an amount equal to the amount that it would have received had no such action occurred. Apart from any such permitted withholding and those deductions expressly included in the definition of Net Sales, the amounts payable by CureVac to Arcturus hereunder will not be reduced on account of any taxes, charges, duties or other levies. Each Party shall be solely responsible for the payment of all taxes imposed on its share of income arising directly or indirectly from the activities of the Parties under this License Agreement.

(f) *Blocked Payments.* In the event that, by reason of applicable law in any country, it becomes impossible or illegal for CureVac or its Affiliates or Sublicensees to transfer, or have transferred on its behalf, payments owed to Arcturus hereunder, CureVac will promptly notify Arcturus of the conditions preventing such transfer and such payments will be deposited in local currency in the relevant country to the credit of Arcturus in a recognized banking institution proposed by Arcturus and reasonably acceptable to CureVac or, if none is proposed by Arcturus within a period of [\*\*\*\*\*] days, in a recognized banking institution selected by CureVac or its Affiliate or Sublicensee, as the case may be, and identified in a written notice given to Arcturus.

---

(g) *Interest Due.* If any payment due to Arcturus under this License Agreement is overdue (and is not subject to a good faith dispute), then CureVac will pay interest thereon (before and after any judgment) at an annual rate of the lesser of [\*\*\*\*\*] above the prime rate as reported in The Wall Street Journal, Eastern Edition, and the maximum rate permitted by applicable Law, such interest to run from the date upon which payment of such sum became due until payment thereof in full together with such interest.

(h) *Mutual Convenience of the Parties.* The royalty and other payment obligations set forth hereunder have been agreed to by the Parties for the purpose of reflecting and advancing their mutual convenience, including the ease of calculating and paying royalties and other amounts to Arcturus.

5. **Ownership and Inventorship of IP.**

5.1 **Solely-Owned IP.** As between the Parties and subject to Section 5.3, each Party will own and retain all right, title and interest in and to any and all Know-How and Patents arising therefrom that are discovered, created, conceived, developed or reduced to practice under or in connection with this License Agreement (the "**Inventions**") solely by or on behalf of such Party. Subject to the licenses hereunder and the other terms and conditions of this License Agreement or any other agreement between the Parties, each Party will be solely responsible for the prosecution and maintenance, and the enforcement and defense, of its solely-owned Patents.

5.2 **Inventorship.** Inventorship of all Inventions shall be determined in accordance with applicable laws. Each Party will ensure that each employee, consultant and subcontractor conducting any activities under this License Agreement on behalf of such Party will be subject to written agreements to assign to such Party all of its right, title and interest in and to the Inventions so that such Party can comply with its obligations with respect to the ownership allocation of the Inventions as set forth below. In addition, each Party shall be solely responsible for payments that may be required to any of such Party's employees or consultants and subcontractors in connection with or with respect to such agreements, including moral rights payments.

5.3 **Ownership.** Notwithstanding inventorship in the first instance pursuant to Section 5.2, ownership of all Inventions, as between the Parties, will be assigned by the Parties as follows: (a) Arcturus will solely own all Inventions that are improvements solely to the LMD Technology ("**LMD Inventions**"), and (b) CureVac will solely own all Inventions that are improvements solely to the mRNA Technology ("**mRNA Inventions**"). Specifically, CureVac hereby assigns to Arcturus all of its right, title and interest in and to any and all LMD Inventions, and agrees to take such actions reasonably requested by Arcturus to evidence such assignment. Arcturus hereby assigns to CureVac all of its right, title and interest in and to any and all mRNA Inventions, and agrees to take such actions reasonably requested by CureVac to evidence such assignment. For clarity, the assignment provisions with respect to mRNA Inventions are restricted solely to improvements to the mRNA Technology.

---

**6. Patent Prosecution and Maintenance.**

**6.1 Generally.**

(a) As between the Parties and subject to Section 6.2 below, Arcturus (or its Third Party licensor, if any) will have the sole right, at its sole costs, to prosecute and maintain Arcturus Technology Patents, other than the Joint Interest Patents.

(b) In relation to any Arcturus Technology Patents that specifically claim the Licensed Product, prior to filing, Arcturus will provide CureVac with copies of all specific claims relevant to the Licensed Product in such applications for all such Arcturus Technology Patents, and all other material submissions and correspondence relating to such claims with any patent authorities regarding such Arcturus Technology Patents, in sufficient time (not to be less than [\*\*\*\*] days) to allow for review and comment by CureVac. In addition, Arcturus will provide CureVac and its counsel with an opportunity to consult with Arcturus and its counsel regarding prosecution and maintenance of any such Arcturus Technology Patents, and Arcturus will not unreasonably refuse to address all reasonable comments timely made by or on behalf of CureVac.

(c) As between the Parties, CureVac will have the first right to prosecute and maintain any and all Joint Interest Patents and the Parties will share equally all costs incurred by CureVac in connection with such efforts. Prior to filing, CureVac will provide Arcturus with copies of all applications for such Joint Interest Patents, and all other material submissions and correspondence with any patent authorities regarding such Joint Interest Patents, in sufficient time (not to be less than [\*\*\*\*] days) to allow for review and comment by Arcturus. In addition, CureVac will provide Arcturus and its counsel with an opportunity to consult with CureVac and its counsel regarding prosecution and maintenance of any such Joint Interest Patents, and CureVac will consider in good faith all reasonable comments timely made by or on behalf of Arcturus.

(d) In the event that CureVac or its Affiliates grants a sublicense pursuant to Section 2.2, as between CureVac and any such Sublicensee,

(i) to the extent any such Arcturus Technology Patent or Joint Interest Patent does not specifically claim the Licensed Product, CureVac shall retain its rights to prosecute any such sublicensed Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 6.1(b) and 6.1(c); provided, however, that such Sublicense may provide for instruction by the Sublicensee of CureVac's exercise of its rights to prosecute any sublicensed Arcturus Technology Patent or Joint Interest Patent;

(ii) to the extent any such Arcturus Technology Patent or Joint Interest Patent specifically claims the Licensed Product (i.e., with respect to the claims limited to the Licensed Product, but not the broader claims that cover other products or potential products in such Arcturus Technology Patents or Joint Interest Patents), CureVac shall have the right to sublicense its rights to prosecute any such sublicensed Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 6.1(b) and 6.1(c) to the Sublicensee.

**6.2 Election Not to Prosecute or Maintain or Pay Patent Costs.**

(a) If Arcturus elects not to pay its share of the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents, then it shall assign its co-ownership share in such Patents to CureVac and the respective Patent shall no longer be considered a Joint Interest Patent.

---

(b) *By CureVac.* If CureVac elects not (i) to file, prosecute or maintain any Joint Interest Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay its share of the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents then in each such case CureVac will so notify Arcturus, promptly in writing and in good time to enable Arcturus to meet any deadlines by which an action must be taken to preserve such Joint Interest Patent in such country at Arcturus' expense, if Arcturus so requests. Upon receipt of each such notice by CureVac, Arcturus will have the right, but not the obligation, to notify CureVac in writing on a timely basis that CureVac should transfer the prosecution or maintenance of such Joint Interest Patent to Arcturus and at Arcturus' sole expense. Arcturus is entitled to discontinue the payment of Patent Costs for any Joint Interest Patents at any time, provided that it will so notify CureVac in writing in time for such discontinuance. In the event that Arcturus assumes the prosecution and maintenance of any such Joint Interest Patent, then CureVac would make available to Arcturus all documentation and correspondence with respect to such Joint Interest Patent, such Joint Interest Patent shall no longer be licensed under this Agreement with respect to the Licensed Product.

**6.3 Cooperation.** Each Party will reasonably cooperate with the other Party in those activities involving the Arcturus Technology Patents and Joint Interest Patents set forth in Sections 6.1 and 6.2. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants and agents of CureVac and Arcturus and their respective Affiliates and Sublicensees to execute all documents, as reasonable and appropriate so as to enable such activities in respect of any such Arcturus Technology Patents in any country.

## **7. Patent Enforcement and Defense.**

**7.1 Notice.** To the extent not in breach of an obligation of confidentiality, each Party will promptly notify, in writing, the other Party upon learning of any actual or suspected infringement of any Arcturus Technology Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any Arcturus Technology Patents, and will, along with such notice, supply the other Party with any evidence in its possession pertaining thereto.

### **7.2 Enforcement and Defense.**

(a) *Enforcement.*

(i) As between the Parties,

(1) Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up enforcement rights), at its cost, will have the first right, but not the obligation, to seek to abate any infringement of the Arcturus Technology Patents (other than those in subsection (2)) by a Third Party, or to file suit against any such Third Party for such infringement, and

(2) CureVac (or its sublicensee, if any) shall have the first right, but not the obligation, to take action or bring suit and bear all expenses against such Third Party infringer with respect to: (A) Joint Interest Patents; and/or (B) any other Arcturus Technology Patents that, on the date of first notice of such infringement, specifically claim the Licensed Product but are not necessary or useful for the research, development, manufacturing and commercialization of any product comprising Arcturus Technology that is exclusively licensed or optioned to a Third Party or is in Late Stage Development or being commercialized by Arcturus or its Affiliates.

---

(b) If the Party first responsible for such enforcement elects not to take action or to bring suit to prosecute such infringement or to continue such action or suit, it shall notify the other Party of such election within [\*\*\*\*\*] days after become aware of or receipt of the notice of the infringement or after the election to stop any such action or suit. If after the expiration of the [\*\*\*\*\*] days period (or, if earlier, the date upon which the responsible Party provides written notice that it does not plan to bring such action) the responsible Party has neither obtained a discontinuance of infringement nor filed suit against any such Third Party infringer of such Patent, then

(i) in the case of an election by Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up enforcement rights) not to prosecute an infringement of an Arcturus Technology Patent specifically claiming the Licensed Product, CureVac shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, provided that the infringement is with respect to a product related to the Target(s) under this License Agreement, and further provided that CureVac shall bear all the expenses of such suit and

(ii) in the case of a CureVac election not to prosecute an infringement of a Joint Interest Patents or Arcturus Technology Patent with respect to which CureVac has rights to take first action, (i) Arcturus shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, provided that Arcturus shall bear all the expenses of such suit, and CureVac shall join Arcturus in such suit to the extent legally required, unless (ii) CureVac decides to assign its interest in such Joint Interest Patent - on a country-by-country basis - to Arcturus and such Joint Interest Patent shall become an Arcturus Technology Patent and no longer subject to license pursuant to this License Agreement.

(c) *Defense.*

(i) As between the Parties,

(1) Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up defense rights) will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging any Arcturus Technology Patents, other than: (i) Joint Interest Patents; and (ii) any other Arcturus Technology Patents that, on the date of first notice of such action, specifically claim the Licensed Product but are not necessary or useful for the research, development, manufacturing and commercialization of any product comprising Arcturus Technology that is exclusively licensed or optioned to a Third Party or is in Late Stage Development or being commercialized by Arcturus or its Affiliates, and

---

(2) CureVac shall have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging Joint Interest Patents as well as such other Arcturus Technology Patents that specifically claim the Licensed Product.

(ii) If the Party first responsible for such defense does not take steps to defend within a commercially reasonable time, or elects not to continue any such defense (in which case it will promptly provide notice thereof to the other Party), then (i) in the case of an election by Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up defense rights) not to defend an Arcturus Technology Patent specifically claiming the Licensed Product, CureVac shall have the right, but not the obligation, to defend any Arcturus Technology Patents that cover Licensed Product and no other product licensed or optioned by Arcturus to a Third Party or commercialized by Arcturus, provided that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to defend the Joint Interest Patents, Arcturus shall have the right, but not the obligation, to take action or bring suit to defend such Patents, provided that Arcturus shall bear all the expenses of such suit. Notwithstanding the foregoing, in the event that CureVac elects not to prosecute an infringement of a Joint Interest Patent, then CureVac shall, at its discretion, either (i) assign such Joint Interest Patent to Arcturus - on a country-by-country basis -, which shall become an Arcturus Technology Patent and no longer subject to license pursuant to this License Agreement or (ii) join Arcturus in such suit to the extent legally required.

(d) Notwithstanding the foregoing, any response to a Third Party infringer's counterclaim of invalidity or unenforceability of any Arcturus Technology Patents shall be controlled by the Party who controls the relevant enforcement proceeding pursuant to Section 7.2(a) unless otherwise mutually agreed by the Parties.

(e) In the event that CureVac or its Affiliates grants a sublicense pursuant to Section 2.2, as between CureVac and any such Sublicensee,

(i) to the extent any such Arcturus Technology Patent or Joint Interest Patent does not specifically claim the Licensed Product, CureVac shall retain its rights to enforce and defend Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 7.2(a), 7.2(b), 7.2(c) and 7.2(d); provided, however, that CureVac's exercise of its rights to enforce or defend such Arcturus Technology Patent or Joint Interest Patent may be instructed by a Sublicensee;

(ii) to the extent any such Arcturus Technology Patent or Joint Interest Patent specifically claims the Licensed Product, CureVac shall have the right to sublicense its rights to enforce and defend Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 7.2(a), 7.2(b), 7.2(c) and 7.2(d) to the Sublicensee.

(f) *Withdrawal, Cooperation and Participation.* With respect to any infringement or defensive action identified above in this Section 7.2 which may be controlled by either CureVac or Arcturus:

---

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 7.2.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and Sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those Patent Costs incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

(g) *Settlement.* Neither Party will settle or consent to an adverse judgment in any action described in this Section 7.2 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any Arcturus Technology Patents involved therewith, without the prior written consent of the other Party (such consent not to be unreasonably withheld, delayed or conditioned).

(h) *Damages.* Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Arcturus and described in Section 7.2(a) or 7.2(c) in each case will be used first to reimburse the controlling Party, and thereafter the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be divided as follows:

(i) To the extent the action involves a Third Party's research, development, manufacture or commercialization of any product other than the Licensed Product (or a LMD product directed to the same Target as the Licensed Product), Arcturus shall retain all such recovery; and

---

(ii) To the extent the action involves a Third Party's research, development, manufacture or commercialization of the Licensed Product (or a LMD product directed to the same Target as the Licensed Product), CureVac will retain such recovery, less the amount of royalties payable to Arcturus by treating such recovery as "Net Sales" hereunder.

(i) Patent Marking. CureVac shall mark all Licensed Product if and to the extent required by the applicable patent marking laws, and shall require all of its Affiliates and sublicensees to do the same.

**8. Confidentiality.**

**8.1 Confidential Information.** Each Party ("Disclosing Party") may disclose to the other Party ("Receiving Party"), and Receiving Party may acquire during the course and conduct of activities under this License Agreement, certain proprietary or confidential information of Disclosing Party in connection with this License Agreement.

**8.2 Restrictions.** During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors, consultants and agents who have a need to know such Confidential Information in order to perform their obligations and exercise their rights under this License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Section 8.2. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

**8.3 Exceptions.** Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no action or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof (or if possession is obviously unlawful) and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information as documented by the internal records of the Receiving Party.

---

**8.4 Permitted Disclosures.** Notwithstanding the obligations set forth in Section 8.2, Receiving Party may disclose Disclosing Party's Confidential Information (including this License Agreement and the terms herein) to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

- (a) in order to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (b) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing Arcturus Technology Patents in connection with Receiving Party's rights and obligations pursuant to this License Agreement;
- (c) to attorneys, accountants, auditors, acquirers, licensees, partners or permitted assignees; financial advisors, investors and lenders, including potential acquirers, licensees, partners, assignees, financial advisors, investors and lenders; and
- (d) in the case of CureVac, to (i) subcontractors; or (ii) potential licensees or collaboration partners, but only such information that is reasonably necessary or useful for the subcontractor to perform the subcontracted work or for the potential licensee or partner to evaluate the applicable Licensed Product, and LMD or Licensed Product manufacturing processes;

provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party reasonable time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsections (c), each of those persons or entities are required to comply with the restrictions on use and disclosure in Section 8.2 (other than financial advisors, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

**8.5 Return of Confidential Information.** Upon expiry or earlier termination of this License Agreement, upon written request of a Party (such request, if made, to be made within three (3) months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this License Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under another License Agreement, if any, or as set forth in this License Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures. Upon request of the requesting Party, the Receiving Party shall confirm in writing to the requesting Party the destruction or return of all copies of the Confidential Information of the requesting Party.

**8.6 Publications.** Notwithstanding anything in this License Agreement to the contrary, CureVac is permitted to publish the results of its development under this License Agreement, *provided, however*, that it will not disclose Arcturus Confidential Information in any publication by CureVac of the results of any Licensed Product development by CureVac without Arcturus' prior written consent, which will not be unreasonably withheld, conditioned or delayed.

---

8.7 Terms of this License Agreement; Press Release. The Parties agree that the existence and terms of the Parties' relationship and this License Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 8.4. Except as mutually agreed or otherwise required by Law or securities exchange regulation, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this License Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

9. Warranties; Limitations of Liability; Indemnification.

9.1 Representations and Warranties. Each Party represents and warrants to the other as of the License Agreement Effective Date that:

- (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated,
- (b) it has the legal right and power to enter into this License Agreement, to extend the rights and licenses granted or to be granted to the other in this License Agreement, and to fully perform its obligations hereunder,
- (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this License Agreement and the performance of its obligations hereunder,
- (d) this License Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms and
- (e) except with respect to any Pre-Existing Prosecution, Enforcement and Defense Restrictions, the execution, delivery and performance by such Party of this License Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which such Party is a party or by which it is bound, including, in the case of Arcturus, each of the agreements which Arcturus has identified to CureVac prior to the License Agreement Effective Date, in each case as would reasonably be expected to have a material adverse effect on the rights of the other Party hereunder.

9.2 Additional Representations of Arcturus. Arcturus hereby represents and warrants to CureVac as of the License Agreement Effective Date as follows:

- (a) *Impairment.* Except with respect to any Pre-Existing Prosecution, Enforcement and Defense Restrictions, neither Arcturus nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that would in any way conflict with or impair the scope of any rights or licenses granted to CureVac with respect to the Licensed Product hereunder.
-

(b) *Patents.* **Appendix 1.4** sets forth a complete and accurate list of all Arcturus Technology Patents. Arcturus Controls the Arcturus Technology, and is entitled to grant the licenses specified herein. To Arcturus' knowledge, the Arcturus Technology Patents have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the Arcturus Technology Patents is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Arcturus' knowledge as of the License Agreement Effective Date, no Arcturus Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the License Agreement Effective Date, neither Arcturus nor any of its Affiliates has received any notice alleging that the Arcturus Technology Patents are invalid or unenforceable, or challenging Arcturus' ownership of or right to use any such rights.

(c) *Entire LMD Technology.* The Arcturus LMD Technology licensed to CureVac under this License Agreement comprises all LMD Technology Controlled by Arcturus which is necessary or useful to develop, manufacture and commercialize the Licensed Products for purposes of this License Agreement.

(d) *Encumbrances.* As of the License Agreement Effective Date, Arcturus has the right to grant the license herein to CureVac and neither Arcturus nor any of its Affiliates has granted any liens or security interests on the Arcturus Technology to any Third Party that is inconsistent with the license granted to CureVac under Section 2.1.

(e) *Litigation.* There is no action, suit, proceeding or investigation pending or, to the knowledge of Arcturus, currently threatened against or affecting Arcturus that questions the validity of this License Agreement or the right of Arcturus to enter into this License Agreement or consummate the transactions contemplated hereby or that relates to the Arcturus Technology.

(f) *Infringement.* Neither Arcturus nor any of its Affiliates has received any written notice of any claim, nor does Arcturus or its Affiliates have any knowledge of any claim, that any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Arcturus LMD Technology in connection with the production, use, research, development, manufacture or commercialization of any Licensed Product.

(g) *Third Party Infringement.* To Arcturus' knowledge, no Third Party is infringing or has infringed any Patent within the Arcturus LMD Technology or is misappropriating or has misappropriated any Know-how within the Arcturus LMD Technology, in each case relating to the Target.

**9.3** *Disclaimers.* Without limiting the respective rights and obligations of the Parties expressly set forth herein, each Party specifically disclaims any guarantee that any Licensed Product will be successful, in whole or in part. Except as otherwise expressly provided in this License Agreement, the Parties make no representations and extend no warranty of any kind under this License Agreement, neither express nor implied.

**9.4** *No Consequential Damages.* Notwithstanding anything in this License Agreement or otherwise, neither Party will be liable to the other or any Third Party with respect to any subject matter of this License Agreement for any indirect or consequential damages, provided that this Section 9.4 will not apply to breaches of Article 8 or the Parties' indemnification rights or obligations under Section 9.6, or in the event of willful misconduct.

---

9.5 Performance by Others. The Parties recognize that each Party may perform some or all of its obligations under this License Agreement through Affiliates, subcontractors or - in the event of CureVac - Sublicensees, provided, however, that each Party will remain fully responsible and liable for the performance by its Affiliates, subcontractors and Sublicensees, and will cause its Affiliates, subcontractors and Sublicensees to comply with the provisions of this License Agreement in connection therewith.

9.6 Indemnification.

(a) Indemnification by CureVac. CureVac will indemnify Arcturus, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "Arcturus Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the Arcturus Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any representation or warranty of this License Agreement; (ii) any gross negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) the development, manufacture or commercialization by or on behalf of CureVac or any of its Affiliates or Sublicensees of Licensed Product other than if related to an LMD component thereof specifically provided by Arcturus, except in each case (i)-(iii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of an Arcturus Indemnitee or Arcturus' breach of this License Agreement.

(b) Indemnification by Arcturus. Arcturus will indemnify CureVac, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against CureVac Indemnitees to the extent arising from or occurring as a result of: (i) the breach by Arcturus of any representation or warranty of this License Agreement; or (ii) any gross negligence or willful misconduct on the part of any Arcturus Indemnitee, except in each case (i) and (ii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this License Agreement.

(c) Notice of Claim. All indemnification claims provided for in Sections 9.6(a) and 9.6(b) will be made solely by such Party to this License Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under Section 9.6(a) and 9.6(b), but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and estimated amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

---

(d) *Defense, Settlement, Cooperation and Expenses.*

(i) *Control of Defense.* At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified Party within thirty (30) days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will as soon as possible deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) *Right to Participate in Defense.* Without limiting Section 9.6(d)(i), any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to engage counsel of its choice for such purpose; provided, however, that such engagement will be at the Indemnified Party's own cost and expense unless (i) the indemnifying Party has failed to promptly assume the defense and engage counsel in accordance with Section 9.6(d)(i) (in which case the Indemnified Party will control the defense) or (ii) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any such costs and expenses of counsel for the Indemnified Party.

---

(iii) *Settlement.* With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with Section 9.6(d)(i), the indemnifying Party will have authority to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (such consent not to be unreasonably withheld, delayed or conditioned). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the prior written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party, such consent not to be unreasonably withheld, delayed or conditioned.

(iv) *Cooperation.* Regardless of whether the indemnifying Party choose so defend or prosecute any Third Party Claim, the Indemnified Party will, and will use Diligent Efforts to cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith, at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.

(v) *Costs and Expenses.* Except as provided above in this Section 9.6(d), the costs and expenses, including attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

---

9.7 **Insurance.** Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program (including product liability insurance) to protect against potential liabilities and risk arising out of activities to be performed under this License Agreement, and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this License Agreement. Subject to the preceding sentence, such liability insurance or self-insurance program will insure against all types of liability, including personal injury, physical injury or property damage arising out of the manufacture, sale, use, distribution or marketing of Licensed Product. The coverage limits set forth herein will not create any limitation on a Party's liability to the other under this License Agreement.

**10. Term and Termination.**

**10.1 Term.**

(a) This License Agreement will commence as of the License Agreement Effective Date and, unless sooner terminated in accordance with the terms hereof or by mutual written consent, will continue on a Licensed Product-by- Licensed Product and a country-by-country basis, until there are no more payments owed to Arcturus in such country (the longest such period of time hereunder, the "Term"). Upon there being no more such payments hereunder in such country, the license contained in Section 2.1 will become irrevocable, perpetual and fully paid up and will remain in effect with respect to such Licensed Product in such country.

(b) If the Target to which this License Agreement relates is chosen by the Parties for co-development under the Co-Development Agreement, this License Agreement will automatically terminate upon the written agreement of the Parties to include such programs under the Co-Development Agreement, in accordance with Section 4.2(a) of the Co-Development Agreement.

(c) The Parties agree that this Agreement and the Co-Development Agreement relate to different projects and, therefore, the validity, term and termination of this Agreement shall be independent from the validity, term and termination of the Co-Development Agreement.

**10.2 Termination by Arcturus.**

(a) *Breach.* Arcturus will have the right to terminate this License Agreement in full upon delivery of written notice to CureVac in the event of any material breach by CureVac of any terms and conditions of this License Agreement, provided that such breach has not been cured [\*\*\*\*\*] after written notice thereof is given by Arcturus to CureVac specifying the nature of the alleged breach.

(b) *Disputed Breach.* If CureVac disputes in good faith the existence or materiality of a breach specified in a notice provided in accordance with Section 10.2(a), and CureVac provides Arcturus notice of such dispute within such [\*\*\*\*\*] period, then Arcturus shall not have the right to terminate this License Agreement under Section 10.2(a) unless and until it is finally determined, in accordance with Section 11.1, that CureVac has materially breached this License Agreement and that CureVac fails to cure such breach within [\*\*\*\*\*] following such decision. It is understood and agreed that during the pendency of such dispute, all of the terms and conditions of this License Agreement shall remain in effect and the Parties shall continue to perform all of their respective obligations hereunder. During the pendency of any such dispute, CureVac shall pay to Arcturus all Milestone Payments and royalty payments set forth herein.

(c) *Patent Challenge.* Except to the extent the following is unenforceable under the Laws of a particular jurisdiction, Arcturus may terminate this License Agreement on a Patent-by-Patent basis upon delivery of [\*\*\*\*\*] prior written notice to CureVac

(i) if CureVac or its Affiliates, individually or in association with any other person or entity, commences a legal action challenging the validity, enforceability or scope of any Arcturus Technology Patents anywhere in the world and does not withdraw or settle such challenge within the [\*\*\*\*\*] cure period; or

(ii) if a sublicensee of CureVac, individually or in association with any other person or entity, commences a legal action challenging the validity, enforceability or scope of any Arcturus Technology Patents anywhere in the world and CureVac does not terminate the corresponding sublicense agreement or such challenge is not withdrawn or settled (by such sublicensee or CureVac) within the [\*\*\*\*\*] cure period.

**10.3 Termination by CureVac; Certain Remedy for Breach.**

(a) *Breach.* CureVac will have the right to terminate this License Agreement in full upon delivery of written notice to Arcturus in the event of any material breach by Arcturus of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by CureVac to Arcturus specifying the nature of the alleged breach.

(b) *Discretionary Termination.* CureVac will have the right to terminate this License Agreement in full at its discretion for any reason by delivering written notice to Arcturus, such termination to be effective [\*\*\*\*\*] following the date of such notice.

(c) *Maintenance of License.* In the event of a material breach by Arcturus of Sections 2.2(c) or 3.2, if such breach has not been cured within [\*\*\*\*\*] after written notice thereof, CureVac may notify Arcturus in writing that the License Agreement shall remain in full force and effect, provided that any remaining payments to Arcturus pursuant to Sections 4.1, 4.2 and 4.3 following such notification shall be reduced by [\*\*\*\*\*].

**10.4 Rights Upon Bankruptcy.** All rights and licenses granted under or pursuant to this License Agreement by Arcturus or its Affiliates are, and will otherwise be deemed to be, for purposes of Section 365(n) of the U.S. Bankruptcy Code, licenses of right to “intellectual property” as defined under Section 101 of the U.S. Bankruptcy Code. The Parties agree that CureVac and its Affiliates and Sublicensees, as licensees of such rights under this License Agreement, will retain and may fully exercise all of their rights and elections under the U.S. Bankruptcy Code and any foreign counterparts thereto. Without limiting the Parties’ rights under Section 365(n) of the U.S. Bankruptcy Code, if a case under U.S. Bankruptcy Code is commenced by or against a Party, the other Party shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of such other Party, shall be promptly delivered to it (i) before this License Agreement is rejected by or on behalf of the bankrupt Party, within thirty (30) days after the other Party’s written request, unless the bankrupt Party, or its trustee or receiver, elects within thirty (30) days to continue to perform all of its obligations under this License Agreement, or (ii) after any rejection of this License Agreement by or on behalf of the bankrupt Party, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 10.4 and under Section 365(n) of the U.S. Bankruptcy Code are in addition to and not in substitution of any and all other rights, powers, and remedies that each Party may have under this License Agreement, under the U.S. Bankruptcy Code, and any other applicable Laws. The non-bankrupt Party shall have the right to perform the obligations of the bankrupt Party hereunder with respect to such intellectual property, but neither such provision nor such performance by the non-bankrupt Party shall release the bankrupt Party from any such obligation or liability for failing to perform it.

**10.5 Effects of Termination.**

(a) Upon termination (but not expiration pursuant to Section 10.1) of this License Agreement for any reason:

(i) *Cessation of Rights.* Except as expressly provided herein, including Sections 8.5, 10.5(a) and as necessary for CureVac to sell off existing inventory as permitted under Section 10.5(iii) below, all rights and licenses granted by Arcturus to CureVac under this License Agreement will terminate. CureVac shall wind down the development (including any clinical trials), manufacture and commercialization of the Licensed Product in compliance with all applicable Laws and at its own cost and expense.

(ii) *Sell Off.* Notwithstanding the termination of CureVac’s licenses and other rights under this License Agreement, CureVac shall retain the right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products, in each case that is intended for distribution, sale or disposition in the Territory, for a period of not more than six (6) months following the date of the effective termination, as though this License Agreement had not been terminated, and such distribution, sale or other disposition shall not constitute infringement of the Patents or other intellectual property or proprietary rights of Arcturus or its Affiliates. CureVac’s right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products pursuant to this Section 10.5(a)(ii) shall be subject to CureVac’s continuing obligation to pay royalties with respect to the Net Sales.

(b) Upon termination pursuant to Section 10.1(b), Arcturus shall refund to CureVac the Option Exercise Fee (as defined in the Development and Option Agreement), the Milestone Payments already paid by CureVac and all other payments made by CureVac in relation to this License Agreement.

---

**10.6 Survival.** In addition to the termination consequences set forth in Section 10.5, the following provisions will survive termination or expiration of this License Agreement: Sections 1, 4 (to the extent of any outstanding payments accrued as of the effective date of termination), 5, 8, 9.4, 9.6, 10.5, 10.6 and 11. Termination or expiration of this License Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at law or in equity with respect to any breach of this License Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this License Agreement.

**11. General Provisions.**

**11.1 Dispute Resolution.**

(a) *Disputes.* Disputes arising under or in connection with this License Agreement will be resolved pursuant to this Section 11.1; *provided, however,* that in the event a dispute cannot be resolved without an adjudication of the rights or obligations of a Third Party (other than any CureVac Indemnitees or Arcturus Indemnitees identified in Section 9.6), the dispute procedures set forth Sections 11.1(c) and 11.1(c) will be inapplicable as to such dispute.

(b) *Dispute Escalation.* In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves. In the event that such dispute is not resolved on an informal basis within thirty (30) days, either Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive with the appropriate authority to determine the matter for such party), who will attempt in good faith to resolve such dispute by negotiation and consultation for a thirty (30) day period following receipt of such written notice

(c) *Dispute Resolution.* In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be New York City, New York, U.S.. The number of mediators will be one (1). The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within sixty (60) days following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration. Any dispute relating to the validity performance, construction or interpretation of this License Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 11.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be New York City, New York, U.S.. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

---

**11.2 Relationship of Parties.** Nothing in this License Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied third party beneficiaries hereunder (except for CureVac Indemnitees and Arcturus Indemnitees for purposes of Section 9.6). For clarity, CureVac does not grant to Arcturus any rights or licenses under this License Agreement to any CureVac technology or intellectual property rights.

**11.3 Compliance with Law.** Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

**11.4 Governing Law.** This License Agreement will be governed by and construed in accordance with the Laws of the State of New York, U.S., without respect to its conflict of Laws rules.

**11.5 Counterparts; Facsimiles.** This License Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this License Agreement by either Party will constitute a legal, valid and binding execution and delivery of this License Agreement by such Party.

**11.6 Headings.** All headings in this License Agreement are for convenience only and will not affect the meaning of any provision hereof.

**11.7 Waiver of Rule of Construction.** Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this License Agreement. Accordingly, the rule of construction that any ambiguity in this License Agreement will be construed against the drafting party will not apply.

**11.8 Interpretation.** Whenever any provision of this License Agreement uses the term "including" (or "includes"), such term will be deemed to mean "including without limitation" (or "includes without limitations"). "Herein," "hereby," "hereunder," "hereof" and other equivalent words refer to this License Agreement as an entirety and not solely to the particular portion of this License Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Appendices in this License Agreement are to Sections and Appendices of this License Agreement. References to any Sections include Sections and subsections that are part of the related Section.

**11.9 Binding Effect.** This License Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

**11.10 Assignment.** This License Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this License Agreement, except as expressly permitted hereunder or otherwise without the prior written consent of the other Party, which consent will not be unreasonably withheld, delayed or conditioned; provided that either Party may assign this License Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this License Agreement (whether by merger, consolidation or otherwise).

**11.11 Notices.** All notices, requests, demands and other communications required or permitted to be given pursuant to this License Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid or facsimile (and promptly confirmed by personal delivery, registered or certified mail or overnight courier) to the following addresses (or to such address as a Party may subsequently provide by written notice in accordance with this Section 11.11):

**11.12 Amendment and Waiver.** This License Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

**11.13 Severability.** In the event that any provision of this License Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the License Agreement to preserve (to the extent possible) their original intent.

**11.14** Entire Agreement. This License Agreement together with the Development and Option Agreement and any other license agreements entered into during the Term pursuant to the Development and Option Agreement are the sole agreement with respect to the subject matter hereof and supersedes all other agreements and understandings between the Parties with respect to same.

**11.15** Force Majeure. Neither Arcturus nor CureVac will be liable for failure of or delay in performing obligations set forth in this License Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Arcturus or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

## License Agreement

This License Agreement ("License Agreement"), effective as of delivery of an Acceptance Notice in accordance with Section 5.1(b) of the Development and Option Agreement (as defined below) (the "License Agreement Effective Date"), is made by and between Arcturus Therapeutics Inc., a Delaware corporation ("Arcturus"), and CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tuebingen, Germany ("CureVac"). Each of Arcturus and CureVac may be referred to herein as a "Party," or together as the "Parties."

**WHEREAS**, Arcturus has expertise and intellectual property relating to the development of LMD Technologies (as defined below) that embody or incorporate delivery systems (and components thereof) for molecular therapeutics based on or incorporating lipid-enabled and unlocked nucleomonomer platform for delivery of nucleic acids as specified in **Appendix 1.3**, the Arcturus LMD Technology; and

**WHEREAS**, CureVac has expertise and intellectual property relating to mRNA Constructs (as defined below); and

**WHEREAS**, Arcturus and CureVac are parties to that certain Development and Option Agreement (dated January 1, 2018, and amended as of May 3, 2018) (the "Development and Option Agreement") pursuant to which CureVac has options to take licenses under the Arcturus LMD Technology (as defined below) with respect to CureVac's mRNA Constructs; and

**WHEREAS**, pursuant to the terms of the Development and Option Agreement, CureVac has exercised an option to obtain a license pursuant to this Agreement with respect to the Target (as defined below) and the Parties are now entering into a licensing arrangement whereby CureVac will have a license under the Arcturus LMD Technology to develop and commercialize Licensed Products (as defined below) with respect to such Target.

**WHEREAS**, the Parties intend to also co-develop an ornithine transcarbamylase ("OTC") deficiency product and possibly other products under a separate co-development and co-commercialization agreement ("Co-Development Agreement").

**NOW, THEREFORE**, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

### 1. **Definitions.**

The following terms and their correlatives will have the following meanings:

**1.1** "Affiliate" of a person or entity means any other entity which (directly or indirectly) is controlled by, controls or is under common control with such person or entity. For the purposes of this definition, the term "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") as used with respect to an entity will mean (i) in the case of a corporate entity, direct or indirect ownership of voting securities entitled to cast at least fifty percent (50%) of the votes in the election of directors or (ii) in the case of a non-corporate entity, direct or indirect ownership of at least fifty percent (50%) of the equity interests with the power to direct the management and policies of such entity provided that if local Law restricts foreign ownership, control will be established by direct or indirect ownership of the maximum ownership percentage that may, under such local Law, be owned by foreign interests. [\*\*\*\*\*].

1.2 “Arcturus Indemnitees” has the meaning set forth in Section 9.6(a).

1.3 “Arcturus LMD Technology” means any and all LMD Technology for delivering RNA therapeutics that is Controlled by Arcturus or any of its Affiliates as of the Effective Date or during the Term, including the LUNAR™ platform, a description of which technology, as in existence as of the License Agreement Effective Date, is set forth on **Appendix 1.3**.

1.4 “Arcturus Technology” means any Patents and Know-How that are Controlled by Arcturus or any of its Affiliates as of the License Agreement Effective Date or during the Term and that are necessary or useful for the research, development, manufacturing and commercialization of Licensed Products. The Patents and Know-How comprised in the Arcturus Technology as of the License Agreement Effective Date are listed in **Appendix 1.4**. Arcturus Technology shall include the Arcturus LMD Technology. Notwithstanding the foregoing, Arcturus Technology shall exclude

(a) any Patents and Know-How acquired by Arcturus after License Agreement Effective Date if Arcturus is required to make any payment to a Third Party in connection with the grant, maintenance or exercise of a sublicense to CureVac, unless CureVac agrees in writing to reimburse Arcturus for all such payments; *provided, however*, that such payments shall reduce CureVac’s royalty obligations in accordance with Section 4.3(b),

(b) any Patents and Know-How of a Third Party (including its Affiliates) that becomes Arcturus’ Affiliate after the License Agreement Effective Date as a result of a Change of Control, but only if and to the extent that it is not LMD Technology, and

(c) any Patents that CureVac elects to exclude pursuant to Section 2.3.

1.5 “Arcturus Technology Patent(s)” means any and all Patents comprised in the Arcturus Technology during the Term, unless otherwise set forth herein. For clarity, Arcturus Technology Patents include Arcturus’ interest in the Joint Interest Patents.

1.6 “Business Day” means a day other than a Saturday, Sunday, or bank or other public holiday in San Diego, California, USA or Tübingen, Germany or Boston, Massachusetts, USA.

1.7 “cGMP” means current Good Manufacturing Practices as specified in the U.S. C.F.R., ICH Guideline Q7A, or equivalent Laws of an applicable Regulatory Authority at the time of manufacture.

1.8 “Calendar Quarter” means the respective periods of three (3) consecutive calendar months ending on March 31, June 30, September 30 and December 31.

1.9 “**Change of Control**” with respect to Arcturus, shall be deemed to have occurred if during the Term (i) any person or entity is or becomes the “beneficial owner”, directly or indirectly, of shares of capital stock or other interests (including partnership interests) of Arcturus then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of the directors, managers or similar supervisory positions of Arcturus representing fifty percent (50%) or more of the total voting power of all outstanding classes of voting stock of Arcturus or has the power, directly or indirectly, to elect a majority of the members of Arcturus’ board of directors, or similar governing body; or (ii) Arcturus enters into a merger, consolidation or similar transaction with another person or entity; or (iii) Arcturus sells or transfers to any Third Party, in one (1) or more related transactions, properties or assets representing all or substantially all of Arcturus’ consolidated total assets to which this License Agreement relates, *provided however*, that:

(a) subsections (i) to (iii) shall only apply if the person or entity or Third Party acquiring control is (i) a pharmaceutical company which has experience in developing and commercializing pharmaceutical products (i.e., is a strategic, not financial investor or partner) or (ii) a competitor, i.e., a company whose business consists principally of mRNA development, manufacturing and/or commercialization, and

(b) a bona fide financing transaction with Third Parties that does not otherwise meet the requirements of subsection (a) shall not constitute a Change of Control.

1.10 “**Combination Product**” means a Licensed Product that includes at least one additional active pharmaceutical ingredient other than LMDs, mRNA Constructs, and other RNAs (i.e., Guide RNA(s)) or DNA Sequence(s). Drug delivery vehicles, adjuvants, and excipients shall not be deemed to be “active ingredients”, except in the case where such delivery vehicle, adjuvant, or excipient is recognized as an active ingredient in accordance with 21 C.F.R. 210.3(b)(7) or equivalent Laws in other jurisdictions, *provided however*, should LMDs comprised in a Licensed Product be characterized as “active ingredients” at any time during the Term, such LMDs will not be considered an “active ingredient” for the purposes of this definition.

1.11 “**Confidential Information**” of a Party means all proprietary Know-How, unpublished patent applications and other non-public information and data of a financial, commercial, business, operational, scientific or technical nature of such Party that is disclosed by or on behalf of such Party or any of its Affiliates or otherwise made available to the other Party or any of its Affiliates, whether made available orally, in writing or in electronic form in connection with this License Agreement, including information comprising or relating to concepts, discoveries, inventions, data, designs or formulae in connection with this License Agreement. In addition, any non-public information related to this License Agreement or the Licensed Products hereunder and disclosed by a Party to the other Party (or their respective Affiliates) under the Development and Option Agreement will be deemed such Party’s Confidential Information hereunder. Technology will be considered the Confidential Information of the Party (or Parties) owning such Technology, and jointly-owned Technology will be considered Confidential Information of both Parties.

1.12 “**Control**” or “**Controlled**” means with respect to Technology, a Party owns or has a license to use and practice the respective Patent or Know-How without violating the terms of any agreement with any Third Party.

1.13 “**CTA**” means a clinical trial application.

- 1.14 “CureVac Indemnitees” has the meaning set forth in Section 9.6(b).
- 1.15 “Development and Option Agreement” has the meaning set forth in the Preamble.
- 1.16 “Diligent Efforts” means, with respect to the efforts to be expended by each Party with respect to the activities of a Party pursuant to this Agreement, active and sustained efforts to conduct the applicable activity, or to attempt to achieve the applicable requirement or goal, in a prompt and expeditious manner, as is reasonably practicable under the circumstances (including the level of FTE funding and budget for out-of-pocket and Third Party contractors set forth therein) and the terms of this Agreement.
- 1.17 “Disclosing Party” has the meaning set forth in Section 8.1
- 1.18 “Field of Use” means the treatment and diagnosis of all diseases and conditions.
- 1.19 “First Commercial Sale” means the first sale for use or consumption of any Licensed Product in a country after all required Regulatory Approvals for commercial sale of such Licensed Product have been obtained in such country.
- 1.20 “FTE” means a full-time person, or more than one person working the equivalent of a full-time person, where “full-time” is determined by the standard practices in the biopharmaceutical industry in the geographic area in which such personnel are working, consisting of a total of 1880 hours per year of work on the applicable activities. Any person who devotes less than 1880 hours per year on the applicable activities shall be treated as an FTE on a pro-rated basis, based upon the actual number of hours worked by such person on such activities, divided by 1880. Any person who devotes more than 1880 hours per year on the applicable activities shall be treated as one (1) FTE, i.e., in no event shall one person be counted as more than one FTE. FTE activities shall include the performance of the applicable activities and scientific management oversight, as reasonably required, but, for clarity, exclude (i) the work of general corporate or administrative personnel, overhead (including facilities costs), insurances and similar costs.
- 1.21 “FTE Costs” means an initial rate of [\*\*\*\*\*] Dollars (\$[\*\*\*\*\*]) per FTE per year, which shall apply through December 31, 2019. Thereafter, the FTE Rate shall be changed bi-annually at the end of each second calendar year to reflect any percentage increase or decrease (as the case may be) in the Consumer Price Index in the U.S. (index for all items) (“CPI”) (based on the change in the CPI from the most recent index available as of the Effective Date to the most recent index available as of the date of the calculation of such revised FTE Cost rate).
- 1.22 “IND” means an investigational new drug application, or equivalent application or submission for approval to conduct human clinical trials.
- 1.23 “Indemnification Claim Notice” has the meaning set forth in Section 9.6(c).
- 1.24 “Indemnified Party” has the meaning set forth in Section 9.6(c).
- 1.25 “Indication” means an individual disease or clinical condition with respect to which at least one adequate and well controlled study is required to support inclusion of such disease or condition in the indication statement of an FDA approved package insert for a Licensed Product.

- 1.26 “Initiation” means in connection with a clinical trial in any of its phases 1 through 3 the first dosing of the fifth patient or fifth healthy subject.
- 1.27 “Inventions” has the meaning set forth in Section 5.1.
- 1.28 “Joint Interest Patents” means the Patents generated under the Development and Option Agreement and jointly owned by the Parties. Such Joint Interest Patents are listed in **Appendix 1.28** hereto, as amended from time to time.
- 1.29 “Know-How” means all commercial, technical, scientific and other know-how and information, trade secrets, knowledge, technology, methods, processes, practices, formulae, instructions, skills, techniques, procedures, experiences, ideas, technical assistance, designs, drawings, assembly procedures, computer programs, specifications, data and results (including biological, chemical, pharmacological, toxicological, pharmaceutical, physical and analytical, preclinical, clinical, safety, manufacturing and quality control data and know-how, including study designs and protocols), in all cases, provided it is confidential and proprietary, and regardless of whether patentable, in written, electronic or any other form now known or hereafter developed.
- 1.30 “Late Stage Development” means Development after the Initiation of a Phase 3 Study.
- 1.31 “Law” or “Laws” means all laws, statutes, rules, regulations, orders, judgments, or ordinances having the effect of law of any federal, national, multinational, state, provincial, county, city or other political subdivision.
- 1.32 “License Agreement” has the meaning set forth in the Preamble.
- 1.33 “License Agreement Effective Date” has the meaning set forth in the Preamble.
- 1.34 “Licensed Product” means [\*\*\*\*\*] product comprised of (i) LMD systems, which are covered by Arcturus LMD Technology; and containing (ii) one or more mRNA Constructs as the active pharmaceutical ingredient(s) intended to express the Target. In case of two or more mRNA Constructs these constructs may be contained in the same or separate LMDs. Licensed Product includes mRNA-LMD products which are administered jointly or separately, and mRNA-LMD products which are administered simultaneously or sequentially as a combination medicinal product or treatment. For Gene Editing purposes a Licensed Product may contain other RNA(s) (i.e., Guide RNA(s)) and/or DNA Sequence(s) which can be delivered together or separately (combined in one LMD or delivered in separate LMDs), in addition to the one or more mRNA Constructs intended to express the DNA Editing Protein.
- 1.35 “LMD Technology” means Technology Controlled by Arcturus that claims, embodies or incorporates delivery systems (and components thereof) based on or incorporating lipid-mediated delivery (LMD) systems.
- 1.36 “Losses” has the meaning set forth in Section 9.6(a).

1.37 "Materials" means any tangible chemical or biological material, including any compounds, LMD, DNA, RNA (including mRNA), clones, cells, and any expression product, progeny, derivative or other improvement thereto, along with any tangible chemical or biological material embodying any Know-How, Controlled by Arcturus.

1.38 "mRNA Construct" means any mRNA construct for the expression of a protein, including the sequence of such construct (which potentially comprises one (1) or more of a cap, 5' UTR, the associated open reading frame, 3'UTR and a poly A tail), the chemistry of natural and non-natural nucleic acids, and other chemical modifications associated with such construct, such mRNA Construct being covered by mRNA Technology.

1.39 "mRNA Technology," means Technology Controlled by CureVac that claims, embodies or incorporates expression systems (and components thereof), based on or incorporating mRNA.

1.40 "Milestones" means the milestones payable pursuant to Section 4.1.

1.41 "Milestone Event" has the meaning set forth in Section 4.1.

1.42 "Milestone Payment" has the meaning set forth in Section 4.1.

1.43 "Net Sales" means, with respect to any Licensed Product, the gross amount received by CureVac and its Affiliates and Sublicensees for *bona fide* sales of such Licensed Product to a Third Party (other than Affiliates and Sublicensees but including distributors for resale), less deductions, in each case to the extent reasonable, customary, actually allowed and taken in connection with the sale of such Licensed Product and not otherwise recovered or reimbursed:

(a) discounts (including cash, quantity and patient program discounts), retroactive price reductions, commissions, charge-back payments and rebates granted to managed health care organizations or to federal, state and local governments, their agencies, and purchasers and reimbursers or to trade customers;

(b) credits or allowances actually granted upon claims, damaged goods, rejections or returns of, such Licensed Product and not in excess of the selling price of such Product, including such Licensed Product returned in connection with recalls or withdrawals;

(c) freight out, postage, shipping and insurance charges for delivery of such Licensed Product;

(d) taxes or duties levied on, absorbed or otherwise imposed on the sale of such Licensed Product, including value-added taxes, or other governmental charges otherwise imposed upon the billed amount, as adjusted for rebates and refunds; and

(e) wholesaler and distributor administration fees

(f) other customary deductions taken in the ordinary course of business in accordance with IFRS (International Financial Reporting Standards) principles.

If a single item falls into more than one of the above categories above, such items will not be deducted more than once.

Net Sales shall not include any payments among CureVac, its Affiliates and Sublicensees. Net Sales shall be determined in accordance with generally accepted accounting principles, consistently applied across all products. Net Sales for any Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/(A+B)$ , where A is the weighted average price paid for the Licensed Product contained in such Combination Product sold separately in finished form in such country, and B is the weighted average invoice price paid for the other active ingredients contained in such Combination Product sold separately in finished form in such country, if such Licensed Product and such other active ingredients are each sold separately in such country.

If such other active ingredients are not sold separately in such country, then Net Sales for such Combination Product shall be calculated on a country-by-country basis by multiplying actual Net Sales of such Combination Product by the fraction  $A/C$ , where C is the weighted average invoice price paid for such Combination Product in such country. If such Licensed Product is not sold separately in finished form in such country, Net Sales for such Licensed Product will be determined by CureVac's good faith estimate of the relative contribution of such Licensed Product and each such other active ingredients in such Combination Product, and shall take into account in good faith any applicable allocations and calculations that may have been made for the same period in other countries.

**1.44** "Non-Rare Disease Target" means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of equal to or more than [\*\*\*\*\*] in [\*\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Non-Rare Disease Target.

**1.45** "Patent(s)" means (a) an issued patent, a patent application, and a future patent issued from any such patent application, (b) a future patent issued from a patent application filed in any country worldwide which claims priority from a patent or patent application of (a), and (c) any additions, divisions, continuations, continuations-in-part, invention certificates, substitutions, reissues, reexaminations, extensions, registrations, utility models, supplementary protection certificates and renewals based on any patent or patent application under (a) or (b), but not including any rights that give rise to regulatory exclusivity periods (other than supplementary protection certificates, which will be treated as "Patents" hereunder)

**1.46** "Patent Costs" means the reasonable, documented, out-of-pocket costs and expenses paid to outside legal counsel, and filing and maintenance expenses, actually and reasonably incurred by a Party in prosecuting and maintaining Patents with respect to Licensed Products and enforcing and defending them.

**1.47** "Phase 1 Study," means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(a) or corresponding foreign regulations.

**1.48** "Phase 2 Study" means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(b) or corresponding foreign regulations.

1.49 “Phase 3 Study” means a human clinical trial of a Licensed Product in any country that would satisfy the requirements of 21 CFR 312.21(c) or corresponding foreign regulations.

1.50 “Pre-Existing Restrictions” means, with respect to the Target, those certain prosecution, enforcement and defense rights granted by Arcturus or its Affiliates to a Third Party(ies) with respect to the Patents pursuant to the bona fide written agreement(s) set forth on Exhibit 1.50 hereto as such bona fide written agreement(s) were in effect as of the Effective Date of the Development and Option Agreement. For clarity, the exercise of such foregoing rights by a Third Party with respect to Patents that are not specific to the Target or Licensed Products shall be deemed a Pre-Existing Restriction.

1.51 “Rare Disease Target” means a Target that addresses at a first place an indication related to a Licensed Product with an incidence of less than [\*\*\*\*] in [\*\*\*\*] people in the U.S. or EU. The indication for which the first IND or CTA application will be filed will determine whether a Target is a Rare Disease Target.

1.52 “Receiving Party” has the meaning set forth in Section 8.1.

1.53 “Regulatory Approval” means, with respect to a country or extra-national territory, any and all approvals (including BLAs and MAAs), licenses, registrations or authorizations of any Regulatory Authority necessary in order to commercially distribute, sell or market a product in such country or some or all of such extra-national territory, including solely to the extent required as a condition to commercial sale to end users, any pricing or reimbursement approvals.

1.54 “Regulatory Authority” means any national (e.g., the FDA), supra-national (e.g., the EMA), regional, state or local regulatory agency, department, bureau, commission, council or other governmental authority, in any jurisdiction in the world, involved in the granting of Regulatory Approval.

1.55 “Royalty Reduction” has the meaning set forth in Section 4.3(b).

1.56 “Royalty Term” has the meaning set forth in Section 4.3(d).

1.57 “Sublicensee” means any Third Party that is granted a sublicense as permitted by Section 2.2, either directly by CureVac or its Affiliates or indirectly by any other Sublicensee hereunder.

1.58 “Sublicense Income” means the fees and other payments, including upfront payments as well as development, regulatory milestone payments received by CureVac or its Affiliates from a Sublicensee, excluding: (a) royalty payments and net sales milestones; (b) reimbursement of costs and expenses, including for patent prosecution and enforcement and (c) equity or premium on equity and (d) loans or loans forgiven either (i) as a result of financial distress of the borrower or (ii) that are not specific to the Licensed Product.

1.59 “Target” means the Target identified in Appendix 1.59 hereto. The Target includes

(a) up to N (N= [\*\*\*\*]) proteins, including all possible combinations resulting from removing one of the N proteins (N minus [\*\*\*\*] proteins), together with all variants of such proteins, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof; *provided, however*, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring protein; and

(b) [\*\*\*\*] antigens of a given pathogen, including [\*\*\*\*] antigen and any combination of such antigens, together with all variants of such antigens, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), and species homologs, orthologs thereof, *provided, however*, that any such naturally occurring variant, engineered variant, or species homolog or ortholog possesses substantially similar biological activity to the naturally occurring antigen; and

(c) a DNA Target, *provided, however*, that the first DNA Target for each DNA Editing Protein would not count as a Target. Each subsequent DNA Target for this DNA Editing Protein would count as a Target. For clarity, a DNA Editing Protein would be defined as a Target under (a) above and count as a single Target.

If a given protein, e.g., an antibody or enzyme, comprises separated amino acid chains which might be delivered by separated mRNA Constructs, such proteins would be defined as one Target.

1.60 "Technology," means collectively Patents and Know-How.

1.61 "Term" has the meaning set forth in Section 10.1.

1.62 "Territory," means worldwide.

1.63 "Third Party," means any person or entity other than CureVac, Arcturus and their respective Affiliates.

1.64 "Third Party Claims" has the meaning set forth in Section 9.6(a).

1.65 "Valid Claim" means a claim of

(a) an issued and unexpired patent (as may be extended through supplementary protection certificate or patent term extension) or

(b) a pending patent application, *provided, however*, that once the priority date or earliest filing date to which the pending patent application refers is more than seven years old, such claim shall not constitute a Valid Claim for purposes of this License Agreement anymore, unless and until a patent issues with such claim included in the Arcturus Technology Patents, which claim has not been revoked, held invalid or unenforceable by a patent office, court or other governmental agency of competent jurisdiction in a final and non-appealable decision (or decision from which no appeal was taken within the allowable time period) and has not been disclaimed, denied, abandoned or admitted to be invalid or unenforceable through reissue, re-examination or disclaimer or otherwise.

2. **License Grants; Technology Transfer.**

2.1 **Licenses by Arcturus.** Subject to the terms and conditions of this License Agreement, Arcturus hereby grants to CureVac an exclusive license, with the right to sublicense in multiple tiers under the Arcturus Technology Patents and the Arcturus Know-How, in each case solely to develop, have developed, make, have made, use and have used, sell, offer for sale, have sold and import and have imported Licensed Products in the Field of Use in the Territory.

2.2 **Sublicensing Rights.**

(a) **CureVac Sublicenses.** The licenses granted in Section 2.1 may be sublicensed (with the right to sublicense through multiple tiers), in full or in part, by CureVac, its Affiliates or Sublicensees to CureVac's Affiliates and Third Parties provided, that for any sublicense:

(i) Each sublicense will be in writing (*provided, however*, that not each sublicense to Affiliates must be in writing) and on terms consistent with and subject to the terms of this License Agreement, including but not limited to the limitations on patent prosecution, enforcement and defense rights of such Sublicensee as set forth in Sections 6.1(d) and 7.2(e);

(ii) CureVac will be responsible for any and all obligations of such Sublicensee (including Affiliates and Sublicensees) as if such Sublicensee were CureVac hereunder;

(iii) CureVac provide to Arcturus a copy of such sublicense agreement within thirty (30) days of execution (which copy may be redacted for terms that are not otherwise required to confirm conformance with the terms of this License Agreement); and

(iv) Any sublicense granted by CureVac (and any further sublicenses) to any rights licensed to it hereunder shall terminate immediately upon the termination of this License Agreement, provided that for sublicense to a Third Party, such sublicensed rights shall not terminate if, as of the effective date of such termination pursuant to Sections 10.2, 10.3(a) or 10.4, such Sublicensee is not in material default of its obligations under its sublicense agreement, and within [\*\*\*\*\*] days of such termination and the disclosure of this License Agreement to the Sublicensee, the Sublicensee agrees in writing to be bound directly to Arcturus under a license agreement substantially similar to this License Agreement with respect to the rights sublicensed hereunder, substituting such Sublicensee for CureVac.

(b) **Subcontractors.** For clarity purposes, CureVac is entitled to engage contract research organizations and contract manufacturing organizations for the development and manufacture of Licensed Products on behalf of CureVac. To the extent such contract organizations require a license to perform such subcontracted activities under applicable Laws, CureVac is entitled to grant a limited license solely to perform the work for which the subcontractor is engaged, without an obligation to meet the conditions of Section 2.2

(a)(iii).

(c) *Technology Transfer.* Following the License Agreement Effective Date, Arcturus will use Diligent Efforts to transfer the formulation process for the Licensed Products that are intended to express the Target to CureVac or a reputable and competent GMP manufacturer selected by CureVac and reasonably acceptable to Arcturus. Upon written request by CureVac, Arcturus will conduct a technology transfer to CureVac and/or its designee(s). Arcturus will make its personnel available without charge for a total of [\*\*\*\*\*] hours during normal working hours for such transfer, and for additional hours in excess of [\*\*\*\*\*] up to a total of [\*\*\*\*\*] hours to be invoiced monthly at the then current FTE Cost. Such designee(s) may be an Affiliate, sublicensee or Third Party manufacturers selected by CureVac and reasonably acceptable to Arcturus, and which Third Party manufacturers may also be a backup manufacturer or a second manufacturer of Licensed Products as required for the applicable transferee of the then- current process. CureVac shall reimburse Arcturus for the reasonable cost (including internal FTE Cost) incurred to conduct such technology transfer as specified above.

**2.3 Updates to Appendix 1.4: Exclusion of Certain Patents.** Arcturus shall notify CureVac at least once every [\*\*\*\*\*] months of Patents that are added to the Arcturus Technology following the License Agreement Effective Date or any Patents that have been abandoned or discontinued in accordance with the terms of this License Agreement. **Appendix 1.4** shall be deemed automatically updated to include any such added Patents, provided that with written notice to Arcturus, CureVac may elect upon [\*\*\*\*\*] days' irrevocable written notice to Arcturus to exclude any particular Arcturus Technology Patents. Following any such written notice by CureVac, upon the expiration of the notice period the identified Arcturus Technology Patents that CureVac specifies for exclusion from this License Agreement will no longer be licensed to CureVac hereunder, and CureVac shall not have any rights (including rights pursuant to this Agreement) under such Arcturus Technology Patents nor obligations hereunder with respect to such Arcturus Technology Patents. For clarity, in the event that the Licensed Product is subsequently determined to be covered or otherwise infringe a Valid Claim of any excluded patent hereunder, then such infringement shall be deemed to be a material breach of this License Agreement by CureVac.

**2.4 Documents and Declarations.** At CureVac's reasonable request and cost and expense, Arcturus shall execute all documents, deliver declarations regarding the licenses granted hereunder, and Arcturus shall reasonably cooperate with CureVac to the extent such documents, declarations and/or cooperation are required to give effect to this License Agreement and/or for the recording or registration of the licenses granted hereunder at the various patent offices in the Territory for the benefit of CureVac, its Affiliates or their Sublicensees.

**2.5 Diligence; Reporting.** CureVac shall use Diligent Efforts to develop, manufacture and commercialize Licensed Products in the Field of Use in the Territory, and shall keep Arcturus reasonably informed as to the progress and results of its and its Affiliates' and Sublicensees' development, manufacture and commercialization of the Licensed Product. Without limiting the foregoing, CureVac shall provide Arcturus with a written report of the development, manufacture and commercialization of the Licensed Product within [\*\*\*\*\*] days after the end of each calendar year, and shall promptly respond to Arcturus reasonable questions or requests for additional information relating to such activities.

2.6 **Compliance.** CureVac shall at all times comply with all applicable Laws (including anti-bribery laws) in the development, manufacture and commercialization of the Licensed Product and the performance of its other obligations under this License Agreement, and shall not use any employee or consultant who has been debarred by any Regulatory Authority or, to CureVac's knowledge, is the subject of debarment proceedings by a regulatory authority.

2.7 **Updates.** Arcturus shall inform CureVac within [\*\*\*\*\*] Business Days of intellectual property matters affecting the Arcturus Technology Patents and the Arcturus Know-How of which it becomes aware that would reasonably be considered to negatively impact the rights of CureVac pursuant to this Agreement.

2.8 **Material.** CureVac shall have the right to retain Material provided by Arcturus under the Development and Option Agreement, to the extent such Material is necessary or useful for the exercise of a CureVac's rights or obligations under this License Agreement. Following the License Agreement Effective Date, only the provisions of this License Agreement, but not of the Development and Option Agreement, shall apply in relation to such Material.

### 3. **License Limitations.**

3.1 **Reserved Rights.** No licenses or other rights are granted by Arcturus hereunder to use any trademark, trade name, trade dress or service mark owned or otherwise Controlled by Arcturus or any of its Affiliates. All licenses and other rights are or shall be granted only as expressly provided in this License Agreement, and no other licenses or other rights is or shall be created or granted by either Party hereunder by implication, estoppel or otherwise. CureVac shall not, and shall not permit any of its Affiliates or Sublicensees to, practice or use any Arcturus Technology outside of the scope of the license granted to it under Section 2.1 or in contravention of Section 3.1. Arcturus retains the exclusive right to practice, license and otherwise exploit the Arcturus Technology outside the scope of the licenses granted to CureVac under Section 2.1 Notwithstanding the exclusive license granted to CureVac under Section 2.1, Arcturus retains the right under the Arcturus Technology to perform, or have performed, Arcturus' obligations under this License Agreement

3.2 **Other Licenses.** Arcturus acknowledges the rights granted to CureVac pursuant to this Agreement and shall not grant licenses under Arcturus Technology to Third Parties that are in conflict with this License Agreement it being understood that a license to enable or implement any Pre-Existing Restriction with respect to the Target shall not be deemed a conflict hereunder. In addition, Arcturus shall use Diligent Efforts to undertake that any licenses obtained from Third Parties will be sublicensable to CureVac, to the extent required or useful for the Licensed Product, provided that CureVac shall be responsible for an allocable portion of the payment and obligations that may be required in order to obtain rights with respect to the Licensed Product pursuant to such Third Party agreement.

### 4. **Payments and Royalties.**

4.1 **Milestone Payments.** CureVac will make milestone payments (each, a "**Milestone Payment**") to Arcturus upon the first occurrence of each of the milestone events (each, a "**Milestone Event**") by Licensed Product as set forth below in this Section 4.1. CureVac will notify Arcturus of the achievement of each Milestone Event (whether achieved by CureVac, its Affiliates or Sublicensees) within (i) [\*\*\*\*\*] Business Days of such achievement, if the Milestone Event is achieved by CureVac or its Affiliates, or (ii) [\*\*\*\*\*] Business Days of the receipt by CureVac of a notification about the achievement, if the Milestone Event is achieved by a Sublicensee.

Each Milestone Payment will be non-refundable, non-creditable and payable to Arcturus by CureVac within [\*\*\*\*\*] days of delivery of an invoice from Arcturus following notification from CureVac pursuant to the preceding paragraph, provided that if no such notification is timely provided by CureVac, the Milestone Payment shall be deemed payable [\*\*\*\*\*] days after (A) the achievement of such Milestone Event, if the Milestone Event is achieved by CureVac or its Affiliates, or (B) after the receipt by CureVac of the notification from CureVac pursuant to Section 4.1(ii). For clarity, the term "non-refundable" is not intended to limit either Party's rights to pursue damages arising from a breach of this Agreement.

If one or more of the Milestone Events set forth below are not achieved or not required for any reason, the payment for such skipped Milestone Event will be due at the same time as the payment for the next achieved Milestone Event. For clarity: [\*\*\*\*\*].

For clarity, to the extent that a Licensed Product is initiated against a Rare Disease Target and later expanded to a non-Rare Disease Target, then any and all Milestone Payments not previously made shall be due and payable upon the achievement of the next non-Rare Disease Milestone (e.g., [\*\*\*\*\*]).

4.2 Sublicensing Revenues. If within twenty-four (24) months after the License Agreement Effective Date CureVac grants a sublicense to a Third Party under this License Agreement for the development and commercialization of Licensed Products, then CureVac will pay to Arcturus [\*\*\*\*\*] of all Sublicense Income actually received by CureVac, to the extent the Sublicense Income exceeds the Option Exercise Fee paid by CureVac under the Development and Option Agreement to exercise the Option for this License Agreement and the Milestone Payments paid by CureVac under this License Agreement. The payments will be made within [\*\*\*\*\*] days after receipt by CureVac from the Third Party. For purposes of clarity, if CureVac grants a sublicense to Third Parties later than [\*\*\*\*\*] months after the License Agreement Effective Date, CureVac will not owe any Sublicensing Income to Arcturus.

4.3 Royalties.

(a) *Royalty*. Subject to the remainder of this Section 4.3, on a country-by-country basis and a Licensed Product-by-Licensed Product basis, CureVac will pay to Arcturus (i) a royalty of [\*\*\*\*\*] of Net Sales of the Licensed Product (ii) as well as of any net sales milestones (without offset for any reductions pursuant to Section 4.3(b)) for such Licensed Product received from the Sublicensee.

(b) *Third Party Payments and Royalty Reductions*. If CureVac or its Affiliate or Sublicensee, in its reasonable judgment, considers it necessary or useful to obtain a license from any Third Party under any LMD Technology that Covers a Licensed Product in order to develop, manufacture or commercialize such Licensed Product, the amount of CureVac's royalty obligations under Sections 4.3(a) will be reduced by [\*\*\*\*\*] of the amount of the upfront, milestone and royalty payments made to such Third Party on account of the development, manufacture or commercialization of such Licensed Product ("Royalty Reductions"), *provided, however*, that any Royalty Reduction shall not result in less than the minimum royalty due to Arcturus under Section (c) below.

(c) *Minimum Royalty.* In no event will the Royalty payable by CureVac to Arcturus for any Licensed Product be less than (i) [\*\*\*\*\*] if the reduction in subsection (e) does not apply; or (ii) [\*\*\*\*\*] if the reduction in subsection (e) also applies.

(d) *Term.* The royalty term ("Royalty Term") shall expire on a country-by-country and Licensed Product-by-Licensed Product basis, on the last to occur of (i) expiration of the last to expire Valid Claim in the Arcturus Technology that, but for the license described herein from Arcturus to CureVac for the applicable Licensed Product, is infringed by the making, using or sale of such Licensed Product, (ii) expiration of any period of data exclusivity, market exclusivity or supplemental protection certificates covering the Licensed Product in such country; and (iii) ten (10) years after First Commercial Sale of Licensed Product in such country. For the avoidance of doubt, upon exhaustion of the obligation to pay Royalties to Arcturus as set forth above the continued use of Arcturus Know-How comprised in the Arcturus Technology for the development, manufacture and/or sale of the Licensed Product shall not, in and of itself, obligate CureVac to pay further royalties to Arcturus. Thereafter, CureVac's license under Section 2.1 will become irrevocable, perpetual, fully paid-up and royalty-free on a country-by-country and Licensed Product-by-Licensed Product basis.

(e) *Know-How Royalty.* On a country-by-country, and a Licensed -Product-by-Licensed Product basis, in the event that during the Royalty Term a Licensed Product is not covered by a Valid Claim, the royalty otherwise payable for such Licensed Product, after the Royalty Reductions above, will be reduced by [\*\*\*\*\*].

#### 4.4 Payment Terms.

(a) *Manner of Payment.* All payments to be made by CureVac hereunder will be made in U.S. dollars by wire transfer to such bank account as Arcturus may designate.

(b) *Records and Audits.* CureVac shall keep, and shall cause each of its Affiliates and Sublicensees, as applicable, to keep adequate books and records of accounting for the purpose of calculating all royalties and other amounts payable to Arcturus hereunder. For the [\*\*\*\*\*] years next following the end of the calendar year to which each shall pertain, such books and records of accounting (including those of CureVac's Affiliates and Sublicensees) shall be kept at each of their principal places of business and shall be open for inspection at reasonable times and upon reasonable notice by an independent certified accountant selected by Arcturus, and which is reasonably acceptable to CureVac, for the sole purpose of inspecting the Net Sales calculations and supporting details to the extent reasonably necessary and resulting royalties and other amounts due to Arcturus under this License Agreement. In no event shall such inspections be conducted hereunder more frequently than once every [\*\*\*\*\*] months. Such accountant must have executed and delivered to CureVac and its Affiliates, a confidentiality agreement as reasonably requested by CureVac, which shall include provisions limiting such accountant's disclosure to Arcturus to only the results and basis for such results of such inspection. The results of such inspection, if any, shall be binding on both Parties. Any underpayments plus interest from the original due date shall be paid by CureVac within [\*\*\*\*\*] days of notification of the results of such inspection. Any overpayments shall be fully creditable against amounts payable in subsequent payment periods. Arcturus shall pay for such inspections, except that in the event there is any upward adjustment in aggregate royalties and other amounts payable for any calendar year shown by such inspection of more than [\*\*\*\*\*] of the amount paid, CureVac shall reimburse Arcturus for any reasonable out-of-pocket costs of such accountant.

(c) *Reports and Royalty Payments.* For as long as royalties are due under Section 4.3, CureVac shall furnish to Arcturus written reports.

(i) Reports shall be provided within [\*\*\*\*\*] days of (1) the end of the Calendar Quarter if Net Sales are generated by CureVac and its Affiliates, and (2) the receipt of corresponding information (which may be estimated) from Sublicensees but in any event within [\*\*\*\*\*] days of the end of the Calendar Quarter with respect to Net Sales generated by such Sublicensees.

(ii) Royalty payments for each Calendar Quarter shall be due within [\*\*\*\*\*] Business Days of delivery of an invoice from Arcturus following submission of a royalty report from CureVac, but only subject to the prior receipt by CureVac of the corresponding royalty payment from the Sublicensee, if applicable; however such royalty payments due to Arcturus shall not be reduced by deductions which exceed those covered by the Net Sales definition according to Section 1.43.

(iii) The report shall include, at a minimum, the following information for the applicable Calendar Quarter for each Licensed Product if Net Sales are generated by CureVac and its Affiliates: (i) the gross sales by country reasonably required for the calculation of royalty payments due according to this Agreement, (ii) the calculation in reasonable detail of the Net Sales from such gross sales amounts, including the deductions pursuant to the definition of Net Sales and the amounts of any credits or reductions permitted by Section 4.2; and (iii) the computations for any Arcturus currency conversions pursuant to subsection (d) below.

(iv) CureVac will require each Sublicensee to share with Arcturus the information listed in the foregoing clauses as it relates to Net Sales made by such Sublicensee, and to the extent practicable, will include such Sublicensee information in such report; provided that the level of detail with respect to the items subject to report pursuant to Section 4.4(c)(iii) shall be limited to the information that CureVac actually receives from any such Sublicensee. All such reports shall be considered the Confidential Information of CureVac, subject to Section 4.4(b).

(d) *Currency Exchange.* With respect to Net Sales invoiced in U.S. dollars, the Net Sales and the amounts due to Arcturus hereunder will be expressed in U.S. dollars. With respect to Net Sales invoiced in a currency other than U.S. dollars, payments will be calculated based on the average of the closing exchange rates reported by the Wall Street Journal (<http://quotes.wsj.com/fx/EURUSD>), or such other source as the Parties may agree in writing, of the applicable reporting period for the payment due.

(e) *Taxes.* CureVac may withhold from payments due to Arcturus amounts for payment of any withholding tax that is required by Law to be paid to any taxing authority with respect to such payments. CureVac will provide Arcturus all relevant documents and correspondence, and will also provide to Arcturus any other cooperation or assistance on a reasonable basis as may be necessary to enable Arcturus to claim exemption from such withholding taxes and to receive a refund of such withholding tax or claim a foreign tax credit. CureVac will give proper evidence from time to time as to the payment of any such tax. The Parties will cooperate with each other in seeking deductions under any double taxation or other similar treaty or agreement from time to time in force. CureVac shall use Diligent Efforts to minimize withholding taxes. In the event that any tax deduction or withholding obligation arises or increases as a direct result of any reincorporation, redomiciliation, change in source of payments under this Agreement or other similar corporate structuring actions undertaken by CureVac from and after the License Agreement Effective Date, then CureVac shall increase the payment (in respect of which such deduction or withholding of tax is required to be made) to ensure that Arcturus receives an amount equal to the amount that it would have received had no such action occurred. Apart from any such permitted withholding and those deductions expressly included in the definition of Net Sales, the amounts payable by CureVac to Arcturus hereunder will not be reduced on account of any taxes, charges, duties or other levies. Each Party shall be solely responsible for the payment of all taxes imposed on its share of income arising directly or indirectly from the activities of the Parties under this License Agreement.

(f) *Blocked Payments.* In the event that, by reason of applicable law in any country, it becomes impossible or illegal for CureVac or its Affiliates or Sublicensees to transfer, or have transferred on its behalf, payments owed to Arcturus hereunder, CureVac will promptly notify Arcturus of the conditions preventing such transfer and such payments will be deposited in local currency in the relevant country to the credit of Arcturus in a recognized banking institution proposed by Arcturus and reasonably acceptable to CureVac or, if none is proposed by Arcturus within a period of [\*\*\*\*\*] days, in a recognized banking institution selected by CureVac or its Affiliate or Sublicensee, as the case may be, and identified in a written notice given to Arcturus.

(g) *Interest Due.* If any payment due to Arcturus under this License Agreement is overdue (and is not subject to a good faith dispute), then CureVac will pay interest thereon (before and after any judgment) at an annual rate of the lesser of [\*\*\*\*\*] above the prime rate as reported in The Wall Street Journal, Eastern Edition, and the maximum rate permitted by applicable Law, such interest to run from the date upon which payment of such sum became due until payment thereof in full together with such interest.

(h) *Mutual Convenience of the Parties.* The royalty and other payment obligations set forth hereunder have been agreed to by the Parties for the purpose of reflecting and advancing their mutual convenience, including the ease of calculating and paying royalties and other amounts to Arcturus.

**5. Ownership and Inventorship of IP.**

5.1 **Solely-Owned IP.** As between the Parties and subject to Section 5.3, each Party will own and retain all right, title and interest in and to any and all Know-How and Patents arising therefrom that are discovered, created, conceived, developed or reduced to practice under or in connection with this License Agreement (the "**Inventions**") solely by or on behalf of such Party. Subject to the licenses hereunder and the other terms and conditions of this License Agreement or any other agreement between the Parties, each Party will be solely responsible for the prosecution and maintenance, and the enforcement and defense, of its solely-owned Patents.

5.2 **Inventorship.** Inventorship of all Inventions shall be determined in accordance with applicable laws. Each Party will ensure that each employee, consultant and subcontractor conducting any activities under this License Agreement on behalf of such Party will be subject to written agreements to assign to such Party all of its right, title and interest in and to the Inventions so that such Party can comply with its obligations with respect to the ownership allocation of the Inventions as set forth below. In addition, each Party shall be solely responsible for payments that may be required to any of such Party's employees or consultants and subcontractors in connection with or with respect to such agreements, including moral rights payments.

5.3 **Ownership.** Notwithstanding inventorship in the first instance pursuant to Section 5.2, ownership of all Inventions, as between the Parties, will be assigned by the Parties as follows: (a) Arcturus will solely own all Inventions that are improvements solely to the LMD Technology ("**LMD Inventions**"), and (b) CureVac will solely own all Inventions that are improvements solely to the mRNA Technology ("**mRNA Inventions**"). Specifically, CureVac hereby assigns to Arcturus all of its right, title and interest in and to any and all LMD Inventions, and agrees to take such actions reasonably requested by Arcturus to evidence such assignment. Arcturus hereby assigns to CureVac all of its right, title and interest in and to any and all mRNA Inventions, and agrees to take such actions reasonably requested by CureVac to evidence such assignment. For clarity, the assignment provisions with respect to mRNA Inventions are restricted solely to improvements to the mRNA Technology.

**6. Patent Prosecution and Maintenance.**

**6.1 Generally.**

(a) As between the Parties and subject to Section 6.2 below, Arcturus (or its Third Party licensor, if any) will have the sole right, at its sole costs, to prosecute and maintain Arcturus Technology Patents, other than the Joint Interest Patents.

(b) In relation to any Arcturus Technology Patents that specifically claim the Licensed Product, prior to filing, Arcturus will provide CureVac with copies of all specific claims relevant to the Licensed Product in such applications for all such Arcturus Technology Patents, and all other material submissions and correspondence relating to such claims with any patent authorities regarding such Arcturus Technology Patents, in sufficient time (not to be less than [\*\*\*\*]) to allow for review and comment by CureVac. In addition, Arcturus will provide CureVac and its counsel with an opportunity to consult with Arcturus and its counsel regarding prosecution and maintenance of any such Arcturus Technology Patents, and Arcturus will not unreasonably refuse to address all reasonable comments timely made by or on behalf of CureVac.

(c) As between the Parties, CureVac will have the first right to prosecute and maintain any and all Joint Interest Patents and the Parties will share equally all costs incurred by CureVac in connection with such efforts. Prior to filing, CureVac will provide Arcturus with copies of all applications for such Joint Interest Patents, and all other material submissions and correspondence with any patent authorities regarding such Joint Interest Patents, in sufficient time (not to be less than [\*\*\*\*\*] days) to allow for review and comment by Arcturus. In addition, CureVac will provide Arcturus and its counsel with an opportunity to consult with CureVac and its counsel regarding prosecution and maintenance of any such Joint Interest Patents, and CureVac will consider in good faith all reasonable comments timely made by or on behalf of Arcturus.

(d) In the event that CureVac or its Affiliates grants a sublicense pursuant to Section 2.2, as between CureVac and any such Sublicensee,

(i) to the extent any such Arcturus Technology Patent or Joint Interest Patent does not specifically claim the Licensed Product, CureVac shall retain its rights to prosecute any such sublicensed Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 6.1(b) and 6.1(c); provided, however, that such Sublicensee may provide for instruction by the Sublicensee of CureVac's exercise of its rights to prosecute any sublicensed Arcturus Technology Patent or Joint Interest Patent;

(ii) to the extent any such Arcturus Technology Patent or Joint Interest Patent specifically claims the Licensed Product (i.e., with respect to the claims limited to the Licensed Product, but not the broader claims that cover other products or potential products in such Arcturus Technology Patents or Joint Interest Patents), CureVac shall have the right to sublicense its rights to prosecute any such sublicensed Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 6.1(b) and 6.1(c) to the Sublicensee.

**6.2 Election Not to Prosecute or Maintain or Pay Patent Costs.**

(a) If Arcturus elects not to file, prosecute or maintain any Arcturus Technology Patents that specifically claim the Licensed Product for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, then Arcturus will so notify CureVac, promptly in writing with reasonable notice to enable CureVac to meet any deadlines by which an action must be taken to preserve such Arcturus Technology Patent that specifically claim the Licensed Product in such country, if CureVac so requests. Upon receipt of each such notice by Arcturus, CureVac will have the right, but not the obligation, to notify Arcturus in writing on a timely basis that Arcturus should transfer the prosecution or maintenance of such Arcturus Technology Patents that specifically claim the Licensed Product to CureVac and at CureVac's sole expense or continue the prosecution and/or maintenance of such Arcturus Technology Patent that specifically claim the Licensed Product in the respective country, and thereafter, Arcturus would prosecute and maintain such Arcturus Technology Patent that specifically claim the Licensed Product in such country at the sole direction and expense of CureVac, Arcturus would make available to CureVac all documentation and correspondence with respect to such Arcturus Technology Patent. CureVac's license to such Arcturus Technology Patent under Section 2.1 will be irrevocable and royalty-free, and such Arcturus Technology Patent will thereafter no longer be part of the Arcturus Technology for purposes of this License Agreement. CureVac is entitled to discontinue the payment of Patent Cost for any Arcturus Technology Patents that specifically claim the Licensed Product at any time, provided that it will so notify Arcturus in writing in time for such discontinuance.

(b) If Arcturus elects not to pay its share of the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents, then it shall assign its co-ownership share in such Patents to CureVac and the respective Patent shall no longer be considered a Joint Interest Patent.

(c) *By CureVac.* If CureVac elects not (i) to file, prosecute or maintain any Joint Interest Patents for which it is responsible under Section 6.1 in any particular country before the applicable filing deadline or continue such activities once filed in a particular country, or (ii) to pay its share of the Patent Costs associated with prosecution or maintenance of any Joint Interest Patents then in each such case CureVac will so notify Arcturus, promptly in writing and in good time to enable Arcturus to meet any deadlines by which an action must be taken to preserve such Joint Interest Patent in such country at Arcturus' expense, if Arcturus so requests. Upon receipt of each such notice by CureVac, Arcturus will have the right, but not the obligation, to notify CureVac in writing on a timely basis that CureVac should transfer the prosecution or maintenance of such Joint Interest Patent to Arcturus and at Arcturus' sole expense. Arcturus is entitled to discontinue the payment of Patent Costs for any Joint Interest Patents at any time, provided that it will so notify CureVac in writing in time for such discontinuance. In the event that Arcturus assumes the prosecution and maintenance of any such Joint Interest Patent, then CureVac would make available to Arcturus all documentation and correspondence with respect to such Joint Interest Patent, such Joint Interest Patent shall no longer be licensed under this Agreement with respect to the Licensed Product.

6.3 Cooperation. Each Party will reasonably cooperate with the other Party in those activities involving the Arcturus Technology Patents and Joint Interest Patents set forth in Sections 6.1 and 6.2. Such cooperation includes promptly executing all documents, or requiring inventors, subcontractors, employees and consultants and agents of CureVac and Arcturus and their respective Affiliates and Sublicensees to execute all documents, as reasonable and appropriate so as to enable such activities in respect of any such Arcturus Technology Patents in any country.

7. Patent Enforcement and Defense.

7.1 Notice. To the extent not in breach of an obligation of confidentiality, each Party will promptly notify, in writing, the other Party upon learning of any actual or suspected infringement of any Arcturus Technology Patents by a Third Party, or of any claim of invalidity, unenforceability, or non-infringement of any Arcturus Technology Patents, and will, along with such notice, supply the other Party with any evidence in its possession pertaining thereto.

7.2 Enforcement and Defense.

(a) *Enforcement.*

(i) As between the Parties,

(1) Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up enforcement rights), at its cost, will have the first right, but not the obligation, to seek to abate any infringement of the Arcturus Technology Patents (other than those in subsection (2)) by a Third Party, or to file suit against any such Third Party for such infringement, and

(2) CureVac (or its sublicensee, if any) shall have the first right, but not the obligation, to take action or bring suit and bear all expenses against such Third Party infringer with respect to: (A) Joint Interest Patents; and/or (B) any other Arcturus Technology Patents that, on the date of first notice of such infringement, specifically claim the Licensed Product but are not necessary or useful for the research, development, manufacturing and commercialization of any product comprising Arcturus Technology that is exclusively licensed or optioned to a Third Party or is in Late Stage Development or being commercialized by Arcturus or its Affiliates.

(b) If the Party first responsible for such enforcement elects not to take action or to bring suit to prosecute such infringement or to continue such action or suit, it shall notify the other Party of such election within [\*\*\*\*\*] days after become aware of or receipt of the notice of the infringement or after the election to stop any such action or suit. If after the expiration of the [\*\*\*\*\*] days period (or, if earlier, the date upon which the responsible Party provides written notice that it does not plan to bring such action) the responsible Party has neither obtained a discontinuance of infringement nor filed suit against any such Third Party infringer of such Patent, then

(i) in the case of an election by Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up enforcement rights) not to prosecute an infringement of an Arcturus Technology Patent specifically claiming the Licensed Product, CureVac shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, provided that the infringement is with respect to a product related to the Target(s) under this License Agreement, and further provided that CureVac shall bear all the expenses of such suit and

(ii) in the case of a CureVac election not to prosecute an infringement of a Joint Interest Patents or Arcturus Technology Patent with respect to which CureVac has rights to take first action, (i) Arcturus shall have the right, but not the obligation, to take action or bring suit against such Third Party infringer of such Patents, provided that Arcturus shall bear all the expenses of such suit, and CureVac shall join Arcturus in such suit to the extent legally required, unless (ii) CureVac decides to assign its interest in such Joint Interest Patent - on a country-by-country basis - to Arcturus and such Joint Interest Patent shall become an Arcturus Technology Patent and no longer subject to license pursuant to this License Agreement.

(c) *Defense.*

(i) As between the Parties,

(1) Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up defense rights) will have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging any Arcturus Technology Patents, other than: (i) Joint Interest Patents; and (ii) any other Arcturus Technology Patents that, on the date of first notice of such action, specifically claim the Licensed Product but are not necessary or useful for the research, development, manufacturing and commercialization of any product comprising Arcturus Technology that is exclusively licensed or optioned to a Third Party or is in Late Stage Development or being commercialized by Arcturus or its Affiliates, and

(2) CureVac shall have the first right, but not the obligation, at its sole costs, to defend against a declaratory judgment action or other action challenging Joint Interest Patents as well as such other Arcturus Technology Patents that specifically claim the Licensed Product.

(ii) If the Party first responsible for such defense does not take steps to defend within a commercially reasonable time, or elects not to continue any such defense (in which case it will promptly provide notice thereof to the other Party), then (i) in the case of an election by Arcturus and its Third Party licensor or licensee (solely to the extent of any existing back-up defense rights) not to defend an Arcturus Technology Patent specifically claiming the Licensed Product, CureVac shall have the right, but not the obligation, to defend any Arcturus Technology Patents that cover Licensed Product and no other product licensed or optioned by Arcturus to a Third Party or commercialized by Arcturus, provided that CureVac shall bear all the expenses of such suit and (ii) in the case of a CureVac election not to defend the Joint Interest Patents, Arcturus shall have the right, but not the obligation, to take action or bring suit to defend such Patents, provided that Arcturus shall bear all the expenses of such suit. Notwithstanding the foregoing, in the event that CureVac elects not to prosecute an infringement of a Joint Interest Patent, then CureVac shall, at its discretion, either (i) assign such Joint Interest Patent to Arcturus - on a country-by-country basis -, which shall become an Arcturus Technology Patent and no longer subject to license pursuant to this License Agreement or (ii) join Arcturus in such suit to the extent legally required.

(d) Notwithstanding the foregoing, any response to a Third Party infringer's counterclaim of invalidity or unenforceability of any Arcturus Technology Patents shall be controlled by the Party who controls the relevant enforcement proceeding pursuant to Section 7.2(a) unless otherwise mutually agreed by the Parties.

(e) In the event that CureVac or its Affiliates grants a sublicense pursuant to Section 2.2, as between CureVac and any such Sublicensee,

(i) to the extent any such Arcturus Technology Patent or Joint Interest Patent does not specifically claim the Licensed Product, CureVac shall retain its rights to enforce and defend Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 7.2(a), 7.2(b), 7.2(c) and 7.2(d); provided, however, that CureVac's exercise of its rights to enforce or defend such Arcturus Technology Patent or Joint Interest Patent may be instructed by a Sublicensee;

(ii) to the extent any such Arcturus Technology Patent or Joint Interest Patent specifically claims the Licensed Product, CureVac shall have the right to sublicense its rights to enforce and defend Arcturus Technology Patents and Joint Interest Patents as set forth in Sections 7.2(a), 7.2(b), 7.2(c) and 7.2(d) to the Sublicensee.

(f) *Withdrawal, Cooperation and Participation.* With respect to any infringement or defensive action identified above in this Section 7.2 which may be controlled by either CureVac or Arcturus:

(i) If the controlling Party ceases to pursue or withdraws from such action, it will promptly notify the other Party (in good time to enable the other Party to meet any deadlines by which any action must be taken to preserve any rights in such infringement or defensive action) and such other Party may substitute itself for the withdrawing Party, shall be granted the right and standing to sue in the other Party's name, and proceed under the terms and conditions of this Section 7.2.

(ii) The non-controlling Party will cooperate with the Party controlling any such action (as may be reasonably requested by the controlling Party), including (A) providing access to relevant documents and other evidence, (B) making its and its Affiliates and licensees and Sublicensees and all of their respective employees, subcontractors, consultants and agents available at reasonable business hours and for reasonable periods of time, but only to the extent relevant to such action, and (C) if necessary, by being joined as a party, subject for this clause (C) to the controlling Party agreeing to indemnify such non-controlling Party for its involvement as a named party in such action and paying those Patent Costs incurred by such Party in connection with such joinder. The Party controlling any such action will keep the other Party updated with respect to any such action, including providing copies of all documents received or filed in connection with any such action.

(iii) Each Party will have the right to participate or otherwise be involved in any such action controlled by the other Party, in each case at the participating (i.e., non-controlling) Party's sole cost and expense. If a Party elects to so participate or be involved, the controlling Party will provide the participating Party and its counsel with an opportunity to consult with the controlling Party and its counsel regarding the prosecution of such action (including reviewing the contents of any correspondence, legal papers or other documents related thereto), and the controlling Party will take into account reasonable requests of the participating Party regarding such enforcement or defense.

(g) *Settlement.* Neither Party will settle or consent to an adverse judgment in any action described in this Section 7.2 and controlled by such Party, including any judgment which affects the scope, validity or enforcement of any Arcturus Technology Patents involved therewith, without the prior written consent of the other Party (such consent not to be unreasonably withheld, delayed or conditioned).

(h) *Damages.* Unless otherwise agreed by the Parties, all monies recovered upon the final judgment or settlement of any action which may be controlled by either CureVac or Arcturus and described in Section 7.2(a) or 7.2(c) in each case will be used first to reimburse the controlling Party, and thereafter the non-controlling Party, for each of their out-of-pocket costs and expenses relating to the action, with the balance of any such recovery to be divided as follows:

(i) To the extent the action involves a Third Party's research, development, manufacture or commercialization of any product other than the Licensed Product (or a LMD product directed to the same Target as the Licensed Product), Arcturus shall retain all such recovery; and

(ii) To the extent the action involves a Third Party's research, development, manufacture or commercialization of the Licensed Product (or a LMD product directed to the same Target as the Licensed Product), CureVac will retain such recovery, less the amount of royalties payable to Arcturus by treating such recovery as "Net Sales" hereunder.

(i) Patent Marking. CureVac shall mark all Licensed Product if and to the extent required by the applicable patent marking laws, and shall require all of its Affiliates and sublicensees to do the same.

## 8. Confidentiality.

**8.1** Confidential Information. Each Party ("Disclosing Party") may disclose to the other Party ("Receiving Party"), and Receiving Party may acquire during the course and conduct of activities under this License Agreement, certain proprietary or confidential information of Disclosing Party in connection with this License Agreement.

**8.2** Restrictions. During the Term and for [\*\*\*\*\*] years thereafter, Receiving Party will keep all Disclosing Party's Confidential Information in confidence with the same degree of care with which Receiving Party holds its own confidential information, but in no event less than reasonable care. Receiving Party will not use Disclosing Party's Confidential Information except for in connection with the performance of its obligations and exercise of its rights under this License Agreement. Receiving Party has the right to disclose Disclosing Party's Confidential Information without Disclosing Party's prior written consent to Receiving Party's Affiliates, and each of their employees, subcontractors, consultants and agents who have a need to know such Confidential Information in order to perform their obligations and exercise their rights under this License Agreement and who are under written obligation to comply with the restrictions on use and disclosure that are no less restrictive than those set forth in this Section 8.2. Receiving Party assumes responsibility for such entities and persons maintaining Disclosing Party's Confidential Information in confidence and using same only for the purposes described herein.

**8.3** Exceptions. Receiving Party's obligation of nondisclosure and the limitations upon the right to use the Disclosing Party's Confidential Information will not apply to a specific portion of the Disclosing Party's Confidential Information to the extent that Receiving Party can demonstrate that such portion: (i) was known to Receiving Party or any of its Affiliates prior to the time of disclosure by the Disclosing Party without obligation of confidentiality; (ii) is or becomes public knowledge through no action or omission of Receiving Party or any of its Affiliates; (iii) is obtained on a non-confidential basis by Receiving Party or any of its Affiliates from a Third Party who to Receiving Party's knowledge is lawfully in possession thereof (or if possession is obviously unlawful) and under no obligation of confidentiality to Disclosing Party; or (iv) has been independently developed by or on behalf of Receiving Party or any of its Affiliates without the aid, application or use of Disclosing Party's Confidential Information as documented by the internal records of the Receiving Party.

**8.4 Permitted Disclosures.** Notwithstanding the obligations set forth in Section 8.2, Receiving Party may disclose Disclosing Party's Confidential Information (including this License Agreement and the terms herein) to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

- (e) in order to comply with applicable Law (including any securities Law or regulation or the rules of a securities exchange) or with a legal or administrative proceeding;
- (f) in connection with prosecuting or defending litigation, and filing, prosecuting and enforcing Arcturus Technology Patents in connection with Receiving Party's rights and obligations pursuant to this License Agreement;
- (g) to attorneys, accountants, auditors, acquirers, licensees, partners or permitted assignees; financial advisors, investors and lenders, including potential acquirers, licensees, partners, assignees, financial advisors, investors and lenders; and
- (h) in the case of CureVac, to (i) subcontractors; or (ii) potential licensees or collaboration partners, but only such information that is reasonably necessary or useful for the subcontractor to perform the subcontracted work or for the potential licensee or partner to evaluate the applicable Licensed Product, and LMD or Licensed Product manufacturing processes;

provided that (1) where reasonably possible, Receiving Party will notify Disclosing Party of Receiving Party's intent to make any disclosure pursuant to subsections (a) and (b) sufficiently prior to making such disclosure so as to allow Disclosing Party reasonable time to take whatever action it may deem appropriate to protect the confidentiality of the information to be disclosed, and (2) with respect to subsections (c), each of those persons or entities are required to comply with the restrictions on use and disclosure in Section 8.2 (other than financial advisors, investors and lenders, which must be bound prior to disclosure by commercially reasonable obligations of confidentiality).

**8.5 Return of Confidential Information.** Upon expiry or earlier termination of this License Agreement, upon written request of a Party (such request, if made, to be made within three (3) months of such expiry or termination) the other Party will destroy or return (as shall be specified in such request) to the requesting Party all copies of the Confidential Information of the requesting Party; provided that the Party may retain: (i) one copy of such Confidential Information for record-keeping purposes, for the sole purpose of ensuring compliance with this License Agreement; (ii) any copies of such Confidential Information as is required to be retained under applicable Law; (iii) any copies of such Confidential Information as is necessary or useful for such Party to exercise a right or fulfill an obligation under another License Agreement, if any, or as set forth in this License Agreement; and (iv) any copies of any computer records and files containing Confidential Information that have been created by such Party's routine archiving/backup procedures. Upon request of the requesting Party, the Receiving Party shall confirm in writing to the requesting Party the destruction or return of all copies of the Confidential Information of the requesting Party.

8.6 Publications. Notwithstanding anything in this License Agreement to the contrary, CureVac is permitted to publish the results of its development under this License Agreement, *provided, however*, that it will not disclose Arcturus Confidential Information in any publication by CureVac of the results of any Licensed Product development by CureVac without Arcturus' prior written consent, which will not be unreasonably withheld, conditioned or delayed.

8.7 Terms of this License Agreement; Press Release. The Parties agree that the existence and terms of the Parties' relationship and this License Agreement will be treated as Confidential Information of both Parties, and thus may be disclosed only as permitted by Section 8.4. Except as mutually agreed or otherwise required by Law or securities exchange regulation, each Party agrees not to issue any press release or public statement disclosing information relating to the existence of this License Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party.

9. Warranties; Limitations of Liability; Indemnification.

9.1 Representations and Warranties. Each Party represents and warrants to the other as of the License Agreement Effective Date that:

- (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated,
- (b) it has the legal right and power to enter into this License Agreement, to extend the rights and licenses granted or to be granted to the other in this License Agreement, and to fully perform its obligations hereunder,
- (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this License Agreement and the performance of its obligations hereunder,
- (d) this License Agreement has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms and
- (e) except with respect to any Pre-existing Restrictions, the execution, delivery and performance by such Party of this License Agreement and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which such Party is a party or by which it is bound, including, in the case of Arcturus, each of the agreements which Arcturus has identified to CureVac prior to the License Agreement Effective Date, in each case as would reasonably be expected to have a material adverse effect on the rights of the other Party hereunder.

9.2 Additional Representations of Arcturus. Arcturus hereby represents and warrants to CureVac as of the License Agreement Effective Date as follows:

(a) *Impairment.* Except with respect to any Pre-existing Restrictions, neither Arcturus nor any of its Affiliates has entered into any agreement or otherwise licensed, granted, assigned, transferred, conveyed or otherwise encumbered or disposed of any right, title or interest in or to any of its assets, including any intellectual property rights including Know-How, that would in any way conflict with or impair the scope of any rights or licenses granted to CureVac with respect to the Licensed Product hereunder.

(b) *Patents.* **Appendix 1.4** sets forth a complete and accurate list of all Arcturus Technology Patents. Arcturus Controls the Arcturus Technology, and is entitled to grant the licenses specified herein. To Arcturus' knowledge, the Arcturus Technology Patents have been procured or are being procured from the respective patent offices in accordance with applicable Law. None of the Arcturus Technology Patents is or has been involved in any opposition, cancellation, interference, reissue or reexamination proceeding, and to Arcturus' knowledge as of the License Agreement Effective Date, no Arcturus Technology is the subject of any judicial, administrative or arbitral order, award, decree, injunction, lawsuit, proceeding or stipulation. As of the License Agreement Effective Date, neither Arcturus nor any of its Affiliates has received any notice alleging that the Arcturus Technology Patents are invalid or unenforceable, or challenging Arcturus' ownership of or right to use any such rights.

(c) *Entire LMD Technology.* The Arcturus LMD Technology licensed to CureVac under this License Agreement comprises all LMD Technology Controlled by Arcturus which is necessary or useful to develop, manufacture and commercialize the Licensed Products for purposes of this License Agreement.

(d) *Encumbrances.* As of the License Agreement Effective Date, Arcturus has the right to grant the license herein to CureVac and neither Arcturus nor any of its Affiliates has granted any liens or security interests on the Arcturus Technology to any Third Party that is inconsistent with the license granted to CureVac under Section 2.1.

(e) *Litigation.* There is no action, suit, proceeding or investigation pending or, to the knowledge of Arcturus, currently threatened against or affecting Arcturus that questions the validity of this License Agreement or the right of Arcturus to enter into this License Agreement or consummate the transactions contemplated hereby or that relates to the Arcturus Technology.

(f) *Infringement.* Neither Arcturus nor any of its Affiliates has received any written notice of any claim, nor does Arcturus or its Affiliates have any knowledge of any claim, that any Patent, Know-How or other intellectual property owned or controlled by a Third Party would be infringed or misappropriated by the practice of any Arcturus LMD Technology in connection with the production, use, research, development, manufacture or commercialization of any Licensed Product.

(g) *Third Party Infringement.* To Arcturus' knowledge, no Third Party is infringing or has infringed any Patent within the Arcturus LMD Technology or is misappropriating or has misappropriated any Know-how within the Arcturus LMD Technology, in each case relating to the Target.

**9.3 Disclaimers.** Without limiting the respective rights and obligations of the Parties expressly set forth herein, each Party specifically disclaims any guarantee that any Licensed Product will be successful, in whole or in part. Except as otherwise expressly provided in this License Agreement, the Parties make no representations and extend no warranty of any kind under this License Agreement, neither express nor implied.

**9.4 No Consequential Damages.** Notwithstanding anything in this License Agreement or otherwise, neither Party will be liable to the other or any Third Party with respect to any subject matter of this License Agreement for any indirect or consequential damages, provided that this Section 9.4 will not apply to breaches of Article 8 or the Parties' indemnification rights or obligations under Section 9.6, or in the event of willful misconduct.

**9.5 Performance by Others.** The Parties recognize that each Party may perform some or all of its obligations under this License Agreement through Affiliates, subcontractors or - in the event of CureVac - Sublicensees, provided, however, that each Party will remain fully responsible and liable for the performance by its Affiliates, subcontractors and Sublicensees, and will cause its Affiliates, subcontractors and Sublicensees to comply with the provisions of this License Agreement in connection therewith.

**9.6 Indemnification.**

(a) *Indemnification by CureVac.* CureVac will indemnify Arcturus, its Affiliates and their respective directors, officers, employees, Third Party licensors and agents, and their respective successors, heirs and assigns (collectively, "Arcturus Indemnitees"), and defend and hold each of them harmless, from and against any and all losses, damages, liabilities, costs and expenses (including reasonable attorneys' fees and expenses) (collectively, "Losses") in connection with any and all suits, investigations, claims or demands of Third Parties (collectively, "Third Party Claims") against the Arcturus Indemnitees to the extent arising from or occurring as a result of: (i) the breach by CureVac of any representation or warranty of this License Agreement; (ii) any gross negligence or willful misconduct on the part of any CureVac Indemnitee; or (iii) the development, manufacture or commercialization by or on behalf of CureVac or any of its Affiliates or Sublicensees of Licensed Product other than if related to an LMD component thereof specifically provided by Arcturus, except in each case (i)-(iii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of an Arcturus Indemnitee or Arcturus' breach of this License Agreement.

(b) *Indemnification by Arcturus.* Arcturus will indemnify CureVac, its Affiliates and their respective directors, officers, employees and agents, and their respective successors, heirs and assigns (collectively, "CureVac Indemnitees"), and defend and hold each of them harmless, from and against any and all Losses in connection with any and all Third Party Claims against CureVac Indemnitees to the extent arising from or occurring as a result of: (i) the breach by Arcturus of any representation or warranty of this License Agreement; or (ii) any gross negligence or willful misconduct on the part of any Arcturus Indemnitee, except in each case (i) and (ii) to the extent arising from or occurring as a result of the gross negligence or willful misconduct on the part of a CureVac Indemnitee or CureVac's breach of this License Agreement.

(c) *Notice of Claim.* All indemnification claims provided for in Sections 9.6(a) and 9.6(b) will be made solely by such Party to this License Agreement (the "Indemnified Party"). The Indemnified Party will promptly notify the indemnifying Party (an "Indemnification Claim Notice") of any Losses or the discovery of any fact upon which the Indemnified Party intends to base a request for indemnification under Section 9.6(a) and 9.6(b), but in no event will the indemnifying Party be liable for any Losses that result from any delay in providing such notice. Each Indemnification Claim Notice must contain a description of the claim and the nature and estimated amount of such Loss (to the extent that the nature and amount of such Loss is known at such time). The Indemnified Party will furnish promptly to the indemnifying Party copies of all papers and official documents received in respect of any Losses and Third Party Claims.

(d) *Defense, Settlement, Cooperation and Expenses.*

(i) *Control of Defense.* At its option, the indemnifying Party may assume the defense of any Third Party Claim by giving written notice to the Indemnified Party within thirty (30) days after the indemnifying Party's receipt of an Indemnification Claim Notice. The assumption of the defense of a Third Party Claim by the indemnifying Party will not be construed as an acknowledgment that the indemnifying Party is liable to indemnify the Indemnified Party in respect of the Third Party Claim, nor will it constitute a waiver by the indemnifying Party of any defenses it may assert against the Indemnified Party's claim for indemnification. Upon assuming the defense of a Third Party Claim, the indemnifying Party may appoint as lead counsel in the defense of the Third Party Claim any legal counsel selected by the indemnifying Party (the indemnifying Party will consult with the Indemnified Party with respect to such counsel and a possible conflict of interest of such counsel retained by the indemnifying Party). In the event the indemnifying Party assumes the defense of a Third Party Claim, the Indemnified Party will as soon as possible deliver to the indemnifying Party all original notices and documents (including court papers) received by the Indemnified Party in connection with the Third Party Claim. In the event that it is ultimately determined that the indemnifying Party is not obligated to indemnify, defend or hold harmless the Indemnified Party from and against the Third Party Claim, the Indemnified Party will reimburse the indemnifying Party for any and all costs and expenses (including reasonable attorneys' fees and costs of suit) and any Third Party Claims incurred by the indemnifying Party in its defense of the Third Party Claim.

(ii) *Right to Participate in Defense.* Without limiting Section 9.6(d)(i), any Indemnified Party will be entitled to participate in, but not control, the defense of such Third Party Claim and to engage counsel of its choice for such purpose; provided, however, that such engagement will be at the Indemnified Party's own cost and expense unless (i) the indemnifying Party has failed to promptly assume the defense and engage counsel in accordance with Section 9.6(d)(i) (in which case the Indemnified Party will control the defense) or (ii) the interests of the Indemnified Party and the indemnifying Party with respect to such Third Party Claim are sufficiently adverse to prohibit the representation by the same counsel of both Parties under applicable Law, ethical rules or equitable principles, in which case the indemnifying Party will assume one hundred percent (100%) of any such costs and expenses of counsel for the Indemnified Party.

(iii) *Settlement.* With respect to any Third Party Claims that relate solely to the payment of money damages in connection with a Third Party Claim and that will not result in the Indemnified Party's becoming subject to injunctive or other relief or otherwise adversely affecting the business of the Indemnified Party in any manner, and as to which the indemnifying Party will have acknowledged in writing the obligation to indemnify the Indemnified Party hereunder, the indemnifying Party will have the sole right to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss, on such terms as the indemnifying Party, in its sole discretion, will deem appropriate. With respect to all other Losses in connection with Third Party Claims, where the indemnifying Party has assumed the defense of the Third Party Claim in accordance with Section 9.6(d)(i), the indemnifying Party will have authority to agree to the entry of any judgment, enter into any settlement or otherwise dispose of such Loss provided it obtains the prior written consent of the Indemnified Party (such consent not to be unreasonably withheld, delayed or conditioned). The indemnifying Party will not be liable for any settlement or other disposition of a Loss by an Indemnified Party that is reached without the prior written consent of the indemnifying Party. Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, no Indemnified Party will admit any liability with respect to or settle, compromise or discharge, any Third Party Claim without the prior written consent of the indemnifying Party, such consent not to be unreasonably withheld, delayed or conditioned.

(iv) *Cooperation.* Regardless of whether the indemnifying Party chooses to defend or prosecute any Third Party Claim, the Indemnified Party will, and will use Diligent Efforts to cause each other indemnified party to, cooperate in the defense or prosecution thereof and will furnish such records, information and testimony, provide such witnesses and attend such conferences, discovery proceedings, hearings, trials and appeals as may be reasonably requested in connection therewith, at the indemnifying Party's expense. Such cooperation will include access during normal business hours afforded to the indemnifying Party to, and reasonable retention by the Indemnified Party of, records and information that are reasonably relevant to such Third Party Claim, and making indemnified parties and other employees and agents available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and the indemnifying Party will reimburse the Indemnified Party for all its reasonable out-of-pocket costs and expenses in connection therewith.

(v) *Costs and Expenses.* Except as provided above in this Section 9.6(d), the costs and expenses, including attorneys' fees and expenses, incurred by the Indemnified Party in connection with any claim will be reimbursed on a Calendar Quarter basis by the indemnifying Party, without prejudice to the indemnifying Party's right to contest the Indemnified Party's right to indemnification and subject to refund in the event the indemnifying Party is ultimately held not to be obligated to indemnify the Indemnified Party.

9.7 Insurance. Each Party will maintain at its sole cost and expense, an adequate liability insurance or self-insurance program (including product liability insurance) to protect against potential liabilities and risk arising out of activities to be performed under this License Agreement, and any agreement related hereto and upon such terms (including coverages, deductible limits and self-insured retentions) as are customary in the respective industry of such Party for the activities to be conducted by such Party under this License Agreement. Subject to the preceding sentence, such liability insurance or self-insurance program will insure against all types of liability, including personal injury, physical injury or property damage arising out of the manufacture, sale, use, distribution or marketing of Licensed Product. The coverage limits set forth herein will not create any limitation on a Party's liability to the other under this License Agreement.

10. Term and Termination.

10.1 Term.

(a) This License Agreement will commence as of the License Agreement Effective Date and, unless sooner terminated in accordance with the terms hereof or by mutual written consent, will continue on a Licensed Product-by- Licensed Product and a country-by-country basis, until there are no more payments owed to Arcturus in such country (the longest such period of time hereunder, the "Term"). Upon there being no more such payments hereunder in such country, the license contained in Section 2.1 will become irrevocable, perpetual and fully paid up and will remain in effect with respect to such Licensed Product in such country.

(b) If the Target to which this License Agreement relates is chosen by the Parties for co-development under the Co-Development Agreement, this License Agreement will automatically terminate upon the written agreement of the Parties to include such programs under the Co-Development Agreement, in accordance with Section 4.2(a) of the Co- Development Agreement.

(c) The Parties agree that this Agreement and the Co-Development Agreement relate to different projects and, therefore, the validity, term and termination of this Agreement shall be independent from the validity, term and termination of the Co-Development Agreement.

10.2 Termination by Arcturus.

(a) *Breach*. Arcturus will have the right to terminate this License Agreement in full upon delivery of written notice to CureVac in the event of any material breach by CureVac of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by Arcturus to CureVac specifying the nature of the alleged breach.

(b) *Disputed Breach*. If CureVac disputes in good faith the existence or materiality of a breach specified in a notice provided in accordance with Section 10.2(a), and CureVac provides Arcturus notice of such dispute within such [\*\*\*\*\*] period, then Arcturus shall not have the right to terminate this License Agreement under Section 10.2(a) unless and until it is finally determined, in accordance with Section 11.1, that CureVac has materially breached this License Agreement and that CureVac fails to cure such breach within [\*\*\*\*\*] following such decision. It is understood and agreed that during the pendency of such dispute, all of the terms and conditions of this License Agreement shall remain in effect and the Parties shall continue to perform all of their respective obligations hereunder. During the pendency of any such dispute, CureVac shall pay to Arcturus all Milestone Payments and royalty payments set forth herein.

(c) *Patent Challenge.* Except to the extent the following is unenforceable under the Laws of a particular jurisdiction, Arcturus may terminate this License Agreement on a Patent-by-Patent basis upon delivery of [\*\*\*\*\*] prior written notice to CureVac

(i) if CureVac or its Affiliates, individually or in association with any other person or entity, commences a legal action challenging the validity, enforceability or scope of any Arcturus Technology Patents anywhere in the world and does not withdraw or settle such challenge within the [\*\*\*\*\*] cure period; or

(ii) if a sublicensee of CureVac, individually or in association with any other person or entity, commences a legal action challenging the validity, enforceability or scope of any Arcturus Technology Patents anywhere in the world and CureVac does not terminate the corresponding sublicense agreement or such challenge is not withdrawn or settled (by such sublicensee or CureVac) within the [\*\*\*\*\*] cure period.

**10.3** Termination by CureVac; Certain Remedy for Breach.

(a) *Breach.* CureVac will have the right to terminate this License Agreement in full upon delivery of written notice to Arcturus in the event of any material breach by Arcturus of any terms and conditions of this License Agreement, provided that such breach has not been cured within [\*\*\*\*\*] after written notice thereof is given by CureVac to Arcturus specifying the nature of the alleged breach.

(b) *Discretionary Termination.* CureVac will have the right to terminate this License Agreement in full at its discretion for any reason by delivering written notice to Arcturus, such termination to be effective [\*\*\*\*\*] following the date of such notice.

(c) *Maintenance of License.* In the event of a material breach by Arcturus of Sections 2.2(c) or 3.2, if such breach has not been cured within [\*\*\*\*\*] after written notice thereof, CureVac may notify Arcturus in writing that the License Agreement shall remain in full force and effect, provided that any remaining payments to Arcturus pursuant to Sections 4.1, 4.2 and 4.3 following such notification shall be reduced by [\*\*\*\*\*].

**10.4 Rights Upon Bankruptcy.** All rights and licenses granted under or pursuant to this License Agreement by Arcturus or its Affiliates are, and will otherwise be deemed to be, for purposes of Section 365(n) of the U.S. Bankruptcy Code, licenses of right to “intellectual property” as defined under Section 101 of the U.S. Bankruptcy Code. The Parties agree that CureVac and its Affiliates and Sublicensees, as licensees of such rights under this License Agreement, will retain and may fully exercise all of their rights and elections under the U.S. Bankruptcy Code and any foreign counterparts thereto. Without limiting the Parties’ rights under Section 365(n) of the U.S. Bankruptcy Code, if a case under U.S. Bankruptcy Code is commenced by or against a Party, the other Party shall be entitled to a copy of any and all such intellectual property and all embodiments of such intellectual property, and the same, if not in the possession of such other Party, shall be promptly delivered to it (i) before this License Agreement is rejected by or on behalf of the bankrupt Party, within thirty (30) days after the other Party’s written request, unless the bankrupt Party, or its trustee or receiver, elects within thirty (30) days to continue to perform all of its obligations under this License Agreement, or (ii) after any rejection of this License Agreement by or on behalf of the bankrupt Party, if not previously delivered as provided under clause (i) above. All rights of the Parties under this Section 10.4 and under Section 365(n) of the U.S. Bankruptcy Code are in addition to and not in substitution of any and all other rights, powers, and remedies that each Party may have under this License Agreement, under the U.S. Bankruptcy Code, and any other applicable Laws. The non-bankrupt Party shall have the right to perform the obligations of the bankrupt Party hereunder with respect to such intellectual property, but neither such provision nor such performance by the non-bankrupt Party shall release the bankrupt Party from any such obligation or liability for failing to perform it.

**10.5 Effects of Termination.**

(a) Upon termination (but not expiration pursuant to Section 10.1) of this License Agreement for any reason:

(i) *Cessation of Rights.* Except as expressly provided herein, including Sections 8.5, 10.5(a) and as necessary for CureVac to sell off existing inventory as permitted under Section 10.5(iii) below, all rights and licenses granted by Arcturus to CureVac under this License Agreement will terminate. CureVac shall wind down the development (including any clinical trials), manufacture and commercialization of the Licensed Product in compliance with all applicable Laws and at its own cost and expense.

(ii) *Sell Off.* Notwithstanding the termination of CureVac’s licenses and other rights under this License Agreement, CureVac shall retain the right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products, in each case that is intended for distribution, sale or disposition in the Territory, for a period of not more than six (6) months following the date of the effective termination, as though this License Agreement had not been terminated, and such distribution, sale or other disposition shall not constitute infringement of the Patents or other intellectual property or proprietary rights of Arcturus or its Affiliates. CureVac’s right to distribute, sell or otherwise dispose of its existing inventory of the Licensed Products pursuant to this Section 10.5(a)(ii) shall be subject to CureVac’s continuing obligation to pay royalties with respect to the Net Sales.

(b) Upon termination pursuant to Section 10.1(b), Arcturus shall refund to CureVac the Option Exercise Fee (as defined in the Development and Option Agreement), the Milestone Payments already paid by CureVac and all other payments made by CureVac in relation to this License Agreement.

**10.6 Survival.** In addition to the termination consequences set forth in Section 10.5, the following provisions will survive termination or expiration of this License Agreement: Sections 1, 4 (to the extent of any outstanding payments accrued as of the effective date of termination), 5, 8, 9.4, 9.6, 10.5, 10.6 and 11. Termination or expiration of this License Agreement will not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination or expiration nor preclude either Party from pursuing all rights and remedies it may have hereunder or at law or in equity with respect to any breach of this License Agreement nor prejudice either Party's right to obtain performance of any obligation. All other rights and obligations will terminate upon expiration of this License Agreement.

**11. General Provisions.**

**11.1 Dispute Resolution.**

(a) *Disputes.* Disputes arising under or in connection with this License Agreement will be resolved pursuant to this Section 11.1; *provided, however,* that in the event a dispute cannot be resolved without an adjudication of the rights or obligations of a Third Party (other than any CureVac Indemnitees or Arcturus Indemnitees identified in Section 9.6), the dispute procedures set forth Sections 11.1(c) and 11.1(c) will be inapplicable as to such dispute.

(b) *Dispute Escalation.* In the event of a dispute between the Parties, the Parties will first attempt in good faith to resolve such dispute by negotiation and consultation between themselves. In the event that such dispute is not resolved on an informal basis within thirty (30) days, either Party may, by written notice to the other, have such dispute referred to each Party's Chief Executive Officer or his or her designee (who will be a senior executive with the appropriate authority to determine the matter for such party), who will attempt in good faith to resolve such dispute by negotiation and consultation for a thirty (30) day period following receipt of such written notice

(c) *Dispute Resolution.* In the event the Chief Executive Officers of the Parties are not able to resolve such dispute as set forth above, the Parties agree to try to solve such dispute amicably by mediation. The Parties shall conduct a mediation procedure according to the Mediation Rules of the World Intellectual Property Organization (WIPO) in effect on the date of the commencement of the mediation proceedings. The location of the mediation proceedings will be New York City, New York, U.S.. The number of mediators will be one (1). The language of the mediation proceedings will be English. If the dispute has not been settled pursuant to the said rules within sixty (60) days following the filing of a request for mediation or within such other period as the Parties may agree in writing, either Party may submit the dispute to final and binding arbitration. Any dispute relating to the validity performance, construction or interpretation of this License Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in this Section 11.1, shall be submitted to arbitration in accordance with the Arbitration Rules of WIPO in effect on the date of the commencement of the arbitration proceedings. The location of the arbitration proceedings will be New York City, New York, U.S.. The number of arbitrators will be three (3). The language of the arbitration proceeding will be English. The decision of the arbitrators shall be final and binding upon the Parties (absent manifest error on the part of the arbitrator(s)) and enforceable in any court of competent jurisdiction.

**11.2 Relationship of Parties.** Nothing in this License Agreement is intended or will be deemed to constitute a partnership, agency, employer-employee or joint venture relationship between the Parties. No Party will incur any debts or make any commitments for the other, except to the extent, if at all, specifically provided therein. There are no express or implied third party beneficiaries hereunder (except for CureVac Indemnitees and Arcturus Indemnitees for purposes of Section 9.6). For clarity, CureVac does not grant to Arcturus any rights or licenses under this License Agreement to any CureVac technology or intellectual property rights.

**11.3 Compliance with Law.** Each Party will perform or cause to be performed any and all of its obligations or the exercise of any and all of its rights hereunder in good scientific manner and in compliance with all applicable Law.

**11.4 Governing Law.** This License Agreement will be governed by and construed in accordance with the Laws of the State of New York, U.S., without respect to its conflict of Laws rules.

**11.5 Counterparts; Facsimiles.** This License Agreement may be executed in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this License Agreement by either Party will constitute a legal, valid and binding execution and delivery of this License Agreement by such Party.

**11.6 Headings.** All headings in this License Agreement are for convenience only and will not affect the meaning of any provision hereof.

**11.7 Waiver of Rule of Construction.** Each Party has had the opportunity to consult with counsel in connection with the review, drafting and negotiation of this License Agreement. Accordingly, the rule of construction that any ambiguity in this License Agreement will be construed against the drafting party will not apply.

**11.8 Interpretation.** Whenever any provision of this License Agreement uses the term “including” (or “includes”), such term will be deemed to mean “including without limitation” (or “includes without limitations”). “Herein,” “hereby,” “hereunder,” “hereof” and other equivalent words refer to this License Agreement as an entirety and not solely to the particular portion of this License Agreement in which any such word is used. All definitions set forth herein will be deemed applicable whether the words defined are used herein in the singular or the plural. Unless otherwise provided, all references to Sections and Appendices in this License Agreement are to Sections and Appendices of this License Agreement. References to any Sections include Sections and subsections that are part of the related Section.

**11.9 Binding Effect.** This License Agreement will inure to the benefit of and be binding upon the Parties, their Affiliates, and their respective lawful successors and assigns.

**11.10 Assignment.** This License Agreement may not be assigned by either Party, nor may either Party delegate its obligations or otherwise transfer licenses or other rights created by this License Agreement, except as expressly permitted hereunder or otherwise without the prior written consent of the other Party, which consent will not be unreasonably withheld, delayed or conditioned; provided that either Party may assign this License Agreement without such consent to an Affiliate or to its successor in connection with sale of all or substantially all of its assets or business or that portion of its business pertaining to the subject matter of this License Agreement (whether by merger, consolidation or otherwise).

**11.11 Notices.** All notices, requests, demands and other communications required or permitted to be given pursuant to this License Agreement will be in writing and will be deemed to have been duly given upon the date of receipt if delivered by hand, recognized international overnight courier, or registered or certified mail, return receipt requested, postage prepaid or facsimile (and promptly confirmed by personal delivery, registered or certified mail or overnight courier) to the following addresses (or to such address as a Party may subsequently provide by written notice in accordance with this Section 11.11):

Attn: Glen Y. Sato  
Fax: (650) 849-7400

**11.12 Amendment and Waiver.** This License Agreement may be amended, supplemented, or otherwise modified only by means of a written instrument signed by both Parties; provided that any unilateral undertaking or waiver made by one Party in favor of the other will be enforceable if undertaken in a writing signed by the Party to be charged with the undertaking or waiver. Any waiver of any rights or failure to act in a specific instance will relate only to such instance and will not be construed as an agreement to waive any rights or fail to act in any other instance, whether or not similar.

**11.13 Severability.** In the event that any provision of this License Agreement will, for any reason, be held to be invalid or unenforceable in any respect, such invalidity or unenforceability will not affect any other provision hereof, and the Parties will negotiate in good faith to modify the License Agreement to preserve (to the extent possible) their original intent.

**11.14** Entire Agreement. This License Agreement together with the Development and Option Agreement and any other license agreements entered into during the Term pursuant to the Development and Option Agreement are the sole agreement with respect to the subject matter hereof and supersedes all other agreements and understandings between the Parties with respect to same.

**11.15** Force Majeure. Neither Arcturus nor CureVac will be liable for failure of or delay in performing obligations set forth in this License Agreement (other than any obligation to pay monies when due), and neither will be deemed in breach of such obligations, if such failure or delay is due to natural disasters or any causes reasonably beyond the control of Arcturus or CureVac; provided that the Party affected will promptly notify the other of the force majeure condition and will exert reasonable efforts to eliminate, cure or overcome any such causes and to resume performance of its obligations as soon as possible.

## RESTATED AMENDMENT

## TO DEVELOPMENT AND OPTION AGREEMENT

THIS RESTATED AMENDMENT TO DEVELOPMENT AND OPTION AGREEMENT (this "Amendment"), dated as of September 28, 2018 (the "Amendment Restatement Date"), is made by and between CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tübingen, Germany ("CureVac"), and Arcturus Therapeutics Inc., a Delaware corporation with offices at 10628 Science Center Drive #200, San Diego, CA 92121, USA ("Arcturus"). Each of CureVac and Arcturus may be referred to herein as a "Party" or together as the "Parties".

WHEREAS, the Parties are parties to that certain Development and Option Agreement, dated as of January 1, 2018 (the "Development and Option Agreement");

WHEREAS, an amendment to the Development and Option Agreement was executed by the Parties on May 8, 2018 ("Original Amendment"); and

WHEREAS, CureVac and Arcturus desire to amend and restate the Original Amendment in its entirety, effective as of the Amendment Restatement Date.

NOW, THEREFORE, in consideration of the foregoing and the promises and mutual agreements contained in this Amendment, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound, the Parties agree as follows:

SECTION 1. Amendment and Restatement of Original Amendment.

The Original Amendment is hereby amended and restated in its entirety as of the Amendment Restatement Date, and all provisions of, and rights granted and covenants made in the Original Amendment, if and to the extent not restated herein, are hereby waived, released and superseded in their entirety and shall have no further force or effect.

SECTION 2. Irrevocable Offer.

(a) The heading of Article 5 of the Development and Option Agreement is hereby amended and restated in its entirety as follows: "Irrevocable Offer to Licenses" and the Table of Contents is updated accordingly. The heading of Section 5.1 of the Development and Option Agreement is amended and restated in its entirety as follows: "Irrevocable Offer."

(b) Section 5.1(a) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

"(a) Arcturus hereby makes a final, binding irrevocable offer (the "Irrevocable Offer") to CureVac to enter into, on the terms of, and subject to the conditions set forth in, the Exclusive License Agreement or, if the Reserved Target is only available on a non-exclusive basis, the Non-Exclusive License Agreement, on a Reserved Target-by-Target basis, a maximum of [\*\*\*\*\*] under the Arcturus LMD Technology with respect to the development, manufacture and commercialization of Licensed Products containing mRNA Constructs intended to express such Reserved Target in the form of the License Agreement. Upon the execution of this Amendment, the Irrevocable Offer shall remain valid and legally binding on Arcturus and in effect, and the Irrevocable Offer from Arcturus shall be irrevocable and open for acceptance from CureVac for the period commencing on the Effective Date and ending on the expiration of the Term (the "Offer Period")."

(c) Section 5.1(b) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

---

“(b) If, prior to the expiration of the Offer Period, CureVac delivers written notice to Arcturus of its intention to enter into a license for a Reserved Target, which such notice shall set forth the particular Reserved Target which is intended to be expressed by the Licensed Products (each such notice, an “Acceptance Notice”), then upon delivery thereof, for the Reserved Target set forth in such Acceptance Notice, the licenses and all other rights under the applicable License Agreement shall immediately be in effect without the requirement of either Party to execute any further documentation and there shall exist a legal, valid and binding obligation of Arcturus, enforceable against Arcturus in accordance with the terms of the Exclusive License Agreement or, if the Reserved Target set forth in such Acceptance Notice is only available on a non-exclusive basis, the Non-Exclusive License Agreement. A separate Acceptance Notice and Acceptance Fee will be required for each License Agreement with respect to which CureVac accepts the Irrevocable Offer pursuant to this Section 5.1, and CureVac will pay to Arcturus the Acceptance Fee for each such License Agreement as set forth in Section 5.3. In the event that CureVac terminates a license(s) during the Term, the Target(s) subject to the license(s) will be removed from the Reserved Target List and the number of License Agreements for which the Irrevocable Offer exists shall be reduced by one (1) (i.e. the delivery of an Acceptance Notice reduces the total number of License Agreements for which CureVac may accept the Irrevocable Offer by one regardless of whether CureVac elects to continue such License Agreement in effect).”

(d) Section 5.1(c) of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“(c) In the event that CureVac terminates a License Agreement during the Term, the Targets subject to such license(s) will no longer be available as a Target pursuant to this Agreement.”

(e) Section 5.2 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.2 CureVac’s Acceptance of Irrevocable Offer. As soon as practicable following CureVac’s delivery of each Acceptance Notice to Arcturus, CureVac and Arcturus will prepare the appendices to the corresponding License Agreement. The License Agreement shall nevertheless enter into force (including payment obligations of CureVac in accordance with the terms of the License Agreement) upon delivery of the Acceptance Notice by CureVac.”

(f) Section 5.3 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.3 Acceptance Fee. If CureVac delivers an Acceptance Notice for a Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Acceptance Fee of [\*\*\*\*\*] and if CureVac delivers an Acceptance Notice for a Non-Rare Disease Target pursuant to Section 5.1, CureVac shall pay an Acceptance Fee of [\*\*\*\*\*], hereinafter both the “Acceptance Fee”. On the [\*\*\*\*\*] day that it delivers an Acceptance Notice, CureVac shall pay the applicable Acceptance Fee by wire transfer in immediately available funds to the bank account of Arcturus set forth on Schedule 3 (or such other bank account notified in writing to CureVac prior to such date).”

(g) Section 5.4 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“5.4 Co-Development Agreement. For clarification, the selection of any program under the Co-Development Agreement shall not constitute the delivery of an Acceptance Notice in accordance with this Section 5, and, accordingly, no Acceptance Fee will be payable and any paid Acceptance Fee shall be credited against any other payments by CureVac applied first to any outstanding payment obligations to Arcturus, and to the extent any remaining amounts remain creditable, then to the next due future payment obligations.”

(g) Definitions. Each of the following Sections of the Development and Option Agreement are hereby amended and restated in their entirety as “Intentionally Omitted.” : Section 1.35, Section 1.62, Section 1.64, Section 1.65, Section 1.66 and Section 1.67 The following Sections are inserted immediately following Section 1.94 of the Development and Option Agreement:

“1.95 “Irrevocable Offer” has the meaning set forth in Section 5.1(a).

1.96 “Acceptance Notice” has the meaning set forth in Section 5.1(b).

1.97 “Acceptance Fee” has the meaning set forth in Section 5.3.”

(h) Additional Modifications.

(i) In Section 3.1(f) of the Development and Option Agreement, the occurrence of “exercise of an Option and entry into a License Agreement” in the first sentence is hereby replaced with “delivery of an Acceptance Notice and the entering into force of a License Agreement”.

(ii) In Section 3.3(c) of the Development and Option Agreement, the occurrence of “whether to exercise an Option” in the third sentence is hereby replaced with “whether to delivery an Acceptance Notice”.

(iii) In Section 4.2(c)(iii) of the Development and Option Agreement, the occurrence of “option” in the second sentence is hereby replaced with “right”.

(iv) In Section 4.2(d)(ii) of the Development and Option Agreement, the occurrence of “shall be reduced by each exercise of an Option” in the first sentence is hereby replaced with “shall be reduced by each delivery of an Acceptance Notice” and the occurrence of “applying from and after the date of exercise of an Option.” in the first sentence is hereby replaced with “applying from and after the date of an Acceptance Notice.”.

(v) In Section 6.4(c)(ii) of the Development and Option Agreement, the occurrence of “an Option Notice” in the first sentence is hereby replaced with “an Acceptance Notice”.

(vi) In Section 6.4(c)(iii) of the Development and Option Agreement, the occurrence of “to the Options” in the first sentence is hereby replaced with “pursuant to the Irrevocable Offer”.

(vii) In Section 9.2(a)(iv) of the Development and Option Agreement, the occurrence of “the Option Exercise Fee” is hereby replaced with “the Acceptance Fee”.

(viii) In Section 9.2(a) of the Development and Option Agreement, in the sentence immediately following subsection (iv), the occurrence of “or the Options” is hereby replaced with “or the Irrevocable Offers”.

SECTION 3. License Agreements.

(a) “Non-Exclusive License Agreement” means the terms of the Non-Exclusive License Agreement agreed by the Parties, incorporated by reference into the Development and Option Agreement and set forth on Schedule 1-A to this Amendment.

(b) “Exclusive License Agreement” means the terms of the License Agreement agreed by the Parties, incorporated by reference into the Development and Option Agreement and set forth on Schedule 1-B to this Amendment.

SECTION 4. Termination of Security Interest. CureVac acknowledges and agrees that the security interests in, and Liens (as defined in the Original Amendment) on, the Collateral (as defined in the Original Amendment) in favor of CureVac are released and terminated. CureVac shall promptly prepare and file a UCC termination statement in order to evidence the termination of the Liens and security interests granted pursuant to the Original Amendment.

SECTION 5. Additional Expenses. In consideration for the rights granted pursuant to Section 2 of this Amendment, CureVac agrees to perform the Work under the Work Plan as part of which CureVac will fund [\*\*\*\*\*] scientists per year at Arcturus for a period of [\*\*\*\*\*] months at the FTE Costs.

SECTION 6. Targets. In consideration for the termination of the security interests granted to CureVac in the Original Amendment, Arcturus agrees that CureVac will have

(a) the right to select up to [\*\*\*\*\*] Targets at any one time to be placed on the Reserved Target List as exclusive Reserved Targets according to Section 4.2(d)(ii) the Development and Option Agreement and

(b) a total of [\*\*\*\*\*] options, on a Reserved Target-by-Reserved Target basis, to enter into a maximum of [\*\*\*\*\*] licenses under the Arcturus LMD Technology with respect to the development, manufacture and commercialization of Licensed Products containing mRNA Constructs in accordance with Section 5.1 of the Development and Option Agreement.

SECTION 7. Representations and Warranties. Each Party represents and warrants to the other as of the Amendment Restatement Date that (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated, (b) it has the legal right and power to enter into this Amendment, to extend the rights and licenses granted or to be granted to the other in the Development and Option Agreement, and to fully perform its obligations hereunder, (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this Amendment and the performance of its obligations under the Development and Option Agreement (d) this Amendment has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms, and (e) the execution, delivery and performance by a Party of this Amendment and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which such Party is a party or by which it is bound.

SECTION 8. Ratification of Agreement. Except as expressly provided in this Amendment, all of the terms, covenants, and other provisions of the Development and Option Agreement are hereby ratified and confirmed and shall continue to be in full force and effect in accordance with their respective terms. From and after the date hereof, all references to the Development and Option Agreement shall refer to the Development and Option Agreement as amended by this Amendment. Capitalized terms used but not defined in this Amendment shall have the meanings assigned to them in the Development and Option Agreement.

SECTION 9. Governing Law. This Amendment shall be governed by and construed in accordance with the Laws of the State of New York, USA, without respect to its conflict of Laws rules. In the event of a dispute arising out of or relating to this Amendment, the provisions of Section 10.1 of the Development and Option Agreement shall govern the resolution of such dispute.

SECTION 10. Counterparts. This Amendment may be executed and in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this Amendment by either Party will constitute a legal, valid and binding execution and delivery of this Amendment by such Party.

[signature page follows]

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed by their respective duly authorized officers as of the date hereof.

Schedule 3

[\*\*\*\*]

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

THIS THIRD AMENDMENT (this "Third Amendment") to the Development and Option Agreement dated January 1, 2018 (the "Original Agreement"), is entered into by and between CureVac AG, a German stock corporation with offices at Paul-Ehrlich-Strasse 15, 72076 Tubingen, Germany ("CureVac"), and Arcturus Therapeutics Inc., a Delaware corporation with offices at 10628 Science Center Drive #200, San Diego, CA 92121, USA ("Arcturus"); each of CureVac and Arcturus individually a "Party" and together the "Parties" as of July 26, 2019 (the "Third Amendment Date").

## RECITALS

WHEREAS, the Parties have previously amended the Original Agreement by (i) a first amendment dated May 3, 2018 (the "First Amendment") and (ii) a second amendment amending and restating the First Amendment in its entirety dated September 28, 2018 (the "Second Amendment"; the Original Agreement, as amended to the date hereof by the First Amendment and the Second Amendment, being referred to as the "Development and Option Agreement").

WHEREAS, the Parties desire to amend the Development and Option Agreement effective as of the Third Amendment Date.

NOW, THEREFORE, in consideration of the foregoing and the promises and mutual agreements contained in this Third Amendment, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound, the Parties agree as follows:

#### 1. DELETION OF SECTION 5 AND SECTION 6 OF THE SECOND AMENDMENT

- (a) Section 5 of the Second Amendment is hereby deleted in its entirety and shall have no further force and effect. Section 3.2(a) of the Original Agreement shall be restored as to its substance from and after the Third Amendment Date, and, for clarification purposes, is hereby amended and restated as follows:

"(a) **Generally.** Arcturus will perform the Work under the Work Plan, and as part of the Program CureVac will fund up to three (3) scientists per year at Arcturus to perform the Work as defined and in accordance with the Work Plan for a period of up to twenty-four (24) months beginning at the Third Amendment Date at the FTE Costs. The Parties may agree to extend the performance of Work by Arcturus for an additional year."

- (b) Section 6 of the Second Amendment is hereby deleted in its entirety and shall have no further force and effect. Section 4.2(d)(ii) (Maximum Number Reserved Targets) and Section 5.1(a) (Maximum Options) of the Original Agreement are hereby restored with the effect that the maximum number of Reserved Targets and the total number of Options to enter into a maximum number of licenses under the Arcturus LMD Technology are reduced from [\*\*\*\*\*].

#### 2. AMENDMENT OF ARTICLE 9 OF THE DEVELOPMENT AND OPTION AGREEMENT

- (a) Section 9.1(a) and Section 9.1 (b) of the Development and Option Agreement are hereby amended and restated in their entirety as follows:

"(a) This Agreement will commence as of the Effective Date and, unless sooner terminated or extended in accordance with the terms hereof or by mutual written consent, will continue for a period of four (4) years from the Third Amendment Date, (the "Initial Term", as may be extended pursuant to Section 9.1(b), the "Term").

(b) At any time during the Initial Term, CureVac shall have the option to extend the Initial Term for eighteen (18) months, by providing written notice to Arcturus, subject to payment by CureVac to Arcturus of a non-refundable extension fee of one million US dollars (U.S. \$1,000,000), payable within fifteen (15) Business Days after notice of the exercise of such option. If the \$1,000,000 payment is not made within such fifteen (15) Business Day period the Term will be the Initial Term without extension."

(b) Section 9.1(c) of the Development and Option Agreement is hereby amended and restated in its entirety as “Intentionally Omitted”.

(c) Section 9.2, first paragraph of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“(9.2) **Termination by CureVac.**

(a) **Breach, Change of Control.** CureVac will have the right to terminate this Agreement in full or on a Program-by-Program basis upon delivery of written notice to Arcturus in the event of

(i) any material breach by Arcturus

(A) of any terms and conditions of this Agreement, provided that such breach has not been cured within sixty (60) days after written notice thereof is given by CureVac to Arcturus specifying in reasonable detail the nature of the alleged breach; or

(B) in particular the failure of the Trusted Arcturus Employee to send the Target Response Notice within the period provided for in Section 4.2(c)(i), provided that such failure has not been cured neither within a first cure period of five (5) Business Days after written notice thereof is given by CureVac to Arcturus nor within a second cure period of five (5) Business Days after written notice of the lapse of the first cure period is given by CureVac to Arcturus, or

(ii) a Change of Control of Arcturus.”

3. **AMENDMENT OF ARTICLE 4 OF THE OPTION AND DEVELOPMENT AGREEMENT**

Article 4 of the Development and Option Agreement is hereby amended and restated in its entirety as follows:

“**ARTICLE 4**  
**Reserved Targets**”

4.1 **Generally.** CureVac will select the Targets that will be the subject of the Works to be performed as part of a Program from the Reserved Target List. CureVac shall have the right, but not the obligation, to reserve Targets (or replace a Reserved Target with a new Target) in accordance with this Article 4.

4.2 **Restricted Target List.**

(a) **Pre-existing Restrictions.** Arcturus shall ensure that the Trusted Arcturus Employee has access to an updated list of Targets that are subject to Pre-Existing Restrictions at any time (the “**Restricted Target List**”). The Restricted Target List will identify for each Target listed in the Restricted Target List whether the Target is subject to Third Party rights or is under development at Arcturus. If the Target is subject to Third Party rights, the Restricted Target List will identify whether the Pre-Existing Restrictions are exclusive, non-exclusive or co-exclusive. If the Target is under development at Arcturus, Arcturus will provide the Trusted Arcturus Employee with Proof of Concept Data. Arcturus represents, warrants and covenants to CureVac that (i) the Restricted Target List is and will at all times be accurate in accordance with this Section 4.2(a); and (ii) Arcturus will not add any Reserved Targets to the Restricted Target List and will not engage in any research, development or other activities with respect to a Reserved Target or grant to any Third Party any licenses or options under the Arcturus LMD Technology with respect to the then current Reserved Target List that would preclude Arcturus from entering into a License Agreement with respect to such Reserved Target as set forth herein.

**(b) Target Notices.**

From time to time during the Term, if CureVac desires to include a Target as a Reserved Target hereunder, CureVac will notify the Trusted Arcturus Employee in writing of the Targets for potential inclusion on the Reserved Target List, which notice will provide (i) the information on the Target Reservation Request Form attached hereto as **Exhibit 4.2**; and (ii) the identity of each Reserved Target (if any) that CureVac desires to remove as a Reserved Target (each such notice, a "**Target Notice**"). For clarity, the Target Notices shall not include more Targets than the Maximum Targets then available (taking into consideration any removed Targets previously reserved) and shall be deemed to be a request for an exclusive license at the outset unless there is a Pre-Existing Restriction. For clarity, CureVac's rights to enter into a Non-Exclusive License Agreement shall apply only if the Pre-Existing Restriction permits a non-exclusive license right to such proposed Reserved Target.

In addition to the formal Target reservation mechanism described in Section 4.2(b)(i), the Trusted Arcturus Employee will in good faith respond to any interim requests (not to exceed three (3) requests per month) on whether certain Targets can be reserved as Reserved Targets, in order to assist CureVac in planning of development projects. For clarity, the interim requests shall not include more than the Maximum Target then available (taking into consideration any removed Targets previously reserved).

**(c) Target Response Notices.**

(i) The Trusted Arcturus Employee, on behalf of Arcturus, will review each Target Notice provided by CureVac hereunder to determine whether or not any such proposed Target is on the Restricted Target List and if listed, the applicable Pre-Existing Restriction as of the date of such Target Notice. Within ten (10) Business Days of the Trusted Arcturus Employee's receipt of a Target Notice, the Trusted Arcturus Employee will provide CureVac with written notice that includes the information set forth in subsection (c)(ii) and (iii) (each such notice, a "**Target Response Notice**").

If, as of the date of CureVac's Target Notice for a Target, such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Restrictions, then such Target shall not be available to become a Reserved Target. The Target Response Notice issued for such Target will certify to CureVac that such Target is on the Restricted Target List and is listed as being subject to Pre-Existing Restrictions. The Target Response Notice issued for such Target shall identify whether the Target is subject to Third Party rights or is under development at Arcturus. If the Target is subject to Third Party rights, the Target Response Notice shall identify whether the Pre-Existing Restrictions are exclusive, non-exclusive or co-exclusive. If the Target is under development at Arcturus, upon CureVac's request, Arcturus shall provide to CureVac Proof of Concept Data within five (5) Business Days following such request in order to enable CureVac to confirm that the Proof of Concept Data is sufficient for Arcturus to reject the qualification of the Target as Reserved Target.

If, as of the date of CureVac's Target Notice for a Target, such Target is not listed on the Restricted Target List, then such Target will become a Reserved Target and will be added to the Reserved Target List subject to the Concurrent Reserved List Limits set forth in subsection (d) below. To the extent that the Pre-Existing Restriction is non-exclusive, then such Target may be added by CureVac to the Reserved Target List, but CureVac shall only have the right to enter into a Non-Exclusive License Agreement.

(iv) In case of a dispute between the Parties as to whether a Target is eligible to become a Reserved Target, the Parties will involve an independent Third Party qualified scientist mutually agreed upon by both Parties (the "**Auditor**") within ten (10) Business Days as of the date of the Target Response Notice. Promptly upon the Auditor's designation, Arcturus shall submit to the Auditor all documents and materials which are necessary for the Auditor to identify the Pre-Existing Restrictions. The Auditor shall determine whether the Target is eligible to become a Reserved Target in accordance with the applicable provisions of this Agreement. The Auditor's determination shall be binding upon the Parties. The Auditor shall be required to enter into a reasonably acceptable confidentiality agreement and will not share any information provided by Arcturus to CureVac or any Third Party.

(d) **Concurrent Reserved List Limits and Removal of Targets.** The following concurrent reserved list limits will apply to all Reserved Targets ("**Concurrent Reserved List Limits**").

(i) **Reserved Targets and Removal thereof.** CureVac may select Reserved Targets up to the totals allowed for in subparagraph (ii) below, in accordance with the process specified in Sections 4.2(b) and (c). CureVac shall have the right to remove a Target or replace a Target on the Reserved Target List with another Target, in accordance with the process specified in Section 4.2(b), provided (A) the total number of Targets on the Reserved Target List does not exceed the Maximum Targets at any one time; and (B) a newly nominated Target is not on the Restricted Target List. Any abandoned Target(s) revert(s) back to Arcturus.

(ii) **Maximum Number Reserved Targets.** CureVac will have the right to select up to [\*\*\*\*\*] at any one time to be placed on the Reserved Target List as Reserved Targets; provided that the [\*\*\*\*\*] total shall be reduced by each delivery of an Acceptance Notice (the "**Maximum Targets**") (e.g., if [\*\*\*\*\*] License Agreements have been executed, then the total number of Reserved Targets shall be reduced to [\*\*\*\*\*]), with such reduction in the total Targets applying from and after the date of exercise of an Acceptance Notice.

**4.3 Expiration of Pre-Existing Restrictions.** If any Pre-Existing Restrictions identified in a Target Response Notice that precluded Arcturus from granting CureVac a license (whether or not CureVac has elected to designate such Target on the Reserved Target List on a non-exclusive basis subject to the Pre-Existing Restriction) under the Arcturus LMD Technology later expire or otherwise are modified or terminated such that Arcturus is no longer precluded under the terms of the applicable Third Party agreement from granting a license to CureVac with respect to such Target, the Trusted Arcturus Employee will notify CureVac of such event and CureVac will have an exclusive option, for a period of thirty (30) days following delivery of notice to CureVac, to add (or extend its rights) such Target to the Reserved Target List as a Reserved Target in accordance with Section 4.2(c), subject to the Concurrent Reserved List Limits. For clarity, CureVac will at all times thereafter have the right to provide a Target Notice for such Target to the Trusted Arcturus Employee pursuant to Section 4.2(b) but such Target Notice will be subject to any intervening Pre-Existing Restrictions.

**4.4 Trusted Arcturus Employee.** Arcturus shall ensure that the Trusted Arcturus Employee abides by the terms set forth herein. On the Third Amendment Date, (i) Arcturus shall communicate the name, title and contact details of the Trusted Arcturus Employee to CureVac and (ii) Arcturus and CureVac will terminate - if - any existing Escrow Agreement and jointly instruct and permit the Escrow Agent to send the current Reserved Target List to the Trusted Arcturus Employee. Arcturus shall ensure that only the Trusted Arcturus Employee knows the identity of Reserved Targets and that the Trusted Arcturus Employee is bound by obligations of confidentiality obliging the Trusted Arcturus Employee to keep the Reserved Target List and the identity of Reserved Targets confidential. All costs and expenses incurred through the Trusted Arcturus Employee after the Third Amendment Date will be borne by Arcturus. If Arcturus appoints a new Arcturus employee to serve as the Trusted Arcturus Employee after the Third Amendment Date, Arcturus shall promptly notify CureVac of such appointment.

#### 4. FURTHER AMENDMENTS

(a) Section 1.69 of the Development and Option Agreement (Definition of Pre-Existing Restrictions) is hereby amended and restated in its entirety as follows:

(b) "**1.69 Pre-Existing Restrictions**" means, with respect to a Target on the Restricted Target List pursuant to Section 4.2(a), that (i) Arcturus or its Affiliates have granted to a Third Party with respect to such Target a non-exclusive, co-exclusive or an exclusive license or option pursuant to a *bona fide* written agreement that is in effect at the date of the Target Notice by CureVac pursuant to Section 4.2, restricting Arcturus from granting the applicable license to CureVac under the LMD Technology with respect to such Target, or (ii) such Target is under development at Arcturus and Arcturus has completed, at minimum, preclinical *in vivo* Proof of Concept Data with respect to such Target.

(c) Section 1.77 of the Development and Option Agreement (Definition of Reserved Target) is hereby amended and restated in its entirety as follows:

"**1.77 Reserved Target**" means a Target (i) which is included in the Reserved Target List on the Third Amendment Date or (ii) with respect to which CureVac shall have delivered to the Trusted Arcturus Employee a Target Notice and in response thereto the Trusted Arcturus Employee shall have delivered to CureVac a Target Response Notice under Section 4.2(c)(i) for such Target to become a Reserved Target. A Reserved Target that is abandoned or replaced pursuant to Section 4.2 will no longer be deemed a Reserved Target."

(d) The following Sections are inserted immediately following Section 1.97 of the Development and Option Agreement:

**1.98** "Trusted Arcturus Employee" means an employee (not on the C-Level or business development) of Arcturus designated by Arcturus, being the only individual in the Arcturus' organization who knows the CureVac Reservation List, steering the Target Response Notice.

**1.99** "Proof of Concept Data" means any of the following: (i) data for two mRNAs encoding a Target with positive results (i.e. a biological and/or pharmacological effect) in at least one *in vivo* study (i.e. in animals); or (ii) data for two mRNAs encoding a Target demonstrating *in vivo* expression of the encoded Target.

**1.100** "Auditor" has the meaning set forth in Section 4.2(c)(iv).

**5. Disclosure**

The Parties will mutually agree upon a Form 8-K to be filed by Arcturus with the Securities and Exchange Commission to disclose this Third Amendment (the "**Form 8-K**"). Except for the Form 8-K, unless required by applicable law, neither Party will disclose any information relating to the circumstances which have led to the amendment of the Development and Option Agreement or the amendment of the Development and Option Agreement (including the terms of this Third Amendment).

**7. Non-Disparagement**

Neither Party or any of its Affiliates shall make any statements, verbal or written, or cause or encourage others to make any statements, verbal or written, that defame, disparage, or in any way criticize the personal or business reputation, practices, or conduct of, the other Party or its shareholders, directors, officers, employees, or agents, including but not limited to statements made regarding the past relationship and past interactions between the Parties. This prohibition extends to statements, verbal or written, made to anyone, including but not limited to, the news media, investors, potential investors, any board of directors or advisory board of directors, industry analysts, competitors, strategic partners, vendors, employees (past and present), and clients. Any breach of this paragraph shall be a material breach of the Development and Option Agreement. For the avoidance of any doubt, this Section 7 shall not prohibit the disclosure of any factual statements required by applicable Law.

**8. Representations and Warranties**

Each Party represents and warrants to the other as of the Third Amendment Date that (a) it is a corporation duly organized, validly existing, and in good standing under the Laws of the jurisdiction in which it is incorporated, (b) it has the legal right and power to enter into this Third Amendment, to extend the rights and licenses granted or to be granted to the other in the Development and Option Agreement, and to fully perform its obligations hereunder, (c) it has taken all necessary corporate action on its part required to authorize the execution and delivery of this Third Amendment and the performance of its obligations under the Development and Option Agreement (d) this Third Amendment has been duly executed and delivered on behalf of such Party, and constitutes a legal, valid, and binding obligation of such Party that is enforceable against it in accordance with its terms, and (e) the execution, delivery and performance by a Party of this Third Amendment and the consummation of the transactions contemplated hereby will not result in any violation of, conflict with, result in a breach of or constitute a default under any understanding, contract or agreement to which such Party is a party or by which it is bound.

**9. Ratification of Development and Option Agreement**

Except as expressly provided in this Third Amendment, all of the terms, covenants, and other provisions of the Development and Option Agreement are hereby ratified and confirmed and shall continue to be in full force and effect in accordance with their respective terms. From and after the date hereof, all references to the Development and Option Agreement shall refer to the Development and Option Agreement as amended by this Third Amendment. Capitalized terms used but not defined in this Amendment shall have the meanings assigned to them in the Development and Option Agreement.

**10. Governing Law**

This Third Amendment shall be governed by and construed in accordance with the Laws of the State of New York, USA, without respect to its conflict of Laws rules. In the event of a dispute arising out of or relating to this Third Amendment, the provisions of Section 10.1 of the Development and Option Agreement shall govern the resolution of such dispute.

**11. Counterparts**

This Third Amendment may be executed and in one or more counterparts, each of which will be deemed an original, and all of which together will be deemed to be one and the same instrument. Facsimile or PDF execution and delivery of this Third Amendment by either Party will constitute a legal, valid and binding execution and delivery of this Third Amendment by such Party.

*[signature page follows]*

IN WITNESS WHEREOF, the Parties intending to be bound have caused this Third Agreement to be executed by their duly authorized representatives as of the Effective Date.

**Convertible Loan**

between

Mr. Dietmar Hopp, Johann-Jakob-Astor-Str. 57, 69190 Walldorf

- hereinafter also referred to as "LENDER" -

and

CureVac AG, Paul-Ehrlich-Str. 15, 72076 Tübingen

- hereinafter also referred to as "BORROWER" -

**Preamble**

For the purposes of the financing of the business of the BORROWER, the LENDER has granted the BORROWER a loan in an amount of EUR 50 million ("CONVERTIBLE LOAN I") by agreement dated 3rd May 2019 ("AGREEMENT REGARDING A CONVERTIBLE LOAN"). The CONVERTIBLE LOAN I has already been disbursed completely.

The LENDER is willing to grant the BORROWER a further loan in an amount of USD 70 Mio. ("CONVERTIBLE LOAN II") (CONVERTIBLE LOAN I and CONVERTIBLE LOAN II together also the "CONVERTIBLE LOANS" or "LOANS")

The following provisions and conditions shall be applicable for both, the CONVERTIBLE LOAN I and the CONVERTIBLE LOAN II with the effect that the AGREEMENT REGARDING A CONVERTIBLE LOAN I terminates.

Pursuant hereto, the Parties agree as follows:

**1 Granting of the CONVERTIBLE LOAN II**

- 1.1 The LENDER grants the BORROWER another loan with a conversion option in a nominal amount of EUR 63.926.900,00 (equivalent to USD 70 million calculated on the basis of the exchange rate relevant on the date of conclusion of this agreement), the CONVERTIBLE LOAN II
- 1.2 The BORROWER has the right to use the CONVERTIBLE LOAN II in two tranches of EUR 20 million each and one final tranche of EUR 23.926.900,00 until 31 December 2021 if BORROWER's cash balance falls below EUR 15 million.
- 1.3 The LENDER shall pay the respective requested tranche within ten working days upon receipt of the written request of the BORROWER to the account of the BORROWER at Deutsche Bank Stuttgart, IBAN : DE96 6407 0085 0034 6361 00, BIC: DEUTDESS640.

1.4 The LENDER is entitled to assign and transfer its rights and obligations from this agreement in total or in part to company which is directly or indirectly affiliated with the LENDER and/or a member of the family of the LENDER according to Paragraph 15 German Stock Corporation Act (*Aktengesetz - AktG*)

## 2 Interest

The LOANS shall bear interest in the amount of 8.0% p. a. and shall be calculated to the exact date. The interest shall be added to the amount of the LOANS and be due with the LOANS. Compound interest shall not be due.

## 3 Term

The CONVERTIBLE LOANS are granted for an indefinite term.

## 4 Repayment or conversion of Convertible Loans

4.1 The LENDER is entitled to terminate the CONVERTIBLE LOANS at any time in full or in part, however not before 31 December 2021.

4.2 If in the time until 31 December 2021 the BORROWER (i) initiates or concludes the acquisition of a company or a sale or merger with another company of an affiliate, in which the entire business or the majority of the assets of the BORROWER are transferred to, or is acquired or sold or merges with another company or (ii) carries out a capital increase (including the issuance of convertibles), the LENDER is entitled to terminate the CONVERTIBLE LOANS with immediate effect.

4.3 Only in the case of a termination according to Sec. 4.1 and 4.2 (i), the CONVERTIBLE LOANS shall be actually repaid within one month of receipt of the termination letter by the LENDER. In the case of a termination according to Sec. 4.2(ii) the LENDER has rights and obligations according to Sec. 4.5.

4.4 The BORROWER is entitled to terminate the CONVERTIBLE LOANS if the BORROWER executes a cross over financing round in direct or indirect preparation of an IPO.

4.5 To the extent permissible under the existing Investment and Shareholders' Agreement by and between the BORROWER, dievini Hopp BioTech holding GmbH & Co. KG, a company affiliated with the LENDER and all other shareholders of the BORROWER, the LENDER or its legal successor according to Section 1.4 of this agreement after a termination according to Section 4.1 or 4.2 (i) is, instead of its claim to the repayment of the CONVERTIBLE LOANS, entitled to fully or partially contribute his eventual repayment claims (including the claims for payment of interests) in the context of a capital increase of the Borrower as contribution in kind.

If the BORROWER makes use of its termination right according to Section 4.4 and in case of a termination according to Section 4.2 (ii) and to the extent permissible under applicable law as well as the existing Investment and Shareholders' Agreement by and between the BORROWER, dievini Hopp BioTech holding GmbH & Co. KG, a company affiliated with the LENDER and all other shareholders of the BORROWER, the LENDER is obliged to (i) fully contribute his repayment claim (including all payment claims regarding interests) in the context of a capital increase of the BORROWER as contribution in kind or (ii) to contribute an amount equivalent to his repayment claim (including all payment claims regarding interests) in the context of a capital increase of the BORROWER as cash contribution; in case of (ii) the CONVERTIBLE LOANS shall be actually repaid according to Sec. 4.3 first sentence. All conditions of such capital increase shall apply accordingly for the contribution in kind.

4.6. The LENDER and the BORROWER agree that the before mentioned option to contribute the repayment claims does not constitute a commitment of the BORROWER regarding the subscription of new stock, which would be invalid pursuant to § 187 para. 2 German Stock Corporation Act.

## 5 Subordination

5.1 In order to avoid a potential over indebtedness of the BORROWER, the LENDER hereby subordinates its claim of repayment of the CONVERTIBLE LOANS to all existing and future claims of the other creditors of the BORROWER. Repayments of the CONVERTIBLE LOANS shall only be made from future annual net income, net income from winding up or from other net income which exceeds the debts of the BORROWER. The subordinated claim of the LENDER shall be fulfilled only simultaneously and pro rata with the repayment claims of capital contribution by all other shareholders of the BORROWER and together with those claims for which a declaration of subordination has been given. This shall also apply in the case of the BORROWER's insolvency.

5.2 This subordination shall become invalid as soon as and to the extent an over indebtedness of the BORROWER is not any more given or would have not been given without subordination.

## 6 Final provisions

6.1 This agreement fully replaces the AGREEMENT REGARDING A CONVERTIBLE LOAN.

6.2 Insofar as individual provisions of this agreement are or become invalid or unenforceable or this agreement is incomplete, this shall not affect the effectiveness of the remaining provisions of this agreement. Instead of such invalid or unenforceable provisions, such valid provision shall be deemed to be agreed upon as the Parties had foreseeably concluded, had they known of the invalid, unenforceable or omitted provisions at the time of conclusion of this agreement. Insofar as a provision is or becomes invalid as to the scope of performance agreed upon, this scope of performance shall be amended so that it becomes legally permissible.

- 6.3 Changes and modifications to this agreement must be made in writing for these to take effect, insofar as the notarial form is not required. This also applies to the waiver of the written form requirement itself.
- 6.4 Place of jurisdiction for disputes arising from this agreement is – insofar as legally permissible – Mannheim.
- 6.5 The German version of this agreement is authoritative. The English version is a convenience translation for information purposes only.

Certain identified information, indicated by [\*\*\*\*\*] has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

## YALE UNIVERSITY

COLLABORATIVE RESEARCH AGREEMENT

This is a RESEARCH AGREEMENT (the "Agreement") effective July 1<sup>st</sup>, 2019, (the "Effective Date") by and between YALE UNIVERSITY, a non-profit corporation organized and existing under and by virtue of a special charter granted by the General Assembly of the Colony and State of Connecticut (the "University") and Cure Vac AG, a German stock corporation, having its principal offices at Paul-Ehrlich-Strasse 15, 72076 Tubingen, Germany (the "Sponsor").

## WITNESSETH:

WHEREAS, in pursuit of its educational purposes, which include research and training, the University undertakes scholarly, research, and experimental activities in a variety of academic disciplines; and

WHEREAS, the parties wish to undertake a research program in the field of pulmonary disease, as described more fully in Exhibit A, attached hereto; and

WHEREAS, in furtherance of its scholarly, research, and instructional interests, the University is willing to undertake such research upon the terms and conditions set forth below;

NOW, THEREFORE, in consideration of the premises and the mutual covenants herein contained, the parties hereto agree as follows:

1. **Scope of Research.** During the term of this Agreement, the parties shall use reasonable efforts to perform the research program described in Exhibit A, attached hereto and which hereby is incorporated herein (the "Research"). Notwithstanding the foregoing, the parties make no warranties or representations regarding its ability to achieve, nor shall either party be bound hereby to accomplish, any particular research objective or results.

2. **Personnel.**

(a) The Research at the University shall be performed by and under the supervision and direction of [\*\*\*\*\*] while employed by the University, who shall be designated the principal investigator ("Principal Investigator"), together with such additional personnel as may be assigned by the University. The University shall give Sponsor written notice of any change in its Principal Investigator, subject to Sponsor's approval, which shall not unreasonably be withheld.

---

(b) It is understood that the University and the personnel performing the Research hereunder may be involved in other activities and projects which entail pre-existing commitments to other sponsors. The University will use reasonable efforts to avoid conflicts with the terms of this Agreement; however, it is agreed that unless provided to the contrary herein, this Agreement is subject to the University's pre-existing commitments to such other sponsors.

**3. University Policies and Procedures: Reimbursement of Costs.**

3.1 All Research conducted hereunder shall be performed in accordance with established University policies and procedures, including, but not limited to, policies and procedures applicable to research involving human subjects, laboratory animals, and conflicts of interest.

3.2 Reimbursement of Costs.

(a) The Sponsor shall reimburse the University for all direct and indirect costs incurred by the University in connection with the Research, in accordance with the budget set forth as Exhibit B, in the amount of [\*\*\*\*] attached hereto and which hereby is incorporated herein; provided, however, that the University may submit to Sponsor at any time, and Sponsor may at its discretion approve in writing, a revised budget or budgets requesting additional funds. Indirect costs shall be equal to the facilities and administration rate for indirect costs negotiated between the University and the Federal Government.

(b) The Sponsor shall make quarterly advance payments to the University to fund estimated reimbursable costs, as determined in advance by Yale in good faith, it being understood that Yale's estimate is not a guarantee of actual reimbursable costs.

All invoices should be sent to [\*\*\*\*]

Payment terms: [\*\*\*\*]

All checks shall be made payable to Yale University, shall include reference to the Principal Investigator, and shall be sent to:

---

Yale University

[\*\*\*\*\*]

New Haven, CT 06508-1873

Or wired to:

[\*\*\*\*\*]

**4. Materials.**

4.1 Throughout the course of the Research, it may be necessary for University to send to Sponsor, and Sponsor to send to University, samples of biological materials ("Materials"). In such instances, the sending Party will be responsible for packaging and shipping of Materials, with an appropriate method, time and destination to be agreed upon by both Parties. The requesting party will be responsible for the expenses related to packaging and shipping.

4.2 Sponsor Materials: Sponsor retains sole ownership of its Confidential Information, (as defined below), as well as any other Sponsor biological materials, radiopharmaceuticals, study medications, equipment, supplies, or reagents to be used in the Research (which material and any progeny, modifications or derivatives thereof, "Sponsor Materials"). University may not use the Sponsor Materials for any purpose other than the Research, nor may University take, send, or otherwise provide the Sponsor Materials to any third party, except as expressly permitted herein, without the prior written approval of Sponsor.

4.3 University Materials: University owns and will retain sole ownership of University biological materials, radiopharmaceuticals, study medications, equipment, supplies, or reagents to be used in the Research and transferred to Sponsor under this Agreement to be used in the Research (which material and any progeny, modifications or derivatives thereof, "University Materials"). Sponsor may not use the University Materials for any purpose other than the Research as currently provided for in this Agreement, or as agreed to in writing by both parties, nor may Sponsor take, send, or otherwise provide the University Materials to any third party, except as expressly permitted herein, without the prior written approval of University.

---

4.4 By acquiring and using the Materials, both University and Sponsor agree:

- i. the Materials will be used only in the laboratories of Sponsor or University in accordance with this Agreement;
  - ii. all Materials will be received, handled, stored, used and disposed of in compliance with all applicable laws, regulations and guidelines, and in accordance with safe and prudent practices, and will not be administered to human subjects or provided to any third parties;
  - iii. Sponsor and University have adequate systems, procedures and personnel to review and oversee arrangements for the receipt, handling, storage, use and disposal of Materials and all persons involved in receiving, handling, storing, using or disposing of Materials are adequately qualified by training and experience to do so safely and legally;
  - iv. Within [\*\*\*\*] of completion of the Research, or termination or expiration of this Agreement, if earlier, the providing party may request any and all remaining Materials, be returned to the providing party (or destroyed, if the providing party shall so specify, with such destruction confirmed in writing by the receiving party); and
  - v. All Materials transferred in connection with the Research are experimental in nature and shall be used with prudence and appropriate caution, since not all of their characteristics are known. ALL MATERIALS ARE PROVIDED WITHOUT WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED. MATERIALS TRANSFERRED UNDER THIS AGREEMENT WILL NOT BE USED IN HUMANS, INCLUDING FOR PURPOSES OF DIAGNOSTIC TESTING.
-

5. **Research Reports.** The parties shall furnish to each other during the term of this Agreement periodic informal reports regarding the progress of the Research. A final report setting forth the significant research findings shall be jointly prepared by the parties within a reasonable period following the expiration of the term of this Agreement or the effective date of early termination. Such reports shall be held in confidence pending the Principal Investigator's publication or presentation of the project results.

6. **Publication.**

a) Part of the University's mission is to publish and disseminate research results developed under collaborative research projects. Consistent with this Agreement, University, its Principal Investigator and other University employees and/or students may disseminate or publish the Results of the Research (as defined in Section 8(f)) without prior approval by the Sponsor. The University shall provide the Sponsor with a copy of any proposed publication [\*\*\*\*] in advance of submission to third parties. The Sponsor shall determine Whether any of its Confidential Information is included in the proposed publication. The Sponsor may reasonably require that any of its Confidential Information be removed from the proposed publication. The Sponsor may reasonably require that publication be delayed to permit the filing of patent applications pursuant to Section 8. The Sponsor shall make such determinations within [\*\*\*\*] of receipt of the proposed publication. Publication shall not be delayed more than [\*\*\*\*] after receipt of the proposed publication by the Sponsor. The Sponsor at its election shall be entitled to receive an acknowledgment of its sponsorship of the Research in any such publication. Authorship of any publication shall be determined by scientific custom.

b) The University shall have the final authority to determine the scope and content of any publications or presentations made by its students and employees in accordance with the limitations of this section but will consider in good faith Sponsor's comments.

---

7. **Confidential Information.**

a) Confidential Information consists of information that has been reduced to writing and marked "Confidential," or, if disclosed orally, has been reduced to writing and marked "Confidential" within[\*\*\*\*] of oral disclosure. Notwithstanding the foregoing, Confidential Information shall also include the following: Sponsor Materials; University Materials; and Results. Subject to the following exceptions, all Confidential Information of either party disclosed by it to the other party in connection with the Research hereunder will be treated as confidential throughout the term hereof or for [\*\*\*\*] thereafter, whichever is longer. Each party will use reasonable efforts to safeguard the confidentiality of the other party's Confidential Information, and will only use such Confidential Information for the purposes contemplated by this Agreement, and will require its employees, students and associates to adhere to such obligation of confidentiality. The following shall be exceptions to confidentiality:

- (i) information that is previously known by the receiving party, as established by written records;
- (ii) information that is revealed by third parties through no fault of the receiving party;
- (iii) information which is or becomes publicly known through no fault of receiving party;
- (iv) information that is independently developed by the receiving party without the use of the disclosing party's confidential information, as established by written records;
- (v) information that is required by law;

b) Neither party shall knowingly convey Confidential Information that is subject to federal export control restrictions under the EAR or the ITAR without first so disclosing to the other party and providing the other party the opportunity to decline receiving such information.

c) Permitted disclosures. Receiving party may disclose disclosing party's Confidential Information to the extent (and only to the extent), that such disclosure is reasonably necessary in the following instances:

- (i) to subcontractors in order to perform activities under the Research; and
-

(ii) in case of Sponsor, to acquirers or permitted assignees; investment bankers, investors and lenders, including potential acquirers, assignees, investment bankers, and lenders; provided that for any such disclosure, those entities are under obligations of confidentiality and non-use no less restrictive than those of this Section 7.

d) Notwithstanding anything to the contrary in this Agreement, Sponsor shall have the right to disclose the Results of University to third parties under written obligations of confidentiality and non-use that are no less restrictive than those contained in this Agreement, but not to disclose any other University Confidential Information or the identity of University.

**8. Intellectual Property.**

(a) **Definition of Invention.** "Invention" shall mean any discovery, concept or idea, whether or not patentable, conceived or first reduced to practice, in whole or in part, in performance of the Research. For purposes of this Agreement, "Invention" shall also include any software written, created, and utilized in performance of this Agreement.

(b) **Ownership of Inventions.** The University shall own any Invention invented solely by its employees, students, or agents ("University Inventions"). Sponsor shall own any Inventions that are invented solely by Sponsor's employees or agents ("Sponsor Inventions"). Inventions invented jointly by University employees, students or agents and Sponsor employees or agents shall be owned jointly ("Joint Inventions").

---

(c) **Disclosure and Right to Patent Inventions.** The University and Sponsor shall promptly disclose to each other in writing any Invention, and reported to the University's Office of Cooperative Research ("OCR") or Sponsor's Intellectual Property Authority ("IPA") (see Section 11 "Notices"), respectively, and decide whether such Invention was solely or jointly invented. Such disclosure shall be considered Confidential Information of the party that owns such Invention. The University may elect to file and prosecute a patent application on any University Invention described in any such Invention disclosure. Sponsor shall reimburse the University for its documented out-of-pocket expenses incurred in the filing, prosecution, and maintenance of such patent or patent application. University shall make good-faith efforts to provide Sponsor with estimates of such out-of-pocket expenses in advance. Should the University elect not to do so, it shall give Sponsor prompt written notice, and in no event less than [\*\*\*\*\*] prior to any relevant patent office deadlines, so that the Sponsor may at its own cost file and prosecute any such patent application on behalf of the University. The Sponsor shall have the sole right (but not the obligation) to file and prosecute a patent application on any Sponsor Invention. With respect to Joint Inventions, Sponsor, using counsel chosen and paid by Sponsor and reasonably acceptable to University, will assume the lead in the filing, prosecution, and maintenance of patent applications and patents claiming Joint Inventions on behalf of the parties jointly. University shall promptly be provided with copies of all correspondence related to filing, prosecution, and maintenance of patent applications and patents claiming Joint Inventions, and shall be given the opportunity to review and comment on all such patent applications and patents. Unless otherwise agreed, Sponsor shall be responsible for all out-of-pocket patent costs with respect to such Joint Inventions. Should the Sponsor elect not to do file, prosecute, or maintain any patents or patent applications claiming Joint Inventions, it shall give University prompt written notice, and in no event less than [\*\*\*\*\*] prior to any relevant patent office deadlines, so that the University may, at its own cost, file, prosecute, and maintain any such patent application or patent on behalf of both the Sponsor and the University.

(e) **License.** For each Invention and the Results, for University's share of ownership, University shall grant to Sponsor an Exclusive License Agreement, based upon terms as described in Exhibit C. Any such License to Sponsor as provided herein will be granted by a separate license agreement signed by the parties, which shall include, in addition to those terms described in Exhibit C, a retention by University of a royalty-free right, sublicensable to its academic and non-profit research partners, to use the Inventions for teaching, research, or other educational or academic purposes; and (f) indemnification of the University. Each party hereby grants to the other party (and such other party hereby accepts) a non exclusive, non-transferable, cost-free and limited license to use such of the granting party's rights in Inventions and any other intellectual property originating from Principal Investigator (to the extent the University controls and can grant such license) as and to the extent it is necessary or useful for, and only for the purpose of, carrying out such other party's obligations under the Research during the Term.

---

(f) **Data.** The ownership of data generated in the performance of the Research ("Results") shall follow the ownership of Inventions as defined in Section 8. Subject to other provisions of this Agreement, including those pertaining to Confidential Information and intellectual property, each party will have access to the Results and may use such Results for the purposes set out in this Agreement, subject to the appropriate provisions for licensing, confidentiality and publication.

(g) **Tangible research property.** Except for Sponsor Material, University shall retain ownership of tangible property that is developed solely by University's employees, students, and agents, including, but not limited to, prototypes, biogenic materials, samples, lab notebooks graphs, maps, drawings, and documents created or acquired under this Agreement (collectively, "University Tangible Research Property"). Sponsor shall retain ownership of tangible property that is developed solely by Sponsor's employees, students, and agents, including, but not limited to, prototypes, biogenic materials, samples, lab notebooks graphs, maps, drawings, and documents created or acquired under this Agreement (collectively, "Sponsor Tangible Research Property").

(h) **Copyrightable material.** University shall own all right, title and interest in and to any and all copyrights and copyrightable materials, including data and excluding software, that is created solely by University employees, students or agents in performance of this Agreement (collectively "University Copyrights"). Sponsor shall own all right, title and interest in and to any and all copyrights and copyrightable materials, including data, created solely by Sponsor employees or agents in performance of this Agreement (collectively, "Sponsor Copyrights"). University and Sponsor shall jointly own all right, title and interest in and to any and all copyrights and copyrightable materials, including data, created jointly by University employees, students, or agents and Sponsor employees or agents in performance of this Agreement (collectively, "Joint Copyrights"). University shall have the sole right to determine the disposition of University Copyrights, provided that Sponsor shall have option rights, in accordance with Section 8, in computer software and databases developed and delivered under the Research. Sponsor shall have the sole right to determine the disposition of Sponsor Copyrights.

---

(i) **Background IP.** Neither Party shall, by virtue of this Agreement, acquire rights to inventions, copyrights, technical information, or tangible property concurrently created or acquired outside of this Agreement or that are owned by the other Party prior to entering into this Agreement, including any background technology required to practice Inventions, except as set out herein. Such rights may or may not be available for licensing.

**9a. Background Option.**

Subject to the terms and conditions of this Agreement, University hereby grants to Sponsor an exclusive option to negotiate an exclusive or non-exclusive (at the election of Sponsor) worldwide license (with the right to grant sublicenses) with University (the "Background Option") to certain intellectual property, specifically as described in Exhibit D (the "University Background Intellectual Property"). The Option shall commence on the Effective Date and exist fo [\*\*\*\*\*] (the "Option Period"). The field of any such license shall be limited to the use of University Background Intellectual Property for [\*\*\*\*\*].

In consideration for the grant of the Background Option, Sponsor shall reimburse University for all out-of-pocket expenses incurred after the Effective Date in the filing, prosecution, and maintenance of the University Background Intellectual Property. During the Option Period, University will not negotiate with or grant to any third party any rights to the University Background Intellectual Property in the Field, other than to non-profit academic and/or research institutions to make, use and practice the University Background Intellectual Property for research, clinical, teaching or other non-commercial purposes, and not for purposes of commercial development, use, manufacture or distribution. At the end of the Option Period, University shall have no further obligations to Sponsor unless [\*\*\*\*\*] between University and Sponsor.

Upon written notice from Sponsor and during the Option Period, the parties shall enter into good faith negotiations for a license agreement to the University Background Intellectual Property, which shall be based on customary terms and conditions necessary or appropriate for transactions of this type that are mutually acceptable to University and Sponsor. Such terms and conditions may include, but not be limited to, commercially reasonable financial terms, as well as diligence terms that may require monetary as well as reporting obligations.

---

**9b. Ownership of Property.** Title to any equipment purchased or created in the performance of the work funded under this Agreement shall vest in the University. University shall use the equipment for purposes of this agreement while the funded activities are ongoing. During that time, University may make the equipment available for incidental use on other projects or programs if such other use will not interfere with the work under the Agreement. When no longer needed for Agreement activities, University may use the equipment in connection with its other charitable purposes, without need for accounting.

**10. Term and Termination.**

(a) This Agreement shall be effective for the term July 1<sup>st</sup>, 2019 through June 30<sup>th</sup>, 2021, and may be extended thereafter by mutual agreement of the parties in writing (the "Term"); provided, however, that the termination of this Agreement shall not relieve either party of any obligation of such party accrued prior to such termination hereunder.

(b) Notwithstanding the foregoing, this Agreement may be terminated by Sponsor at any time upon [\*\*\*\*\*] advance written notice to University

(c) In the event that Sponsor terminates the Agreement without paying to University the full amount of [\*\*\*\*\*] as described in Section 3, then the obligation to grant the License Agreement in Section 8 shall automatically terminate.

(d) If Sponsor fails to meet any of its material obligations under this Agreement, and does not remedy such failure within [\*\*\*\*\*] after receipt of written notice thereof from University, University shall have the right to terminate this Agreement effective upon provision of written notice thereof to Sponsor.

---

(e) If University fails to meet any of its material obligations under this Agreement, and does not remedy such failure within[\*\*\*\*\*] after receipt of written notice thereof from Sponsor, Sponsor shall have the right to terminate this Agreement effective upon provision of written notice thereof to University. In this case the obligation to grant licenses under Subsection 8 (e) shall survive such termination.

11. **Notices.** Any notices given under this Agreement shall be in writing and shall be deemed delivered when sent by first-class mail, postage prepaid, addressed to the parties as follows (or at such other addresses as the parties may notify each other in writing):

**Yale University**

New Haven, CT 06520-8327  
Attn: [\*\*\*\*\*]

12. **Use of Name.** Neither party shall employ or use the name of the other party in any promotional materials or advertising without the prior express written permission of the other party.

13. **Relationship of the Parties.** The relationship of Sponsor and Institution established by this Agreement is that of independent contractors. Nothing in this Agreement shall be construed to create a relationship of employment or agency, nor shall either party's employees, servants, agents, or representatives be considered the employees, servants, agents, or representatives of the other. Nothing in this Agreement shall be construed to constitute the parties as partners or joint venturers, or allow either of the parties to create or assume any obligation on behalf of the other party.

---

14. **Indemnification.** The Sponsor shall therefore defend, indemnify and hold harmless University, the Principal Investigator, and any of University's faculty, students, employees, trustees, officers, affiliates, and agents (hereinafter referred to collectively as the "Indemnified Persons") from and against any and all third party claims, lawsuits, and/or losses, damages, costs or expenses (including attorneys' fees) arising thereunder, which the Indemnified Persons may hereafter incur, or be required to pay, based on or arising out of Sponsor's use of the Research or any University Invention, University Copyright, University Materials, or Results unless the third party claim was caused by gross negligence or willful misconduct of University. University shall notify Sponsor upon learning of the institution or threatened institution of any such third party claims, lawsuits, and/or losses, damages, costs and expenses arising thereunder, and University shall cooperate with Sponsor in every proper way in the defense or settlement thereof at Sponsor's request and expense. Sponsor shall not dispose or settle any claim admitting liability on the part of the University without University's prior written consent.

15. **NO WARRANTIES.** NEITHER PARTY MAKES ANY WARRANTIES EITHER EXPRESS OR IMPLIED, AS TO ANY MATTER, INCLUDING, WITHOUT LIMITATION, THE RESULTS OF THE RESEARCH OR ANY INVENTIONS OR PRODUCT, TANGIBLE OR INTANGIBLE, CONCEIVED, DISCOVERED, OR DEVELOPED UNDER THIS AGREEMENT; OR THE OWNERSHIP, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE OF THE RESEARCH RESULTS OR OF ANY SUCH INVENTION OR PRODUCT. Neither party shall be liable for any indirect or consequential damages or lost profits suffered by the other party or by any Licensee or any others resulting from the use of the research results, including any invention, program, or product.

---

16. **Export Controls.** The University complies with all applicable laws and regulations, including, where applicable, federal export control regulations. Many of the University employees (faculty and staff) and students are residents of foreign countries, including individuals who may work on this contract and/or have access to information conveyed to the University pursuant hereto. The University does not screen its employees or students based on nationality. In most situations, the University relies on the fundamental research exclusion from export control laws, but makes no representation as to whether Sponsor's conveyance of information or material to the University pursuant hereto would be covered by the export control laws. Each party agrees that before knowingly providing the other with export-controlled materials or data, it will provide written notice, including a description of the materials or data, and, if known, the appropriate ECCN or MCL designation. No such materials or data shall knowingly be shared without prior written approval.

17. **Force Majeure.** Neither Party shall be liable for any failure to perform as required by this Agreement, to the extent such failure to perform is caused by any reason beyond the University's control, or by reason of any of the following: labor disturbances or disputes of any kind, accidents, failure of any required governmental approval, civil disorders, acts of aggression, acts of God, energy or other conservation measures, failure of utilities, mechanical breakdowns, material shortages, disease, or similar occurrences.

18. **Assignment.** Neither the University nor the Sponsor shall assign this Agreement to any other person without the prior written consent of the other party, which consent shall not unreasonably be withheld, conditioned or delayed, provided, that Sponsor can assign this Agreement without the prior written consent of University (i) to an Affiliate or (ii) to a third party in connection with the sale or transfer of substantially all of its assets with respect to the subject matter of this Agreement. Any permitted assignee shall assume all obligations of its assignor under this Agreement. This Agreement and the rights granted in this Agreement shall be binding upon and shall inure to the benefit of Sponsor, University and their respective successors and permitted assigns.

---

19. **Severability.** In the event that a court of competent jurisdiction holds any provision of this Agreement to be invalid, such holding shall have no effect on the remaining provisions of this Agreement, and they shall continue in full force and effect.

20. **Entire Agreement: Amendments.** This Agreement and the Exhibits hereto contain the entire agreement between the parties with respect to the subject matter hereof, and supersedes any prior or contemporaneous understanding or written or oral agreements with respect thereto, including, but not limited to, the Confidential Disclosure Agreement effective June 12, 2018 to the extent it relates to the subject matter hereof. No amendments or modifications to this Agreement shall be effective unless made in writing and signed by authorized representatives of both parties.

21. **Similar Research.** Nothing in this Agreement shall be construed to limit the freedom of the University or of its researchers who are not participants under this Agreement, from engaging in similar research made under other grants, contracts or agreements with parties other than the Sponsor.

22. **Governing Law.** This Agreement shall be governed by and construed in accordance with the laws of the State of Connecticut, without regard to provisions concerning conflict of laws. In the event of any controversy or claim arising out of or relating to any provision of this Agreement, the parties shall first try to settle those conflicts amicably between themselves. Each party hereby irrevocably consents that any legal action or proceeding under, arising out of or in any manner relating to this Agreement shall be brought in any state or federal court of competent jurisdiction located in the State of Connecticut.

23. **Survival.** Sections 4 to 24 shall survive any termination or expiration of the Agreement.

---

24. **Counterparts; Facsimile.** This Agreement may be executed in counterparts and delivered by facsimile with the same effect as an original. In the event a complete copy of this Agreement or any signature is delivered by an e-mail which contains a portable document format (.pdf) file of an executed signature page, such executed signature page shall create a valid and binding obligation of the party executing it (or on whose behalf such signature page is executed) with the same force and effect as if such executed signature page were an original thereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement by their duly authorized officers or representatives.

Exhibit C

OCR

Title: [\*\*\*\*\*]

Field &  
Licensed  
Territory

Field: [\*\*\*\*\*]  
Territory: [\*\*\*\*\*]

Licensee

Curevac

Licensed  
Patents

Shall mean the United States or foreign patent application(s) and patents(s) of University listed in Appendix A of the Exclusive License Agreement, together with any continuations, divisionals, and continuations-in-part, to the extent the claims of any such patent or patent application are directed to subject matter specifically described in the patent applications listed on Appendix A; any reissues, re-examinations, or extensions thereof, or substitutes therefor; and the relevant international equivalents of any of the foregoing.

Valid Claim

Shall mean an issued or unexpired claim of a LICENSED PATENT so long as such claim shall not have been irrevocably abandoned or declared to be invalid in a non-appealable or non-appealed decision of a court or other authority or competent jurisdiction through no fault or cause of LICENSEE. The term "Valid Claim" shall also include a claim of a pending patent application which has not been pending for a period of more than [\*\*\*\*\*] from the priority date or the earliest filing date of that patent application, provided that if a claim in a patent application that has been pending for more than [\*\*\*\*\*] should subsequently issue, it shall become a Valid Claim on the date of allowance.

Licensed  
Products

Shall mean:

(a) [\*\*\*\*\*] product (including any apparatus or kit) or component part thereof, if the manufacture, use, sale, import, export or practice thereof is claimed by a VALID CLAIM of a LICENSED PATENT.; or (b) [\*\*\*\*\*] product for which the discovery development manufacture use, or sale utilized [\*\*\*\*\*] in whole or in part (as defined in the Collaboration Agreement)

---

**Term**

The term of the License shall commence on the EFFECTIVE DATE and shall remain in full force on a country-by-country and Licensed Product-by-Licensed Product basis, for the duration of the Royalty Term for such Licensed Product for such country, unless terminated earlier. Upon expiry, the License for such Licensed Product and country shall become fully paid up.

**Royalty Term**

Royalties are payable on a Licensed Product-by-Licensed Product and a country-by-country basis for the last to occur of:

- (a) The expiry of the last to expire Valid Claim that covers such Licensed Patent in such country;
- (b) Ten (10) years after the First Commercial Sale of such Licensed Product in such country.

**License Grant**

Exclusive with the right to sublicense (in multiple tiers) license, subject to the reservation of rights by YALE described below, under the LICENSED PATENTS, and the INVENTIONS and the RESULTS owned by University, to make, have made, research and/or develop, have researched and/or developed, use, have used, offer to sell, have offered to sell, sell, have sold, import and have imported, export, or practice LICENSED PRODUCTS within the FIELD in the LICENSED TERRITORY (the "LICENSE").

The LICENSE is expressly made subject to YALE's reservation of the right, on behalf of itself and its sublicensed non-profit academic and/or research institutions, to make, use and practice the LICENSED PATENTS, INVENTIONS and RESULTS owned by University, for research, clinical, teaching or other noncommercial purposes, and not for purposes of commercial development, use, manufacture or distribution.

**Consideration**

In addition to the royalty payments set out below for the grant of the License, LICENSEE shall pay the following amounts to Yale:

---

- Milestones** LICENSEE shall pay the following milestone payments to YALE for the first LICENSED PRODUCT developed by LICENSEE, SUBLICENSEE, or AFFILIATES to achieve a milestone event:
- a) [\*\*\*\*\*]
  - b) [\*\*\*\*\*]
  - c) [\*\*\*\*\*]
  - d) [\*\*\*\*\*]

The total amount that could be due by Licensee upon all such milestone events for any and all Licensed Products in any and all countries would not exceed \$2,650,000.

<b>License Maintenance Fee ("LMF")</b>	Beginning on the first (1st) anniversary of the Effective Date of the Exclusive License and until the first commercial sale of any Licensed Product	LMF
	[*****]	[*****]
	[*****]	[*****]
	[*****]	[*****]
	[*****]	[*****]

**Royalties on Net Sales** During the ROYALTY TERM, as further consideration for the LICENSE, LICENSEE shall pay to YALE an earned royalty of [\*\*\*\*\*] on worldwide cumulative NET SALES of LICENSED PRODUCTS covered by VALID CLAIM of a LICENSED PATENT by LICENSEE or its SUBLICENSEES or AFFILIATES ("EARNED ROYALTY"). For LICENSED PRODUCTS not covered by a Valid Claim but which utilized the University Results, the royalty rate shall be [\*\*\*\*\*], such royalty shall be payable for ten (10) years after the first commercial sale of such Licensed Product in such country.

**Diligence**

**I. Product Development Diligence:**

LICENSEE shall use Commercial Reasonable Efforts within [\*\*\*\*\*] after the EFFECTIVE DATE of this Agreement, to begin to implement the PLAN at its sole expense and thereafter to fully implement the PLAN and to commercialize and develop markets for the LICENSED PRODUCTS.

**Other Terms**

As defined in full license agreement mutually agreed by duly authorized representatives of both parties, including, but not limited to, definitions, provisions addressing indemnification and insurance, representations, warranties, patent prosecution, patent challenges, sublicenses, equity, confidentiality, sublicense protection, termination and consequences, termination right without cause for Cure Vac.

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

## SPONSORED RESEARCH AGREEMENT

This Sponsored Research Agreement ("Agreement") is made as of the 15<sup>TH</sup> day of March 2019, ("Effective Date"), between Cure Vac AG, a German stock corporation, having a principal place of business at Paul-Ehrlich-Strasse 15, 72076 Tubingen, Germany ("Sponsor") and The Schepens Eye Research Institute, Inc., ("SERI") a not-for-profit Massachusetts corporation, having a principal place of business at 20 Staniford St., Boston, MA 02114 and the Massachusetts Eye and Ear Infirmary ("MEET") having a principal place of business at 243 Charles Street, Boston, MA 02114 (SERI and MEEI collectively "Institute"), each referred to herein individually as a "Party" and collectively as the "Parties."

## RECITALS

Institute is a center for research and education which performs scientific research and training. Sponsor desires to support research in the field of retinal / ophthalmic diseases. The Sponsored Research contemplated herein is anticipated to be of mutual interest and benefit to Institute and Sponsor, and to further the research, patient care and educational goals of Institute.

For good and valuable consideration, the sufficiency of which is hereby acknowledged, the Parties hereby agree as follows:

I. Certain Definitions. As used in this Agreement, the following terms shall have the following meanings.

1.1 "Affiliate" with respect to either Party shall mean any corporation or other legal entity other than that Party in whatever country organized, controlling, controlled by or under common control with that Party. The term "control" shall mean the power, direct or indirect, to elect or appoint more than fifty percent (50%) of the directors or trustees, or to cause direction of management and policies, whether through the ownership of voting securities, by contract or otherwise. Regarding Sponsor, Affiliate shall not include Mr. Hopp and dievini Hopp BioTech holding GmbH & Co. KG and/or any other entity controlled by Mr. Hopp and/or dievini Hopp BioTech holding GmbH & Co. KG.

1.2 "Background Option" as defined in Section 10.1 below.

1.3 "Budget" shall mean the budget for the Sponsored Research attached hereto as Appendix B.

1.4 "Confidential Information" as defined in Section 7.1 of this Agreement.

1.5 "Discloser" as defined in Section 7 of this Agreement.

1.6 "Institute Indemnitee" as defined in Section 12(b) of this Agreement.

- 1.7 "Invention" shall mean any new and useful discovery conceived and/or reduced to practice, constructively or actually, in the performance of Sponsored Research during the Term in which Institute has rights by virtue of sole or joint inventorship by an Investigator and/or Sponsor has rights by virtue of sole or joint inventorship by a Sponsor Investigator.
- 1.8 "Investigator" shall mean the Principal Investigator, or any other staff member, employee, or student of Institute who shall participate in Sponsored Research under the direction of the Principal Investigator.
- 1.9 "Joint Inventions" as defined in Section 9.2. below.
- 1.10 "Option" as defined in Section 10.1. below.
- 1.11 "Optioned Invention" as defined in Section 9.3 below.
- 1.12 "Option Period" as defined in Section 10.1 below.
- 1.13 "Patent Costs" as defined in Section 9.3. below.
- 1.14 "Patent Right" shall mean any United States or foreign patent application that describes and claims an Invention, or the equivalent of such application, including any division or continuation (but not including any continuation-in-part), or any Letters Patent or the equivalent thereof issuing thereon, or reissue, reexamination or extension thereof.
- 1.15 "Principal Investigator" shall mean [\*\*\*\*\*], under whose direction the Sponsored Research shall be conducted, or any substitute mutually agreed upon by Institute and Sponsor in accordance with Section 3.2.
- 1.16 "Recipient" as defined in Section 7 of this Agreement.
- 1.17 "Research Information" shall mean any research results produced by the Investigators in the performance of the Sponsored Research.
- 1.18 "Background Technology License" as defined in Section 3.3.
- 1.19 "Research Plan" shall mean the plan of research attached hereto as Appendix A. which shall be updated by the parties from time to time, provided that any changes or updates to the Research Plan shall be made through a mutually agreed signed amendment in accordance with Section 17.4
- 1.20 "Review Period" as defined in Section 8.1 below.
- 1.21 "Sponsor Material" as defined in Section 6 below.
- 1.22 "Sponsor Personnel" as defined in Section 9.1 below.

- 1.23 "Sponsored Research" shall mean research funded by Sponsor to be conducted by Principal Investigator and Sponsor Investigators in accordance with the Research Plan during the Term.
- 1.24 "Sponsor Investigators" shall mean the Sponsor Principal Investigator and any other employees, agents, or subcontractors of Sponsor who shall participate in Sponsored Research under the direction of the Sponsor Principal Investigator.
- 1.25 "Sponsor Principal Investigator" shall mean [\*\*\*\*\*] under whose direction the Sponsored Research at Sponsor site shall be conducted.
- 1.26 "Sponsor Research Information" shall mean any research results produced solely by the Sponsor Investigators in the performance of the Sponsored Research relating to [\*\*\*\*\*]
2. Term. The term of this Agreement shall be two (2) year(s) from the Effective Date (the "Term"), unless earlier terminated by either Party as set forth in Section 11 or extended in a writing signed by authorized representatives of both Parties.
3. Sponsored Research.
- 3.1 Performance. Subject to the terms of this Agreement, Institute through Principal Investigator, agrees to perform the Sponsored Research in accordance with Institute activities as identified in the Research Plan. Subject to the terms of this Agreement, Sponsor through Sponsor Principal Investigator, agrees to perform the Sponsored Research in accordance with Sponsor activities as identified in the Research Plan. Any changes in the scope of the Sponsored Research shall be set forth in writing and approved by both Parties. The research activities performed under this Agreement constitutes a collaboration between the Parties and as such, this Agreement shall constitute a "joint research agreement" in compliance with the federal Cooperative Research and Technology Enhancement (CREATE) Act of 2004.
- 3.2 Principal Investigator. If the Principal Investigator ceases to serve in such role during the Term, Institute shall promptly notify Sponsor. Institute may name a substitute principal investigator (who shall thereafter be referred to as Principal Investigator for purposes of this Agreement), subject to the approval of Sponsor, which approval may be withheld in Sponsor's sole discretion. In the event the Parties are unable to agree upon an alternative Institute researcher who will be the Principal Investigator for the remainder of the Term, the Parties may mutually terminate this Agreement in accordance with Section 11.3.
- 3.3 Background Technology License. All rights and title in and to any and all pre-existing inventions, discoveries, data, chemical entities, materials developed or controlled by either Party prior to the Effective Date or during the Term, but not as a result of, in connection with or otherwise related to the Sponsored Research (collectively, the "Background Technology"), whether or not patentable, shall reside with the owner thereof and, except as otherwise set forth herein, such ownership and rights thereto shall not be affected by the Sponsored Research or a Party's performance of its obligations hereunder. To the extent that each Party's Background Technology is available for non-exclusive licensing, each Party grants the other Party a limited right to use any of its rights in such Background Technology and Inventions that is necessary or useful for such other Party to conduct the Sponsored Research solely for the direct performance of the Sponsored Research by such other Party during the Term.

4. Research Information: Reporting Requirements.

4.1 Use of Research Information. Sponsor shall have the right to use Research Information to the extent that such use (a) does not pre-empt Investigators' publication or public disclosure of Research Information and (b) is not covered by any Institute intellectual property rights, including but not limited to published patent applications, patents, copyrights, and/or Patent Rights which have not been expressly licensed to Sponsor. Sponsor Research Information shall be considered Confidential Information of Sponsor. Institute shall have the right to use Sponsor Research Information for internal research purposes only.

4.2 Reports. Subject to the confidentiality provisions of Section 7, (a) Institute shall provide to Sponsor disclosures of Inventions in accordance with Section 9, and Institute, through Principal Investigator, shall provide to Sponsor a final written report containing Research Information within [\*\*\*\*\*] after termination or expiration of this Agreement.

5. Payments. Sponsor shall pay Institute a total of one million dollars in United States dollars (U.S. \$1,000,000.00) by check or wire transfer as set forth below in support of the Sponsored Research, as detailed in the Budget attached hereto as Appendix B.

5.1 Payments shall be due within [\*\*\*\*\*]. Payments to the Institute shall reference the Agreement Number set forth in the heading of this Agreement and shall be made as follows:

[\*\*\*\*\*]

5.2 SERI Payment by check to *The Schepens Eye Research Institute* shall be drawn on a United States bank and made payable to "The Schepens Eye Research Institute, Inc." and shall be sent to:

The Schepens Eye Research Institute, Inc.  
20 Staniford Street  
Boston, MA 02114  
[\*\*\*\*\*]

Payment by wire transfer to *The Schepens Eye Research Institute* shall be made as follows:

[\*\*\*\*\*]

5.3 Institute invoices shall be sent via Email to Sponsor at the following email address: [\*\*\*\*\*]

Cure Vac AG  
Paul-Ehrlich-Strasse 15  
72076 Tubingen, Germany  
Attention: [\*\*\*\*\*], Director Accounting  
[\*\*\*\*\*]

Institute shall not be obligated to expend funds in excess of those provided under this Agreement to conduct the Sponsored Research.

6. Sponsor Materials/Equipment. It is understood by the parties that Sponsor will use commercially reasonable efforts to supply to Institute the following material: [\*\*\*\*\*] as further described or updated in Appendix A by a mutually agreed signed amendment in accordance with Section 17.4, which material includes any progeny, modifications or derivatives thereof, (the "Sponsor Material"). The Parties acknowledge that Institute does not intend to make modifications or derivatives of the Sponsor Material

Institute will: (i) use the Sponsor Materials only in accordance with the Research Plan as set forth in Appendix A and otherwise in accordance with the terms and conditions of this Agreement, and only at Institute laboratories located at the address given above; (ii) not use the Sponsor Materials in human subjects, in clinical trials, or for diagnostic purposes involving human subjects, or for any animal studies except as expressly provided for in Appendix A; and (iii) not reverse engineer or chemically analyze the Sponsor Materials except as expressly provided for (if at all) in Appendix A.

Except with the prior written consent of Sponsor, Institute will not distribute or otherwise allow the release of Sponsor Materials to any third party. The Sponsor Materials will remain the sole property of Sponsor and will be used by Institute in compliance with all applicable laws and only to perform activities set forth in Appendix A. Institute will use the Sponsor Materials with prudence and appropriate caution in any experimental work because not all of their characteristics may be known.

Upon completion of the Research Plan, or termination or expiration of this Agreement if earlier, any and all remaining Sponsor Materials will, within [\*\*\*\*\*]; after such event, be returned to Sponsor (or destroyed, if Sponsor shall so specify, with such destruction confirmed in writing to Sponsor by Institute).

The provision of Sponsor Materials hereunder will not constitute any grant, option or license to or under such material, or any patents or know-how of Sponsor, except as expressly set forth herein.

7. **Confidential Information.** It is anticipated that in the performance of the Sponsored Research each Party (as applicable, each a "Discloser") is likely to disclose to the other Party (as applicable, each a "Recipient") certain information that the Discloser considers valuable, proprietary and confidential.

7.1 **Definition of Confidential Information.** "Confidential Information" as used in this Agreement shall mean any information, including but not limited to data, techniques, protocols or results, or business, financial, commercial or technical information, disclosed by Discloser to Recipient which is reasonably necessary for performance, under this Agreement and is identified as confidential at the time of disclosure. If such information is disclosed in non-tangible form (including without limitation orally or visually), it must be identified as confidential at the time of disclosure and summarized by Discloser with specificity in a writing marked "Confidential" and given to the Recipient within [\*\*\*\*\*] after such disclosure. The Parties acknowledge and agree that any information concerning any Invention disclosed by one Party to the other Party under Section 9 of this Agreement shall be the Discloser's Confidential Information, even if such Invention information is not specifically identified as confidential at the time of its disclosure.

7.2 **Exclusions.** "Confidential Information" under this Agreement shall not include any information to the extent (i) it is or becomes publicly available through no wrongful act of Recipient; (ii) it was known by Recipient prior to disclosure by Discloser, as evidenced by tangible records; (iii) it becomes known to Recipient after disclosure from a third party having an apparent bona fide right to disclose it; (iv) it is independently developed or discovered by Recipient without use of Discloser's Confidential Information, as evidenced by tangible records; or (v) it is disclosed to another party by Discloser without restriction on further disclosure. The obligations of confidentiality and non-use set forth in this Section 7 shall not apply with respect to any information that Recipient is required to disclose by applicable law, court order or other valid legal process provided Recipient promptly notifies Discloser prior to such required disclosure, discloses such information only to the extent so required, and cooperates reasonably with Discloser's efforts to contest or limit the scope of such disclosure.

7.3 **Permitted Use of Confidential Information.** Except as may be otherwise specified in a separate definitive written agreement negotiated and executed by the Parties, each Recipient shall have the right to, and agrees that it will, use Discloser's Confidential Information solely for the purposes of (i) fulfilling its obligations under this Agreement, and (ii) evaluating Inventions and filing patent applications as described in Section 9 of this Agreement.

7.4 Restrictions on Confidential Information. Subject to Section 8, for a period of [\*\*\*\*\*] after receipt of Discloser's Confidential Information, each Recipient agrees that: (i) it will not use such Confidential Information for any purpose other than as specified herein, including without limitation for its own benefit or the benefit of any other person or entity; and (ii) it will use reasonable efforts (but no less than the efforts used to protect its own confidential and/or proprietary information of a similar nature) not to disclose such Confidential Information to any other person or entity except as expressly permitted hereunder. Recipient may, however, disclose Discloser's Confidential Information only on a need-to-know basis to its and its Affiliates' employees, staff members and agents ("Receiving Individuals") who are directly involved in the performance of the Sponsored Research and who are informed of the confidential nature of such information, provided Recipient shall be responsible for compliance by Receiving Individuals with the terms of this Agreement and any breach thereof. The Parties do not intend for any individually identifiable health information to be disclosed by Institute to Sponsor in the performance of the Sponsored Research, however, if any such individually identifiable health information is disclosed to Sponsor under the Research Plan Sponsor shall keep such information confidential indefinitely.

Notwithstanding anything to the contrary in this Agreement, Cure Vac shall have the right to disclose the Research Information under obligations of confidentiality and non-use that are reasonably in conformity with those of this Agreement to third parties, but not to disclose any other Institute Confidential Information or the identity of Institute.

7.5 Ownership and Disposition. All Confidential Information disclosed pursuant to this Agreement shall be and remain the property of the Discloser. Upon expiration or termination of this Agreement, if requested by Discloser and subject to any rights expressly granted under this Agreement, Recipient shall return or destroy at Discloser's discretion all of Discloser's Confidential Information received in tangible form, provided that Recipient shall be entitled to keep one copy of such Confidential Information in a secure location solely for the purpose of determining Recipient's legal obligations hereunder.

7.6 Right to Disclose. Each Discloser represents that to the best of its knowledge it has the right to disclose to each Recipient all of Discloser's Confidential Information that will be disclosed hereunder. Each Party reserves the right to disclose its own Confidential Information to any party at any time.

8. Publication. Recognizing Institute's and Investigators' desire to publicly present and publish Research Information, the Parties agree that Institute and Investigators shall have the right to publicly disclose Research Information in accordance with this Section 8.

8.1 Review by Sponsor. Principal Investigator shall provide to Sponsor for prior review a draft of any manuscript, abstract or presentation which first publicly discloses Research Information ("Disclosure"). Within [\*\*\*\*\*] of receipt of such a manuscript, or [\*\*\*\*\*] of receipt of such an abstract or presentation ("Review Period"), Sponsor shall notify Principal Investigator of any Sponsor Confidential Information contained in such Disclosure. Principal Investigator shall delete any information in such Disclosure that Sponsor has identified within the Review Period as Sponsor's Confidential Information, except to the extent that such Confidential Information is required for meaningful, scientific publication. Subject to Section 8.2 below, at the end of such Review Period, as applicable, Principal Investigator shall have the right to submit such Disclosure without further delay.

8.2 Delay of Publication for Patent Filings. If Sponsor reasonably determines that such Disclosure reveals a potentially patentable Invention to which Sponsor has rights pursuant to Sections 9 and 10 of this Agreement, Sponsor shall so notify Institute in writing during the Review Period. In such case, Principal Investigator shall delay submission of such Disclosure until the earliest to occur of the following: (i) a patent application has been filed with respect to such Invention; (ii) Institute and Sponsor have agreed in writing that no patentable invention exists or that a patent application should not be filed even if a patentable invention exists; or (iii) in the case of such a manuscript, [\*\*\*\*\*], and in the case of such an abstract or presentation[\*\*\*\*\*], have passed from the date on which such Disclosure was provided to Sponsor for review.

9. Disclosure of Inventions; Patent Prosecution.

9.1 Initial Reporting of Inventions. Any Investigator who makes an Invention, solely or jointly with one or more employees, consultants or agents of Sponsor ("Sponsor's Personnel"), shall promptly report such Invention to Institute's Innovation office, and shall assign all of his or her rights, title and interest therein to Institute. Each of Sponsor's Personnel who makes an Invention jointly with an Investigator, shall report such Invention to Sponsor and shall assign all of his or her rights, title and interest in such Invention to Sponsor.

9.2 Ownership of Joint Inventions. Inventions made jointly by an Investigator and any of Sponsor's Personnel shall be jointly owned by Institute and Sponsor ("Joint Inventions"). Institute and Sponsor agree that for each Patent Right jointly owned by Institute and Sponsor, Sponsor and Institute shall each own a one-half undivided interest in such Patent Right in each country in which it is filed. The Parties agree that each Party can practice, sell, license or otherwise transfer its rights to such jointly-owned Patent Right worldwide without (i) the consent of the other Party and/or (ii) without having to account to or share proceeds with the other Party; however, Institute's rights in this respect are subject to the terms and conditions of this Agreement and Sponsor's licensing rights thereto.

9.3 Reporting Inventions to Other Party: Optioned Inventions. Each Party shall promptly disclose to the other Party in writing each Invention promptly upon receiving notice thereof pursuant to Section 9.1. All such disclosures by and to Institute shall be made through its Innovation office. Following receipt of any such disclosure, representatives of Institute and Sponsor shall promptly confer regarding whether any Patent Rights pertaining to such Invention should be filed. Inventorship of all Inventions will be determined in accordance with applicable national law and ownership of Inventions shall follow inventorship as determined in accordance with U.S. patent law. If Sponsor notifies Institute within [\*\*\*\*\*] after receipt of the earliest disclosure of a particular Invention that it agrees to pay all patent costs, including without limitation costs of preparation, filing, prosecution, issuance and maintenance, relating to such Invention ("Patent Costs"), such Invention will be considered an "Optioned Invention". Institute shall cause Patent Rights for such Optioned Invention to be filed and prosecuted at Sponsor's request and expense. If Sponsor does not notify Institute within such [\*\*\*\*\*] period that it agrees to pay for Patent Costs pertaining to a particular disclosed Invention, Institute shall be free to file at its own expense and license its rights in such Patent Rights to any other party and Sponsor shall have no further rights pursuant to Section 10.1

9.4 Filing Patent Rights; Copies of Correspondence. Institute shall be responsible for filing all Patent Rights pertaining to Inventions in its name if the Invention(s) is owned solely by Institute During the Option Period and Negotiation Period, as applicable, Institute and shall arrange for copies of patent applications for Optioned Inventions, and subsequent related office actions, responses to office actions, requests for terminal disclaimer, and requests for reissue or reexamination of any patent issuing from such applications, to be provided to Sponsor, in confidence and in accordance with Section 7, for review and comment by Sponsor.

Sponsor shall be responsible for filing all Patent Rights pertaining to jointly-owned Inventions, in joint names of the Institute and Sponsor. Sponsor shall use patent counsel acceptable to both Sponsor and Institute, and Sponsor shall pay for the preparation, filing, prosecution, and maintenance of patent applications and patents for such jointly-owned Inventions. Sponsor shall: (a) provide the Institute with an opportunity to review and comment on the text of a jointly-owned Invention patent application; (b) consult with the Institute regarding all decisions related to office actions, responses to office actions, requests for terminal disclaimer, and requests for reissue or reexamination of any patent issuing from such applications; (c) supply the Institute with a copy of the patent application as filed, together with notice of its filing date and serial number; (d) keep the Institute advised of the status of the actual and prospective patent application filings; and (e) ensure that the Institute receives copies of all patent prosecution related documents.

9.5 Patent Costs. Sponsor shall reimburse Institute within [\*\*\*\*\*] of the date of Institute's invoice to Sponsor for all Patent Costs incurred by Institute. If Sponsor fails to pay all Patent Costs as set forth in an invoice from Institute within such [\*\*\*\*\*] period, Institute may provide notice of such nonpayment to Sponsor and Sponsor shall have [\*\*\*\*\*] from receipt of such notice to pay all Patent Costs in such invoice. If Sponsor does not make payment in full within such [\*\*\*\*\*] cure period, Sponsor's exclusive Option rights under Section 10.1 with respect to the Patent Rights pertaining to such invoice shall terminate. If at any time Sponsor determines that it no longer desires to pay Patent Costs, Sponsor shall give [\*\*\*\*\*] advance written notice to Institute. Sponsor's exclusive Option rights under Section 10.1 with respect to such Patent Rights shall immediately terminate upon such notice and Sponsor shall no longer be obligated to pay for corresponding Patent Costs incurred after the end of such [\*\*\*\*\*] period (but shall remain responsible for all Patent Costs incurred prior to and during such [\*\*\*\*\*] period). Any Patent Costs not paid by Sponsor within [\*\*\*\*\*]: of invoice from Institute shall be subject to a late fee of [\*\*\*\*\*].

10. License Option

10.1 The Foreground Option. For the period commencing on the Effective Date and extending to the date that is [\*\*\*\*\*] (the "Option Period"), Sponsor shall have the exclusive right (an "Foreground Option") to initiate negotiations with Institute to an exclusive or non-exclusive (at the election of Sponsor), royalty-bearing license to Institute's rights in Patent Rights corresponding to the Optioned Invention for commercial purposes, subject to the provisions of Sections 10.2 and 10.3 below. If Sponsor elects not to exercise the Foreground Option, Sponsor shall promptly inform Institute of its decision to this effect during the Option Period. Upon such notice from Sponsor to Institute, or in the event that at the end of the Option Period Sponsor has not notified Institute of its decision with respect to the Foreground Option, the Foreground Option shall terminate.

The Background Option. Subject to the Institute's obligations to the U.S. Government (if any), Institute hereby grants to Sponsor the exclusive right a ("Background Option") to exclusively negotiate the terms of an exclusive license agreement (with the right to grant sublicenses) to Institute's rights in Background Intellectual Property as defined in Appendix C for commercial purposes, subject to the provisions of Sections 10.2 and 10.3 below, and reimbursement of Institute's patent costs relating to Institute's Background Intellectual Property, which are incurred during the Option Period, and which license agreement shall include the financial terms in the term sheet attached as Appendix D. The Background Option will extend for the Option Period as defined above. If Sponsor elects not to exercise this Background Option, Sponsor shall promptly inform Institute of its decision to this effect during the Option Period. Upon such notice from Sponsor to Institute, or in the event that at the end of the Option Period Sponsor has not notified Institute of its decision with respect to this Background Option, the Background Option to Background Intellectual Property shall terminate.

10.2 Exercise of Option. If Sponsor wishes to exercise an Foreground Option or Background Option, Sponsor shall give written notice to Institute within the Option Period, provided, however, that as a condition to (he exercise of any Foreground Option or Background Option, Sponsor must be current in all payments due to Institute under this Agreement, including Sponsored Research Payments under Section 5 and Patent Costs under Section 9.5. For the [\*\*\*\*\*] period immediately following any such notice of exercise received by Institute during the Option Period (the "Negotiation Period"), Sponsor and Institute shall engage in negotiating license terms typical of agreements between academic institutes and industry, including without limitation provisions for the payment of commercially reasonable royalties and other compensation to Institute; payment by Sponsor of on-going Patent Costs in all countries covered by an exclusive license; time-limited diligence obligations for the development and commercialization of a product embodying the Invention; product liability indemnification and insurance provisions acceptable to Institute's liability insurance carriers; and Institute's, Institute's Affiliates' and inventor's right to make and use the subject matter described and/or in Patent Rights and to permit others at academic and/or not-for-profit institutes to use the subject matter described and/or claimed in Patent Rights (or patent rights claiming Background Intellectual Property, as applicable) for research and educational purposes. During the Option Period and Negotiation Period, Institute will not negotiate or grant, or offer to negotiate or grant, any rights to its rights in Optioned Inventions or Background Intellectual Property as defined in Appendix C. to any third party which would prevent the grant of any such license to Sponsor.

10.3 Termination of Option. If Sponsor fails to exercise an Foreground Option for a particular Optioned Invention during the Option Period as provided in this Section 10, or if Institute and Sponsor fail to enter into a mutually acceptable license agreement within the Negotiation Period, such Invention shall no longer be considered an Optioned Invention and Institute shall have no further obligation to Sponsor with respect to such formerly Optioned Invention and shall have the right to grant a license (subject to the rights granted in Section 9.2) to such formerly Optioned Invention and its rights in Patent Rights corresponding thereto to any other party. If the Parties fail to execute a license agreement with respect to a particular Optioned Invention within the Negotiation Period, the Foreground Option with respect to the Optioned Invention shall expire, provided that, for a period of [\*\*\*\*\*] after the termination of the negotiations with Sponsor, Institute shall not enter into such license with a third party on terms that, when taken as a whole, are more favorable than the terms last offered to Sponsor, without first offering such terms to Sponsor. Sponsor shall have [\*\*\*\*\*] from the date of notice of the more favorable terms to accept such terms after which Institute shall have no further obligation to Sponsor with respect to that Optioned Invention.

If Sponsor fails to exercise the Background Option for Background Intellectual Property during the Option Period as provided in this Section 10, or if Institute and Sponsor fail to enter into a mutually acceptable license agreement within the Negotiation Period, such Background Intellectual Property shall no longer be considered subject an Background Option and Institute shall have no further obligation to Sponsor with respect to Background Intellectual Property and shall have the right to grant a license to such the Background Intellectual Property and its rights in patent rights corresponding thereto to any other party.

10.4 Government Rights: Guidelines. Each Foreground Option and any subsequent license shall, if applicable, also be subject to applicable rights, conditions and limitations imposed by U.S. law and regulations, including without limitation the royalty-free non-exclusive license granted to the U.S. government (see 35 U.S.C. §202 et seq., and regulations pertaining thereto), the N.I.H. Grants Policy Statement, and the N.I.H. Guidelines for Obtaining and Disseminating Biomedical Research Resources.

10.5 No Additional Rights. The Parties acknowledge and agree that nothing in this Agreement shall be construed to grant Sponsor any license or rights other than (i) the rights in any Optioned Invention and the Background Option expressly granted hereunder, (ii) the right to use Research Information in accordance with Section 4, and (iii) the right to use Background Technology in accordance with Section 3.3

11. Termination.

11.1 Termination for Breach.

(a) If Sponsor fails to meet any of its material obligations under this Agreement, and does not remedy such failure within [\*\*\*\*\*] after receipt of written notice thereof from Institute, Institute shall have the right to terminate this Agreement effective upon provision of written notice thereof to Sponsor. Further, in the event that Sponsor becomes insolvent, files a petition in bankruptcy, has such a petition filed against it, or receives notice of a third party's intention to file an involuntary petition in bankruptcy, Sponsor shall immediately notify Institute in writing, and Institute shall have the right to terminate this Agreement immediately upon receipt of such notice.

(b) If Institute fails to meet any of its material obligations under this Agreement and does not remedy such failure within [\*\*\*\*\*] following receipt of written notice thereof from Sponsor, Sponsor shall have the right to terminate this Agreement effective upon provision of written notice thereof to Institute. Sponsor acknowledges and agrees that failure to achieve any particular Research Information shall not be considered failure to meet a material obligation.

11.2 Termination by Sponsor. Sponsor shall have the right to unilaterally terminate this Agreement at any time in its sole discretion by giving [\*\*\*\*] advance written notice thereof to Institute.

11.3 Termination by Mutual Consent. Sponsor and Institute may terminate this Agreement at any time by mutual written consent.

11.4 Effect of Termination. If this Agreement is terminated by Institute pursuant to Section 11.1 (a), or by Sponsor pursuant to Section 11.2, (i) Sponsor shall reimburse Institute for all non-cancellable- commitments incurred by Institute in connection with the performance of its obligations under this Agreement prior to the date of such termination and (ii) Sponsor shall pay Institute [\*\*\*\*]. Institute's termination of this Agreement pursuant to Section 11.1(a) shall also terminate Sponsor's right to use Institute's Confidential Information provided pursuant to this Agreement. If this Agreement is terminated by Sponsor pursuant to Section 11.1(b), or by mutual consent of the Parties pursuant to Section 11.3, Sponsor shall reimburse Institute for all non-cancellable- commitments incurred by Institute in connection with the performance of its obligations under this Agreement prior to the date of such termination.

12. Indemnification.

(a) Institute and Sponsor shall each be responsible for and shall defend, indemnify and hold the other and its Affiliates and each of their respective trustees, directors, officers, medical and professional staff, employees and agents, and their respective successors, heirs and assigns ("Indemnitees"), harmless from any third party claim for bodily injury to persons or damage to tangible property to the extent that such injury or damage is caused by the negligence or the willful misconduct of any of its respective trustees, directors, officers, medical and professional staff, employees and agents solely in respect of the Sponsored Research and the materials and equipment related thereto.

(b) Sponsor shall further defend, indemnify and hold harmless Institute and its trustees, directors, officers, medical and professional staff, employees and agents ("Institute Indemnitees") against any and all third party actions, suits, claims, investigations, inquiries, demands, judgments and/or prosecutions that may be brought or instituted against Institute and/or any Institute Indemnitee based on or arising out of, any use by Sponsor, its Affiliates or licensees of any Invention, Research Information (and/or material or thing embodying such Invention or Research Information) or Institute material, including but not limited to any such use in the manufacture, use, sale, importation or other distribution of any product or process by Sponsor, its Affiliates or licensees, excepting to the extent Sponsor can demonstrate by clear and convincing evidence that it is directly resulting from the gross negligence or intentional misconduct of Institute and/or the Institute Indemnitees in the use of any such product or process

(c) Any party entitled to indemnification under this Section 12 shall give the indemnifying party prompt notice of any covered claim, shall provide the indemnifying party with the opportunity to defend against the claim, and shall reasonably cooperate in such defense at the indemnifying party's expense; provided, however, failure of any Party to do so shall not relieve the other Party of its obligation(s) to indemnify, except to the extent that the indemnifying party can demonstrate it was actually prejudiced by such failure. Notwithstanding anything to the contrary in this Agreement, the indemnifying Party shall not enter into any settlement, consent judgment, or other voluntary final disposition of any claim that has a material adverse effect on the rights of the indemnified Party or its Indemnitees hereunder or admits any wrongdoing or fault by the indemnified Party or its Indemnitees or imposes on the indemnified Party or its Indemnitees any payment or other liability, without the prior written consent of the indemnified Party, as applicable.

13. DISCLAIMER OF WARRANTIES. NEITHER PARTY MAKES ANY REPRESENTATIONS OR WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, CONCERNING THE SPONSORED RESEARCH, PATENT RIGHTS, ANY OTHER INTELLECTUAL PROPERTY RIGHTS, INSTITUTE MATERIAL OR ANY RESEARCH INFORMATION, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, VALIDITY OF ANY PATENT RIGHTS CLAIMS OR OTHER INTELLECTUAL PROPERTY RIGHTS, WHETHER ISSUED OR PENDING, AND THE ABSENCE OF LATENT OR OTHER DEFECTS, WHETHER OR NOT DISCOVERABLE, AND EXPRESSLY DISCLAIMS THE SAME. Specifically, and not to limit the foregoing, Institute makes no warranty or representation (i) regarding the validity or scope of the Sponsored Research, any Patent Rights or any intellectual property rights optioned or granted hereunder, whether issued or pending; and (ii) that the exploitation of the Sponsored Research, the use of Institute material, Research Information, Patent Rights or any other intellectual property rights will not infringe any patents or other intellectual property rights of Institute or of a third party.

14. LIMITATION OF LIABILITY. NOTWITHSTANDING ANYTHING TO THE CONTRARY IN THIS AGREEMENT, IN NO EVENT SHALL EITHER PARTY, OR ANY OF ITS AFFILIATES, OR ANY OF THEIR RESPECTIVE TRUSTEES, DIRECTORS, OFFICERS, MEDICAL OR PROFESSIONAL STAFF, EMPLOYEES OR AGENTS BE LIABLE TO THE OTHER PARTY OR ANY OF ITS AFFILIATES FOR INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND ARISING IN ANY WAY OUT OF THIS AGREEMENT OR THE RIGHTS GRANTED HEREUNDER, HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, REGARDLESS OF WHETHER SUCH PARTY SHALL BE OR HAVE BEEN ADVISED, SHALL HAVE REASON TO KNOW OR IN FACT SHALL KNOW OF THE POSSIBILITY OF THE FOREGOING; *PROVIDED HOWEVER*, NOTHING IN THIS SECTION 14 SHALL BE CONSTRUED TO LIMIT EITHER PARTY'S OBLIGATIONS TO INDEMNIFY AND HOLD HARMLESS THE OTHER PARTY UNDER THIS AGREEMENT.

15. Use of Name. Each Party agrees that it will not use the name or logo of the other Party or any of its Affiliates, or any of its respective trustees, directors, officers, staff members, employees, students or agents in any advertising, promotional or sales literature, publicity or in any document employed to obtain funds or financing without the prior written approval of the Party or individual whose name or logo is to be used, in the case of Institute such approval to be given by the Institute's Public Affairs Department.

16. Export Controls. Inventions, Institute materials, Research Information and Confidential Information may be subject to U.S. laws and regulations relating to export control and trade sanctions, including but not limited to the U.S. Export Administration Act and Export Administration regulations, International Traffic in Arms Regulations, and laws and regulations implemented by the Office of Foreign Assets Control at the U.S. Department of Treasury, and export and/or import laws and regulations of other countries. Sponsor agrees to comply strictly with all such laws and regulations and acknowledges and agrees that it shall be solely responsible for obtaining any necessary licenses to export, re-export, or import Inventions, Research Information and/or Confidential Information.

17. Miscellaneous.

17.1 Relationship of the Parties. Nothing contained in this Agreement shall be deemed to create a partnership or joint venture between the Parties, and each of the Parties shall in all matters connected herewith be an independent contractor. Neither of the Parties hereto shall hold itself out as the agent of the other, nor shall either of the Parties incur any indebtedness or obligation in the name of, or which shall be binding upon, the other without prior written consent of such other Party. No employees, agents or representatives of either Party shall be deemed employees, agents or representatives of the other. Institute and Investigators shall have the sole right, in accordance with the Research Plan and this Agreement, to conduct, direct and control the Sponsored Research.

17.2 Notices. All notices, reports, waivers, consents, correspondence or other communications hereunder shall be in writing and shall be effective upon delivery to the recipient, provided, however, that delivery shall be deemed to have occurred (i) when delivered by hand, (ii) three business days after being mailed by certified or registered U.S. mail, return receipt requested, (iii) one business day after being sent overnight express delivery by a recognized overnight courier service, or (iv) when transmitted by facsimile, email or other electronic means, provided that the sender receives confirmation of transmission, and sends a confirmation copy in one of the foregoing manners, addressed as follows:

***If to SERI or MEEI:***

Director, Intellectual Property & Commercial Ventures  
The Schepens Eye Research Institute, Inc.  
20 Staniford Street  
Boston, MA 02114:  
[\*\*\*\*\*]

If to Sponsor:

Cure Vac AG  
Paul-Ehrlich-Strasse 15  
72076 Tubingen, Germany  
Attention: Vice President Legal  
[\*\*\*\*\*]

Either Party may change its address by giving notice to the other Party in the manner set forth in this Section 17.2.

17.3 Entire Agreement. This Agreement constitutes the entire Agreement between the Parties with respect to the subject matter hereof and supersedes any prior or contemporaneous understanding or written or oral agreements with respect thereto, including, but not limited to, the Confidential Disclosure Agreement effective June 1, 2018 to the extent it relates to the subject matter hereof.

17.4 Amendment; Waivers. This Agreement may be amended and any of its terms or conditions may be waived only by a written instrument executed by an authorized signatory of the Parties or, in the case of a waiver, by the Party waiving compliance. The failure of either Party at any time or times to require performance of any provision hereof shall in no manner affect its rights at a later time to enforce the same. No waiver by either Party of any condition or term shall be deemed as a further or continuing waiver of such condition or term or of any other condition or term. Sponsor acknowledges that neither Principal Investigator nor any other Investigator is considered a duly authorized signatory of Institute and has no authority to bind Institute to any such amendment or waiver. All rights, remedies, undertakings, obligations and agreements contained in this Agreement shall be cumulative and none of them shall be a limitation of any other remedy, right, undertaking, obligation or agreement of either Party.

17.5 Severability. If any provision of this Agreement is or becomes invalid, is ruled illegal by any court of competent jurisdiction or is deemed unenforceable under then current applicable law from time to time in effect during the term hereof, it is the intention of the Parties that the remainder of this agreement shall not be effected thereby. It is further the intention of the Parties that in lieu of each such provision which is invalid, illegal or unenforceable, there be substituted or added as part of this Agreement a provision which shall be as similar as possible in economic and business objectives as intended by the Parties to such invalid, illegal or unenforceable provision, but shall be valid, legal and enforceable.

17.6 Assignment. Neither this Agreement nor any rights or obligations of either Party under this Agreement shall be assigned or otherwise transferred without the prior written consent of the other Party, which consent shall not unreasonably be withheld, conditioned or delayed, provided, that Sponsor can assign this Agreement without the prior written consent of Institute (i) to an Affiliate or (ii) to a third party in connection with the sale or transfer of substantially all of its assets with respect to the subject matter of this Agreement. Any permitted assignee shall assume all obligations of its assignor under this Agreement. This Agreement and the rights granted in this Agreement shall be binding upon and shall inure to the benefit of Sponsor, Institute and their respective successors and permitted assigns.

17.7 Binding Effect. This Agreement shall be binding upon and inure to the benefit of and be enforceable by the Parties hereto and their respective permitted successors and assigns.

17.8 Force Majeure. Neither Party shall be liable for any unforeseeable event beyond its reasonable control not caused by the fault or negligence of such Party, which causes such Party to be unable to perform its obligations under this Agreement, and which it has been unable to overcome by the exercise of its due diligence, provided that the Party unable to perform its obligations shall promptly notify the other Party, shall use reasonable efforts to avoid or remove such causes of nonperformance, shall suspend performance only for such period of time as is necessary as a result of such force majeure event and shall resume performance as quickly as possible.

17.9 Governing Law; Venue. This Agreement shall be governed by and construed and interpreted in accordance with the laws of the Commonwealth of Massachusetts, without regard to provisions concerning conflict of laws. In the event of any controversy or claim arising out of or relating to any provision of this Agreement, the Parties shall use reasonable efforts to first try to settle those conflicts amicably between themselves. Each Party hereby irrevocably consents that any legal action or proceeding under, arising out of or in any manner relating to this Agreement shall be brought in any state or federal court of competent jurisdiction located in the Commonwealth of Massachusetts.

17.10 Institute Policies. Sponsor acknowledges that Institute's employees and medical and professional staff members and the employees and staff members of Institute's Affiliates are subject to the applicable policies of Institute and such Affiliates, including, without limitation, policies regarding conflicts of interest, intellectual property and other matters. Sponsor shall provide Institute with any agreement it proposes to enter into with any Investigator for Institute's prior review and shall not enter into any oral or written agreement with any such Investigator which conflicts with any such policy. Institute shall provide Sponsor, at Sponsor's request, with copies of any such policies applicable to any such Investigator.

17.11 Interpretation. The Parties hereto are sophisticated, have had the opportunity to consult legal counsel with respect to this transaction and hereby waive any presumptions of any statutory or common law rule relating to the interpretation of contracts against the drafter.

17.12 Survival. Expiration or termination of this Agreement shall not relieve the Parties of any obligation accruing prior to such expiration or termination, and in addition to any specific survival references in this Agreement, the provisions of Sections 1, 4, 5, 6, 7, 8, 9, 10, 11.4, 12, 13, 14, 15, 16, and 17 (which Section numbers shall refer to the entire Section including all subsections unless otherwise specified) shall survive the termination or expiration of this Agreement indefinitely or as otherwise expressly set forth in such Section.

17.13 Counterparts; Facsimile. This Agreement may be executed in counterparts and delivered by facsimile with the same effect as an original. In the event a complete copy of this Agreement or any signature is delivered by an e-mail which contains a portable document format (.pdf) file of an executed signature page, such executed signature page shall create a valid and binding obligation of the Party executing it (or on whose behalf such signature page is executed) with the same force and effect as if such executed signature page were an original thereof.

17.14 Headings: "Include" and "Including". All headings are for convenience only and shall not affect the meaning of any provision of this Agreement. Wherever the word "including" or "include" shall appear in this Agreement, such term shall be construed to mean "including without limitation" or "include without limitation," as the case may be.

*[SIGNATURE PAGE FOLLOWS]*

IN WITNESS WHEREOF, Institute and Sponsor have caused this Sponsored Research Agreement to be executed effective as of the Effective Date.

Term Sheet  
(see attached)

CUREVAC AND THE SCHEPENS EYE RESEARCH INSTITUE. INC.

**Term Sheet for Exclusive License Agreement**

3/29/2019

This Term Sheet, unless specifically slated otherwise herein, is for discussion and planning purposes only and does not constitute an offer, or create any other legal obligation upon any party, affiliate, or representative, thereof. The terms set forth below are not necessarily a complete list of material terms that may be negotiated as part of a definitive license agreement (the "License"). Moreover, unless specifically stated otherwise herein, the terms proposed: a) shall not be construed as a waiver of any rights of Hospital (as defined below), or its affiliate(s), with respect to any existing agreements between Hospital, or its affiliates, and Company (as defined below), or any other matter; b) shall not modify, amend or otherwise alter any existing agreement between Hospital and Company, and c) shall not be relied upon in any manner whatsoever by any party hereto.

**LICENSOR:** The Schepens Eye Research Institute, Inc., ("Hospital")  
**LICENSEE:** CureVac AG, a German stock corporation, having a principal place of business at Paul-Ehrlich-Strasse 15, 72076 Tubingen, Germany ("Company")  
**DEFINITIONS:** "Claim" shall mean any pending or issued claim of any Patent Right that has not been permanently revoked, nor held unenforceable or invalid by a decision of a court or other governmental agency of competent jurisdiction that is unappealable, or unappealed in the time allowed for appeal. In the event a pending claim of any Patent Right does not issue as a valid and enforceable claim in an issued patent within [\*\*\*\*\*] after the earliest priority date, such a pending claim will not be a Claim.  
"Process" shall mean any process, method or service the use or performance of which, in whole or in part absent the license granted hereunder would infringe, or is covered by, one or more Claims of Patent Rights; or  
"Product" shall mean any article, device or composition, the manufacture, use, or sale of which, in whole or in part absent the license granted hereunder would infringe, or is covered by, one or more Claims of Patent Rights.  
**PATENT RIGHTS:** [\*\*\*\*\*].  
**LICENSE FIELD:** All use(s) of Products and Processes for [\*\*\*\*\*].

**LICENSE TERRITORY**

: [\*\*\*\*\*].

**LICENSE GRANT:**

An exclusive, royally-bearing license under Hospital's rights in Patent Rights to make, have made, use, have used, sell and have sold Products and Processes.

**SUBLICENSING:**

Company shall have the right to provide sub-licenses through multiple tiers.

**RESERVED RIGHTS:**

The licenses granted under the License are subject to the right of Hospital and Hospital's Affiliates and other academic, government and not-for-profit institutions to make, have made, and to use the subject matter described and/or claimed in the Patent Rights for research and educational purposes; and for Patent Rights supported by federal funding, the licenses granted under the License are subject to the rights, conditions and limitations imposed by U.S. law (see 35 U.S.C. § 202 et seq. and regulations pertaining thereto), including without limitation: the royalty-free non-exclusive license granted to the U.S. government; and the requirement that any Products used or sold in the United States shall be manufactured substantially in the United States.

**UPFRONT LICENSE FEE:**

Non-refundable up-front fee of \$30,000 payable on the effective date of the License.

**MILESTONES:**

Milestones and Milestone Payments

Amount

[\*\*\*\*\*]

**ROYALTIES:**

The total amount that could be due by Company upon all such milestone events for any and all Products in any and all countries would not exceed \$2,550,000.

[\*\*\*\*\*] on Net Sales (including, without limitation, imputed fair market value of transfers) by Company, its affiliates and sublicensees of Products or Processes covered by Patent Rights.

This royalty shall not be subject to any royalty offset if the Company is required to enter into additional licenses to commercialize a Product.

The definitions of Net Sales and Valid Claim shall be negotiated in the License agreement.

**ANNUAL MINIMUM PAYMENTS:** [\*\*\*\*\*]

**SUBLICENSE INCOME:** Company shall pay Hospital, within [\*\*\*\*\*] of receipt thereof, the following percent of any and all non-royalty income attributable to the Product or Process, or Technological Information, including without limitation any payment for the sublicensing of any license granted hereunder, or distribution of any Product or Process, including but not limited to up-front license fees, license issue fees, maintenance fees, payments for distribution rights, milestone payments or the fair-market value of any non-cash consideration, but excluding any research funding;

[\*\*\*\*\*]

**PATENT EXPENSES:** Company shall reimburse Hospital for 100% of all patent related patent costs incurred by Hospital (as incurred) including, without limitation, prosecution, maintenance and defense (including interference, oppositions, revocations etc.) of the Patent Rights, and reimbursement of costs incurred prior to effective date of License [\*\*\*\*\*].

**PATENT PROSECUTION:** Company controls prosecution and maintenance of the Patent Rights. Company will provide Hospital and its counsel with an opportunity to consult with Company regarding prosecution and maintenance of any such Patent Right, and Company will consider in good faith all reasonable comments timely made by or on behalf of Hospital.

With respect to any Patent Right licensed hereunder, Company shall provide to Hospital (i) copies of patent prosecution documents that are received from or filed with the United States Patent and Trademark Office and foreign equivalent, as applicable; and (ii) if requested by Hospital, provide Hospital with copies of draft submissions to the USPTO prior to filing.

Company may elect to surrender any patent or patent application in Patent Rights in any country upon [\*\*\*\*\*] advance written notice to Hospital. Such notice shall relieve Company from the obligation to pay for future Patent Costs but shall not relieve Company from responsibility to pay Patent Costs incurred prior to the expiration of the [\*\*\*\*\*] notice period. Such U.S. or foreign patent application or patent shall thereupon cease to be a Patent Right hereunder, Company shall have no further rights therein and Hospital shall be free to license its rights to that particular U.S. or foreign patent application or patent to any other party on any terms.

**DILIGENCE:** The parties will negotiate in good faith diligence obligations, which shall include the submission of a research and development plan to the Hospital (the "Development Plan.")

**TERMINATION:** Hospital has the right to terminate for an uncured breach, including failure to pay and failure to satisfy diligence requirements. Company has the right to terminate without cause.

**No WARRANTIES:** Hospital shall make no warranties regarding the Patent Rights and rights granted under the License, including warranties of title, merchantability, fitness for a particular purpose, non-infringement or validity of Patent Rights.

**ADDITIONAL TERMS:** The License will include additional terms reasonably standard for agreements between universities and industry, including but not limited to: (a) product liability indemnification, and insurance provisions acceptable to Hospital's liability insurance carriers; (b) reporting provisions; (c) limitations on right to assign; (d) limitations on Hospital's liability for any incidental, indirect, consequential, punitive, exemplary and special damages; and (e) Massachusetts governing law, exclusive jurisdiction and venue; (f) confidentiality; (g) sublicense protection; (h) consequences of termination.

REDACTED

Certain identified information, indicated by [\*\*\*\*] has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

1<sup>st</sup> AMENDMENT TO THE  
SPONSORED RESEARCH AGREEMENT

Between

CureVac AG, a German stock corporation, having a principal place of business at Paul-Ehrlich-Straße 15, 72076 Tübingen, Germany ("Sponsor")

and

The Schepens Eye Research Institute, Inc., a not-for-profit Massachusetts corporation, having a principal place of business at 20 Staniford St., Boston, MA 02114 ("SERI") and the Massachusetts Eye and Ear Infirmary, having a principal place of business at 243 Charles Street, Boston, MA 02114 ("MEEI")(SERI and MEEI collectively "Institute")

WHEREAS, Sponsor and Institute entered into a *Sponsored Research Agreement*, effective as of March 15, 2019 (the "Agreement").

WHEREAS, the Parties wish to extend the Term and include an updated Research Plan in the Agreement, the Parties intend to amend the Agreement; and

WHEREAS, the Parties acknowledge that as of the [\*\*\*\*], payments described in Section 5 of the Agreement and totaling US [\*\*\*\*] have been paid in full.

THEREFORE, in consideration of the promises made herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties consent and mutually agree to amend the Agreement as follows, whereby the capitalized terms used in this 1<sup>st</sup> Amendment shall have the same meaning as defined in the Agreement.

1. Therefore definition 1.25 of the Agreement is hereby replaced in its entirety by the following:

"1.25 "Sponsor Principal Investigator" shall mean [\*\*\*\*], under whose direction the Sponsored Research at Sponsor site shall be conducted."

2. Therefore Section 2 of the Agreement is hereby replaced in its entirety by the following:

“2. Term. The term of this Agreement shall be from the Effective Date until July 31, 2021 (the “Term” ), unless earlier terminated by either Party as set forth in Section 11 or extended in a writing signed by authorized representatives of both Parties.”

3. Therefore Section 5.3 of the Agreement is hereby replaced in its entirety by the following:

“5.3 Institute invoices shall be sent via Email to Sponsor at the following email address: [\*\*\*\*\*]

CureVac AG  
Paul-Ehrlich-Strasse 15  
72076 Tübingen, Germany  
Attention: Accounting Department  
[\*\*\*\*\*]

Institute shall not be obligated to expend funds in excess of those provided under this Agreement to conduct the Sponsored Research.”

4. Therefore Appendix A of the Agreement is hereby replaced in its entirety by the Appendix A attached hereto.

5. This 1<sup>st</sup> Amendment shall enter into force upon the last signature below ( “1<sup>st</sup> Amendment Effective Date”). The remaining terms and conditions of the Agreement shall remain in full force and effect.

6. Except as herein provided, the Agreement and all of its terms, covenants and conditions are hereby ratified and confirmed in all respects and remain in full force and effect. The Agreement shall, together with this 1<sup>st</sup> Amendment, be read and construed as a single agreement.

7. In the event that any signature is delivered by facsimile transmission or by an e-mail which contains a portable document format (.pdf) file of an executed signature page, such executed signature page shall create a valid and binding obligation of the Party executing it (or on whose behalf such signature page is executed) with the same force and effect as if such executed signature page were an original thereof.

IN WITNESS WHEREOF, the Institute and Sponsor have caused this 1<sup>st</sup> Amendment to be executed by their duly authorized representatives as of the 1<sup>st</sup> Amendment Effective Date.

Rental contract: TÛ-01/3-01\_1

Rental contract for commercial premises

Between

Technologieparks Tübingen-Reutlingen GmbH  
Gerhard-Kindler-Str. 13  
72770 Reutlingen  
VAT ID no.: DE813149601

- Landlord -

And

CureVac Real Estate GmbH  
Paul-Ehrlich-Str. 15 - 17  
72076 Tübingen  
VAT ID no.: DE 307 312 113

- Tenant -

Both parties

**Preamble**

The rental contract now regulates the rental of the existing rental space in the Biotechnologiezentrum (Biotechnology Centre) (TÛ-01) in Tübingen. (The tenant has rented the same rental space until 01.31.2018 from TfRT GmbH as subtenant).

**Section 1 Rental property**

1.

The landlord rents out the premises in the Technologiepark Tübingen-Reutlingen (Technology Park Tübingen-Reutlingen) in building TÛ-01, located at Paul-Ehrlich-Str. 15 and 17, 72076 Tübingen according to the attached floor plan (Annex 1-6). The rented space is marked in pink.

2.

The shared use of the sanitary facilities located in the stairwell is also rented, whereby the other users of the floor are entitled to the proportional shared use of the sanitary rooms.

The areas and facilities specified in Section 1 (1) of this contract constitute the rental property within the meaning of this contract.

3.

The landlord is obliged to provide parking space appropriate to the total area rented. One parking space is to be rented per 81m<sup>2</sup> or part thereof. This means that 61 parking spaces are currently rented.

Further details are regulated in the parking space rental contract no.: TÛ\_P19/01-3-01\_1 of the parties.

---

## Section 2 Equipment, development of the technology park

1.  
The rental premises are rented out in the condition in which they are in when handed over.

2.  
The size of the rented area is agreed at approx. 4850m<sup>2</sup> of rental space. The size of the rental space may change due to dimensional inaccuracies, walls and cladding, supports or similar, as well as the installation or removal of partition walls within the rental property at the request of the tenant. Such changes have no influence on the amount of the rent, unless the deviations are such that adherence to the rent would be unreasonable for one of the contracting parties. If the allocation within the rental space is changed at the request of the tenant, the rent will not be changed under any circumstances.

3.  
The tenant knows that the building TÛ-01 is a part of the Technologieparks Tübingen-Reutlingen, which is to be expanded. Construction work in the vicinity of the rental premises is to be expected. The tenant accepts disruptions caused by such construction work, as long as the business operations are not significantly disrupted. The tenant is also aware that the concept of the Technologieparks Tübingen-Reutlingen is based on the fact that office and administrative facilities, research and development laboratories and technology-oriented businesses can be accommodated in the same building. The users should take mutual interests into account. However, the tenant accepts any disruptions caused by the special usage structure of the technology park, provided that these do not significantly disrupt business operations.

## Section 3 Start of the rental period and handover, duration of contract

1.  
The tenancy begins on February 1, 2018 and ends on January 31, 2028.  
The rental property shall be handed over in the agreed condition on 01 February 2018.  
An ordinary termination is excluded for both parties.

2.  
If the handover date is delayed, the tenant is not entitled to any other claims against the landlord, unless the landlord is responsible for the delay at least due to gross negligence. Art. 1.2 of the General Terms and Conditions for the Contract (GTC) remains unaffected.

3.  
For the purpose of the handover, the contracting parties shall inspect the premises together and shall make a record of all complaints.

4.  
The contract ends at the end of the 10th rental year (expected on January 31, 2028). If the start of the rental period is moved, the end of the rental period is moved accordingly.

---

5.

The tenant has the right to extend the contract period twice by five years by unilateral declaration. They may only exercise this option up to 12 months before the end of the fixed rental period at the latest by written declaration to the landlord. The receipt of the declaration by the landlord is decisive for timeliness.

6.

The right to termination without notice for good cause and termination rights in accordance with the general terms and conditions of the contract remain unaffected.

#### Section 4 Fee

1.

The monthly fee to be paid by the tenant consists of

The monthly rent amounts to	From 02.01.2018	From 01.01.2019	From 01.01.2020
the rent according to Section 5 at present	81,000.00€	84,240.00€	87,610.00€
the advance payment of operating costs at present	46,000.00€	46,000.00€	46,000.00€
plus the currently valid VAT, currently 19%	24,130.00€	24,745.60€	24,385.90€
The fee is therefore currently	151,130.00€	154,985.60€	158,995.90€

2.

The tenant shall also bear the costs of commercial property management. These are paid to the landlord at a flat rate of 1.5% of the respective annual net rent in accordance with Section 5; this amount is added by the landlord in the invoice, so that an advance payment of the 1.5% flat rate is not made.

3.

The landlord shall provide the tenant annually with a recurring entry document, from which the components of the amounts to be paid under this contract can be identified. The fee shall be paid monthly in advance, no later than the 3rd working day of each month. All payments are to be made free of charge to the landlord or an agency authorised by the landlord to receive them.

Until revoked, the tenant entitles the landlord to collect all payments when due from their account. Direct debit is regulated in a separate contract.

In the event of default, all payments made by the tenant are first credited against interest, then against operating costs, then against the basic rent, and in each case against the oldest debt.

---

**Section 5 Rent, change of rent**

1.

The monthly rent is

	From 02.01.2018	From 01.01.2019	From 01.01.2020
For the office area	13,770.00€	14,320.00€	14,890.00€
For the laboratory area	67,230.00€	69,920.00€	72,720.00€
Total	81,000.00€	84,240.00€	87,610.00€

2.1

In the event that the "consumer price index for Germany, officially assessed monthly by the Federal Statistical Office in Wiesbaden for the Federal Republic of Germany, has changed by at least 5 points compared with its level on 01.01.2020, the rent shall change by the percentage by which the above-mentioned index has changed. (Base 2010=100)

2.2

The change/adjustment of the rent becomes effective from the time when the conditions for the rent change according to the above sentence 1 have occurred. As long as the tenant has not received a written recalculation of the rent from the landlord, the tenant is not in default of payment.

2.3

If the rent is adjusted on the basis of the above indexation clause, the clause shall become applicable again in accordance with the provisions of the previous paragraph and the rent shall be adjusted accordingly as soon as the aforementioned cost of living index has changed again by 5 points.

2.4

In the event of an increase in the rent, the landlord must inform the other party of the contract of the change by submitting an invoice; in the event of a reduction, the tenant must inform the other party of the change by submitting an invoice. If this is not done immediately, this does not mean that the adjustment is waived.

2.5

When the contract was concluded, the base index series was agreed as 2010 = 100. If the official index series is converted to a new base, the new index series shall apply for the adjustment of the basic rent from the time at which the above formula can be applied to the new index series.

2.6

If the indexation clause is invalid, the parties are obliged to negotiate a change in the rent at the point in time at which the rent would be changed if the clause were valid. If the parties do not reach an agreement, an expert who is to be appointed by the competent Chamber of Industry and Commerce will act as arbitrator. The changes in the cost of living and the development of rents for commercially used space in the TTR area are decisive for the arbitrator's decision.

---

The rent is to be adjusted to any changes in the cost of living. The costs of the arbitrator shall be shared equally between the parties.

3.

In addition, the tenant shall bear the value added tax payable on the rent at the statutory rate applicable for the month in question, currently 19%.

#### **Section 6 Operational costs**

1.

Operational costs of the property and all its facilities, in particular the costs listed in Sectiond 2 and 3 of the Betriebskostenverordnung [Ordinance on Operational Costs] in its current version (current version dated 01.01.2004) shall be borne by the tenant. Unless otherwise agreed, operational costs shall be allocated primarily on the basis of consumption values determined by means of consumption recording, and in addition, particularly for common areas, communal facilities and waste disposal, on the basis of square metres. This also applies to future and further expenses, whereby expenses shall be understood as periodically recurring costs, e.g. for maintenance, tests required under public law and consumables, e.g:

- a) Energy, maintenance, operational, cleaning and service costs for the heating system of the ventilation or air conditioning system, the refrigeration systems and other lab-specific installations, costs for central hot water supply, chimney cleaning, emission and air quality measurements
  - b) Property charges (refuse collection, street cleaning, irrigation and drainage, etc.);
  - c) The current public charges of the property, especially the property tax in the respective amount;
  - d) Insurance (all building insurance, water damage insurance, liability insurance, glass breakage insurance, building fire insurance, etc.);
  - e) Costs for domestic electricity and water;
  - f) maintenance, operational and service costs for lifts, escalators, electric doors, decentralised hot water systems, pumping systems and other equipment;
  - g) cleaning and lighting for all areas that are not assigned to a tenant, surveillance, blinds and facade cleaning;
  - h) Costs for caretakers (gross salary, ancillary salary costs, payments in kind, etc.) as well as the equipment and materials needed to operate and keep the house clean;
  - i) Costs of any pest control measures;
-

- j) Costs of commercial waste disposal companies (e.g. refuse);
- k) Costs for building locking and security services;
- l) Costs for fire alarm, sprinkler and fire extinguishing systems;
- m) the costs of operating jointly used areas and facilities (e.g. sanitary and technical facilities, operating rooms and equipment including servicing; repair and maintenance)
- n) the cost of garden maintenance, including calculatory depreciation of tools and their operational costs;-
- o) other costs that are suitable for the correct operation of the overall system according to the specifications of the landlord (e.g. the costs of renting or maintaining water meters and heat cost allocators or the costs of replacing intermediate meters for calibration)
- p) Costs for cleaning the parking spaces
- q) Costs of cleaning the building exterior (e.g. removal of graffiti)

3.

The costs of the heating and hot water supply shall be borne by the tenant. They are settled by the landlord in accordance with the Ordinance on Consumption-Based Settlement of Heating and Hot Water Costs (Heizkosten VO).

4.

The tenant shall pay a monthly advance payment on the operational costs together with the rent plus the applicable value added tax (VAT). The agreements on the rent due date and method of payment also apply to the advance payments of operational costs. In addition to the ancillary costs, the resulting VAT is to be paid at the rate applicable, currently 19%, at the time of the due date. If the landlord does not make use of the option under the German Value Added Tax Act, the VAT included in the ancillary costs is then also an operational cost and therefore not to be disclosed separately and is to be borne by the tenant as part of the ancillary costs.

5.

The invoices to be drawn up by the landlord cover a period up to the respective end of a calendar year. If the tenant moves out, the landlord is not obliged to draw up an interim invoice but can settle in the aforementioned cycle. However, the tenant is entitled to have consumption values recorded at the end of the rental period. The landlord shall grant the tenant access to all measurement data and provide appropriate support for the collection of the data.

---

6.

Within four weeks of receipt of the invoice, the tenant may request to inspect the invoicing documents at the registered office of the landlord or to be sent copies at a flat rate of 0.75€ per copy. If the tenant does not object to the invoice in writing within four weeks after having been granted full access to the files, the invoice shall be deemed to have been accepted, provided that the landlord has expressly referred to this period and the legal consequence in the invoice. If the tenant does not request the inspection of receipts within four weeks of receipt of the invoice, subsequent payments of the tenant or reimbursements of the landlord are due after these four weeks.

7.

Public charges, taxes, premiums, fees, etc., which arise from the tenant's operation or due to an increase in risk from their operation, shall be borne solely by the tenant. They will release the landlord in this respect from claims of third parties.

8.

In addition, Section 7 of the general terms and conditions of the contract shall apply.

#### **Section 7 Use according to contract**

1.

The tenant shall use the rental property in accordance with Section 1 No. 1 only as office / laboratory space. They may only use the premises in accordance with the laws and regulations, in particular the workplace guidelines. Changes to the purpose of use require the landlord's prior written consent. When using the areas in accordance with Section 1 No. 2, they shall take into account the interests of the other authorised users.

2.

The landlord ensures that the use of the premises covered by the contract is legally permissible for commercial laboratory and office purposes and, if necessary, approved by all responsible public and non-public bodies.

#### **Section 8 Maintenance and cosmetic renovations**

1.

The tenant takes over the rental property in the condition in which it is in when it is handed over.

2.

The landlord is obliged to maintain the building in which the rental property is located and the technical facilities of the building. The landlord shall maintain the building and its technical facilities in a condition corresponding to the contractual use during the entire rental period and shall carry out work in this respect in coordination with the tenant and with due regard to the tenant's business operations and business interests.

---

In particular, the following technical installations necessary for the general operation of the building are regularly maintained and kept in a condition corresponding to the approved status:

- Emergency standby power system
- Lightning protection
- Ventilation
- Entrance doors
- Fire alarm system
- Fire protection doors
- Fire extinguishers
- Lifts
- Smoke heat exhaust system
- Outdoor facilities
- Intercom system
- Ventilation and air conditioning technologies
- Building management system

If the landlord does not comply with this duty, the tenant is entitled to replacement at the landlord's own expense and to reduce the rent in accordance with Section 536 of the German Civil Code (BGB).

Minor repair work up to a maximum net amount of 1000,- € in individual cases, but a maximum net amount of 50.000,00 € per rental year shall be borne in full by the tenant.

3.

The landlord is not obliged to carry out continuous cosmetic renovations of the rental property

4.

The parties agree that repair, maintenance, upkeep and repair work on the rental property and on all items, installations and equipment brought into the rental property by the tenant are to be carried out entirely by the tenant.

The tenant shall be responsible for the care and maintenance of all technical systems, facilities and networks belonging to the rented property, which the tenant has installed themselves, e.g. automatic doors, roller sectional doors, heating, ventilation, ELT system, security lighting system (central or decentral), fire alarm system, burglar alarm system, sprinkler system, etc., insofar as this is technically and economically reasonable with regard to the respective overall system. Otherwise, the landlord is obliged to carry out this work, in which case the costs will be apportioned in accordance with Section 6 No. 1 of this contract.

---

5.

The tenant is responsible for all cosmetic repairs in the rental premises. No. 8.6. of the GTC shall apply.

6

When the contract ends, the following applies:

6.1. The tenant shall return the rented space to the landlord unrenovated/cleaned.

6.2. There is no obligation for the tenant to disassemble the property.

6.3.

For any damage resulting from a condition which does not correspond to normal wear and tear, the landlord may assert further rights under this contract, in particular claims for damages.

7

Insofar as facilities for joint use are rented out in accordance with Section 1 No. 2, the following applies to these:

The costs of cosmetic repairs in the common areas in accordance with Section 1 No. 2 shall be borne by the tenant in proportion to the share of common areas they have rented. Contrary to No. 8.1.c. of the GTC, an amount of € 1,500 is agreed for the sum of the individual measures, whereby this share is not included in the upper limit specified in No. 8.1 GTC.

#### **Section 9 Security deposit**

4 weeks after the conclusion of the contract, the tenant shall, as security for all claims of the landlord arising from this contractual relationship, at their discretion, provide an unlimited, directly enforceable bank guarantee on first request, waiving the deposit of a German credit institution approved as a customs and tax guarantor, or a cash deposit in the amount of EURO 386,535.00 (in words: three hundred and eighty-six thousand five hundred and thirty-five). At the request of the landlord, the tenant shall ensure that the guarantee amount increases in the same proportion as the rent by providing a further guarantee or by increasing the cash deposit accordingly.

#### **Section 10 Place of jurisdiction**

If the tenant is a merchant within the meaning of the German Commercial Code (HGB), the parties agree that Tübingen shall be the place of jurisdiction for all disputes arising from this contract and its execution; the landlord may also assert claims against the tenant at their general place of jurisdiction. This does not apply if a different place of jurisdiction is determined by law.

---

**Section 11 Other**

**11.1**

If the landlord operates a canteen on the premises of TTR or arranges for it to be operated by third parties, the tenant's employees and subtenants are entitled to use the canteen facilities. The tenant will support an appropriate use of the central infrastructure.

**11.2**

Six months after notification of the commencement of operations, the tenant may not run its own catering or service operations (e.g. canteen, cafeteria). The tenant shall pass on this obligation to the subtenant.

**Section 12 Components of the contract**

The General Terms of Contract (Annex 7) to the Commercial Rental Contract (GTC) and the Building and Property Regulations (Annex 8) form an integral part of this rental contract. However, the provisions of this rental contract shall take precedence over the GTC and the Building and Property Regulations. In the event of contradictions, this contract shall apply.

**Section 13 Remedial written form clause**

The parties to the rental contract are aware of the written form requirements of Sections 550 in conjunction with 578 para. 1 German Civil Code (BGB). They agree that the rental contract should be in written form in accordance with the aforementioned regulations. The tenant hereby undertakes, at the landlord's request at any time, to take all actions and make all declarations necessary to satisfy the written form requirement. The tenant also declares that they will not terminate the rental contract prematurely on the grounds of failure to comply with the written form.

**General Terms and Conditions of Contract for Commercial Rental Contracts (GTC)****1. Rental property, handover, use**

1.1. The description of the rented building is valid for the equipment, for existing areas the inspected and recorded condition according to the handover protocol, whereby defects and complaints recorded in the protocol are to be remedied by the landlord, unless something else arises from this contract or the protocol. Furthermore, the landlord shall not provide any equipment and facilities as well as room partitions and doors within the rental property, unless they can be seen in a separate annex or are handed over to the tenant by the landlord when the rental property is handed over.

In any case, the landlord reserves the right to make changes to the plans and the description of the rented building which are demanded or necessary by authorities, insurance companies or neighbourhood objections or which do not affect the legitimate interests of the tenant. If, as a result of changes to the plans and the description of the rented building, which are demanded or become necessary by authorities, insurance companies or neighbourhood objections, which serve environmental protection or technical progress, the legitimate interests of the tenant are not insignificantly impaired, the tenant is entitled to a unilateral special right of termination without notice within a period of 1 month after written notification of the change by the landlord. Further claims are excluded.

Moreover, the landlord is not liable for the late granting or refusal of any necessary official approvals and the tenant is not entitled to any claims for damages or rights of reduction or retention if a purchase is not possible or is delayed due to official measures or orders, unless the late granting or refusal of any necessary official approvals or orders or refusal of official measures is due to the condition or location of the rental property. Compensation claims against public authorities are hereby assigned to the tenant who accepts this, insofar as the landlord is not liable.

1.2.

1.2.1 For existing premises:

In the event that the previous tenant of the rental property does not vacate the premises in good time, the start and end of the rental period shall be postponed accordingly. The landlord shall notify the tenant of the start of the rental period in writing. In the event of a claim for damages due to the previous tenant's failure to vacate the premises on time, the tenant shall assert such claims solely against the previous tenant. For this purpose, the landlord assigns their possible claims against the previous tenant to the accepting tenant. The landlord is not liable for the existence and enforceability of the assigned claims for damages.

1.2.2 For premises to be newly constructed:

The handover shall take place as soon as the rental property is ready for occupancy, even if completion work is still being carried out in the stairwell, cellar, on the facade and outside facilities and other parts of the rental property which are not in the area of the rental space, unless the use of the rental premises is unreasonable. The handover need not take place before the expected handover period stated in the rental contract. If the handover is delayed by more than 6 months beyond the above-mentioned handover period, the tenant may terminate the contract after expiry of this expected handover period by giving 3 months' notice to the end of the month; this termination shall be deemed not to have been declared if the landlord offers to hand over the premises ready for acceptance within the notice period. All other claims of the tenant are excluded. If the landlord has notified the exact date of handover in good time in accordance with Section 3.1 of the rental contract, taking into account the above provisions, this date shall be deemed to be the start of the rental period, even if the tenant is not obliged to accept the rental property due to its condition. The tenant's claims arising from delay from this day remain unaffected.

1.2.3 For the handover, the contracting parties will inspect the premises together and take a record of all complaints. The tenant is only entitled to the right to remedy the complaints; for this purpose, appropriate deadlines are to be agreed upon. Subject to the requirements of Section 3.1 of the rental contract (commencement of rental), the tenant undertakes to accept the rental. Insignificant defects or remaining work shall not entitle the tenant to refuse acceptance of the rental property. The tenant is not entitled to any claims due to obvious defects that are not expressly recorded in the handover record. The contracting parties will note in the record the beginning and the end of the rental period according to Section 3. 3 of the rental contract, the record will be signed by both parties.

1.3. If the main rental space can be heated, the rental space is heated during the heating period within the local business and office hours, whereby a room temperature of 20° C must be achieved. The landlord reserves the right to change the times and scope of heating if this does not affect the legitimate interests of the tenant. Insofar as statutory or official regulations or orders impose other requirements, these must be observed. The tenant shall appropriately heat and ventilate the rental property.

---

1.4. The tenant treats the rental property with care and attention. Statutory and technical regulations in connection with its operation shall be observed by the tenant at their own expense, including in relation to the landlord. The tenant will obtain the approvals required for their operation themselves. Claims against the landlord are excluded in this respect.

When using the premises, the tenant must observe all official regulations. This also includes keeping emergency escape routes in the rented areas free of obstruction. For example, emergency escape routes must not be obstructed by equipment, materials or electrical devices that constitute a fire load or an obstruction. Doors to emergency exit doors and windows shall not be locked or obstructed. Fire bulkheads to other fire areas must not be opened unless it is ensured that they are immediately and professionally closed again by a specialist company. No cooking units may be operated in open room areas adjacent to emergency escape routes/corridors.

1.5. Before the tenant sets up items which can have a recognisably disadvantageous effect on the rental property (machines, safes, etc.), they shall enquire with the landlord about the load limits of the floor and ceilings and obtain the landlord's written consent, unless the contractual purpose of the rental is to set up and operate such machines. Consent may only be refused on objective grounds. If this is likely to have adverse effects on the building, the rental property or other tenants, the landlord may revoke the permission granted. In any case, the ceiling load is designed for 500 KN/sqm.

The tenant shall observe noise protection and environmental protection regulations. Machines and equipment that cause vibrations or other effects that could disturb other users of the building may only be installed and operated if disturbance to other users of the building is impossible.

1.6. The tenant has to dispose of waste from their commercial activities at their own expense in accordance with public regulations; the waste bins provided for general use are not available for this purpose. However, if such waste containers are generally available, the tenant must use them. Otherwise, the tenant may not store waste outside the premises they have rented, even if only temporarily, unless the landlord has expressly assigned such storage facilities to them in writing. In any case, the tenant must observe the statutory and official waste disposal regulations.

1.7. The tenant shall keep the rental property free of vermin at their own expense. The tenant may only object to the fact that the rental property was already infested with vermin at the time of handover if this is recorded in the handover record, if the tenant notifies the landlord of the infestation promptly after handover or, in the event of later notification, proves that the infestation was already present when moving in or that the tenant or the users of the rental property authorised or tolerated by them were not responsible for the infestation.

1.8. Outside any rented parking spaces, employees of the tenant may not park on the property, not even in places expressly allocated for visitors. They must ensure that these provisions are also observed by their employees and suppliers or contractors.

1.9. The landlord must be notified immediately in writing of any damage that has occurred or is likely to occur, as well as any faults in the rental property and the rest of the building. In case of imminent danger, the tenant will take necessary measures themselves.

1.10. The tenant acknowledges the building and property regulations as part of their obligations under this agreement. The landlord reserves the right to amend or supplement these building and property regulations, insofar as the amendments and supplements are reasonable with regard to the interests of the landlord. Further obligations of the tenant may only be taken up with the consent of the tenant.

1.11. The tenant must observe statutory and technical regulations. On parking spaces, they will in particular urge their employees not to park vehicles that could pose an increased risk of fire or explosion. All vehicles parked on the parking spaces must be registered and insured and comply with the technical regulations.

Parking spaces must be cleaned regularly by the tenant at their own expense. If he does not comply with this obligation, the landlord can carry out this cleaning at the expense of the tenant after a single warning.

## 2. **Supply and service lines**

2.1. The tenant may only use the supply networks for electricity, water and - if available - gas to an extent that ensures that they cannot be overloaded. The tenant may, at their own expense and with the prior written consent of the landlord, adapt the supply lines to their requirements. Insofar as necessary, the landlord is obliged to cooperate immediately and to tolerate necessary interventions in their property or to grant the necessary rights - including rights in rem.

2.2. In the event of an interruption in the supply of electricity, gas or water for which the landlord is not responsible, the tenant has no rights against the landlord. Any claims on account of unjust enrichment are excluded from this.

---

2.3. In the case of water consumption for commercial purposes, the tenant shall install an intermediate meter at their own expense and bear the irrigation and drainage costs after invoicing of the landlord.

### 3. Advertising activities

3.1. The tenant may use the collective signposting system to a reasonable extent and attach suitable signs to rented parking spaces. This is at the expense of the tenant. The signs must be removed at the end of the rental period.

The landlord has installed a uniform doorbell nameplate system. The tenant shall bear the costs attributable to their sign. The sign is to be removed at the end of the rental period.

3.2. The tenant may not attach other fixtures (company signs, logos, advertising texts, display cases, letterboxes, vending machines, posters, illuminated pictures and steps, flags, window paintings, etc.) to the outside surfaces of the building, the rental premises or to the window panes, even if they are used for advertising or sales purposes.

### 4. Transfer to third parties

Any transfer of use to third parties and any transfer of rights from this rental contract, in whole or in part, requires the prior written consent of the landlord. The landlord may refuse consent for good cause, in particular if there are serious reasons concerning the identity of the subtenant against its use, if the nature of the intended use is significantly different to the previous purpose of the contract or the other use of the building, or if there are similar reasons that make the subtenancy unacceptable to the landlord. In all other cases, the landlord will give their consent to subletting. The subtenant will presumably be the company CureVac AG, in which case consent is deemed to have been given. A refusal of consent or the revocation of a consent that has been given, which is for good cause, does not give the tenant the right to terminate. In all other cases, the right to terminate the contract for good cause exists with one month's notice to the end of the month.

In the event that the landlord has a bad debt arising from the rental contract, the tenant hereby assigns to the landlord as security all claims to which they are entitled against the subtenant. In the event of bad debt, the landlord is entitled to collect the assigned claims. If the collected amounts exceed the claims of the landlord, the landlord is obliged to pay out the excess amount.

The tenant assumes liability for all damages and disadvantages incurred by the landlord as a result of the transfer of use to third parties; the tenant shall indemnify the landlord from any claims of such third parties.

If the tenant transfers the rental property in whole or in part to a third party without the consent of the landlord, the landlord may demand that the tenant terminates the transfer immediately, but at the latest within one month. Otherwise, the landlord may terminate the rental contract without notice.

### 5. Rent

The receipt of the money in the account to which the payments are to be made is decisive for the punctuality of all payments. In the event of default, the landlord is entitled to charge interest on arrears at a rate of 5% points above the applicable base rate. The assertion of a further claim for damages is not affected by this. The landlord is entitled to charge a flat rate of Euro 8.00 for each payment request, unless the expense or damage of the landlord is demonstrably less. In the event of default, all payments made by the tenant are first credited against interest, then against operating costs, then against the basic rent, in each case against the oldest debt.

### 6. Value added tax

6.1. If payment of the rent plus VAT is agreed in the rental contract, the tenant may only carry out actions in the rental property which entitle them to deduct input tax and, if necessary, opts for VAT. Other uses, in particular commercial or professional activities, which do not entitle the tenant to deduct input tax, require the prior written consent of the landlord. The landlord can give their consent subject to an adjustment of the rent to compensate for their possible economic disadvantage.

Before the landlord agrees to such other uses, the parties undertake to specify the premises affected by these other uses in a written addendum to the rental contract and to specify the changed rental payment obligation (part with, part without VAT). The same obligation exists if such other use is added or removed in a spatially defined area.

---

6.2. The tenant shall impose the same obligations on third parties who use or co-use the rental property. The tenant obliges them to also opt for value added tax. The tenant is aware that violations of their obligations under Section 6 of the GTC can lead to severe pecuniary losses for the landlord. They shall be obliged to compensate for the pecuniary losses resulting from such violation of obligations.

6.3. At the request of the landlord, the tenant shall provide the landlord or the competent tax office in writing with the information allowing an assessment of the extent to which the rental income of the landlord is subject to VAT. The tenant declares that they use the rented premises solely for the performances which entitle them to deduct input tax. The tenant is obliged to inform the landlord in writing without delay.

6.4. These restrictions of use only apply insofar as the landlord's VAT option would otherwise be affected.

## 7. Operational costs

7.1. Notwithstanding Section 6 of the rental contract, the landlord shall determine and amend the apportionment scale and the settlement period at reasonable discretion if the justified interests of the tenant are not adversely affected thereby, taking into account a fair settlement of the operating costs with respect to several tenants of the building. The landlord is not bound to a selected apportionment scale or settlement period for later settlement periods. In particular, it is possible to distribute the costs according to the ratio of the rented areas to each other or a distribution according to the degree of utilisation or a combination of these two types of distribution.

The landlord must observe legal requirements, in particular the BetrKV (German Regulation on Operating Costs).

The tenant is obliged to pay the incurred, consumption-independent operating costs even if they do not make use of all or part of the services thus satisfied.

7.2. Notwithstanding Section 6 of the rental contract, the landlord may adjust the advance payments to be made by the tenant to the actual change in costs. The landlord settles the advance payments at the end of each calendar year. Any outstanding receivable resulting from the settlement must be paid within one month after receipt of the settlement. If the rental relationship ends during a settlement period, the exact distribution of the operating costs shall be made in the next settlement in the ratio of the rental period to the settlement period, unless the landlord settles at the end of the rental relationship. The tenant is not entitled to an early settlement.

7.3. As far as possible, the tenant will conclude separately billable contracts with the utility companies (e.g. electricity, water).

## 8. Maintenance

Notwithstanding Section 8 of the rental contract, the following provisions shall apply:

8.1. The tenant shall continuously maintain the rental property in a condition that corresponds to orderly management. The tenant shall carry out the maintenance (inspection, maintenance and repair) of the following items at their own expense:

a) inspection of the electrical equipment installed by the tenant or by the landlord at the request of the tenant in accordance with the relevant German Association of Electrical Engineers (VDE) regulations every 4 years in the case of fixed installations and every 2 years in the case of portable electrical devices.

b) items that the landlord has installed at the request of the tenant or the tenants themselves;

c) glass panels, mirrors and light sources;

d) all systems belonging to the rental property (in particular windows, sun protection systems; doors, locks and locking systems; bell, door intercom and door opening systems; power and lighting systems; supply and disposal lines; washing and toilet facilities; heating and cooking facilities, boilers, intermediate meters, shut-off valves and hands wheels on the radiators and other facilities), whereby the tenant shall bear the costs of inspection and maintenance work in full. In the case of maintenance and repair work, the tenant shall bear the costs insofar as the individual measure does not exceed € 1000.00 net and the total individual measures does not exceed € 50,000.00 net, but not more than 9% of the annual net rent per calendar year.

The tenant shall contribute to major repairs of the aforementioned installations, which are the responsibility of the landlord, in the amount specified in Section 7 (1) of the rental contract. These amounts shall increase to the same extent as the rent.

---

- 8.2. In the case of faults whose remedy is the responsibility of the tenant, they shall additionally bear the costs of finding the fault; otherwise the landlord shall reimburse the tenant for these costs.
- 8.3. The tenant shall carry out their maintenance measures immediately. If they fail to comply with this obligation within a reasonable period despite a written reminder, the landlord may have the necessary work carried out at the expense of the tenant. No reminder or deadline is required to eliminate existing risks.
- 8.4. Insofar as the tenant is responsible for the repair, the landlord shall assign to the tenant claims against third parties in connection with the repair services.
- 8.5. If necessary, the tenant shall carry out cosmetic repairs at regular intervals. The work must meet the quality standard of the relevant specialist trade. Cosmetic repairs include in particular the painting or wallpapering and painting of ceilings and walls, the interior painting of windows and the painting of doors/frames, radiators, surface-mounted water pipes and, if necessary, any built-in furniture. Depending on the pre-treatment, natural wood may only be waxed, oiled or painted with transparent varnish or glaze.
- 8.6. The landlord shall carry out the cosmetic repairs in the sanitary facilities that may be made available for joint use as required, generally every three years. The tenant has to bear the costs proportionately with the other users entitled to joint use. Paragraphs 1 and 7 shall apply mutatis mutandis to the maintenance in these premises with the provision that the work shall be carried out by the landlord, whereby the tenant shall bear the costs proportionately.
- 8.7. The tenant shall have the water heaters in the premises which they have rented serviced, cleaned and descaled annually by a specialist company. The tenant must provide evidence of this on request of the landlord.
- 8.8. If damage or unusual contamination is caused by the tenant, their relatives, employees, suppliers, customers or agents in the building, courtyard, thoroughfare, corridors, stairways, elevators, service areas or similar, the tenant must carry out the necessary cleaning or repair without being asked or is obliged to pay the costs if the landlord carries out the work.
- 9. Modernisation measures**
- 9.1. Measures to improve the rented areas or other parts of the building or to save energy must be tolerated by the tenant. This also includes conversion work carried out in connection with the new letting of individual premises or the redesign of the entire property. The tenant must keep the premises and areas of the rental property affected by these measures accessible.
- Exempt from the landlord's right to demand the tolerance of the tenants is the operation of the laboratories, especially for GMP II, III and GMP III and animal housing. An interruption of operations requires the type, scope and duration of the previous agreement in detail and a cost-benefit analysis. Moreover, the tenant has the right to object to a measure mentioned under 9.1 if this would impair the contractually agreed purpose of use.
- 9.2. The landlord shall inform the tenant of the expected time, place and type of performance of the measure in accordance with 9.1 within a reasonable period of time before the start of the work; the landlord shall carry out the work in such a way that the tenant's business operations are affected as little as possible.
- 9.3. Only if a measure according to 9.1 (1) significantly impairs the tenant's business operations for a period exceeding four weeks, the tenant is entitled to counter rights. In all other respects, the tenant's claims and the special right of termination are excluded.
- 10. Change in the rental property by the tenant**
- 10.1. Installations and alterations of the rented items, installations, lattice on windows, etc. require the prior written consent of the landlord. The landlord may give their permission subject to the condition that the tenant agrees to restore the original condition in whole or in part at the request of the landlord if the tenant no longer uses the change in the rental property themselves or if the tenancy ends. At the request of the landlord, the tenant shall submit suitable plans, the necessary permits under public law and, in the event of an increase in risk, proof of appropriate insurance.
-

10.2. The tenant bears all costs associated with a measure according to 10.1. The tenant is responsible for compliance with the police regulations; the tenant is liable, even if not at fault, for all damage arising in connection with the execution and operation of a measure according to 10.1. The tenant exempts the landlord from claims of third parties of any kind, which arise in connection with a measure according to 10.1.

10.3. If a measure according to 10.1 poses a danger or if the tenant does not fulfil their obligations which arise from such a measure despite a warning, the landlord can demand a change of the measure according to 10.1 or revoke their consent. Any costs arising from this shall be borne by the tenant. 10.4. The parties undertake to adequately mark and document technical installations and alterations and to provide each other with relevant information.

#### **11. Rent security deposit**

11.1. The landlord is entitled, but not obliged, to satisfy any claims from the rental security deposit if the tenant is in default with their obligations and the landlord has given written notice of this with a period of 2 weeks. If the landlord makes use of the rental security deposit during the term of the rental contract, the tenant is obliged to replenish the security deposit accordingly.

11.2. The claim from the security deposit ends two months after settlement of all claims raised from the rental relationship. This does not mean a waiver of other claims.

#### **12. Offsetting and rights to withhold performance, reduction**

12.1. Only if and insofar as a demand of the tenant originates from the same contractual relationship and is undisputed or legally binding, may the tenant offset.

12.2. The tenant may only claim rent reductions if they are actually and not only insignificantly prevented from using the rental property for reasons for which the landlord is responsible. The tenant must immediately notify the landlord in writing of the intended reduction. It is not permitted for an earlier month than that in which the notification is declared. The tenant has to calculate the reduction amount. If the landlord does not acknowledge the reduction of rent with regard to reason and amount in writing within one month, the tenant can immediately bring about a judicial assessment.

12.3. The above provision applies accordingly to rights to withhold performance.

12.4. The right to reduce the rent shall not apply in the event of disturbances in connection with energy and water supply, drainage, flooding and other natural disasters for which the landlord is not at least grossly negligent.

#### **13. Tenant insurance**

The tenant has the obligation to insure themselves to a reasonable extent against the following cases of damage:

- Burglary and theft;
- Business liability insurance for personal injury and property damage;
- Business interruption insurance;
- Damage that can be caused by the installation, storage or operation of machines, technical equipment or other hazardous installations and items;
- Damage to the equipment, fixtures and items that they have installed.

Insofar as legally and factually possible, the insurance companies must exclude any recourse against the landlord.

#### **14. Liability of the landlord**

14.1. The liability without fault of the landlord is excluded. Except in the case of gross fault (intent and gross negligence), the landlord shall only be liable for themselves and their agents in the event of a breach of an essential or typical contractual obligation, i.e. core or cardinal obligations which enable the execution of the contract and on the fulfilment of which the tenant may rely).

This also applies to damage caused by the effects of moisture or water – regardless of the type, origin, duration and extent - or caused by fire, smoke, snow, dry rot, mould or vermin, as well as by technical equipment of the building.

---

- 14.2. In case of minor negligence, the landlord is not liable for damages, against those the tenant should insure themselves in accordance with point 13.
- The liability of the landlord for damages from loss of life, personal injury or damage to health, which are based on at least a negligent breach of duty by the landlord, or a legal representative or an agent of the landlord, remains unaffected.
- 14.3. In case of disruptions of the rental use caused by third parties including other tenants of the rental property, the tenant is only entitled to rights to the extent that the landlord is entitled to their own claims against those who caused the disruption. The landlord may assign to them against the disruptive party claims to performance instead of the tenant or leave them to the exercise. Notwithstanding, No. 1, sentence 1 shall apply accordingly to a claim for damages by the tenant if the previous tenant does not return the rental property to the landlord in accordance with the contract. In any case, the landlord must endeavour to work towards the elimination of faults of which they become aware.
- 14.4. The landlord does not guarantee that the utilities will not change or adjust their performance, especially in terms of type, quality, pressure and voltage. The utilities are not agents of the landlord. In the event of technical disruptions, force majeure, official orders or other complete or partial impossibility, the landlord can completely or partially stop the heating of the property and the operation of the other technical installations (e.g. lifts, ventilation systems, energy and water supply systems). Due to such temporary disruptions, the tenant is not entitled to any rights against the landlord, unless the landlord is at least grossly negligent.
- 14.5. The liability of the landlord for damages from loss of life, personal injury or damage to health, which are based on at least a negligent breach of duty by the landlord, or a legal representative or agent of the landlord, remains unaffected.
- The same applies to the liability if the landlord has guaranteed a certain feature of the property or has fraudulently concealed a defect or if an insurance policy taken out by the landlord covers damage.
- 15. Liability of the tenant**
- 15.1. The tenant is liable according to the legal regulations.
- 15.2. Unless otherwise agreed between the parties, the tenant shall immediately, at the latest upon moving out, remedy any damage that falls within their area of responsibility and whose remedy is reasonable with regard to the further use of the rented property. If they fail to comply with this obligation within a reasonable period despite a warning, the landlord may have the necessary work carried out at the tenant's own expense. No reminder or deadline is required to eliminate existing risks.
- 16. Road safety**
- From the time of taking over the rental property, the tenant shall be responsible for the safety of the area left solely to them. Excluded from this are the parking spaces. Fulfilment of the obligation to ensure safety on public areas was handed over to a third party. The costs for the proper performance of the necessary actions resulting from the obligation to maintain safety on the roads shall be charged to the tenant in the ancillary costs, measured on the basis of the tenant's rental space share. The tenant shall release the landlord from all claims of third parties arising from a breach of the obligation mentioned in paragraph 1.
- 17. Protection against competition**
- The tenant is not entitled to protection against competition.
- 18. Entering the rental premises**
- The landlord or a person authorised by the landlord may enter the rental property to inspect its condition at reasonable intervals during normal business hours after giving due notice. The premises may only be entered in urgent and emergency cases for the prevention or elimination of damage; the laboratories, in particular GMP I, II and III and the animal housing only in an emergency, even outside normal business hours; the landlord will attempt to notify the tenant in advance. The tenant shall always keep the rental property ready for access.
- The landlord, accompanied by interested parties, is also entitled to the rights of paragraph 1 if the landlord wishes to sell or re-let the rental property. The landlord will try to disrupt the business operations of the tenant as little as possible.
-

**19. Body of persons as tenant and change of legal form**

19.1. Several tenants are jointly and severally liable.

Legally binding declarations concerning the tenancy must be made by and to all tenants. However, the tenants authorise each other to accept or make such declarations, subject to written revocation until further notice. The authorisation also extends to accepting requests for an increase in rent and the consent thereto. The power of attorney also applies to accepting a termination, but not to the submission of a declaration of termination and the conclusion of a rental termination agreement. A revocation of the power of attorney only becomes effective for declarations which are made after its receipt by the landlord.

19.2. If the landlord has to make payments to the tenant, the landlord can make them to one of them with exempting effect for all of them.

19.3. If the legal form of the tenant changes or if other changes occur in the commercial register or in other contexts important for the tenancy, the tenant must inform the landlord immediately in writing. The landlord will handle this information confidentially.

**20. Termination**

20.1. The timeliness of the termination is not determined by the sending, but by the receipt of the termination letter.

20.2. The right to extraordinary termination without notice for good cause remains unaffected. If the good cause consists of a breach of an obligation under the rental contract, termination is only permissible after the unsuccessful expiry of a reasonable period of time set for remedy or after an unsuccessful warning. This does not apply if the deadline or the warning obviously has no chance of success, if immediate termination is justified for special reasons, considering the interests of both parties, or if the tenant is in arrears with the payment of the rent in the sense of the following provision a).

In particular, the landlord may terminate the contract without notice if one of the following requirements is met, without the list being exhaustive:

- a) the tenant is more than one month in arrears with the payment of the rent or with other payment obligations amounting to one month's rent;
- b) the tenant continues the use of the rental property contrary to the terms of the contract or its unauthorised transfer to third parties despite a warning from the landlord;
- c) the tenant does not fulfil their other contractual obligations within a reasonable time despite a warning from the landlord;
- d) arrangement, insolvency or bankruptcy proceedings or similar proceedings are not initiated for the assets of the tenant or are not initiated for lack of assets or proceedings are initiated in accordance with Section 807 of the German Code of Civil Procedure (ZPO) or the tenant suspends payments.
- e) the tenant has not provided the contractually agreed security in accordance with the contract even after two warnings.

20.3. In the event of a justified extraordinary termination by the landlord, the tenant shall be liable for the rent still to be paid for the rental space which they have rented to the extent that it is not possible for the landlord to let this rental space to another party. This payment obligation also includes the operating costs actually incurred and necessary for the respective remaining part of the rental space, but shall continue to exist at the latest until the end of the policy period or the date of the expiry of the next possible ordinary notice of termination by one of the parties, whichever is earlier.

20.4. The tenant is not entitled to an extraordinary right of termination if, due to a change in their commercial activities after conclusion of the contract, an official permit is refused or withdrawn, or other official orders are issued.  
The same applies to impediments affecting the commercial use of the rental property due to external circumstances such as traffic diversions, excavations, roadblocks or emissions.

---

20.5. In the event that the major part of the rental property is destroyed by an event for which the landlord is not responsible (e.g. fire), the landlord is not obliged to restore the rental property. The landlord can terminate the rental relationship with effect from the time of destruction of the rental property, irrespective of whether the rental premises are rebuilt at a later date or not. Should the rental premises be rebuilt, the tenant has no priority over other applicants for a new rental contract.

20.6. Any termination must be in writing to be effective. Section 545 of the German Civil Code (BGB) does not apply.

## **21. Return of the rental property**

21.1.

21.2. The tenant shall hand over the premises to the landlord unrenovated and cleaned. Within the scope of their liability, the tenant must remedy all damage caused by use and carry out any necessary cosmetic repairs. The return of the rental property is only deemed to have taken place when the tenant has completely vacated the premises, when the tenant has handed over all keys to the landlord and when the handover has been assessed in a joint inspection report. If the return of the rental property in accordance with the contract is delayed, the tenant is in any case obliged to pay the rent until the rental property is returned in accordance with the contract. If the rental property is returned late, the landlord also reserves the right to further claims for rent and damages against the tenant for not having returned the rental property on time for the landlord to subsequently use.

21.3. In order to check the condition of the rental property in advance and to clarify which fixtures the landlord wants to keep and which changes the tenant has to remove, the tenant will carry out an inspection with the landlord in good time before the end of the rental period.

21.4. As soon as the end of the rental period has been determined, the landlord shall be entitled to provide information about the premises to be rented in an appropriate form at suitable locations in the rental premises. The tenant shall refer prospective tenants to the landlord.

## **22. Assignment of rights**

The landlord is entitled to transfer rights and obligations from this contract in whole or in part to third parties. With regard to the obligations, however, this only applies without the tenant's consent if, at the time of the transfer, the landlord can assume that the third party can fulfil the obligations.

## **23. Final provisions**

23.1. Oral supplementary agreements have not been concluded and are only valid if they are laid down in the rental contract.

23.2. Changes and additions to this contract must be made in writing in order to take effect. This shall also apply to any agreement waiving the requirement of the written form.

23.3. The landlord will store the tenant's data in the admissible manner according to the Data Protection Act for the proper administration of the rental relationship.

23.4. Should individual provisions of this contract be void in whole or in part, this shall not affect the validity of the rest of the contract. The ineffective provision shall be deemed replaced by a provision which comes closest to the purpose of the ineffective provision in a legally effective manner. The same applies to contractual loopholes.

---

**Technologiepark Tübingen-Reutlingen – TTR (Technology Park Tübingen-Reutlingen)****Building and property regulations for the commercial rental contract**

These building and property regulations are part of the rental contract. They serve the protection and security of the building and its users. Please comply with these regulations so that all those involved can live together in an orderly and problem-free manner. In the interest of all tenants, the landlord must regard violations of these building and property regulations as a breach of contract.

**1. Mutual consideration**

The joint use of a building by tenants from different types of companies requires not only good neighbourly relations but also mutual consideration. Noise and odour disturbances must be avoided in the interest of all tenants. For this reason, all devices, machines, etc. whose operation causes noise should be installed in such a sound-absorbing manner that no disturbing transmission of the noise to another rental area can occur. Odour-causing machines, appliances, etc., may only be set up if they are connected to the exhaust air system and prior approval has been obtained from the landlord, who will be happy to provide advice. Smoking is also prohibited in the stairwell and the common areas. Smoking is prohibited in the areas with fire alarm systems. The tenants are not permitted to walk on the unsecured roof areas.

**2. Duty of care of the building's tenants:**

For the security of the building, it is necessary that the non-automated front doors are closed between 18:00 - 07:00. Any tenant entering or leaving the building during this period is responsible for ensuring that the door is closed. Staircases and all other corridors, cellar corridors, balconies etc. which are jointly available for use are intended for the safety of all tenants to be used as emergency escape routes in the event of a fire. These areas may under no circumstances be used for storing - even temporarily - furniture, packaged goods, products and the like. Building and courtyard entrances, gate passages, garage forecourts and access routes to the car parks only fulfil their purpose if they are kept free. Therefore, please do not place any items there.

The rented areas must be adequately ventilated all year round and heated during the heating period according to the weather. Windows must be kept closed in case of danger of frost, wetness or storm. Open windows must be assessed. Blinds are used solely for sun protection. They may only be extended in good weather conditions. They must always be retracted in bad weather.

**3. Passenger lifts:**

They are primarily used for passenger transport. Tenants wishing to transport furniture or other loads into their rented premises may, unless a special freight lift is available, use the passenger lift in agreement with the building management, provided it is ensured that the permissible transport weight is not exceeded. The building management provides a special device for the protection of the lift cage free of charge. However, passenger traffic always has priority.

**4. Cleaning and cleanliness obligation:**

No rubbish, ash, harmful liquids and the like may be poured or thrown into the planting areas, floor drains, hand basins, sinks, toilets and urinals. For reasons of hygiene, please collect waste only in suitable, closed containers. If the landlord provides communal waste bins, the waste may only be disposed of separately according to the type of waste in the appropriate containers. Constant or occasionally disproportionately large quantities of waste may not be disposed of in communal waste bins. The same applies to hazardous waste. Further details to the topic, "refuse" can be taken from the tenant manual.

**5. Frost and moisture protection:**

Central heating elements must not be completely shut off. Protection against frost damage must be ensured even during the absence of tenants. Frozen water pipes may only be defrosted by a specialist.

**6. Obligations in the interest of general public safety and order:**

These building regulations already consider a part of the official regulations. However, they cannot fully cover the different regulations. Please observe official regulations (especially building and fire police) even if they are not explicitly regulated in these building regulations.

Rental contract Fränkel Immobilien-Service GmbH/ CureVac Real Estate GmbH

Page 1/16

RENTAL CONTRACT – NO. 1/CureVac/2018

between

**Fränkel Immobilien-Service GmbH**  
(Register Court Ulm – HRB 722439)

Represented by the managing director Mr Peter Buck

Based in 88045 Friedrichshafen  
Allmandstraße 6  
(hereinafter referred to as “**landlord**”)

And

**CureVac Real Estate GmbH**  
(Register Court Stuttgart – HRB 754041)

Jointly represented by the managing directors Ms Dr Simone Dahlmanns  
and  
Mr Dr Florian von der Mülbe

All based in 72076 Tübingen  
Paul-Ehrlich-Straße 15  
(hereinafter referred to as “**tenant**”)

the following rental contract is concluded:

**Preamble**

The landlord intends to acquire the land in the district of Tübingen Real Estate no. 6923/14 Friedrich Miescher-Straße, buildings and open space, building site, 4260m<sup>2</sup>, from the University City of Tübingen (hereinafter “building land”) and to sell it after completion of the buildings described below, which the tenant is aware of and agrees to. In the event of sale of the rental properties, all rights and obligations under this contract shall pass to the future buyer and the rental relationship shall continue between the buyer of the rental properties and the tenant on the basis of this contract.

The landlord shall construct logistics, office and laboratory buildings on the building site in two construction phases - construction phase 1 for building 1 and construction phase 2 for building 2- (hereinafter also referred to as rental property 1 or rental property 2) for use by the tenant. During planning and construction, special emphasis is placed on both an energy-efficient design of the building and a high degree of suitability for the purpose intended by the tenant.

With this proviso, the parties agree the following:

Section 1 Rental property, rental purpose

(1) The landlord becomes the owner of the land at Friedrich-Miescher-Strasse 15 in Tübingen, Real Estate No. 6923/14 of the district of Tübingen, entered in the land register of Tübingen, plot 19, sheet 3644 and sheet 4261. On the land, the landlord will construct logistics, office and laboratory buildings in two construction phases in compliance with the generally recognised rules of technology and architecture, the contractual agreements and using only approved building materials with a total area of approx. 6,973.35 m<sup>2</sup> (construction phase 1) and a total area of approx. 4,516.08 m<sup>2</sup> (construction phase 2). The location of the buildings is shown in the site plan, Annex 1.

The areas indicated for the buildings are approximate dimensions. The area calculation attached to the landlord's building application of 04.17.2018, submitted to the City of Tübingen on 04.19.2018, is authoritative.

For the new build in construction phase 1, this is shown in the site plan attached as **Annex 1** to this contract. The rental areas for construction phase 1 are shown in the floor plans, sections and views attached as **Annex 2** to this contract (collectively "planning documents"). The design and equipment of the individual areas are set out in the building specifications as **Annex 3** to this contract ("rental property 1").

For construction phase 2, the corresponding annexes Site plan **Annex 1a**, planning documents **Annex 2a** and building description **Annex 3** ("rental property 2") apply.

The tenant shall procure all furnishings and fixtures at their own expense and install them in the rental property. The landlord and tenant have drawn up a list of interfaces for this purpose and to define their reciprocal obligations. This list of interfaces is attached to this contract as **Annex 4** and takes precedence over the contents of the building specifications insofar as interface issues are dealt with in the building specifications.

All annexes to this contract are initialled by the parties and form the basis of the rental contract. Insofar as individual installations are designated "CureVac AG", this refers to the tenant.

The parties agree that, with the exception of the parking spaces in the underground car park, other required parking spaces are not part of this rental contract.

In the event of contradictions between planning documents and building specifications, the contracting parties shall endeavour to reach mutual decisions on the type and quality of execution of construction and/or equipment. If no agreement can be reached, the contents of the building specifications take priority over those of the planning documents.

In the event of incomplete or overlapping provisions in the building specifications, work or equipment is owed which a tenant can normally expect in such a contractual property. The landlord decides on this at reasonable discretion in accordance with Section 315 of the German Civil Code. The same applies if the tenant does not exercise a right of choice granted to them between different equipment variants within a reasonable period of time set by the landlord in writing. The design of the outdoor facilities shall be in accordance with the outdoor facilities plan, **Annex 5**. A representation of the external design resulting from the **Annexes 1-4** is therefore not binding. The furnishings and equipment shown in the plans are only intended to illustrate the room conditions and floor space and are not owed by the landlord within the scope of this rental contract, as is the case with the entire IT installation.

---

Overall, the landlord must ensure that the implementation planning is coordinated with the tenant.

The landlord has the right to make changes to the rental property in comparison with the information contained in **Annexes 1 to 5** or the Annexes marked with "a", if the changes are either necessary to obtain the building permit or if the changes do not significantly affect the interests of the tenant. Such a significant impairment of the tenant's interests exists if the intended size of the area of the rental property would change by more than +/-3.00% or if the contractual use of the rental property would become more expensive or impede the tenant due to the change.

The parties undertake to contractually fix all deviations from the agreed building specifications / planning documents in a written supplement to this rental contract.

(2)

The rental properties are leased for the commercial purpose of office and administrative use as well as the storage and logistics of materials and substances in connection with the development, production and marketing of pharmaceuticals.

A change of use requires the consent of the landlord. This must be granted if the intended change of use is permitted under building law. The landlord may refuse consent to the change of use for good cause.

(3)

The Landlord guarantees the legally approved use of the respective rental property in accordance with Section 1 No. (2) Sentence 1 of this contract at the time of handover. All official approvals which become necessary in the course of the rental period and which are connected with the use and operation of the respective rental property within the meaning of No. (2) shall be obtained by the tenant at their own expense, insofar as these are not due to the location or specific structural condition of the rental property (e.g. fire protection) or to a change in official or technical requirements for the respective rental property which comes into force after the signing of the rental contract.

(4)

The parties agree for the sake of clarity that the landlord owes the building permit for both rental properties without the total number of parking spaces required under building law. To this end, the tenant and the University City of Tübingen shall jointly draw up a parking space concept, on the basis of which the parking space verification in accordance with the building regulations shall be carried out, if necessary in conjunction with the relevant motor vehicle parking space statutes of the University City of Tübingen. All costs incurred in connection with the conceptual planning, the application procedure, the approval and the production of the vehicle parking spaces required by building law or requested by the tenant shall be borne in full by the tenant in relation to the landlord, including any parking space redemption fees.

## **Section 2 Duration of contract, handover**

(1)

The rental relationship begins with the date of the mutual signing of this rental contract. The agreed fixed rental period shall commence upon handover of the rental property 1.

---

The Landlord shall prepare the respective rental property in accordance with the attached plans and the description of services and hand it over in accordance with the implementation schedule (**Annex 6**).

The landlord undertakes to hand over the respective rental property immediately after completion of the respective rental property as described in Section 1 para. 1 of this contract, presumably on 10.15.2019, but no later than as of 01.15.2020 for rental property 1 and 04.15.2020, but no later than 09.15.2020 for rental property 2. The date of handover of the respective rental property shall be approximately stated by the landlord, if possible two months in advance, and shall be binding for both landlord and tenant at least 14 days in advance. On the day of the respective handover, a handover protocol to be signed by both contracting parties shall be drawn up on a form to be provided by the landlord on the basis of **Annex 7**. Any defects detected in the handover protocol must be remedied by the landlord without delay, at the latest within one month. Minor defects or residual work present at the handover of the respective rental property, which do not significantly impair the use by the tenant and which can be remedied or carried out without significantly impairing the use by the tenant, do not delay the handover or do not entitle the tenant to refuse the handover. Should the tenant accept the rental property despite considerable defects, this does not imply recognition of the respective rental property as free of defects.

The parties agree that after handover of the rental property 1, the final start of the rental period in accordance with number (2) below will be specified in a supplement to this rental contract, which is to be signed by both parties and which is to become an integral part of the present rental contract in compliance with the legal requirements for the written form (Section 578 para. 2, 550, 126 of the German Civil Code (BGB)).

The above-mentioned probable handover date(s) can only be met by the landlord if the building permit and building permission for the planned building project has been issued by the lower building authority by 07.16.2018 at the latest. If the granting of the building permit and the building clearance is delayed without the landlord being responsible for this, both the above-mentioned probable and the latest handover date shall be postponed by the corresponding length of time. Notwithstanding the rights of withdrawal in Section 14 resulting from a postponement of the handover of the rental property due to a delay in the issue of the building permit and building permission, the parties to the contract may not make any claims against the other party.

(2)

The rental period for both rental properties is agreed for a fixed period. The rental period shall be 15 (in words "fifteen") years from the first full calendar month after handover of rental property 1 ("rental period"). During this period, even before the start of the rental period, the proper notice of termination is excluded.

(3)

The tenant has the right to request the extension of the rental relationship (option) twice for five years each time (hereinafter referred to as "option period"). The first option must be asserted in writing by the tenant to the landlord at least 15 months before the end of the rental period. This applies accordingly to the second option with the proviso that the option must be exercised 15 months before the end of the first option period. If the tenant does not exercise an option, the rental relationship ends at the end of the rental or option period.

(4)

After expiry of the option periods, the rental relationship is extended by one year in each case unless it is terminated by one of the two parties with 12 months' notice to the respective expiry date.

---

The parties agree that the receipt of the notice of termination by the other contracting party shall be decisive for the timely receipt of the notice of termination.

(5)

A tacit extension of the rental relationship according to Section 545 of the German Civil Code is excluded.

### Section 3 Rent

(1) The monthly rent for rental property is 1 net cold:

€/month 87,520.00

plus advance payment of operational costs on the operational costs currently apportionable under clause (5)  
 Subtotal rent incl. AP OC net  
 plus statutory VAT (currently 19 %)  
 monthly rent incl. AP OC gross

€/month	9,000.00
€/month	96,520.00
€/month	18,338.80
€/month	114,858.50

The total monthly rent for rental property 2 is:

€/month 87,520.00

plus advance payment of operational costs on the operational costs currently apportionable under clause (5)  
 Subtotal rent incl. AP OC net  
 plus statutory VAT (currently 19 %)  
 monthly rent incl. AP OC gross

€/month	9,000.00
€/month	96,520.00
€/month	18,338.80
€/month	114,858.50

each including the rented parking spaces in the underground car park

The total monthly rent for both rental properties ("total rent") is

**€ 229,717.60**

(2)

The monthly rent is owed from the time the respective rental property is handed over. If the handover takes place during a month, the rent for this month is owed pro rata temporis. From handover of rental property 2 the total rent is to be paid.

(3)

The rent is to be paid on the 1st calendar day of each month, monthly in advance, to an account to be named by the landlord. For determining punctuality of payment, it is not the dispatch but the receipt of the money that is decisive. The landlord will request the first rent from the tenant in writing, stating the account details.

(4)

The tenant may not set off any counterclaims or exercise a right of retention against the due rent or other demands of the landlord, unless these counterclaims have been recognised or legally assessed. The right according to Section 536 (1,2 and 3) of the German Civil Code to reduce the rent due to defects of the rental property remains unaffected.

(5)

In addition to the rent, the operational costs are allocated to the tenant in accordance with the current version of the Operating Costs Ordinance and the management costs. Unless otherwise provided for in this contract, the currently apportionable operational costs as well as the anticipated management costs are listed in the list as **Annex 8** to this contract.

(6)

The tenant undertakes, as far as possible, to invoice operational costs directly to the supply and disposal companies and to make the necessary declarations.

(7)

The landlord is entitled to demand an appropriate monthly advance payment for the remaining operational costs under consideration of Section 3 Nos. (5) and (6). Until further notice, invoices for operational costs will be issued at the end of the following calendar year. Any difference resulting from the invoice (subsequent payment/refund) shall be settled by the respective debtor in favour of the respective creditor within four weeks after receipt of the respective invoice. The landlord is entitled to adjust the monthly advance payment of operational costs according to the change in operational costs of the previous accounting period.

(8)

Both the monthly rent specified under § 3 number (1) of this contract and the monthly advance payment of operational costs are to be paid in each case plus the respectively valid statutory VAT (currently 19%). In this regard, the landlord, with reference to 514 para. 4 sentence 1 of the German Value Added Tax Act (UStG), states that they are registered with the Friedrichshafen tax authority.

#### **Section 4 Indexation clause**

(1)

If the consumer price index officially determined and published by the Federal Statistical Office in Wiesbaden for the Federal Republic of Germany (current basis 2010=100) as compared to the level at the time of conclusion of this contract) increases or decreases by 10% or more, the currently applicable rent shall be changed to reflect the percentage change in the index. The request for adjustment must be asserted in writing by the respective entitled party and comes into force on the first day of the month following the entitled assertion.

(2)

In each case where the index is changed again by 10% or more compared to the level on which the previous adjustment was based, the procedure shall be repeated in accordance with Section 4 No. (1) of this contract.

(3)

The contractually agreed indexation clause is subject to the Price Clause Act (PrKIG). The contracting parties assume that the agreed index is not subject to the price clause prohibition. Should this assumption not apply, the index legally permitted under PrKIG which comes closest to the invalid index shall be deemed agreed.

(4)

If an index recalculation is published during the term of the contract, the latest calculation must be used. The date of transition is the month from which the Euro amount was last adjusted to the index development. Past payment obligations are to be regarded as closed; due to an index recalculation, the monetary amounts paid are not recalculated again retroactively.

---

(5)

Should the Federal Statistical Office rebase the index agreed in Section 4 item (1) of this contract or discontinue its continuation in whole or in part, the new calculation basis or the respective successor index shall apply or an index which reflects the value protection intended by the contracting parties in a comparable manner to the index last applicable.

#### **Section 5 Subletting**

(1)

A complete or partial subletting requires the written consent of the landlord. Consent may only be denied for good cause, in particular if the purpose of use is to be changed. Consent shall be deemed to have been given if the tenant has transferred the rental property in whole or in part to third parties who are associated with it within the meaning of Section 15 et seq. German Stock Corporation Act (AktG) for use.

(2)

The liability of the tenant for all claims of the landlord from this contract remains unaffected by the subletting.

#### **Section 6 Maintenance, repair and upkeep of the rental property**

(1)

The maintenance and repair of the rental property is the responsibility of the landlord at their own expense, unless otherwise stipulated below. The landlord shall maintain the respective rental property during the entire rental period and, if applicable, option period (together "rental duration") in a condition corresponding to the contractual use, taking into account all official regulations, in particular with regard to workplace guidelines and fire protection devices and carry out work in this respect in coordination with the tenant and with appropriate consideration of the business operations and business interests of the tenant. Necessary changes in condition, in particular also compliance with official regulations, which are attributable to the use of the tenant, are to be arranged by the tenant at their own expense.

(2)

The parties agree for clarification that repair, maintenance, upkeep and repair work on all items, annexes and equipment brought into the respective rental property by the tenant are to be carried out entirely by the tenant.

(3)

Minor repairs up to a maximum net amount of € 350.00 in each individual case, but not exceeding € 10,000.00 net per rental year, shall be borne in full by the tenant. The above values are increased in accordance with the agreements in Section 4 of this contract.

(4)

The tenant is responsible for all cosmetic repairs in the rental premises. These include in particular painting the walls and ceilings. They must be carried out as soon as this becomes necessary due to wear and tear.

---

(5)

Care and maintenance of all technical equipment, facilities and pipe networks belonging to the respective rental property, such as automatic doors, roller-/ sectional gates, heating, ventilation, RT system, security lighting system (central or remote), fire alarm system, burglar alarm system, sprinkler system, etc., shall be assumed by the tenant, insofar as they are not required to carry out the work according to Section 6 No. (2) of this contract in any case at their own expense. The tenant shall provide the landlord with corresponding proof of maintenance.

(6)

The tenant shall be liable to the landlord for damage to the respective rental property caused by the culpable conduct of his employees, suppliers, customers, craftsmen, visitors, subtenants or similar, without this being the fault of the tenant. The tenant is responsible for proving that there was no culpable conduct. This liability does not apply insofar as the above-mentioned damages are due to a grossly negligent breach of duty by the landlord or to an intentional or grossly negligent breach of duty by one of their legal representatives or their agents.

#### **Section 7 Structural changes, advertising facilities**

(1)

Structural changes to the respective rental property, especially in the case of an intervention in the static construction of the building, are only permitted with the consent of the landlord. Any structural changes carried out by the tenant must be carried out professionally and at least correspond to the structural standard of the respective rental property. Notwithstanding No. (4), permissible structural changes made by the tenant at the end of the contract do not have to be dismantled; they may, at the tenant's discretion, remain in the respective rental property without compensation. If the tenant dismantles structural changes, they must restore the original condition of the respective rental property at their own expense.

(2)

The landlord may carry out repairs and structural changes which become necessary to maintain the respective rental property or to remedy damage, after prior consent of the tenant, the consent may only be denied for good cause. The tenant must keep the premises under consideration accessible and must not obstruct the execution of the work. In the case of repairs and structural changes in laboratory rooms, the landlord shall coordinate the type, scope and duration of the work with the tenant and then carry out the work on the basis of the agreements made. The rooms may be entered in a urgency and in cases of emergency to prevent or remedy damage, the laboratories may only be entered in an emergency, even outside normal business hours; the landlord will attempt to notify the tenant in advance.

(3)

Insofar as work is permitted under Section 7 Nos. (1) and (2), the tenant may only demand replacement or reduction if they can prove that the work completely or partially precludes or significantly impairs the use of the respective rental property for the agreed purpose.

(4)

If the tenant brings items into a rental property, there is no transfer of ownership to the landlord, except in the cases of Section 946 et seq. German Civil Code. Upon transfer of ownership in these cases, the financial compensation provided for by law in accordance with Section 951 of the German Civil Code shall be applied.

---

(5)

In agreement with the landlord, the tenant is entitled to install appropriate advertising facilities on the buildings at their own expense. Upon termination of the rental relationship, the tenant shall restore the previous condition.

#### **Section 8 Traffic safety obligation**

The tenant shall assume and fulfil all traffic safety obligations in the respective rental property from the time of handover. This also includes the obligation to clear and grit the access to and outside areas of the rental property in winter.

#### **Section 9 Extraordinary termination**

The landlord may terminate the rental relationship without notice if the tenant is in arrears with an amount equivalent to two months' rent despite a warning with a grace period set by registered letter. The legal rights of the tenant to extraordinary termination remain unaffected.

#### **Section 10 Insurance**

(1)

The tenant undertakes to insure at their own expense all items in their ownership in the respective rental property, e.g. technical systems, equipment and, if applicable, pipe networks, all of their technical facilities and, if applicable, equipment, the risk of glass breakage and public liability insurance.

(2)

Should the tenant wish the landlord to include technical equipment, facilities, pipe networks or operational facilities which are owned by the tenant and which are fixed to the building in the building's property insurance, the tenant must inform the landlord in writing. The additional premiums charged by the property insurer for this purpose shall be borne in full by the tenant.

(3)

To cover damage caused by fire, storm, hail, damage caused by other natural hazards as well as damage caused by mains water, the landlord shall take out adequate building insurance as well as property and land owner's liability insurance for the rental property.

#### **Section 11 Rent security deposit**

(1)

a) Two weeks before handing over the rental property, the tenant shall provide a rent deposit of € 2,756,611.20 (gross rent in accordance with Section 3 No. (1) of the contract for rental property 1 including VAT for 24 months). The landlord may use the deposit to satisfy any claims they may have against the tenant during or after termination of the rental duration in connection with the contract. The landlord is obliged to inform the tenant in advance of any claim from the deposit. If the tenant makes use of the deposit during the rental duration, the tenant is obliged to immediately replenish it to the agreed amount.

---

b) Two weeks before handing over rental property 2, the tenant shall pay a deposit of €2,756,611.20 (gross rent in accordance with Section 3 No. (1) of the contract for rental property 2 including VAT for 24 months). The landlord may use the deposit to satisfy any claims they may have against the tenant during or after termination of the rental duration in connection with the contract. The landlord is obliged to inform the tenant in advance of any claim from the deposit. If the tenant makes use of the deposit during the rental duration, the tenant is obliged to immediately replenish it to the agreed amount.

(2)

The deposit is to be made in the form of a transfer to a deposit account to be named by the landlord. The deposit is to be invested with interest. An interest payment increases the security and is due to the tenant after termination of the contract.

The tenant may also provide security in the form of an irrevocable, unconditional and directly enforceable bank guarantee, in which the right of deposit, the defence of contestability and set-off and the right of advance action are excluded; however, the waiver of the defence of set-off shall only apply to the extent that the counterclaim has not been recognised or legally assessed. Only a German commercial bank can be a suitable guarantor. The bank guarantee must provide for the exclusive jurisdiction of the Regional Court of Tübingen and the exclusive application of German law.

(3)

The landlord is entitled to refuse to hand over the respective rental property if the tenant has not provided the deposit according to Nos. (1) and (2). Irrespective of the refused handover of the rental property, the tenant shall be obliged to pay the rent from the point in time at which the handover could have taken place if the deposit had been made in time. The extraordinary right of termination of the landlord remains unaffected.

(4)

The landlord must return the deposit six months after the rental property has been returned in accordance with the contract and any claims have been settled in full, but not before two months have elapsed after the landlord has submitted a final invoice for operating and ancillary costs. If necessary, a partial return must be made

#### **Section 12 End of the rental duration**

At the end of the rental duration, the rental property is to be handed over cleaned with all keys in the condition that can be expected after careful handling during the rental duration and after execution of the contractually agreed maintenance and repair work. With regard to structural changes, Section 7 of this contract shall apply.

All keys, including those procured by the tenant themselves, must be returned.

#### **Section 13 Deadlines**

The landlord has submitted an application for a building permit for the planned entire construction project, which is capable of being approved, on the basis of the documents mentioned in Section 1 No. (1) of this contract to the competent lower building authority, the City of Tübingen, on 04.19.2018. Reference is made to Section 1 No. (4).

---

**Section 14 Rights of withdrawal**

The parties have agreed on the following rights of withdrawal, which shall apply to the contract as a whole. If a right of withdrawal is exercised, the rental relationship does not come into existence or ends when the withdrawal takes effect.

(1)

The tenant expressly reserves the right of withdrawal from this contract. This right may be exercised by the tenant if

- a) no enforceable building permit for the rental property in favour of the landlord has been obtained by 10.20.2018; or
- b) construction has not commenced by 11.15.2018 at the latest for construction phase 1 or by 04.15.2019 at the latest for construction phase 2; Section 2 No. (1) Paragraph 2 of this contract shall apply accordingly; construction in this sense shall be deemed to have commenced when the construction site has been set up on the building site and the excavation of the building pit has begun; or
- c) one of the rental properties has not been completed and handed over by the latest time of handover as provided for in Section 2 No. (1) - irrespective of an extension of the deadline in accordance with Section 2 No. (1), last paragraph - and cannot be completed and handed over within a further 6 months due to significant actual or legal circumstances. The latter is accepted if the rental property is not completed and handed over within the aforementioned additional period of 6 months. If rental property 1 has already been handed over, the parties will negotiate an adjustment of the rental contract with regard to the rental property, rental period and rent as well as an alternative planning for rental property 2, irrespective of the forfeiture of a contractual penalty by the landlord.

(2)

The contracting parties agree that the withdrawal from the contract is to be exercised by the tenant in writing as follows:

- to the above No. (1) a: taking into account the possible postponement Section 2 No. (1) Paragraph 2 until 11.15.2018 at the latest.
- to the above No. (1) b: taking into account the possible postponement of Section 2 No. (1) Paragraph 2 until 07.15.2019 at the latest with regard to rental property 1 and until 12.15.2019 at the latest with regard to rental property 2
- to the above No. (1) c: no later than three months after the unsuccessful expiry of the above-mentioned 6-month period.
- The receipt of the notice of withdrawal to the landlord is decisive for the timeliness of the withdrawal.

(3)

The landlord expressly reserves the right of withdrawal. This can be exercised if:

- a) The landlord expressly reserves the right of withdrawal. This right may be exercised if: a legally binding purchase contract between the landlord and the University City of Tübingen in the form of Section 311b of the German Civil Code has not been concluded for the building plot by 06.30.2018 at the latest.

or

- b) The landlord expressly reserves the right of withdrawal. This right may be exercised if: the building permit for the planned construction project on the rental property has not been issued in an enforceable manner by 10.20.2018.
-

(4)

The contracting parties agree that the withdrawal from the landlord is to be exercised in writing as follows:

- to the above No. (3) a: 07.31.2018 at the latest
- to the above No. (3) b: 11.20.2018 at the latest

The receipt of the declaration of withdrawal to the tenant is decisive for the timeliness of the withdrawal.

(5)

In the event that one of the contracting parties makes use of a right of withdrawal in accordance with Section 14 of this contract, the parties mutually waive all claims for damages against the other party, except to the extent that these arise due to death, personal injury or damage to health, or for damages based on a grossly negligent breach of duty by the other contracting party or on an intentional or grossly negligent breach of duty by one of their legal representatives or their vicarious agents. This shall not apply if the landlord has not submitted a complete and approvable building application which meets the requirements of the development plan and the state building regulations of Baden-Württemberg and the implementation regulations issued for this purpose (LBO AVO, LBO WO) or if the latest handover date in accordance with Section 2 No. (1) is exceeded.

#### **Section 15 Contractual penalty for late handover**

If the landlord has not handed over rental property 1 in accordance with Section 1 No. (1) to the tenant by 01.15.2020 at the latest or rental property 2 has not been built in accordance with the contract by 09.15.2020 at the latest, the landlord is obliged to pay a contractual penalty of €5,000.00 for each day or part thereof which the tenant is unable to use the respective rental property due to the delayed handover, but not more than one month's rent for the rental property concerned. Section 2 No. 1 paragraph 2 of this contract shall apply accordingly. This does not exclude the tenant's assertion of further damages.

#### **Section 16 Temporary storage use rental property 1/construction costs**

(1)

The building application for rental property 1 and 2 was prepared and submitted by the landlord on the basis of the documents (site plan / floor plans / building specifications) attached to this contract as **Annexes**. Reference is made to Section 1 No. (1) of this contract.

(2)

If and insofar as the tenant intends to have the storage and/or logistics space on the ground floor and 1st floor of rental property 1 converted into office space, the tenant shall notify the landlord in writing. Landlord and tenant agree that the conversion into office space is only possible in relation to whole floors on the ground floor and first floor and must comply with the equipment standards in **Annex 3** to this contract. Landlord and tenant shall agree on the start and duration of the dismantling, conversion and extension work. Landlord and tenant agree for clarification that for the period of interruption of use due to the dismantling, conversion and extension work on the ground floor and 1st floor, the rent shall remain unchanged and the tenant shall not be entitled to withhold or reduce the rent during this period, in particular with reference to the dismantling, conversion and extension work on the ground floor and 1st floor, irrespective of the legal grounds.

---

(3)

It is agreed between the landlord and tenant that in the event of the dismantling of the storage/logistics space on the ground floor and first floor and a conversion/fitting of office space, the tenant shall bear the costs arising from this in full.

If a change in the purpose of use is to be applied for at the competent authority, the landlord is obliged to submit a corresponding building application to the competent authority without delay at their own expense and in consultation with the tenant.

(4)

The landlord and the tenant agree that the tenant does not acquire ownership of dismantling and installation work carried out by the landlord on rental property 1, nor of the equipment brought in by the landlord, nor of the rental property as a whole by assuming the costs. The rent for rental property 1 remains unchanged.

(5)

In the event of a change of use and/or a corresponding conversion, the parties shall immediately prepare a written supplement to the rental contract together with plans for this and link it to this contract.

#### **Section 17 Rental property 2 parking spaces**

The landlord allows the tenant, after handing over the rental property 2 in accordance with Section 1 in conjunction with Section 15 of this contract, to create vehicle parking spaces on the partial areas of the property designated for rental property 2, as shown on the site plan for the building permit, for the exclusive use of the tenant's employees, visitors and customers. All services in connection with planning, approval, construction, maintenance, repair, replacement renewal, use and dismantling of the parking spaces and their access roads shall be carried out by the tenant at their own risk and entirely at their own expense. The tenant is also responsible for the traffic safety obligation for all parking spaces and access roads; this expressly includes the removal of snow and ice in winter. At the request of the tenant, the landlord shall, unless the landlord has good cause to refuse to do so, make all relevant declarations. In connection with the creation of the parking spaces on the part of the tenant is expressly referred to in Section 1 No. (3) para. 2 of this contract.

#### **Section 18 Assumption of debt**

CureVac AG (Registration Court Stuttgart - HRB 754041), represented by the members of the Management Board, Dr Franz-Werner Haas and Dr Mariola Fotin-Mieczek, residing at Paul-Ehrlich-Straße 15, 72076 Tübingen, Germany, irrevocably and jointly and severally assumes the obligations of the tenant under this rental contract after completion of their studies and in full knowledge of the contents of the present rental contract.

#### **Section 19 Loss of the rental properties**

In the event of the loss of the rental property, the landlord is not obliged to rebuild the rental property. The rights of the tenant remain unaffected. The landlord hereby undertakes to pass on to the tenant the proportional compensation of the building insurer for the parts of the building constructed by the tenant and the equipment installed by the tenant.

---

**Section 20 Final provisions**

(1)

The parties agree on a six-week binding period for the application to conclude this contract, starting on the day of the first signing of the contract. Acceptance of the application must take place within the aforementioned period, but not the receipt of the acceptance by the applicant. In this respect, the timeliness according to Section 151 of the German Civil Code is waived. Should the last signature be made outside the application commitment period, this is to be regarded as a new application, for which a six-week commitment period applies.

(2)

The rental parties are aware of the special statutory written form requirements of Sections 550, 578, 126 of the German Civil Code. They hereby mutually undertake to perform all actions and make all statements at the request of either party at any time which are necessary to comply with the statutory written form requirement and not to terminate the rental contract prematurely with reference to non-compliance with the statutory written form. This applies not only to the conclusion of the original contract/main contract, but also to supplementary, amendment and expansion contracts. This provision does not apply to any buyer of the rental property who, as a result of the acquisition by act of law in accordance with Section 566 of the German Civil Code, enters into the rental relationship in place of the landlord.

(3)

Should a condition of this contract be or become legally ineffective in whole or in part, this shall not affect the validity of the remaining conditions and the contract as a whole. The contracting parties undertake to replace an ineffective condition or an ineffective part of a condition with a legally effective condition that corresponds to the intended economic purpose of the ineffective condition.

(4)

There are no verbal ancillary agreements to this contract. Subsequent supplements and changes are only effective if they are set down in writing. This also expressly applies to the amendment of the written form requirement.

(5)

The place of performance and jurisdiction for all disputes arising from this contract is Tübingen.

(6)

The tenant confirms that they have received the contract from the landlord prior to its conclusion and signing. They also confirm that they have had sufficient opportunity to review and discuss the individual contractual conditions with the landlord and that they have understood the contents of the contract.

(7)

Each party shall receive a copy of this contract.

---

**Section 21 Annexes**

Subsequent annexes are integral parts of the contract:

<b>Annex 1</b>	Site plan BA1
<b>Annex 1a</b>	Site plan BA2
<b>Annex 2</b>	Floor Plans, Sections and Views BA1
<b>Annex 2a</b>	Floor Plans, Sections and Views BA2
<b>Annex 3</b>	Building description BA1, BA2
<b>Annex 4</b>	Interface list
<b>Annex 5</b>	Plan of outdoor facilities
<b>Annex 6</b>	Schedule for completion
<b>Annex 7</b>	Form for handover protocol
<b>Annex 8</b>	Statement of operating costs

Supplement to the rental contract

Between

**Fränkel Immobilien-Service GmbH**, Allmandstraße 6, 88045 Friedrichshafen

(hereinafter, "landlord")

And

**CureVac Real Estate GmbH**, Paul-Ehrlich-Straße 15, 72076 Tübingen

(hereinafter, "tenant")

(together hereinafter, "parties")

**Preamble**

On 6 June 2018, the parties concluded a rental contract for logistics, office and laboratory buildings on the land at Friedrich-Miescher-Strasse in the Tübingen district.

The landlord acquires this plot of land from the University City of Tübingen and then develops the rented property.

In Section 14 (3) of the rental contract, the landlord reserves the right to withdraw from the rental contract if a legally binding purchase contract for the building plot has not been concluded between the landlord and the University City of Tübingen in the form of Section 311 b German Civil Code (BGB) by 30 June 2018 at the latest. In accordance with Section 14 (4) of the rental contract, the landlord can exercise the right of withdrawal in writing by 31 July 2018 at the latest.

There were delays in the conclusion of the intended property purchase contract between the University City of Tübingen and the landlord; this means that the purchase contract between the University City of Tübingen and the landlord cannot be notarised as planned.

Against this background, the contracting parties agree to the following new provision to Section 14 (3) and (4) of the rental contract as a supplement to the rental contract dated 6 June 2018:

---

1. Section 14 (3) (a) of the rental contract is amended as follows:

*“The landlord expressly reserves the right to withdraw from the contract. This can be exercised if:*

- a) a legally binding purchase contract between the landlord and the University City of Tübingen in the form of Section 311 b of the German Civil Code (BGB) has not been concluded for the building plot by 31 August 2018 at the latest.”*

2. Section 14 (4) of the rental contract is amended as follows:

*“The contracting parties agree that the landlord’s withdrawal from the contract must be exercised in writing as follows:*

*- to the above point number (3) a) by 31 August 2018 at the latest”*

3. The remaining provisions of the rental contract dated 6 June 2018 remain unaffected.

This document is an English translation of a document prepared in German. In case of any ambiguity, the German text shall prevail.

**2. Supplement to the rental contract  
dated June 6, 2018  
and 1st supplement dated July 16/23, 2018**

between

**Fränkel Immobilien-Service GmbH**, Allmandstraße 6, 88045 Friedrichshafen

and

**CureVac Real Estate GmbH**, Paul-Ehrlich-Straße 15, 72076 Tübingen

and

**HSB Vermietungs- und Verpachtungs- GmbH & Co. KG**, Kaiserstraße 58,  
88348 Bad Saulgau

(Hereinafter also referred to as "**parties**")

**Preamble**

Fränkel Immobilien-Service GmbH concluded a rental contract with CureVac Real Estate GmbH on June 6, 2018 for two buildings still to be constructed on the land at Friedrich-Miescher-Strasse 15 in Tübingen (hereinafter referred to as the "**land**"). Fränkel Immobilien-Service GmbH was not yet the owner of the land at the time the rental contract was concluded.

Fränkel Immobilien-Service GmbH has in the meantime refrained from executing the overall project and is entitled to withdraw from the rental contract until August 31, 2018 in accordance with Section 14 of the rental contract dated June 6, 2018 in conjunction with the 1st supplement to the rental contract dated July 16/23, 2018.

In order to ensure that the project can be realised in a timely manner, HSB Vermietungs- und Verpachtungs- GmbH & Co. KG intends to acquire the land itself in the first week of September 2018 and enter into the rental contract from June 6, 2018 and the first supplement to the rental contract from July 16/23, 2018.

In order not to risk any further delays to the project, which is expected to start construction on September 17, 2018, HSB Vermietungs- und Verpachtungs- GmbH & Co. KG also does not await the conclusion of a purchase contract for the project with a buyer. Instead, after conclusion of a purchase contract for the project between HSB Vermietungs- und Verpachtungs- GmbH & Co. KG and a buyer, the parties intend to transfer the lease to the buyer by way of a further supplement (see No. 9).

Against this background, the parties agree to the following provisions as the 2nd supplement to the rental contract dated June 6, 2018 together with the 1st supplement dated July 16/23, 2018:

1. Fränkel Immobilien-Service GmbH withdraws as landlord from the rental contract with CureVac Real Estate GmbH with effect from the signing of this 2nd supplement to the rental contract dated June 6, 2018 together with the 1st supplement dated July 16/23, 2018.
2. HSB Vermietungs- und Verpachtungs- GmbH & Co. KG will replace Fränkel Immobilien-Service GmbH as landlord in the existing rental contract dated June 6, 2018 together with the 1st supplement dated July 16/23, 2018 with CureVac Real Estate GmbH taking effect with the signing of this second supplement to the rental contract on the part of the landlord.
3. Section 2, No. 1, third subparagraph, sentence 1 of the rental contract of June 6, 2018 is amended as follows:

*"The Landlord undertakes to hand over the relevant rental property immediately after completion of the relevant rental property as described in Section 1 No. (1) of this contract, probably on 11.15.2019, at the latest on 02.15.2020 for rental property 1 and 04.15.2020, at the latest on 09.15.2020 for rental property 2."*

4. Section 11, No. 1, letter a), sentence 1 of the rental contract dated June 6, 2018 is amended as follows:

*"The tenant shall provide a deposit of € 344,576.40 (gross rent in accordance with Section 3 No. 1 of the contract for rental property 1 including VAT for 3 months) two weeks before the handover of rental property 1".*

5. Section 11, No. 1, letter b), sentence 1 of the rental contract dated June 6, 2018 is amended as follows:

*"The tenant shall provide a deposit of € 344,576.40 (gross rent in accordance with Section 3 No. 1 of the contract for rental property 1 including VAT for 3 months) two weeks before the handover of rental property 2".*

6. In addition, the parties agree to the regulation on the payment of a construction cost subsidy by the tenant, which is in the **annex** to this supplement to the rental contract, as a new Section 11 a of the rental contract.
7. Section 14, para. 1, letter a) of the rental contract from June 6, 2018 in the version of the first supplement to the rental contract of July 16/23, 2018 is amended as follows:  
*"The landlord expressly reserves the right to withdraw from the contract. This can be exercised if*
  - a) *a legally binding purchase contract between the landlord and the University City of Tübingen in the form of Section 311 b of the German Civil Code (BGB) has not been concluded for the building plot by 30 September 2018 at the latest".*
8. Section 14, para. 4 of the rental contract dated June 6, 2018 in the version of the first supplement to the rental contract dated July 16/23, 2018 is amended as follows:  
*"The contracting parties agree that the withdrawal from the landlord is to be exercised in writing as follows:*  
*- to the above number (3) a) by 30 September 2018 at the latest."*
9. Section 15, sentence 1 of the rental contract dated June 6, 2018 in the version of the first supplement to the rental contract dated July 16/23, 2018 is amended as follows:  
*"If the landlord has not handed over to the tenant rental property 1 in accordance with Section 1 (1) by 02.15.2020 at the latest or rental property 2 by 09.15.2020 at the latest, as specified in the contract, the landlord is obliged, due to the delayed handover, to pay the tenant a contractual penalty of € 5,000 for each day that the tenant is unable to use the respective rental property but up to a maximum of one month's rent for the rental property concerned."*
10. HSB Vermietungs- und Verpachtungs- GmbH & Co. KG undertakes to provide a guarantee from its general contractor for the construction project, Georg Reisch GmbH & Co. KG, with a total amount of up to € 2,000,000.00, in order to secure any possible claim for damages by CureVac Real Estate GmbH against HSB Vermietungs- und Verpachtungs- GmbH & Co. KG resulting from the fact that HSB Vermietungs- und Verpachtungs- GmbH & Co. KG does not hand over the rental property 1 and the rental property 2 to CureVac Real Estate GmbH at the latest handover times specified in No. 3 of this second supplement.  
  
The guarantee shall expire upon handover of rental property 1 and rental property 2 or if HSB Vermietungs- und Verpachtungs- GmbH & Co. KG has offered to hand over rental property 1 and rental property 2 to CureVac Real Estate GmbH in a manner that causes default of acceptance.

11. HSB Vermietungs- und Verpachtungs- GmbH & Co. KG is entitled to transfer its rights and obligations under this contract to a third party at any time without the consent of CureVac Real Estate GmbH. With the announcement of this legal succession to CureVac Real Estate GmbH, HSB Vermietungs- und Verpachtungs- GmbH & Co. KG shall terminate all rights and obligations arising from the contractual relationship with CureVac Real Estate GmbH. The provisions of Sections 566(2), 578(1) of the German Construction Contract Procedures (BOB) are excluded. The HSB Vermietungs- und Verpachtungs- GmbH & Co. KG is not liable to CureVac Real Estate GmbH as guarantor for the fulfilment of the rental contract by the buyer in the event of the sale of the rental property. The contracting parties must record such a change of landlord in a written supplement to the rental contract.

12. The remaining contractual provisions of the rental contract dated June 6, 2018 apply unchanged between HSB Vermietungs- und Verpachtungs- GmbH & Co. KG as the new landlord and CureVac Real Estate GmbH as tenant.

**Section 11a Construction cost subsidy/rent security deposit**

1. The parties agree that the rental property will be erected by the landlord according to the tenant's individual needs of use.

In order to be able to construct the new rental property, the tenant pays a construction cost subsidy to the landlord, which also serves as a rent security deposit.

The construction cost subsidy is paid by the tenant for both construction phases.

The construction cost subsidy for the 1st construction phase amounts to € 2,756,611.20 (gross rent according to Section 3 (1) of the rental contract for rental property 1 including VAT for 24 months). It is due for payment to the landlord from the start of construction of the 1st construction phase, whereby construction commences upon presentation of the notice of commencement of construction in accordance with Section 59 (2) of the Regional Building Regulations (LBO). Payment shall be made concurrently against delivery of the guarantee of Georg Reisch GmbH & Co. KG, which is described in more detail in Section 10 of the 2<sup>nd</sup> supplement to the rental contract (to which this regulation is attached as an annex).

The construction cost subsidy for the 2nd construction phase amounts to € 2,756,611.20 (gross rent according to Section 3 (1) of the rental contract for rental property 2 including VAT for 24 months). This construction cost subsidy is due for payment to the landlord at the start of construction work on the 2nd construction phase, whereby construction commences at the start of the excavation work. Payment shall be made concurrently against delivery of the guarantee of Georg Reisch GmbH & Co. KG, which is described in more detail in Section 10 of the 2<sup>nd</sup> supplement to the rental contract (to which this regulation is attached as an annex).

The contracting parties shall make the following arrangements for handling the construction cost subsidy by mutual agreement in accordance with Section 547 of the German Civil Code (BGB).

2. The construction cost advances paid by the tenant in accordance with No. 1 of this agreement shall bear interest at a rate of 1.5% p.a., payable by the landlord at the end of each year. The amount of interest is added to the advance on construction costs.
3. The advances on construction costs paid by the tenant are offset in equal parts against the current monthly rent owed under the contract for the last 5 years of the rental period. By offsetting, the rent for the last 5 years of the rental period is partially satisfied monthly. The construction cost subsidies will only be offset against the rent; the tenant is obliged to bear the operational costs until the end of the rental period in accordance with Section 3 No. 5 of the rental contract and to make the advance payment of operational costs in accordance with Section 3 Paragraphs 1 and 7 of the rental contract to the landlord in due time in accordance with Section 3 Paragraph 3 of the rental contract.

4. If the rental relationship ends before expiry of the contractually agreed rental period for an important reason attributable to the tenant, the construction cost subsidy not yet offset against the rent up to this point in time in accordance with the above section 3.), which then serves as a rent security deposit, shall be offset as follows:

- The remaining construction cost subsidy is initially offset against the loss of rent that the landlord suffers in the period between the termination of the tenancy and the establishment of a new subsequent tenancy.
- The construction cost subsidy is offset against the expenses incurred by the landlord to convert the rental property in order to enable the rental property to be re-let through a subsequent tenancy.
- The construction cost subsidy is offset against the landlord's loss of rental income which the landlord suffers until the expiry of the contractually agreed fixed rental period because the rent of the subsequent tenancy is lower than the last contractual rent of this contract.

The remaining construction cost subsidy or rent security deposit shall be returned by the landlord to the tenant in accordance with the principles of restitution of unjust enrichment (Sections 812 et seq. of the German Civil Code (BGB)). In this case, however, the existence of unjust enrichment is only finally determined at the end of the fixed rental period by balancing the construction cost subsidy against the above-mentioned deductions (indents 1 to 3). The objection of financial loss is excluded.

- An important reason for termination of the tenancy attributable to the tenant is also a termination of the tenancy in accordance with Section 109 of the German Insolvency Code (InsO) by the temporary or permanent insolvency administrator in the event of an application and/or opening of insolvency proceedings on the assets of the tenant.

5. If the rental relationship ends before expiry of the agreed rental period for an important reason for which the landlord is responsible, the tenant is in principle entitled to claim repayment of the construction cost subsidy from the landlord. The landlord is entitled to offset all claims against the tenant to which the landlord is entitled from the tenancy against the tenant's claim for repayment, in particular arrears from rent payments and advance payments of operational costs, as well as claims of the landlord from completed operational costs settlements. This offsetting must take place before the rent security deposit is used in accordance with Section 11.
6. Any claims of the tenant for repayment of the construction cost subsidies after the settlements in accordance with the above paragraphs shall bear interest at the earliest from the effective date of termination or other termination of the tenancy.

*This document is an English translation of a document prepared in German. In case of any ambiguity, the German text shall prevail.*

**3rd Supplement to the rental contract dated 6 June 2018  
together with 1st supplement dated 16/23 July 2018  
and 2nd supplement dated 17/20/22 August 2018**

- hereinafter referred to as "**CureVac**" -

and

**HSB Vermietungs- und Verpachtungs- GmbH & Co. KG**, Kaiserstraße 58,  
88348 Bad Saulgau

- hereinafter referred to as "**HSB**" -

- CureVac and HSB are hereinafter referred to as "**parties**" -

**Preamble**

There is a rental contract between CureVac and HSB dated 6 June 2018, together with a first supplement to the rental contract dated 16/23 July 2018 and a second supplement to the rental contract dated 17/20/22 August 2018 (hereinafter referred to collectively as the "**rental contract**") for two buildings still to be constructed on the land at Friedrich-Miescher-Strasse 15 in Tübingen (hereinafter referred to as the "**land**"). HSB acquired the land from the City of Tübingen by notarial deed dated September 18, 2018 (deed no. 67 46/2018 issued by notary Werner Dieterle with official residence in Ludwigsburg). On 17 September 2018, HSB began construction of the buildings rented to CureVac.

HSB intends to conclude a notarised purchase contract for the land, in which HSB undertakes to construct the buildings to be erected under the rental contract, with a buyer. The purchase contract should be designed in such a way that the transfer of ownership to the buyer takes place after the buildings to be constructed are handed over to CureVac as per the rental contract.

---

In the interim, planning discussions have taken place between CureVac and HSB to revise the existing planning for rental property 1 and rental property 2. The floor plans were revised and updated on the basis of the agreed changes in the design of rental property 1 and rental property 2. The amended plans are attached to this supplement as an **annex**. HSB's obligation to erect rental property 1 and rental property 2 is now based on these amended plans, which are attached as an **annex**.

The increased/reduced costs associated with the plan changes are recorded in an increased/reduced cost list. If this cost calculation results in an increase in costs compared to the original planning, these increased costs will be borne by CureVac as special requests by the tenant and paid to HSB. Any reduction in costs will be reimbursed by HSB to CureVac. The invoice for increased/reduced costs will be made in a separate invoice from the rental contract.

The construction cost subsidy agreed in Section 11a of the rental contract (which became part of the contract by way of the 2nd supplement to the rental contract) will be paid by CureVac to HSB after the conclusion of this 3rd supplement and will be evenly offset against the monthly rents of the last 5 years of the rental period.

The parties assume that the provision of Section 566c of the German Civil Code (BGB) does not apply to the construction cost subsidy in the specific case, since the requirements developed in jurisdiction for an exception to Section 566c of the German Civil Code are met, so that the construction cost subsidy is also effective vis-à-vis a buyer, i.e. in accordance with the provisions of Section 11a of the rental contract it can be evenly offset against the monthly rents of the last 5 years of the rental period and any reimbursement liability after the transfer of the rental relationship to a buyer is borne solely by the buyer as the new landlord.

As a purely precautionary measure, the parties nevertheless conclude this 3rd supplement to the rental contract, in which, among other things, Section 566c of the German Civil Code is to be waived:

1. The parties agree that the rental contract is transferred to the new buyer as the new landlord at the time of registration of a buyer as the new owner of the land in the land register. HSB withdraws from the rental contract upon registration of the buyer as the new owner of the land in the land register.

HSB declares that according to the current conception, the purchase contract with the buyer provides for a transfer of ownership to the buyer at a point in time after the transfer of rental property 1 and rental property 2 to CureVac.

---

In the event that the purchase contract to be concluded with a buyer provides for transfer of ownership before rental property 1 and rental property 2 are handed over to CureVac, HSB undertakes to provide an extended guarantee by Georg Reisch GmbH & Co. KG, which secures the obligation of the respective landlord to hand over rental properties 1 and 2 in due time according to Section 1 of the rental contract at the times specified in No. 3 of the second supplement to the rental contract as well as for all claims for damages of CureVac, which result from the fact that the respective landlord does not hand over rental property 1 and rental property 2 to CureVac at the times specified in No. 3 of the second supplement to the rental contract. The guarantee of Georg Reisch GmbH & Co. KG dated 13 September 2018 is to be returned by CureVac as and when the extended guarantee is handed over.

2. The parties assume that Section 566c of the German Civil Code does not apply to the construction cost subsidy to be paid by CureVac, since the following points are cumulative according to the parties' consistent assessment and thus the requirements developed by jurisdiction for an exemption from the application scope of Section 566c of the German Civil Code are met:

- The construction cost subsidy was agreed in the 2nd supplement to the rental contract and is not based on any other agreement.
  - The construction cost subsidy is offset against the expected rent due in the last five rental years.
  - The construction cost subsidy was paid from CureVac's own resources.
  - The construction cost subsidy is intended for the construction of rental property 1 and rental property 2 in accordance with the rental contract and is used by HSB for this purpose.
  - The material value of the land, which HSB acquired from the City of Tübingen undeveloped, is increased by the construction of rental property 1 and rental property 2.
  - The increase in material value actually also benefits a buyer. In this respect, the parties hereby clarify that the development of the land with rental property 1 and rental property 2, and thus also the rental of the contractual property to CureVac, could not take place without the construction cost subsidy.
-

In this respect, HSB undertakes to use the construction cost subsidy exclusively for the construction of rental property 1 and rental property 2 in accordance with the rental contract.

3. As a precautionary measure, CureVac and HSB hereby agree that Section 566c of the German Civil Code shall not apply with regard to the construction cost subsidy to be paid by CureVac, since even a buyer without the restriction of Section 566c of the German Civil Code shall be bound by the agreement between the HSB and CureVac in Section 11a of the rental contract concerning the construction cost subsidy and its offsetting against the monthly rent in the last five rental years. As a consequence, any reimbursement liability shall also be borne in full by one buyer alone as soon as the rental relationship has been transferred to a buyer as the new landlord or the buyer has entered by law (Section 566 (1) BGB in conjunction with 567a BGB) into the rental contract in place of HSB.

HSB undertakes to oblige a buyer of the land to participate in a three-page formal supplement to the rental contract in which the provision of Section 566c of the German Civil Code (BGB) is waived and assessed, that the buyer is bound by the agreement between HSB and CureVac in Section 11a of the rental contract concerning the construction cost subsidy and its offsetting against the monthly rent for the last five rental years and that the buyer alone is responsible for any reimbursement liability after taking over the rental relationship as the new landlord.

HSB and CureVac undertake to cooperate on such a three-page formal supplement with a buyer.

4. HSB or – after transfer of the rental relationship according to item 1 – a buyer are entitled to repay CureVac the construction cost subsidy paid at any time. In this case also the rent in the last five tenants of CureVac is to be paid in full according to the contract, i.e. an offsetting does not take place. The contracting parties must record such a repayment of the construction cost subsidy and the offsetting against the rent in the last five rental years, which is no longer applicable, in a written supplement to the rental contract.
  5. The provisions of Section 566 (2) of the German Civil Code (BGB) are waived by mutual agreement.
  6. CureVac agrees to the transfer of a rent security deposit paid in accordance with Section 11 of the rental contract to a buyer. After transfer of the rental relationship to a buyer as new landlord and transfer of the rent security deposit to a buyer, HSB is no longer liable for the repayment of the rent security deposit to CureVac.
-

7. HSB's obligation to construct rental property 1 and rental property 2 is now based on the floor plans in the **annex** to this supplement.

The increased/reduced costs associated with the plan changes are recorded in an increased/reduced cost list. If this cost calculation results in increased costs compared to the original plans, these increased costs will be borne by CureVac as special requests by the tenant and paid to HSB. HSB will reimburse any reduced costs to CureVac. The invoicing of increased/reduced costs takes place in a separate invoice from the rental contract.

8. The remaining contractual provisions of the rental contract dated 6 June 2018, the 1st supplement to the rental contract dated 16/23 July 2018 and the 2nd supplement to the rental contract dated 17/20/22 August 2018 continue to apply unchanged.

**4th Supplement to the rental contract dated 6 June 2018  
together with 1st supplement dated 16/23 July 2018,  
2nd supplement dated 17/20/22 August 2018  
and 3rd Supplement dated 22 October/5 November 2018**

between

**CureVac Real Estate GmbH**, Paul-Ehrlich-Straße 15, 72076 Tübingen

- hereinafter referred to as "**CureVac**" -

and

**HSB Vermietungs- und Verpachtungs- GmbH & Co. KG**, Kaiserstraße 58, 88348 Bad Saulgau

- hereinafter referred to as "**HSB**" -

- CureVac and HSB are hereinafter referred to as "**parties**" -

**Preamble**

There is a rental contract between CureVac and HSB dated 6 June 2018, together with a first supplement to the rental contract dated 16/23 July 2018, a second supplement to the rental contract dated 17/20/22 August 2018 and a third supplement to the rental contract dated 22.10./5.11.2018 (hereinafter referred to collectively as the "**rental contract**") for two buildings still to be constructed on the land at Friedrich-Miescher-Strasse 15 in Tübingen (hereinafter referred to as the "**land**").

Georg Reisch GmbH & Co. KG, as general contractor on behalf of HSB, has begun construction of the buildings that have been rented to CureVac.

In accordance with the notarial purchase contract signed by the notaries Dr Schwab, Dr Weiler, Munich on 19 December 2018, the land will be taken over by Tübingen 1 Property GmbH & Co. KG. Tübingen 1 Property GmbH & Co. KG will enter into the rental contract existing between the parties.

---

With this proviso, the parties agree as follows:

1.

Further planning discussions have taken place between CureVac and HSB to revise the existing plans for rental property 1 and rental property 2.

The plans which are annexed to supplement 3 and which define HSB's obligation to construct rental property 1 and rental property 2 shall be replaced by the parties by agreement with revised and amended planning documents agreed between the parties. HSB's obligation to build rental property 1 and rental property 2 is now based exclusively on the amended plans attached as **Annex 1 to this 4th supplement**.

The increased/reduced costs associated with the plan changes are recorded in an increased/reduced cost list. Insofar as this cost calculation results in increased costs compared to the original plans on which the original rental contract dated 6 June 2019 was based, these additional costs will be borne by CureVac as special requests by the tenant and paid to HSB. Any reduced costs will be reimbursed by HSB to CureVac. The invoice for the increased/reduced costs will be made in an invoice separate from the rental contract. The list of increased/reduced costs is dated 20.09.2019 and is available to the parties. As far as further changes to the plans, which lead to further increased/reduced costs, are agreed between the parties, this is done by a corresponding project change request, which must be approved by CureVac before the further change to the plans is carried out.

2.

The above-mentioned changes to the plans make it necessary to obtain a building permit from the city of Tübingen on 23 August 2018. The flat-rate fee charged by the planners to HSB for this will be reimbursed to HSB by CureVac on the basis of the offer made by Bodamer Faber Architekten on 25 February 2019, **Annex 2 to this 4th supplement**.

3.

The caretaker provided for under Section 6 of the rental contract in conjunction with Annex 8 No. 14 is not required, with the result that HSB does not have to provide a caretaker and CureVac does not have to bear any costs for a caretaker within the scope of operational costs.

INDEMNIFICATION AGREEMENT

THIS AGREEMENT IS MADE ON [DATE] BETWEEN

1. Mr[s]. [name], born in [place] on [date] (the "Indemnitee").
2. CureVac N.V., a public company with limited liability, having its corporate seat in Amsterdam (address: Friedrich-Miescher-Strasse 15, 72076 Tübingen, Germany, trade register number: 77798031) (the "Company").

WHEREAS

- A. The Company's articles of association contain an indemnification arrangement for, amongst others, current and former Managing Directors and Supervisory Directors.
- B. The Indemnitee serves as a [Managing Director][Supervisory Director].
- C. The Parties now wish to enter into this Agreement in order to lay down the terms applicable to the Indemnitee's indemnification.

THE PARTIES NOW HEREBY AGREE AS FOLLOWS

1 DEFINITIONS AND INTERPRETATION

1.1 Definitions

1.1.1 In this Agreement the following definitions shall apply:

<b>Agreement</b>	This indemnification agreement.
<b>Article</b>	An article of this Agreement.
<b>D&amp;O Insurance</b>	Directors and officers liability insurance.
<b>Disinterested Director</b>	Any Supervisory Director who is not, and has not been, involved in a Proceeding in respect of which the Indemnitee's entitlement to indemnification and/or advancements should be determined pursuant to Article 2.4.1 under a.

**Independent Counsel**

An attorney or a firm of attorneys which:

- a. is experienced in matters of corporate law in the appropriate jurisdiction(s);
- b. during a period of one year prior to being requested to determine the Indemnitee's entitlement to indemnification and/or advancements pursuant to Article 2.4.1 under b., has not represented any party involved in a Proceeding in a manner which is material to either Party; and
- c. under the applicable standards of professional conduct then prevailing, would not have a conflict of interests in representing either Party in determining the Indemnitee's entitlement to indemnification and/or advancements pursuant to Article 2.4.1 under b.

**Management Board**

The Company's management board.

**Managing Director**

A member of the Management Board.

**Party**

A party to this Agreement.

**Proceeding**

Any threatened, pending or completed suit, claim, action or legal proceedings of a civil, criminal, administrative, investigative or other nature, formal or informal, in which the Indemnitee is, or becomes, involved.

**Supervisory Board**

The Company's supervisory board.

**Supervisory Director**

A member of the Supervisory Board.

**1.2 Interpretation**

1.2.1 Terms that are defined in the singular have a corresponding meaning in the plural.

1.2.2 No provision of this Agreement shall be interpreted adversely against a Party solely because that Party was responsible for drafting that particular provision.

1.2.3 Although this Agreement has been drafted in the English language, this Agreement pertains to Dutch legal concepts. Any consequence of the use of English words and expressions in this Agreement under any law other than Dutch law shall be disregarded.

---

1.2.4 The word "including" is used to indicate that the matters listed are not a complete enumeration of all matters covered.

1.2.5 The titles and headings in this Agreement are for construction purposes as well as for reference. No Party may derive any rights from such titles and headings.

## **2 INDEMNIFICATION AND INSURANCE**

### **2.1 Entitlement to indemnification**

2.1.1 The Company shall indemnify the Indemnitee and hold the Indemnitee harmless against:

- a. any financial losses or damages incurred by the Indemnitee; and
- b. any expense reasonably paid or incurred by the Indemnitee in connection with any Proceeding,

in each case to the extent this relates to the Indemnitee's current (or former) position as [Managing Director][Supervisory Director] and to the extent permitted by applicable law.

2.1.2 The right to indemnification conferred in Article 2.1.1 shall continue as to the Indemnitee who has ceased to hold office as [Managing Director][Supervisory Director] and shall inure to the benefit of the Indemnitee's heirs, executors and administrators.

### **2.2 Advancements**

2.2.1 The Company shall promptly advance all reasonable and necessary expenses incurred by the Indemnitee in connection with any Proceeding to the extent that the Company reasonably believes that the Indemnitee is entitled to indemnification pursuant to Articles 2.1.1 and 2.3.1 in connection with such Proceeding, subject to the Indemnitee submitting an itemised advance request to the Company.

2.2.2 To the extent that the Company has provided advancements pursuant to Article 2.2.1 in connection with a Proceeding in respect of which the Indemnitee is not entitled to indemnification pursuant to Articles 2.1.1 and 2.3.1, such advancements shall promptly be reimbursed by the Indemnitee.

### **2.3 Limitations**

2.3.1 No indemnification shall be given to the Indemnitee:

---

- a. if a competent court or arbitral tribunal has established, without possibility for appeal, that the acts or omissions of the Indemnitee that led to the financial losses, damages, expenses or Proceeding are of an unlawful nature (including acts or omissions which are considered to constitute malice, gross negligence, intentional recklessness and/or serious culpability attributable to the Indemnitee);
- b. to the extent that the Indemnitee's financial losses, damages and expenses are covered under insurance (including any applicable D&O Insurance) and the relevant insurer has settled, or has provided reimbursement for, these financial losses, damages and expenses (or has irrevocably undertaken to do so);
- c. in relation to proceedings brought by the Indemnitee against the Company, except for proceedings brought to enforce indemnification to which the Indemnitee is entitled pursuant to this Agreement, the Company's articles of association or any D&O Insurance taken out by the Company for the benefit of the Indemnitee; or
- d. for any financial losses, damages or expenses incurred in connection with a settlement of any Proceeding effected without the Company's prior consent.

**2.4 Determination of entitlement to indemnification and advancements**

2.4.1 If the Indemnitee wishes to claim indemnification and/or advancements pursuant to Articles 2.1 and 2.2, the Indemnitee shall submit a request to that effect to the Company. Upon receipt of such request, the Indemnitee's entitlement to indemnification and/or advancements pursuant to Articles 2.1 and 2.2 shall be determined by any of the following (at the election of the Company):

- a. so long as there are Disinterested Directors, either by majority vote of all Disinterested Directors or by majority vote of a committee composed exclusively of Disinterested Directors, provided that such committee is established by majority vote of all Disinterested Directors; or
- b. Independent Counsel in a written opinion delivered to each Party.

2.4.2 If the Company decides to request Independent Counsel to make the determination referred to in Article 2.4.1, the Company shall notify the Indemnitee of the identity of the Independent Counsel selected by it. The Indemnitee may, within one week, notify the Company of its objection to the Independent Counsel selected by the Company, but only on the grounds that the relevant attorney or firm of attorneys does not meet the criteria of the definition of "Independent Counsel". In case of such objection being timely made and deemed well-founded by the Company, the Company shall select a different Independent Counsel and the previous two sentences apply mutatis mutandis in respect of such selection. The Company shall pay all fees and other expenses associated with the retention and services of Independent Counsel to make the determination referred to in Article 2.4.1.

---

2.4.3 The Company shall exert all reasonable efforts to cause any determination required under Article 2.4.1 to be made as promptly as practicable after the Indemnitee has submitted its initial request for indemnification and/or advancements pursuant to Articles 2.1 and 2.2 and the Indemnitee shall fully cooperate with the person(s) making such determination.

**2.5 Proceedings**

2.5.1 The Indemnitee shall promptly notify the Company upon receipt of any complaint, demand letter, writ of summons or other indication that a Proceeding is being threatened or is forthcoming.

2.5.2 The Indemnitee shall allow the Company to participate in any Proceeding and to assume the defence thereof in such manner as the Company deems appropriate, with counsel selected by the Company and reasonably satisfactory to the Indemnitee, provided that:

- a. the Company must conduct any such defence in good faith and in a diligent manner; and
- b. the Company shall not, without the Indemnitee's prior consent, allow or condone any judgment or award against the Indemnitee nor enter into any settlement or compromise pursuant to which non-monetary obligations or penalties (including incarceration) would be imposed on the Indemnitee and/or monetary obligations would be imposed on the Indemnitee which would not be indemnified in full pursuant to Articles 2.1.1 and 2.3.1.

**2.6 D&O Insurance**

2.6.1 The Company shall take out and maintain adequate D&O Insurance for the benefit of the Indemnitee for as long as the Indemnitee serves as a Managing Director, subject to the acceptance of the Indemnitee under the conditions by the insurer concerned.

2.6.2 The premiums payable for D&O Insurance covering the Indemnitee as an insured shall be borne by the Company.

---

**3 MISCELLANEOUS PROVISIONS**

**3.1 Notices**

3.1.1 All notices given under this Agreement shall be given or made by electronic means of communication or in writing and, in the latter case, shall be sent by courier service or by registered mail (with a copy of such notice or request being sent in advance by electronic means of communication).

3.1.2 All notices given under this Agreement to a Party which are sent by courier or by registered mail shall be sent:

- a. if to the Indemnitee, to the address as on file with the Company at that time; and
- b. if to the Company, to address as registered with the Dutch trade registry at that time, for the attention of the Management Board.

3.1.3 All notices given under this Agreement to a Party by electronic means of communication shall be sent:

- a. if to the Indemnitee, to: [e-mail address]
- b. if to the Company, to: Franz-Werner.Haas@curevac.com

**3.2 Entire agreement**

3.2.1 This Agreement gives effect to the indemnification arrangements contained in the Company's articles of association and replaces and supersedes any existing indemnification agreement between the Parties.

**3.3 No implied waiver**

3.3.1 Nothing shall be construed as a waiver under this Agreement unless a document to that effect has been signed by the Parties or a notice to that effect has been given.

3.3.2 The failure of a Party to exercise or enforce any right under this Agreement shall not constitute a waiver of the right to exercise or enforce such right in the future.

**3.4 Third party stipulations**

3.4.1 This Agreement does not grant any rights to any third party (*derdenbedingen*), including for the avoidance of doubt any insurer.

**3.5 Amendment**

3.5.1 No amendment to this Agreement shall have any force or effect unless it is in writing and signed by both Parties.

---

**3.6 Invalidity**

3.6.1 In the event that a provision of this Agreement is null and void or unenforceable (either in whole or in part):

- a. the remainder of this Agreement shall continue to be effective to the extent that, given the substance and purpose of this Agreement, such remainder is not inextricably related to the null and void or unenforceable provision; and
- b. the Parties shall make every effort to reach agreement on a new provision which differs as little as possible from the null and void or unenforceable provision, taking into account the substance and purpose of this Agreement.

**3.7 No rescission or nullification**

3.7.1 To the extent permitted by law, the Parties waive their rights to rescind or nullify or to demand the rescission, nullification or amendment of this Agreement, in whole or in part, on any grounds whatsoever.

**3.8 No transfer, assignment or encumbrance**

3.8.1 No Party may transfer, assign or encumber its contractual relationship, any of its rights or any of its obligations under this Agreement.

**3.9 Term and termination**

3.9.1 This Agreement shall remain in effect until and terminate at the latest of the following dates:

- a. the expiration of the statute of limitations applicable to any claim that could be asserted against the Indemnitee with respect to which the Indemnitee would be entitled to indemnification under this Agreement; or
  - b. ten years after the date that the Indemnitee has ceased to serve as a [Managing Director][Supervisory Director]; or
  - c. if, at the later of the dates referred to in paragraphs a. and b. above, there would be an actual or pending Proceeding in respect of which the Indemnitee would be entitled to indemnification under this Agreement or there is an actual or pending Proceeding in connection with this Agreement, one year after the competent court or arbitral tribunal has finally adjudicated such Proceeding, without possibility for appeal.
-

**4 GOVERNING LAW AND JURISDICTION**

**4.1 Governing law**

4.1.1 This Agreement shall be governed by and construed in accordance with the laws of the Netherlands.

**4.2 Jurisdiction**

4.2.1 The Parties agree that any dispute in connection with this Agreement or any agreement resulting therefrom shall be submitted to the exclusive jurisdiction of the competent court in Amsterdam, the Netherlands.

## LONG-TERM INCENTIVE PLAN

CUREVAC N.V.

## INTRODUCTION

## Article 1

- 1.1 This document sets out the Company's long-term incentive plan for employees, officers and other service providers who qualify as Eligible Participants.
- 1.2 The main purposes of this Plan are:
- a. to attract, retain and motivate Participants with the qualities, skills and experience needed to support and promote the growth and sustainable success of the Company and its business; and
  - b. to incentivise Participants to perform at the highest level and to further the best interests of the Company, its business and its stakeholders.
- 1.3 This Plan is effective as of the consummation of the IPO.

## DEFINITIONS AND INTERPRETATION

## Article 2

- 2.1 In this Plan the following definitions shall apply:

<b>Article</b>	An article of this Plan.
<b>Award</b>	A grant under this Plan in the form of one or more Options, SARs, Shares of Restricted Stock, RSUs, Other Awards, or a combination of the foregoing.
<b>Award Agreement</b>	A written agreement between the Company and a Participant, substantially in the form of Annex A to this Plan, evidencing the grant of an Award to such Participant and containing such terms as the Committee may determine, consistent with and subject to the terms of this Plan.
<b>Bad Leaver</b>	A Participant who ceases to be an Eligible Participant for Cause, including a situation where the Participant resigns and the Committee determines that an event has occurred with respect to that Participant which constitutes Cause.

---

**Cause**

With respect to a Participant, "cause" as defined in such Participant's employment, service or consulting agreement with the Company or a Subsidiary, or if not so defined (and unless determined otherwise in the applicable Award Agreement or by the Committee):

- a. such Participant's indictment for any crime which (i) constitutes a felony, (ii) has, or could reasonably be expected to have, an adverse impact on the performance of such Participant's services to the Company and/or any Subsidiary or (iii) has, or could reasonably be expected to have, an adverse impact on the business and/or reputation of the Company and/or any Subsidiary;
  - b. such Participant having been the subject of any order, judicial or administrative, obtained or issued by any governmental or regulatory body for any securities laws violation involving fraud, market manipulation, insider trading and/or unlawful dissemination of non-public price-sensitive information;
  - c. such Participant's wilful violation of the Company's code of conduct, insider trading policy or other internal policies and regulations established by the Company and/or any Subsidiary, in each case to the extent applicable to the Participant concerned;
  - d. gross negligence or wilful misconduct in the performance of such Participant's duties for the Company and/or any Subsidiary or wilful or repeated failure or refusal to perform such duties;
  - e. material breach by such Participant of any employment, service, consulting or other agreement entered into between such Participant on the one hand and the Company and/or any Subsidiary on the other;
  - f. conduct by such Participant which should be considered as an urgent cause within the meaning of Section 7:678 DCC, irrespective of whether that provision applies to such Participant's relationship with the Company and/or any Subsidiary; and
-

g. such other acts or omissions to act by such Participant as reasonably determined by the Committee,

provided that the occurrence of an event described in paragraphs c. through e. above shall only constitute Cause if and when such event has not been cured or remedied by the relevant Participant within thirty days after the Company has provided written notice to such Participant.

**Change of Control**

The occurrence of any one or more of the following events:

- a. the direct or indirect change in ownership or control of the Company effected through one transaction, or a series of related transactions within a twelve-month period, as a result of which any Person or group of Persons acting in concert, directly or indirectly acquires (i) beneficial ownership of more than half of the Company's issued share capital and/or (ii) the ability to cast more than half of the voting rights in the General Meeting;
  - b. at any time during a period of twelve consecutive months, individuals who at the beginning of such period constituted the Management Board and/or the Supervisory Board cease to constitute a majority of members of the Management Board and/or the Supervisory Board, as applicable, provided that any new member of the Management Board or the Supervisory Board who was nominated for appointment by the Supervisory Board by a vote of at least a majority of the Supervisory Directors who either were Supervisory Directors at the beginning of such twelve-month period or whose nomination for appointment was so approved, shall be considered as though such individual were a member of the Management Board or the Supervisory Board, as applicable, at the beginning of such twelve-month period;
-

- c. the consummation of a merger, demerger or business combination of the Company or any Subsidiary with another Person, unless such transaction results in the shares in the Company's capital outstanding immediately prior to the consummation of such transaction continuing to represent (either by remaining outstanding or by being converted into, or exchanged for, voting securities of the surviving or acquiring Person or a parent thereof) at least half of the voting rights in the General Meeting or in the shareholders' meeting of such surviving or acquiring Person or parent outstanding immediately after the consummation of such transaction;
- d. the consummation of any sale, lease, exchange or other transfer to any Person or group of Persons acting in concert, not being Subsidiaries, in one transaction or a series of related transactions within a twelve-month period, of all or substantially all of the business of the Company and its Subsidiaries; or
- e. subject to Article 10, such other event which the Committee determines to constitute a change of control in respect of the Company.

**Committee**

Any of the following bodies, as applicable:

- a. the Management Board, to the extent the administration or operation of this Plan relates to the grant of Awards to Eligible Participants who are not Managing Directors or Supervisory Directors, as well as any other matter relating to such Awards;
  - b. the Supervisory Board, to the extent the administration or operation of this Plan relates to the grant of Awards to Eligible Participants who are members of the compensation committee established by the Supervisory Board, as well as any other matter relating to such Awards; or
  - c. the compensation committee established by the Supervisory Board for all other matters relating to the administration or operation of the Plan.
-

<b>Company</b>	CureVac N.V.
<b>Consultant</b>	Any Person, other than a Managing Director, Supervisory Director, or Employee, who is an adviser or consultant engaged by the Company and/or a Subsidiary to render bona fide services to the Company and/or a Subsidiary.
<b>DCC</b>	The Dutch Civil Code.
<b>Eligible Participant</b>	Any Managing Director, Supervisory Director, Employee or Consultant.
<b>Employee</b>	Any Person, other than a Managing Director or a Supervisory Director, who is an employee or officer of the Company and/or a Subsidiary.
<b>Exercise Date</b>	The date on which an Award is duly exercised by or on behalf of the Participant concerned.
<b>Exercise Price</b>	The exercise price applicable to an Award.
<b>FMV</b>	The closing price of a Share on the relevant date (or, if there is no reported sale of Shares on such date, on the last preceding date on which any such reported sale occurred) on the principal stock exchange where Shares have been admitted for trading, unless determined otherwise by the Committee.
<b>General Meeting</b>	The Company's general meeting of shareholders.
<b>Good Leaver</b>	A Participant who ceases to be an Eligible Participant and who is not a Bad Leaver.
<b>Grant Date</b>	The date on which the Committee decides to grant an Award, or such later effective date applicable to such Award as may be determined by the Committee.
<b>IPO</b>	The Company's initial public offering of its Shares.
<b>IPO Replacement Options</b>	The Options granted with effect from the Company's conversion into a public company with limited liability ( <i>naamloze vennootschap</i> ) in substitution and exchange for: <ul style="list-style-type: none"> <li>a. any options for series A shares in CureVac AG under the CureVac AG legacy management stock option plan that was in place prior to the consummation of the IPO; and</li> </ul>

---

- b. any virtual shares (*Beteiligungspunkte*) under the modified CureVac AG virtual share plan (which, for the avoidance of doubt, shall not include the Prior VSOP Virtual Shares) that was in place prior to the consummation of the IPO.

<b>Management Board</b>	The Company's management board.
<b>Managing Director</b>	A member of the Management Board.
<b>Option</b>	The right to subscribe for, or otherwise acquire, Plan Shares.
<b>Other Award</b>	An Award which does not take the form of an Option, SAR, Share of Restricted Stock or RSU, and which may be denominated or payable in, valued in whole or in part by reference to, or otherwise based on or related to Shares or factors which may influence the value of Shares, including cash-settled financial instruments and financial instruments which are convertible into or exchangeable for Plan Shares.
<b>Participant</b>	The holder of an Award, including, as the context may require, the rightful heir(s) of a previous holder of such Award having acquired such Award as a result of the death of such previous holder.
<b>Performance Criteria</b>	The performance criteria applicable to an Award.
<b>Person</b>	A natural person, partnership, company, association, cooperative, mutual insurance society, foundation or any other entity or body which operates externally as an independent unit or organisation.
<b>Plan</b>	This long-term incentive plan.
<b>Plan Share</b>	A Share underlying an Award.
<b>Prior VSOP Virtual Shares</b>	The virtual shares ( <i>Beteiligungspunkte</i> ) outstanding immediately prior to the consummation of the IPO under the CureVac AG virtual share plan that was in place prior to the consummation of the IPO.
<b>Prior VSOP Virtual Shares (Adjusted)</b>	The number of Prior VSOP Virtual Shares multiplied by the ratio for exchanging series A shares in CureVac AG for Shares in connection with the corporate reorganization of the Company and CureVac AG that was implemented immediately prior the IPO.

---

<b>Replacement Award</b>	Except for IPO Replacement Options, an Award granted in assumption of, or in substitution or exchange for, long-term incentive awards previously granted by a Person acquired (or whose business is acquired) by the Company or a Subsidiary or with which the Company or a Subsidiary merges or forms a business combination, as reasonably determined by the Committee.
<b>Restricted Stock</b>	Plan Shares subject to such restrictions as the Committee may impose, including with respect to voting rights and the right to receive dividends or other distributions made by the Company.
<b>RSU</b>	The right to receive, in cash, in assets, in the form of Plan Shares valued at FMV, or a combination thereof, the FMV of one Share on the Exercise Date.
<b>SAR</b>	The right to receive, in cash, in assets, in the form of Plan Shares valued at FMV, or a combination thereof, the excess of the FMV of one Share on the applicable Exercise Date over the applicable Exercise Price.
<b>Section 409A IRC</b>	Section 409A of the United States Internal Revenue Code of 1986, as amended, and the rules, regulations and guidance promulgated pursuant thereto; any reference to a provision in this Code shall include any successor provision thereto.
<b>Section 457A IRC</b>	Section 457A of the United States Internal Revenue Code of 1986, as amended, and the rules, regulations and guidance promulgated pursuant thereto; any reference to a provision in this Code shall include any successor provision thereto.
<b>Share</b>	An ordinary share in the Company's capital.
<b>Subsidiary</b>	A subsidiary of the Company within the meaning of Section 2:24a DCC.
<b>Supervisory Board</b>	The Company's supervisory board.
<b>Supervisory Director</b>	A member of the Supervisory Board.

2.2 References to statutory provisions are to those provisions as they are in force from time to time.

2.3 Terms that are defined in the singular have a corresponding meaning in the plural.

2.4 Words denoting a gender include each other gender.

2.5 Except as otherwise required by law, the terms "written" and "in writing" include the use of electronic means of communication.

**ADMINISTRATION**

**Article 3**

3.1 This Plan shall be administered by the Committee. The Committee's powers and authorities under this Plan include the authority to perform the following matters, in each case consistent with and subject to the terms of this Plan:

- a. designating Persons to whom Awards are granted;
  - b. deciding to grant Awards;
  - c. determining the form(s) and type(s) of Awards being granted and setting the terms and conditions applicable to such Awards, including:
    - i. the number of Plan Shares underlying Awards;
    - ii. the time(s) when Awards may be exercised or settled in whole or in part;
    - iii. whether, to which extent, and under which circumstances Awards may be exercised or settled in cash or assets (including other Awards), or a combination thereof, in lieu of Plan Shares and vice versa;
    - iv. whether, to which extent and under which circumstances Awards may be cancelled or suspended;
    - v. whether, to which extent and under which circumstances a Participant may designate another Person owned or controlled by him as recipient or beneficiary of his Awards;
    - vi. whether and to which extent Awards are subject to Performance Criteria and/or restrictive covenants (including non-competition, non-solicitation, confidentiality and/or Share ownership requirements);
    - vii. the method(s) by which Awards may be exercised, settled or cancelled;
    - viii. whether, to which extent and under which circumstances, the exercise, settlement or cancellation of Awards may be deferred or suspended;
  - d. amending or waiving the terms applicable to outstanding Awards (including Performance Criteria), subject to the restrictions imposed by Article 9 and provided that no such amendment shall take effect without the consent of the affected Participant(s), if such amendment would materially and adversely affect the rights of the Participant(s) under such Awards, except to the extent that any such amendment is made to cause this Plan or the Awards concerned to comply with applicable law, stock exchange rules, accounting principles or tax rules and regulations;
-

- e. making any determination under, and interpreting the terms of, this Plan, any rules or regulations issued pursuant to this Plan and any Award Agreement;
- f. correcting any defect, supplying any omission or reconciling any inconsistency in the Plan or any Award Agreement;
- g. settling any dispute between the Company and any Participant (including any beneficiary of his Awards) regarding the administration and operation of this Plan, any rules or regulations issued pursuant to this Plan, and any Award Agreement entered into with such Participant; and
- h. making any other determination or taking any other action which the Committee considers to be necessary, useful or desirable in connection with the administration or operation of this Plan.

3.2 The Committee may issue further rules and regulations for the administration and operation of this Plan, consistent with and subject to the terms of this Plan.

3.3 All decisions of the Committee shall be final, conclusive and binding upon the Company and the Participants (including beneficiaries of Awards).

#### **AWARDS**

##### **Article 4**

4.1 Awards can only be granted to:

- a. Eligible Participants; and
- b. any other Person who has been extended an offer of employment or other service, as a result of which the Committee reasonably expects such Person to become an Eligible Participant within twelve months after the Grant Date, provided that Awards granted to any such Person shall be treated as Awards held by a Bad Leaver if and when he has not become an Eligible Participant within such twelve-month period.

4.2 No Award is intended to confer any rights on the relevant Participant except as set forth in the applicable Award Agreement. In particular, no Award should be construed as giving any Participant the right to remain employed by or to continue to provide services for the Company or any Subsidiary.

4.3 Awards shall be granted for no consideration or for such minimal cash consideration as may be required by applicable law.

4.4 Awards may be granted alone or in addition or in tandem with any other Award and/or any award under any other plan of the Company or any Subsidiary. Awards granted in addition or in tandem with any other Award and/or any award under any other plan of the Company or any Subsidiary may be granted simultaneously or at different times.

- 4.5 Each Award shall be evidenced by an Award Agreement entered into between the Company and the Participant concerned. Until an Award Agreement has been entered into between the Company and the relevant Participant, no rights can be derived from the Awards concerned by such Participant.
- 4.6 Plan Shares, including Awards in the form of Shares of Restricted Stock, shall be delivered in such form(s) as may be determined by the Committee and shall be subject to such stop transfer orders and other restrictions as the Committee may deem required or advisable. Furthermore, the Committee may determine that certificates for such Shares shall bear an appropriate legend referring to the terms, conditions and restrictions applicable thereto.
- 4.7 The terms and conditions applicable to Awards, including the time(s) when Awards vest in whole or in part and any applicable Performance Criteria, shall be set by the Committee and may vary between Awards and between Participants, as the Committee deems appropriate. The Committee may also determine whether and under which circumstances Awards shall be settled automatically upon vesting, without being exercised by the Participant.
- 4.8 The term of an Award shall be determined by the Committee, but shall not exceed ten years from the applicable Grant Date. Unless determined otherwise by the Committee, if the exercise of an Award is prohibited by applicable law or the Company's insider trading policy on the last business day of the term of such Award, such term shall be extended for a period of one month following the end of such prohibition.
- 4.9 Unless determined otherwise by the Committee, Awards cannot be transferred, pledged or otherwise encumbered, except by testament or hereditary law as a result of death of the Participant concerned.
- 4.10 If, as a result of changes in applicable law, accounting principles or tax rules and regulations, or due to a variation of the composition of the Company's issued share capital (including a share split, reverse share split, redenomination of the nominal value, or as a result of a dividend or other distribution, reorganization, acquisition, merger, demerger, business combination or other transaction involving the Company or a Subsidiary), an adjustment to this Plan, any Award Agreement and/or outstanding Awards is necessary to prevent dilution or enlargement of the benefits or potential benefits intended to be made available under this Plan, the Committee may adjust equitably any or all of:
- a. the number of Plan Shares available under this Plan;
  - b. the number of Plan Shares underlying outstanding Awards; and/or
  - c. the Exercise Price or other terms applicable to outstanding Awards.
- 4.11 Any rights, payments and benefits under any Award shall be subject to repayment and/or recoupment by the Company in accordance with applicable law, stock exchange rules and such policies and procedures as the Company may adopt from time to time.
-

- 4.12 The Company may withhold from any outstanding Award, any payment, issuance or transfer to be made under such Award, or any other compensation or amount owed by the Company to the Participant holding such Award, an amount (in cash, in assets, in the form of Shares or other Awards, or a combination thereof) equal to the withholding taxes and other costs due, or to be withheld, by the Company or any Subsidiary in respect of the grant, exercise or settlement of such Award.

**TYPES OF AWARDS**

**Article 5**

- 5.1 The Committee may grant Awards in the form of Options, SARs, Shares of Restricted Stock, RSUs, Other Awards or a combination of the foregoing.
- 5.2 Upon the exercise or settlement of vested Options, the Company shall be obliged to deliver to the Participant concerned (or the beneficiary of such Options, as applicable), the Plan Shares underlying such Options (unless otherwise set forth in the Award Agreement).
- 5.3 Upon the exercise or settlement of vested SARs, the Company shall be obliged to pay to the Participant concerned (or the beneficiary of such SARs, as applicable) an amount equal to the number of Plan Shares underlying such SARs multiplied by the excess, if any, of the FMV of one Share on the applicable Exercise Date over the applicable Exercise Price. The Company may satisfy such payment obligation in cash, in assets, in the form of Shares valued at FMV, or a combination thereof, at the discretion of the Committee.
- 5.4 The exercise by a Participant of his rights attached to Shares of Restricted Stock shall be subject to such restrictions as the Committee may impose, including with respect to voting rights and the right to receive dividends or other distributions made by the Company. Upon the vesting of Shares of Restricted Stock, any such restrictions and conditions shall lapse with respect to those Shares. If an Award in the form of Shares of Restricted Stock is cancelled or otherwise terminated, the Participant shall be obliged to transfer all of his unvested Shares of Restricted Stock to the Company promptly and for no consideration.
- 5.5 Upon the exercise or settlement of vested RSUs, the Company shall be obliged to pay to the Participant concerned (or the beneficiary of such RSUs, as applicable) an amount equal to the number of Plan Shares underlying such RSUs multiplied by the FMV of one Share on the applicable Exercise Date. The Company may satisfy such payment obligation in cash, in assets, in the form of Shares valued at FMV, or a combination thereof, at the discretion of the Committee (unless otherwise set forth in the Award Agreement).
- 5.6 The Committee may determine that a Participant holding one or more RSUs is entitled to receive dividends and other distributions made by the Company on the Shares, as if such Participant held the Plan Shares underlying such RSUs. The Committee may impose restrictions with respect to such entitlement.
-

**PERFORMANCE CRITERIA****Article 6**

- 6.1 The Committee may condition the right of a Participant to exercise one or more of his Awards, and the timing thereof, upon the achievement or satisfaction of such Performance Criteria as may be determined by the Committee, within periods specified by the Committee.
- 6.2 If an Award is subject to Performance Criteria which must be achieved or satisfied within a period specified by the Committee for that purpose, such Award can only be exercised or settled at or after the end of that period.
- 6.3 Performance Criteria may be measured on an absolute or relative basis and may be established on a Company-wide basis or with respect to one or more business units, divisions, Subsidiaries and/or business segments. Relative performance may be measured against a group of peer companies determined by the Committee, financial market indices and/or other objective and quantifiable indices. Performance Criteria may relate to performance by the Company and/or by the Participant concerned.
- 6.4 If the Committee determines that a change in the business, operations, group structure or capital structure of the Company, or other events or circumstances, render certain Performance Criteria applicable to outstanding Awards unsuitable or inappropriate, the Committee may amend or waive such Performance Criteria, in whole or in part, as the Committee deems appropriate.

**PLAN SHARES AVAILABLE FOR AWARDS****Article 7**

- 7.1 Subject to Articles 4.10 and 7.2, the Plan Shares underlying Awards (including, for the avoidance of doubt, Plan Shares underlying IPO Replacement Awards) which are not Replacement Awards, irrespective of whether such Awards have been exercised or settled, together with any Prior VSOP Virtual Shares (Adjusted) which have not yet been exercised or settled, shall not represent more than 15% of the Company's issued share capital from time to time.
- 7.2 Plan Shares underlying Awards, except for Replacement Awards, which expire, which are cancelled or otherwise terminated, or which are exercised or settled in cash or assets in lieu of Plan Shares, shall again be available under this Plan and shall not be counted towards the limit imposed by Article 7.1.

**VESTING, EXERCISE AND SETTLEMENT****Article 8**

- 8.1 Each Award Agreement shall contain the vesting schedule and, where relevant, delivery schedule (which may include deferred delivery later than the vesting dates) for the relevant Awards.
-

- 8.2** Only vested Awards may be exercised or settled in accordance with their terms. An Award can only be exercised (to the extent it is not settled automatically) by or on behalf of the Participant holding such Award.
- 8.3** An Award can only be exercised through the use of an electronic system or platform to be designated by the Committee (if and when such system or platform has been set up by the Company), or otherwise by delivering written notice to the Company in a form approved by the Committee.
- 8.4** Subject to Article 9.1, the Committee shall determine the Exercise Price, provided that the Exercise Price for an Award which can be exercised or settled in the form of Plan Shares shall not be less than the aggregate nominal value of such Plan Shares.
- 8.5** Upon the exercise of an Award, the applicable Exercise Price must immediately be paid in cash, wire transfer of immediately available funds or by check payable to the order of the Company, provided that the Committee, subject to applicable law, may allow that such Exercise Price is satisfied on a cashless or net settlement basis, applying any of the following methods:
- a.** by means of an immediate sale of Plan Shares underlying the Award concerned, with sale proceeds equal to the Exercise Price being paid to the Company on behalf of the relevant Participant and any remaining sale proceeds (less applicable costs and taxes, if any) being paid to such Participant;
  - b.** by means of the relevant Participant forfeiting his entitlement to receive part of the Plan Shares underlying the Award concerned at FMV on the Exercise Date and charging the aggregate nominal value of the remaining Plan Shares underlying such Award against the Company's reserves;
  - c.** by means of the relevant Participant surrendering his entitlement to receive part of the Plan Shares underlying the Award concerned at FMV on the Exercise Date, against the Company becoming due an equivalent amount to such Participant and setting off that obligation against the Company's receivable with respect to payment of the applicable Exercise Price; or
  - d.** by means of the relevant Participant surrendering and transferring Shares to the Company (which may include Plan Shares underlying the Award concerned) at FMV on the Exercise Date.
- 8.6** The Company is authorized to withhold from any Award granted or any payment due or transfer made under any Award or under the Plan or from any compensation or other amount owing to a Participant the amount (in cash, Shares, other Awards, other property, net settlement or any combination thereof) of applicable withholding taxes due in respect of an Award, its exercise or settlement or any payment or transfer under such Award or under the Plan and to take such other action (including providing for elective payment of such amounts in cash or Shares by the Participant) as may be necessary in the option of the Company to satisfy all obligations for the payment of such taxes
-

8.7 When an Award is exercised or settled in the form of Plan Shares, the Company shall, at the discretion of the Committee, subject to applicable law and the Company's insider trading policy:

- a. issue new Plan Shares to the relevant Participant; or
- b. transfer existing Plan Shares held by the Company to the relevant Participant,

provided, in each case, that Plan Shares may be delivered in the form of book-entry securities representing those Plan Shares (or beneficial ownership of those Plan Shares entitling the holder to exercise or direct the exercise of voting rights attached thereto) credited to the securities account designated by the relevant Participant. Furthermore, Plan Shares may be delivered as described in the previous sentence to a Person designated by the relevant Participant, with the prior approval of the Committee, as beneficiary of his Award.

8.8 If an Award is exercised or settled in the form of Plan Shares and such Award does not relate to a whole number of Plan Shares, the number of Plan Shares underlying such Award shall be rounded down to the nearest integer.

**PRICING RESTRICTIONS FOR OPTIONS AND SARS**

**Article 9**

9.1 Except for Replacement Awards, the Exercise Price for an Option or SAR shall not be less than the higher of:

- a. the FMV of a Plan Share on the applicable Grant Date and, in case of a SAR being granted in connection with an Option, on the Grant Date of such Option; or
- b. the nominal value of the Plan Share(s) underlying the Option.

9.2 Except as provided in Article 4.10, the Committee may not, without prior approval of the General Meeting, seek to effect any re-pricing of any outstanding "underwater" Option or SAR by:

- a. amending or modifying the terms of such Option or SAR to lower the Exercise Price;
- b. cancelling such Option or SAR and granting in exchange either (i) replacement Options or SARs having a lower Exercise Price, or (ii) Restricted Stock, RSUs or Other Awards; or
- c. cancelling or repurchasing such Award for cash, assets or other securities.

9.3 Options and SARs will be considered to be "underwater" within the meaning of Article 9.2 at any time when the FMV of the Plan Shares underlying such Awards is less than the applicable Exercise Price.

---

**U.S. PARTICIPANTS****Article 10**

- 10.1** With respect to any Award subject to Section 409A IRC and Section 457A IRC, this Plan and the applicable Award Agreement are intended to comply with the requirements of Section 409A IRC and Section 457A IRC, the provisions of this Plan and such Award Agreement shall be interpreted in a manner that satisfies the requirements of Section 409A IRC and Section 457A IRC, and this Plan shall be operated accordingly. If any provision of this Plan or any term or condition of any Award subject to Section 409A IRC and Section 457A IRC would otherwise frustrate or conflict with this intent, the provision, term or condition will be interpreted and deemed amended so as to avoid this conflict.
- 10.2** Notwithstanding any provision of this Plan to the contrary or any Award Agreement, a termination of employment shall not be deemed to have occurred for purposes of any provision of an Award that is subject to Section 409A IRC providing for payment upon or following a termination of a Participant's employment unless such termination is also a "separation from service" and, for purposes of any such provision of such Award, references to a "termination", "termination of employment" or like terms shall mean "separation from service".
- 10.3** No Awards will be eligible for the payment of dividends or dividend equivalents, to the extent such Option or SAR is subject to Section 409A IRC and Section 457A IRC.
- 10.4** If all or part of any payments made, or other benefits conferred, under any Award subject to Section 409A IRC constitutes deferred compensation for purposes of Section 409A IRC as a result of a "separation from service" of the relevant Participant (other than due to his death) within the meaning of Section 409A IRC while such Participant is a "specified employee" under Section 409A IRC, then such payment or benefit shall not be made or conferred until six months and one business day have elapsed after the date of such "separation from service", except as permitted under Section 409A IRC.
- 10.5** If an Award subject to Section 409A IRC includes a "series of installment payments" within the meaning of Section 1.409A-2(b)(2)(iii) of the United States Treasury Regulations, the right of the relevant Participant to such series of installment payments shall be treated as a right to a series of separate payments and not as a right to a single payment, and if such an Award includes "dividend equivalents" within the meaning of Section 1.409A-3(e) of the United States Treasury Regulations, the right of the relevant Participant to such dividend equivalents shall be treated separately from the right to other amounts or other benefits under such Award.
-

- 10.6** For any Award subject to Section 409A IRC or Section 457A IRC that provides for accelerated distribution on a Change of Control of amounts that constitute "deferred compensation" as defined in Section 409A IRC and Section 457A IRC, if the event that constitutes such Change of Control does not also constitute a change in the ownership or effective control of the Company, or in the ownership of a substantial portion of the Company's assets (in either case, as defined in Section 409A IRC), such amount shall not be distributed on such Change of Control but instead shall vest as of the date of such Change of Control and shall be paid on the scheduled payment date specified in the applicable Award Agreement, except to the extent that earlier distribution would not result in the relevant Participant incurring any additional tax, penalty, interest or other expense under Section 409A IRC and Section 457A IRC.
- 10.7** Notwithstanding the foregoing in this Article 10, the tax treatment of the benefits provided under this Plan or any Award Agreement is not warranted or guaranteed, and in no event shall the Company be liable for all or any portion of any taxes, penalties, interest or other expenses that may be incurred by a U.S. Participant on account of non-compliance with Section 409A IRC and Section 457A IRC.
- 10.8** Notwithstanding any provision of this Plan to the contrary or any Award Agreement, in the event the Committee determines that any Award may be subject to Section 409A IRC or Section 457A IRC, the Committee may adopt such amendments to this Plan and the applicable Award Agreement or adopt other policies and procedures (including amendments, policies and procedures with retroactive effect), or take any other actions, that the Committee determined are necessary or appropriate to:
- a. exempt the Award from Section 409A IRC or Section 457A IRC and/or preserve the intended tax treatment of the benefits provided with respect to the Award; or
  - b. comply with the requirements of Section 409A IRC or Section 457A IRC and thereby avoid the application of any adverse tax consequences under such Sections.

**LEAVER**

**Article 11**

- 11.1** If a Participant becomes a Good Leaver, unless otherwise determined by the Committee or set forth in an Award Agreement:
- a. all vested Awards that have not yet been exercised or settled must be exercised or settled in accordance with their terms within a period specified by the Committee and, if such Awards are not exercised or (through no fault of the Participant concerned) not settled within such period, they shall be cancelled automatically without compensation for the loss of such Awards; and
  - b. all unvested Awards of such Participant shall be cancelled automatically without compensation for the loss of the such Awards, unless the Committee decides otherwise.
- 11.2** If a Participant becomes a Bad Leaver, all vested Awards of such Participant which have not been exercised or settled, as well as all unvested Awards of such Participant, shall be cancelled automatically without compensation for the loss of such Awards.
-

**CHANGE OF CONTROL****Article 12**

- 12.1 If long-term incentive awards are granted in assumption of, or in substitution or exchange for, outstanding Awards in connection with a Change of Control and the Committee has determined that such awards are sufficiently equivalent to the outstanding Awards concerned, then such outstanding Awards shall be cancelled and terminated upon the replacement awards being granted to the Participants concerned.
- 12.2 If, in connection with a Change of Control, outstanding Awards are not replaced by long-term incentive awards as described in Article 12.1, or are replaced by long-term incentive awards which the Committee does not consider to be sufficiently equivalent to such outstanding Awards, then such Awards shall immediately vest and, where relevant, settle in full, unless the Committee decides otherwise.
- 12.3 For purposes of this Article 12, awards shall not be considered to be "sufficiently equivalent" to outstanding Awards, if the underlying securities are not widely held and publicly traded on a regulated national stock exchange.

**LOCK-UP****Article 13**

- 13.1 In connection with any registration of the Company's securities, to the extent requested by the Company or the underwriters managing any public offering of the Company's securities, and except (a) as otherwise approved by the Committee, or (b) pursuant to any exceptions approved by the underwriters, Shares acquired by a Participant pursuant to the issuance, vesting, exercise, or settlement of any Award granted under the Plan may not be sold, transferred, or otherwise disposed of prior to such period following the effective date of such registration as designated by the underwriters, not to exceed 180 days following such registration.
- 13.2 The Company may impose stop-transfer instructions with respect to the Shares subject to the restriction stipulated by Article 13.1 until the end of the lock-up period referred to in that provision.

**DATA PROTECTION****Article 14**

- 14.1 The Company may process personal data relating to the Participants in connection with the administration and operation of this Plan. The personal data of the Participants which may be processed in this respect may include a copy of an identification document, contact details and bank and securities account numbers. Each Participant's personal data shall be stored by the Company for such time period as is necessary to administer such Participant's participation in the Plan or as otherwise permitted under applicable law.
-

- 14.2 Each Participant's personal data shall be handled by the Company in a proper and careful manner in accordance with applicable law, including the General Data Protection Regulation (GDPR) and the rules and regulations promulgated pursuant thereto. Participants have the right to lodge complaints with an applicable supervisory authority regarding the Company's processing of personal data pursuant to this Plan.
- 14.3 The Company shall implement technical and organisational measures designed to protect personal data processed pursuant to Article 14.1. Personnel or third parties that have access to such personal data shall be bound by confidentiality obligations.
- 14.4 The Company shall abide by any statutory rights the Participants may have regarding their respective personal data processed pursuant to Article 14.1, which includes the right to access, rectification, erasure, restriction of processing, objection to processing and portability of such personal data.
- 14.5 In connection with the administration and operation of this Plan, the Company may transfer personal data processed pursuant to Article 14.1 to one or more third parties, provided that there is a legitimate interest in doing so. Where such third parties are located outside the European Economic Area in countries that are not considered to provide for an adequate level of data protection, the Company shall ensure that sufficient data protection safeguards are put in place, failing which explicit consent for such transfer shall be obtained from the Participant(s) concerned.
- 14.6 The contact details of the Company's data protection officer can be found on the Company's intranet or otherwise can be obtained from the Company's General Counsel.
- 14.7 The Company may establish one or more privacy policies providing further information on data protection and applying to the processing of personal data of the Participants by the Company in connection with the administration and operation of this Plan.

**AMENDMENTS**

**Article 15**

- 15.1 Except to the extent prohibited by applicable law and unless otherwise expressly provided in an Award Agreement or in this Plan, pursuant to a resolution to that effect, the Supervisory Board may amend, alter, suspend, supplement or terminate this Plan or any portion thereof, provided that no such amendment, alteration, suspension, supplementation or termination shall take effect without:
    - a. approval of the General Meeting, if such approval is required by applicable law or stock exchange rules; and/or
-

- b. the consent of the affected Participant(s), if such action would materially and adversely affect the rights of such Participant(s) under any outstanding Award, except to the extent that any such amendment, supplement or termination is made to cause this Plan to comply with applicable law, stock exchange rules, accounting principles or tax rules and regulations.

15.2 Notwithstanding anything to the contrary in the Plan, the Committee may amend the Plan or any Award Agreement in such manner as may be necessary or desirable to enable the Plan or such Award Agreement to achieve its stated purposes in any jurisdiction in a tax-efficient manner and in compliance with local laws, rules and regulations to recognize differences in local law, tax policy or custom. The Committee also may impose conditions on the exercise or vesting of Awards in order to minimize the Company's obligation with respect to tax equalization for Participants on assignments outside their home country.

**GOVERNING LAW AND JURISDICTION**

**Article 16**

This Plan shall be governed by and shall be construed in accordance with the laws of the Netherlands. Subject to Article 3.1 paragraph g., any dispute arising in connection with these rules shall be submitted to the exclusive jurisdiction of the competent court in Amsterdam, the Netherlands.

**Annex A - Template Award Agreement**

**AWARD AGREEMENT**

**THIS AGREEMENT IS MADE ON [DATE] BETWEEN**

1. CureVac N.V., a public company with limited liability, having its corporate seat in [*municipality*] (address: Paul-Ehrlich-Straße 15, 72076 Tübingen, Germany, trade register number: []) (the "**Company**"); and
2. [*details Participant*] (the "**Participant**").

**NOW HEREBY AGREE AS FOLLOWS**

- 1.1 Capitalized terms used herein have the meanings ascribed thereto in the Company's long-term incentive plan (the "**Plan**").
- 1.2 In the event of a conflict among the provisions of the Plan, this agreement and/or any descriptive materials concerning the Award governed by this agreement provided to the Participant, the provisions of the Plan will prevail.

1.3 The Participant has been granted an Award on the terms and subject to the conditions set out in the Plan and below:

- Form of Award* : [number] [Options] [SARs] [Shares of Restricted Stock] [RSUs] [Other Awards]
- Grant Date* : [date]
- [Exercise Price]* : [[FMV] [other price] per [Option] [SAR] [Share of Restricted Stock] [RSU] [Other Award]]
- Automatic settlement* : [Yes, on each vesting date] [No, exercised at the option of the Participant]
- Expiration Date* : [date]
- Performance-based* : [Yes, as specified below] [No]
- Vesting schedule* : Starting on [the Grant Date] [date], [percentage]% of the Award vests each anniversary of [the Grant Date] [such date], subject to the applicable Performance Criteria specified below]
- Delivery schedule* : [Not applicable] [Within [one week] following each vesting date]
- Good Leaver* : In case of the Participant becoming a Good Leaver, all vested Awards that have not yet been exercised or settled must be exercised or settled in accordance with their terms within [period] after the Participant became a Good Leaver.

1.4 [The following Performance Criteria relating to the Company's performance apply with respect to this Award (determined on a consolidated basis):]

Criteria	Measure	Vesting percentage of time-vested					
		[Options]	[SARs]	[Restricted Stock]	[RSUs]	[Other Awards]	
		0%	20%	40%	60%	80%	100%
Adjusted EBITDA	Increase over financial year compared to prior financial year, determined as at the end of the financial year on the basis of the Company's [audited] [annual] [last quarter] financial statements (in [basis points])						
VWAP	Increase over financial year compared to prior financial year, determined as at the end of the financial year by reference to Bloomberg screens (in [USD])						
EPS	Increase over financial year compared to prior financial year, determined as at the end of the financial year by reference to Bloomberg screens (in [USD])						
Adjusted FCF	Increase over financial year compared to prior financial year, determined as at the end of the financial year by reference to Bloomberg screens (in [USD])						
ROIC	Percentage for the financial year						
RoE	Percentage for the financial year						
Relative TSR	Percentage for the financial year						
[Other metrics or targets]							

1.5 [The following Performance Criteria relating to the Participant's performance apply with respect to this Award:]

Criteria	Measure	Vesting percentage of time-vested					
		Options	[SARs]	[Restricted Stock]	[RSUs]	[Other Awards]	
		0%	20%	40%	60%	80%	100%
Strategic initiatives	Percentage of following achievements/milestones, as determined by the Committee: <i>[describe achievements/milestones]</i>						
CSR metrics	Percentage of following achievements/milestones, as determined by the Committee: <i>[describe achievements/milestones]</i>						
<i>[Other metrics or targets]</i>							

- 1.6 The Participant grants an irrevocable power of attorney to the Company, with full right of substitution, to perform on the Participant's behalf all acts necessary for or conducive to the administration and operation of the Plan, including the following matters (in each case consistent with and subject to the terms of this Plan):
- a. delivery of Plan Shares underlying Awards upon the exercise or settlement of such Awards in accordance with their terms;
  - b. effecting a cashless exercise of Awards; and
  - c. effecting a cancellation, termination and/or transfer to the Company of Awards in case the Participant would become a Bad Leaver.
- 1.7 The power of attorney granted above also extends to the performance of acts of disposition (*beschikkingshandelingen*). The Company may act as counterparty of the Participant when acting under such power of attorney.
- 1.8 This agreement shall be governed by and shall be construed in accordance with the laws of the Netherlands. Any dispute arising in connection with this agreement shall be resolved in accordance with the dispute resolution provisions of the Plan.

CureVac N.V.

Name:

Title:

---

*[Participant]*

---

**Agreement**

between

N. N.  
D.O.B. [...]  
resident in [...]

- hereinafter also referred to as "**BENEFICIARY**" -

and

CureVac AG,  
Paul-Ehrlich-Straße 15, 72076 Tübingen  
- hereinafter also referred to as "**CUREVAC**" -

- THE BENEFICIARY AND CUREVAC ALSO HEREINAFTER JOINTLY REFERRED TO AS "**PARTIES**" -

---

**Preliminary Remarks**

The BENEFICIARY has concluded a contract with the legal predecessor of CUREVAC, CureVac GmbH, on [...] [and where applicable on [...]] to participate in the employee participation pro-gram (hereinafter referred to as "VAP"; the above jointly (including all supplements) referred to as "VAP CONTRACT"). The VAP contract has gaps and inaccuracies that are now to be filled or specified.

With this in mind, the following is agreed:

CUREVAC and the BENEFICIARY agree that the VAP CONTRACT has gaps in the rules that are to be closed with the present agreement while maintaining all claims already acquired by the beneficiaries from the VAP CONTRACT. As part of this, the VAP CONTRACT is to be supplemented with an "IPO" exercise case in accordance with the original intention of the program and thus adapted to the current development at the CUREVAC level.

CUREVAC and the BENEFICIARY therefore agree to amend the VAP CONTRACT, which now reads as follows:

**Contract on Participation in the Employee Participation Program**

**Section 1 - Allocation of Participation Points**

- (1) CUREVAC has granted the BENEFICIARY a total of [...] PARTICIPATION POINTS (the "PARTICIPATION POINTS") free of charge. For [...] PARTICIPATION POINTS, the [...] is the day of the allocation ("DATE OF THE ALLOCATION"); for [...] PARTICIPATION POINTS, the [...] is the DATE OF THE ALLOCATION.
- (2) The PARTICIPATION POINTS are granted on the basis of the provisions set out in this contract.
- (3) Each PARTICIPATION POINT exclusively constitutes the right of the BENEFICIARY to a payment in the share deal exercise case within the meaning of Section 8 or in the merger/asset deal exercise case within the meaning of Section 9 or to payment or provision of shares in the IPO exercise case within the meaning of Section 5 or in the merger/asset deal exercise case within the meaning of Section 9 of this contract and is used as the assessment basis for calculating the amount of the payment to be made or the number of shares to be granted.
- (4) Beyond the exercise of the IPO within the meaning of Section 5 of this contract, this contract does not at any time establish a claim to the provision of shares in CUREVAC. The BENEFICIARY is not entitled to dividends or other payments from shares in CUREVAC.
- (5) The allocation of the PARTICIPATION POINTS was made based on the free choice of CUREVAC, which is at the company's own discretion. CUREVAC is not obliged to grant further PARTICIPATION POINTS, even if the PARTICIPATION POINTS have been granted several times.
- (6) This contract has no effect on the calculation of bonus payments, royalties, pension plans or other remuneration of the BENEFICIARY by CUREVAC. The VAP does not serve to compensate the work performed by the BENEFICIARY for CUREVAC.

- (7) CureVac and the BENEFICIARY agree that CUREVAC undertakes to pay the BENEFICIARY as holder of PARTICIPATION POINTS - depending on the type of exercise - in connection with the VAP a total of no more than the number of shares, which corresponds to a maximum of the total of the PARTICIPATION POINTS allotted to the BENEFICIARY, or to pay an amount corresponding to the sale value of these shares at the time of the exercise. Any further use of CUREVAC from and in connection with the VAP is excluded.

**Section 2 - Vestability**

- (1) The PARTICIPATION POINTS granted, including all associated rights, are subject to the subsequent condition (the "EXPIRY").
- (2) The vestability of the PARTICIPATION POINTS granted on the allocation date of [...] arises in a period of 60 (sixty) months, while the vestability of PARTICIPATION POINTS granted on the allocation date of [...] ARISES IN A PERIOD OF [...] months ("VESTABILITY PERIOD"). The vesting period begins on the allocation date. In the vesting period, one-sixtieth of the total number of PARTICIPATION POINTS granted in the allocation letter - calculated from the allocation date - expires after the end of each month (the "VESTABILITY"). The remaining PARTICIPATION POINTS are subject to expiry.
- (3) The term of the vestability period is inhibited (pursuant to Section 209 BGB) for the period of an absence of the BENEFICIARY due to parental leave or due to illness, starting on the day from which the right to continued payment based on the corresponding employment contract ends. The same applies to the times in which the BENEFICIARY was temporarily released from his contractual obligations (unpaid leave, leave for further training, etc.).
- (4) If the inhibition of the vesting period in accordance with Section 2 (3) exceeds half the period until the vesting period in accordance with (2), all rights and obligations from this contract expire. There is an exception for PARTICIPATION POINTS that are vested at this time in accordance with Section 2 (6).
- (5) The condition subsequent according to (1) occurs in the cases mentioned in a) and b) below,

- a) if (i) the employment of the BENEFICIARY at CUREVAC (the “**EMPLOYMENT**”) is terminated for an important reason for which the BENEFICIARY is not responsible (e.g. criminal acts against CUREVAC), or other reasons not covered by b) below (the “**BAD LEAVER**”) or (ii) enforcement is carried out on the assets of the BENEFICIARY on the basis of a title that is not merely provisionally enforceable and the seizure is not removed within two months or insolvency proceedings are opened on the assets of the BENEFICIARY or (iii) the opening of these proceedings is refused due to lack of assets. The above also applies in the event that the vesting period has already expired at this point.
- b) if the employment contract ends during the vesting period due to
- (i) disability of the BENEFICIARY,
  - (ii) termination by CUREVAC without cause;
  - (iii) the BENEFICIARY’s retirement,
  - (iv) death of the BENEFICIARY, or
  - (v) ordinary termination of the employment contract by the BENEFICIARY, the requirements of which are objectively verifiable, (the “**GOOD LEAVER**”). In this case, the condition subsequent only applies to the part of the PARTICIPATION POINTS that are subject to expiry in accordance with the procedure set out in Section 2 (2).
- (6) The PARTICIPATION POINTS which are no longer subject to expiry in accordance with paragraphs (2) and (3) above and which the BENEFICIARY is entitled to after application of paragraph (5) above are “vestable PARTICIPATION POINTS” (the “**VESTABLE PARTICIPATION POINTS**”). The number of vestable PARTICIPATION POINTS is used to calculate the amount of the payment entitlement or to calculate the number of shares to be transferred, to which the BENEFICIARY is entitled when the exercise occurs.
- (7) In order to avoid misunderstandings, it is clarified between the parties that the BENEFICIARY is not entitled to claim any cash payment or reimbursement with regard to the PARTICIPATION POINTS for which the condition subsequent has been met and/or has no other claims of any kind.

**Section 3 - Transferability**

- (1) The transfer of PARTICIPATION POINTS is excluded (ban on disposal). The same applies to all legal transactions comparable to such transfers , such as the granting of sub-participations, straw man participations, repurchase agreements (e.g. the establishment of so-called short positions)and any comparable measures.
- (2) In the event of a violation of the ban on disposal pursuant to (1), all rights to PARTICIPATION POINTS acquired under this contract expire, including the vestable PARTICIPATION POINTS (condition subsequent pursuant to Section 158 (2) BGB).
- (3) Deviating from paragraph (1), the transfer of vested PARTICIPATION POINTS due to death is possible. The heirs and/or legatees are obliged to legitimise themselves by presenting a certificate of inheritance to CUREVAC.
- (4) If the claims referred to in (3) are shared by several heirs and/or legatees, the heirs and/or legatees are obliged to appoint a proxy for the exercise of their rights to exercise their rights jointly. In this case, the exercise of rights by individual heirs and/or legatees is not permitted. All rights of the heirs and/or legatees with the exception of the rights according to Sections 4 to 11 remain dormant until the appointment of a proxy; payments of or transfer of shares by CUREVAC to the heirs and/or legatees are only to be made to the proxy.

**Section 4 - Amount of the Beneficiary's Claims**

- (1) The amount of the rights of the BENEFICIARY according to the following Sections 5, 8 and 9 (the "**SHARE OF THE REVENUE**") is determined according to the virtual proportional participation of the BENEFICIARY in the share capital of CUREVAC at the time of occurrence of one the exercise cases specified in this contract (the "**EXERCISE CASE**"). The virtual proportional participation of the BENEFICIARY corresponds to the participation that the BENEFICIARY would have been granted in the case of an actual non-privileged participation in the share capital of CUREVAC according to the VESTABLE PARTICIPATION POINTS of the BENEFICIARY. In the share deal exercise case, the BENEFICIARY is therefore, for example, positioned as if he had (also) sold NON-VESTED PARTICIPATION POINTS in connection with an exercise case in the same ratio as the CUREVAC shareholders.

- (2) When this contract is signed, a vested participation point arithmetically (virtually) corresponds to a nominal amount of one euro in the share capital of CUREVAC, but as a non-privileged shareholder who does not enjoy any special rights, e.g. on liquidation preference.
- (3) In case of doubt, the principles set out in this Section 4 take precedence over the regulations in Sections 5, 8 and 9, including Appendices 1 - 4.

**Section 5 - IPO Exercise Case**

- (1) The IPO exercise case is given, if, within the term of the VAP, the requirements under a) and b) are met cumulatively and if also during the listing of CUREVAC one of the requirements under c), d) and/or e) are alternatively fulfilled:
  - a) the shares of CUREVAC are admitted to a domestic or foreign stock exchange and then integrated into stock exchange trading ("**INITIAL LISTING**"),
  - b) the lock-up periods resulting from the relevant stock exchange listing provisions and the agreements made with the underwriters have expired,
  - c) a shareholder who, at the time of the conclusion of this agreement, holds more than 50% of the shares in CUREVAC or its legal successor (hereinafter also referred to as "**MAJORITY SHAREHOLDER**"), sells, after the date of the initial listing of CUREVAC shares on the stock exchange as defined in a) (hereinafter also referred to as "**TIME OF THE INITIAL LISTING**"), cumulatively to one or more third parties not affiliated with the majority shareholder within the meaning of Section 15 AktG since the date of the initial listing, a total of at least 5% of the shares held by the majority shareholder at the time of the initial listing (the reaching of this threshold is also referred to as "**SHARE SALE AFTER IPO**"). After the start of a share sale after the IPO, the regulation of the previous sentence applies accordingly for every further transaction by majority shareholders and regardless of the number of shares sold by them (this case or cases are also referred to as "**FURTHER SHARE SALE AFTER IPO**"),
  - d) an active ingredient of CUREVAC or another substance developed by CUREVAC for human therapy is approved as a drug by a competent authority in the United States or Europe for the market as a non-conditional approval (this case is also referred to as "**DRUG APPROVAL AFTER IPO**"),

- e) there is sufficient liquidity in the share. Sufficient liquidity is available if, after the time of the initial listing, the following requirements (i) and (ii) are met cumulatively at the end of the subsequent 12-month period (“**12-MONTH PERIOD**”) (this case is also referred to as “**LIQUIDITY AFTER IPO**”); a separate analysis is carried out for each 12-month period:
  - (i) the weighted average turnover of CUREVAC shares within the relevant 12-month period exceeds five times the number of shares of CUREVAC in free float during this 12-month period (as defined in (ii) below).
  - (ii) the number of free float shares is at least 10% on average over the relevant 12-month period. Free float shares are such a number of shares in CUREVAC that are (aa) traded on the stock exchange and (bb) not held by the former shareholders of CUREVAC or their legal successors or new shareholders, provided that they participate in a financing round for the first time before CUREVAC’s initial listing or companies affiliated with it (Section 15 AktG).

The exercise of liquidity after the IPO can take place repeatedly in each 12-month period after the date of the initial listing.

The restrictions of the above requirements under c), d) and e) for the exercise of the IPO shall not apply 9 years after the date of the initial listing.

- (2) The BENEFICIARY acquires the right to acquire a certain number of shares in CUREVAC free of charge from CUREVAC in the exercise of the IPO in accordance with (1). CUREVAC is entitled to make a cash payment instead of transferring shares. At CureVac’s request, the BENEFICIARY is obliged to contribute his payment claim in accordance with sentence 2 above as a contribution in kind against the granting of shares in CUREVAC to CUREVAC.

- a) In the case of a share sale after an IPO or another share sale after an IPO:

The BENEFICIARY receives a right to transfer shares to CureVac. The claim is limited in this respect and a maximum of such number of PARTICIPATION POINTS (calculated from the total number of PARTICIPATION POINTS granted to the BENEFICIARY) may be exercised in terms of how it corresponds to the ratio of the shares sold by the majority shareholder in the context of the share sale after the IPO or further share sale after the IPO to the shares held by the majority shareholder at the time of the initial listing;

Examples:

Share sale after IPO: the majority shareholder holds 1,000 shares at the time of the initial listing and sells 100 shares as part of the share sale after IPO, i.e. 10% of the shares held by him. 50 PARTICIPATION POINTS were allocated to the BENEFICIARY. Accordingly, the BENEFICIARY is entitled to 10%, i.e. 50 PARTICIPATION POINTS.

Further share sale after IPO: After the share sale after the IPO, the majority shareholder still holds 900 shares and sold 40 shares as part of a further share sale after the IPO, i.e. 4% of the shares held by him at the time of the initial listing. The BENEFICIARY is therefore entitled to a further 4% of the PARTICIPATION POINTS originally held by him, i.e. 20 PARTICIPATION POINTS.

b) In the case of drug approval after IPO:

The BENEFICIARY receives a right to transfer shares to CUREVAC. 100% of the BENEFICIARY'S PARTICIPATION POINTS can be exercised; only a partial exercise of the PARTICIPATION POINTS by the BENEFICIARY is excluded.

c) In the case of liquidity after IPO:

The BENEFICIARY receives a right to transfer shares to CUREVAC. Up to 10% of the PARTICIPATION POINTS granted to the BENEFICIARY can be exercised in each 12-month period.

After 9 years from the time of the initial listing, 100% of the remaining PARTICIPATION POINTS of the BENEFICIARY can be exercised; only a partial exercise of the PARTICIPATION POINTS by the BENEFICIARY is excluded.

(3) Irrespective of the existence of the further requirements in accordance with Section 5 (1) c) d) or e), the BENEFICIARY receives the right to exercise up to 10% of the vested PARTICIPATION POINTS granted to the BENEFICIARY if the requirements of Section 5 (1) a) and b) are met cumulatively. If the company is financed with regard to the initial listing ("CROSS-OVER FINANCING") and in connection with the cross-over financing at least 10% of the shares held by the former shareholders or by legal successors of the former shareholders are sold to one or more new investors ("SHARE SALE"), the BENEFICIARY has the right to exercise up to 10% of the PARTICIPATION POINTS granted to him before the initial listing and within 7 days after notification of the intended share sale and to sell the shares thereby acquired in the course of the share sale; the selling former shareholder of CUREVAC or its legal successor must work towards this co-sale to the respective third party. If the BENEFICIARY exercises his right under this paragraph (3) sentence 2, the claim under paragraph (3) sentence 1 expires. Paragraph (2) sentences 2 and 3 apply accordingly.

- (4) The calculation of the shares to be transferred in the exercise of the IPO to the bene-ficiaries or the amount of the payment claim existing at CureVac's discretion is based on **Appendix 1**.
- (5) vIn the event of capital increases from company funds, with every capital reduction or restructuring measure, without the requirements of the merger/asset exercise within the meaning of Section 9 (1) which took place before an exercise being met simulta-neously, the BENEFICIARY's claim is to be corrected. This correction ("adjustment") is based on the principles outlined in **Appendix 4**.

**Section 6 - Exercise Declaration for the IPO Exercise Cases**

- (1) CUREVAC undertakes to notify the BENEFICIARY in writing of the number of shares which the BENEFICIARY is entitled to transfer in accordance with Section 5 above immediately after the exercise of an IPO.
- (2) The BENEFICIARY undertakes to notify CUREVAC in writing within a period of four weeks, starting with the receipt of this notification according to (1) (hereinafter also referred to as "**EXERCISE WINDOW**"), of the amount of PARTICIPATION POINTS he would like to use, i.e. the number of shares he would like to receive (hereinafter also referred to as "**EXERCISE DECLARATION**"). CUREVAC must receive this exercise declaration, which is binding for the BENEFICIARY, within the exercise window. CUREVAC is entitled to reject exercise declarations that have not been completed in full. If and insofar as the BENEFICIARY does not exercise the right to exercise the IPO in the exercise case by submitting the exercise declaration within the exercise window, this irrevocably expires.

- (3) The transfer of the shares or the corresponding payment to the BENEFICIARY takes place immediately after the exercise window has ended. Both CUREVAC and the BENEFICIARY are obliged to participate in all measures necessary to transfer the shares, to take action and to make declarations.

**Section 7 - Limitations on Disposal during an IPO Exercise, Insider Information**

The BENEFICIARY is advised that, as an employee or organ of CUREVAC, he belongs to the group of people who, as insiders within the meaning of Article 8 ff., may have so-called inside information relating to CUREVAC in terms of the Market Abuse Ordinance as amended as well as corresponding foreign regulations that may apply. The BENEFICIARY is further advised that, among other things, the purchase and sale of shares in CUREVAC are punishable if they are aware of insider circumstances.

**Section 8 - Share Deal Exercise Case**

- (1) The share sale exercise case exists if, within the term of the VAP according to Section 13 (1), the following requirements are cumulatively met:
- a) CUREVAC is not listed on the stock exchange at the time of the occurrence of the requirements according to b) and c).
  - b) At least 50% of all CUREVAC shares (with and without preferential rights) are sold to one or more independent third parties in a single transaction or multiple related transactions. Multiple transactions are considered to be contiguous within the meaning of sentence 1 if they take place within 12 months, the date of the respective conclusion of the contract for sale being decisive. For the measurement of the threshold of fifty percent, in the case of related transactions, the last transaction in the period according to sentence 2 must be used.
  - c) The consideration owed by the independent third party/parties for the acquisition of the SHARES in CUREVAC has been rendered and is finally at the free disposal of the selling shareholders. In the case of milestone payments, the BENEFICIARY receives the payments like the selling shareholders, i.e. then, when the milestones are paid. The payment to the BENEFICIARY must be made 4 weeks after the respective selling shareholders have received the respective milestone payment.

A third party is independent within the meaning of this paragraph (1) if it is not one or more persons or companies associated with CUREVAC or the shareholders of CUREVAC (also jointly) within the meaning of Section 15 AktG.

- d) The consideration agreed for the purchase of the SHARES in CUREVAC, calculated on all SHARES IN CUREVAC, amounts to at least EUR 357,188,892.00.
- (2) In the exercise of a share deal in accordance with paragraph (1), the BENEFICIARY is entitled to a share in the revenue from CUREVAC, which is to be paid in the form of cash. The amount of this share in the revenue is calculated in accordance with the principles set out in **Appendix 2** for the share deal exercise.
- (3) In the event of capital increases from company funds or of any capital reduction or restructuring measures, without simultaneously meeting the requirements of the merger exercise within the meaning of Section 9 (1), which took place after the signing of this contract and before the exercise, the BENEFICIARY's claim is to be corrected in accordance with paragraph (2). This correction (the "ADJUSTMENT") is based on the principles set out in **Appendix 4**.

**Section 9 - Merger/Asset Deal Exercise Case**

- (1) The merger/asset deal exercise case exists if, within the term of the VAP, the following requirements are cumulatively met:
  - a) In a single transaction or multiple related transactions, all shares in CUREVAC or more than 50% of CureVac's assets are transferred to one or more independent parties, for example as part of (i) a merger within the meaning of the Transformation Act as amended, (ii) a spin-off, (iii) a transfer to another company as a contribution in kind, (iv) a sale of the assets or (v) another economically comparable measure. Multiple transactions within the meaning of sentence 1 are considered to be contiguous if they take place within 12 months, where the date of the conclusion of this contract is decisive. For the measurement of the threshold of fifty percent, in the case of related transactions, the last transaction in the period according to sentence 3 must be used.

- b) In return, the shareholders of CUREVAC or CUREVAC itself receive shares in the other independent company and/or (ii) a cash payment. The agreed consideration, calculated on all shares in CUREVAC, amounts to at least EUR 357,188,892.00.

The shareholders or CureVac have received the consideration within the meaning of the preceding sentence if this is finally at the free disposal of CUREVAC or its shareholders.

A third party is independent within the meaning of this paragraph (1) if it is not one or more people affiliated with CUREVAC or with CUREVAC shareholders (also jointly) within the meaning of Section 15 AktG or companies.

- (2) In the exercise of a merger/asset deal in accordance with paragraph (1), the BENEFICIARY is entitled to a share in the revenue from CUREVAC, which is in the form of money or, if the consideration to CUREVAC consists in the granting of shares in a company, in the payment of shares, provided these are admitted to trading on a domestic or foreign stock exchange, failing which it must be settled in cash. The calculation of the amount of the share in the revenue is based on the principles set out in **Appendix 3** for the merger/asset deal exercise.

- (3) In the event of capital increases from company funds or any capital reduction or re-structuring measures that have taken place since the signing of this contract and before the exercise, the claim of the BENEFICIARY must be corrected in accordance with paragraph (2). This correction (the "ADJUSTMENT") is based on the principles outlined in **Appendix 4**.

**Section 10 - Assertion of the Claim of the Beneficiary in the**

**Share Deal and Merger/Asset Deal Exercise Cases, Type of Performance**

The entitlement of the BENEFICIARY in the share deal and merger/asset deal exercise cases must be satisfied within 4 weeks of the occurrence of the last requirement of the respective exercise case. When agreeing milestone payments, Section 8 (1) c sentence 2 and 3 shall apply. The amount of money owed is to be paid into a bank account to be named by the BENEFICIARY to CUREVAC. Shares owed are to be transferred to a securities account of the BENEFICIARY.

**Section 11 - Compensation Claim, Final Settlement**

- (1) In the event that the employment of the BENEFICIARY ends during the term of the VAP and within the period specified in Section 2 (2) plus the period in which there was an inhibition pursuant to Section 2 (3) and the BENEFICIARY, according to Section 2 (6), is already entitled to vested PARTICIPATION POINTS and no exercise occurred within twenty-four months after the end of employment, CUREVAC is entitled to settle all claims of the BENEFICIARY in connection with this contract by a one-off compensation payment (the "**COMPENSATION PAYMENT**"). The BENEFICIARY is only entitled to a compensation payment if CUREVAC exercises its right to make a compensation payment in accordance with Section 11 (1) sentence 1 within the term of the VAP.
- (2) The calculation of the compensation payment is based on the principles outlined in **Appendix 5**.
- (3) In the event of capital increases from company funds or of any capital reduction or restructuring measures, without simultaneously meeting the requirements of the merger exercise within the meaning of Section 9 (1), which took place after the signing of this contract and before the compensation payment, the BENEFICIARY's claim is to be corrected in accordance with paragraph (2). This correction ("adjustment") is based on the principles set out in **Appendix 4**.
- (4) All claims of the BENEFICIARY arising in connection with or from this contract are fulfilled with the payment of the compensation payment. No other claims exist or arise in connection with or from this contract.

**Section 12 - Information Rights of the Beneficiary**

CUREVAC shall immediately notify the BENEFICIARY of any exercise or impending exercise and other planned transactions that are important for the exercise of the rights of the BENEFICIARY under this contract, unless and insofar as there are no compelling confidentiality interests of CUREVAC or the third parties involved in the exercise or the transaction.

**Section 13 - Term of this Contract**

- (1) The VAP ends on December 31, 2025; in the event of an IPO before December 31, 2025, it has a term until the end of the ninth calendar year after the date of the initial listing ("**TERM OF THE VAP**").
- (2) Claims to shares in the revenue according to the provisions of this contract only exist if an exercise within the meaning of this contract occurs within the term of the VAP.
- (3) This contract may be terminated by CUREVAC with immediate effect if the BENEFICIARY violates essential obligations from legal regulations, or violates this contract with respect to CUREVAC. In the event of this termination by CUREVAC, all PARTICIPATION POINTS, including those that are already vested, shall be forfeited.

**Section 14 - Taxes, other Duties and Fees**

- (1) Taxes (including wage tax, church tax and solidarity surcharge) and other charges (e.g. employee contributions to pension insurance, unemployment insurance, health insurance and nursing care insurance), that are payable in connection with the participation of the BENEFICIARY in the VAP are to be paid internally only by the BENEFICIARY or his legal successor. CUREVAC is entitled to withhold amounts owed accordingly. In the case of the transfer of shares from the VAP, CUREVAC is entitled to sell the necessary number of shares in order to be able to withhold amounts owed under this paragraph.
- (2) If this retention is not sufficient to repay the debt of taxes and duties of the type described, the BENEFICIARY is obliged to pay CUREVAC the amount missing to repay the entire debt of such taxes and other duties within three months of receiving a corresponding request. Insofar as the tax office subsequently determines a higher wage tax base on the basis of an external audit or for other reasons, the BENEFICIARY is obliged to pay the additional taxes and other charges of the specified type to the tax office and the responsible social security institution as well as by way of a real contract in favor of third parties to exempt CUREVAC from its corresponding liability. The BENEFICIARY bears the corresponding tax risk.

(3) The BENEFICIARY is responsible for the tax review. CUREVAC assumes no liability for tax disadvantages and/or consequences that arise from the conclusion and/or implementation of this contract for the BENEFICIARY.

**Section 15 - Payments**

- (1) Subject to the provision in Section 14, each payment to the BENEFICIARY under this contract is transferred to the last known account of the BENEFICIARY.
- (2) To avoid misunderstandings: Payments to the beneficiaries under this contract will only be made , after an exercise has occurred and after the corresponding proceeds from the exercise have been paid to the respective shareholders of CUREVAC or CUREVAC itself and in the case of a compensation payment in accordance with Section 11.
- (3) It is the understanding of the parties that the provision of paragraph (2) above also applies if the BENEFICIARY is entitled to vested PARTICIPATION POINTS after termination of his service or employment and an exercise occurs after his employment ends. Section 11 remains unaffected.

**Section 16 - Communications**

The BENEFICIARY undertakes to immediately inform CUREVAC in writing of his address (postal address, telephone number, email address) and his account number (or, if available), securities account details, and to inform CUREVAC immediately in writing of changes to his address, name, account and securities account. All communications from CUREVAC to the BENEFICIARY are deemed to have been received on the third day after being sent to the address last communicated to CUREVAC by the BENEFICIARY.

**Section 17 - Completeness of this Contract, Applicable Law, Court of Jurisdiction, Written Form**

- (1) This contract and letter of allocation contain all agreements that the parties have made regarding the VAP. There are no side agreements between the parties. Changes or additions to this contract must be in writing in order to be effective, unless notarial certification is required. This also applies to a waiver of the written form requirement.

(2) All appendices to this contract form an integral part of this contract.

(3) With the exception of international private law, this contract is subject to the law of the Federal Republic of Germany. The exclusive place of jurisdiction for all disputes arising from or in connection with this contract is Tübingen.

**Section 18 - Severability Clause**

Should one or more provisions of this contract prove ineffective, void or incomplete, the validity of the remaining provisions of the contract remains unaffected. The parties will - if applicable in due form - replace the ineffective or void provision with such a regulation or fill in the contractual gap with such a regulation with which the economic purpose pursued by them can best be achieved. If the ineffectiveness or nullity of a provision is based on a measure of performance or time (deadline or date), then a legally permissible measure should replace the ineffective or void performance or time determination.

**Beneficiary Rights in the IPO Exercise Case**

## 1. Share sale after IPO/further share sale after IPO

The number of PARTICIPATION POINTS that can be exercised in each exercise case is calculated as follows:

$$y \text{ (exercisable)} = y \frac{\text{shares sold by majority shareholder}}{\text{total number of shares of majority shareholder at IPO}}$$

"y (exercisable)" = corresponds to the number of PARTICIPATION POINTS that can be exercised in the respective exercise case "y" corresponds to the total number of PARTICIPATION POINTS granted to the BENEFICIARY.

"Shares sold by majority shareholder" corresponds to the number of shares sold by the main shareholder or his legal successors since the time of the initial listing or since the last exercise of a share sale or further share sale, depending on which event is later (without purchased shares since the IPO; the deduction may only be done once).

"Total number of shares in majority shareholder at IPO" corresponds to the total number of shares held by the majority shareholder or his legal successor at the time of the initial listing.

## 2. Exercise of drug approval after IPO

If the exercise of drug approval occurs after the IPO, 100% of the PARTICIPATION POINTS of the BENEFICIARY can be exercised; only a partial exercise of the PARTICIPATION POINTS by the BENEFICIARY is excluded.

## 3. Exercise of liquidity after IPO

Up to 10% of the vested PARTICIPATION POINTS granted to the BENEFICIARY can be exercised in each 12-month period.

After nine years after the initial listing, 100% of the remaining PARTICIPATION POINTS of the BENEFICIARY can be exercised; in this case, only a partial exercise of the PARTICIPATION POINTS by the BENEFICIARY is excluded.

**Beneficiary Rights in the Share Deal Exercise Case**

The amount of the share of the sales revenue that the BENEFICIARY can obtain due to his vested PARTICIPATION POINTS is calculated with the liability capital unchanged or, if only one or more capital increases are made against contributions to CureVac, in case of the exercise of the share deal according to the following formula:

$$\text{BENEFICIARY's claim} = \frac{y * \text{Revenue SD}}{\text{StK (new)} + x}$$

"y" is the number of PARTICIPATION POINTS of the BENEFICIARY vested before or during the exercise of the share deal;

"x" is the total number of PARTICIPATION POINTS from the VAP 2013 and other comparable employee participation programs that were vested in CureVac at the time the share deal is exercised.

"StK (new)" is the amount of CureVac's liability capital at the time the share deal is exercised;

"Revenue SD" is that of the shareholders of CureVac, who have sold shares in CureVac in the context of a share deal within the meaning of Section 8, the sales revenue less the transaction costs and less all payments due to privileges of the holders of preferential shares (e.g. preferential dividend, liquidation preference).

A prerequisite for a participation of the BENEFICIARY in the revenue is that the consideration agreed for the purchase of shares in CureVac, calculated on all shares in CureVac, is at least EUR 357,188,892.00.

**Beneficiary Rights in the Merger/Asset Deal Exercise Case**

The amount of the share of the proceeds that the BENEFICIARY can demand due to his vested PARTICIPATION POINTS is calculated with the liability capital unchanged or, if only one or more capital increases are made against contributions to CureVac, in case of the exercise of the merger/asset deal according to the following formula:

$$\text{BENEFICIARY's claim} = \frac{y * \text{Revenue M}}{\text{StK (new)} + x}$$

"y" is the number of PARTICIPATION POINTS of the BENEFICIARY vested at the time the merger/asset deal is exercised;

"x" is the number of PARTICIPATION POINTS from the VAP 2013 and other comparable employee participation programs that were vested in CureVac at the time the merger/asset deal is exercised.

"StK (new)" is the amount of CureVac's liability capital at the time the merger/asset deal is exercised;

"Revenue M" is the value of the consideration that the shareholders of CureVac or CureVac itself receive in return, minus all payments based on the privileges of the holders of preferential shares (e.g. preferential dividend, liquidation revenue) as well as minus the transaction costs and the taxes paid or to be paid by CureVac.

The entitlement to a share of the revenue is to be made in the form of cash or, if the consideration to CureVac consists in the granting of shares in a company, in the payment of shares if these are admitted to trading on a domestic or foreign stock exchange.

A prerequisite for a participation of the BENEFICIARY in the revenue is that the agreed consideration, calculated on all shares in CureVac, is at least EUR 357,188,892.00.

**ADJUSTMENT**

If one of the following cases 1. and/or 2. occurs, the factors y and x of the formulae in **Appendix 1 to 3** are to be corrected according to the following formulae, which are used individually or in combination - if necessary, also multiple times:

- For every capital increase from company funds as well as every capital reduction, if these took place before the exercise, the factors y and x of the formulae are to be corrected using the following formulae:

$$y \text{ (new)} = y * \frac{\text{Amount of capital after corporate action}}{\text{Amount of capital after corporate action}}$$

$$x \text{ (new)} = x * \frac{\text{Amount of capital after corporate action}}{\text{Amount of capital after corporate action}}$$

With all the corrections following the first correction of the factors y and x, the result of the last correction takes the place of the factors y and x in the calculation of y (new) and x (new) in the above formula.

"Amount of capital after corporate action" is CureVac's liability capital figure following a capital increase from company funds or a capital reduction;

"Amount of capital before corporate action" is CureVac's liability capital figure before a capital increase from company funds or a capital reduction.

- For each restructuring before the exercise, the factors y and x of the formulae must be corrected using the following formulae:

$$y \text{ (new)} = y * \frac{\text{UW CureVac} * \text{StK Target (new)}}{(\text{UW CureVac} + \text{UW Target}) * \text{StK (new)}}$$

$$x \text{ (new)} = x * \frac{\text{UW CureVac} * \text{StK Target (new)}}{(\text{UW CureVac} + \text{UW Target}) * \text{StK (new)}}$$

With all the corrections following the first correction of the factors y and x, the result of the last correction takes the place of the factors y and x in the calculation of y (new) and x (new) in the above formula.

"Restructuring" within the meaning of this subparagraph is a measure whereby, with-out the requirements of the merger/asset deal exercised in accordance with Section 9 simultaneously being met, the shares in CureVac or more than 50% of the assets of CureVac are transferred to a new independent company and the shareholders of CureVac are granted unlisted shares in this new legal entity. This is particularly the case when the shares in CureVac or 50% or more of CureVac's assets are transferred in the context of (i) a merger within the meaning of the Transformation Act as amended from time to time, (ii) a spin-off, (iii) a contribution to another company as a contribution in kind or (iv) another economically comparable restructuring measure;

"UW CureVac" is the corporate value of CureVac that will be used as the basis for the restructuring (exchange ratio);

"UW Target" is the corporate value of the receiving legal entity that is used as the basis for the restructuring (exchange ratio);

"StK Target (new)" is the liability capital of the receiving legal entity after the restructuring has been carried out;

"StK (new)" is the amount of CureVac's liability capital immediately prior to the re-structuring.

In the case of other restructuring measures that require a correction, also multiple corrections, in accordance with the above principles, the correction must be carried out in accordance with the principles of Section 4 of the Employee Participation Agreement. The same applies to the granting of PARTICIPATION POINTS in later admission rounds, taking into account the then existing liability capital of CureVac and the scope of the VAP 2013 and other comparable employee participation programs.

**COMPENSATION PAYMENT**

The proportion of the sales revenue that the BENEFICIARY can claim due to his vested PARTICIPATION POINTS in the event of a compensation payment is calculated with un-changed liability capital or, if only one or more capital increases are made against contributions to CureVac, using the following formula:

$$\text{BENEFICIARY's claim} = \frac{y * \text{PMV}}{\text{StK (new)} + x}$$

"y" is the number of PARTICIPATION POINTS of the BENEFICIARY vested at the time of the compensation payment;

"x" is the number of PARTICIPATION POINTS from the VAP 2013 and other comparable employee participation programs that were vested in CureVac at the time before the compensation payment.

"StK (new)" is the amount of CureVac's liability capital at the time of the compensation payment;

"PMV" is CureVac's post-money valuation (regarding 100% of the company's liability cap-ital) from the last round of financing that took place before the BENEFICIARY's employment ended. To avoid misunderstandings, the post-money valuation of CureVac is calculated using the following formula:

$$\text{PMV} = \frac{P * 100\%}{Q}$$

Wherein the following applies:

P = payments on the registered liability capital including additional benefits in the capital reserves of CureVac within the meaning of Section 272 (2) HGB

Q = share of the registered liability capital of CureVac (in percent) after the financing round.

Example:

A new investor subscribes to new shares in CureVac and brings in a total of EUR 10 million. After completing the financing round (i.e. after the new shares have been registered), the new investor holds 20% of the registered share capital in CureVac. Accordingly, the post-money valuation amounts to EUR 50 million.

CONFIDENTIAL  
EXECUTION VERSION

TERMINATION AGREEMENT

between

CUREVAC AG

and

ELI LILLY AND COMPANY

This TERMINATION AGREEMENT is effective as of June 26, 2020 (the "**Termination Date**") and is entered into by and among:

**CUREVAC AG**, a German corporation ("**CureVac AG**"), having a place of business at Friedrich-Miescher-Strasse 15, 72076 Tübingen, Germany;

**CUREVAC REAL ESTATE GMBH**, a German limited liability company, having a place of business at Friedrich-Miescher-Strasse 15, 72076 Tübingen, Germany (CureVac AG and CureVac Real Estate GmbH jointly "**CureVac**") and

**ELI LILLY AND COMPANY**, an Indiana corporation ("**Lilly**"), having a place of business at Lilly Corporate Center, Indianapolis, Indiana 46285.

INTRODUCTION

A. WHEREAS, CureVac AG and Lilly are parties to that certain License and Collaboration Agreement effective as of November 29, 2017 ("**License Agreement**"), and CureVac Real Estate GmbH and Lilly are parties to that certain Early Clinical Supply Agreement dated July 5, 2018, and related Quality Agreement dated June 29, 2018 ("**Supply and Quality Agreements**");

B. WHEREAS, Lilly has informed CureVac that it intends to terminate the License Agreement in accordance with Section 11.2 (Termination at Will by Lilly), unless the Parties agree to mutually terminate the License Agreement.

C. WHEREAS, CureVac and Lilly are interested in an early termination of the License Agreement and the Supply and Quality Agreements, and an agreement on the consequences of such termination which will allow CureVac to continue the Development Program (as defined in the License Agreement), and Lilly to reevaluate the program after completion of the first Phase I Study.

NOW THEREFORE, in consideration of the foregoing premises and the following mutual covenants, agreements and stipulations set forth herein, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

#### Article I – Definitions

All capitalized terms used in this Termination Agreement shall have the meaning as defined in the License Agreement, unless otherwise defined herein. In case of conflict or inconsistency between the provisions of the Termination Agreement and any surviving provision of the License Agreement, the provisions of this Termination Agreement shall prevail.

#### Article II – Termination

- 2.1 The Parties hereby agree that the License Agreement and the Supply and Quality Agreements terminate on the Termination Date. Consistent with Section 11.4(c)(i), as of the Termination Date, all rights licensed to Lilly under the License Agreement, including the rights to the CureVac Intellectual Property automatically revert back to CureVac AG, and CureVac shall be free to use, license and transfer these rights.
- 2.2 The Parties agree that, subject only to the rights and obligations under this Termination Agreement, and with the exception of Section 11.6 of the License Agreement (Accrued and Surviving Obligations), all rights and obligations under the License Agreement and Supply and Quality Agreements terminate as of the Termination Date, and neither Lilly nor CureVac have any further claims under the License Agreement or the Supply and Quality Agreements; provided, that, notwithstanding anything to the contrary in the License Agreement, the Parties acknowledge and agree that with respect to the survival of Section 11.4, only Sections 11.4(a), 11.4(c)(i), 11.4(c)(v) and 11.4(e) shall survive; and (ii) Section 13.4 of the Early Clinical Supply Agreement referred to in the INTRODUCTION above shall be of no further force or effect and Lilly has no liability in connection any unused capacity.

#### Article III – Transfers and Support

- 3.1 **Development Data.** Within [\*\*\*\*\*] of the Termination Date, Lilly shall provide access to CureVac to [\*\*\*\*\*] developed under the Development Program, and all [\*\*\*\*\*], and that are both (i) in Lilly's or its Affiliates' possession and control, and (ii) set forth on **Exhibit 3.1** hereto. The Parties acknowledge and agree that the items set forth on **Exhibit 3.1** hereto are [\*\*\*\*\*] of the [\*\*\*\*\*] work performed by Lilly under the License Agreement. Upon CureVac's reasonable request, Lilly may provide support to CureVac through employees, for up to a total of [\*\*\*\*\*] of personnel time, to reasonably support CureVac in the preparation of the IND for the Initial Product.

- 3.2 **Intellectual Property.** Lilly shall reassign and retransfer, and hereby reassigns and retransfers to CureVac AG the composition of matter patent titled [\*\*\*\*\*], and any Patents based thereon [\*\*\*\*\*], which had been assigned and transferred from CureVac AG to Lilly under the License Agreement, provided such Patents have not been withdrawn or abandoned in accordance with CureVac's instructions. CureVac hereby accepts the reassignment and retransfer. Lilly shall execute and deliver all such documents, instruments and other papers and take all such other action which CureVac may reasonably request in order to effect the assignment and transfer; provided, that any reasonable and documented costs and expenses that Lilly incurs in connection with providing such assistance beyond executing an initial assignment of such patent shall be reimbursed by CureVac in accordance with payment terms to be reasonably agreed by the Parties in good faith. CureVac shall have the sole authority to enforce and defend the reassigned and retransferred [\*\*\*\*\*] composition of matter patent described above, at CureVac's sole cost and expense. As of the Effective Date of this Termination Agreement, Lilly represents that, to the actual knowledge of those specific individuals involved in negotiating this Termination Agreement on behalf of Lilly, it has not [\*\*\*\*\*] – and none of its Affiliates have [\*\*\*\*\*] - [\*\*\*\*\*]. CureVac shall retain the right to demand from Lilly solely (without any further obligation to Lilly) the license under Section 11.4 (c)(ii)(y) of the License Agreement, provided, however, that CureVac may exercise such right at any time within [\*\*\*\*\*] after the Termination Date.
- 3.3 **Material.** Within [\*\*\*\*\*] of the Termination Date, Lilly shall transfer [\*\*\*\*\*] and [\*\*\*\*\*] all [\*\*\*\*\*] produced under the License Agreement or the Supply and Quality Agreements (collectively, “**Materials**”), and that are both (i) controlled by Lilly and (ii) in stock with Lilly or with a Third Party CMO on the Termination Date, including but not limited to [\*\*\*\*\*]. All Materials are transferred “as-is” with no representations or warranties and CureVac assumes full liability for any use or disposition of the Materials.
- 3.4 **Consideration.** In consideration, in part, for the transfers under Sections 3.1 to 3.3, CureVac agrees that Lilly will have no further cost liabilities under the License Agreement or Supply [\*\*\*\*\*] and commercial work, including wind-down fees, if any.

**Article IV – Right of First Negotiation**

- 4.1 In the event CureVac, its Affiliate or sublicensee conduct and complete a [\*\*\*\*\*] of the Initial Product, CureVac, its Affiliate or sublicensee, will grant Lilly a right of first negotiation with respect to the Initial Product, to be exercised within [\*\*\*\*\*] after completion [\*\*\*\*\*] of such [\*\*\*\*\*].
- 4.2 For such purpose, CureVac, its Affiliate or sublicensee, will make available to Lilly within [\*\*\*\*\*] after completion of such [\*\*\*\*\*] a data package containing the final study report and additional data and documentation that Lilly may timely request, which may be reasonably required to evaluate the results of such [\*\*\*\*\*].
- 4.3 Within [\*\*\*\*\*] after receipt of both (to the extent applicable) the data package and any additional data or documentation that Lilly requests under Section 4.2 (i.e., within a maximum of [\*\*\*\*\*]), Lilly will inform CureVac AG, its Affiliate or sublicensee, whether Lilly is interested in negotiating an exclusive license to further develop, manufacture and commercialize the Initial Product at reasonable terms and conditions, reflecting [\*\*\*\*\*]. The terms and conditions of such license agreement will be negotiated within a term of another [\*\*\*\*\*] after notice by Lilly of its interest. For the avoidance of doubt, if Lilly is not interested in obtaining a license to the Initial Product, if it does not express its interest within [\*\*\*\*\*] after completion of the [\*\*\*\*\*], or if Lilly and CureVac AG, its Affiliate or sublicensee are not able to agree on the terms of such license within such additional [\*\*\*\*\*] period, all obligations under this Article 4 terminate, and CureVac, its Affiliate or sublicensee will be free to continue the development and/or grant rights to the Initial Product to any Third Party.

**Article V – Confidentiality**

- 5.1 This Termination Agreement shall be considered Confidential Information of both Parties and the disclosure of such Confidential Information requires the prior written consent of the other Party, such consent not to be unreasonably withheld, delayed or conditioned.
- 5.2 Notwithstanding Section 5.1, CureVac is entitled to approach Third Parties regarding a potential license with respect to the Initial Product, and the license or transfer of the intellectual property, development data and material which is transferred to CureVac under Article III above; provided, that any such license - if granted prior to the expiry of Lilly's right of first negotiation under Article IV - shall be subject to Lilly's right of first negotiation under Article IV. CureVac may inform such Third Party that the License Agreement has been terminated, and that CureVac has reacquired such rights and is free to license such rights to a Third Party subject to Lilly's right of first negotiation under Article IV.

**Article VI – Miscellaneous**

In addition to the specific section or article references contained herein, Section 10.7 (Limitations), Article IX (Confidentiality) and Article XII (Miscellaneous) of the License Agreement shall apply, mutatis mutandis, to this Termination Agreement.

**Amendment to the convertible loan agreement dated October 24, 2019**

between

Mr. Dietmar Hopp, Johann-Jakob-Astor-Str. 57, 69190 Walldorf  
also referred to as the lender

and

CureVac AG, Paul-Ehrlich-Straße 15, 72076  
also referred to as the "borrower"**Preliminary remark**

The Borrower intends to conduct a financing round in the short term and subsequently, after a restructuring process in which all shares of CureVac AG will be contributed to a Dutch company (CureVac NV), to conduct an initial public offering on the Nasdaq. The Borrower must maintain liquidity of at least EUR 60 million in preparation for the IPO.

Although the conditions for disbursement according to section 1.2 of the convertible loan are not fulfilled, the lender is prepared to make the necessary funds available on condition that the lender is free to decide whether the loan is to be repaid or exchanged for shares in the borrower.

That being said, the parties agree on the following:

1. Loan tranches pursuant to Section 1.2 of the Convertible Loan may be drawn down regardless of whether the cash balance of the Borrower falls below 15 million Euro.
2. If the Lender terminates the Convertible Loan pursuant to Section 4.2 (i) or the Borrower terminates the Convertible Loan pursuant to Section 4.4, CureVac is entitled and - if sufficient liquid funds are available - obliged to repay the Convertible Loan within 4 weeks.
3. The other provisions of the convertible loan remain unchanged.

CONFIDENTIAL

FIRST AMENDMENT TO  
COLLABORATION  
AND LICENSE  
AGREEMENT

Dated 19 December 2019

BETWEEN  
GENMAB B.V.  
AND  
CUREVAC AG

---

**FIRST AMENDMENT TO COLLABORATION AND LICENSE AGREEMENT**

This FIRST AMENDMENT TO COLLABORATION AND LICENSE AGREEMENT ("**First Amendment**") is made the 2nd day of July 2020 ("**First Amendment Effective Date**"), by and between:

**Genmab B.V.**, KvK no. 3016 9902, a Dutch corporation having its principal office at Uppsalalaan 15, 3584 CM Utrecht, the Netherlands ("**Genmab**"); and

**CureVac AG**, a German corporation having its principal office at Paul-Ehrlich-Strasse 15, 72076 Töbingen, Germany ("**CureVac**").

(Genmab and CureVac are sometimes hereinafter referred to collectively as the "**Parties**" or individually as a "**Party**")

**RECITALS:**

- A. Genmab and CureVac entered into a Collaboration and License Agreement dated 19 December 2019 (the "**Agreement**"); and
- B. Under the Agreement the Parties committed to negotiate and enter into a clinical supply agreement within [\*\*\*\*\*] after the Effective Date of the Agreement.
- C. Genmab and CureVac would like to extend the term for entering into such clinical supply agreement.

NOW, THEREFORE, in consideration of the premises and the mutual covenants and agreements herein contained, and for good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, hereby agree to the following:

- 1. Except as otherwise defined herein, the words and phrases in the Agreement shall have the same meaning in this First Amendment.
- 2. The first sentence of Section 6.2 of the Agreement is hereby deleted in its entirety and replaced with the following:

*"6.2. No later than [\*\*\*\*\*] the Parties will enter into a clinical supply agreement and related agreements (including a quality agreement) according to which CureVac shall Manufacture or have Manufactured for Genmab by an approved subcontractor under Section 5.11 or by a GMO approved by Genmab, and will supply or have supplied to Genmab, Genmab's demand for the Single Antibody Product which is the subject of the First Program Research Plan (whether related to the First Collaboration Target or any Replacement Target) to perform Clinical Phase I Studies ("**Early Clinical Supply Agreement**"). [.. .]"*

For avoidance of doubt, the remainder of Section 6.2 of the Agreement shall remain in effect unchanged.

- 3. This First Amendment shall be subject to the same governing law as set forth in Section 17.4 of the Agreement.
- 4. Save as set forth in this First Amendment, all other terms and conditions of the Agreement shall remain in full force and effect.

5. This First Amendment may be signed in any number of counterparts with the same effect as if the signatures to each counterpart were upon a single instrument, and all such counterparts together shall be deemed an original of this First Amendment.

IN WITNESS WHEREOF, the Parties hereto have caused this First Amendment to be executed and delivered as of the First Amendment Effective Date.

**COLLABORATION AND LICENSE AGREEMENT**

This **Collaboration and License Agreement** ("**Agreement**") is entered into on 15 July, 2020 ("**Effective Date**")

BY AND BETWEEN

**CUREVAC AG**, a German cooperation with offices at Friedrich-Miescher-Str. 15, 72076 Tübingen, Germany ("**CureVac**");

AND

**GLAXOSMITHKLINE BIOLOGICALS SA**, a Belgium corporation with offices at Rue de l'Institut 89, 1330 Rixensart, Belgium ("**GSK**").

**INTRODUCTION**

- A. WHEREAS, CureVac is a biotechnology company that is a pioneer and technology leader in mRNA-based prophylactic and therapeutic approaches and discovers, designs and develops first-in-class mRNA therapies for the prevention and treatment of diseases with unmet medical need.
- B. WHEREAS, GSK is a world leading global healthcare company developing, manufacturing and commercializing innovative pharmaceuticals, vaccines and consumer healthcare products worldwide.
- C. WHEREAS, GSK will make an equity investment into CureVac pursuant to the terms of the investment and shareholders agreement on or around the date of this Agreement (the "**Equity Investment**").
- D. WHEREAS, the Parties wish to collaborate in the research, development and commercialization of prophylactic and therapeutic non-replicating mRNA based vaccines and antibodies targeting infectious disease pathogens.

NOW THEREFORE, in consideration of the foregoing premises and the following mutual covenants and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **DEFINITIONS.**

For purposes of this Agreement, the following capitalized terms shall have the following meanings, whether used in the singular or plural:

- 1.1 "Affiliate" shall mean any corporation or other entity that controls, is controlled by, or is under common control with a Party. A corporation or other entity will be regarded as under the control of another corporation or entity if the latter corporation or entity owns or directly or indirectly controls fifty percent (50%) or more of the voting stock or other ownership interest of the former corporation or other entity, or if the latter corporation or entity possesses, directly or indirectly, the power to direct or cause the direction of the management and policies of the former corporation or other entity or the power to elect or appoint fifty percent (50%) or more of the members of the governing body of the former corporation or other entity, provided, however, that regarding CureVac, Affiliate shall not include Mr. Dietmar Hopp, dievini Hopp BioTech holding GmbH & Co.KG and/or any other companies controlled by Mr. Dietmar Hopp and/or dievini Hopp BioTech holding GmbH & Co.KG that are not subsidiaries of CureVac.
- 1.2 "Agreement" shall have the meaning set forth in the Preamble.
- 1.3 "Alliance Manager" shall have the meaning set forth in Section 7.1.1.
- 1.4 "Ancillary Agreement" shall mean any of the following agreement between the Parties (or their respective Affiliates): any Clinical Supply Agreement; any Commercial Supply Agreement; any Distribution Agreement; any Quality Agreement and any pharmacovigilance agreement.
- 1.5 "Antibody" shall mean a molecule, defined by its amino acid sequence, including an engineered molecule that comprises [\*\*\*\*\*].
- 1.6 "Antibody Combination" shall mean a combination of [\*\*\*\*\*] Antibodies and so binding to a maximum of [\*\*\*\*\*] distinct Antigens.
- 1.7 "Antigen" shall mean any antigen, defined by its amino acid sequence, associated with a Pathogen, together with all Antigen Variants thereof.
- 1.8 "Antigen Variant" shall mean any variant of an Antigen, including the wild type, naturally occurring variants, engineered variants wherein modifications to the native amino acid sequence have been introduced (for example, mutated versions, derivatives or fragments), provided, however, that any such variant possesses substantially similar biological activity to the naturally occurring antigen.
- 1.9 "Antigen/Antibody List Rep" shall have the meaning set forth in Section 3.4.
- 1.10 "Applicable Laws" shall mean all applicable provisions of all national, supranational, regional, state and local, laws, treaties, statutes, rules, regulations, directives, administrative codes, ordinances, decrees, orders, decisions, guidance documents, injunctions, awards, judgments, and permits of or from any court, arbitrator, stock exchange, regulatory authority or governmental authority having jurisdiction over or related to the subject item.

- 1.11 "**Assigned Invention**" shall have the meaning set forth in Section 9.4.
- 1.12 "**Background Technology**" shall mean the CureVac Background Technology and/or GSK Background Technology, as applicable.
- 1.13 "**Brand IP**" shall mean any and all rights and privileges in trade names, domain names, brand names, product names, logos and trade dress (and the goodwill of any business symbolized thereby), including trademarks, service marks, copyrights and design rights for any of the above, and any similar intellectual property right recognized from time to time in any jurisdiction, as well as any and all registrations, applications, recordings and other legal protections to the foregoing.
- 1.14 "**Breaching Party**" shall have the meaning set forth in Section 14.4.
- 1.15 "**Business Day**" shall mean any day other than Saturday, Sunday, or any day that banks are authorized or required to be closed in Tübingen, Germany or Rixensart, Belgium.
- 1.16 "**Calendar Quarter**" shall mean each successive period of three (3) months ending on March 31, June 30, September 30 and December 31 of each Calendar Year; provided, that the first Calendar Quarter under this Agreement will be the period beginning on the Closing Date and ending on the end of the Calendar Quarter in which the Closing Date is encompassed and the last Calendar Quarter of the Term will be the period beginning on January 1, April 1, July 1 or October 1, as applicable, and ending on the effective date of expiry or termination of this Agreement, and "**Calendar Quarterly**" shall be construed accordingly.
- 1.17 "**Calendar Year**" shall mean each successive period of twelve (12) months commencing on January 1 and ending on December 31; *provided, however*, that the first Calendar Year under this Agreement will be the period beginning on the Closing Date and ending on the end of the Calendar Year in which the Closing Date is encompassed and the last Calendar Year of the Term will be the period beginning on January 1 and ending on the effective date of expiry or termination of this Agreement.
- 1.18 "**Clearance Template**" shall have the meaning set forth in Section 3.4.

- 1.19 "**Change of Control**" shall mean a transaction in which a Party (or any direct or indirect shareholder(s), unitholder(s) or partner(s) together holding (directly or indirectly) over fifty percent (50%) of the voting rights attached to the shares, units or partnership interests in a Party): (i) sells, conveys or otherwise disposes of all or substantially all of the Party's (or their indirect interest(s) in the Party's) property, assets or business; or (ii) merges or consolidates with any other entity; or (iii) effects any other transaction or series of transactions; in each case of clause (ii) or (iii), such that the ultimate direct or indirect shareholder(s), unitholder(s) or partner(s) of such Party immediately prior thereto, in aggregate, no longer own, directly or indirectly, beneficially or legally, either (a) more than fifty percent (50%) or (b) in the case of an initial public offering on a Recognized Stock Exchange, more than thirty percent (30%), of the voting rights attached to the outstanding voting securities or capital stock of the surviving entity following the closing of such merger, consolidation, other transaction or series of transactions. For the avoidance of doubt, "Change of Control" shall not mean a transaction which, in the case of paragraph (ii) or (iii), results in a person owning, directly or indirectly, beneficially or legally, more than fifty percent (50%) of the voting rights attached to the outstanding voting securities or capital stock of the surviving entity and where there is an agreement or arrangement between that person (or any of its direct or indirect shareholders, unitholders or partners) and the relevant Party (or any of its direct or indirect shareholders, unitholders or partners) to reverse the effects of this transaction or to implement a further transaction so that the ultimate shareholders, unitholders or partners of the relevant Party immediately prior thereto will again own, directly or indirectly, beneficially or legally, more than fifty percent (50%) of the voting rights attached to the outstanding voting shares, units or partnership interests of the relevant Party or surviving entity.
- 1.20 "**Clinical Phase I Study**" shall mean a study in humans which provides for the first administration to humans of a product, conducted in healthy volunteers or patients to obtain information on product safety, tolerability, pharmacological activity or pharmacokinetics, as more fully defined in 21 C.F.R. § 312.21(a) or the non-United States equivalent thereof. For the avoidance of doubt, a Clinical Phase I Study may generate sufficient data (if successful) to commence pivotal studies/Clinical Phase III Studies, but it shall not constitute a Clinical Phase II Study.
- 1.21 "**Clinical Phase II Study**" shall mean a clinical study (other than a Clinical Phase I Study) in humans of the safety, dose ranging and efficacy of a product, which is prospectively designed to generate sufficient data (if successful) to commence pivotal studies/Clinical Phase III Studies, as further defined in 21 CFR §312.21(b) or the non-United States equivalent thereof.
- 1.22 "**Clinical Phase III Study**" shall mean a controlled, and usually multicenter, clinical study in humans of the efficacy and safety of a product, which is prospectively designed to demonstrate statistically whether such product is effective and safe for use in humans in the indication being investigated in a manner sufficient to submit an application to obtain Regulatory Approval to market such product, as further defined in 21 CFR §312.21(c) or the non-United States equivalent thereof.
- 1.23 "**Closing Date**" shall mean the date on which the condition under Section 1.191 is either fulfilled or waived by both Parties.
- 1.24 "**Clinical Studies**" shall mean all Clinical Phase I Studies, Clinical Phase II Studies and Clinical Phase III Studies, including pivotal studies.
- 1.25 "**CMC Development**" shall mean all research and development activities conducted in respect of the Manufacture of Products, including chemistry, manufacturing and control (CMC), creation of master and working cell banks, test method development and stability testing, process development, manufacturing scale-up, qualification and validation, quality assurance and quality control processes and techniques.

1.26 "CMO" shall mean a contract manufacturing organization.

1.27 "Collaboration Pathogen" shall mean a Pathogen other than an Excluded Pathogen in relation to which the Parties have agreed to seek to Develop a Product under this Agreement (including any Replacement Product or Optioned Product) for as long as such Product is being Developed and/or Commercialized under this Agreement. As at the Effective Date of this Agreement, Collaboration Pathogen shall mean the Pathogens set out in Exhibit 1.27. For clarity, if GSK replaces a Product pursuant to Section 3.6 or terminates a Program pursuant to Section 14.2, the Pathogen targeted by such Replaced Product or targeted under such terminated Program shall no longer be a Collaboration Pathogen, but shall be an Excluded Pathogen.

1.28 "Combination Product" shall mean:

- (i) a single pharmaceutical formulation containing Drug Substances associated with a Product and one or more other therapeutically or prophylactically active pharmaceutical ingredients [\*\*\*\*\*];
  - (ii) any combination therapy comprised of a Finished Product and one or more other therapeutically or prophylactically active products, that is (x) priced and sold in a single package containing such multiple products; or (y) packaged separately but sold together for a single price; or
  - (iii) a product comprised of a Finished Product and a companion or complementary diagnostic, priced and sold in a single package containing such multiple products or packaged separately but sold together for a single price,
- in each case, including all dosage forms, formulations, presentations, line extensions, and package configurations.

1.29 "Commercial Supply Agreement" shall have the meaning given in Section 5.2.2.

1.30 "Commercialization" shall mean any and all activities directed to the preparation for sale of, offering for sale of, or sale of a Product, including activities related to marketing, promoting, distributing, importing and exporting of Products, interacting with Regulatory Authorities regarding any of the foregoing and medical affairs functions. For the avoidance of doubt, "Commercialization" shall not include the Manufacture of Products. When used as a verb, to "Commercialize" and "Commercializing" shall mean to engage in Commercialization, and "Commercialized" has a correlative meaning.

1.31 "**Confidential Information**" shall mean all Know-How, Development Data or other information of a Party whether or not marked confidential or proprietary, including:

- (i) all communications between the Parties or information of whatever kind whether recorded or not and, if recorded, in whatever medium, relating to or arising out of this Agreement, whether disclosed prior to or after entering into this Agreement; and
- (ii) all copies and excerpts of the communications, information, notes, reports and documents in whatever form referred to in paragraph (i) of this definition.

For purposes of the confidentiality obligations set forth herein, (a) GSK Know-How, GSK Materials and GSK Inventions shall be deemed Confidential Information of GSK; and CureVac Know-How, CureVac Materials and CureVac Inventions shall be deemed Confidential Information of CureVac; (b) Confidential Information jointly owned by the Parties shall be deemed Confidential Information of both Parties; and (c) the terms and conditions of this Agreement shall be deemed Confidential Information of both Parties (and both Parties shall be deemed the Receiving Party with respect thereto). "Confidential Information" also includes all information exchanged between the Parties pursuant to the Confidentiality Agreement.

1.32 "**Confidentiality Agreement**" shall mean that certain Confidential Disclosure Agreement entered into between the Parties as at January 9, 2020.

1.33 "**Control**" shall mean, with respect to any material, information or intellectual property right, that a Party (i) owns such material, information or intellectual property right; or (ii) has a license to or right to use or grant access to such material, information or intellectual property right, in each case of (i) or (ii), without violating the terms of any agreement or other arrangement with a Third Party.

1.34 "**Cover**" shall mean, (i) with respect to a claim of a Patent Right, that such claim would be infringed, absent a license, by the Development, Manufacture or Commercialization of a Product, or (ii) with regard to Know-How, that the use or disclosure of such Know-How without a license would be actionable.

1.35 "**CRO**" shall mean a contract research organization or a contract development and manufacturing organization.

1.36 "**CureVac Alliance Manager**" shall have the meaning set forth in Section 7.1.1.

1.37 "**CureVac Background Technology**" shall have the meaning set forth in Section 9.1.

1.38 "**CureVac Elements**" has the meaning given in Section 2.7.1.

- 1.39 "CureVac Indemnified Parties" shall have the meaning set forth in Section 13.1.
- 1.40 "CureVac Invention" shall have the meaning set forth in Section 9.3.1.
- 1.41 "CureVac Know-How" shall mean (i) all Know-How within the CureVac Background Technology Controlled by CureVac or its Affiliates as at the Effective Date or during the Term that is necessary or useful for the Parties to Develop, Manufacture and/or Commercialize Products under this Agreement, provided that (x) with respect to Know-How within the CureVac Background Technology owned by a Third Party that is not necessary to ensure freedom to operate for the Development, Manufacture and/or Commercialization of Products in the Field in the Territory and that comes under CureVac's Control, this shall only include Know-How which is deemed CureVac Know-How pursuant to Section 2.7.1; and (y) this shall not include the Know-How of any Third Party (or such Third Party's Affiliates) that becomes an Affiliate of CureVac after the Effective Date solely as a result of a Change of Control in CureVac; and (ii) all Know-How Controlled by CureVac or its Affiliates arising or generated during the Research Period in connection with the performance of activities under this Agreement; *provided, however*, that CureVac Know-How does not include Know-How related to (A) LNP Technology Controlled by a Third Party; and (B) [\*\*\*\*\*]. CureVac Know-How shall include (i) Know-How comprised in the CureVac Background Technology; and (ii) Know-How related to CureVac Inventions, CureVac's share in Joint Product Inventions or Joint Other Inventions, (iii) other Know-How generated by CureVac under a Program, (iv) Know-How related to LNP technology owned by CureVac, and (v) Know-How related to CVCMS. Without limiting Section 9.1, the CureVac Know-How existing at the Effective Date is further described in Exhibit 1.41.
- 1.42 "CureVac Manufacturing Technology" shall mean CureVac Patent Rights and CureVac Know-How that are required for the Manufacture of Products.
- 1.44 "CureVac Materials" shall mean [\*\*\*\*\*] that are supplied or otherwise made available by or on behalf of CureVac and/or its Affiliate(s) to GSK hereunder for the purposes of this Agreement (excluding, for clarity, any Confidential Information, or any Product).
- 1.45 "CureVac mRNA" shall mean the non-replicating mRNA Covered by the CureVac Technology on the Effective Date or during the Term.
- 1.46 "CureVac mRNA-Based" shall mean, with respect to a vaccine or Antibody, that such vaccine or Antibody is encoded by one or more CureVac mRNAs.
- 1.47 "CureVac Patent Right(s)" shall mean (i) all Patent Rights within the CureVac Background Technology Controlled by CureVac or its Affiliates as at the Effective Date or during the Term that are necessary or useful for the Development, Manufacture and/or Commercialization of Products under the Agreement, provided that (x) with respect to Patent Rights within the CureVac Background Technology owned by a Third Party that are not necessary to ensure freedom to operate for the Development, Manufacture and/or Commercialization of Products in the Field in the Territory and that come under CureVac's Control after the Effective Date, this shall only include Patent Rights which are deemed CureVac Patent Rights pursuant to Section 2.7.1; and (y) this shall not include the Patent Rights of any Third Party (or such Third Party's Affiliates) that becomes an Affiliate of CureVac solely as a result of a Change of Control in CureVac, and (ii) all CureVac Program Patent Right and CureVac's interest in Joint Patent Rights; *provided, however*, that CureVac Patent Rights do not include Patent Rights within (A) LNP Technology Controlled by a Third Party; and (B) [\*\*\*\*\*]. CureVac Patent Rights shall include (i) Patent Rights comprised in the CureVac Background Technology; and (ii) CureVac's share in Joint Patent Rights, and (iii) CureVac Program Patent Rights, and (iv) Patent Rights related to LNP technology owned by CureVac and CVCMS. The CureVac Patent Rights within the CureVac Background Technology Controlled by CureVac or its Affiliates as at the Effective Date are listed in Exhibit 1.47.

- 1.48 "CureVac Program Patent Right" shall have the meaning set forth in Section 9.6.1.
- 1.49 "CureVac Project Leader" shall have the meaning set forth in Section 7.1.2.
- 1.50 "CureVac Technology" shall mean CureVac Patent Rights and CureVac Know-How.
- 1.51 "CureVac Territory" shall mean Austria, Germany and Switzerland.
- 1.52 "CVCM" shall mean CureVac's next generation mRNA delivery vehicle, also referred to as CureVac Carrier Molecule™, which is disclosed in CureVac's patent families [\*\*\*\*\*], that is appropriate for the formulation of Drug Substance.
- 1.53 "Development" shall mean all research, non-clinical, and clinical testing and drug development activities conducted in respect of the Products, including those necessary or reasonably useful or otherwise requested or required by a Regulatory Authority as a condition or in support of obtaining or maintaining Regulatory Approvals and to successfully Develop, Manufacture and Commercialize the Products for use in the Field. "Development" shall include CMC Development, delivery system development, mRNA sequence optimization, protein design, non-clinical testing, mechanism of action studies, toxicology, pharmacokinetics, clinical studies, regulatory affairs activities, statistical analysis and report writing, submission of documents, market research, pharmacoeconomic studies, and epidemiological/real world data studies. Development shall mean both (a) non-clinical and clinical Development; and (b) CMC Development. "Develop" and "Developed" have a correlative meaning.
- 1.54 "Development Costs" shall mean: (i) demonstrable costs and expenses invoiced by Third Parties for the activities specified in the applicable R&D Plan; and (ii) the costs and expenses of scientific, medical, technical personnel directly engaged in such efforts, which costs shall be determined based on the FTE Rate based on time actually spent performing the applicable activities, in each case as further detailed in the Development budget set out in the applicable R&D Plan.
- 1.55 "Development Data" shall mean: (i) CMC Development data; (ii) any non-clinical or clinical findings, results and other research data relating to the Products, in any format; and (iii) the formal reports of preclinical toxicology studies and Clinical Studies, such data in each case of (i), (ii) and (iii) required for the Development and Commercialization of the Products, including but not limited to, INDs and other regulatory filings and registration dossiers.
- 1.56 "Development & Regulatory Milestone Event" shall have the meaning set forth in Section 8.3.
- 1.57 "Development & Regulatory Milestone Payment" shall have the meaning set forth in Section 8.3.
- 1.58 "Development Transfer Materials" shall have the meaning set forth in Section 4.7.

- 1.59 "**Diligent Efforts**" shall mean, with respect to a Party, those efforts, expertise and resources commensurate with efforts, expertise and resources commonly used in the biopharmaceutical industry by a company of comparable size in connection with the development, manufacture and/or commercialization of a comparable pharmaceutical product which is of similar market potential at a similar stage of development or commercialization in light of issues of safety and efficacy, product profile, the competitiveness of the marketplace, the proprietary position of the compound or product, the regulatory structure involved, the profitability of the applicable products, product reimbursement, and other relevant factors such as technical, legal, scientific, or medical factors. Diligent Efforts shall be determined on a market-by-market and indication-by-indication basis for each Product, and it may change over time.
- 1.60 "**Disclosing Party**" shall have the meaning set forth in Section 11.1
- 1.61 "**Disclosure Letter**" shall have the meaning set forth in Section 13.4.
- 1.62 "**Distribution Agreement**" shall have the meaning set forth in Section 6.2.
- 1.63 "**Drug Product**" shall mean, for a given Product, the drug product form thereof, i.e. comprising of one or more Drug Substance(s) of that Product and formulated with a Licensed LNP, an LNP Controlled by CureVac or a CVCVM.
- 1.64 "**Drug Substance**" shall mean the active ingredient(s) of a Product, being one or more mRNA molecules which contains the genetic information for the relevant Antigen(s) or Antibody(ies).
- 1.65 "**Effective Date**" shall have the meaning set forth in the Preamble.
- 1.66 "**EMA**" shall mean the European Medicines Agency.
- 1.67 "**Excluded Pathogen**" shall mean (i) any of the Pathogens listed in Exhibit 1.67, (ii) in case GSK exercises its Replacement Right pursuant to Section 3.6, any Pathogen targeted by a Replaced Product (unless that Pathogen is targeted by another Product, including any Replacement Product), and (iii) in case GSK terminates a Program for a Product pursuant to Section 14.2, the Pathogen targeted under such terminated Program (unless that Pathogen is targeted under another Program).
- 1.68 "**Exclusive Option**" shall have the meaning set forth in Section 3.7.1.
- 1.69 "**Executive Officers**" the Chief Executive Officer of CureVac (or a senior executive officer of CureVac designated by CureVac's Chief Executive Officer) and the President of GSK Vaccines (or a senior executive officer of GSK designated by the President of GSK Vaccines).
- 1.70 "**FDA**" shall mean the U.S. Food and Drug Administration.
- 1.71 "**Field**" shall mean any and all prophylactic and/or therapeutic uses for the prevention, delay of onset or treatment of infectious disease pathogens, conditions or disorders.
- 1.72 "**[\*\*\*\*\*] Product**" shall have the meaning set forth in Exhibit 1.27.

- 1.73 "Financial Partner" shall have the meaning set forth in Section 11.4.1 below.
- 1.74 "Finished Product" shall mean, for a given Product, the final presentation of such Product, following filling, labelling and packaging of Drug Product, as registered in the applicable Marketing Authorization.
- 1.75 "First Commercial Sale" shall mean, on a Product-by-Product and country-by-country basis, the first sale of a Product by or on behalf of GSK or its Affiliates or Sublicensees, such as but not limited to, a Third Party wholesaler, pharmacy, outpatient clinic, inpatient clinic, hospital, dispensing physician or government agency in a given country after necessary Regulatory Approval has been granted with respect to such Product in such country, *provided, however*, that in the event of a sale of a Product prior to Regulatory Approval which is substantially comparable to a commercial sale effected only after Regulatory Approval is obtained, then the first sale in any such arrangement shall also constitute a First Commercial Sale. For the avoidance of doubt, "treatment IND sales", "named patient sales" and "compassionate use sales" shall not be construed as a First Commercial Sale if the aggregate, annual Net Sales for all such programs are less than [\*\*\*\*\*]. For avoidance of doubt, any sale of a Product by GSK to an Affiliate or Sublicensee or subcontractor is not a First Commercial Sale.
- 1.76 "First Product" shall have the meaning set forth in Exhibit 1.27.
- 1.77 "First Product R&D Plan" shall have the meaning set forth in Section 4.1.
- 1.78 "First Regulatory Approval" shall mean, in relation to each Product, the obtaining of a final marketing authorization for a Product in any jurisdiction in the Territory.
- 1.79 "Force Majeure" shall have the meaning set forth in Section 16.2.
- 1.80 "[\*\*\*\*\*] Product" shall have the meaning set forth in Exhibit 1.27.
- 1.81 "FTE" shall mean, with respect to a person, the equivalent of the work of one (1) employee full time for one (1) year (consisting of at least [\*\*\*\*\*] working hours per year (with no further reductions for vacations and holidays)). Overtime, and work on weekends, holidays and the like will not be counted with any multiplier (e.g., time-and-a-half or double time) toward the number of hours that are used to calculate the FTE contribution. The portion of a FTE billable by CureVac for one (1) individual during a given accounting period shall be determined by dividing the number of hours worked by said individual on the work to be conducted under the Agreement during such accounting period by the number of FTE hours applicable for such accounting period based on [\*\*\*\*\*] working hours per year. FTE shall include the employee required to execute the R&D Plans provided however that employees falling under the COGS definition of the Clinical Supply Agreement or the Commercial Supply Agreement shall not be included. FTE shall not include personnel undertaking general corporate activities including, by way of example only, investor relations, business development, legal affairs, human resources and finance, and any other activities not supporting activities conducted under this Agreement.

- 1.82 "FTE Rate" shall mean, for the period commencing on the Effective Date until such time as the Parties mutually agree otherwise, an annual rate of EUR [\*\*\*\*\*]. The FTE Rate shall include all fully loaded costs, including costs of salaries (including overtime), benefits, other employee costs, overhead and supporting general and administration allocations. CureVac may increase the FTE Rate for inflation on an annual basis based upon the percentage increase in the Consumer Price Index for Germany.
- 1.83 "Force Majeure" shall have the meaning set forth in Section 16.2.
- 1.84 "GMP Manufacturing Facilities" shall mean a production facility for the manufacture of drug products, including the manufacturing space, the storage warehouse for raw and finished product, and support lab areas, which conforms to GMP.
- 1.85 "GMP-III Manufacturing Facility" shall mean CureVac's GMP manufacturing facility at [\*\*\*\*\*].
- 1.86 "GMP-IV Manufacturing Facility" shall mean CureVac's new GMP manufacturing facility currently under construction at [\*\*\*\*\*].
- 1.87 "GMP-IV Reservation Fee" shall have the meaning set forth in Section 8.2.
- 1.88 "Good Clinical Practices" or "GCP" shall mean, in connection with a Clinical Study, current practices set forth in or required by (1) the World Medical Association's Declaration of Helsinki entitled 'Ethical Principles for Medical Research Involving Human Subjects' (2) the principles of International Conference on Harmonization Harmonized Tripartite Guideline for Good Clinical Practice (CPMP/ICH/135/95) E6 and E11; (3) the Directive 2001/20/EC of the European Union and in guidance published by the European Commission in relation to such Directive and any local laws, rules and regulations that implement such Directive and guidance; (4) provisions of Title 21 of the Code of Federal Regulations (including Parts 11, 50, 54, 56, 312, 314, 320, 601 and 610) and all rules, regulations, order and guidance's published thereunder; and (5) any other country in which the Clinical Study is conducted;
- 1.89 "Good Distribution Practices" or "GDP" shall mean the current (at a given time) standards, practices and procedures regarding the distribution of pharmaceutical products promulgated or endorsed by a Regulatory Authority and all Applicable Laws with respect thereto, as defined further or otherwise in the Distribution Agreement or a quality agreement ancillary thereto.
- 1.90 "Good Laboratory Practices" or "GLP" shall mean, at a given time, the current good laboratory practice standards promulgated or endorsed by the US Food and Drug Administration as defined in Part 58 of the Code of Federal Regulations Title 21, or comparable regulatory standards promulgated by the EMA or other applicable Regulatory Authority, as may be updated from time to time, including applicable quality guidelines promulgated under the ICH.
- 1.91 "Good Data Management Practices" shall have the meaning set forth in Section 12.2.

1.92 **"Good Manufacturing Practices"** or **"GMP"** shall mean the current (at a given time) standards, practices and procedures regarding the Manufacturing of human vaccines promulgated or endorsed by a Regulatory Authority and all Applicable Laws with respect thereto, including:

- (i) the standards, rules, principles and guidelines set out in Chapter II of EC Commission Directive 2003/94/EC together with the guidance for the interpretation of the principles and guidelines of good manufacturing practices for medicinal products for human use laid down in Commission Directives 91/356/EEC, as amended by Directive 2003/94/EC and 91/412/EEC, contained in Volume 4 of "The Rules Governing Medicinal Products in the European Union".
- (ii) Parts 210 and 211 of Title 21 of the Code of Federal Regulations and all related guidance published by the FDA;
- (iii) The International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use ("ICH") Quality Guidelines relating to good manufacturing practice;
- (iv) the "Good Manufacturing Practices for Pharmaceutical Products" promulgated by the World Health Organization ("WHO"),

provided that term may be defined further or otherwise in the Quality Agreements regarding the supply of Drug Products for clinical or commercial purposes entered pursuant to this Agreement.

1.93 **"Government Official"** (where 'government' means all levels and subdivisions of governments, i.e. local, regional, national, administrative, legislative, executive, or judicial, and royal or ruling families) shall mean: (a) any officer or employee of a government or any department, agency or instrumentality of a government (which includes public enterprises, and entities owned or controlled by the state); (b) any officer or employee of a public international organization such as the World Bank or United Nations; (c) any officer or employee of a political party, or any candidate for public office; (d) any person defined as a government or public official under Applicable Law (including anti-bribery and corruption laws) and not already covered by any of the above; and/or; (e) any person acting in an official capacity for or on behalf of any of the above. "Government Official" shall include any person with close family members who are Government Officials (as defined above) with the capacity, actual or perceived, to influence or take official decisions affecting either Party's business.

1.94 **"GSK Alliance Manager"** shall have the meaning set forth in Section 7.1.1.

1.95 **"GSK Background Technology"** shall have the meaning as set forth in Section 9.1.

- 1.96 "GSK Indemnified Parties" shall have the meaning set forth in Section 13.2.
- 1.97 "GSK Invention" shall have the meaning set forth in Section 9.3.2.
- 1.98 "GSK Know-How" shall mean all Know-How Controlled by GSK or its Affiliates as at the Effective Date or thereafter during the Term that (a) is necessary for CureVac to perform the obligations and other activities pursuant to this Agreement, or (b) is used by or on behalf of GSK its Affiliates or Sublicensees to Develop, Manufacture and Commercialize Products under this Agreement. GSK Know-How shall include (i) Know-How comprised in the GSK Background Technology; and (ii) Know-How related to GSK Inventions, Joint Product Inventions or Joint Other Inventions, and (iii) other Know-How generated by GSK under a Program.
- 1.99 "GSK Materials" shall mean any [\*\*\*\*\*] that are supplied or otherwise made available by or on behalf of GSK and/or its Affiliate(s) to CureVac for the purposes of this Agreement (excluding, for clarity, any Confidential Information, or any Product).
- 1.100 "GSK Patent Right(s)" shall mean all Patent Rights Controlled by GSK or its Affiliates as at the Effective Date or thereafter during the Term that (a) are necessary for CureVac to perform the obligations and other activities pursuant to this Agreement, or (b) are used by or on behalf of GSK its Affiliates or Sublicensees to Develop, Manufacture and/or Commercialize Products under this Agreement. GSK Patent Rights shall include Patent Rights comprised in the GSK Background Technology, GSK Program Patent Rights and GSK's interest in Joint Patent Rights.
- 1.101 "GSK Program Patent Right" shall have the meaning set forth in Section 9.6.2.
- 1.102 "GSK Project Leader" shall have the meaning set forth in Section 7.1.2.
- 1.103 "GSK Technology" shall mean any and all GSK Patent Rights and GSK Know-How.
- 1.104 "GSK Territory" shall mean all countries of the world other than the countries included in the CureVac Territory.
- 1.105 "GxP" shall mean the good practice regulations in the pharmaceutical industry, including Good Manufacturing Practices, Good Laboratory Practices, Good Clinical Practices and Good Distribution Practices (GMP, GLP, GCP and GDP).
- 1.106 "Human Biological Samples" shall mean human biological material (including any derivative or progeny thereof), including any portion of an organ, any tissue, skin, bone, muscle, connective tissue, blood, cerebrospinal fluid, cells, gametes, or sub-cellular structures such as DNA, or any derivative of such biological material such as stem cells or cell lines; and any human biological product, including, but not limited to, hair, nail clippings, teeth, urine, faeces, breast milk, and sweat.
- 1.107 "IND" shall mean an investigational new drug application filed with, and accepted by, the FDA prior to beginning clinical trials in humans in the USA, or any comparable application to and acceptance by the Regulatory Authority of a country or group of countries other than the USA thereto, including EMA, prior to beginning clinical trials in humans in that country or in that group of countries.
- 1.108 "In-Licensed IP" shall have the meaning set forth in Section 2.7.1.

- 1.109 **"In-Licensing Agreement"** shall mean each of the LNP Agreements, the agreements listed in **Exhibit 1.109**, and any other agreement with a Third Party pursuant to which CureVac Controls CureVac Technology or LNP Technology.
- 1.110 **"Initial Products"** shall mean the [\*\*\*\*\*].
- 1.111 **"Initial Other Products"** shall mean each of the following Products: [\*\*\*\*\*].
- 1.112 **"Initiation"** shall mean, with respect to a Clinical Study, the first administration of the first subject in such Clinical Study.
- 1.113 **"Invention"** shall mean an invention or discovery, whether or not patentable, discovered, made, conceived and/or first reduced to practice during the Term by or on behalf of CureVac or GSK or Affiliates of CureVac or GSK, alone or jointly with each other and/or any Third Party, which arise from the performance of activities under this Agreement, including performance of activities under the R&D Plans.
- 1.114 **"IP Sub-Committee"** shall mean the sub-committee to be established pursuant to Section 7.4.
- 1.115 **"Joint Product Invention"** shall have the meaning set forth in Section 9.3.3.
- 1.116 **"Joint Other Invention"** shall have the meaning set forth in Section 9.3.4.
- 1.117 **"Joint Patent Rights"** shall have the meaning set forth in Section 10.2.
- 1.118 **"Joint Steering Committee", and "JSC"** shall have the meaning set forth in Section 7.2.
- 1.119 **"Know-How"** shall mean all technical, scientific and other information, inventions, discoveries, trade secrets, knowledge, technology, means, methods, processes, practices, formulae, instructions, skills, techniques, procedures, expressed ideas, technical assistance, designs, drawings, assembly procedures, computer programs, apparatuses, specifications, Development Data, results, non-clinical, clinical, safety, process and Manufacturing and quality control data and information (including trial designs and protocols), registration dossiers, in each case, solely to the extent confidential and proprietary and in written, electronic or any other form now known or hereafter Developed.
- 1.120 **"Licensed LNP"** shall mean an LNP that is Controlled by CureVac as at the Effective Date or during the Term pursuant to (i) one or more non-exclusive license agreement(s) between CureVac and [\*\*\*\*\*], as amended from time to time (including by the Amendment Two to the Development and Option Agreement dated July 10, 2020); or (ii) in case GSK exercises its option under the Option LNP Technology pursuant to Section 2.1.4 and upon the execution of the Option LNP Agreement, a non-exclusive license agreement between CureVac and [\*\*\*\*\*], as amended from time to time (all such agreement(s), as applicable, "LNP Agreement(s)", and such counterparty, "LNP Provider"). Subject to Section 2.7.1, any amendment to either LNP Agreement made after the Effective Date shall not adversely affect the rights or increase the obligations of GSK or CureVac under this Agreement.

- 1.121 "LNP" shall mean a lipid nanoparticle system comprised of individual lipid components at specific ratios, which are manufactured in such a manner to encapsulate and deliver mRNA into a target cell.
- 1.122 "LNP Agreement" shall have the meaning set forth in Section 1.120.
- 1.123 "LNP License" shall have the meaning set forth in Section 2.1.2.
- 1.124 "LNP Provider" shall have the meaning set forth in Section 1.120.
- 1.125 "LNP Technology" shall mean the Patent Rights and Know-How Covering the Licensed LNPs that CureVac Controls pursuant to the LNP Agreements.
- 1.126 "Major Markets" shall mean the [\*\*\*\*\*].
- 1.127 "Manufacture" shall mean all manufacturing operations (including for Drug Substance, Drug Product, fill and finish, packaging and labelling) for Products, including all activities related to the preparation and use of master and working cell banks, making, production, processing, purifying, formulating, filling, and finishing, of the Finished Product, or any intermediate thereof, pre-clinical, clinical and commercial production, product, stability testing, quality assurance, and quality control. "Manufacturing" has a correlative meaning.
- 1.128 "Manufacturing Technology Transfer Materials" shall have the meaning set forth in Section 5.2.3.
- 1.129 "Materials" shall mean CureVac Materials and GSK Materials.
- 1.130 "mRNA" shall mean a replicating or non-replicating polynucleotide that is capable of directing the cellular machinery of a cell to produce polypeptide and contains naturally occurring nucleosides (e.g. Cytosine, Guanine, uracil, adenine) or chemical analogues thereof. The term encompasses analogues such as those containing modified backbones.
- 1.131 "mRNA-Based" shall mean, with respect to a vaccine or Antibody, that the vaccine Antigen or Antibody is encoded by one or more mRNAs.
- 1.132 "Net Sales" shall mean the gross invoice price of Product sold by GSK or its Affiliates or Sublicensees directly to a Third Party, less the following deductions if and to the extent such deductions to unaffiliated entities are actually allowed and granted:
- (i) trade, quantity, and/or cash discounts, charge-back payments, allowances or rebates, including promotional or similar discounts or rebates, and discounts or rebates to governmental or managed care organizations;

- (ii) discounts provided in connection with coupon, voucher or similar patient programs;
- (iii) credits or allowances given or made with respect to Product by reason of rejection, defects, recalls, returns, rebates, or retroactive price reductions;
- (iv) any tax, tariff, duty or government charge (including any sales, value added, excise or similar tax or government charge, but excluding any income tax) levied on the sale, transportation or delivery of Product and borne by GSK, its Affiliates or Sublicensees without reimbursement from any Third Party;
- (v) any charges for freight, postage, shipping or transportation, or for insurance, in each case to the extent borne by GSK, its Affiliates or Sublicensees without reimbursement from any Third Party; and
- (vi) any administrative fees paid to group purchasing organizations or managed care entities for the sale of Product (provided, however, that such deduction may not exceed two percent (2%) of the gross sales in the corresponding accounting period).

All such discounts, allowances, credits, rebates and other deductions shall be fairly and equitably allocated to the sale of the relevant Product by GSK, its Affiliates or Sublicensees, such that the Product does not bear a disproportionate portion of such deductions as compared to other products sold separately from but with a certain link or other connection to the Product. For the avoidance of doubt, the Net Sales shall be calculated only once for the first bona fide arm's length sale of the Product by either GSK, its Affiliate or its Sublicensee, to a Third Party which is neither an Affiliate nor a Sublicensee of GSK. Net Sales shall be determined in accordance with International Financial Reporting Standards (IFRS) applied in a consistent manner.

In the event a Product is sold as part of a Combination Product, (either as a separate Finished Product sold together with other products or because the Drug Substances associated with that Product formulated with additional other active pharmaceutical ingredients [\*\*\*\*\*]), Net Sales of the Combination Product will be calculated, on a country-by-country basis, as follows:

- (i) If (x) the Product and (y) the other product(s) or active pharmaceutical ingredient are also sold separately in the applicable country, Net Sales of the Product portion of the Combination Product will be calculated by multiplying the total Net Sales of the Combination Product by the fraction  $A/(A+B)$ , where A is the average gross selling price in the applicable country of the Product sold separately in the same formulation and dosage, and B is the sum of the average gross selling prices in the applicable country of all other products or active ingredients in the Combination Product sold separately during the applicable Calendar Quarter.
- (ii) If the Product is sold separately, but the average gross selling price of the other product(s) or active ingredients cannot be determined, Net Sales of the Combination Product shall be equal to the Net Sales of the Combination Product multiplied by the fraction  $A/C$  wherein A is the average gross selling price of the Product and C is the average gross selling price of the Combination Product.

(iii) If the other product(s) or other active ingredients is/are sold separately, but the average gross selling price of the Product cannot be determined, Net Sales of the Combination Product shall be equal to the Net Sales of the Combination Product multiplied by the following formula: one (1) minus B/C wherein B is the average gross selling price of the other product(s) or active ingredients and C is the average gross selling price of the Combination Product.

(iv) If the average gross selling price of neither the Product, nor the other product(s) or active ingredients, can be determined, e.g., because neither the Product, nor the other product in a Combination Product, are being sold separately, Net Sales of the Combination Product shall be equal to Net Sales of the Combination Product multiplied by A/B wherein A is the number of Products comprised in the Combination Product and B is the sum of "one" for each Product and the relative value of the other product(s) and/or other active pharmaceutical ingredients comprised in the Combination Product, such value to be determined by the patent protection status of the respective products, the development costs of the respective products, and the pricing of comparable products in the Major Markets. For illustration purposes, if there are two additional active ingredients in a Combination Product, one valued at 30 percent of the average price of the Products, and one valued at 50 percent of the average price of the Products, A/B equals 2/2.8, and Net Sales are multiplied by 0.71. The Parties will agree on the respective values in the JSC. If the JSC are unable to agree on the respective values within [\*\*\*\*\*] of the matter being referred by either Part to the JSC, either Party may refer the matter for resolution in accordance with Section 15.4h, provided that the reference to "fair market value" shall be replaced with the value of the respective Product and the relative value of the other product(s) and/or other active pharmaceutical ingredients. Each Party will bear equally the cost of the experts appointed in accordance with Section 15.4h.

(v) The average gross selling price for such other product(s) or active ingredients contained in the Combination Product shall be calculated for each [\*\*\*\*\*] period by dividing the sales amount by the units of such other product(s), as published by IMS or another mutually agreed independent source. In the initial [\*\*\*\*\*] period during which a Combination Product is sold, forecasted average gross selling prices shall be used for royalty calculation purposes. Any over or under payment due to a difference between forecasted and actual average gross selling prices shall be paid or credited in the second royalty payment of the following [\*\*\*\*\*] period. In the following Calendar Year the average gross selling price of the previous year shall apply from the second royalty payment on.

To the extent an In-Licensing Agreement existing before the Effective Date disqualifies [\*\*\*\*\*] as [\*\*\*\*\*], the Parties, acting good faith, shall adjust the above mechanism for determining Net Sales of Combination Products to account for the loss suffered by CureVac as a result of the difference in qualification of [\*\*\*\*\*] between this Agreement and the In-Licensing Agreement in question. CureVac shall, in light of the available data and information regarding [\*\*\*\*\*], use commercially reasonable efforts to renegotiate such In-Licensing Agreement so that [\*\*\*\*\*] becomes part of [\*\*\*\*\*] under such In-Licensing Agreement, provided that if CureVac cannot agree with the counterparty of such In-licensing Agreement on the same mechanism for determining Net Sales of Combination Products as provided for in this Agreement, the Parties will adjust the mechanism for determining Net Sales of Combination Products under this Agreement accordingly to account for the loss suffered by CureVac as a result of the different calculation mechanisms. For the avoidance of doubt, the obligation of CureVac to use commercially reasonable efforts to renegotiate an In-licensing Agreement does not require CureVac to make any financial concessions towards the counterparty of such In-licensing Agreement which are unrelated to the definition of [\*\*\*\*\*] or the calculation of Net Sales.

- 1.133 "Non-Breaching Party" shall have the meaning set forth in Section 14.4.
- 1.134 "Optioned Product" shall have the meaning set forth in Section 3.7.1.
- 1.135 "Option Exercise Fee" shall have the meaning set forth in Section 3.7.3.
- 1.136 "Option Exercise Notice" shall have the meaning set forth in Section 3.7.2.
- 1.137 "Option LNP" shall mean an LNP in respect of which CureVac has Control under the Option LNP Agreement.
- 1.138 "Option LNP Agreement" shall mean [\*\*\*\*], as amended, supplemented or replaced from time to time (such counterparty, the "Option LNP Provider").
- 1.139 "Option LNP Provider" shall have the meaning set forth in Section 1.138.
- 1.140 "Option LNP Technology" shall mean the Patent Rights and Know-How Covering the Option LNPs.
- 1.141 "Option Period" shall have the meaning set forth in Section 3.7.1.
- 1.142 "Option Request" shall have the meaning set forth in Section 3.7.2.
- 1.143 "Other Product" shall mean each of the [\*\*\*\*\*] Initial Other Products, and any Product Adjustment, Replacement Product and Optioned Product, if applicable; *provided, however*, that if GSK replaces an Initial Other Product pursuant to Section 3.6 or terminates a Program for an Other Product pursuant to Section 14.2, such Replaced Product or Product developed under the terminated Program, as applicable, shall no longer qualify as an Other Product.
- 1.144 "Other Product R&D Plan" shall have the meaning set forth in Section 4.3.1.
- 1.145 "Party" shall mean CureVac or GSK (together, "Parties").

- 1.146 "**Patent Rights**" shall mean any and all patents and patent applications, including provisional and non-provisional applications, reissues, extensions, substitutions, confirmations, re-registrations, re-examinations, re-validations, patents of addition, supplementary protection certificates or the equivalents thereof, continuations, continuations-in-part and divisionals thereof and all foreign counterparts, and the like of any of the foregoing.
- 1.147 "**Pathogen**" shall mean any infectious disease causing agent such as a virus, bacterium, fungus, protozoan or other type of microorganism.
- 1.148 "**Pathogen Combination Product**" shall mean CureVac mRNA-Based vaccines or CureVac mRNA-Based Antibodies targeting two or more different Collaboration Pathogens other than Excluded Pathogens. For the avoidance of doubt, the [\*\*\*\*\*] Product shall be considered a Pathogen Combination Product. The Parties may decide to work on further Pathogen Combination Products, subject to the availability of licenses under the LNP Technology (if required).
- 1.149 "**Person**" shall mean an individual, firm, company, corporation, association, trust, estate, state or agency of a state, government or government department or agency, municipal or local authority and any other entity, whether or not incorporated and whether or not having a separate legal personality.
- 1.150 "**Product**" shall mean each CureVac mRNA-Based vaccine or CureVac mRNA-Based Antibody targeting one or more Pathogen(s), other than an Excluded Pathogen, which the Parties have agreed to Develop and Commercialize under this Agreement during the Term, which may be in Drug Product or Finished Product form (or precursors thereto), as the case may be, comprising: (i) the First Product, (ii) the Second Product, and (iii) any Other Product (comprising the [\*\*\*\*\*] Initial Other Products, any Replacement Product and any Optioned Product, if applicable), in each case including any Product Adjustment as adjusted in accordance with Section 3.3.
- 1.151 "**Product Adjustment**" shall have the meaning set forth in Section 3.3.
- 1.152 "**Product Adjustment Notice**" shall have the meaning set forth in Section 3.3.2.
- 1.153 "**Program**" shall mean, on a Product-by-Product basis, any and all Development activities for such Product, including under an R&D Plan, and all Manufacturing and Commercialization activities conducted in respect of a Product.
- 1.154 "**Program Patent Rights**" shall mean Patent Rights Covering Inventions.
- 1.155 "**Project Leaders**" shall have the meaning set forth in Section 7.1.2.
- 1.156 "**Proof of Concept Data**" shall mean [\*\*\*\*\*].
- 1.157 "**Quality Agreement**" shall mean a quality agreement between CureVac and GSK setting out further administrative, technical and quality provisions regarding the Manufacture and supply of a Product (or intermediary version thereof) for Development or Commercialization purposes, as applicable.

- 1.158 **"R&D Plan(s)"** shall mean the research and development plans attached hereto, or to be prepared under this Agreement and shall include the First Product R&D Plan, the Second Product R&D Plan and each Other Product R&D Plan.
- 1.159 **"Receiving Party"** shall have the meaning set forth in Section 11.1.
- 1.160 **"Recognized Stock Exchange"** means any regulated market in the European Union within the meaning of Article 4, paragraph 1, point 14 of Directive 2004/39/EC, the London Stock Exchange, the New York Stock Exchange, NASDAQ or Hong Kong Stock Exchange.
- 1.161 **"Regulatory Approval"** shall mean any and all approvals (including supplements, amendments, pre- and post-approvals, pricing and reimbursement approvals), licenses, registrations or authorizations (including marketing and labeling authorizations) of any national, supra-national, regional, state or local Regulatory Authority, department, bureau, commission, council or other governmental entity, that are necessary for the development, registration, manufacture (including formulation), distribution, use, sale, import or export of a Product in a given jurisdiction.
- 1.162 **"Regulatory Authority"** any competent regulatory or governmental authority which regulates any aspect of the Development, Manufacturing or Commercialization of a Product, including those specifically referred to in this Agreement or any Ancillary Agreement.
- 1.163 **"Regulatory Exclusivity"** shall mean, on a country-by-country and Product-by-Product basis, an additional protection, other than patent protection, granted by a Regulatory Authority that confers an exclusive period during which a Party or its Affiliates or Sublicensees have the exclusive right to market or sell a Product in such country through a regulatory exclusivity right (e.g., new use or indication exclusivity, new formulation exclusivity, orphan drug exclusivity, pediatric exclusivity, or any applicable data exclusivity), provided that regulatory exclusivity shall only be deemed to exist in a country if (i) Applicable Laws, and the guidance, policies and practice of the competent Regulatory Authority allow other mRNA-Based products to qualify as generic or biosimilar versions of a Product; and (ii) as a result, absent or after the expiry of the regulatory exclusivity right, such mRNA-Based products can enter the market of the country in question with substantially lower development investment.
- 1.164 **"Replaced Product"** shall have the meaning set forth in Section 3.6.2.
- 1.165 **"Replacement Product"** shall have the meaning set forth in Section 3.6.1.
- 1.166 **"Replacement Exercise Fee"** shall have the meaning set forth in Section 3.6.3.
- 1.167 **"Replacement Notice"** shall have the meaning set forth in Section 3.6.2.
- 1.168 **"Replacement Request"** shall have the meaning set forth in Section 3.6.2.
- 1.169 **"Replacement Right"** shall have the meaning set forth in Section 3.6.1.

- 1.170 "**Reservation Period**" shall have the meaning set forth in Section 3.5.2.
- 1.171 "**Reserved Antigen**" shall have the meaning set forth in Section 3.5.2.
- 1.172 "**Research Period**" shall mean, the period commencing on the Closing Date and ending, on a Program-by-Program basis, at the later of [\*\*\*\*\*].
- 1.173 "**RNA Printer**" shall mean the automation solution for CureVac's processes of mRNA manufacturing developed by CureVac and Tesla Grohmann Automation Solution GmbH under the Development and Intellectual Property Agreement dated December 22, 2017, including the Know-How licensed from Tesla Grohmann Automation Solution GmbH thereunder.
- 1.174 "**Royalty Term**" shall have the meaning set forth in Section 8.7.2.
- 1.175 "**RSV**" shall have the meaning set forth in Exhibit 1.67.
- 1.176 "**Sales Milestone Payment**" shall have the meaning set forth in Section 8.4.
- 1.177 "**Sanctions & Trade Controls**" shall have the meaning set forth in Section 12.8.
- 1.178 "**Second Product**" shall have the meaning set forth in Exhibit 1.27.
- 1.179 "**Second Product R&D Plan**" shall have the meaning set forth in Section 4.2.
- 1.180 "**Sublicensee**" shall mean any Third Party licensee (aside from GSK's Affiliates and any Third Party contractors used by GSK in the Development, Manufacture or Commercialization of the Products on GSK's behalf), which obtains rights to the CureVac Technology or LNP Technology under a license granted by GSK, its Affiliates or another Sublicensee, in each case in accordance with Section 2.2.
- 1.181 "**Term**" shall have the meaning set forth in Section 14.1.
- 1.182 "**Territory**" shall mean the entire world.
- 1.183 "**Third Party**" shall mean any Person, other than CureVac or GSK and their respective Affiliates.
- 1.184 "**Third Party Infringement**" shall have the meaning set forth in Section 10.2.
- 1.185 "[\*\*\*\*\*] **Product**" shall have the meaning set forth in Exhibit 1.27.
- 1.186 "[\*\*\*\*\*] **Product R&D Plan**" shall have the meaning given in Section 4.3.1.

**1.187 "Valid Claim"** shall mean either (a) a claim of an issued and unexpired patent within the CureVac Patent Rights or (ii) the LNP Technology which has not been revoked or held permanently unenforceable, unpatentable or invalid by a decision of a court or other governmental agency of competent jurisdiction, unappealable or unappealed within the time allowed for appeal, and which has not been found or admitted to be abandoned, disclaimed, denied, invalid or unenforceable through re-examination, reissue or disclaimer or otherwise, or (b) a claim of a pending patent application within (i) the CureVac Patent Rights or (ii) the LNP Technology which application has not been pending for more than [\*\*\*\*\*] from the date of its priority filing date and which claim has not been irretrievably revoked, irretrievably cancelled, irretrievably withdrawn, held invalid or abandoned by a patent office, court or other governmental agency of competent jurisdiction in a final and non-appealable judgment (or judgment from which no appeal was taken within the allowable time period), or finally determined to be unallowable in a decision from which an appeal cannot or can no longer be taken. For clarity, a claim of an issued patent that ceased to be a Valid Claim before it issued because it had been pending too long, but subsequently issues and is otherwise described by clause (a), shall again be considered to be a Valid Claim once it issues. The same principle shall apply in similar circumstances such as if, for example (but without limitation), a final rejection of a claim is overcome.

**1.188 "VAT and Indirect Taxes"** shall mean any value added, sales, purchase, turnover or consumption tax as may be applicable in any relevant jurisdiction, including but not limited to value added tax chargeable under legislation implementing Council Directive 2006/112/EC.

**1.189 "WIPO"** shall have the meaning set forth in Section 16.5.2.

**1.190 Interpretation**

In this Agreement, unless the context otherwise requires, a reference to:

- (i) a paragraph, section, exhibit or schedule is a reference to a paragraph, section, exhibit or schedule to this Agreement;
- (ii) any document includes a reference to that document (and, where applicable, any of its provisions) as amended, novated, supplemented or replaced from time to time;
- (iii) a statute or other law includes regulations and other instruments under it and consolidations, amendments, re-enactments or replacements of any of them;
- (iv) the singular includes the plural and vice versa, except as it regards the definitions of Party and Parties;
- (v) "written" and "in writing" include any means of reproducing words, figures or symbols in a tangible and visible form, including acknowledged email or facsimile;
- (vi) "include", "includes" and "including" means including without limitation, or like expression unless otherwise specified, and "for example", "e.g.", "such as" and similar words or phrases are descriptive, not limiting; and
- (vii) any reference to "demonstrable" costs and expenses means those costs and expenses can be evidenced in writing.

**1.191 Condition precedent**

The commencement of this Agreement is conditional on the completion of the Equity Investment (being such time as the investment and shareholders agreement entered into with respect to the Equity Investment takes effect). Either Party may waive this condition in whole or in part at any time by notice in writing to the other Party. Each Party must use all reasonable endeavors to procure (so far as it is so able to procure) that the condition is fulfilled on or before [\*\*\*\*\*]. If the condition is not fulfilled or waived by both Parties on or before the date specified, either Party shall be entitled to terminate this Agreement by written notice with immediate effect, and only Sections 1, 11, 16.4, 16.5, 16.11 and 16.12 shall survive such termination.

**2. LICENSES; EXCLUSIVITY.**

**2.1 License Grants to GSK.**

**2.1.1 License under CureVac Technology.** Subject to the terms and conditions of this Agreement and subject to the disclosures as set forth in items (ii) and (iii) of the Disclosure Letter, on a Product-by-Product basis, CureVac hereby grants to GSK, and GSK hereby accepts: (i) a royalty-free, exclusive license to use the CureVac Technology for the Development and Manufacture of Products for use in the Field in the Territory; and (ii) a royalty-bearing, exclusive license to use the CureVac Technology for the Commercialization of Products for use in the Field in the Territory, subject to CureVac's rights with respect to the CureVac Territory under Section 6 and the Distribution Agreement. Subject to the disclosures as set forth in items (ii) and (iii) of the Disclosure Letter, the license granted hereunder shall be exclusive as to Third Parties and to CureVac, provided that CureVac retains the right to perform the Development and Manufacturing activities allocated to CureVac under this Agreement.

**2.1.2 License under LNP Technology.** Subject to the terms and conditions of this Agreement, the terms and conditions set forth in **Exhibit 2.1.2 Part A**, and subject to the disclosures as set forth in items (ii) and (iii) of the Disclosure Letter, on a Product-by-Product basis, CureVac hereby grants to GSK, and GSK hereby accepts: (i) a royalty-free, non-exclusive sublicense under the LNP Agreements to use the LNP Technology for the Development and Manufacture of the Initial Products and the Initial Other Products for use in the Field in the Territory; and (ii) a corresponding royalty-bearing, non-exclusive license to use the LNP Technology for the Commercialization of the Initial Products and the Initial Other Products for use in the Field in the Territory, subject to CureVac's rights with respect to the CureVac Territory under Section 6 and the Distribution Agreement ("**LNP License**"). CureVac shall not (i) grant a sublicense to any Third Party under the LNP Technology for the Development and Manufacture of Products for use in the Field in the Territory, subject to the disclosures as set forth in items (ii) and (iii) of the Disclosure Letter, and (ii) itself carry out any activities under the LNP Technology for the Development and Manufacture of Products for use in the Field in the Territory other than under this Agreement; in each case of (i) and (ii) on a Product-by-Product basis for as long as the respective Product is Developed and/or Commercialized under this Agreement. The LNP License shall:

- (i) as at the Closing Date be limited to Licensed LNP from [\*\*\*\*\*] for the primary vaccine Antigen and the additional vaccine Antigen for the [\*\*\*\*\*] as listed in **Exhibit 2.1.2 Part B** for use as part of the [\*\*\*\*\*] Product in the Field;
- (ii) within [\*\*\*\*\*] following the Closing Date, include Licensed LNPs from [\*\*\*\*\*] for the primary vaccine Antigens and the associated additional vaccine Antigens for the [\*\*\*\*\*] as listed in **Exhibit 2.1.2 Part B** for use as part of the corresponding Product in the Field;
- (iii) include a Licensed LNP from [\*\*\*\*\*] for a primary Antibody and associated additional Antibodies (if any) for the [\*\*\*\*\*], provided that GSK has provided the Antibody sequence to CureVac before [\*\*\*\*\*] (and CureVac may suspend activities, to the extent required and acting reasonably, under this Program until GSK has selected such sequence, in light of the potential detrimental effects on the Program and the ownership rights in Inventions of continuing activities without having licensed this LNP), and subject to clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1; it being understood that CureVac shall secure such Licensed LNP within [\*\*\*\*\*] upon receipt of the confirmation from [\*\*\*\*\*] that the Antibody(ies) is/are available for licensing; and
- (iv) with respect to a Product Adjustment, include Licensed LNP under a then existing LNP Agreement with [\*\*\*\*\*] for an additional vaccine Antigen or an additional Antibody, subject to clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1; it being understood that CureVac shall secure the Licensed LNP for such additional vaccine Antigen or an additional Antibody, as applicable, from [\*\*\*\*\*] in accordance with Section 3.3.2.

Within [\*\*\*\*\*] following the Closing Date, the Parties will agree on a redacted copy of this Agreement (excluding any commercially confidential information) that CureVac can provide to the LNP Provider(s) in accordance with its obligations under the LNP Agreements.

**2.1.3 Exchange of Licensed LNPs.** For a period commencing on the Closing Date and ending on [\*\*\*\*\*], GSK shall have [\*\*\*\*\*] cost-free options to exchange for the original LNP Licenses granted under Section 2.1.2 the primary vaccine Antigen or primary Antibody of those LNP Licenses (together with any additional vaccine Antigen(s) or additional Antibody(ies) of those LNP Licenses, if any) for an alternate primary vaccine Antigen or an alternate primary Antibody, with or without one or more additional vaccine Antigen(s) or additional Antibody(ies), as applicable, subject to clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1, and subject to the terms and conditions set forth in Exhibit 2.1.2 Part A. GSK can exercise the exchange options granted hereunder, at GSK's discretion, for Replacement Products or Optioned Products, and can exercise this right either for different original LNP Licenses or multiple times for the same LNP License (or a combination of both), provided that GSK may exercise this exchange option right a maximum of [\*\*\*\*\*] times. On an option-by-option basis, CureVac shall secure the LNP License for an alternate primary vaccine Antigen or alternate primary Antibody and the additional vaccine Antigen(s) or additional Antibody(ies) in accordance with Section 3.6.2 or 3.7.2, as applicable.

**2.1.4 Option under Option LNP Technology.** For a period commencing on the Closing Date and ending on [\*\*\*\*\*], GSK shall have the cost-free, one-time option to obtain a non-exclusive sublicense under an Option LNP Agreement to use the Option LNP Technology to Develop, Manufacture and Commercialize a Product for use in the Field in the Territory, subject to CureVac's rights with respect to the CureVac Territory under Section 6 and the Distribution Agreement, and subject to clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1, and the terms and conditions set forth in Exhibit 2.1.4, the terms and conditions of this Agreement and the disclosures set forth in items (ii) and (iii) of the Disclosure Letter. GSK can exercise the option granted hereunder, at GSK's discretion, for an Initial Product, an Initial Other Product, a Replacement Product or an Optioned Product, provided that GSK may exercise this option [\*\*\*\*\*]. CureVac shall secure the Option LNP for the respective Product from the Option LNP Provider within [\*\*\*\*\*] upon receipt of the confirmation from the Option LNP Provider that the Antigen(s) are available for licensing.

**2.2 Sublicenses.**

**2.2.1 Right to Sublicense.** GSK shall have the right to sublicense its rights under Section 2 to any of its Affiliates. GSK's right to sublicense any of its Development rights or any of its Manufacturing rights for Development purposes (subject to Section 5) under Section 2.1.1, or any of its rights to the LNP Technology under Section 2.1.2 to any other Third Party shall be subject to CureVac's prior written consent which CureVac may grant or withhold in its sole discretion. GSK's right to sublicense (in multiple tiers) any of its Manufacturing rights for commercial purposes (subject to Section 5) and/or Commercialization rights under Section 2.1.1 to a Third Party shall be subject to CureVac's prior written consent which shall not be unreasonably withheld, conditioned or delayed. For the avoidance of doubt, this Section 2.2.1 shall not restrict GSK or any of its Affiliates to subcontract any of its Development or Manufacturing activities to a CRO, CMO or other service provider to GSK or its Affiliate, subject to Section 5.2.3.

**2.2.2 Sublicensing Requirements.** The right to sublicense to a Third Party is subject to a written sublicense agreement containing terms and conditions that are consistent with those contained in this Agreement, and shall include, *inter alia*, provisions regarding confidentiality, non-compete, indemnification, audit, record-keeping, termination and consequences of termination that are consistent with the corresponding terms and conditions provided herein. GSK shall remain liable to CureVac for all obligations under this Agreement, including all payment obligations, and shall send to CureVac a copy of the signed sublicensing agreement within [\*\*\*\*\*] after its execution, subject to the reasonable redaction of confidential information. CureVac acknowledges that all information provided to CureVac by GSK under this Section 2.2.2 shall be deemed Confidential Information of GSK and shall be subject to the terms and conditions of Section 11.

**2.3 Pathogen Exclusivity.**

- 2.3.1 GSK.** GSK shall work exclusively with CureVac on the Development, Manufacture and Commercialization of Products targeting a Collaboration Pathogen, and GSK shall not, and shall procure that its Affiliates and Sublicensees holding rights to the CureVac Technology in the Field and in the Territory will not, develop, manufacture or commercialize, solely or with a Third Party, any prophylactic and/or therapeutic mRNA-Based vaccine or mRNA-Based antibody targeting a Collaboration Pathogen other than a Product Developed and/or Commercialized under this Agreement. This Section 2.3.1 and the covenants set forth herein shall not apply to activities of any Third Party (or such Third Party's Affiliates) that becomes an Affiliate of GSK solely as a result of a Change of Control in GSK, provided that such activities are performed without using the mRNA technology described in the Know-How, or within the scope of the specification of the Patents Rights, Controlled by GSK (excluding, for clarity any CureVac Know-How or CureVac Patent Rights). Notwithstanding the foregoing, GSK shall be permitted to continue development activities targeting the same Collaboration Pathogen immediately prior to the Effective Date, and which accordingly fall within the scope of the exclusivity commitment set out in this Section 2.3.1, for up to [\*\*\*\*\*] from the Effective Date, whilst GSK carries out an orderly wind-down of those activities.
- 2.3.2 CureVac.** Subject to CureVac's obligations as set forth in items (ii) and (iii) of the Disclosure Letter, CureVac shall work exclusively with GSK on the Development, Manufacture and Commercialization of Products targeting a Collaboration Pathogens, and CureVac shall not, and shall procure that its Affiliates will not, develop, manufacture or commercialize, solely or with a Third Party, any prophylactic and/or therapeutic mRNA-Based vaccine or mRNA-Based antibody targeting a Collaboration Pathogen other than a Product Developed and/or Commercialized under this Agreement. This Section 2.3.2 and the covenants set forth herein shall not apply to activities of any Third Party (or such Third Party's Affiliates) that becomes an Affiliate of CureVac solely as a result of a Change of Control in CureVac, provided that such activities are performed without using the CureVac mRNA technology described in the CureVac Know-How or within the scope of specification of the CureVac Patent Rights.
- 2.3.3 Exclusivity Term.** The covenants laid down in this Section 2.3 shall apply for a period commencing on the Effective Date, or in case of a Collaboration Pathogen targeted by a Replacement Product or an Optioned Product, the date of receipt of the Replacement Notice or Option Notice, as applicable, by CureVac until the expiry or termination of this Agreement. For the avoidance of doubt, in case GSK has replaced an Initial Other Product pursuant to Section 3.6 or has terminated a Program pursuant to Section 14.2, the Pathogen targeted by such Replaced Product or under such terminated Program, as applicable, shall no longer qualify as Collaboration Pathogen if that Pathogen is no longer targeted by another Product, and consequently, the exclusivity obligations laid down in this Section 2.3 shall terminate with respect to such Pathogen, unless the respective Pathogen is targeted under another ongoing Program. In relation to the Initial Products only, if the Program for one of the Initial Products is terminated or replaced by a Replacement Product, the covenants laid down in this Section 2.3.3 shall continue to apply with respect to any other Initial Product targeting the same Pathogen, but no longer in relation to the terminated or replaced Initial Product (even though it targets the same Pathogen). For the avoidance of doubt, upon termination or replacement of such Initial Product, all rights and licenses with respect to such Initial Product will return to CureVac subject to and in accordance with Section 15, and GSK will not be allowed to use the CureVac Technology, including the CureVac Know-How, any Joint Product Invention or any Joint Other Invention, unless expressly set forth in Section 15 or unless CureVac has granted a license to GSK under terms to be negotiated.

2.4 Trademarks.

- 2.4.1 **Registration.** As between the Parties and their Affiliates, GSK shall be solely authorized to determine the brand, trade name, logo and trade dress under which the Finished Products shall be Commercialized in the Territory. GSK shall have the first right, but not the obligation, to prepare, file, prosecute and maintain, at its own expense, any Brand IP for the Finished Products in the Territory; *provided, however*, that nothing herein shall grant GSK any right to use any trademark Controlled by CureVac and/or CureVac's Affiliates. GSK will own all right, title and interest in and to any such trademark it selects in its own name during and after the Term, subject to the licenses granted to CureVac with respect to the CureVac Territory under Section 6.
- 2.4.2 **Restrictions.** Subject to any separate agreement(s) amongst the Parties (or their Affiliates), CureVac shall not, and shall cause their respective Affiliates not to, during the Term: (i) use or attempt to use any marks, brands or trade dress identical or similar to those covered by the Brand IP of GSK or its Affiliates, except as permitted by this Agreement or any Ancillary Agreement; (ii) register or attempt to register or procure the registration anywhere in the world of any mark as a trademark for any goods or services or as a domain name that is same as or confusingly similar to the Brand IP for the Finished Products; (iii) use any Brand IP for any of the Finished Products in any way which could tend to allow it to become generic, to lose its distinctiveness, to become liable to mislead the public or which would otherwise be detrimental or inconsistent with the good name, goodwill, reputation or image of the Parties; (iv) challenge the ownership of the Brand IP belonging to GSK or its Affiliates except if Brand IP is prosecuted in breach of this Agreement; or (v) register or attempt to register or procure the registration of or use any mark or domain name that incorporates the letters "[\*\*\*\*\*]" either as a prefix or a suffix for use in connection with a pharmaceutical product. This Section 2.4.2 and the covenants set forth herein shall not apply to a Third Party (or such Third Party's Affiliate) that becomes an Affiliate of CureVac solely as a result of a Change of Control in CureVac.
- 2.5 **Documents and Declarations.** CureVac shall execute all documents, give all declarations regarding the licenses granted hereunder and reasonably cooperate with GSK to the extent such documents, declarations and/or cooperation are required for the recording or registration of the licenses granted hereunder at the various patent offices in the GSK Territory for the benefit of GSK. GSK shall reimburse CureVac for its reasonable and demonstrable external out of pocket costs associated therewith up to a total amount of EUR 20,000.
- 2.6 **No Implied License.** Nothing in this Agreement shall be deemed to constitute the grant of any license or other right to either Party in respect of any technology of the other Party, except as expressly set forth herein, and no license rights shall be created hereunder by implication, estoppel or otherwise. Neither Party shall represent to any Third Party that it enjoys, possesses, or exercises any proprietary or property right or otherwise has any other right, title or interest in the technology of the other Party except for such rights as are expressly set forth herein. Any rights of a Party not expressly granted to the other Party under the provisions of this Agreement shall be retained by such Party.

2.7 **In-Licensing Agreements.**

- 2.7.1 **Future In-Licensed IP.** If during the Term, CureVac obtains, other than by way of a Change of Control, a sublicensable license to any Patent Rights or Know-How Controlled by a Third Party that is useful, but which is not necessary to obtain freedom to operate with respect to the use or exploitation of the mRNA, LNP, CVCM and other technology or information, each as described in the CureVac Know-How or within the scope of the specification of the CureVac Patent Rights (excluding any Invention or Know-How jointly owned by the Parties) (the "**CureVac Elements**"), for the Development, Manufacture and Commercialization of Products under this Agreement ("**In-Licensed IP**"), CureVac shall (i) notify GSK of the rights that CureVac has obtained with respect to such In-Licensed IP, (ii) use commercially reasonable endeavors to obtain the right to sub-license those Patent Rights, and (iii) notify GSK of the applicable financial terms, which shall be non-discriminatory (as between GSK and any other sublicensee of CureVac). GSK shall notify CureVac within [\*\*\*\*\*] after receipt of such notice whether GSK desires to include such In-Licensed IP under the license granted to GSK by CureVac pursuant to Section 2.1. If GSK notifies CureVac that it desires to include such In-Licensed IP under the license granted to GSK by CureVac pursuant to Section 2.1, then (i) such In-Licensed IP is and shall be automatically included in the definition of CureVac Know-How or CureVac Patent Rights, as applicable, and be licensed to GSK under Section 2.1, and (ii) as a sublicensee of CureVac, GSK will meet all obligations of CureVac that are applicable to GSK's activities as a sub-licensee (to the extent notified by CureVac to GSK in advance in writing); and (iii) GSK shall reimburse CureVac for additional amounts payable by CureVac under such license to such Third Party to the extent directly arising as a result of (x) the grant of such sublicense to GSK or (y) the use of the In-Licensed IP by the Development, Manufacture or Commercialization of Products by GSK, its Affiliates, and Sublicensees.
- 2.7.2 **Enforcement, Maintenance and Amendment of In-Licensing Agreements.** CureVac will reasonably enforce (including in connection with any counterparty's breach of any representations or warranties under the applicable In-Licensing Agreements), or otherwise take the actions necessary to enable GSK to enforce, CureVac's rights, benefits and the obligations of the respective counterparties under the In-Licensing Agreements that may impact the rights, benefits and obligations of GSK hereunder, and will inform GSK of any action it may take under the In-Licensing Agreements to the extent such action may impact GSK's interest under the respective In-Licensing Agreement. CureVac shall: (i) fulfil all of its obligations, including its payment obligations, under the In-Licensing Agreements; and (ii) not take any action or omit to take any action that would materially adversely affect, or would reasonably be expected to materially adversely affect, GSK's rights, benefits and obligations under this Agreement. CureVac shall reasonably notify GSK of any default, termination or amendment of, the In-Licensing Agreements, to the extent such default, termination or amendment may have an impact of GSK.

**3. PRODUCT ADJUSTMENTS; REPLACEMENT RIGHT; EXCLUSIVE OPTION.**

**3.1 Product Composition.** As between the Parties, subject to Sections 2.1.3 and 2.1.4 with respect to the LNP Technology and subject to the replacement mechanism under Section 3.6, the clearance mechanism under Section 3.4 and Section 3.5, the composition restrictions under Section 3.2, the adjustment mechanism under Section 3.3, and the limitations to GSK's decision-making rights set forth in Section 7.5.2b(i), GSK shall have the right, in its sole discretion, to determine the composition of a Product, including [\*\*\*\*\*].

**3.2 Composition Restrictions.**

**3.2.1 General Restriction.** Each Product must incorporate CureVac mRNA containing [\*\*\*\*\*].

**3.2.2 Vaccine Restrictions.** Initial Products and Other Products (including any Product Adjustments) that are vaccines shall be subject to the following restrictions: each shall consist of a maximum number of [\*\*\*\*\*]. For each such vaccine Product, GSK shall designate the primary vaccine Antigen and the additional vaccine Antigens as of the Effective Date or upon selection of the Replacement Product.

**3.2.3 Antibody Restrictions.** For the purposes of this Agreement, (i) the maximum number of Antigens that a single Antibody can bind to is [\*\*\*\*\*] Antigens and (ii) unless otherwise set forth herein, Antibody shall include an Antibody Combination, as applicable. For each such Antibody Product, GSK shall designate the primary Antibody and the additional Antibodies as of the Effective Date or upon selection of the Replacement Product.

**3.3 Product Adjustments.**

**3.3.1 Product Adjustments.** If, further to Section 3.1 and subject to the restrictions laid down in Section 3.1, GSK wishes to only change the additional vaccine Antigen(s) or additional Antibody(ies), but not the primary vaccine Antigen or the primary Antibody of a Product, such change shall constitute a "**Product Adjustment**" and be handled in accordance with this Section 3.3. Where GSK wishes to change the primary Antigen or the primary Antibody of a Product, with or without changing the Pathogen or combination of Pathogens targeted by such Product, such change shall constitute a Product Replacement and be handled in accordance with Section 3.6.

**3.3.2 Product Adjustment Notice.** If GSK intends to make a Product Adjustment, GSK shall send a written request to CureVac identifying the details of such Product Adjustment, including, if a change to an LNP License is needed for such Product Adjustment, all details necessary for CureVac to perform the clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1. Within [\*\*\*\*\*] following receipt of the adjustment request, the Antigen/Antibody List Rep will perform the Antigen/Antibody clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1. Within [\*\*\*\*\*] upon receipt of the confirmation from the LNP Provider that the additional Antigen or additional Antibody is available for licensing, CureVac shall secure the LNP License for such additional vaccine Antigen or additional Antibody, as applicable, from the LNP Provider, and the Parties will work on an amendment to the R&D Plan for the respective Product.

**3.4 Clearance in relation to LNP.**

If GSK intends to make a Product Adjustment, exercise its Replacement Right or exercise its Exclusive Option, GSK may request CureVac in writing to perform an Antigen clearance under the LNP Agreement or an Antigen or Antibody clearance under the Option LNP Agreement, such clearance to be conducted in accordance with the following process: First, GSK shall notify a specific representative designated by CureVac in writing that GSK wishes to conduct an Antigen or Antibody clearance ("**Antigen/Antibody List Rep**") and shall provide all information required to perform such clearance by using the clearance template attached hereto as **Exhibit 3.4 ("Clearance Template")**. Second, within [\*\*\*\*\*] from receipt of such information from GSK, the Antigen/Antibody List Rep shall contact the antigen or antibody list representative of the LNP Provider or the Option LNP Provider, as applicable, to confirm whether the Antigen or Antibody is available for licensing.

**3.5 Further Clearance and Reservation.**

**3.5.1 Clearance.** If applicable, GSK may request CureVac in writing to perform an Antigen clearance under CureVac's pre-existing agreement as listed in paragraph 4 of item (iii) in the Disclosure Letter, such clearance to be conducted in accordance with the following process:

- (i) GSK shall notify the Antigen/Antibody List Rep in writing that GSK wishes to conduct such Antigen clearance, and shall provide all information required to perform such clearance by using the Clearance Template.
- (ii) Within [\*\*\*\*\*] from receipt of such information from GSK, the Antigen/Antibody List Rep shall verify that the requested Antigen is not associated with an Excluded Pathogen and shall confirm whether the Antigen is available, meaning it has not been reserved previously by the counterparty to a pre-existing agreement as listed in paragraph 4 of item (iii) in the Disclosure Schedule in accordance with its terms.
- (iii) Upon confirmation, the Antigen/Antibody List Rep shall notify GSK thereof, and the Antigen shall become a Reserved Antigen, provided that the maximum number of reserved Antigens may not be exceeded.

**3.5.2 Reservation of Antigens.** For a term of [\*\*\*\*\*] after the Closing Date ("**Reservation Period**"), and, subject to the clearance mechanism under Section 3.5.1, GSK shall have the right to reserve a maximum number of [\*\*\*\*\*] under the CureVac Technology for use in the Field (each, a "**Reserved Antigen**"). Subject to the clearance mechanism under Section 3.5.1, GSK may change the Antigens that constitute Reserved Antigens during the Reservation Period. The Antigens listed in **Exhibit 3.5.2** shall be deemed Reserved Antigens as at the Closing Date. Without limiting any other obligation of CureVac under this Agreement (including under Section 2.3 and 3.7.6), during the Reservation Period, CureVac, itself or through its Affiliates, may not grant any rights to a Third Party for a Reserved Antigen under the CureVac Technology for use in the Field.

### 3.6 Replacement of Products.

- 3.6.1 Replacement Right.** Until [\*\*\*\*\*], subject to the composition restrictions under Section 3.2, the clearance mechanism under Section 3.4 and, if applicable, Section 3.5.1, and subject to Sections 2.1.3 and 2.1.4 with respect to the LNP Technology, GSK has the right to replace any of the then-current Products with a CureVac mRNA-Based vaccine or CureVac mRNA-Based Antibody that consists of a different primary Antigen or primary Antibody respectively, and which may target a different Pathogen or combination of Pathogens, other than an Excluded Pathogen ("**Replacement Right**"), provided that GSK may exercise its Replacement Right a maximum of [\*\*\*\*\*] times. GSK may replace a Product with (i) a new CureVac mRNA-Based vaccine or CureVac mRNA-Based Antibody (including for the same Pathogen or combination of Pathogens, but with a different primary Antigen or primary Antibody), or (ii) a CureVac mRNA-Based vaccine or CureVac mRNA-Based Antibody which is, at the time when GSK exercises its Replacement Right, under development by CureVac outside the scope of this Agreement (each, a "**Replacement Product**"). For the purposes of this Section 3.6, "under development by CureVac" shall mean that CureVac has generated Proof of Concept Data with respect to the Replacement Product.
- 3.6.2 Replacement Notice.** If GSK intends to exercise its Replacement Right, GSK shall send a written replacement request to CureVac (at any time before the expiry of the period specified in Section 3.6.1) identifying: (i) the Product to be replaced ("**Replaced Product**"); (ii) the Replacement Product that GSK seeks to Develop; (iii) the LNP or CVCV that GSK desires to use for the Replacement Product; and (iv) if applicable, the Antibody and/or Antigens that GSK wishes to clear in accordance with Section 3.4 and Section 3.5 ("**Replacement Request**"). Within [\*\*\*\*\*] following the Replacement Request, the Parties will hold a JSC meeting for discussing the details with respect to the Replacement Product and the desired LNP or CVCV for such Replacement Product, and CureVac will provide to GSK all data, documents and information reasonably required by GSK to assess whether it wishes to exercise its Replacement Right with respect to the respective Replacement Product, including the amount of the Replacement Exercise Fee, if any. Within [\*\*\*\*\*] following this JSC and unless directed otherwise by GSK in writing, the Antigen/Antibody List Rep will perform the requisite Antigen/Antibody clearance in accordance with Section 3.4 and, if applicable, Section 3.5.1, GSK shall exercise its Replacement Right by sending written notice to CureVac within [\*\*\*\*\*] following the confirmation by the Antigen/Antibody List Rep that the Antibodies and/or Antigens are available to GSK ("**Replacement Notice**"). Following receipt of the Replacement Notice by CureVac, the Parties shall as soon as reasonable practicable work on an initial R&D Plan for the Replacement Product in accordance with Section 4.3.2, and CureVac shall, if an LNP is selected by GSK and cleared, secure the LNP License from the respective LNP Provider.

- 3.6.3 Replacement Exercise Fee.** If GSK exercises its Replacement Right for an existing Replacement Product, i.e., a CureVac mRNA-Based Vaccine or CureVac mRNA-Based Antibody already under development by CureVac, GSK shall make the following payments to CureVac: (i) GSK shall compensate CureVac for all reasonable, duly documented and demonstrable development costs and expenses exclusively relating to such Replacement Product incurred by CureVac or its Affiliates since (and in respect of the period after) the Closing Date (including in case of a Replacement Product acquired by CureVac from a Third Party that portion of the fee paid to that Third Party that relates to the Replacement Product), *provided, however*, that with respect to any Replacement Product targeting [\*\*\*\*\*], such compensation shall also include costs and expenses incurred by CureVac or any of its Affiliates before the Closing Date in the amount specified in Section 3.7.3; and (ii) GSK shall pay to CureVac any milestone payments which would have been due since the Closing Date, if such Replacement Product had been an Other Product as at the Closing Date, if any (the payments under (i) and (ii) together, the "**Replacement Exercise Fee**"). The Replacement Exercise Fee is to be paid by GSK to CureVac within [\*\*\*\*\*] after receipt of an invoice from CureVac, with supportive documentation reasonably detailing the costs and expenses incurred by CureVac. By way of example: If GSK exercises its Replacement Right for a Replacement Product under development by CureVac outside the scope of this Agreement for which CureVac has [\*\*\*\*\*] at the time GSK exercises its Replacement Right, GSK shall reimburse CureVac for any reasonable, duly document Development costs and expenses incurred by CureVac since (and in respect of the period after) the Closing Date and exclusively relating to such Replacement Product and, in addition, shall pay to CureVac accrued, non-refundable and non-creditable Development & Regulatory Milestone Payments in the amounts of [\*\*\*\*\*].
- 3.6.4 Replacement.** Upon (i) receipt of a Replacement Notice by CureVac, (ii) full payment of the Replacement Exercise Fee from GSK to CureVac, if applicable, and (iii) the Parties having agreed on an initial R&D Plan for the Replacement Product, the relevant Replacement Product shall become an Other Product. The Parties shall Develop such Replacement Product pursuant to Section 4.3.2, and, unless set forth otherwise, all terms and conditions relevant for the Development, Manufacture and Commercialization of Other Products shall apply to such Replacement Product (including licenses, milestone payments and royalties). All rights of GSK with respect to the Replaced Product shall terminate, the Pathogen targeted by the Replaced Product shall become an Excluded Pathogen (unless such Pathogen is targeted by another Product), and Section 14.6 and Section 15.1 shall apply with respect to the replaced Program and the Replacement Product. For the avoidance of doubt, a Product Adjustment shall not constitute a replacement for the purposes of this Section 3.6.
- 3.7 Exclusive Option.**
- 3.7.1 Option Grant.** Until [\*\*\*\*\*] ("**Option Period**"), subject to the composition restrictions under Section 3.2, the clearance mechanism under Section 3.4 and, if applicable, Section 3.5.1, and subject to Sections 2.1.3 and 2.1.4 with respect to the LNP Technology, CureVac hereby grants to GSK, and GSK hereby accepts, the exclusive option to obtain exclusive licenses under the CureVac Technology to Develop, Manufacture and Commercialize further CureVac mRNA-Based vaccines or CureVac mRNA-Based Antibodies, in addition to the then-current Products, targeting a different Pathogen or combination of Pathogens other than an Excluded Pathogen in the Field ("**Exclusive Option**"). GSK may exercise its Exclusive Option only with respect to a CureVac mRNA-Based vaccine or a CureVac mRNA-Based Antibody which is, at the time when GSK exercises its Exclusive Option, under development by CureVac outside the scope of this Agreement (each, an "**Optioned Product**"). For the purposes of this Section 3.7, "under development by CureVac" shall mean that CureVac has generated Proof of Concept Data with respect to the Optioned Product.

3.7.2 **Option Exercise Notice.** If GSK intends to exercise its Exclusive Option, GSK shall send (at any time before the expiry of the Option Period) a written notice to CureVac identifying the Optioned Product that GSK seeks to Develop ("**Option Request**"). Within [\*\*\*\*\*] following receipt of the Option Request, the Antigen/Antibody List Rep will perform an LNP clearance in accordance with Section 3.4. Within [\*\*\*\*\*] following the request, the Parties will hold a JSC meeting for discussing the details of the envisaged collaboration, and CureVac will notify GSK of the amount of the Option Exercise Fee and will provide to GSK all data, documents and information reasonably required by GSK to assess whether it wishes to exercise its Exclusive Option with respect to the respective Optioned Product. GSK shall exercise its Exclusive Option by sending written notice to CureVac within [\*\*\*\*\*] following such JSC meeting ("**Option Exercise Notice**"). Following receipt of the Option Exercise Notice by CureVac, the Parties shall as soon as reasonably practicable work on an initial R&D Plan for the Optioned Product in accordance with Section 4.3.2, and CureVac shall secure the LNP License from the LNP Provider, or in case GSK exercises its option, from the Option LNP Provider.

3.7.3 **Option Exercise Fee.**

3.7.4 If GSK exercises its Exclusive Option, GSK shall make the following payments to CureVac: (i) GSK shall compensate CureVac for all reasonable and demonstrable Development costs and expenses exclusively relating to such Optioned Product incurred by CureVac or its Affiliates since (and in respect of the period after) the Closing Date (including in case of an Optioned Product acquired by CureVac from a Third Party that portion of the fee paid to that Third Party that relates to the Optioned Product), *provided, however*, that with respect to any Optioned Product targeting [\*\*\*\*\*], the compensation by GSK shall also include the costs and expenses incurred by CureVac or any of its Affiliates before the Closing Date in the amount of [\*\*\*\*\*]; and (ii) GSK shall pay to CureVac any milestone payments which would have been due since the Closing Date, if such Optioned Product had been an Other Product as at the Closing Date, if any (the payments under (i) and (ii) together, the "**Option Exercise Fee**"). The Option Exercise Fee is to be paid by GSK to CureVac within [\*\*\*\*\*] after receipt of an invoice from CureVac, with supportive documentation reasonably detailing the costs and expenses incurred by CureVac. By way of example: If GSK exercises its Exclusive Option for an Optioned Product under development by CureVac outside the scope of this Agreement for which CureVac has [\*\*\*\*\*] at the time GSK exercises its Exclusive Option, GSK shall reimburse CureVac for any reasonable, demonstrable and duly documented Development costs and expenses incurred by CureVac since (and in respect of the period after) the Closing Date and exclusively relating to such Optioned Product and, in addition, shall pay to CureVac accrued, non-refundable and non-creditable Development & Regulatory Milestone Payments in the amounts of [\*\*\*\*\*].

3.7.5 **Option Exercise.** Upon (i) receipt of an Option Exercise Notice by CureVac, (ii) full payment of the Option Exercise Fee from GSK to CureVac, and (iii) the Parties having agreed on an initial R&D Plan for the Optioned Product, the relevant Optioned Product shall become an additional Other Product. The Parties shall Develop such additional Optioned Product pursuant to Section 4.3.2, and, unless set forth otherwise, all terms and conditions relevant for the Development, Manufacture and Commercialization of Other Products shall apply to such Optioned Product (including licenses, milestone payments and royalties).

3.7.6 **Exclusivity during Option Period.** Subject to CureVac's obligations as set forth in items (ii) and (iii) of the Disclosure Letter, during the Option Period, CureVac shall not commercialize, and shall not grant any rights to a Third Party for the development or commercialization of any prophylactic or therapeutic mRNA-Based vaccine or mRNA-Based antibody targeting a Pathogen other than an Excluded Pathogen in the Field without GSK's express, written waiver of its rights under the Exclusive Option, which GSK may grant or withhold in its sole discretion. For clarity, subject to Section 2.3.2, the Exclusive Option granted to GSK does not prevent CureVac from initiating or continuing internal Development programs for mRNA-Based vaccines or Antibodies.

#### 4. RESEARCH AND DEVELOPMENT COLLABORATION.

##### 4.1 First Product.

The Parties shall collaborate on the further Development of the First Product. The initial Development plan for the First Product that the Parties will implement is attached hereto as **Exhibit 4.1**, and may be amended from time to time by the JSC in accordance with this Agreement ("**First Product R&D Plan**"). CureVac will complete preclinical validation and sponsor a Clinical Phase I Study of this First Product, unless the Parties agree on a different clinical Development approach within the JSC. Unless GSK replaces the Product in accordance with Section 3.6 or the Program is terminated, GSK will conduct all subsequent Development activities, including activities to obtain Regulatory Approval for such Product, which CureVac shall support, including by the clinical supply of Products. Each Party will perform the aforementioned activities in accordance with this Agreement and the First Product R&D Plan (as amended from time to time).

##### 4.2 Second Product.

The Parties shall collaborate on the Development of the Second Product. The initial R&D Plan for the Second Product is attached hereto as **Exhibit 4.2**, and may be amended from time to time by the JSC in accordance with this Agreement ("**Second Product R&D Plan**"). Subject to the terms and conditions of this Agreement and in accordance with the Second Product R&D Plan, the Parties will perform the following Development activities in respect of the Second Product:

- (i) the Parties will collaborate on the Antigen design and the identification of the precise target;
- (ii) CureVac will perform the mRNA design and formulation and will conduct the pre-clinical validation;

(iii) CureVac will sponsor a first Clinical Phase I Study, unless the Parties agree on a different clinical development approach within the JSC; and

(iv) unless GSK replaces the Product in accordance with Section 3.6 or the Program is terminated, GSK will conduct all subsequent Development activities, including regulatory activities to obtain Regulatory Approval for such Product, which CureVac shall support, including by the clinical supply of Products.

#### 4.3 Other Products.

**4.3.1 Initial Other Product.** The Parties shall collaborate on the Development of the Initial Other Products. An initial R&D Plan for each of these Products is attached hereto as **Exhibit 4.3.1(A)-(C)**, and may be amended from time to time by the JSC in accordance with this Agreement (each, an "**Other Product R&D Plan**"). Subject to the terms and conditions of this Agreement and in accordance with the respective Other Product R&D Plan, the Parties will perform the following Development activities in respect of each of the Other Products:

(i) the Parties will collaborate on the Antigen design and the identification of the precise target;

(ii) CureVac will perform the mRNA design and formulation, and will conduct the pre-clinical validation; and

(iii) CureVac will sponsor a first Clinical Phase I Study, unless in light of achieving the subsequent clinical development and Regulatory Approval of this Product expediently, the Parties agree on a different clinical development approach within the JSC; and

(iv) unless GSK replaces the Product in accordance with Section 3.6 or the Program is terminated, GSK will conduct all subsequent Development activities, including regulatory activities to obtain Regulatory Approval for such Product, which CureVac shall support, including by the clinical supply of Products.

**4.3.2 Subsequent Other Products.** If GSK has exercised its Replacement Right pursuant to Section 3.6 or its Exclusive Option pursuant to Section 3.7, the Parties shall collaborate on the Development of such Replacement Product or Optioned Product, as applicable. As soon as reasonably practicable following the exercise of the Replacement Right or Exclusive Option by GSK, as applicable, the Parties shall jointly work on an R&D Plan for such Replacement Product or Optioned Product, as applicable, and shall submit such draft R&D Plan to the JSC for approval. Following approval of such R&D Plan by the JSC, each Party shall perform the activities allocated to such Party under the respective R&D Plan. The Parties shall jointly work on the Development of such Product up to and including the Clinical Phase I Study and, unless the Program is terminated, GSK will conduct all subsequent Development activities, including activities to obtain Regulatory Approval for such Product, which CureVac shall support, including by the clinical supply of Products, all in accordance with this Agreement and the applicable R&D Plan.

- 4.4 **Development Data, results and records.** On a Program-by-Program basis, at such intervals as set forth in the applicable R&D Plan for the respective Program, or in the absence of any such provision in the applicable R&D Plan, at reasonable intervals, the Parties will make available to one another through formal reports for review and discussion within the JSC all Development Data and other results of the Development conducted pursuant to any Program, and will keep such records (paper and electronic) as described herein. The Parties will maintain records of the Development Data and other results in sufficient detail as required from Regulatory Authorities and in good scientific manner appropriate for patent purposes, and in a manner that properly reflects all work done and results achieved in the performance of such Programs.
- 4.5 **Development Funding.** GSK shall, subject to the remainder of this Section 4.5, compensate CureVac for the Development Costs CureVac incurs performing the Development activities set forth in each R&D Plan (with FTE calculated at the FTE Rate) in accordance with the budget and assumptions as agreed under that R&D Plan. The Parties shall in good faith consider means of gaining efficiencies in the performance of the R&D Plans that have a positive impact on the associated budget, such as outsourcing of certain research activities to a subcontractor. The compensation is to be paid by GSK to CureVac on a Calendar Quarterly basis. GSK shall make payments to CureVac within [\*\*\*\*\*] after receipt of an invoice from CureVac, which CureVac shall provide on a Calendar Quarterly basis, with supportive documentation reasonably detailing the composition of the agreed budgeted cost (with FTE calculated at the FTE Rate) for the applicable Calendar Quarter period. CureVac shall notify GSK as soon as reasonably practicable in the event that it becomes aware that Development Costs are expected to deviate from the amounts approved in the Development budget, as a result of a change to the assumptions under the R&D Plan, whereupon the Parties shall discuss the causes of such deviation and evaluate potential mitigation measures relating thereto, and an appropriate adjustment (if any) to the Development budget. The Parties shall refer any Development budget increase amounting to greater than [\*\*\*\*\*] of the previously approved amount to the JSC for prior approval. Unless such budget increase is approved by the JSC, GSK shall not be liable to compensate any amounts to CureVac in excess of [\*\*\*\*\*] of the amount set out in the agreed Development budget from time to time. GSK shall not unreasonably withhold its approval to any budget increase which is reasonably required as a result of the change to a budgeting assumption set out in a R&D Plan.

**4.6 Materials.** CureVac will provide GSK with any CureVac Materials required for Development use in the Programs, including those which comprise, embody or incorporate CureVac Background Technology. Without limiting the foregoing, this shall be carried out in accordance with the respective R&D Plan. GSK will provide CureVac with any GSK Materials required for research and Development use in the Programs, including those which comprise, embody or incorporate GSK Background Technology. Without limiting the foregoing, this shall be carried out in accordance with the respective R&D Plan. GSK will use the CureVac Materials and CureVac will use the GSK Materials, as applicable (i) only in accordance with the terms and conditions of this Agreement; (ii) not in human subjects, in clinical trials, or for diagnostic purposes involving human subjects, or for any animal studies, except as expressly provided for in R&D Plans; and (iii) not reverse engineer or chemically analyze the same except as expressly provided for (if at all) in R&D Plans. The Materials will remain the sole property of the Party supplying them and will be used by the recipient Party in compliance with all Applicable Laws and only to perform activities set forth in R&D Plans. The receiving Party shall not sell, transfer, disclose or otherwise provide access to the other Party's Materials without the written consent of the providing Party, except that the receiving Party may allow access to the other Party's Materials to its and its Affiliates' employees, officers, consultants, subcontractors and Sublicensees who require such access to perform its activities under this Agreement and solely for purposes consistent with this Agreement; provided that such employees, officers, consultants, subcontractors and Sublicensees are bound by agreement to retain and use the Materials in a manner that is consistent with the terms of this Agreement. The Materials are provided "as is". Except as expressly set out in this Agreement, no representations or warranties, express or implied, of any kind, are given by the providing Party with respect to any of the Materials including their condition, merchantability or fitness for a particular purpose. The receiving Party acknowledges the experimental nature of the Materials and that accordingly, not all characteristics of the Materials are necessarily known. Upon termination or expiry of this Agreement if earlier, any and all remaining Materials will, within [\*\*\*\*\*] after such event, be returned to the Party supplying them (or destroyed, if the supplying Party shall so specify, with such destruction confirmed in writing). The provision of Materials hereunder will not constitute any grant, option or license to or under such Materials, or any Patent Rights or Know-how of the supplying Party, except as expressly set forth herein.

**4.7 Know-How Transfer.** As and when required in relation to an R&D Plan (and from time to time during the Term if new Know-How within the CureVac Know-How comes to be Controlled by CureVac) or as soon as reasonably practicable upon GSK's request, CureVac shall (at its cost and expense) disclose and/or deliver to GSK copies of all Development Data and information in CureVac's possession relating to the CureVac Know-How which is reasonably required for GSK's Development activities in accordance with the respective R&D Plan (including for regulatory purposes) ("**Development Transfer Materials**"), with the exception, however, of all Know-How comprised in the CureVac Manufacturing Technology which shall be made available to GSK or its designee as set forth in Section 5.2.3. The technology transfer to be undertaken under this Section 4.7 and under Section 5.2.3 shall be overseen by the Joint Steering Committee. Any transfer of Know-How pursuant to this Section 4.7 shall be carried out on the basis of a specific technology transfer plan determined in good faith by the Parties and reflected in a technology transfer addendum to this Agreement, detailing at least the following activities together with appropriate timelines: (i) the provision by CureVac of soft copies and, to the extent reasonably required by GSK, hard copies of all Development Transfer Materials; (ii) the procurement by CureVac of the services of such qualified and experienced scientists and technicians, production and quality assurance personnel, engineers, and quality checking personnel as may be reasonably necessary to support the transfer of the Development Transfer Materials. Until completion of the transfer of the Development Transfer Materials, CureVac shall build and maintain a secure, readable, accessible and complete repository of the Development Transfer Materials.

#### 4.8 Regulatory Approvals of Product.

- 4.8.1 Filing and Transfer of INDs.** On a Product-by-Product basis, CureVac shall prepare and file INDs in accordance with the applicable R&D Plans. GSK shall have the right to review and comment on all such filings, and CureVac will take into good faith consideration any such comments provided by GSK within [\*\*\*\*\*] of GSK's receipt of such draft filings. As soon as is reasonably practicable after the completion of the [\*\*\*\*\*] for a Product, and in accordance with the instructions of GSK, CureVac shall (or shall cause its Affiliate to) assign and transfer to GSK the IND for such Product, and all of CureVac's and its Affiliates rights, interest and title therein, and GSK shall accept such assignment and transfer. GSK and CureVac each agree to use Diligent Efforts to take all actions required by a Regulatory Authority to effect the transfer of such IND and further agree to cooperate with each other in order to effectuate the foregoing transfer of such IND. At GSK's direction, an IND may also occur by GSK's filing of a new separate IND for the same Product, cross-referring to the first IND, followed by a later transfer and joining of the first IND, or by a close-out of the first IND. Following the transfer of the IND for a Product, GSK shall reimburse CureVac for all reasonable and demonstrable costs and expenses (including FTE costs at the FTE Rate) incurred by CureVac for the filing and transfer of that IND under the applicable R&D Plan. Until the transfer of an IND for a Product, CureVac shall be responsible for all regulatory interactions, including written communications and meetings with Regulatory Authorities, for any INDs filed by CureVac, provided that GSK shall have the right (i) to participate in meetings with Regulatory Authorities if permissible under Applicable Laws and/or (ii) to prepare and file INDs itself for any Product as set forth above. Furthermore, except in cases where this is not reasonably practicable, e.g. due to a deadline set by a Regulatory Authority, GSK shall have the right to review and comment on any written communications, and CureVac will take into good faith consideration any such comments provided by GSK.
- 4.8.2 Other Regulatory Filings.** GSK has the sole right to prepare and file all new drug applications (or equivalents) and shall own all Regulatory Approvals and be responsible for all decisions in connection with the Regulatory Approvals for Products in the Field and in the Territory, subject to GSK's diligence obligations under Section 4.10 and the rights granted to CureVac with respect to the Regulatory Approvals relevant for the CureVac Territory under Section 6 and the respective Distribution Agreement. With regard to CMC Development and Manufacturing, CureVac shall contribute the necessary sections for such filings, subject to review by GSK. On request by GSK, CureVac shall review and comment on all such filings and safety related documents, and GSK shall reimburse CureVac's reasonable FTE costs incurred on account of GSK's request at the FTE Rate. GSK will share with CureVac any regulatory filings before submission. CureVac shall cooperate in, and provide reasonable assistance to support, these efforts as reasonably requested by GSK. GSK shall provide CureVac with a final copy of each filing.

- 4.8.3 Communications.** Subject to Sections 4.8.1 and 4.8.6, and subject to the rights and obligations of CureVac under Section 6 and the respective Distribution Agreement with respect to the Regulatory Approvals relevant for the CureVac Territory, GSK shall be responsible for all regulatory interactions, including written communications and meetings with Regulatory Authorities, and safety management, including the reporting to the appropriate governmental authorities of all adverse events and any other information concerning the safety of Products. GSK will, as part of its regular updates through the JSC, inform CureVac in writing of any material feedback from Regulatory Authorities relating to any Product. Furthermore, at CureVac's request, GSK will provide copies of all Regulatory Approvals and material correspondence with Regulatory Authorities in the Major Markets relating to the Clinical Studies with respect to all Products to CureVac. CureVac shall have the right to participate as a silent observer in a meeting with Regulatory Authorities if and to the extent such meeting relates to the CureVac Technology. Furthermore, upon request of GSK, CureVac shall participate in a meeting with a Regulatory Authority, and GSK shall reimburse all of CureVac's FTE costs (at the FTE Rate) and expenses incurred on account of GSK's request.
- 4.8.4 Sharing of information.** CureVac will reasonably support GSK, at GSK's request, on all regulatory matters with respect to the Development and Commercialization of the Products, at GSK's cost, including by providing data and documents as reasonably required for obtaining Regulatory Approvals and for interactions with Regulatory Authorities regarding the Products, provided that such documents and data will remain the property and Confidential Information of CureVac, and GSK will only use such documents and data in accordance with Section 11. CureVac, on receipt of a request of GSK shall provide to GSK a summary of the safety, reactogenicity and immunogenicity data resulting from the [\*\*\*\*\*]. GSK may only use such data included in the summary for the Development of Products under this Agreement and such summary and the data contained therein will remain Confidential Information of CureVac. GSK may make such summary and the data contained therein available solely to employees of GSK that have a need to know such data for the Development of Products under this Agreement. CureVac may require GSK, as a condition for provision of the foregoing, to enter into a standard confidentiality agreement with a Third Party.
- 4.8.5 Cross-referencing.** To the extent required by GSK, or an Affiliate or Sublicensee of GSK to the Products, CureVac shall authorize and hereby authorizes GSK, its Affiliates and Sublicensees to cross reference to the sections of the regulatory dossiers of the clinical trials related to any other mRNA-Based product in the Field in development by CureVac or its Affiliates to the extent under the Control of CureVac. GSK shall notify CureVac in writing prior to any such cross-referencing. GSK will consider in good faith any request of CureVac or any of its Affiliates to authorize cross-referencing to the sections of the regulatory dossiers of the clinical trials related to the Products.
- 4.8.6 Pharmacovigilance.** The Parties shall have in place and will maintain during the Term (or, as applicable, until the obligations intended to survive termination of this Agreement have been fulfilled) systems, procedures, training programs and documentation needed to perform and comply with their pharmacovigilance regulatory obligations, and each Party shall promptly notify the other Party of any safety issues that may arise and that need to be reported under Applicable Laws. Each Party will ensure that it complies with all Applicable Laws regarding the Products relating to risk management, drug safety and pharmacovigilance. The Parties shall negotiate in good faith and conclude a pharmacovigilance agreement within [\*\*\*\*\*] as of the Closing Date.

- 4.9 CureVac Development Diligence.** Subject to GSK complying with its obligations under this Agreement, CureVac will conduct all Development activities assigned to it the R&D Plans in a timely manner and in accordance with the R&D Plan, and obtain and maintain sufficient facilities, personnel (with appropriate qualifications and experience), equipment, materials and other resources as are reasonable and adequate to complete the R&D Plans.
- 4.10 GSK Development and Regulatory Diligence.** Subject to CureVac complying with its obligations under this Agreement, GSK will:
- (i) conduct all Development activities assigned to it in the R&D Plans, progress the Products into the next appropriate Clinical Study, and obtain and maintain sufficient facilities, personnel (with appropriate qualifications and experience), equipment, materials and other resources as reasonably required to complete the R&D Plans; and
  - (ii) use its Diligent Efforts to secure biologics licensure by the FDA and marketing authorization by EMA following completion of all appropriate Clinical Studies.
- 4.11 Use of GSK Technology.** Subject to the terms and conditions of this Agreement, GSK hereby grants to CureVac, and CureVac accepts, a royalty-free, non-exclusive, license (with the right to sub-license in accordance with Section 4.12) to use the GSK Technology for performing the Development and Manufacturing activities allocated to CureVac under this Agreement (and, subject to the terms of each Ancillary Agreement, under the Ancillary Agreements).
- 4.12 Right to Sublicense.** CureVac shall have the right to sublicense its rights under Section 4.11 to any of its Affiliates, but not to any Third Party, subject only to the right to subcontract as set forth under Section 4.13 below.
- 4.13 Subcontracts.** Subject to the terms and conditions of this Agreement, the Parties may subcontract to Affiliates and Third Parties, including CROs and CMOs, portions of the Programs to be performed. Any subcontractor shall be required to enter into appropriate agreements with respect to non-disclosure of Confidential Information and ownership of any intellectual property developed in the course of subcontracted activities, unless such subcontracting would not require the transfer of the other Party's Confidential Information to the Affiliate or Third Party subcontractor and there is no reasonable possibility of the creation of new intellectual property. Each Party shall remain liable to the other Party for any act or omission of its subcontractor.

5. **MANUFACTURING AND COMMERCIALIZATION.**

- 5.1 **Manufacturing Facility.** CureVac shall plan and carry out the completion of the installation and Regulatory Approval of the GMP-IV Manufacturing Facility, with two Drug Substance production lines each with a targeted scale up of five times compared to the current production process established at the GMP-III Manufacturing Facility and targeting a Drug Substance batch size of [\*\*\*\*\*] and the production of [\*\*\*\*\*] per year, at its own cost, due for completion by the Initiation of the [\*\*\*\*\*]. Furthermore, CureVac shall use Diligent Efforts to complete by the same date: (i) in-sourcing and process development of the Drug Product formulation process, including the LNP Technology; (ii) in-sourcing of the capability to produce DNA plasmids using the pDNA technology; and (iii) development of the supply chain for sourcing critical raw materials (the "**Manufacturing Facility Enhancements**"); provided that if the Parties agree in good faith that a CMO would be better suited to perform any of the activities under (i) and (ii), GSK shall relieve CureVac from its obligations with respect to (i) and/or (ii), as applicable, and provided further that the only and exclusive remedy in case of a breach by CureVac of its obligations to use Diligent Efforts to complete the Manufacturing Facility Enhancements under this Section 5.1 shall be that CureVac covers the costs for a bridging study in humans, if required solely as a result of such breach by CureVac, in the maximum amount of EUR 3,000,000. Subject to Section 5.2, up to once per quarter, GSK shall have the right to request and assess the plans proposed by CureVac regarding the foregoing and to monitor the progress, provided that, if and to the extent it is necessary for GSK to undertake an on-site visit for this purpose, GSK shall not be permitted to do so more than twice per Calendar Year. GSK may, where relevant and at its discretion, suggest appropriate improvements and provide additional support in connection with enhancement of the Manufacturing Process for Drug Product and the installation of the GMP-IV Manufacturing Facility, which CureVac may freely decide to implement or not. CureVac will reasonably consider to use the [\*\*\*\*\*] for the Manufacture of the Products; it being understood and agreed between the Parties that GSK may not request the disclosure of any Know-How or any technology transfer from CureVac with respect to the [\*\*\*\*\*] other than to the extent necessary for any Regulatory Filing for a Product.
- 5.2 **GSK Consultancy.** GSK's assessment and suggestions with respect to enhancements and capacity expansion of Manufacturing of Drug Product in the GMP Manufacturing Facility will be according to GSK's best understanding at that time of the applicable requirements, practice and quality standards. In no circumstances shall GSK be liable in case of a discrepancy between the plans assessed by GSK and applicable standards, or a competent Regulatory Authority's disagreement with the proposed plans or a recommendation provided by GSK, nor if CureVac fails to correctly implement the GSK recommendations. Any consultancy provided by GSK under Section 5.1 shall be limited to providing advice and guidance, but shall exclude any activities regarding the actual implementation of such advice or guidance, which shall be CureVac's sole responsibility.

- 5.2.1 **Clinical Supply.** All doses of Products required for use by GSK in accordance with this Agreement for the Development of Products (including for Clinical Studies) shall be Manufactured and supplied by CureVac or its Affiliates, as Drug Product filled in vials (without labelling and packaging or with labels agreed upon by GSK) for use in the Clinical Studies, whereby Drug Product must in each case be Manufactured by CureVac or its Affiliates at a GMP Manufacturing Facility and filling may be subcontracted to a CMO, each in accordance with GMP and Applicable Laws and the terms and conditions of one or more clinical supply agreement(s) and associated clinical Quality Agreement(s) to be negotiated and agreed between GSK and either or both CureVac, the CureVac Affiliate and/or CMO supplying the Products to GSK, no later than [\*\*\*\*\*] after the Closing Date, and in accordance with the terms and conditions set forth in **Exhibit 5.2.1(B)**. CureVac and its Affiliates will reserve the required capacity for the Manufacture of Products for clinical supply in its GMP Manufacturing Facilities in accordance with the forecasts given under the supply agreement(s).
- 5.2.2 **Commercial Supply.** On a Product-by-Product basis, upon the request of GSK, but in any case no later than the [\*\*\*\*\*] for the respective Product, GSK and CureVac, or the CureVac Affiliate supplying Drug Product to GSK, will negotiate and agree in good faith on a commercial supply agreement (each a "**Commercial Supply Agreement**") with respect to such Product (including a Quality Agreement) according to which CureVac or its Affiliates will Manufacture or have Manufactured for GSK, GSK's demand for bulk of Drug Product in accordance the terms and conditions set forth in **Exhibit 5.2.1(A)**. CureVac shall reserve, or shall procure that its Affiliates will reserve, [\*\*\*\*\*] of the annual batch capacity of the GMP-IV Manufacturing Facility for the Manufacture of bulk of Drug Product on behalf of GSK for supply in the Territory in accordance with the Commercial Supply Agreements.
- 5.2.3 **Manufacture by GSK.** Upon the request of GSK, CureVac shall transfer all Know-How comprised in the CureVac Manufacturing Technology ("**Manufacturing Technology Transfer Materials**") to GSK, an Affiliate of GSK or the Third Party CMO designated by GSK and approved by CureVac, as applicable, so that GSK itself, the Affiliate of GSK or the appointed Third Party CMO (approved by CureVac), as applicable, can take over the Manufacture for GSK. In the event of a technology transfer, the JSC shall establish a Manufacturing tech-transfer sub-committee, which shall oversee the Manufacturing technology transfer. GSK will compensate CureVac or, if applicable, its CMO, for such technology transfer provided by CureVac and/or its CMO FTE at the FTE Rate. CureVac's obligation to reserve [\*\*\*\*\*] of CureVac's GMP-IV Manufacturing Facility shall reduce proportionately, on a country-by-country basis, as GSK (or the appointed Third Party CMO) obtains Regulatory Approval for the Manufacture of the Products following completion of the Manufacturing technology transfer, provided that GSK shall in such case use Diligent Efforts to obtain such Regulatory Approval as soon as reasonably practicable, prioritizing the countries with the highest demand for Product, and provided further that CureVac's obligation to reserve capacity shall terminate in any event [\*\*\*\*\*] after the completion of the technology transfer. Any transfer of Know-How pursuant to this Section 5.2.3 shall be carried on the basis of a specific technology transfer plan determined in good faith by the Parties and reflected in a technology transfer addendum to this Agreement, detailing at least the following activities together with appropriate timelines: (i) the provision by CureVac of soft copies and, to the extent reasonably required by GSK, hard copies of all Manufacturing Technology Transfer Materials; (ii) the procurement by CureVac of the services of such qualified and experienced scientists, production and quality assurance personnel, engineers, and quality checking personnel as may be reasonably necessary to support the transfer of the Manufacturing Technology Transfer Materials; and (iii) the provision by CureVac to the personnel of GSK or its Affiliate with reasonable access to its facilities to observe the Manufacture at such times as the Parties may agree; provided such access shall be coordinated in a manner to minimize the disruption of CureVac's activities and CureVac may require any personnel of a Third Party with access to its facilities to sign a confidentiality agreement and to abide by the rules and guidelines applicable to the CureVac facility. Until the completion of the transfer of the Manufacturing Technology Transfer Materials, CureVac shall build and maintain a secure, readable, accessible and complete repository of the Manufacturing Technology Transfer Materials.

- 5.3 Commercialization of Products; Diligence.** Subject to the terms and conditions of this Agreement, GSK shall have the rights and the responsibility, and shall bear all costs associated with the Commercialization of Products in the Field in the GSK Territory. Unless terminated or replaced in accordance with this Agreement, GSK will use Diligent Efforts to Commercialize: (i) the First Product, (ii) the Second Product, (iii) each of the Initial Other Products, and (iv) each Replacement Product and each Optioned Product, as applicable, in each case of (i), (ii), (iii) and (iv) in the Field and in the Major Markets (other than Germany, unless waived by CureVac pursuant to Section 6.1) (subject to obtaining Regulatory Approval in the relevant Major Market). Without limiting the generality of the Diligent Efforts obligations under this Section 5.3, GSK shall:
- (i) on a Product-by- Product basis make the First Commercial Sale of a Product in a country as soon as reasonably practicable following the issuance of the Regulatory Approval for such Product in such country;
  - (ii) in addition to the royalty reports provided by GSK to CureVac under Section 8.7, beginning with the First Commercial Sale of the first Product in the Territory and continuing until expiry of the Royalty Term, provide CureVac, at least once annually by March 31 of each Calendar Year, with a confidential, non-binding sales forecast for that Calendar Year for discussion in the JSC (or the commercialization sub-committee, as applicable) of the estimated aggregate (x) sales of Products in the GSK Territory and (y) sales of Products in each Major Market, provided that GSK shall not be required to provide supporting materials in relation to such forecast.
- 5.4 CureVac Resources:** CureVac shall obtain and maintain sufficient facilities, personnel (with appropriate qualifications and experience), equipment, materials and other resources necessary to meet its obligations under this Section 5, in accordance with the timelines specified in and in accordance with this Section 5.
- 6. COMMERCIALIZATION OF PRODUCTS IN THE CUREVAC TERRITORY.**
- 6.1 Commercialization in CureVac Territory.** CureVac shall have the sole and exclusive right to Commercialize the Products in the Field in the CureVac Territory. On a Product-by-Product basis, until the execution of a Distribution Agreement between the Parties under Section 6.2 for a Product, CureVac shall have the right to waive its right to Commercialize such Product in the CureVac Territory by giving written notice to GSK. Upon receipt of such waiver notice by GSK, with respect to the respective Product, the CureVac Territory shall become part of the GSK Territory, and GSK shall have the right to Commercialize the Product in such extended GSK Territory, and the obligation to use Diligent Efforts to Commercialize the Product in Germany, subject to and in accordance with the terms and conditions of this Agreement.
- 6.2 Distribution Agreement.** On a Product-by-Product basis, upon request of CureVac, but no later than [\*\*\*\*\*] prior to the estimated First Commercial Sale of the respective Product in the Field in the CureVac Territory, the Parties shall negotiate and agree in good faith on a distribution agreement under which CureVac has the exclusive rights to Commercialize such Product in the Field in the CureVac Territory in accordance with the terms and conditions set forth in the key distribution terms in **Exhibit 6.2 ("Distribution Agreement")**. CureVac shall comply with all policies, practices, standards, guidelines, codes and requirements generally inferred by the GlaxoSmithKline group on distributors of its products in the CureVac Territory, which shall be further detailed in the Distribution Agreement and compliance with which shall be subject to audit by GSK as specified in the Distribution Agreement.

7. **GOVERNANCE.**

7.1 **Management.**

7.1.1 **Alliance Management.** Management of the collaborative alliance reflected in this Agreement will be under the responsibility of the individual designated in writing within [\*\*\*\*\*] of the Closing Date for CureVac ("CureVac Alliance Manager") and of the individual designated in writing within [\*\*\*\*\*] of the Closing Date for GSK ("GSK Alliance Manager", and together with the CureVac Alliance Manager, the "Alliance Managers"). Each Alliance Manager will be the primary point of contact for the other Party on all matters relating to the operation of this Agreement other than Program activities.

7.1.2 **Program Management.** On a R&D Plan-by-R&D Plan basis, the management of the activities under the Programs will be under the responsibility of the individual designated in writing within [\*\*\*\*\*] of the Closing Date for CureVac ("CureVac Project Leader") and of the individual designated in writing within [\*\*\*\*\*] of the Closing Date for GSK ("GSK Project Leader", and together with the CureVac Project Leader, the "Project Leaders"). Each Project Leader will be the primary point of contact for the other Party on all matters relating to the R&D Plan.

7.2 **Joint Steering Committee.**

7.2.1 **Establishment.** Within [\*\*\*\*\*] after the Closing Date the Parties will establish a joint steering committee ("Joint Steering Committee" or "JSC") to oversee the Development, Manufacture and Commercialization of the Products and to facilitate the exchange of information between the Parties. The JSC shall be comprised of two (2) representatives of CureVac and two (2) representatives of GSK, one representative being the Alliance Manager of the respective Party, in each case with appropriate scientific and technical expertise and sufficient seniority within the applicable Party consistent with the scope of the JSC's responsibilities. Each Party may replace its JSC representatives at any time upon written notice to the other Party, *provided, however*, that each Party shall use Diligent Efforts to ensure continuity on the JSC.

7.2.2 **JSC Meetings.** The JSC shall meet at least on a quarterly basis, or such other frequency as agreed by the Parties, by teleconference, videoconference or in person, provided that at least every [\*\*\*\*\*], or such other frequency as agreed by the Parties, the meeting shall be in person (which in-person meeting will be held at alternate facilities of each Party), unless agreed otherwise by the JSC representatives. The JSC will have a quorum if at least one (1) representative of each Party is present or participating. Each Party will be responsible for all of its own expenses of participating in the JSC meetings. The Parties will endeavor to schedule meetings of the JSC at least [\*\*\*\*\*] in advance. Each Party may call special meetings of the JSC with at least [\*\*\*\*\*] prior written notice, except in exigent circumstances, to resolve particular matters requested by such Party and within the decision-making responsibility of the JSC. Each Party may invite guest participants to certain items on the agenda of the meetings, with reasonable prior notice, in order to discuss special technical or commercial topics, provided that such guest participants shall be bound by confidentiality and non-use obligations consistent with the terms of this Agreement and shall not have a voting right in such meeting. The chair of the JSC will alternate each Calendar Year, with CureVac to chair the first year. The Party chairing the JSC shall prepare the meeting agenda with input from the other Party.

**7.2.3 JSC Minutes.** The Alliance Manager of the Party chairing the JSC shall record the minutes of each JSC meeting in writing. Such minutes shall be circulated to the other Party's Alliance Manager no later than [\*\*\*\*\*] following the meeting for review, comment and approval of the other Party. If no comments are received within [\*\*\*\*\*] of the receipt of the minutes by the other Party, unless otherwise agreed, they shall be deemed to be approved by the other Party. Furthermore, if the Parties are unable to reach agreement on the minutes within [\*\*\*\*\*] of the applicable meeting, the sections of the minutes that have been mutually agreed between the Parties by that date shall be deemed approved and, in addition, each Party shall record in the same document its own version of those sections of the minutes on which the Parties were not able to agree

**7.3 JSC Functions and Powers.** The JSC will be responsible generally for facilitating the Parties' interactions under this Agreement and specifically for overseeing the Development, Manufacture and Commercialization of the Products. The JSC has (i) no jurisdiction to make any amendments to this Agreement, which right is reserved to the Parties; and (ii) no jurisdiction over any dispute relating to the validity, performance, construction or interpretation of this Agreement. The principal functions of the JSC will include:

- (i) overseeing the Development of Products in accordance with the R&D Plans;
- (ii) reviewing and approving the R&D Plans in relation to a Product Adjustment, Replacement Product or an Optioned Product;
- (iii) updating the initial R&D Plans to include the further Development work and discussing and approving the annual Development budgets under the R&D Plans;
- (iv) the resolution and approval of any issue and recommendation from the Parties with respect to the modification of the R&D Plans, including but not limited to modifications of the budget and timelines;
- (v) receiving written reports or presentations from GSK and CureVac of their respective progress with the further Development of each Product summarizing their Development activities and the results thereof with respect to the applicable Product and discuss at meetings the status, progress, and results of the Development of the respective Product;
- (vi) exchanging Development Data and other technical information;

(vii) upon GSK's request, serving as a forum where CureVac shall inform GSK of new internal development programs covered by GSK's Exclusive Option;

(viii) creating sub-committees, including the IP Sub-Committee pursuant to Section 7.4, a Commercialization sub-committee for the coordination of Commercialization activities for Products by GSK in the GSK Territory and by CureVac in the CureVac Territory and a Manufacturing sub-committee for discussing Product-related and/or Product-related Manufacturing and supply;

(ix) serving as a forum where each Party shall inform the other Party of any material feedback received from Regulatory Authorities in relation to any Product;

(x) informing on material regulatory filings and regulatory interactions related to the Products;

(xi) fostering the collaborative relationship between the Parties;

(xii) resolving disputes between the Parties; and

(xiii) such other functions as agreed by the Parties.

If the JSC establishes a sub-committee in accordance with this Section 7.3, unless otherwise agreed, the governance provisions of this Section 7 shall apply accordingly to such sub-committee.

In line with the completion of the Programs, the Parties shall, within the JSC, in good faith evolve the composition and operation of the JSC to reflect the change in roles and responsibilities of the Parties in the further Development, Manufacturing and Commercialization of the Products.

#### **7.4 IP Sub-Committee.**

Within [\*\*\*\*\*] of the Closing Date the JSC shall establish an IP Sub-Committee comprising up to two patent attorneys of each Party. The IP Sub-Committee shall be the forum for discussion and liaison between the Parties concerning filings to be made for Program Patent Rights and Joint Patent Rights. For the avoidance of doubt, the IP Sub-Committee is not a decision-making forum, except (in the first instance) with respect to matters concerning the maintenance of the Program Patent Rights and Joint Patent Rights, and, in relation to the Program Patent Rights and Joint Patent Rights, the patent term extension strategy, patent litigation, patent defense and enforcement, but serves as a forum for discussion where the Parties may coordinate and consult with each other with respect to any such filings. The IP Sub-Committee shall in particular: (i) convene no less than once every [\*\*\*\*\*] to facilitate regular interaction regarding the intellectual property matters arising from this Agreement (or any Ancillary Agreement); (ii) exchange information necessary to keep the Parties reasonably informed of each other's prosecution of patents and trademarks that form part of the intellectual property rights licensed under this Agreement; (iii) review any Invention arising under a Program (including any Joint Product Invention and Joint Other Invention) and determine in good faith the ownership thereof, in accordance with this Agreement; (iv) coordinate intellectual property aspects of publications or presentation of Development Data, in accordance with Section 11.7; (v) cooperatively review and discuss potential material infringements by Third Parties as well as the potential infringement by either Party or its Affiliates of any intellectual property of a Third Party pursuant to Development, Manufacturing or Commercialization under this Agreement; and (vi) escalate any intellectual property-related issue on which the Parties are not in agreement to the JSC.

7.5 **JSC Decisions.**

7.5.1 **Initial Dispute Resolution.** Actions to be taken by the JSC and any subcommittee shall be taken only following a unanimous vote, with each Party's representatives collectively having one (1) vote. If any subcommittee fails to reach unanimous agreement on a matter before it for decision for a period in excess of [\*\*\*\*\*], the matter shall be referred to the JSC.

7.5.2 **Final Decision-Making.**

- a. If the JSC fails to reach unanimous agreement on a matter before it for decision for a period in excess of [\*\*\*\*\*], the matter may be referred by either Party to the Executive Officers, who shall meet in person or via teleconference within [\*\*\*\*\*] and attempt to resolve such matter in good faith.
- b. If the Executive Officers fail to reach agreement as to such matter for a period in excess of [\*\*\*\*\*] from their initial meeting, the final decision on such undecided matter shall be made by GSK in good faith with the following exceptions:
  - (i) GSK shall not unilaterally reduce its diligence obligations under this Agreement, make material amendments to an R&D Plan (including the budget and the number of FTEs agreed in the R&D Plan) which have an adverse impact on CureVac, adopt a decision that would cause significant delay of the Development timelines as set forth in an R&D Plan or would oblige CureVac to perform additional obligations under this Agreement or an R&D Plan;
  - (ii) without limiting any right of GSK at law, GSK shall not unilaterally decide on any matter concerning Joint Patent Rights, Joint Product Inventions or Joint Other Inventions, with the exception of decisions relating to (i) obtaining and maintaining supplementary protection certificates (ii) enforcement against Third Parties in the Territory within the Field in accordance with Section 10;
  - (iii) GSK shall not unilaterally decide any matter with respect to the CMC Development and, for so long as CureVac Manufactures a Product under this Agreement, Manufacture of that Product; and
  - (iv) GSK shall not unilaterally alter or amend the terms and conditions of this Agreement and shall have no jurisdiction over any dispute relating to the validity, performance, construction or interpretation of this Agreement.

- 7.6 **Information and results.** Except as otherwise provided in this Agreement, the Parties will make available and disclose to one another Development Data and other results of work conducted pursuant to each Program prior to and in preparation for the JSC meetings, by the deadline and in the level of detail, form and format to be designated by the JSC; *provided, however*, that, in any event, each Party shall to the extent reasonably possible provide the other Party with quarterly updates regarding its work pursuant to the Programs preferably [\*\*\*\*\*] prior to each JSC meeting.
8. **CONSIDERATION AND PAYMENTS.**
- 8.1 **Upfront Payment.** In partial consideration for the exclusive licenses granted to GSK under the CureVac Technology, GSK shall pay to CureVac a non-refundable and non-creditable fee in the amount of one hundred and twenty million Euro (EUR 120,000,000) within [\*\*\*\*\*] after GSK's receipt of an invoice of the respective amount from CureVac.
- 8.2 **GMP-IV Reservation Fee.** In consideration for the reservation of Manufacturing capacity in the GMP-IV Manufacturing Facility pursuant to Section 5.2.2, GSK shall pay to CureVac a non-refundable fee in the amount of thirty million Euro (EUR 30,000,000) upon [\*\*\*\*\*] ("GMP-IV Reservation Fee"). Such payment shall be made within [\*\*\*\*\*] after GSK's receipt of an invoice of the respective amount from CureVac. GSK may credit:
- (i) ten million Euro (EUR 10 million) against [\*\*\*\*\*],
  - (ii) ten million Euro (EUR 10 million) against [\*\*\*\*\*]; and
  - (iii) ten million Euro (EUR 10 million) against [\*\*\*\*\*].
- 8.3 **Development and Regulatory Milestone Payments.** In consideration for the exclusive licenses granted to GSK under the CureVac Technology, on a Product-by-Product basis, GSK shall pay to CureVac the one-time, non-refundable, non-creditable development milestone payments set forth in this Section 8.3 (each a "**Development & Regulatory Milestone Payment**") upon the first occurrence of the applicable milestone event with respect to any Product, provided that each such milestone payment shall be due only once for each Product (each a "**Development & Regulatory Milestone Event**"). On a Product-by-Product basis, if any one of the Development & Regulatory Milestone Events is not required for the Development of a Product, such Development & Regulatory Milestone Payment shall become payable upon achieving the Development & Regulatory Milestone Event following the Development & Regulatory Milestone Event which was not required, *i.e.*, upon the achievement of such following Development & Regulatory Milestone Event two Development & Regulatory Milestone Payments become payable hereunder.
- 8.3.1 **First Product.** The following Development & Regulatory Milestone Payments shall be made for the First Product:

Development & Regulatory Milestone Event	In EUR million
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

8.3.2 **Second Product and Other Products.** The following Development & Regulatory Milestone Payments shall be made for the Second Product and for each Other Product (including any Replacement Product and Optioned Product):

Development & Regulatory Milestone Event	In EUR million
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

8.4 **Sales Milestone Payments.** In consideration for the licenses granted to GSK under the CureVac Technology and the LNP Technology, on a Product-by- Product basis, GSK shall pay to CureVac each of the non-refundable, non-creditable milestone payments set forth in this Section 8.4 (each a "Sales Milestone Payment") for the Calendar Year in which aggregated annual Net Sales in the GSK Territory of all Products developed from the respective Product meet or exceed for the first time the thresholds set forth below (each a "Sales Milestone Payment").

8.4.1 **First Product.** The following Sales Milestone Payments shall be made for the First Product:

Sales Milestone Event	In EUR million
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

8.4.2 **Second Product and Other Products.** The following Sales Milestone Payments shall be made for the Second Product and for each of the Other Products (including any Replacement Product and Optioned Product):

Sales Milestone Event	In EUR million
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

8.5 **Obligation to Inform.** GSK shall notify CureVac on the occurrence of a milestone event under Sections 8.3 and 8.4 (other than the milestone events under the control of CureVac) as soon as possible but in any event within [\*\*\*\*\*] after becoming aware of the occurrence of the relevant milestone.

8.6 **Milestone Payment Terms.** Each milestone payment shall be due and payable within [\*\*\*\*\*] after the receipt of the respective invoice by GSK. Notwithstanding the foregoing, each Sales Milestone Payment shall be paid together with the royalty payments for the Calendar Quarter during which the respective milestone has been achieved.

8.7 **Royalties.**

8.7.1 **Royalty Rates.** As further consideration for the rights and licenses granted by CureVac to GSK to the CureVac Technology and the LNP Technology under this Agreement, GSK shall pay royalties to CureVac in the amounts set forth below:

(i) First Product. GSK shall pay to CureVac the following royalties on Net Sales in each Calendar Quarter in the GSK Territory of all Products developed from the First Product in the amounts set forth below:

Annual Net Sales of First Product	Royalty Rate
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

First Product shall include any Product with the same Antigen composition as Developed under the same Program, even if such Product is sold under a different label. For illustration purposes, if the First Product is approved in certain countries for an indication or use associated only with the Second Product, the Net Sales for such Product will still be Net Sales of the First Product.

(ii) Second Product. GSK shall pay to CureVac the following royalties on Net Sales in each Calendar Quarter in the GSK Territory of all Products developed from the Second Product in the amounts set forth below:

Annual Net Sales of Second Product	Royalty Rate
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

(iii) Other Products. On a Product-by-Product basis, for each Other Product (including any Replacement Product and Optioned Product), GSK shall pay to CureVac the following royalties on Net Sales in each Calendar Quarter in the GSK Territory of all Products developed from the respective Other Product in the amounts set forth below:

Aggregate annual Net Sales of all Products developed from an Other Product	Royalty Rate
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]
[*****]	[*****]

8.7.2 **Royalty Term.** On a country-by-country and Product-by-Product basis, GSK's royalty obligations as set forth in this Section 8.7 shall begin with the First Commercial Sale of such Product in such country, and shall expire upon the later to occur of:

- (i) the expiry of the last to expire Valid Claim of any Patent Rights Controlled by CureVac (whether alone or jointly with GSK or a Third Party) Covering such Product in such country;
- (i) the earlier of (A) expiry of Regulatory Exclusivity for such Product in such country and (B) twelve (12) years following the First Commercial Sale of such Product in such country; or
- (ii) ten (10) years following the First Commercial Sale of such Product in such country, provided that such Product incorporates CureVac Know-How or CureVac Know-How is required to Develop, Manufacture and/or Commercialize the Product in such country, and provided further that GSK's royalty obligations under this Section 8.7 with respect to a Product shall expire for all countries of the GSK Territory on the twentieth (20<sup>th</sup>) anniversary of the First Commercial Sale of such Product in the first country of the GSK Territory (the "**Royalty Term**").

8.7.3 **Know-How Reduction.** During the applicable Royalty Term and on a country-by-country and Product-by-Product basis, the royalty rate for a Product in a country shall be reduced by [\*\*\*\*\*] of the applicable rate determined pursuant to Section 8.7.1, if such Product is not or no longer Covered by a Valid Claim in such country.

- 8.7.4 Exhaustiveness.** Except as set forth otherwise in this Agreement, the Royalty shall be the exhaustive consideration for the maintenance by CureVac of the CureVac Technology, and CureVac shall be responsible for the payment of any royalties, fees, costs or expenses under the In-Licensing Agreements.
- 8.7.5 Third Party Offset.** Without limiting any other right or remedy of GSK under this Agreement, or any obligation of CureVac, on a country-by-country and Product-by-Product basis, if, during the Term, GSK or any of its Affiliates is required to obtain a license under certain Third Party Patent Rights to obtain freedom to operate with respect to the use or exploitation of any CureVac Elements for the Development, Manufacture and Commercialization of Products under this Agreement and to pay a royalty or other consideration under such license (including milestone payments or any payment in connection with the settlement of a patent infringement claim), then the Parties shall discuss obtaining an FTO license in accordance with Section 10.14. Royalties due to CureVac for the respective Product in the respective country(ies) Covered by the Third Party Patent Rights licensed by GSK to obtain at its discretion freedom to operate under this Section 8.7.5 shall, subject to Section 8.7.6, be reduced by: (i) [\*\*\*\*] of the reasonable amount payable by GSK to the Third Party for licenses required in respect of the Patent Right listed in **Exhibit 8.7.5** relevant to the Initial Products; and (ii) and [\*\*\*\*] of the amount payable by GSK to the Third Party for any other licenses. For the avoidance of doubt, chemically modified mRNA will not be used by CureVac under this Agreement, and CureVac will therefore not be responsible for, and will not bear any payments to Third Parties with respect to such chemically modified mRNA.
- 8.7.6 Cumulative Deductions.** Notwithstanding the above, any royalty reduction made pursuant to Section 8.7.3 and/or Section 8.7.5 shall in no event reduce the applicable royalty rate for the respective Finished Product in the respective country to less than [\*\*\*\*] of the amounts determined pursuant to Section 8.7.1.
- 8.7.7 Blended Royalties.** With respect to a potential step down in royalty rates to account for the expiry of certain Patent Rights, the Parties acknowledge and agree that the CureVac Technology and the LNP Technology licensed hereunder may justify royalty rates for sales of Products in the GSK Territory in different amounts, which rates could be applied separately to Products involving the exercise of CureVac Technology and the Licensed LNP (namely in a ratio of [\*\*\*\*]). Furthermore, the Parties acknowledge and agree that the CureVac Technology licensed under this Agreement may justify royalty rates and/or royalty terms of differing amounts for sales of Products in the GSK Territory, which rates could be applied separately to Products involving the exercise of CureVac Patent Rights in the GSK Territory and/or the incorporation of CureVac Know-How, and that if such royalties were calculated separately, royalties relating to the CureVac Patent Rights in the GSK Territory and royalties relating to the CureVac Know-How would last for different terms. For practicality reasons the Parties have agreed on a blended royalty rate. For clarity, this Section 8.7.7 solely explains the rationale behind the royalty rates agreed on by the Parties and does not modify any of the other provisions of this Agreement.

**8.7.8 Royalty Payments.** Within [\*\*\*\*\*] after the end of each Calendar Quarter in which any Net Sales occur, GSK shall calculate the royalty payments owed to CureVac and shall remit to CureVac the amount owed to CureVac. All royalty payments shall be computed by converting the Net Sales in each country in the GSK Territory into the currency of Euro, using the monthly exchange rates as customarily used by GSK. All costs and expenses shall be computed by converting the relevant costs and expenses into the currency of Euro, using the monthly exchange rates as customarily used by GSK.

**8.8 Reports.** Each royalty payment shall be accompanied by a written report describing the Net Sales of each Product sold by or on behalf of GSK, its Affiliates and Sublicensees during the applicable Calendar Quarter for each country in which sales of any Product occurred, specifying: (i) the gross sales (if available) and Net Sales in each country's currency, including an accounting of deductions taken in the calculation of Net Sales; (ii) the applicable exchange rate to convert from each country's currency to Euro; and (iii) the royalties payable in Euro. All costs and expenses invoiced by CureVac shall be accompanied by a detailed breakdown of those costs and expenses, together with the applicable exchange rate to convert from the currency in which the costs and expenses were incurred to Euro.

**8.9 Records and Audit.** Each Party and its Affiliates and/or its Sublicensees shall keep and maintain records of: (i) in the case of GSK, sales of the Product(s) so that the royalties payable and the royalty reports may be verified; and (ii) in the case of CureVac, all costs and expenses incurred by it which are reimbursable under this Agreement, so that the costs and expenses reimbursable may be verified, and, where applicable, decisions and communications relating to the operation of the clearance process as set out in Section 3.5.1 to the extent carried out by CureVac or its external counsel. Such records shall upon reasonable written notice be open to inspection during business hours for a [\*\*\*\*\*] period after the Calendar Quarter to which such records relate, but in any event not more than once per Calendar Year, by a nationally recognized independent certified public accountant selected by the auditing party and retained at the auditing party's expense. Said accountant shall have the right to audit the records kept pursuant to this Agreement for a period covering not more than [\*\*\*\*\*]. If said examination of records reveals any underpayment(s) or over payment(s) of any amounts payable, then the audited party shall promptly pay or credit the balance due to the auditing party, and if the underpayment(s) or overpayment(s) is/are more than [\*\*\*\*\*], then the audited party shall also bear the expenses of said accountant (and if no further payments are due, shall be refunded or paid by the audited at the request of the auditing party).

**8.10 Payment Terms.**

**8.10.1** All payments by GSK to CureVac shall be made by wire transfer payment in Euro and shall be remitted to the following bank account:

[\*\*\*\*\*]

Invoices shall be issued to GSK on a Program-by-Program basis. Electronic invoicing is GSK's preferred method for receiving invoices. [\*\*\*\*\*] is GSK's e-invoicing partner for submitting electronic invoices. The Parties shall collaborate to sign CureVac up to such platform to allow for electronic invoicing.

All invoices should include the following information: Invoice Date, Number and Amount; Sender's Address, and Phone Number; Purchase Order Number; Tax Identification Number; Agreement Reference No (if applicable).

- 8.10.2** If any sum payable by GSK under this Agreement is subject to a good faith dispute between GSK and CureVac: (i) GSK shall, pay to CureVac, by the due date, all amounts not disputed in good faith by GSK; (ii) GSK shall notify CureVac, within [\*\*\*\*\*] after the due date, of any disputed amounts and shall, as soon as reasonably practicable after it has provided that notification, describe in reasonable detail its reasons for disputing each amount; and (iii) the Parties shall seek to resolve the dispute in accordance with Section 16.5. When any dispute regarding the amounts payable under this Agreement is resolved, GSK shall pay any sum which is agreed or determined (in accordance with Section 16.5) to be payable by GSK within [\*\*\*\*\*] after the date of resolution of that dispute (or such other period as is agreed between the Parties or determined by arbitration pursuant to Section 16.5), plus interest thereon at the interest rate set forth in Section 8.10.3 from the time such payment was due.
- 8.10.3** Any undisputed payments not paid within [\*\*\*\*\*] after the due date under this Agreement shall bear interest at an annual rate of [\*\*\*\*\*] above the three-month-EURIBOR rate of the respective currency for the time period in which such amount is outstanding, as disclosed from time to time by the European Central Bank which applied on the due date. Calculation of interest will be made for the exact number of days in the interest period based on a year of 360 days (actual/360).
- 8.11 Taxes.**
- 8.11.1** Each Party shall be responsible for its own income taxes assessed by a tax or other authority except as otherwise set forth in this Agreement.
- 8.11.2** The Parties acknowledge and agree that it is their mutual objective and intent to optimize, to the extent feasible and in compliance with Applicable Laws, taxes payable with respect to their collaborative efforts under this Agreement and that they shall use reasonable efforts to cooperate and coordinate with each other to achieve such objective.
- 8.11.3** If any taxes are required to be withheld under Applicable Laws, from any payment to be made by GSK to CureVac under this Agreement, GSK shall (a) deduct such taxes from the payment to be made to CureVac, (b) timely pay the taxes to the proper taxing authority, and (c) send proof of payment to CureVac with an explanation of payment of such taxes within [\*\*\*\*\*] following such payment. For purposes of this Section 8.11.3, each Party shall provide the other with reasonably requested assistance which assistance includes provision of any tax forms and other information that may be reasonably necessary for GSK or CureVac not to withhold tax.

8.11.4 All payments due to the terms of this Agreement are expressed to be exclusive of VAT and Indirect Taxes. VAT and Indirect Taxes shall be added to the payments due to the terms if legally applicable.

9. **INTELLECTUAL PROPERTY.**

9.1 **Background Technology.** As between the Parties, all right, title and interest in and to all CureVac Patent Rights and CureVac Know-How Controlled by CureVac at the Effective Date or generated or acquired by or on behalf of CureVac during the Term outside the scope of this Agreement ("**CureVac Background Technology**") shall remain under the Control of CureVac; and all right, title and interest in and to all Patent Rights and Know-How Controlled by GSK at the Effective Date or generated or acquired by or on behalf of GSK during the Term outside the scope of this Agreement ("**GSK Background Technology**") shall remain under the Control of GSK. As between the Parties, each Party shall have the sole right, in its sole discretion and at its sole expense, to prosecute, maintain and defend Patent Rights within its Background Technology; *provided, however*, that CureVac shall consider in good faith the interests of GSK in the prosecution, maintenance and defense of the CureVac Patent Rights within CureVac Background Technology.

9.2 **Disclosure of Inventions.** During the Research Period, on a Product-by-Product basis, each Party shall as soon as reasonably practical disclose to the other Party (including representatives of the IP Sub-Committee), the discovery, making, conception, or reduction to practice of any Inventions. After the Research Period, each Party shall as soon as reasonably practical disclose to the other Party (including representatives of the IP Sub-Committee) if it is continued after the Research Period, or otherwise through the Alliance Manager, the making, conception, or reduction to practice of any Invention that may be owned in part or in whole by the other Party pursuant to this Section 9.

9.3 **Ownership of Inventions.** The Parties agree that all right, title and interest in any and all Inventions (including all Patent Rights resulting from such Inventions and all Know-How embodied in such Inventions) shall be owned as follows, and CureVac and GSK will notify each other and determine in good faith which of the below categories such Invention falls within:

9.3.1 **CureVac Inventions.** Subject to Section 9.3.3, CureVac shall own all right, title and interest in and to

- (i) all Inventions that are invented by or on behalf of CureVac or GSK (or jointly by CureVac and GSK) and improve the CureVac Background Technology (other than any intellectual property rights subsisting in a Product), the LNP Technology or the CureVac Elements, and cannot be practiced independently of such CureVac Background Technology, the LNP Technology or the CureVac Elements, as applicable, and such Inventions shall become part of the CureVac Background Technology or the LNP Technology, as applicable;
- (ii) subject to Section 9.3.1(i), all Inventions that are invented as part of the GSK consultancy under Section 5.1 or 5.2 by or on behalf of CureVac or GSK (or jointly by CureVac and GSK) as long as, and to the extent that, CureVac or its Affiliates Manufacture the Products, and are involved, used or exploited in the Manufacture of the Products and/or CMC Development Data;

(iv) subject to Section 9.3.2(i), all Inventions that are invented by or on behalf of CureVac, alone or in collaboration with a Third Party (each, a "**CureVac Invention**").

**9.3.2 GSK Inventions.** Subject to Section 9.3.3, GSK shall own all right, title and interest in and to

(i) all Inventions that are invented by or on behalf of GSK or CureVac (or jointly by GSK and CureVac) and improve the subject matter of any GSK Background Technology, and cannot be practiced independently of such GSK Background Technology, and such Inventions shall become part of the GSK Background Technology; and

(ii) subject to Sections 9.3.1(i), (ii) and (iii), all Inventions that are invented by or on behalf of GSK, alone or in collaboration with a Third Party (each, a "**GSK Invention**").

**9.3.3 Joint Product Inventions.** All Inventions that are invented by or on behalf of GSK and/or CureVac that are incorporated in any Product shall be jointly owned by the Parties (a "**Joint Product Invention**").

**9.3.4 Other Inventions.** With respect to all other Inventions that do not fall within the categories described in Sections 9.3.1, 9.3.2 or 9.3.3, each Party shall own the Inventions invented solely by or on behalf of such Party (and such other Inventions shall become part of the CureVac Inventions or the GSK Inventions, as applicable), and all Inventions jointly invented by or on behalf of the Parties shall be jointly owned by the Parties (each, a "**Joint Other Invention**").

**9.3.5 Cross-Licenses under Joint Other Inventions.** Except to the extent either Party is restricted by other terms of this Agreement, either Party may freely practice, exploit and license to Affiliates its interest in the Joint Other Inventions, and any resulting Joint Patent Rights and related Know-How, in connection with the use or exploitation of the respective Party's Background Technology and any consent or license from the other Party as may be required under Applicable Law for a Party to practice and exploit such Joint Other Inventions, Joint Patent Rights and related Know-How in connection with the use or exploitation of the respective Party's Background Technology shall hereby be given by the other Party. Without limiting the exclusive rights granted to CureVac pursuant to Section 15.4e, CureVac hereby grants to GSK, and GSK accepts, a perpetual, irrevocable, royalty-free, non-exclusive license to freely practice and exploit (including sublicensing to Affiliates, but not to Third Parties) all intellectual property rights owned by CureVac pursuant to Sections 9.3.1(ii) that are invented by or on behalf of GSK (or together with a Third Party), or jointly by CureVac and GSK.

**9.4 Assignment and transfer of Inventions.** To give effect to the ownership principles described in Section 9.3 each Party shall assign and transfer, and hereby assigns and transfers, to such other Party or such other Party's designee all or a [\*\*\*\*\*] share, as the case may be, of its present and future rights, interest and title to any such Invention that is to vest in the other Party pursuant to the ownership principles described in Section 9.3, and the other Party shall accept and hereby accepts such assignment and transfer ("**Assigned Invention**"). At the written instruction of the other Party, the transferring Party agrees to make or procure all such assignments from its employees, consultants and subcontractors as are necessary to give effect to the provisions of this Section 9.4 and to assist the transfer in every way reasonably required by the transferee (i) to obtain Patent Rights to such Assigned Invention in any and all countries for which Patent Rights are being sought; and (ii) to maintain and defend Patent Rights in all Assigned Inventions which have been or may be assigned as provided above. The transferring Party shall execute and deliver, and cause its employees, consultants and subcontractors to execute and deliver, all such documents, instruments and other papers and take all such other action which the transferee may reasonably request in order to give effect to the provisions of this Section 9.4.

9.5 **Cooperation.** Each Party represents and agrees that all its employee(s), contractor(s) and agent(s) will be obligated under a binding written agreement or otherwise to assign to such Party all Inventions discovered, created, conceived, developed or reduced to practice by such employee(s), contractor(s) or agent(s) in connection with this Agreement.

9.6 **Filing, Prosecution, Maintenance and Defense.**

9.6.1 **CureVac Program Patent Rights.** CureVac shall have the first right, but not the obligation, at its sole expense, to file, prosecute, maintain and defend the Patent Rights Covering a CureVac Invention (each, a "CureVac Program Patent Right") throughout the Territory. At the latest [\*\*\*\*\*] before filing, CureVac shall give GSK an opportunity to review and comment upon the text of any application with respect to any CureVac Program Patent Right, shall consult with GSK with respect thereto, shall not unreasonably refuse to address any of GSK's comments and supply GSK with a copy of the application as filed, together with notice of its filing date and serial number. CureVac shall keep GSK, through the IP Sub-Committee, reasonably informed of the status of the actual and prospective prosecution, maintenance and defense, including but not limited to any substantive communications with the competent patent offices that may affect the scope of such filings, and CureVac shall to the extent reasonably possible give GSK a timely, prior opportunity to review and comment upon any such substantive communication and shall consult with GSK with respect thereto, and shall not unreasonably refuse to address any of GSK's comments. Notwithstanding the above, prior to filing any application for a CureVac Invention that may disclose, in part or in full, a GSK Invention, a Joint Product Invention or Joint Other Invention, CureVac shall provide GSK with a copy of the draft application and provide GSK with at least [\*\*\*\*\*] to review and comment upon the text of such draft application. If GSK notifies CureVac within the above [\*\*\*\*\*] deadline that GSK has decided to file an application for a GSK Invention, Joint Product Invention or Joint Other Invention, the Parties shall coordinate the filing of the application for a CureVac Invention with the filing of GSK's application for such GSK Invention, Joint Product Invention or Joint Other Invention so that CureVac's application and GSK's application are filed on the same day or otherwise filed in a way that secures and protects each of the Parties' interest. For the avoidance of doubt, CureVac will not include a GSK Invention, Joint Product Invention or Joint Other Invention in a separate patent claim of a patent application to be filed by CureVac without GSK's prior written consent. CureVac shall promptly give notice to GSK of the grant, lapse, revocation, surrender or invalidation of any CureVac Program Patent Rights. CureVac shall as soon as reasonably practicable give notice to GSK of any final decision to not file patent applications claiming CureVac Program Patent Rights or to cease prosecution and/or maintenance and/or defense of CureVac Program Patent Rights on a country by country basis and, in such cases, shall permit GSK, in GSK's sole discretion, to file such patent applications or to continue prosecution or maintenance or defense of such CureVac Program Patent Rights (in which case thereafter they will be deemed a GSK Program Patent Right) at its own expense and in its own name.

- 9.6.2 GSK Program Patent Rights.** GSK shall have the sole right, but not the obligation, at its sole expense, to file, prosecute, maintain and defend the Patent Rights Covering a GSK Invention (each, a "**GSK Program Patent Right**") throughout the Territory in good faith consistent with its customary patent policy and its reasonable business judgment and shall consider in good faith the reasonable interests of CureVac in so doing. GSK shall keep CureVac, through the IP Sub-Committee, reasonably informed of the status of the actual and prospective prosecution, maintenance and defense, of all GSK Program Patent Rights. Notwithstanding the above, prior to filing any application for a GSK Invention that may disclose, in part or in full, a CureVac Invention, Joint Product Invention or Joint Other Invention, GSK shall provide CureVac with a copy of the draft application and provide CureVac with at least [\*\*\*\*] to review and comment upon the text of such draft application. If CureVac notifies GSK within the above [\*\*\*\*] deadline that CureVac decides to file an application for a CureVac Invention, the Parties shall coordinate the filing of the application for a GSK Invention with the filing of CureVac's application for such CureVac Invention so that CureVac's application and GSK's application are filed on the same day or otherwise filed in a way that secures and protects each of the Parties' interest. For the avoidance of doubt, GSK will not include a CureVac Invention, Joint Product Invention or Joint Other Invention in a separate patent claim of a patent application to be filed by GSK without CureVac's prior written consent. CureVac shall as soon as reasonably practicable give notice to GSK of any desire to cease prosecution and/or maintenance and/or defense of GSK Program Patent Rights on a country by country basis and, in such cases, shall permit CureVac, in CureVac's sole discretion, to continue prosecution or maintenance or defense of such GSK Program Patent Rights (in which case thereafter they will be deemed a CureVac Program Patent Right) at its own expense and in its own name.
- 9.7 Joint Patent Rights.** GSK shall have the first right, but not the obligation, to file, prosecute, maintain and defend Patent Rights relating to Joint Product Inventions or Joint Other Inventions ("**Joint Patent Rights**") throughout the Territory, at its sole expense, and GSK shall give timely notice to CureVac, and, if during the Research Period, with a copy to the IP Sub-Committee, of any final decision to not file patent applications claiming Joint Patent Rights or to cease prosecution and/or maintenance of Joint Patent Rights on a country-by-country basis and, in such cases, shall permit CureVac, in CureVac's sole discretion, to file such patent applications or to continue prosecution, maintenance or defense of such Joint Patent Rights at its own expense. At the latest [\*\*\*\*] before filing, the prosecuting Party shall give the non-prosecuting Party an opportunity to review and comment upon the text of any application with respect to such Joint Patent Right, shall consult with the non-prosecuting Party with respect thereto, shall not unreasonably refuse to address any of the non-prosecuting Party's comments and supply the non-prosecuting Party with a copy of the application as filed, together with notice of its filing date and serial number. The prosecuting Party shall keep the non-prosecuting Party reasonably informed of the status of the actual and prospective prosecution, and maintenance, including but not limited to any substantive communications with the competent patent offices that may affect the scope of such filings, and the prosecuting Party shall give the non-prosecuting Party a timely, prior opportunity to review and comment upon any such substantive communication and shall consult with such non-prosecuting Party with respect thereto, and shall not unreasonably refuse to address any of such non-prosecuting Party's comments.

- 9.8 Patent Term Extension and Supplementary Protection.** The IP Sub-Committee shall decide on any patent term extensions, including supplementary protection certificates and any other extensions, including pediatric extensions, for a Product that are now or become available in the future, wherever applicable, in order to secure the optimal protection for the Products available under Applicable Laws. The Party holding the marketing authorization for the Product Covered by any Patent Rights shall have the obligation for applying for any such extension or supplementary protection certificate, and such Party shall keep the other Party fully informed of its efforts to obtain such extension or supplementary protection certificate. The other Party shall provide prompt and reasonable assistance, as requested by the applying Party. GSK shall pay all expenses for obtaining and maintaining any extension or supplementary protection certificate in respect of a Product in the GSK Territory.
- 9.9 Development Data.** Except to the extent the Development Data enter the public domain pursuant to Section 11.7, the Development Data shall be treated as Confidential Information of the Party or Parties owning it. Each Party may use, and allow its Affiliates to use, the Development Data for the purpose of obtaining adequate protection and prosecution of their respective Know-How and Patent Rights, or as provided for otherwise in accordance with this Agreement, provided that in each case it provides the other Party with prior written notice of its intent to use the Development Data for such purpose. The other Party may, within a reasonable time following receipt of such notice, request the notifying Party to delay the use of the Development Data, in order to safeguard the protection and prosecution of other Know-How and Patent Rights. Following such request, the Parties shall cooperate in good faith to align the protection and prosecution of each Party's Know-How and Patent Rights. For the avoidance of doubt, the terms and conditions of this Article 9 shall govern the intellectual property rights of the Parties in the Development Data.
- 9.10 Challenges.** If GSK or any of its Affiliates (directly or indirectly, individually or in association with any other person or entity) intends to challenge the validity of the CureVac Patent Rights or the Patent Rights included in the LNP Technology, or supports a Third Party in the challenge of a CureVac Patent Right or a Patent Right included in the LNP Technology in such legal proceeding, it shall promptly, and in no event later than [\*\*\*\*\*] prior to initiating such challenge (or such shorter period as required due to a court's, patent office's or other filing deadline associated with the relevant triggering event giving rise to the challenge, but in any event not less than [\*\*\*\*\*] prior to initiating such challenge), notify CureVac hereof. If CureVac or any of its Affiliates (directly or indirectly, individually or in association with any other person or entity) intends to challenge the validity of the GSK Patent Rights in a legal proceeding, or supports a Third Party in the challenge of a GSK Patent Right in such legal proceeding, it shall promptly, and in no event later than [\*\*\*\*\*] prior to initiating such challenge (or such shorter period as required due to the court or other filing deadline associated with the relevant triggering event giving rise to the challenge, but in any event not less than [\*\*\*\*\*] prior to initiating such challenge), notify GSK thereof. The Parties, through the IP Sub-Committee, shall promptly discuss any such issue in good faith, including the grant of a freedom to operate license at terms to be negotiated, and, if they cannot find an agreement, escalate the issue to the Executive Officers. If the Executive Officers despite good faith negotiations cannot find a solution, and a CureVac Patent Right or Patent Right within the LNP Technology is not granted or is declared invalid upon a successful challenge by GSK or any of its Affiliates (either alone or with a Third Party), such CureVac Patent Right or Patent Right within the LNP Technology shall be deemed to have been granted or shall be deemed valid until the expiry of regular patent protection for such CureVac Patent Right that would have applied if such CureVac Patent Right or Patent Right within the LNP Technology had been granted or had not been successfully declared invalid for the purposes of Section 1.187 (Valid Claim) and Section 8.7.2 (Royalty Term).

**10. ENFORCEMENT AND DEFENSE.**

**10.1 Enforcement.**

**10.2 Notice.** Each Party shall promptly provide the other Party with written notice reasonably detailing any known or alleged infringement by a Third Party of any CureVac Patent Rights, GSK Patent Rights or Joint Patent Rights which competes with the Development, Manufacture or Commercialization of Products in the Territory (collectively "Third Party Infringement").

**10.3 GSK Rights.** Subject to Section 10.4, GSK shall have the primary right to determine and control a course of action designed to curtail a Third Party Infringement in the Field in the Territory at its own expense. GSK shall keep CureVac closely informed as to any legal courses of action it pursues pursuant to this Section 10.3, and the Parties shall consult with each other, and agree on strategic decisions and their implementation in connection with such action.

**10.4 CureVac Rights.** On a Product-by-Product basis, for as long as CureVac holds the exclusive right to Commercialize a Product in the CureVac Territory pursuant to Section 6, CureVac shall have the primary right to determine and control a course of action designed to curtail a Third Party Infringement in the Field in the CureVac Territory at its own expense. CureVac shall keep GSK closely informed as to any legal courses of action it pursues pursuant to this Section 10.3, and the Parties shall consult with each other, and agree on strategic decisions and their implementation in connection with such action.

- 10.5 Taking over.** If the Party having the primary right to enforce its rights against such Third Party Infringement pursuant to Sections 10.3 or 10.4, respectively, elects not to enforce its rights against such Third Party Infringement or not to further pursue the enforcement of its rights, such Party shall notify the other Party of such decision as soon as reasonably practicable and in any event within [\*\*\*\*\*] after receipt of the Third Party Infringement notice or after the decision not to further pursue the enforcement of its rights. If after the expiry of the [\*\*\*\*\*] period (or, if earlier, the date upon which the Party which has the primary right to enforce its rights against such Third Party Infringement provides written notice that it has decided not to or to no longer enforce its rights against such Third Party Infringement), the Party which has the primary right to enforce its rights against such Third Party Infringement has neither obtained a discontinuance of the Third Party Infringement, nor filed suit with regard to such Third Party Infringement, then the other Party shall have the right, but not the obligation, to take action or bring suit with respect to such Third Party Infringement at its own expense.
- 10.6 Collaboration.** If such course of action includes litigation, the enforcing Party shall notify the non-enforcing Party of the commencement of that litigation and shall have the right and standing to use and sue in the other Party's name. Notwithstanding the first sentence of this paragraph, irrespective of which Party brings an action with respect to a Third Party Infringement hereunder, (i) the Parties shall collaborate with respect to such action; (ii) the non-enforcing Party shall have the right, at its own expense, to be represented by independent counsel in any such litigation; and (iii) the Parties shall consult with each other regarding, and agree on strategic decisions and their implementation in connection with such action. Except as set forth otherwise herein, the Party bringing the action shall bear all costs and expenses of such action.
- 10.7 Recoveries.** Any recoveries obtained by either Party as a result of any proceeding with regard to a Third Party Infringement under this Section 10.1 shall be allocated as follows:
- (i) such recovery shall first be used to reimburse each Party for all reasonable costs incurred in connection with such proceeding;
  - (ii) such recovery shall then be used to compensate each Party for the respective damages suffered from the Third Party Infringement (in the case of damage suffered by CureVac, as calculated at the Royalty Rate), provided that in the event the remaining portion of the recovery is not sufficient to compensate each Party's damages, such compensation shall be shared on a pro-rata basis depending on the amount of the respective damages suffered; and
  - (iii) the remaining portion of such recovery, if any, shall be [\*\*\*\*\*] between CureVac and GSK.
- 10.8 Settlements.** Neither Party shall settle any claim or demand in any such litigation that materially negatively impacts the other Party's rights or interests under this Agreement without the prior written consent of the other Party, which consent shall not be unreasonably withheld or delayed. In addition to the foregoing, to the extent any action initiated by GSK involves any infringement of CureVac Patent Rights and/or Joint Patent Rights, as the case may be, and is reasonably likely to relate to CureVac's products and/or technologies other than a Product, GSK will consult with CureVac regarding issues relating to such CureVac Patent Rights, Joint Patent Rights, and/or CureVac's products and technologies, and the Parties will mutually agree on strategic litigation decisions regarding such issues.

- 10.9 Assistance.** The non-enforcing Party shall provide such assistance as the enforcing Party reasonably requests in connection with any action or suit hereunder to prevent or enjoin a Third Party Infringement at the enforcing Party's cost. At the request of the enforcing Party, the non-enforcing Party shall provide reasonable assistance to the enforcing Party, at the enforcing Party's expense, in connection with such enforcement, including by executing reasonably appropriate documents, and joining as a party to the action. The Parties agree that, irrespective of which Party brings the action or suit pursuant to this Section 10.1, the Parties will update each other as to the status of such actions through the IP Sub-Committee and the enforcing Party will not unreasonably reject comments from the other Party relating to the management of such litigation.
- 10.10 Defense.**
- 10.11 Notice.** If the Development, Manufacture or Commercialization of any Product in any country in accordance with this Agreement or other activity of either of the Parties pursuant to the Agreement is alleged by a Third Party to infringe a Third Party's Patent Right, the Party becoming aware of such allegation shall promptly notify the other Party.
- 10.12 Control.** CureVac has the first right, but not the obligation, to control any defense of any such claim involving an alleged infringement of Third Party rights by (i) the exploitation or use of the CureVac Technology, where such alleged infringement is allegedly not caused solely by the Development, Manufacturing or the Commercialization of one or more Products or (ii) CureVac's activities under this Agreement (including Development, Manufacturing or the Commercialization of one or more Products, and the Commercialization of Products in the CureVac Territory), at its own expense and by counsel of its own choice, and GSK may, at its own expense, choose to be represented with respect to any such claim by counsel of its own choice. GSK has the first right, but not the obligation, to control any defense of any such claim other than where CureVac has the first right to control the defense of a claim, at its own expense and by counsel of its own choice, and CureVac may, at its own expense, choose to be represented with respect to any such claim by counsel of its own choice.
- 10.13 Assistance.** Upon the defending Party's request and cost, the non-defending Party shall provide reasonable assistance to the defending Party with respect to a defense and/or shall join in any action if reasonably required by the defending Party in order to defend such claim or to assert all available defenses and claims, and shall reasonably cooperate with the defending Party. The defending Party shall not enter into a settlement that imposes a financial obligation upon the non-defending Party or which limits the scope or invalidates any Patent Right of the other Party without such Party's prior written consent, which consent shall not be unreasonably withheld or delayed, and in any settlement the defending Party shall always take into consideration the interest of the non-defending Party.

**10.14 FTO Licenses.** Without prejudice to other provisions of Section 13.4, and the rights and remedies of GSK thereunder, where a Party reasonably concludes that use or exploitation of: (i) in the case of GSK, any CureVac Elements; or (ii) in the case of CureVac, any mRNA technology or other technology used by or on behalf of GSK, its Affiliates or Sublicensees to Develop, Manufacture and/or Commercialize Products under this Agreement that is described in the Know-How, or within the scope of the specification of the Patents Rights, Controlled by GSK (excluding, for clarity any CureVac Know-How or CureVac Patent Rights), in each case for the Development, Manufacturing or Commercialization of Products, infringes Third Party rights and will require a freedom-to-operate license from such Third Party, the Parties will discuss the issue and the strategy for obtaining a sublicensable license in the IP Sub-Committee, with final endorsement by the JSC. Upon request of such Third Party or the other Party, the requested Party will consider in good faith whether and how it may support obtaining a freedom-to-operate license, *e.g.*, by granting a cross-license under its Background Technology to such Third Party. If the Third Party rights are reasonably expected to affect the Products as well as other products, and if they are necessary to obtain freedom to operate with respect to any CureVac Elements, CureVac shall reasonably consider obtaining such freedom-to-operate license, and that license, if sublicensable, will become an additional In-Licensing Agreement as set forth in Section 2.7.1 at no additional cost to and with no further consideration payable by GSK. If such license is obtained by GSK and required to obtain freedom-to-operate under CureVac Elements, as between the Parties, any costs shall be borne in accordance with Section 8.7.5. If such license is required to obtain freedom-to-operate with respect to a Product (but not under any CureVac Elements), the costs will be borne by GSK.

**11. CONFIDENTIALITY.**

**11.1 Obligation of Confidentiality.** As at and after the Effective Date, all Confidential Information disclosed, revealed or otherwise made available to one Party or its Affiliates ("Receiving Party") by or on behalf of the other Party ("Disclosing Party") under, or as a result of, this Agreement is made available to the Receiving Party solely to permit the Receiving Party to exercise its rights, and perform its obligations, under this Agreement. The Receiving Party shall not use any of the Disclosing Party's Confidential Information for any other purpose, and shall not disclose, reveal or otherwise make any of the Disclosing Party's Confidential Information available to any other person, firm, corporation or other entity, without the prior written authorization of the Disclosing Party, except as explicitly stated in this Section 11. Without limiting the foregoing no Receiving Party shall be permitted under this Agreement to share any Confidential Information supplied by a Disclosing Party with (i) any Third Party (or such Third Party's Affiliates) that becomes an Affiliate of that Receiving Party solely as a result of a Change of Control in that Receiving Party or (ii) in the case of CureVac, any Third Party sublicensee under the CureVac Technology (including those identified in item (iii) of the Disclosure Letter).

**11.2 Additional Obligations.**

**11.2.1 Appropriate Safeguards.** In furtherance of the Receiving Party's obligations under Section 11.1 hereof, the Receiving Party shall take all reasonable steps, and shall implement all appropriate and reasonable safeguards, to seek to prevent the unauthorized use or disclosure of any of the Disclosing Party's Confidential Information. The Parties will jointly agree a protocol with information security measures to be implemented to safeguard secured exchange of Confidential Information and personal information, within [\*\*\*\*\*] following the Closing Date.

**11.2.2 Unauthorized Use or Disclosure.** The Receiving Party shall furnish the Disclosing Party with written notice immediately of it becoming aware and indicating details of any unauthorized use or disclosure of any of the Disclosing Party's Confidential Information by any employee, officer, director, consultant, CRO, CMO, contractors, agent(s), consultant(s), and Sublicensees, or Financial Partner of the Receiving Party, and shall take all actions reasonably required in order to prevent any further unauthorized use or disclosure of the Disclosing Party's Confidential Information. Notwithstanding the foregoing, the Receiving Party remains responsible and liable for any unauthorized use by any employee, officer, director, consultant, CRO, CMO, contractors, agent(s), consultant(s), and Sublicensees, or Financial Partner of the Receiving Party.

**11.3 Limitations.** The Receiving Party's obligations under Sections 11.1 shall not apply to the extent that the Receiving Party can demonstrate by competent written evidence that any of the Disclosing Party's Confidential Information:

- (i) is known by the Receiving Party at the time of its receipt, and not through a prior disclosure by or on behalf of the Disclosing Party;
- (ii) is in the public domain by use and/or publication before its receipt from the Disclosing Party, or thereafter enters the public domain through no fault of the Receiving Party;
- (iii) is subsequently disclosed to the Receiving Party by a Third Party who may lawfully do so and is not under an obligation of confidentiality regarding the Confidential Information; or
- (iv) is developed by the Receiving Party independently of Confidential Information or material received from the Disclosing Party.

**11.4 Authorized Disclosures.**

**11.4.1 Necessary Disclosures.** Each Party may disclose the other Party's Confidential Information as expressly permitted by this Agreement or if and to the extent such disclosure is reasonably necessary in the following instances:

- (i) disclosure to judicial, governmental or other regulatory agencies or authorities in connection with the filing, prosecution, maintenance and defense of Patent Rights as permitted by this Agreement;
- (ii) disclosure to judicial, governmental or other regulatory agencies or authorities to gain or maintain approval, authorizations or the like to Develop, Manufacture or Commercialize a given Product that such Party has a license or right to Develop, Manufacture or Commercialize hereunder in a given country or jurisdiction;

(iii) prosecuting or defending litigation as permitted by this Agreement;

(iv) disclosure to its and its Affiliates' employees, officers, directors, consultants, CROs, CMOs, contractors, agent(s), consultant(s), to Sublicensees (in the case of GSK) or permitted sublicensees (in the case of CureVac) or the LNP Provider, in each case on a need-to-know basis for the purposes as expressly authorized and contemplated by this Agreement, including for the Development, Manufacturing and/or Commercialization of the Products (or for such entities to determine their interest in performing such activities) in accordance with this Agreement, on the condition that such Affiliates or Third Parties agree to be bound by confidentiality and non-use obligations that substantially are no less stringent than those confidentiality and non-use provisions contained in this Agreement;

(v) disclosure to such Party's attorneys, independent accountants or financial advisors for the sole purpose of enabling such attorneys, independent accountants or financial advisors to provide advice to the Receiving Party, on the condition that such attorneys, independent accountants and financial advisors agree to be bound by the confidentiality and non-use obligations contained in this Agreement; or

(vi) disclosure to any bona fide potential or actual investor, insurer, acquirer, merger partner, Sublicensee (in the case of GSK), or permitted sublicensees (in the case of CureVac) or other bona fide potential or actual financial partner or funding source ("**Financial Partner**") solely for the purpose of evaluating or carrying out an actual or potential investment, acquisition, license or collaboration, and to any related persons directly connected with such activity being contemplated with the Financial Partner, such as an advisory firm or investment bank; provided that in connection with such disclosure, the Disclosing Party shall notify each disclosee of the confidential nature of such Confidential Information and disclosure shall be subject to the agreement of each disclosee to be bound by confidentiality and non-use obligations that substantially are no less stringent than those confidentiality and non-use provisions contained in this Agreement.

**11.4.2 Required Disclosures.** If a Party is required by judicial, governmental or administrative process, including to comply with Applicable Laws (including stock exchange rules) or pursuant to Section 11.4.1 to disclose Confidential Information that is subject to the non-disclosure provisions of Section 11.1, such Party shall to the extent reasonably possible provide the other Party with reasonable advance notice of the disclosure that is being sought in order to provide the other Party an opportunity to challenge or limit the disclosure obligations. Confidential Information that is disclosed by judicial, governmental or administrative process shall remain otherwise subject to the confidentiality and non-use provisions of this Section 11, and the Party disclosing Confidential Information pursuant to judicial, governmental or administrative process shall take all steps reasonably necessary, including to seek an order of confidentiality, to ensure the continued confidential treatment of such Confidential Information.

- 11.5 Survival.** All of the Receiving Party's obligations under this Section 11 hereof, with respect to the protection of the Disclosing Party's Confidential Information, shall for a period of [\*\*\*\*\*] survive the expiry or termination of this Agreement for any reason whatsoever.
- 11.6 Public Announcements, Press Releases.** The Parties shall issue a press release in the form attached hereto as Exhibit 11.6 at an agreed time promptly after the Closing Date. Thereafter, except as otherwise expressly permitted in this Agreement, and except as may be required by Applicable Law, including the listing standards or agreements of any national or international securities exchange, neither Party shall issue any press release or public statement disclosing information relating to this Agreement or the transactions contemplated hereby or the terms hereof without the prior written consent of the other Party, not to be unreasonably withheld, conditioned, or delayed. Each Party may repeat any information relating to this Agreement that has already been publicly disclosed in accordance with this Section 11.6, provided such information continues as of such time to be accurate.
- 11.7 Publication of Development Data.** The Parties acknowledge the merit of publishing Development Data regarding the Products (other than CMC Development data) in searchable, peer-reviewed scientific literature in accordance with international scientific publishing practices and standards (including regarding the recognition of contribution and authorship). Either Party may request the other Party to discuss and determine in good faith a joint publication strategy for the Development Data regarding the Products, which shall be effective upon endorsement by the IP Sub-Committee and the respective Alliance Managers. As between the Parties, the Party by whom or on whose behalf the experiment or study generating such Development Data has been conducted, shall be responsible for the publication of such Development Data, unless defined otherwise in a joint publication strategy. Any intended publication of Development Data regarding a Product (including presentations to Third Parties or publication in intellectual property filings) shall be notified to the IP Sub-Committee by the relevant Party as soon as reasonably practicable and in any event at least [\*\*\*\*\*] before the final decision to publish, to allow the other Party to review and comment on the publication. The other Party may demand that the publication of the proposed presentation or publication is delayed for a period of [\*\*\*\*\*] in order to assess whether the Development Data intended to be published is patentable. If the other Party decides to pursue patent protection, it may request the publishing Party to further delay the publication of the proposed presentation or publication for a time not exceeding [\*\*\*\*\*] from the date of the publishing Party's notification, to enable adequate protection and prosecution of Patent Rights by either Party or their Affiliates.

With respect to any agreements between a Party and Third Parties (including clinical investigators) that a Party enters into after the Closing Date relating to the Development of any Product or otherwise relating to Development activities under this Agreement, such Party shall use reasonable efforts to include publication provisions regarding results of the experiments and studies for such Products that allow such Party to receive and provide a copy of any proposed publications or public presentations to the other Party, which such Party shall submit to the other Party with a reasonable amount of time for review as described in this Section 11.7.

Subject to the above review, a Party shall have the right as required by Applicable Law or its policies and standard operating procedures to (a) publish protocol summaries, results summaries, protocols, clinical study reports, plain language summaries and other study documents of all Clinical Studies conducted by or on behalf of such Party during the Term of this Agreement in any clinical trial register, including any of its own clinical trial registers; (b) publicly disclose results from other Clinical Studies where that Party determines that the results are scientifically important or relevant for patient care; and (c) make any other public disclosures of clinical Development Data that become required by GSK or CureVac due to Applicable Laws.

## 12. COMPLIANCE, QUALITY, INTEGRITY

12.1 **Legal Compliance.** Each Party shall procure that it and its personnel performs this Agreement in accordance with Applicable Laws.

12.2 **GxP.** GSK and CureVac shall undertake the Development activities regarding the Products, in compliance with GxP. With regard to any Clinical Studies conducted by CureVac under this Agreement, GSK may require CureVac to comply with the policies and standards of the GSK regarding the human subject research conducted to its benefit, and shall in this respect allow GSK, at its request, to review and approve at least the protocol and informed consent forms associated with such Clinical Studies.

12.3 **Data Integrity.** GSK and CureVac shall carry out their respective Development activities under this Agreement, and collect and record any data generated therefrom, in a manner consistent with the following good data management practices: (i) Development Data shall be generated using sound scientific techniques and processes; (ii) Development Data shall be analyzed appropriately, without bias and in accordance with good scientific practices; and (iii) Development Data shall be accurately recorded in accordance with good scientific practices by the individuals performing the research and in accordance with the ALCOA CCEA data integrity principles: (A) Attributable: data are traceable to the originator, (person and/or a computerized system, a device, an instrument), including any changes made to data, i.e. who performed an action and when, so that key decisions made during the conduct of the research, presentations made about the research and conclusions reached in respect of the research can be easily demonstrated and reconstructed; (B) Legible: data are readable and understandable; (C) Contemporaneous: data are recorded at the time they are generated or observed as per regulatory requirements; or in absence of regulatory requirements, local business practices; (D) Original (true copy): data as the file or format in which it was first generated, e.g. first paper record of manual observation, or electronic raw data file from a computerized system as per regulatory requirements; or in absence of regulatory requirements, local business practices; (E) Accurate: data, including error corrections and edits, are correct, truthful and to the appropriate precision; (F) Complete: all expected elements of the data are present (i.e., no unexplained gaps in the data) and the full meaning and context is preserved with the data; (G) Consistent: all elements of the record follow in the expected sequence; (H) Enduring: data are recorded in a permanent medium (paper or electronic) and continue to be retained in a human readable format for as long as specified in applicable record retention requirements; and (I) Available: data are maintained securely in such a way that they are accessible and retrievable in reasonable times ("**Good Data Management Practices**"). Each Party shall maintain written policies and standards related to Good Data Management Practices and shall ensure appropriate, documented training of its relevant personnel with respect to Good Data Management Practices.

- 12.4 Human Biological Samples.** If the Parties wish to source Human Biological Samples on each other's behalf or exchange Human Biological Samples between them, such exchange shall be recorded in separate addendums to this Agreement setting forth further terms and conditions for the specific purpose. GSK and CureVac undertake that the Human Biological Samples used or collected in connection with the Development have been obtained and will be stored, transferred, used and disposed of in accordance with all Applicable Laws and any generally accepted ethical guidelines regarding the collection, use, transport and disposal of human tissue, including with regard to consents from patients, volunteers and other donors.
- 12.5 Privacy; Information Security.** The Parties shall comply with Data Protection Laws (as defined in Exhibit 12.5), including those concerning medical confidentiality and privacy in relation to human subjects of the Development activities regarding the Products. The Parties acknowledge that they do not intend that one Party processes personal information for and on behalf of the other Party. If personal information is transferred between the Parties (as between controllers) pursuant to the performance of this Agreement or any Ancillary Agreement, the Parties shall comply with Exhibit 12.5, which may be amended from time to time by the Parties as is required by Applicable Laws. The Parties will enter into further data protection agreements if required by Applicable Laws.
- 12.6 Ethical Care of Animals.** The Parties shall comply with all Applicable Laws for the care, welfare and ethical treatment of animals in the country where animal testing or animal research is performed. The Parties shall implement the "3Rs" Principles – reducing the number of animals used, replacing animal with non-animal methods whenever possible and refining the research techniques used. All work shall be performed in adherence to the core principles for animals identified below. Local customs, norms, practices or laws may be additive to the core principles, but each Party agrees to comply and shall procure and ensure that those acting for or on behalf of such Party (including its subcontractors) comply, as a minimum, with these core principles: (i) access to species appropriate food and water; (ii) access to species specific housing, including species appropriate temperature and humidity levels; (iii) provision of humane care and a program of veterinary care through guidance of a veterinarian; (iv) animal housing that minimizes the development of abnormal behaviors; (v) adherence to principles of replacement, refinement and reduction in the design of in vivo or ex vivo studies with processes to optimize animal use and to ensure effective population management; (vi) supported by a relevant scientific justification/rationale, approved by an institutional ethical review process and subjected to independent scientific review; (vii) commitment to minimizing pain and distress during in vivo and ex vivo studies; and (viii) work is performed by personnel documented as trained and competent to conduct the procedures for which they are responsible. Each Party agrees that all protocols involving animal research or animal testing for in connection with the Products shall undergo an ethical review, whether or not required by Applicable Law, and that written documentation confirming ethical review shall be maintained by such Party until [\*\*\*\*\*] after the completion of the experiment or test, demonstrating that the review was completed. If a Party is currently accredited by AAALACi, such Party agrees to make commercially reasonable efforts to maintain its AAALACi accreditation during the life of this Agreement. Each Party shall have procedures in place to assess and approve its external suppliers and distributors who supply animals to it to: (i) ascertain and confirm the quality of the animals supplied; (ii) ensure legal requirements for the care and welfare of animals are met; and (iii) ensure that only purpose bred animals are used to perform the animal testing or research. The distance of suppliers from the test facility shall be minimized (where practicable) and transport processes (e.g. stocking densities, carrying crates, food and water) shall ensure minimum stress. On arrival, each Party shall ensure checks are in place to confirm only healthy animals are used. Each Party shall document the approval of its animal suppliers and distributors, which documentation shall be made available to the other Party upon request. GSK shall have the right, but not the obligation, to approve any supplier of non-human primates or other animals, which right may be invoked upon notice to CureVac.

- 12.7 **Environment, Health and Safety.** CureVac shall: (i) maintain an "EHS" (environment, health and safety) policy and risk-based management system with a commitment to provide a safe and healthy workplace and protect the environment surrounding its operations; (ii) ensure there is at least one senior executive with responsibility for EHS and the organization has access to technical expertise to support the company in meeting EHS obligations; (iii) provide relevant information, education and training to workers on the hazards, risks and controls associated with their job; (iv) provide the physical infrastructure, workplace and engineering controls necessary to ensure safe storage, handling and processing of materials and waste in order to protect people, the environment and local communities from harm; and (v) provide and maintain emergency detection systems and an effective response and healthcare capabilities.
- 12.8 **Sanctions and export controls.** The Parties represent and warrant that they are aware of, and undertake in carrying out their obligations under this Agreement and the agreements referred to within this Agreement that they will not violate and prevent becoming exposed to penalties under, all sanctions, export control, and anti-boycott laws, regulations, orders, directives, designations, licenses, and decisions of the European Union, the United Kingdom, the United States of America, and of any other country with jurisdiction over activities undertaken in connection with this Agreement, if applicable ("**Sanctions & Trade Controls**"). Each Party undertakes that, at all times, in the performance of their obligations under this Agreement and the agreements referred to within this Agreement, they will not take any action that causes the other Party to violate or otherwise become exposed to penalties under any Sanctions & Trade Controls. Neither Party shall be required to take or refrain from taking any action, nor shall it be required to furnish any information, that would be prohibited under any Sanctions & Trade Controls (as defined above).

- 12.9 Anti-bribery and corruption.** The Parties shall comply fully at all times with all Applicable Laws, including but not limited to anti-corruption laws, and represents and warrants that it has not, and covenants that it will not, in connection with the performance of this Agreement, directly or indirectly, make, promise, authorize, ratify or offer to make, or take any act in furtherance of any payment or transfer of anything of value for the purpose of influencing, inducing or rewarding any act, omission or decision to secure an improper advantage; or improperly assisting in obtaining or retaining business, or in any way with the purpose or effect of public or commercial bribery, and warrants that it has taken reasonable measures to prevent subcontractors, agents or any other third parties, subject to its control or determining influence, from doing so. For the avoidance of doubt this includes facilitating payments, which are unofficial, improper, small payments or gifts offered or made to Government Officials to secure or expedite a routine or necessary action to which a Party is legally entitled. Either Party shall be entitled to terminate this Agreement immediately on written notice to the other Party, if the other Party fails to perform its obligations in accordance with this Section 12.9. A Party shall have no claim against the other Party for compensation for any loss of whatever nature by virtue of the termination of this Agreement in accordance with this Section 12.9. Either Party shall inform the other Party in writing, if, during the course of this Agreement, it is convicted of or pleads guilty to a criminal offence involving fraud or corruption, or becomes the subject of any government investigation for such offenses, or is listed by any government agency as debarred, suspended, proposed for suspension or debarment, or otherwise ineligible for government programs. Either Party shall ensure that all transactions under the Agreement are properly and accurately recorded in all material respects on its books and records and each document upon which entries such books and records are based is complete and accurate in all material respects. Either Party must maintain a system of internal accounting controls reasonably designed to ensure that it maintains no off-the-books accounts.
- 12.10 Changes to Compliance Framework.** At any time during the term of this Agreement, either Party may suggest reasonable amendments to this Section 12 and the clauses of this Agreement referencing this Section 12, or any provision of any Ancillary Agreement concerning compliance, quality, safety or integrity, where such Party reasonably believes such changes are required to ensure compliance with Applicable Laws, or such Party's interpretation of Applicable Laws as reflected in the values, quality, integrity, safety or compliance framework of the group to which that Party belongs. The other Party shall not unreasonably refuse or delay its agreement to such amendments. In case of any conflict between the Parties' interpretation of frameworks, the more stringent interpretation or framework shall be reflected in the amendment.
- 12.11 Breaches.** Each Party shall promptly notify the other Party of any significant deficiencies impacting the performance of this Agreement having regard to its compliance with this Section 12 and any corrective actions taken.

**12.12 Audit.** GSK or its nominee shall have the right to enter the CureVac's manufacturing facilities and any of CureVac's other offices, facilities, records and information systems to carry out an audit to verify and monitor CureVac's compliance with Section 12 [\*\*\*\*\*] per Calendar Year, save any For Cause audits. The scope of the audit may include, but need not be limited to, a tour of the facility, the opportunity to view relevant standard operating procedures (SOPs), training records, building management records, animal health records, ethical review documents, and any other documents reasonably necessary to assess compliance by CureVac. The duration of the inspection shall be at the sole reasonable discretion of GSK. Audits conducted under this Section 12.12 shall require reasonable prior notice of at least [\*\*\*\*\*], except in case of For Cause audits (as defined below), in which case such limitation a prior notice of [\*\*\*\*\*] shall suffice. Audits conducted under this Section 12.12 shall be scheduled in such a manner so as not to impact the production schedule or CureVac's normal business activities and shall be conducted during regular business hours. For the purposes of this Section 12.12, a "For Cause" audit shall be an audit conducted based on a substantiated suspicion by GSK of a material lack of compliance with Section 12, in respect of which GSK has shared with CureVac documentation substantiating its suspicion prior to the audit. Persons conducting the on-site audits shall be required to comply with reasonable CureVac rules applicable to the site and GSK shall ensure that any person involved in any audit (including a document-only inspection) shall be bound by an obligation of confidentiality. CureVac shall use commercially reasonable efforts to ensure that the same audit rights for GSK as described in this Section 12.12 apply with respect to the premises of any subcontractors authorized in accordance with this Agreement.

**13. INDEMNIFICATION AND REPRESENTATIONS AND WARRANTIES.**

**13.1 Indemnification by GSK.** GSK will defend, indemnify and hold CureVac and its Affiliates and their directors, officers, employees, consultants, agents, permitted sublicensees and contractors (the "**CureVac Indemnified Parties**") harmless from and against any and all losses, liabilities, claims, suits, proceedings, expenses, fees, recoveries and damages, including reasonable and demonstrable legal expenses and costs including attorneys' fees, resulting or arising out of any claim by any Third Party resulting or arising from (i) the negligence or willful misconduct of GSK, any of its Affiliates or Sublicensees, or any of their respective directors, officers, employees, agents or contractors; (ii) the Development, Manufacturing and/or Commercialization of the Products by or on behalf of GSK (other than as conducted by CureVac), any of its Affiliates or any of their respective Sublicensees or (iii) any breach of this Agreement by GSK, any of its Affiliates or any of their Sublicensees; except, in each case, to the extent caused by the negligence or willful misconduct of any of the CureVac Indemnified Parties.

**13.2 Indemnification by CureVac.** CureVac will defend, indemnify and hold GSK and its Affiliates and their directors, officers, employees, consultants, agents, Sublicensees and contractors (the "**GSK Indemnified Parties**") harmless from and against any and all losses, liabilities, claims, suits, proceedings, expenses, fees, recoveries and damages, including reasonable and demonstrable legal expenses and costs including attorneys' fees, resulting or arising out of any claim by any Third Party resulting or arising from (i) the negligence or willful misconduct of CureVac, any of its Affiliates, or any of their respective directors, officers, employees, consultants, agents or contractors (including an approved subcontractor or approved CMO); or (ii) the Development, Manufacture and/or Commercialization of any of the Products, if any, by or on behalf of CureVac (other than as conducted by GSK), any of its Affiliates, or their approved subcontractors or approved other CMOs; or (iii) any breach of this Agreement by CureVac, or any of its Affiliates; except, in each case, to the extent caused by the negligence or willful misconduct of any of the GSK Indemnified Parties.

**13.3 Indemnification Procedures.** The indemnified Party will give the indemnifying Party prompt notice of any such claim or lawsuit. Such notice shall include a reasonable identification of the alleged facts giving rise to such claim for indemnification. The failure to deliver written notice to the indemnifying Party within a reasonable time after the commencement of any action with respect to a claim shall only relieve the indemnifying Party of its indemnification obligations if and to the extent the indemnifying Party is actually and materially prejudiced thereby. The indemnifying Party shall notify the indemnified Party of its intentions as to the defense of the claim in writing within [\*\*\*\*\*] after the indemnifying Party's receipt of notice of the claim from the indemnified Party. If the indemnifying Party assumes defense of the claim, the indemnified Party may participate in, but not control, the defense of such claim using attorneys of its choice and at its sole cost and expense (i.e., with such cost and expense not being covered by the indemnifying Party). The indemnified Party shall reasonably cooperate with the indemnifying Party in its defense of the claim at the indemnifying Party's reasonable, pre-approved expense. The indemnifying Party will have the right to compromise, settle or defend any such claim or lawsuit; provided that (i) no offer of settlement, settlement or compromise by the indemnifying Party shall be binding on the indemnified Party without its prior written consent, not to be unreasonably withheld, conditioned or delayed, unless such settlement fully releases the indemnified Party without any liability, loss, cost or obligation incurred by the indemnified Party and in no event shall any settlement or compromise admit or concede that any aspect of any Patent Right owned or Controlled by the indemnified Party is invalid or unenforceable or adversely affect the scope of any Patent Right owned or Controlled by the indemnified Party; and (ii) the indemnifying Party shall not have authority to admit any wrongdoing or misconduct on the part of the indemnified Party except with the indemnified Party's prior written consent. If the indemnifying Party does not agree to assume the defense of the claim asserted against the indemnified Party (or does not give notice that it is assuming such defense), or if the indemnifying Party assumes the defense of the claim in accordance with this Section 13.3, but yet fails to defend or take other reasonable, timely action, in response to such claim asserted against the indemnified Party, the indemnified Party shall have the right to defend or take other reasonable action to defend its interests in such proceedings, and shall have the right to litigate, settle or otherwise dispose of any such claim; *provided, however*, that no Party shall have the right to settle a claim in a manner that would adversely affect the rights granted to the other Party hereunder, or would materially conflict with this Agreement, without the prior written consent of the Party entitled to control the defense of such claim, which consent shall not be unreasonably withheld, delayed or conditioned.

**13.4 CureVac Representations and Warranties.** Subject to the disclosures in the attached **Exhibit 13.4 ("Disclosure Letter")** CureVac represents and warrants to GSK as at the Effective Date, that:

- (i) it is the sole and exclusive owner of the Patent Rights listed in Exhibit 1.47 or otherwise Controls such Patent Rights;
- (ii) to CureVac's knowledge, it has the full right, power and authority to grant the rights and licenses it purports to grant hereunder;
- (iii) neither CureVac nor any of its Affiliates has granted any Third Party any rights or licenses that would interfere or be inconsistent with GSK's rights and licenses hereunder;
- (iv) CureVac has received no written notice of or any written demand relating to any threatened or pending litigation, and no other matters are within CureVac's knowledge, which would reasonably lead it to believe that GSK's exercise of any rights purported to be granted by CureVac under this Agreement will infringe any Patent Rights or infringe or misappropriate any other intellectual property right of any Third Party;
- (v) there is no currently pending administrative proceedings or litigation and no administrative proceedings or litigation seeking to invalidate or otherwise challenge any CureVac Patent Right(s) has been threatened in writing;
- (vi) CureVac has not given any written notice to any Third Party asserting infringement by such Third Party of any of the CureVac Technology or LNP Technology and, to CureVac's Knowledge, there is no unauthorized use, infringement or misappropriation of the CureVac Technology;
- (vii) the CureVac Technology is free and clear of all encumbrances, security interests, options, and charges of any kind;
- (viii) to CureVac's knowledge, the In-Licensing Agreements are valid and effective and CureVac has not received a written notice of termination for any of these In-Licensing Agreements;
- (ix) to CureVac's knowledge, there is no ongoing litigation in respect of, litigation reasonably in prospect in connection with, and no reasonable prospect of termination under the In-Licensing Agreements by the respective counterparties under those agreements ahead of the respective expiry dates of such In-Licensing Agreements;
- (x) to CureVac's knowledge, the information and documents set forth in or referred to in the Disclosure Letter are true, complete and accurate in all material respects;
- (xi) to CureVac's knowledge, the information and documents regarding the In-Licensing Agreements, CureVac's portfolio of Patent Rights, toxicology studies, clinical data, process and analytical information, manufacturing process information, material filing and correspondence with Regulatory Authorities, disclosed in the [\*\*\*\*\*] e-data room prior to the Effective Date as a part of GSK's due diligence, is true, complete and accurate in all material respects; and

(xii) CureVac has disclosed to GSK any written correspondence sent to or received from Regulatory Authorities, all drug safety monitoring board meeting minutes and internal safety review committee meeting minutes for the [\*\*\*\*\*] as of its Initiation.

- 13.5 LNP Warranties.** To the extent permitted under the applicable LNP Agreement, CureVac hereby warrants to GSK on a pass-through basis each matter which is the subject of any representation or warranty given by each LNP Provider to CureVac under each applicable LNP Agreement.
- 13.6 Representations, Warranties of the Parties to Each Other.** CureVac and GSK each represents and warrants and covenants with respect to itself only as at the Effective Date that:
- (i) the execution, delivery and performance of this Agreement have been duly authorized by all necessary action on the part of such Party, its officers and directors, and does not conflict with, violate, or breach any agreement to which such Party is a party, or such Party's corporate charter, bylaws or similar organizational documents;
  - (ii) this Agreement constitutes a legal, valid and binding obligation of such Party that is enforceable against it in accordance with its terms, except as such enforceability may be limited by general principles of equity or to applicable competition, bankruptcy, insolvency, reorganization, moratorium, liquidation and other similar laws relating to, or affecting generally, the enforcement of applicable creditors' rights and remedies;
  - (iii) it is a company or corporation duly organized, validly existing, and in good standing under the laws of the jurisdiction in which it is incorporated.
- 13.7 Due Diligence.** Prior to the execution of any Ancillary Agreement, other than the Clinical Supply Agreement, GSK shall be entitled to perform further due diligence regarding CureVac's capabilities to perform in accordance with terms defined herein for such agreement. Without prejudice to the Parties' other rights and remedies, the Parties shall in good faith cooperate to address and remedy any issue identified during the due diligence referred to in this Section. For the avoidance of doubt, if GSK discovers a material issue regarding CureVac's capabilities to comply with such agreement, GSK may in addition to its other rights and remedies suspend the execution of any such agreement until such ground has been remedied by CureVac.
- 13.8 Disclaimer** Except as expressly set forth in this Agreement, each Party expressly disclaims, waives, releases, and renounces any representation or warranty of any kind, express or implied either in fact or by operation of law, by statute or otherwise, whether written or oral, or arising from course of performance, course of dealing or usage of trade, including any representation or warranty with respect to non-infringement, value, adequacy, freedom from fault, quality, efficiency, suitability, characteristics or usefulness, or merchantability or fitness for a particular purpose.
- 13.9 Limitation of Liability.** Except in the case of any breach of Section 11 or in case of willful misconduct or gross negligence, neither Party shall be liable to the other Party for any indirect, punitive or consequential damages, or for damages for loss of profits or loss of business opportunity, whether based on contract or tort, or arising under Applicable Laws or otherwise.

14. **TERM AND TERMINATION.**

- 14.1 **Term.** The term of this Agreement will commence on the Closing Date and end on the expiry of all applicable royalty payment obligations to CureVac under this Agreement, unless terminated earlier according to the terms and conditions of this Agreement ("**Term**").
- 14.2 **Termination at Will by GSK.** GSK may terminate this Agreement in its entirety or on a Program-by-Program basis, at any time without cause upon [\*\*\*\*\*] prior written notice to CureVac.
- 14.3 **Termination for Cause by Either Party in respect of a Program before First Commercial Sale.** On a Program-by-Program basis before the First Commercial Sale of a Product under a Program in a Territory, if either Party ("**Breaching Party**") commits a material breach or default of any of its obligations hereunder, such breach to include a material breach by GSK of its diligence obligations under Section 4.10 with respect to a Product, the other Party hereto ("**Non-Breaching Party**") may give the Breaching Party written notice of such material breach or default, and shall request that such material breach or default be cured as soon as reasonably practicable. If the Breaching Party fails to cure such breach or default within [\*\*\*\*\*] after the date of the Non-Breaching Party's written notice thereof, the Non-Breaching Party may terminate this Agreement in part in relation to the relevant Program by giving written notice of termination to the Breaching Party. If the Breaching Party indicates in writing that it will be unable or is unwilling to cure the breach, this Agreement may be terminated in part, in relation to the relevant Program (but not any other Program), by the Non-Breaching Party with immediate effect.
- 14.4 **Termination for Cause by Either Party in respect of a Program after First Commercial Sale.** On a Program-by-Program basis after the First Commercial Sale of a Product under a Program in a Territory, if: (i) GSK fails to pay any amount payable under Section 8 or any Ancillary Agreement; (ii) CureVac fails to pay any amount payable under any Ancillary Agreement; (iii) either Party commits any willful and material breach of the restrictions on any license granted to that Party pursuant to this Agreement; (iv) either Party commits a material breach of the non-compete obligations under Section 2.3; (v) GSK commits a material breach of its diligence obligations under Section 5.3, or (vi) either Party commits any persistent and material breach of Section 11, and the Party in breach of this Agreement (the "**Breaching Party**") fails to cure such breach or default within [\*\*\*\*\*] after the date of the written notice thereof from the other Party ("**Non-Breaching Party**"), the Non-Breaching Party may terminate this Agreement in relation to the relevant Product(s) (but not any other Program) by giving written notice of termination to the Breaching Party. If the Breaching Party indicates in writing that it will be unable or is unwilling to cure the breach, this Agreement may be terminated in relation to the relevant Product(s) by the Non-Breaching Party with immediate effect.
- 14.5 **Termination in respect of Anti-bribery and Corruption.** Either Party shall be entitled to terminate this Agreement in the circumstances specified in Section 12.9.

- 14.6 Termination in Part and Program Replacement.** If either Party terminates this Agreement with respect to a specific Program under this Section 14, or if GSK replaces a Program under Section 3.6, the rights and obligations of the Parties hereunder with respect to the specific Program shall terminate as at the effective date of such termination and the consequences set forth in Section 15 shall apply on a Program-by-Program basis.
- 14.7 Non-exclusive remedy.** Termination of this Agreement or in relation to a Program in accordance with Sections 14.3, 14.4, or 14.5 shall not affect or impair the Non-Breaching Party's right to pursue any legal remedy, including the right to recover damages, for any harm suffered or incurred by the Non-Breaching Party as a result of such breach or default.
- 15. CONSEQUENCES OF TERMINATION.**
- 15.1 Election by CureVac on Termination by GSK at Will or Termination by CureVac for Cause.** CureVac shall notify GSK in writing within [\*\*\*\*\*] of notice of termination in accordance with Sections 14.2, 14.3, 14.4, or 14.5 if CureVac wishes to:
- cease the Development and Commercialization of the relevant Product(s) under the relevant Program(s) and decline the transfer of any rights in relation to the Development, Manufacture and Commercialization of the relevant Products under this Agreement (the "**CureVac Cease Option**"); or
  - continue, itself or with a Third Party, with the Development and Commercialization of the relevant Product(s) under the relevant Program(s) (the "**CureVac Continue Option**").
- 15.2 Election by GSK on Termination by GSK for Cause.** GSK shall notify CureVac in writing within [\*\*\*\*\*] of notice of termination in accordance with Sections 14.3, 14.4, or 14.5 if GSK wishes to:
- cease the Development and Commercialization of the relevant Product(s) under the relevant Program(s) and decline the transfer of any rights in relation to Development, Manufacture and Commercialization of the relevant Products under this Agreement, (the "**GSK Cease Option**"); or
  - continue with the Development and Commercialization of the relevant Product(s) under the relevant Program(s) (the "**GSK Continue Option**").
- 15.3 Specific consequences of CureVac Cease Option and the GSK Cease Option.** If CureVac elects the CureVac Cease Option or GSK elects the GSK Cease Option, then with regard to the Program(s) in question:
- Reversion of Rights: At the effective date of termination, all of CureVac's rights to the CureVac Technology and LNP Technology shall automatically revert back to CureVac and all of GSK's rights to the GSK Technology shall automatically revert back to GSK.

- b. Wind-Down: Each Party shall, at its own cost (subject to Sections 15.3c and 15.3d), use all reasonable endeavors to wind-down any on-going activities and commitments in connection with this Agreement and the Ancillary Agreements by the effective date of termination.
- c. Costs (On Termination by GSK at Will): If CureVac elects the CureVac Cease Option following a termination of a Program by GSK in accordance with Section 14.2 while the R&D Plan for that Program has not been completed, GSK shall reimburse CureVac for the Development Costs set forth in the respective R&D Plan until the effective date of termination.
- d. Costs (On Termination by CureVac for Cause): If CureVac elects the CureVac Cease Option following a termination of a Program by CureVac for cause in accordance with Section 14.3, 14.4 or 14.5, GSK shall reimburse CureVac for the Development Costs set forth in the respective R&D Plan until the effective date of termination and reimburse CureVac for its demonstrable stranded costs arising from the early termination of the R&D Plan. CureVac shall use reasonable endeavors to mitigate those stranded costs.

**15.4 Specific consequences of the CureVac Continue Option.** If CureVac elects the CureVac Continue Option, then with regard to the Program(s) in question, the following shall apply:

- a. Transition: The JSC shall promptly meet to devise a transition plan, which provides for an orderly and cost-effective transition of, and which sets forth the responsibilities and a timetable for transferring, all Development, Manufacturing and Commercialization responsibilities to CureVac or a Third Party selected by CureVac for this purpose (the "**Transition Plan**"). Each Party will bear its own costs to agree and implement the Transition Plan unless CureVac has terminated this Agreement with respect to a specific Program for cause in accordance with Section 14.3, 14.4 or 14.5, in which case GSK shall reimburse CureVac for its reasonable and demonstrable direct costs incurred to implement the Transition Plan.
- b. Reversion of Rights: All of CureVac's rights to the CureVac Technology and LNP Technology shall automatically revert back to CureVac, except that if the date of termination occurs after the First Commercial Sale of the relevant Product, (i) the termination of the rights and obligations of the Parties, and the transfer and/or return of rights pursuant to this Section 15, shall take effect on a country-by-country basis, at time as CureVac is able to take over the Commercialization of the Product in such country where that Product is sold with no adverse impact on the continuous availability of Products in that country (the "**Cut-Over Date**") and (ii) until such date in such country, the licenses granted to GSK under this Agreement (including Article 2) and any rights and obligations associated with such licenses (including GSK's payment obligations under Section 8) shall survive.
- c. Transfer of Development Data and Regulatory Approvals. CureVac shall have the right to request in writing, as part of the Transition Plan:
  - (i) a complete copy of all Development Data Controlled by GSK to be provided in original form and access to all other Know-How in GSK's possession or under its Control relating to the Products, such Development Data and other Know-How to be provided within [\*\*\*\*\*] of such request; and

- (ii) the transfer of Regulatory Approvals held by GSK, its Affiliates or Sublicensees, and if Regulatory Approvals have not been obtained by GSK, its Affiliates or Sublicensees, CureVac may require that GSK transfers to CureVac the status of any application for the Regulatory Approvals and notifies the competent Regulatory Authority thereof and supplies CureVac with all documents and clinical data already prepared by GSK, its Affiliates or Sublicensees for the filing of applications for Regulatory Approvals (with GSK using its good faith efforts to promptly undertake such actions).
- d. GSK Trademark License: As part of the Transition Plan, on receipt of a written request from CureVac, GSK grants to CureVac an exclusive (even as to GSK), cost-free, perpetual and worldwide license (with the right to sublicense in multiple tiers) under the trademarks Controlled by GSK and used for the Products in the relevant jurisdiction(s) for the Manufacture and Commercialization of the Products in the Territory, excluding, however, any such trademarks – or such parts of a trademark - that include, in whole or part, any corporate name or logo of GSK, its Affiliates or Sublicensees, and excluding any trademark – or such part of a trademark - which contains the letters "[\*\*\*\*\*]" as prefix or suffix (in which case GSK will not oppose any application by CureVac to register a trademark which is similar to any trademark owned by GSK but does not use the letters "[\*\*\*\*\*]" as prefix or suffix).
- e. GSK Technology License: On a Product-by-Product and country-by-country basis effective from the Cut-Over Date, GSK grants to CureVac (i) an exclusive (even as to GSK), perpetual and worldwide license (with the right to sublicense in multiple tiers) under GSK's interest in Joint Product Inventions and Joint Other Inventions, and, upon CureVac's election, to be exercised no later than [\*\*\*\*\*] after the effective date of termination, (ii) a non-exclusive royalty-bearing, perpetual and worldwide license (with the right to sublicense in multiple tiers) under the other GSK Technology which has been used by GSK for the Development, Manufacture and/or Commercialization of the terminated Products and is required for the further Development, Manufacture and/or Commercialization of such Products, in each case of (i) and (ii) for the continued Development, Manufacture and Commercialization of the Products in the Territory.
- f. Post-Termination Financial Terms (Termination by GSK at Will): If GSK terminates this Agreement in its entirety or with respect to a specific Program in accordance with Section 14.2 and CureVac elects the CureVac Continue Option and the license to the GSK Technology under Section 15.4e(ii), then, on a Product-by-Product and country-by-country basis effective from the Cut-Over Date, in consideration of the licenses granted in Section 15.4e(ii), CureVac shall pay GSK royalties as forth in Exhibit 15.4.

- g. Post-Termination Financial Terms (Termination by CureVac for Cause): If CureVac terminates this Agreement with respect to a specific Program for cause in accordance with Section 14.3, 14.4 or 14.5, CureVac shall pay GSK the fair market value for acquisition by CureVac of the Program(s) and the associated rights and benefits pursuant to this Section 15.4, provided that CureVac may, if CureVac claims or seeks to claim damages in relation to breach of this Agreement by GSK, suspend the payment of such fair market value until the amount of damages suffered or incurred by CureVac has been agreed between the Parties or determined by an arbitration panel in accordance with Section 16.5, at which point those damages (if any) shall be set off against such fair market value payment (and any fair market value payment which would remain outstanding after the set off of damages shall become due and payable within [\*\*\*\*\*] after the agreement or determination of the amount of damages).
- h. For the purposes of Section 15.4h, the "fair market value" shall be agreed by the Parties, or if the Parties are unable to agree within [\*\*\*\*\*] from the date of election in accordance with Section 15.1, either Party may refer the matter to be determined by a panel of experts in accordance with this Section 15.4h. The Parties shall agree on the appointment of the panel of experts, comprising three members experienced in the biopharmaceutical sector, in transactions within the biopharmaceutical sector, and the valuation of technology of the biopharmaceutical sector, and shall agree with the experts the terms of their appointment. If the Parties are unable to agree on the identity of the experts within [\*\*\*\*\*] after expiry of the aforementioned term of [\*\*\*\*\*], or if any of the persons proposed is unable or unwilling to act, then each Party shall nominate one expert, which two experts shall together select the third and final expert, who shall preside the expert panel. The experts shall act on the following basis: (i) on their appointment, the experts shall confirm their neutrality, independence and the absence of conflicts in determining the fair market value for the rights granted pursuant to this Section 15; (ii) the experts shall act as experts and not arbitrators; (iii) the experts' determination shall (in the absence of manifest error) be final and binding on the Parties and not subject to appeal; (iv) the experts shall decide the procedure to be followed in the determination in accordance with this Agreement; (v) the costs of the determination, including the fees and expenses of the experts (but excluding the parties' own costs which shall be borne by the Party incurring those costs), shall be borne by GSK; and (vi) the expert determination and all matters connected with it shall be held in complete confidence by each of the Parties and shall not be disclosed to any other person except as permitted under Section 11.

**15.5 Specific Consequences of the GSK Continue Option.**

If GSK terminates this Agreement or a Program under Sections 14.3, 14.4 or 14.5, the rights and obligations of the Parties hereunder shall terminate as at the effective date of such termination (or, if later, the Cut-Over Date) and the consequences set forth in this Section 15 shall apply:

- a. Survival of licenses: The licenses granted to GSK under this Agreement (including under Section 2) and any rights associated with such licenses shall survive the termination of this Agreement.

- b. Post-Termination Financial Terms: All payment obligations under Section 8 shall remain in effect, provided that with respect to milestones and royalties arising after the effective date of termination, GSK may, if GSK also claims or seeks to claim damages in relation to breach of this Agreement by CureVac, suspend the payment of such milestone and royalty payments until the amount of damages suffered or incurred by GSK has been agreed between the Parties or determined by an arbitration panel in accordance with Section 16.5, at which point those damages (if any) shall be set off against such milestone and royalty payments (and any milestone or royalty payment which would remain outstanding after the set off of damages shall become due and payable within [\*\*\*\*\*] after the agreement or determination of the amount of damages).
- c. Costs (On Termination by GSK for Cause): CureVac shall undertake (at its own cost and without the right to be reimbursed) the transfer of Know-How in accordance with Sections 4.7 and 5.2.3, and shall reimburse all reasonable and demonstrable direct costs and expenses incurred by GSK in connection with those activities.

#### 15.6 General Consequences of Expiry and Termination.

On any termination of this Agreement in its entirety or on a Program-by-Program basis the rights and obligations of the Parties hereunder shall terminate as at the effective date of such termination (unless stated otherwise in this Section 15) and the following shall apply:

- a. Reversion of Rights on Expiry: Upon expiry of this Agreement in a country and provided and to the extent that this Agreement is not terminated after such expiry by CureVac in accordance with Section 14.3, Section 14.4, or Section 14.5, or by GSK pursuant to Section 14.2, the licenses granted to GSK under Section 2 for such country shall become a fully paid-up, perpetual, and non-exclusive license.
- b. Reversion of Rights on Termination: Except as set forth in this Section 15, the rights and obligations of the Parties under this Agreement shall automatically lapse as at the effective date of the termination in question.
- c. Return of Information: No later than [\*\*\*\*\*] after the effective date of termination, each Party shall return or cause to be returned to the other Party or, at the other Party's option, destroy (and certify in writing the destruction of), all Confidential Information of the Disclosing Party in tangible form received from the other Party and all copies in any medium thereof; *provided, however*, that each Party may retain any Confidential Information reasonably necessary for such Party's continued Development, Manufacture or Commercialization of the Products pursuant to this Section 15, and may retain the Confidential Information solely for the purpose of ensuring its compliance with this Agreement and Applicable Law by electronic files created in the ordinary course of business during automatic system back-up procedures pursuant to its electronic record retention and destruction practices that apply to its own general electronic files and information so long as such electronic files are (i) maintained only on centralized storage servers (and not on personal computers or devices), (ii) not accessible by any of its personnel (other than its information technology specialists), and (iii) are not otherwise accessed subsequently except with the written consent of the other Party or as required by law. Such retained copies of documents and Confidential Information shall remain subject to the confidentiality and non-use obligations set forth in this Agreement.

d. **Settlement of Outstanding Sums:** Each Party shall pay all amounts then due and owing as at the termination effective date.

e. **Continuation of Ongoing Clinical Trials:** In any event of termination, each Party may complete any clinical trial involving a Product it has initiated prior to the termination of this Agreement in accordance with the protocol for such trial, at its cost and such Party shall be granted by the other Party a cost-free, non-exclusive, sublicensable (as set forth in this Agreement), worldwide license under the CureVac Technology and the LNP Technology or respectively the GSK Technology to complete such clinical trials in accordance with their protocols.

**15.7 Effect of Expiry or Termination; Survival.** Expiry or termination of this Agreement shall not relieve the Parties of any obligation accruing prior to such expiry or termination. Any expiry or termination of this Agreement shall be without prejudice to the rights of either Party against the other accrued or accruing under this Agreement prior to expiry or termination. The provisions of Sections 1, 2.6, 4.6, 4.8.6, 8.9, 9.1, 9.3, 9.4, 11, 13.1, 13.2, 13.3, 13.8, 13.9, 15, 16.3, 16.4, 16.5, 16.7, 16.8, 16.11 and 16.12 and all other provisions contained in this Agreement that by their explicit terms or from which it is clear from the context survive expiry or termination of this Agreement, and any schedules contained in this Agreement to which reference is made in any surviving term, shall survive the expiry or termination of this Agreement. In the event of a termination of this Agreement with respect to only one of the Programs, and continuation of other Programs under this Agreement, the termination and consequences of termination provisions only apply to the terminated Program, and the Agreement will remain in full force and effect with respect to the continuing Programs.

**16. GENERAL PROVISIONS.**

**16.1 Assignment.** This Agreement may not be assigned or otherwise transferred by either Party without the prior written consent of the other Party, which consent will not be unreasonably withheld, conditioned or delayed; *provided, however*, each of the Parties may, without such consent, but with notification, assign this Agreement and its rights and obligations hereunder to any of its Affiliates or in connection with the transfer or sale of all or substantially all of the portion of its business to which this Agreement relates or in the event of its merger or consolidation with a Third Party. Any permitted assignee will assume all obligations of its assignor under this Agreement in writing concurrent with the assignment. Any purported assignment in violation of this Section 16.1 will be void. Except as otherwise provided herein, this Agreement shall be binding upon and inure to the benefit of the Parties and their successors and permitted assignors under this Section 16.1.

**16.2 Force Majeure.** If the performance of any part of this Agreement by either Party, or any obligation under this Agreement, is prevented, restricted, interfered with or delayed by reason of any cause beyond the reasonable control of the Party liable to perform, unless conclusive evidence to the contrary is provided, the Party so affected shall, upon giving written notice to the other Party, be excused from such performance to the extent of such prevention, restriction, interference or delay, provided that the affected Party shall use commercially reasonable efforts to avoid or remove such causes of non-performance and shall continue performance with the utmost dispatch whenever such causes are removed. When such circumstances arise and persist for a period of at least sixty (60) calendar days, the Parties shall discuss what, if any, modification of the terms of this Agreement may be required in order to arrive at an equitable solution.

**16.3 Notices.** All notices which are required or permitted hereunder shall be in writing and sufficient if delivered personally, sent by e-mail, sent by internationally-recognized overnight courier or sent by registered or certified mail, postage prepaid, return receipt requested, addressed as follows:

(i) if to CureVac, addressed to:

CureVac AG

Attention: CEO and General Counsel

with copy to: General Counsel

Address: Friedrich-Miescher-Str. 15, 72076 Tübingen, Germany

Email: [\*\*\*\*\*]

(ii) if to GSK, addressed to:

GlaxoSmithKline Biologicals S.A.

Attention: President of GSK Vaccines

with copy to: Vaccines General Counsel

Address: Avenue Fleming 20, 1300 Wavre, Belgium

Email: [\*\*\*\*\*]

or to such other address(es) as the Party to whom notice is to be given may have furnished to the other Party in writing in accordance herewith. Any such notice shall be deemed to have been given: (a) when delivered if personally delivered or sent by e-mail on a Business Day (or if delivered or sent on a non-Business Day, then on the next Business Day); (b) on the Business Day after dispatch if sent by nationally-recognized overnight courier; or (c) on the [\*\*\*\*\*] following the date of mailing, if sent by mail.

**16.4 Governing Law.** This Agreement and all disputes arising hereunder, shall be exclusively governed by, and interpreted and enforced in accordance with Belgian law. The United Nations Convention of International Contracts on the Sale of Goods (the Vienna Convention) does not apply to this Agreement.

**16.5 Dispute Resolution.**

**16.5.1** Unless otherwise set forth in this Agreement, in the event of any dispute arising out of or in connection with this Agreement, including any alleged breach under this Agreement or any dispute relating to the validity, performance, construction or interpretation of this Agreement, the Parties shall refer such dispute to the CEO (or its C-level delegate) of CureVac and the President of Vaccines (or another member of the global corporate executive team) of GSK. If the dispute has not been settled pursuant to the said rules within [\*\*\*\*\*] following the reference of the dispute to the senior management representatives of the Parties, either Party may submit the dispute to final and binding arbitration.

**16.5.2** Any dispute arising out of or in connection with this Agreement, including any issue relating to the validity, performance, construction or interpretation of this Agreement, which cannot be resolved amicably between the Parties after following the procedure set forth in Section 16.5.1, shall be submitted to and settled by arbitration in accordance with the arbitration rules of the World Intellectual Property Organization (the "**WIPO**") in effect on the date of the commencement of the arbitration proceedings. The existence, nature and details of any such dispute(s), and all communications between the Parties related thereto, shall be considered Confidential Information of the Parties and shall be treated in accordance with the terms of Section 11 above. Any Confidential Information may be disclosed by either Party to counsel, experts or other advisors on the arbitration under obligations of confidentiality. The decision of the arbitrators shall be final and binding upon the Parties. The location of arbitration will be Zurich, Switzerland. The arbitration will be heard and determined by three (3) arbitrators, with one arbitrator being appointed by each Party and the third arbitrator being appointed by the WIPO. The language of the arbitration proceeding will be English. Notwithstanding the provisions of this Section 16.5.2, each Party shall have the right to seek interim injunctive relief in any court of competent jurisdiction as such Party deems necessary to preserve its rights and to protect its interests.

**16.6 Severability.** If any provision of this Agreement is determined by any court or administrative tribunal of competent jurisdiction to be invalid or unenforceable, the Parties shall negotiate in good faith a replacement provision that is commercially equivalent, to the maximum extent permitted by Applicable Law, to such invalid or unenforceable provision. The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of the other provisions of this Agreement. Nor shall the invalidity or unenforceability of any provision of this Agreement in one country or jurisdiction affect the validity or enforceability of such provision in any other country or jurisdiction in which such provision would otherwise be valid or enforceable.

- 16.7 Entire Agreement and Amendments.** This Agreement, together with all Exhibits attached hereto, constitutes the entire agreement between the Parties regarding the subject matter hereof, and supersedes all prior agreements, understandings and communications between the Parties, with respect to the subject matter hereof, including the Confidentiality Agreements. The foregoing may not be interpreted as a waiver of any remedies available to either Party as a result of any breach prior to the Effective Date, by the other Party of its obligations under the Confidentiality Agreements. No modification or amendment of this Agreement shall be binding upon the Parties unless in writing and executed by the duly authorized representative of each of the Parties; this shall also apply to any change of this Section 16.7.
- 16.8 Waivers.** The failure by either Party hereto to assert any of its rights hereunder, including the right to terminate this Agreement due to a breach or default by the other Party hereto, shall not be deemed to constitute a waiver by that Party of its right thereafter to enforce each and every provision of this Agreement in accordance with its terms.
- 16.9 Counterparts.** This Agreement may be executed in any number of counterparts, by original or electronic (including "pdf") signature, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.
- 16.10 Independent Contractors.** The Parties are independent contractors and this Agreement shall not constitute or give rise to an employer-employee, agency, partnership or joint venture relationship among the Parties and each Party's performance hereunder is that of a separate, independent entity.
- 16.11 Third Parties.** None of the provisions of this Agreement shall be for the benefit of or enforceable by any Third Party which shall be a Third Party beneficiary to this Agreement.
- 16.12 Costs.** Except as is otherwise expressly set forth herein, each Party shall bear its own expenses in connection with the activities contemplated and performed hereunder.
- 16.13 Insurance.** Each Party will procure and maintain during the Term and for [\*\*\*\*] after termination or expiry of this Agreement, commercial general liability insurance from a reputed insurance company or insurer reasonably acceptable to the other Party with coverage limits of not less than EUR [\*\*\*\*] per occurrence for product liability and clinical trials liability. GSK will be permitted to satisfy any or all of its obligations under this Section 16.13 through a program of self-insurance. Such insurance policies will be primary and non-contributing with respect to any other similar insurance policies available to the other Party or its Affiliates. Any deductibles for such insurance will be assumed by insured Party. Each Party will provide the other Party with evidence of such insurance upon the other Party's request and prior to expiry of any one coverage. Any insurance will not be construed to create a limit of the insured Party's liability with respect to its indemnification obligations under this Agreement.

**Clearance Template**

**1. Vaccine Products**

For vaccine Products, the below table must be used for the clearance of Antigens. For each clearance, the primary vaccine Antigen must be reported in the first row, and any additional vaccine Antigens (if any) must be reported in the subsequent rows.

Organism naturally encoding Target (e.g. virus, bacterium)	Transcript Identifier: NCBI Refseq transcript ID	Gene Identifier: NCBI Refseq Gene ID	Gene Name and Synonyms	DNA Sequence coordinates or locus	Protein Amino Acid Sequence: FASTA format

**2. Antibody Products**

For Antibody Products each clearance request shall (i) designate the primary Antibody and any additional Antibody(ies) (if any) of such Antibody Product, and (ii) contain for each Antibody the following information:

- (A) the common name for such Antibody and any known synonyms, if applicable;
- (C) a reference amino acid sequence for the baseline protein (i.e., the protein from which variants are established); and
- (D) a description of the biological activity of interest of such Antibody. In case the Antibody binds to a non-human protein or a non-human antigen the identity of the non-human protein or non-human antigen should be identified using the above table as for Vaccine Products.

**Issued: [DAY + MONTH] 2020, London UK; Tübingen, Germany/ Boston, MA, USA**

**GSK and CureVac announce strategic mRNA technology collaboration**

- Companies to collaborate on mRNA vaccine and monoclonal antibody research programmes in infectious diseases
- GSK to make equity investment of £130m (€150m) in CureVac, and an upfront payment of £104m (€120m)

GlaxoSmithKline plc (LSE/NYSE: GSK) and CureVac today announced the signing of a strategic collaboration agreement for the research, development, manufacturing and commercialisation of up to five mRNA-based vaccines and monoclonal antibodies (mAbs) targeting infectious disease pathogens. The collaboration complements GSK's existing mRNA capabilities with CureVac's integrated mRNA platform.

mRNA (messenger RNA) technology is a rapidly progressing, cutting-edge platform for the development of new vaccines and medicines, potentially expanding the range of diseases which can be prevented or treated, while also promising to significantly speed up development and manufacturing. mRNA enables protein synthesis in the human body, carrying the genetic code required for cells to manufacture and express proteins. By using mRNA technology in vaccines and medicines, specific proteins, or antigens, can be produced by the body's own cells, enabling the human immune system to prevent or fight disease.

CureVac's leadership in mRNA technology, along with its mRNA manufacturing capability, complements GSK's existing scientific leadership in vaccines, including GSK's own self-amplifying mRNA (SAM) vaccine technology platform, and further builds on GSK's growing capability in mAbs innovation, aligned to its R&D focus on the science of immunology. Advancing mRNA-based vaccine and treatment technologies is also expected to play a role in further improving response against future pandemics.

Roger Connor, President GSK Vaccines, said: “GSK’s self-amplifying mRNA (SAM) vaccine technology has shown us the potential of mRNA technology to advance the science of vaccine development, and CureVac’s experience complements our own expertise. Through the application of mRNA technology, including SAM, we hope to be able to develop and scale up advanced vaccines and therapies to treat and prevent infectious diseases quicker than ever before.”

Dr. Franz-Werner Haas, acting Chief Executive Officer of CureVac, added: “We are delighted to partner with GSK. With this collaboration, we are gaining a world-class partner whose expertise and global footprint will allow us to further develop and translate the value of our platform into potential products for the world.”

The companies will combine their mRNA expertise on development opportunities across a range of infectious disease pathogens, selected with the potential to best leverage the advantages of this platform technology, while addressing significant unmet medical need and economic burden. CureVac’s existing COVID-19 mRNA and rabies vaccines research programmes are not included in the collaboration announced today.

Under the terms of the deal, GSK will make an equity investment in CureVac of £130m (€150m), representing an approximate 10% stake, an upfront cash payment of £104m (€120m) and a one-time reimbursable payment of £26m (€30m) for manufacturing capacity reservation, upon certification of CureVac’s commercial scale manufacturing facility currently under construction in Germany.

CureVac will be eligible to receive development and regulatory milestone payments of up to £277m (€320m), commercial milestone payments of up to £329m (€380m) and tiered royalties on product sales.

GSK will fund R&D activities at CureVac related to the development projects covered by the collaboration. CureVac will be responsible for the preclinical- and clinical-development through Phase 1 trials of these projects, after which GSK will be responsible for further development and commercialization. CureVac will be responsible for the GMP manufacturing of the product candidates including for commercialization, and will retain commercialization rights for selected countries for all product candidates.

#### **About GSK**

GSK is a science-led global healthcare company with a special purpose: to help people do more, feel better, live longer. For further information please visit [www.gsk.com/about-us](http://www.gsk.com/about-us).

#### **About CureVac’s mRNA technology platform**

CureVac’s mRNA technology platform has shown potential in the development and production of mRNA based vaccines and therapeutics. CureVac’s RNAoptimizer platform aims to optimize the properties of mRNA medicines based on its three core pillars: protein design, mRNA optimization and mRNA delivery. The technology can be tailored to induce varying degrees of immune responses against specific protein antigens of choice, potentially providing potent prophylactic vaccines for the prevention of infectious diseases, such as Rabies, as well as immunotherapies for the treatment of cancer. The technology can also be adapted to avoid immune activation for purposes of protein therapy and antibodies, thereby providing potential new therapeutic modalities for patients suffering from a vast range of diseases.

#### **About CureVac**

CureVac is a leading clinical stage biotechnology company in the field of messenger RNA (mRNA) technology with 20 years of expertise in developing and optimizing this versatile molecule for medical purposes. The principle of CureVac’s proprietary technology is the use of mRNA as a data carrier to instruct the human body to produce its own proteins capable of fighting a wide range of diseases. The company applies its technologies for the development of cancer therapies, antibody therapies, the treatment of rare diseases, and prophylactic vaccines. CureVac has received significant investments, amongst others from dievini Hopp BioTech holding and the Bill & Melinda Gates Foundation. In June 2020, the German Federal Ministry of Economics and Energy announced its commitment to invest 300 million Euros in CureVac through the Kreditanstalt für Wiederaufbau (KfW). CureVac has also entered into collaborations with multinational corporations and organizations, including Boehringer Ingelheim, Genmab, CRISPR Therapeutics, the Bill & Melinda Gates Foundation, CEPI and others. CureVac is headquartered in Tübingen, Germany with sites in Frankfurt and Boston, USA.

**Exhibit 12.5**  
**Data Protection Terms**

The Parties agree that the processing of Personal Information under or in connection with this Agreement shall be in accordance with this Exhibit, including all Annexes.

**1. Definitions**

In this Exhibit:

"**CureVac**" means CureVac as defined in the Agreement and its Affiliates.

"**Data Protection Authority**" means each person having regulatory or supervisory authority over GSK or CureVac in the area of protection of Personal Information;

"**Data Protection Laws**" means: (a) the GDPR; and (b) all other laws concerning the processing of Personal Information;

"**GDPR**" means the General Data Protection Regulation (EU) 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data;

"**GSK**" means GSK as defined in the Agreement and its Affiliates.

"**Party**" or "**Parties**" means CureVac and GSK as defined in this Exhibit.

"**Personal Information**" means information relating to an identified or identifiable individual;

"**Personal Information Breach**" means any actual breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, Personal Information transmitted, stored or otherwise processed; and

"**Transferred Personal Information**" means any Personal Information that is transferred pursuant to this Agreement (i) that is transferred to CureVac by GSK operating in the European Union; or (ii) that is transferred to GSK by CureVac operating in the European Union.

**2. Data Processing**

a. Status of each Party under Data Protection Laws

GSK and CureVac acknowledge that the status of each Party is a question of fact determined under Data Protection Laws. Without limiting the foregoing, GSK and CureVac each understand that, in relation to the Transferred Personal Information, GSK and CureVac independently determine how and why Transferred Personal Information is processed (and accordingly each acts as a controller) and all processing of Transferred Personal Information shall be undertaken in accordance with Annex 1 (Controller Terms) to this Exhibit 12.5.

b. Description of processing

The Parties will document the following information in writing (including in electronic form)

<b>Duration, nature and purpose of processing</b>	
Duration of processing	[to be documented]
Nature and purpose of processing	[to be documented]
<b>Personal Information</b>	
Individuals may include any of:	[to be documented]
Categories of Personal Information may include any of:	[to be documented]
Special categories of Personal Information may include any of:	[to be documented]

3. **Termination or expiry**

On termination or expiry of this Agreement, this Exhibit shall survive and continue in full effect for as long as Transferred Personal Information is processed by the other Party.

4. **Further Assurance**

- a. If any Data Protection Authority adopts revised standard contractual clauses for the matters addressed in this Exhibit (including any Annex) and one Party notifies the other Party that it wishes to incorporate any element of those standard contractual clauses into this Exhibit, the other Party shall agree to changes (limited only to the extent of the requirement under such revised standard contractual clauses) as reasonably requested by such Party.
- b. Both Parties agree that, upon the request of any Party, they shall execute any specific form of data transfer agreement as reasonably requested by such Party to enable the other Party to comply with applicable Data Protection Laws or the requirements of any Data Protection Authority.

ANNEX 1 TO EXHIBIT 12.5 - CONTROLLER TERMS

**1. General terms**

- a. Subject to the remaining provisions of this Annex 1, in relation to the processing of all Transferred Personal Information, each Party:
  - i. shall comply with its obligations under Data Protection Laws; and
  - ii. acknowledges that, except as expressly stated otherwise under this Annex 1 or otherwise in the Agreement, it is (as between the Parties) solely responsible for meeting all of its obligations under Data Protection Law.

**2. Legal basis and privacy notices**

- a. Unless expressly agreed otherwise in writing, each Party shall be responsible for the lawfulness of the collection and disclosure to the other Party of the Transferred Personal Information, in particular, for obtaining any consent required by law from all individuals to whom the Transferred Personal Information relates in respect of all processing undertaken by that Party (including any disclosure to the other Party).
- b. If the transferring Party obtains consent for the processing of Transferred Personal Information, such consent shall cover the transfer and the further processing of Transferred Personal Information by the other Party for the purposes identified in this Exhibit.
- c. Unless expressly agreed otherwise in writing, each Party shall be responsible for providing privacy notices to all individuals to whom the Transferred Personal Information relates in respect of all processing undertaken by that Party. If either Party expressly agrees in writing to provide a privacy notice on behalf of the other Party, it shall ensure that the relevant privacy notices effectively address all information required to be provided under Data Protection Laws and take account of any reasonable proposals by the other Party.

**3. Communications**

- a. If either Party receives any communication from a Data Protection Authority which relates directly or indirectly to:
  - i. the other Party's processing of Transferred Personal Information; or
  - ii. a potential failure to comply with Data Protection Laws in relation to the processing of Transferred Personal Information,the receiving Party, shall, to the extent permitted by Applicable Laws, promptly forward the communication to the other Party and provide the other Party with reasonable cooperation and assistance in relation to the same.

**4. Handling of transferred personal information**

- a. Each Party shall ensure that Transferred Personal Information supplied to it by or on behalf of the other Party:
  - i. is only used for the purposes for which it was collected;
  - ii. is not disclosed to any of its staff unless those persons that have committed themselves to confidentiality and have undergone appropriate training in data protection;
  - iii. is transferred to another Party or Third Parties only: in accordance with Applicable Laws; and
  - iv. is kept securely, including by application of the measures set out in Annex 2 (Information Security) to this Exhibit 12.5.

**5. Rights of individuals**

If an individual makes a written request to either Party to exercise any of their rights under Data Protection Laws in respect of Transferred Personal Information, the receiving Party shall respond to that request in accordance with Data Protection Laws. To the extent the request concerns processing of Transferred Personal Information undertaken by the other Party, the receiving Party shall: (i) promptly forward the request to the other Party; and (ii) cooperate and provide reasonable assistance in relation to that request to enable the other Party to respond in accordance with Data Protection Laws.

**6. Personal information breach**

- a. Without limiting any provision of Annex 2 (Information Security) to this Exhibit 12.5, if a Party becomes aware of a Personal Information Breach affecting Transferred Personal Information supplied to it by the other Party, the Party shall:
    - i. notify the other Party without undue delay, and provide the other Party with a reasonable description of the Personal Information Breach without undue delay as such information becomes available; and
- not publish any communication concerning the Personal Information Breach without first consulting the other Party, save that it may disclose a breach to the extent required by Applicable Laws (e.g. to Data Protection Authority or to individual(s)).

**ANNEX 2 TO EXHIBIT 12.5 – INFORMATION SECURITY**

*[to be completed as soon as reasonably practicable after the Closing Date]*

**Exhibit 13.4**  
**Disclosure Letter**

[\*\*\*\*\*]

**Exhibit 15.4**  
Post-Termination Royalties

Where this Exhibit 15.4 applies, CureVac shall pay GSK, on a Product-by-Product and country-by-country basis, the royalty payments set forth below for Net Sales by CureVac, its Affiliates, or Sublicensees of such Product, depending in what stage of development that Product finds itself at the effective date of termination. With respect to any payments to be made by CureVac to GSK, the definition of "Net Sales" in Section 1.132 and the provisions of Sections 8.7.2, 8.7.3, 8.7.8, and 8.8 to 8.11 shall apply *mutatis mutandis*.

## REDACTED

Certain identified information, indicated by [\*\*\*\*\*], has been excluded from the exhibit because it is both (i) not material and (ii) would likely cause competitive harm if publicly disclosed.

**Amendment Two to Development and Option Agreement**

This Amendment Two to the Development and Option Agreement (this "**Amendment**"), dated as of July 10, 2020 (the "**Amendment Two Effective Date**"), is made by and between CureVac AG, a German stock corporation with offices at Friedrich-Miescher-Strasse 15, 72076 Tubingen, Germany ("**CureVac**"), and Acuitas Therapeutics Inc., a British Columbia corporation ("**Acuitas**") and amends and restates the Development and Option Agreement dated April 29, 2016 (as amended by the Side Agreement and Amendment Number One dated December 1, 2016) between CureVac and Acuitas (the "**Development and Option Agreement**"). Each of CureVac and Acuitas may be referred to herein as a "**Party**" or together as the "**Parties**."

**WHEREAS**, Acuitas and CureVac entered into that certain Development and Option Agreement effective April 29", 2016 relating to the evaluation of and options to licence Acuitas LNP Technology for the research, development, manufacture and/or commercialisation of products incorporating Acuitas LNP Technology and CureVac Technology;

**WHEREAS**, pursuant to the Side Agreement and Amendment Number One dated December 1, 2016 to the Development and Option Agreement, Acuitas and CureVac agreed to include in the Work Plan the evaluation of Acuitas LNP Technology together with CureVac Technology relating to Gene Editing and to discuss and negotiate in good faith the terms and conditions under which the Development and Option Agreement will be amended to encompass Licensed Products useful for Gene Editing purposes;

**WHEREAS**, CureVac and Acuitas now wish to amend the Development and Option Agreement to include therein the terms and conditions for Exchange Licenses (as defined below);

**NOW, THEREFORE**, in consideration of the mutual covenants and representations contained herein, and for other good and valuable consideration, the amount and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

**Section One. Defined Terms.** Capitalized terms not defined herein have the definitions set forth in the Development and Option Agreement.

**Section Two. Amendments.** Article 5 of the Development and Option Agreement is hereby amended to add the following Section 5.4.

5.4 Exchange Licenses. CureVac may elect to designate up to [\*\*\*\*\*] of the Non-exclusive Licenses granted pursuant to this Agreement to be Exchange Licenses. For each Non-exclusive License designated an Exchange License, CureVac will have the option for a period of [\*\*\*\*\*] from the Amendment Two Effective Date (the "Exchange Period") to exchange the Primary Vaccine Target and any Additional Vaccine Targets in that license for an alternate Primary Vaccine Target and any Additional Vaccine Targets by submitting a written notice to Acuitas and following the escrow procedures set forth in Article 4 and the Option exercise procedures in this Article 5. If the proposed new Vaccine Target(s) are not subject to Pre-existing Restrictions, the original Vaccine Target(s) will be released by the Escrow Agent and the designated Exchange License will convert to a license to the new Vaccine Target(s) upon payment to Acuitas of an exchange fee of Three Million Dollars (US\$3,000,000). Milestones and fees paid with respect to the Licensed Products to the original Vaccine Targets will not be creditable against Milestones and fees earned for the Licensed Products to the new Vaccine Targets. For clarity, CureVac will have the right to exchange [\*\*\*\*\*] Primary Vaccine Targets, and any associated Additional Vaccine Targets, with [\*\*\*\*\*] alternate Primary Vaccine Targets, and any associated Additional Vaccine Targets and can exercise this right either for different original Exchange Licenses or multiple times for the same original Exchange License, or a combination of both, up to a maximum of [\*\*\*\*\*] total alternate Primary Vaccine Targets. With respect to such Exchange Licenses, the clearance through the Escrow Agent and the Target Reservation mechanism under this Agreement, as well as all other provisions under this Agreement addressing the Target Reservation and Option exercise with respect to the Exchange Licenses and the Primary Vaccine Target and Additional Vaccine Targets under such Exchange Licenses will continue to apply for the Exchange Period. This Section 5.4 shall apply accordingly to Antibodies binding to a non-human protein or non-human antigen. Furthermore, this Section 5.4 is without prejudice to CureVac's right to change the Additional Vaccine Targets or Antibodies (as stipulated in Section 4.2(b) of a Non-exclusive License Agreement). For further clarity, no additional option exercise fee with respect to such new licenses for the Licensed Products to the new Vaccine Targets is payable under the Agreement.

---

The first sentence of Section 9.6 of the Development and Option Agreement is hereby amended as follows:

9.6. Survival. In addition to the termination consequences set forth in Section 9.5, the following provisions will survive termination or expiration of this Agreement, as well as any other provision which by its terms or by the context thereof, is intended to survive such termination: Sections 3.1 (f), 3.3, 5.4, 8.4, 8.5, 8.7, 8.8, 9.4, 9.5, 9.6, 10.1, 10.4, 10.6, 10.7, 10.9, 10.10 and 10.11 and Articles 1, 6 and 7.

**Section Three. Amendment Execution Fee.** Within [\*\*\*\*\*] after the Amendment Two Effective Date, Cure Vac will pay to Acuitas an amendment execution fee of Five Million Dollars (US\$5,000,000).

**Section Four. Miscellaneous.** Except as amended hereby, all other provisions of the Development and Option Agreement shall remain unchanged and in full force and effect in accordance with their terms. In the event of a conflict between the terms and conditions of this Amendment and the terms and conditions of the Development and Option Agreement, the terms and conditions of this Amendment shall control.

This Amendment may be executed simultaneously in two or more counterparts, and by PDF or other electronic transmission, each of which counterparts shall be deemed an original, but all of which together shall constitute one and the same instrument, provided that all such counterparts, in the aggregate, shall contain the signatures of all parties hereto.
